Thin cylindrical shells of perfectly plastic rigid material, analyzing dynamic plastic deformation under internal impulsive pressure

11 p12139 A70-26413

Thin shell design for minimum bending stresses and transverse shear for composite materials with low interlaminar shear strength

11 p12141 A70-26490

Stress tensor and displacement vector in thin elastic shells/plates derived from three dimensional nonlinear equations using asymptotic integration

11 p12142 A70-26634

Nonlinear thin shell theory equations reduced to equations in unknowns with boundary conditions

11 p12143 A70-26653

Natural frequencies of thin cantilever cylindrical shells, using Flugge equations of motion and Rayleigh-Ritz method

11 p12146 A70-26704

Thin walled tubes plastic instability under combined internal pressure and axial load for open and closed end conditions

12 p2322 A70-27216

Stress-strain state of thin revolving shells composed of multiple variable thickness layers, assuming layers deformation free of slipping and separation

12 p2322 A70-27332

Thin cylindrical shells elastic buckling under uniform axial compression, considering Kirchhoff-Love hypotheses in critical stress determinations

12 p2324 A70-27396

Thin circular cylindrical polyvinyl chloride plastic shells tested under axial compression and end-shortening conditions for buckling

12 p2324 A70-27473

Glass-plastic thin cylindrical shells carrying capacity dependence under axial and external loads on combinations of longitudinal and transverse reinforcing layers

12 p2259 A70-27527

Equilibrium equations for thin multilayer shells with variable thickness, assuming simultaneous work without friction under loads

12 p2325 A70-27556

Bar produced by sliding thin walled cross section along three dimensional curve, determining twisted shell curvilinear middle plane and deformations by differential geometry

12 p2326 A70-27796

Thin walled shells of revolution equations boundary conditions formulated by stress state separation, giving small parameter perturbation theorem

12 p2327 A70-28191

Thin walled duralumin cylinders catastrophic fracture analysis by linear elastic fracture mechanics noting fatigue crack propagation

13 p2434 A70-29173

Initial thermal stresses effect on natural oscillation frequencies of thin cylindrical elastic shells, obtaining linearized equations of motion and boundary conditions

13 p2514 A70-29286

Optimum overlap design of thin walled tubular extendible spacecraft structures under solar heating in zero-g environment

14 p2657 A70-30762

Thin spherical shell postbuckling behavior with constrained rigid boundary under edge load, using deep and shallow shell theory

14 p2658 A70-30848

Thin shells stiffness matrix and shear by finite curved triangular elements based on discrete Kirchhoff hypothesis

14 p2659 A70-31129

Thin cylindrical shells flutter analysis in supersonic flow, using linearized potential theory

15 p2815 A70-31916

Thin two dimensional shells static linear elastic deformations analysis using difference based variational method

15 p2815 A70-32001

Internal pressure deformation of thin cylindrical shells of materials with nonlinear stress-strain relations, considering Al alloy shell and axial strain

15 p2816 A70-32009

Thin elastic shell deformation, considering random imperfections in regions adjacent to contour

15 p2817 A70-32162

Influence function for thin toroidal shell under uniformly distributed axisymmetric load, determining stresses and displacements in various cross sections

15 p2817 A70-32163

Zero moment /membrane/ theory for anisotropic thin walled shells, deriving expressions for stress-strain states and displacements under torsion

15 p2824 A70-32894

Gravitational instability and collapse of thin spherical shell of charged fluid, using energy conservation law

16 p2952 A70-33787

Combined internal pressure and axial loading influence on aeroelastic stability of thin walled cylindrical shell in supersonic flow field

16 p2991 A70-33851

Thin concentric circular cylindrical shells joined at ends by rigid diaphragms, describing free and forced torsional motion

16 p2992 A70-34019

Free vibration of thin circular cylindrical shells, comparing experimental results to Egle-Sewall analysis

17 p3181 A70-34520

Polycarbonate thin walled cylindrical shells mechanical and material stability under torsion

17 p3127 A70-34656

Elastic thin walled toroidal shell under internal pressure, investigating large deformation and stress behavior

17 p3184 A70-34910

Thin elastic shells linear theory, examining three dimensional stress distribution and displacement field

17 p3191 A70-35608

Structural stability in tension and strength tests of thin walled tubes at various stress and strain intensities, noting dependence on stress-strain state type

17 p3192 A70-35713

Axisymmetric torsion by terminal loads of elastic shells of revolution, investigating energy inequalities for assessing quality of approximate solution of thin shell problem

18 p3335 A70-36058

Double curved shell membrane stress calculation under arbitrary load, using stress functions

18 p3338 A70-36373

Plane cross section hypothesis applied to fully developed creep in thin walled tube subjected to internal pressure and bending moments, calculating stress concentration

18 p3340 A70-36571

Stress-strain equilibrium of thin isotropic elastic shells of revolution loaded along meridian

18 p3340 A70-36577

Zero moment theory for stress-strain state of thin walled anisotropic shells with nonuniform moduli under simultaneous torsion and tension

18 p3340 A70-36578

Dynamic axisymmetrical loading of thin elastic shallow spherical rigidly clamped dome, using variational method

18 p3341 A70-36582

Thin circular cylindrical shell stability subjected to axisymmetric thermal pulse, describing buckling process by mathematical model

18 p3342 A70-36641

Thin walled cylindrical shell stability under axial compression edge load beyond limit of proportionality

19 p3534 A70-37243

Soviet book on theory of shell and plate type thin walled structural elements stability covering strength, boundary value problems, oscillations, design, etc

19 p3535 A70-37401

Forced torsional vibrations of thin elastic spherical and hemispherical shells with free or restrained edge, using Gegenbauer transform

19 p3541 A70-38037

Core-filled thin cylindrical shell under radial ring and band pressure loads, using Boussinesq-Neuber stress function and Flugge shell theory

19 p3543 A70-38247

Thin elastic conical shell axisymmetric solution for free vibration in terms of power series

19 p3545 A70-38335

Thin plates and thin walled cylinders aeroelastic stability in fluid flow, analyzing panel flutter

19 p3546 A70-38342

Prebuckling deformations effect on buckling of clamped thin walled circular cylindrical shells under axial loading and internal pressure

19 p3546 A70-38346

Straight thin walled elliptical cylindrical shells stability in pure bending, solving boundary value problem

19 p3550 A70-38683

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory

20 p3719 A70-39378

Stiffened thin walled circular cylinders buckling and postbuckling behavior under axial compression or external hydrostatic pressure
[DFVLR-SONDDR-59]

20 p3719 A70-39621

Unsteady temperature field in cylinder surrounded by thin shell under uniformly distributed heat sources

20 p3737 A70-39640

Creep and breakdown of thin walled cylindrical shells with circular holes subjected to internal loads at high temperature, discussing time to failure

20 p3721 A70-39777

Stress-strain zero moment state of thin walled helioidal shell under uniformly distributed tensile loads

20 p3721 A70-39778

Thin walled circular cylindrical steel shells dynamic stability partly filled with liquid and subjected to longitudinal excitation

20 p3723 A70-39852

Thin elastic shell natural vibrations, examining orthogonality of form shapes

20 p3724 A70-39862

Thin shells of revolution static and dynamic stability under symmetric loads, presenting eigenvalue algorithm for boundary value problems

20 p3725 A70-39863

Stability loss in linear approximation by thin elastic shell of revolution with negative Gaussian curvature

20 p3726 A70-39872

Thin shell theory elastic coupling conditions, discussing stress-strain and edge effect states

20 p3726 A70-39875

Long thin circular cylindrical shell resonance velocities in steady response to fluid motion

20 p3727 A70-39884

Thin cylindrical shells optimum design with symmetrically paired spiral type stiffeners under uniform axial compressible load and lateral pressure

20 p3732 A70-40287

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography

20 p3735 A70-40513

Perturbed motion linear equations of body rigidly coupled to thin walled elastic shell partially filled with heavy compressible fluid

21 p3806 A70-40602

Thin walled fiberglass-reinforced plastic cylinders in torsion, calculating load carrying capacity as function of temperature

21 p3841 A70-40648

Thin walled spherical shell spacecraft solar heating in planetary surface proximity, considering skin temperature distribution

21 p3944 A70-41019

Uniformly loaded thin elastoplastic spherical shells, calculating strain hardening and strain rate effects on transient response

21 p3935 A70-41255

Carbon steel thin walled cylinders creep fracture subjected to combined tension and internal pressure by large strain theory

21 p3840 A70-41438

Temperature distribution in rotating thin cylindrical shell with line conduction discontinuity under solar heating, evaluating tubular elements thermal bending on spinning spacecraft

21 p3951 A70-41875

Maxwellian fluid oscillating flow in thin walled elastic circular tube as function of tube dimensions, elastic properties, oscillation frequency, etc

21 p3810 A70-41963

Thin cylindrical shell under nonaxially symmetric concentrated stationary radial loading, calculating random responses and stability

21 p3940 A70-42051

Vibrational response of thin walled pipes to internal turbulent water flow as function of Strouhal number

21 p3940 A70-42052

Mass flow rate correlation for nonsteady convective heat transfer in thin walled tubes with turbulent air flow

21 p3953 A70-42087

Nonlinear flexural vibration of thin circular cylindrical shells with clamped ends, using method of averaging for stability

22 p4112 A70-42517

Thin circular cylindrical panels in supersonic gas current parallel to generatrices, calculating heterogeneity effect on flutter

22 p4113 A70-42603

Curved finite element for thin elastic shells satisfying rigid body motions and energy convergence

22 p4116 A70-43202

Thin walled shells of revolution equations boundary conditions formulated by stress state separation, giving small parameter perturbation theorem

22 p4117 A70-43316

Thickness of equally stressed cylindrical shells, using thin elastic shell theory and Kirchhoff-Love hypotheses

22 p4120 A70-43715

Stress-strain of thin multilayer isotropic spherical shell under radial load employing shallow shell theory

22 p4120 A70-43716

Thin circular cylindrical shells with clamped-clamped and fixed-fixed edges, calculating natural frequencies of nonsymmetrical free vibrations

23 p4266 A70-43997

Dynamic deformation in thin walled axisymmetric plastic shells and filaments under time variable loads applied to high energy rate forming techniques

23 p4200 A70-44235

Stability of elastic stretched ring on thin spherical shell under critical loads

23 p4268 A70-44318

Simplified Sanders-Koiter linear thin shell equations with uncoupled stress-strain relations for arbitrary, nonzero Gaussian curvature, catenoidal and helicoidal midsurface geometries

23 p4269 A70-44399

Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences

23 p4270 A70-44501

Spacecraft thin walled tubular booms thermal curvature time constants in relation to solar induced despin of satellites

23 p4258 A70-44521

Asymptotic and computer methods interaction in thin walled shells structural analysis and design, considering pressure vessels, cone vibration and dynamic loads

23 p4271 A70-44703

Thin walled shells structural vibration, buckling and stress analysis by computer methods, discussing shell theory and design

23 p4271 A70-44704

Thin shell structural analysis by doubly curved arbitrary quadrilateral finite element, using Kirchhoff theory and cubic polynomial for membrane displacements

23 p4272 A70-44711

Thin shells static and dynamic finite element analysis

23 p4273 A70-44721

Rumanian book on torsion in thin walled elastic structures of various cross sections covering calculation methods for box beams, cylindrical and conical shells, aircraft wings, etc

24 p4418 A70-45147

Curved element approximation of orthotropic axisymmetric thin shells under axial loads

24 p4419 A70-45152

Thin cylindrical shell flutter in linearized supersonic potential theory, considering Mach number, aspect ratio and pressure effects on critical wave number

24 p4420 A70-45263

Axisymmetrically imperfect spherical thin shell stability analysis, comparing results with theory of initial postbuckling behavior

24 p4421 A70-45282

Ring-stiffened thin circular cylindrical shells, calculating free vibration natural frequencies and mode shapes by finite element method

24 p4427 A70-46067

THIN WALLS

Soviet book on experimental investigation of thin walled structures elastoplastic work with complex reinforcement, outlining test procedures

03 p0585 A70-12985

Thin walled glass fiber reinforced plastics beams strength analysis combined with results from elasticity theory of anisotropic bodies

06 p1167 A70-17913

Thin walled strip stability, calculating critical force and rotation angles assuming small subcritical strains

07 p1415 A70-20188

Unsteady creep of thin walled open section bars under free torsion using successive approximations

09 p1779 A70-23101

Shear and cross sectional deformation of prismatic rectilinear rods with unicellular or multicellular thin walls, determining elastic behavior under arbitrary loads

10 p1955 A70-24055

Stress-strain determination in nonuniformly heated thin walled cylindrical beams with nonlinear stringers and skin

10 p1957 A70-24281

Compressive stress critical moment induced instability and weakening incorporated in thin walled beam design

11 p2131 A70-25590

Open cross section thin walled prismatic beam twisting and bending based on virtual displacements

13 p2511 A70-28744

Succession of passes in rolling and hot shaping of thin walled angle steel

22 p4045 A70-42813

Elastic plane equilibrium with thin walled flexible rectangular finite inclusion under symmetrical concentrated load, including computer calculated tangential stresses

22 p4118 A70-43569

THIN WINGS

Supersonic flow around thin warped delta wing, taking into account current separation at subsonic leading edges for pressure distribution and aerodynamic characteristics

01 p0002 A70-10546

Surface shape determination for thin delta wing with variable geometry to minimize drag for given open and closed configurations and cruising supersonic speeds

01 p0002 A70-10547

Transonic flow theory, investigating thin three dimensional lifting wings, similarity for lift and drag, plane flow past airfoil, far field and hodograph solution

05 p0834 A70-16693

Lift and vortex drag due to flaps on thin sweptback tapered wings in inviscid incompressible flow, obtaining spanwise loadings

06 p0967 A70-17256

Boundary value problem for cavitating flow around thin wing reduced to two dimensional singular integral equations from acceleration potential

09 p1663 A70-23393

Minimum drag thin symmetrical cruciform wing fitted with central ridge, reducing problem to linear algebraic finite system of equations

10 p1803 A70-24784

Book on aerodynamics covering flow theory, boundary layers, shock waves, wing design, etc

12 p2157 A70-28148

Shock wave diffraction by moving thin wing over flat terrains, discussing aircraft blast encounter

18 p3205 A70-36195

Flow velocity and pressure on thin wing of small span width near sonic speed, using parabolic type linear equation

18 p3207 A70-36374

Soviet book on wing structures analytical design methods covering thin supersonic wings, mass distribution, aerodynamic characteristics, etc

18 p3344 A70-37025

Compressible fluids flow with conductivity tensor in presence of thin wing under orthogonal fields, reducing integral equation to Fredholm equation

19 p3351 A70-37599

Sweptback thin cantilever wing transonic flutter characteristics, investigating concentrated mass spanwise location effects

22 p4112 A70-42274

Similarity rules for sinusoidal gust loads on thin two dimensional wing in nonstationary subsonic flows

23 p4131 A70-43970

THINNERS

U SOLVENTS

THIOLS

NT CYSTEINE

Dithiols protective effect against ionizing radiation in mice, noting oxygen pressure drop role

03 p0420 A70-13311

Quantitative and qualitative analysis of biochemically and radiobiologically important thiols and disulfides via gas-liquid chromatography

19 p3373 A70-37836

Thioformaldehyde isotopic species reversible transition in interstellar clouds

20 p3703 A70-39164

THIXOTROPIC PROPELLANTS

U GELED ROCKET PROPELLANTS

THIXOTROPY

Colloidal alumina nonNewtonian suspension in propylene glycol, examining thixotropic behavior at various structural levels

24 p4310 A70-45625

THOMAS-FERMI MODEL

Statistical electron density distributions and Thomas-Fermi-Dirac screening functions for positive ions with various ionization degrees

04 p0721 A70-14666

Asymptotic relation between Thomas-Fermi-Dirac and Thomas-Fermi atom models for pressure with and without exchange, considering Coulomb contribution to energy

16 p2953 A70-33004

THOMAS-FERMI THEORY

U THOMAS-FERMI MODEL

THOMSON EFFECT

U THERMOELECTRICITY

THOMSON SCATTERING

Plasma electron temperature and density in Tokamak T3 toroidal discharge measured by Thomson scattering of laser light

Photoelectrons entry into F region detected at conjugate point during winter night by Thomson scatter observations of plasma lines appearing in signal spectrum

Electron-to-ion temperature ratio determined from ion and plasma line components of radar Thomson scatter signal from ionosphere

Simultaneous Thomson scatter measurements for middle and low latitudes, comparing electron density and temperature and exospheric and global temperature distributions

Electron correlations and solar neutrino counts, correcting frequency independent Thomson cross section

Thomson theory of arbitrarily intense elliptically polarized plane electromagnetic wave scattering by free electrons, solving electron equations of motion

Intrinsic polarization from Thomson scattering in binary systems with tidal distortions, taking into account gray atmosphere, axial rotation, gravitational interaction and radiative interaction

THOR DELTA LAUNCH VEHICLE

HEOS 1 launch operations, discussing test and checkout phase, mating with Thor Delta launch vehicle, countdown phase and launch

THOR LAUNCH VEHICLES

NT THOR DELTA LAUNCH VEHICLE

Quartz-Fiberfrax heat shield tests for Thor booster at high radiative heating rates, noting optimum material performance dependence on loose stitching

Thor launch vehicles steering filters design using automated method of optimizing large order linear stochastic systems control [AIAA PAPER 70-986]

THORAD LAUNCH VEHICLES

NT THOR DELTA LAUNCH VEHICLE

THORAX

Traumatic rupture of aortic arch and descending thoracic aorta resulting from abrupt linear body deceleration

Thorax potential resistivity at sea and high altitude levels measured in children and adults inferring relation to ECG differences

Position dependent variations in intrapericardial, pleural and esophageal pressures and cardiac output in thorax of dogs

Thoracic impedance changes in premature infants respiration monitoring, noting Respiratory distress syndrome /Rds/ physiopathology

Circulatory phenomenon and deep thoracic impedance changes of ventilatory origin

Transthoracic mutual impedance responses to lung ventilation, discussing spatial and temporal intravariability

Morphology of adult mammalian thoracic and abdominal aortic segments indicating deviation from medial lamellar architecture

THORIUM

NT THORIUM ISOTOPES

Neutron activation analysis for U and Th in various tektites, discussing evolution and extraterrestrial origin

Energy levels of Th lines computed from weighted averages of interferometrically measured wavelengths data

U and Th abundances correlation in tektites and achondrites based on oxygen isotopic composition of lunar rock specimens

THORIUM COMPOUNDS

NT THORIUM OXIDES

THORIUM ISOTOPES

Th 232 and U 238 pionic X ray energies and widths, suggesting anomalous effect for interaction between high-Z nuclei and pion

Uranium and Th isotopic composition in Apollo 11 samples compared to earth, using mass and alpha spectrometries

Apollo 11 lunar rocks, breccia and fines U, Th and Pb isotopes systematics, considering implications for lunar history

THORIUM OXIDES

Zeeman interaction for super 8S term in ESR Hamiltonian determined, using trivalent GD magnetic spectrum at eightfold coordinated cubic sites of thorium

Solid thorium yttria electrolyte applications in EMF measurements for Cr thermodynamic properties in Fe-Cr and Ni-Cr alloys

Low temperature anharmonicity in thorium dioxide with Co 57 impurities, using Mossbauer effect of Fe 57

THORIUM 228

U THORIUM ISOTOPES

THORIUM 230

U THORIUM ISOTOPES

THORIUM 234

U THORIUM ISOTOPES

THORON

U RADON

THREADS

Stress distribution along stud hole threads in Al case, investigating stud design effect using strain gauge on models

Resilience coefficient of intermediate elements of threaded connection related to transverse and axial nut dimensions by least squares method

Thread parameters effect on steel and Ti high strength fasteners fatigue life [SAE PAPER 700851]

THREE BODY PROBLEM

Coulomb, Gaussian and harmonic oscillator potentials for particle pairs in three body system, using S wave expansion

Three machine parts problem with relative motion and given active forces distribution and time variation, determining entrainment motion

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem

Conditionally periodic orbits existence in restricted problem of three bodies, using similarity transformation

Three-body gravity gradient satellite orbital plane motion analysis, studying transient damping of proposed tethered orbiting interferometer /TOI/

Elliptic restricted three body problem singularities dynamical meaning and character, presenting regularization transformations for equations of motion

Stationary and periodic solutions for commensurable cases of mean motions in restricted three body problems by expanding disturbing functions

Sun-planet systems capture and catapult capacity for interstellar bodies under close flyby conditions

Predictor-corrector algorithm for continuing analytically families of periodic orbits beyond collision trajectories in restricted three bodies problem

Von Zeipel method applied to stellar three body problem, eliminating short period terms and establishing two integrals of motion

Disproof of Wintner analytical foundations of celestial mechanics regarding binary collision in three body problem

Particle nonlinear motion near equilateral libration points in restricted three body problem [AIAA PAPER 70-98]

Dynamical systems with three degrees of freedom, presenting slice cutting and stereoscopic views graphical techniques for restricted three body problem with perturbations

Resonance in restricted three body problem applied to asteroidal motion in asteroid-Jupiter-sun system

Three body problem involving sun and perturbing and perturbed planets, examining perturbed motion equations of Brouwer and Encke methods

Neutron stars equation of state derived, suggesting three body forces inclusion at high densities

Computer program /TACTICS/ for simulating three vehicles simultaneous motion in space, considering interceptor-target guidance and intercept trajectories

Historical survey of celestial mechanics including three body problem and solar system dynamic model construction

Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption

Motion equations and decay of rotating equal mass triple systems for random configuration integrated numerically on computer

Three body atomic systems with H atom and H negative ion on basis of scattering experiments dealing with resonance and threshold behavior

Periodic solutions with moderate eccentricities and high inclinations for three dimensional restricted three body problem by expanding disturbing functions by high speed computer

Solar system planetary mean motions calculation from characteristic equations roots at equilibrium points of restricted three body problem, using Taylor series solution

Periodic solutions of restricted three body libration point perturbation due to fourth body gravitational and radiative influence using Huang model

Motions stability about triangular points in elliptic restricted problem of three bodies, using perturbation scheme

Planar restricted three body problem in Thiele coordinates, developing recurrence formulas for coefficients in Taylor series expansions of solution

Hydrodynamic analogy in restricted three body problem of celestial mechanics, discussing mass and momentum conservation and physical properties uniqueness

Newtonian gravitational system of three point masses with oscillatory motion at time t approaching infinity, discussing particles mutual distance

Triangular Lagrangian equilibrium points stability in planar restricted problem of three bodies at order two mass ratio using two variable expansion method

Evolution discontinuities and genealogy of long period orbit families at Lagrangian equilibrium point of restricted three body problem

Motion of negligible mass body near large mass body affected by larger third body applied to Phoebe-Saturn-sun system

Stability of single periodic symmetrical solutions of plane circular restricted three body problem, using digital computer for numerical integration of equations of motion

Sun-planet-particle problem, considering solar radiation total pressure, Lagrangian solutions instability and differential equations of motion

Effective moment of inertia in quantum mechanical three body problem, applying specific decoupling to wave functions

Characteristic exponents for periodic orbits of infinitesimal body attracted according to Newtonian law by two finite bodies revolving in ellipses about mass center

Restricted three body interplanetary guidance scheme using midcourse fixed time of arrival velocity correction

Restricted three body problem taken for intermediate orbit in constructing analytical trigonometric motion theory for resonance asteroids, calculating perturbations by Bogoliubov method

Historical survey of celestial mechanics including three body problem and solar system dynamic model construction

Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption

Equations of motion for circular periodic orbits extended to elliptic restricted three body problem

Periodic solutions close to commensurabilities in three body problem, considering restricted and planar nonrestricted problems

Triangular libration points stability in elliptic restricted three body problem, determining parametric resonance region

- Satellite translational motion in circular problem of three bodies, discussing existence of equations in integral 18 p3324 A70-37150
- Three body numerical solutions to low thrust guidance and navigation for outer planet orbiter with nuclear-electric propulsion [AIAA PAPER 70-1040] 19 p3527 A70-38855
- Planetary orbiter parameters long term variations under central body oblateness, solar and atmospheric drag perturbations 19 p3528 A70-38870
- [AIAA PAPER 70-1055] 19 p3528 A70-38870
- Closed form approximate solution for restricted three body motion of lunar or interplanetary spacecraft, demonstrating accuracy and flexibility in lunar mission trajectory calculations 19 p3529 A70-38875
- [AIAA PAPER 70-1061] 19 p3529 A70-38875
- Periodic collision orbits in plane elliptic three body problem of infinitesimal mass under gravitational field of two finite masses 20 p3705 A70-39603
- Configuration space three body elastic scattering theory for initially free independently moving particles collisions under short range forces 21 p3852 A70-40595
- Dynamical theorems to control number of collisions for sequences in generalized Boltzmann equation, discussing binary collisions involving three molecules 21 p3852 A70-40946
- Nonperiodic Transtrojan orbits for various mass parameter values in three body problem, discussing double libration 21 p3888 A70-41144
- Three body problem for parachute system dynamics during inflation 21 p3755 A70-41843
- [AIAA PAPER 70-1170] 21 p3755 A70-41843
- Restricted three body problem taken for intermediate orbit in constructing analytical trigonometric motion theory for resonance asteroids, calculating perturbations by Bogoliubov method 23 p4240 A70-43919
- Three body elliptic restricted problem triangular points, deriving second order expression for transition curves and characteristic exponents 23 p4244 A70-44595
- Three body problem periodic solutions, considering near equilibrium conservative Hamiltonian system consisting of two harmonic oscillators with rationally related frequencies 23 p4213 A70-44897
- High energy close approach trajectories within planar free fall three body problem, using perturbation theory 24 p4412 A70-45984
- ### THREE DIMENSIONAL BOUNDARY LAYER
- Flow direction and velocity measurement in three dimensional boundary layer, discussing instrument and restrictions 02 p0299 A70-12312
- Heat transfer, three dimensional boundary layers and high speed flow calculations, utilizing original entrainment equation 02 p0284 A70-12341
- Three dimensional turbulent boundary layers on high aspect ratio bodies /swept wings/, discussing shear stress direction determination 02 p0286 A70-12354
- Pressure gradient calculation in three dimensional laminar boundary layer, using method of local similarity 03 p0468 A70-13869
- Numerical integration of equations of motion of three dimensional laminar compressible boundary layers [DVL-915] 06 p1033 A70-17229
- Laminar boundary layer on cone at incidence in supersonic flow evaluated by pressure distribution technique, comparing heat transfer, pitot probe measurements, etc 06 p0974 A70-18189

- Three dimensional boundary layer on body in external harmonic flow with HF velocity fluctuations 07 p1252 A70-18711
- Nonuniform partitioning of flowfield in three dimensional laminar boundary layer in supersonic conical flow at zero angle of attack, using numerical integration 10 p1804 A70-25192
- Three dimensional incompressible turbulent boundary layer detachment on rotating blading of axial impellers 11 p1975 A70-25793
- Three dimensional periodic boundary layer flow noting successive approximations method, noting steady streaming in first order cross flow 11 p2037 A70-26296
- Three dimensional laminar boundary layer equations for body of revolution at angle of attack in supersonic gas flow derived for equations 12 p2158 A70-28198
- Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests [AIAA PAPER 69-12] 13 p2343 A70-29953
- Three dimensional turbulent boundary layer development on rear of swept wing, comparing measurements with calculations 13 p2344 A70-30021
- Three dimensional boundary layer separation, noting necessity of streamlines perpendicular to pressure gradients near wall 15 p2719 A70-31488
- Three dimensional boundary layer flow on rotating axial flow turbine buckets, determining velocity profiles [ASME PAPER 70-GT-59] 18 p3243 A70-36874
- Velocity distribution and shear stress measurements in three dimensional turbulent boundary layer approaching separation 19 p3405 A70-38021
- Shear stress and velocity profiles in three dimensional mixing layer between grazing perpendicular streams 20 p3608 A70-39356
- Three dimensional boundary layer on lee- and wind-side of prolate spheroid, emphasizing separation and embedded streamwise vortices 20 p3608 A70-39359
- Three dimensional laminar and turbulent boundary layers separation criteria 21 p3811 A70-42206
- Three dimensional laminar boundary layer equations for body of revolution at angle of attack in supersonic gas flow derived for equations 22 p3960 A70-43323
- Perfect gas three dimensional boundary layer separation on circular cone at incidence, comparing numerical calculation and experimental results 23 p4133 A70-44207
- Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions [AIAA PAPER 69-710] 23 p4182 A70-44565
- Three dimensional laminar boundary layer separation at infinite swept stagnation line with high mass injection rates 23 p4182 A70-44568
- Unsteady incompressible thermal boundary layer flow past three dimensional obstacle for Prandtl numbers near unity 24 p4428 A70-45366
- Three dimensional laminar boundary layer in unsteady incompressible flow, presenting solution by successive approximations method 24 p4325 A70-45594
- Unsteady separation criteria for three dimensional laminar boundary layer on finite obstacle 24 p4327 A70-46268
- ### THREE DIMENSIONAL FLOW
- Three dimensional thermal conductivity problems solution applied to moving body, body of revolution and hollow cylinder 01 p0213 A70-10218
- Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows 01 p0068 A70-11582
- Momentum integral method using auxiliary equation for two and three dimensional flow problems 02 p0284 A70-12344
- Stratified air flow above relief in baroclinic atmosphere, considering plane nonlinear and three dimensional linearized flow models 03 p0521 A70-13270
- Circumferential contour shape influence on three dimensional flow pattern of fan shaped annular turbine stages 03 p0407 A70-13417
- Three dimensional combustion instability in liquid-propellant rocket engines, investigating dependence on design and operating parameters via boundary value problem analysis 03 p0551 A70-13574
- Incompressible inviscid free shear layer stability with respect to spatially growing three and two dimensional disturbances, considering hyperbolic tangent velocity profile [DFVLR-SONDDR-10] 03 p0468 A70-13786
- Supersonic unsteady state three dimensional flow around blunted bodies with detached shock wave 03 p0409 A70-13864
- Axisymmetric and three dimensional gas flow around blunt bodies using numerical methods, discussing finite difference algorithms for gas dynamic equations 03 p0410 A70-14251
- Inviscid flow problems solution by partial differential equations, considering propagation processes, stratified media, potential, subsonic and three dimensional flows [DGLR-69-2] 04 p0672 A70-15170
- Unsteady pressure at slender blunt body surface in three dimensional hypersonic gas flow 04 p0618 A70-15244
- Fundamental matrix asymptotic forms obtained for supersonic and subsonic three dimensional steady flows past body in uniform stream of viscous thermally conducting fluid 04 p0673 A70-15320
- Three dimensional viscous and inviscid hypersonic flow interaction at rectangular corner, measuring surface and Pitot pressures, heat transfer rates, shear stresses, etc 04 p0620 A70-15533
- Three dimensional flow separations on upswept rear fuselages, using flow visualization and pressure measurement 05 p0790 A70-16097
- Singularity method applied to two and three dimensional potential flow described by Poisson, Helmholtz or related partial differential equations 05 p0832 A70-16114
- Two and three dimensional flow using TRIC and TRIM-like triangular finite elements 05 p0832 A70-16115
- Three dimensional supersonic flow around delta wings, considering lifting and thickness problems, leading edge characteristics, separated and non-separated shock waves, etc 06 p0964 A70-17241
- Transient heat flow in three dimensional rectangular panels, developing criterion for problem dimensionality [AIAA PAPER 70-16] 06 p1182 A70-18212
- Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem 07 p1252 A70-18669
- Three dimensional hypersonic flow past body solved assuming developable surface head shock wave 07 p1187 A70-18767
- Three dimensional unsteady and steady sediment distribution obtained by Monte Carlo simulation method, using stochastic hydrodynamics model for transport 07 p1255 A70-19103
- Navier-Stokes equations solved for unsteady incompressible three dimensional stagnation point flow, noting reduction to two dimensional and axisymmetric cases 07 p1188 A70-19343
- Three dimensional gas flow calculated by direct method of characteristics 08 p1431 A70-20860
- Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques 09 p1603 A70-22265
- Turbulent three dimensional incompressible wall jets issuing into quiescent air ambient, tangent to and at surface of flat plate, investigating shear stress and flow field 09 p1661 A70-23215
- Three dimensional flow field codes for spheres cones at nonzero angles of attack, comparing numerical and experimental results 09 p1606 A70-23254
- Stepwise averaged parameters of nonuniform three dimensional flow through turbine blade cascade determined from conservation conditions 09 p1606 A70-23611
- Hodograph or Riemann invariants method generalization for nonelliptic systems, discussing three dimensional potential supersonic flows 10 p1863 A70-24087
- Three dimensional supersonic nozzle geometry optimization using Lagrange multipliers and iteration for solving variational problem 10 p1798 A70-24115
- Three dimensional supersonic gas flow solution by numerical method of characteristics, discussing direct and inverse tetrahedral and semicharacteristic schemes 10 p1798 A70-24117
- Shock wave and gas flow structure at constant Mach number past three dimensional blunt bodies, applying method for unsteady flow 10 p1799 A70-24127
- Wind tunnel study of entropy extremum upon critical streamline in supersonic three dimensional flow past blunt bodies at zero angle of attack 10 p1800 A70-24131
- Symmetrical, asymmetrical and three dimensional sonic flows past finite obstacle, investigating regions upstream and downstream from shock waves for airfoil 10 p1800 A70-24134
- Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics [AIAA PAPER 69-187] 11 p1975 A70-25969
- Three dimensional turbulent flow, using direct interaction approximation for growth and propagation of point-to-point velocity field deviations energy spectrum 11 p2036 A70-26013
- Turbulent three dimensional Poiseuille channel flow at large Reynolds numbers, investigating eddy shapes and energy balance 11 p2041 A70-26546

Invariant transform of motion and continuity equations for steady three dimensional flows of compressible fluids in absence of massive forces

11 p2041 A70-26598

Two and three dimensional flow analysis using various versions of finite element techniques

11 p2042 A70-26680

Two and three dimensional potential flow analysis using finite element technique based on method of singularities

11 p2042 A70-26681

Dispersion relations for linearized Grad equations of three dimensional rarefied gas dynamics, including nonequilibrium pressure term for bulk viscosity

12 p2210 A70-27520

Monge equation in small perturbation method of characteristics applied to propagation phenomena in three dimensional supersonic gas flow

13 p2386 A70-28490

Steady expansion flows at three dimensional supersonic edges with small corner angles using analytical method of characteristics

13 p2338 A70-28491

Numerical method of characteristics for three dimensional supersonic nozzle flow field calculations

13 p2338 A70-28512

Three dimensional oblique incidence liquid jet impinging on solid surface, evaluating flow force by applying mass and momentum conservation

13 p2389 A70-29540

Three dimensional boundary layer along semi-infinite swept stagnation line, assessing counteracting effects of cross flow and mass transfer

14 p2565 A70-30278

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem

15 p2718 A70-31461

Finite difference algorithm for supersonic three dimensional steady flow past blunt bodies with generating line bends, allowing for gas equilibrium and frozen states

15 p2671 A70-31495

Kinetic energy and pressure distribution of three dimensional compressible fluid flow, using invariant transformation of Euler motion equation

16 p2890 A70-33073

Hypersonic flow past slender bodies, discussing inviscid flows, outer edge singularity of boundary layer and three dimensional interaction on needle-like bodies

17 p3010 A70-35035

Mathematical model of three dimensional separated flows with applications to small aspect ratio delta wing and flat plate

18 p3207 A70-36438

Three dimensional inviscid small perturbation compressible flow past lifting axial compressor rotor at subsonic and transonic speeds

18 p3208 A70-36691

Liquid with small electrical conductivity and kinematic viscosity in intense transverse magnetic field, examining plane and three dimensional duct flow

19 p3478 A70-37589

Holographic flow and sound visualization, determining three dimensional density distributions in aerodynamic flows

19 p3425 A70-37888

Three dimensional flow through rotor of axial vortex flow fan, using airfoil method for design

19 p3352 A70-38248

Three dimensional supersonic and hypersonic gas flow by Oseen equations, obtaining asymptotic flow field

20 p3609 A70-39656

Falkner-Skan type boundary value problem of three dimensional flow near stagnation point

20 p3658 A70-40103

Dispersion relations for linearized Grad equations of three dimensional rarefied gas dynamics, including nonequilibrium pressure term for bulk viscosity

21 p3807 A70-41168

Deuterium plasma three dimensional flow in coaxial accelerators, examining magnetic structure of filaments/field lines bundles/

21 p3856 A70-41321

Hodography of compressible fluids three dimensional irrotational isentropic flow

21 p3808 A70-41439

Three dimensional laminar boundary layer equations for film condensation on curved surface in quiescent vapor, investigating flow at stagnation point

21 p3954 A70-42168

Thermal boundary layer near stagnation point in three dimensional fluctuating incompressible flow, using Lighthill method

22 p4124 A70-42685

Trajectory equations for plane and three dimensional gas jets with arbitrary injection hole shapes in subsonic shear flow

22 p3960 A70-43365

Steady irrotational gas flow characteristics calculation from finite difference scheme for three dimensional method of characteristics, considering supersonic nozzle flow

23 p4133 A70-44308

Hypersonic three dimensional flow past elliptic cross section slender bodies, discussing disturbance equations, pressure, velocity and density distributions [DFVLR-70-27]

23 p4135 A70-44633

MHD nonstationary three dimensional problems, describing difference method

23 p4227 A70-44738

German monograph on three dimensional flow and blade pressure measurements at axial flow compressor casing wall, discussing test control and digital data processing

24 p4332 A70-45093

German monograph on casing and hub wall friction effects on three dimensional flow in turbocompressors in subsonic compressible working fluids

24 p4287 A70-45096

Boundary layer transition under small tridimensional perturbations interacting with excitations from wall

24 p4327 A70-46206

THREE DIMENSIONAL MOTION

NT THREE DIMENSIONAL FLOW

Steady three dimensional motions using classical differential geometry, considering Navier-Stokes and helical flows

05 p0884 A70-17100

Motion of gaseous medium with uniform deformation with respect to three dimensional Cartesian coordinates

06 p1036 A70-17854

Three dimensional motion of nonrigid parachute and payload system analyzed for dynamic stability [AIAA PAPER 70-209]

06 p0987 A70-18062

Control algorithm for vehicle descent after reentry based on descent range prediction by integrating motion equations allowing for motion three dimensionality

07 p1393 A70-19482

Three dimensional elasticity by Ritz method, using coordinate system orthonormalized in energy metric of operator to avoid precision loss

10 p1957 A70-24511

Dynamic errors of electric measurement devices during three dimensional polyharmonic vibrations of foundation

12 p2233 A70-27561

Control algorithm for vehicle descent after reentry based on descent range prediction by integrating motion equations allowing for motion three dimensionality

15 p2813 A70-32727

Fraunhofer holography for small spherical particles three dimensional position and velocity measurements

21 p3822 A70-40811

THRESHOLD CURRENTS

Low threshold injection lasers in IR and visible spectrum at room temperature employing AlAs-GaAs heterojunctions, noting use for CW mode

03 p0501 A70-13723

Simple approximations for threshold current, gain and lasing frequency of GaAs injection laser at room temperature

03 p0503 A70-14085

Threshold switching and thermal filaments in thick specimen of amorphous semiconductors using IR spectrum viewer

08 p1477 A70-21540

Single mode He-Ne ring laser lock-in threshold and output power relationships to frequency

08 p1514 A70-21692

Threshold characteristics of compression line demodulator obtained from output SNR

09 p1631 A70-22017

Temperature effects on injection semiconductor lasers optical gain and threshold current using energy spectrum model

12 p2247 A70-27485

Carbon monoxide, carbon dioxide and oxygen impurities effects on threshold current and output power of HCN laser

12 p2249 A70-27648

Two-photon transitions effect on two-frequency generation threshold in media with line broadening, considering laser radiation effect on amplification in second channel

12 p2251 A70-28289

Emission field and Fermi quasi-levels distribution in injection laser with n-p heterojunction, determining frequency and threshold current temperature dependence

13 p2426 A70-28876

Hypothalamic electric stimulation intensity effects on elicited behavior, considering possible neural circuit threshold reduction

13 p2355 A70-29807

Mean first passage signal time in one shot electronic system as function of threshold level

14 p2552 A70-31198

Gunn diode simulation with variable cross section, showing subthreshold and mode oscillograms

15 p2707 A70-31510

Low threshold electron beam pumped CdS lasers with improved Al coated Fabry-Perot mirrors in end-pumped configuration

16 p2928 A70-33642

Low noise He-Ne laser with capillary elements, measuring current threshold of noise free operation as function of design parameters

19 p3448 A70-38512

Organic laser spectral and energy characteristics, discussing practical operation principles, low generation threshold and harmonic energy

20 p3642 A70-39754

Threshold SNR for signal frequency meter based on zero number count method, determining reliability

22 p3985 A70-42401

Electric strengths of liquid dielectrics during subjection to Q switched laser pulses, determining threshold currents for breakdown

22 p4051 A70-43338

THRESHOLD DETECTORS [DOSIMETERS]

Threshold and frequency relaxational radiation detectors, discussing operation and sensitivity of p-n-p-n silicon photothyristor and luminosity dependent devices

09 p1649 A70-23356

Scientific satellites pulse height analyzer and associated threshold detection and logic circuitry

16 p2900 A70-33062

THRESHOLD GATES

MOS devices radiation testing for estimating anticipated threshold voltage shift at various dose levels, including gate bias intermittent application during irradiation

04 p0658 A70-14745

THRESHOLD LOGIC

Autonomous control system for moving plant based on logic threshold networks and multivariable functional converter

11 p2023 A70-25612

Redundant threshold logic elements synthesis based on von Neumann multiplexing principle for automatic error correction

13 p2376 A70-29940

Generalized iterative inverse algorithm for linear inequalities set involved in pattern recognition and threshold logic requiring decision functions determination

16 p2870 A70-33739

Weak noise and threshold effects on estimation error for nonlinear PM systems

24 p4312 A70-46053

Maximum-likelihood decoding in analog form of linear convolutional codes with respect to constraint length by one-step threshold method

24 p4313 A70-46059

THRESHOLD SHIFT

U THRESHOLDS

THRESHOLDS

Retinal damage thresholds by exposing rhesus monkey and human eyes to laser radiation, testing rabbit eyes for corneal thresholds

08 p1451 A70-21044

Ruby laser energy threshold dependence on partial shielding of rod by stainless steel tubing

09 p1694 A70-22136

Potassium iodide and paratoluidine fluorescent quenching effect on lasing threshold in rhodamine 6G alcohol solutions

09 p1696 A70-22487

Pulse duration and beam diameter effects on threshold energy density in laser induced transparent dielectric breakdown

13 p2428 A70-29382

Threshold light flux densities for thin Al film breakdown by laser radiation

13 p2428 A70-29383

Demodulators threshold performance for satisfying carrier to noise ratios requirement of Intelsat 4 system

14 p2552 A70-31352

Delta modulation threshold extension technique for phase lock loop FM demodulator

15 p2703 A70-32559

Random vibration first threshold crossing probability density function for linear oscillator

19 p3427 A70-38038

Bayes sequential detection test with constrained error probabilities, investigating properties of thresholds equations

21 p3787 A70-41333

THRESHOLDS [PERCEPTION]

Visual faculties testing to improve performances in visual inspection tasks, considering threshold line concept and visual performance relation to age

01 p0023 A70-10862

Human oculogyral illusion thresholds determined on Ames Man-Carrying Rotation Device to establish stimulus duration effect on angular acceleration thresholds

03 p0424 A70-13765

Color vision mechanisms spectral sensitivities measured by increment threshold technique for normal and deutan observers

03 p0427 A70-13947

- Rhesus monkeys impaired discrimination in recognizing tachistoscopically presented objects following cortical polarization 05 p0802 A70-16625
- Hearing threshold and ear canal pressure levels, using circumaural enclosure with varying acoustic field 06 p0994 A70-17598
- Visual threshold elevation for test flash perception determined by retinal image displacement in saccadic fashon 07 p1205 A70-19283
- Temporary and permanent threshold shifts in hearing of guinea pigs exposed to intense rocket booster engine noise 07 p1214 A70-19931
- Binocular achromatic and color thresholds of constant and flickering lights determined from background of different brightness 08 p1443 A70-20732
- Constant periods method to eliminate human responses during threshold measurements by holding first threshold perception flash fixed 08 p1445 A70-20750
- Human eye sensitization and dark adaptation, noting annual surrounding light addition effect on rod threshold 08 p1447 A70-21723
- Monocular and interocular threshold luminance changes during flicker stimulation, noting interflash duration effects 08 p1453 A70-21792
- Visual restriction effects on critical flicker fusion threshold, loudness and pitch discrimination determined using reticular activating system 09 p1622 A70-23576
- Size effects on velocity threshold for real movement during narrow stimulus object length increase 11 p1989 A70-26662
- Threshold excitation of cutaneous analyzer in man under vascular conditioned reflexes in response to acoustic signals with shock 12 p2173 A70-28353
- High intensity noise effects on auditory thresholds, blood pressure and time response to light stimuli, showing permissible levels during space flights 13 p2358 A70-29334
- Oxygen effect on night vision tested in men at 5,000 ft above sea level, obtaining threshold curves of dark adaptation 13 p2359 A70-29443
- Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on limen of temporal ordering of sensory events in haptic space 13 p2354 A70-29596
- Auditory and cutaneous sound localization acuity 13 p2354 A70-29597
- Suprathreshold angular acceleration effects on oculogical illusion, obtaining magnitude estimates during and after acceleration 14 p2543 A70-30897
- Vestibular threshold dependence on gravity, considering linear accelerations effect on canals sensitivity 14 p2539 A70-30916
- Hearing loss thresholds and spontaneous and caloric nystagmus correlationship in test pilots 15 p2690 A70-31893
- Perception threshold in rapidly changing circumstances, discussing stimuli signals recognition 15 p2687 A70-32872
- Odor threshold levels for unsymmetrical dimethylhydrazine/UDMH/ and nitrogen tetroxides 18 p3224 A70-36227
- Foveal threshold measurements, using small flash of light at center of bright white disk on black background 22 p3972 A70-43411
- Spectral sensitivity of freely moving human eye by determining threshold energy for correct choice between two monochromatically illuminated stimulus patches 22 p3972 A70-43412
- Pulse duration dependent threshold intensity difference for sine tones related to dynamic properties of hearing 23 p4155 A70-44699
- Spatial aspects of sensitization effect properties compared to background light fields, lowering rod threshold at center by light addition to surrounding angular region 23 p4147 A70-44779
- Mesencephalic reticular formation influence on threshold stimulation of cortex, hippocampus, amygdala, thalamic nuclei and caudatum in rabbits 24 p4300 A70-45839
- THROATS**
- Ablative throat nozzle performance, plotting change in thrust, exit pressure and Mach number as function of ablated to initial area ratio 03 p0410 A70-14336
- Sonic throat formation from two dimensional viscous layer interaction with supersonic inviscid outer stream, using boundary layer equations 04 p0665 A70-14452

THROMBOCYTES

- Flight stress effect on blood clotting stabilization of Starfighter aircraft pilots, observing no change in thrombocytes number 09 p1625 A70-23005

THROMBOSIS

- Nervous stress effect on coronary thrombosis, deriving mathematical theory based on biophysical and biochemical approaches 01 p0028 A70-11369
- Coronary thromboses age estimation based on comparison of blood cells, fibrin, collagenous tissue and neocapillaries quantitative changes 03 p0426 A70-13938
- Interactions between nutrition, blood coagulation and atherosclerosis by Duguid theory, emphasizing fibrinolysis, thrombosis and alimentary lipids 03 p0431 A70-14280
- Heparin role in anticoagulant therapy for myocardial infarction based on proved application to other venous thrombotic diseases, noting hemorrhagic complications controllability 04 p0636 A70-15465
- Blood clotting and fibrinolysis under short term physical work in healthy men measured using thrombelastograms 06 p0992 A70-17423
- Hydrodynamic model of blood coagulation in stagnation point flow, analyzing platelet diffusion, white cell bonding stress and thrombus formation [AIAA PAPER 70-143] 06 p1003 A70-18123
- Thrombus formation on foreign surface in fresh blood stagnation point flow, applying fluid mechanical and mass transfer models [AIAA PAPER 70-787] 17 p3035 A70-34470
- Blood platelets aggregation and release reaction in thromboembolic disease due to injury 17 p3032 A70-35471
- G-suit hazards in lower extremity thrombophlebitis in pilots 24 p4307 A70-45347

THROTTLING

- Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine [AIAA PAPER 69-452] 06 p1130 A70-17176
- Interior ballistics for wide temperature throttling of solid propellant rockets by variable-throat-area nozzle, noting composition effect screening 11 p2103 A70-26154
- Throttling venturi valves for thrust modulation of liquid propellant rocket engines, testing pressure recovery, mixture ratio control and gas saturation and boundary layer effects [AIAA PAPER 70-703] 17 p3146 A70-34510
- Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristic method, discussing performance [AIAA PAPER 69-435] 17 p3149 A70-35655
- Combustion driven shock tunnel applied to tailored interface operating conditions, controlling mass flow into tube by throttling plates 22 p4006 A70-42765

THRUST

- NT HIGH THRUST
- NT JET THRUST
- NT LOW THRUST

- Fluid film lubricated, thrust loaded, angular contact ball bearing high speed performance, predicting skidding by isothermal Newtonian behavior in ball to raceway contact [ASME PAPER 70-LUBS-7] 22 p4045 A70-42452
- THRUST CHAMBER PRESSURE**
- Heat pipe cooled thrust chambers for space storable propellants, discussing design feasibility for radiation and regeneratively cooled concepts [AIAA PAPER 70-942] 16 p2965 A70-33541
- THRUST CHAMBERS**
- Combustor geometry and heat release effects on supersonic combustor thrust efficiency, considering shock-free, normal and oblique shock situations 02 p0354 A70-12043
- Rocket stability monitoring by temporal radiometry, using exhaust radiance measurement to detect frequencies in thrust chamber combustion pressure [AIAA PAPER 69-580] 04 p0737 A70-15429
- ICRPG liquid propellant thrust chamber performance evaluation methodology, reviewing imperfections and limitations [AIAA PAPER 69-468] 07 p1365 A70-19728

Regeneratively cooled stainless steel thrust chamber failure related to internal carburization by fuel decomposition and propellant combustion 12 p2290 A70-27111

Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thrustor performance [AIAA PAPER 69-494] 15 p2791 A70-32501

Rocket engine thrust chambers and valves, discussing component lifetime extension and operational flexibility of reaction control systems [AIAA PAPER 70-603] 16 p2964 A70-33526

Oxygen difluoride/diborane propellant thrust chamber and injector technology, discussing engine duty cycles and performance [AIAA PAPER 70-717] 16 p2962 A70-33550

Water cooled pressure probes for measuring rocket chamber HF pressure variations 17 p3093 A70-35485

Heat transfer between wall and liquid and vapor films in internal regenerative cooling of thrust chambers 21 p3867 A70-41027

Spinning cold-flow rocket motor, studying rotation effects on chamber flow velocity field 23 p4233 A70-44579

Hydrogen oxygen engine designs for space vehicle auxiliary propulsion systems, considering long life thrust chamber performance with compatible heat transfer characteristics [SAE PAPER 700803] 24 p4395 A70-45908

THRUST CONTROL

NT THRUST VECTOR CONTROL

Optimum flight paths of energy and power limited rockets with generalized thrust characteristic, considering vertical, horizontal, rectilinear, zero drag and vacuum trajectories 01 p0193 A70-10425

Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite 01 p0197 A70-11500

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust 01 p0197 A70-11502

Thrust control unit in Lufthansa Boeing 707 aircraft designed to maintain landing approach speed by adjusting throttle setting and landing flap position 05 p0845 A70-15903

Vehicles optimal flights with controlled or boundary level thrust in circular orbit neighborhood, using linearized equations of motion 06 p1142 A70-17876

Fighter aircraft inflight thrust control using thrust reverser technology to improve operational capability [AIAA PAPER 70-513] 09 p6160 A70-23019

Base pressure effects on cone angle of fixed length conical nozzle yielding maximum thrust 11 p1977 A70-26156

Fuel-optimal retrothrust control in state dependent retarding force fields, taking into consideration synthesis for vertical trajectory system configuration 11 p2126 A70-26321

Rao optimization method for thrust nozzles at given length, analyzing control surface flow field conditions 12 p2158 A70-28202

Maximum thrust and drag reduction for supersonic missiles by base burning, showing dependence on chemical reaction and Mach number 12 p2158 A70-28208

Satellite rendezvous programmed control with allowance for thrust limitation by free trajectories method, determining impulse duration, magnitude and time 12 p2314 A70-28257

Causes and magnitudes of thrust misalignment of Kaufman type electron bombardment ion thruster [AIAA PAPER 69-303] 13 p2473 A70-28506

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios [AIAA PAPER 69-420] 13 p2473 A70-28507

Liquid mercury /LM/ cathode thruster characteristics, power conditioning and control requirements [AIAA PAPER 70-646] 16 p2965 A70-33536

HEUS solid rocket motor impulse control, describing liquid quench concept development through full scale test firing [AIAA PAPER 70-642] 16 p2969 A70-33600

Throttling venturi valves for thrust modulation of liquid propellant rocket engines, testing pressure recovery, mixture ratio control and gas saturation and boundary layer effects [AIAA PAPER 70-703] 17 p3146 A70-34510

Solid rocket motors, investigating thrust magnitude and stop-restart control 17 p3148 A70-35207

R-4D multiapplication rocket engine for Apollo spacecraft reaction control, discussing design, performance, quality assurance and tests 17 p3178 A70-35259

Reaction jet azimuth control system for balloon-borne gondola 17 p3018 A70-35316

Steady state off-on attitude control strategy for minimizing propellant consumption and thrust ignitions of satellite in presence of environmental disturbance torques 17 p3180 A70-35556

Optimal low thrust transfer between coplanar circular orbits, examining thrust direction and steering as Mayer problem 22 p4097 A70-42489

High performance reaction pointing control systems for sounding rockets, using proportional control of differential thrust and adaptive control of thrust magnitude [SAE PAPER 700783] 24 p4415 A70-45861

Concorde thrust control by employment of variable area nozzle and reheat system, discussing crew work load [SAE PAPER 700817] 24 p4394 A70-45900

THRUST LOADS

Space vehicle residual thrust oscillation and dynamic response using power spectral density functions from flight data 10 p1953 A70-25068

Dynamic postbuckling response of thin elastic circular plates under axisymmetric time dependent radial thrust, discussing response to step loading 10 p1964 A70-25206

THRUST MEASUREMENT

Charged aerosol charge/mass ratio measurement and colloidal propulsion system thrust, efficiency and exhaust velocity determinations 03 p0551 A70-12936

Pyrotechnic thrusting devices output dynamics, describing testing for spacecraft applications 03 p0549 A70-14125

Gross thrust coefficient for turbofan engines thrust estimates, discussing full scale nozzle simulation 04 p0736 A70-15390

Net thrust determination for high bypass ratio engines in cruise, suggesting performance evaluation in actual flight tests [SAE PAPER 690652] 05 p0895 A70-15841

Thrust static characteristics of poppet valves with specific angle range indicating validity of momentum theory for thrust estimation 06 p1075 A70-17139

In-flight thrust measurement via internal gas generator and external traverse methods, discussing accuracy requirements, errors and aircraft design role 13 p2474 A70-28539

C-5A turbofan engine thrust determination using pressure and temperature values in exhaust nozzles [AIAA PAPER 70-611] 16 p2969 A70-33606

Dynamic force and pressure measurement on rocket nozzle during simulated stage separation, describing instrumentation and control system 17 p3061 A70-35478

High response thrust measurement system for pulsed attitude control rocket engines 17 p3061 A70-35479

Thrust measurements on pulsed vacuum-arc thruster, comparing specific impulse and efficiency with exhaust velocity measurements by ion collecting double probes [AIAA PAPER 70-1146] 20 p3567 A70-40207

In-flight thrust measurement methods on SERT 2 ion thrusters, using accelerometer, electrical parameters and orbit change [AIAA PAPER 70-1126] 20 p3691 A70-40219

Time-of-flight mass flow rate and thrust stand data comparison for two 100 micropound colloid thrusters [AIAA PAPER 70-1144] 20 p3691 A70-40229

Micropound extended range thrust stand /MERTS/ for testing electric thrusters for spacecraft auxiliary propulsion, providing three thrust measurement ranges and data telemetry system [AIAA PAPER 70-1111] 20 p3607 A70-40232

Quasi-steady MPD arc thruster average thrust measurements, considering time-of-flight velocity determination by ion collecting probes [AIAA PAPER 70-1080] 20 p3694 A70-40255

Thrust vector measuring device using floating suspension system for ion engines, detecting vertical tilt and horizontal drifts of floating platform [AIAA PAPER 70-1104] 21 p3805 A70-41789

Thruster for direct output reading from jet engines based on stream and total port pressures 24 p4340 A70-46328

THRUST PROGRAMMING

Composite programming of vertical ascending rocket with constant thrust phase followed by acceleration and coasting phases, discussing burnout altitude and fuel consumption 08 p1582 A70-21775

Optimal longitude rendezvous for geostationary satellite by using inertially fixed orientation thrust for performing final positioning [ONERA TP-801] 10 p1941 A70-24541

Spacecraft stochastic optimal control, discussing design of least upper bound fuel optimal system with measurement uncertainty 11 p2025 A70-26222

THRUST REVERSAL

Positive displacement low pressure air motors for Boeing 747 fan thrust reverser pneumatic actuators and controls 03 p0550 A70-12881

Fighter aircraft inflight thrust control using thrust reverser technology to improve operational capability [AIAA PAPER 70-513] 09 p6160 A70-23019

Mathematical model for flow within external target type thrust reverser, assuming inviscid incompressible two dimensional flow [AIAA PAPER 69-3] 12 p2291 A70-28085

Jet thrust reversers mechanical design limits, objectives and materials 14 p2628 A70-30500

In-flight thrust reverser for tactical/attack aircraft, discussing system influence on airplane stability and control [AIAA PAPER 70-699] 16 p2841 A70-33561

Forces acting at thrust termination time with aluminumized solid propellant rocket fuel, predicting thrust reversal ratio under vacuum conditions 21 p3869 A70-41869

Concorde downstream thrust reversal nozzle, noting weight saving by use of welded stainless steel honeycomb construction 22 p4092 A70-43213

THRUST TERMINATION

Liquid fuel jet engine thrust aftereffect momentum, investigating switching off transient process 19 p3490 A70-37249

Forces acting at thrust termination time with aluminumized solid propellant rocket fuel, predicting thrust reversal ratio under vacuum conditions 21 p3869 A70-41869

THRUST VECTOR CONTROL

Two step optimal motion of target and pursuer with thrust vector control in vacuum under arbitrary gravitational field, determining distance strategy 02 p2272 A70-12405

Control system response improvement by state variable feedback illustrated by frequency and transient response tests data from analog model 04 p0662 A70-15331

Harrier G.R. Mk 1 VTOL vectored thrust aircraft for attacking targets at conventional strike aircraft speed, discussing design and combat effectiveness 06 p0985 A70-17157

Constant thrust electric propulsion systems performance with coast trajectories presented for 100 AU extraelectric missions [AIAA PAPER 68-546] 06 p1137 A70-17160

Installed thrust vector for scarfed attitude control nozzles flush mounted with spacecraft cylindrical surface, predicting pressure distributions for internal thrust 06 p1154 A70-17167

Pulsed plasma vacuum-arc thruster system incorporating throttle and thrust vector controls for long life satellite control applications [AIAA PAPER 70-180] 06 p1133 A70-18232

Thrust vectoring of multiaperture Ce electron bombardment ion engines, determining thrust deflection limit by accelerator current rise 11 p2102 A70-26124

Minimum-time thrust vector control law in Apollo lunar module computerized autopilot 13 p2499 A70-28399

Thrust vector control application to Skylark vehicle to eliminate wind and thrust misalignments effects 13 p2503 A70-28676

Microthrusters for geostationary satellites attitude and position control 15 p2791 A70-32279

Cross product steering for space vehicles and ballistic missiles guidance during powered vacuum flight, pointing thrust acceleration vector to null velocity at termination 16 p2947 A70-33440

Thrust deflector for VTOL aircraft fuselage mounted lift engines designed as isentropic plug nozzle, considering mass flow, pressure forces and Coanda effect [SAWE PAPER 841] 20 p3563 A70-40379

Ion thrust vectoring systems for satellite attitude control and stationkeeping, discussing deflection techniques [AIAA PAPER 70-1150] 21 p3868 A70-41783

Three axis attitude ion thrust vector control mechanism for solar electric propulsion spacecraft, discussing gimbal and translation actuators, array and cabling [AIAA PAPER 70-1156] 21 p3759 A70-41784

Thrust vector measuring device using floating suspension system for ion engines, detecting vertical tilt and horizontal drifts of floating platform [AIAA PAPER 70-1104] 21 p3805 A70-41789

Lockseal/flexible joint/ for solid propellant rocket motor thrust vector control, considering construction, operating characteristics and tradeoffs [SAE PAPER 700777] 24 p4393 A70-45865

THRUST-WEIGHT RATIO

- Engine weight estimation for showing effect on thrust, specific impulse and uranium loss rate for open cycle gas fueled nuclear rocket engine
[AIAA PAPER 70-690] 16 p2949 A70-33553
- Multiorbit injection earth departure technique for optimal thrust-weight ratio in manned interplanetary missions using NERVA engine
[AAS PAPER 70-039] 17 p3175 A70-34780
- Variable sweep high thrust-weight ratio multirole combat aircraft /MRCA/, discussing British-French cooperation, development programs and requirements 17 p3017 A70-34916

THRUSTORS

U ROCKET ENGINES

THUNDERSTORMS

- Thunderstorm lightning discharge formation mechanism, investigating electric charge concentration and motion of free electrons 01 p0134 A70-10169
- Thunderstorm downdraft trajectories and temperatures, discussing evaluation of cooling due to evaporation 02 p0325 A70-12256
- Mesoscale rawinsonde network for convective process resolution, describing reduction and analysis techniques for thunderstorm wind, temperature and moisture data 03 p0521 A70-13165
- Airborne and ground based radar data on thunderstorm echoes compared within framework of storm reflectivity model and radar theory 06 p1010 A70-18246
- Thunderstorms and thunderstorm phenomena - ASM Conference, Chicago, April 1969 06 p1099 A70-18567
- Cloud base updraft field, three dimensional reflectivity pattern and rain and hailfall pattern for thunderstorms in Alberta, discussing shear 06 p1099 A70-18569
- Momentum considerations in thunderstorm dissipation by disrupting organized cloud base updraft structure 06 p1100 A70-18570
- Model for thunderstorm downdrafts induced by rain evaporation based on one dimensional steady state formulation, deriving vertical velocity profiles 06 p1100 A70-18573
- Numerical model of thunderstorm cold air outflow, providing horizontal flow as function of height from computer program using vertical velocity and storm motion 06 p1100 A70-18574
- Thunderstorm cold air outflow leading edge structure recorded by NASA meteorological tower at Kennedy Space Center 06 p1100 A70-18575
- Vertical wind distribution associated with thunderstorm outflow, measuring wind direction oscillations at Kennedy Space Center 06 p1101 A70-18576
- X band Doppler radar observation of horizontal motion of precipitation particles in low levels of slow moving thunderstorm 06 p1101 A70-18580
- Pulsed Doppler radar observation of thunderstorm updraft structure, noting vertical velocity perturbations 06 p1101 A70-18581
- Tornado producing thunderstorms, using conventional surface and upper air data combined with ATS-III data, discussing mesoscale disturbances and momentum exchange 06 p1102 A70-18583
- Vertical motion and temperature structure of severe thunderstorms from jet aircraft penetration 06 p1102 A70-18585
- Stratospheric clear air turbulence over squall line, discussing turbulence over thunderstorms 06 p1102 A70-18588
- Thunderstorms lightning flashes time distribution recorded visually and on radar screens, discussing statistical variations in sigma 08 p1539 A70-21648
- Ground based radar surveillance for SST to avoid convective clouds and thunderstorm activity during transonic acceleration phase ensuring minimum demands on maneuverability 09 p1610 A70-22242
- Group delay time differences of spectral groups of VLF atmospherics respecting day and night variation for thunderstorms, determining distance dependence 10 p1884 A70-25260
- Vertical air velocity in convective clouds by pulsed Doppler radar observations of thunderstorm 11 p2004 A70-25650
- Stratospheric clear air turbulence /CAT/ vertical extent above thunderstorm graphically represented 12 p2265 A70-28095
- Thunderstorm detection and warning system, measuring vertical potential gradient and changes caused by lightning discharges 14 p2607 A70-30574

Thunderstorm bottom wind profile model, analyzing flow distribution, isotach, isogon and isotherm characteristics 14 p2607 A70-30584

Slow tail atmospherics and VLF pulse measurements at close-to-thunderstorm fields, indicating return stroke origin 17 p3046 A70-35395

Right-moving thunderstorm characteristics from mesonetwork rawinsonde updraft observations, considering hydrostatic pressure and cyclonic rotation 19 p3462 A70-38260

Thunderclouds electric fields and conductivities measurement by differential rotating mill, noting insensitivity to space charge and frictional charging 20 p3661 A70-39146

Nighttime lightning activity observations by orbiting solar satellite OSO-B, determining thunderstorms positions by optical radiation detection 20 p3623 A70-39978

Quasi-periodic ionospheric oscillations associated with nuclear explosions, thunderstorms and quiet conditions 21 p3814 A70-40938

Thunderstorm development processes investigated by aircraft measurements of electrical structure in cumulonimbus clouds, noting lightning probability dependence on turbulence within cloud 22 p4064 A70-42775

Global thunderstorm activity experiment by Ariel 3 satellite, investigating lightning discharge number and noise power 22 p4015 A70-42778

Global thunderstorm activity location found by measuring differences between time of arrival of electromagnetic energy at three satellites 22 p4016 A70-42779

Thunderstorm frequencies related to lunar phase and declination for ground stations in eastern and central U.S. 22 p4018 A70-42909

THYMIDINE

Thymidine tracer distribution in bone marrow chromosomes of rats and mice treated with radioprotectors, noting cell metabolic activity reduction by sulphydryl-type radioprotectors 09 p1619 A70-22818

Radiation induced free radicals in thymidine single crystals, attributing electron spin resonance spectral observations to nature of various radicals 22 p3981 A70-42348

THYMINE

Cytosine-thymine transitions from cytosine-5-H3 decay in bacteriophage S13 DNA, discussing coding change efficiency 05 p0803 A70-16948

Parental termini-daughter strand linkage in initiation of DNA replication in *Bacillus subtilis* after thymineless germination 16 p2847 A70-33060

Radiation effects on dihydrothymine in frozen sulfuric acid solutions, detecting thymine after melting via low temperature UV absorption measurements 20 p3583 A70-40454

Radicals induced in thymine monohydrate single crystals by ionizing radiation 20 p3583 A70-40455

THYMUS GLAND

Gamma radiation effects on membrane permeability of isolated nuclei from white rats thymus in sucrose-calcium buffer 04 p0629 A70-14460

THYRATRONS

Thyratron based fast pulse generator circuits noting applications 11 p2017 A70-25570

Univibrator analysis with glow discharge thyratrons, increasing time lag for equal R and C values 16 p2873 A70-33237

THYRISTORS

Monolithic zero crossing AC trigger IC for thyristor power control systems operating in on-off mode 08 p1478 A70-20786

Threshold and frequency relaxational radiation detectors, discussing operation and sensitivity of p-n-p-n silicon photothyristor and luminosity dependent devices 09 p1649 A70-23356

Thyristor tetrode silicon controlled switches /SCS/, considering unijunction transistors and pulse generator circuits 13 p2377 A70-29115

Thyristor tetrodes application to current and voltage stabilization, frequency division and lighting control 16 p2880 A70-34099

Si controlled thyristors applied to pulse modulators in ionospheric stations 18 p3233 A70-37043

Thyristor circuit for storing or generating digital control signals, considering reliability at high noise levels 19 p3385 A70-37377

Low power thyristors in relaxation oscillation circuits, considering static and dynamic characteristics in large signal mode 20 p3596 A70-38971

Stress tolerant thyristor and transistor switching electronic converter for ion propulsion engine [AIAA PAPER 70-1157] 21 p3866 A70-40901

Thyristor-servomotor temperature control unit, describing circuit and applications 22 p3996 A70-42850

M phase thyristor amplifier operation, investigating state and transition equations by state variable methods 22 p3996 A70-42918

THYROID GLAND

Thyroid influence on RNA content and nucleotide composition in hypothalamus, cortex and phenolic fractions of cerebral hemispheres resulting in accelerated protein biosynthesis 01 p0019 A70-10511

Thyrotropin /TSH/ effects on thyroidal iodine metabolism during hypoxia in rats 02 p0231 A70-11703

Stimulated thyroid gland temperature variations and oxygen metabolism in decorticated dogs and anesthetized rabbits and rats 04 p0639 A70-15511

Adaptive reactions in thyroidectomized rats blood and brain during adaptation to hypoxia compared with intact animals 07 p1214 A70-19794

Thyroid gland function following radiation injury by measuring plasma protein bound iodine in irradiated rat blood 09 p1621 A70-23150

Hyperthyroidism diagnosis by pattern recognition, using computerized class featuring information compression 22 p3977 A70-43732

THYROXINE

Thyroxine stimuli transmission from posterior hypothalamus to cerebral cortex ascribed to dorso-medial nucleus of thalamus 16 p2848 A70-33261

TIDAL OSCILLATION

U TIDES

TIDES

NT ATMOSPHERIC TIDES

NT LUNAR TIDES

Lunar surface luminescence considered for correlation with tidal forces of earth 09 p1758 A70-22748

Gersternkorn moon capture theory taking into account tidal evolution of earth-moon system, discussing marine organisms time rate synopsis for earth rotation retardation 10 p1943 A70-24840

Planetary tidal force effect on solar activity cycle, showing amplitude proportionality to solar and gravity center deviation 14 p2649 A70-31199

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics 15 p2801 A70-32481

Phase delay of solid earth tide, minimizing ocean and atmosphere loading by strain seismograph measurement 18 p3255 A70-37077

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics 23 p4240 A70-43906

Artificial liquid satellite orbited to verify tidal theory 23 p4183 A70-44659

Nonspherical stellar internal structure, developing method for models with rotational and tidal distortion 23 p4249 A70-44804

TIG WELDING

U GAS TUNGSTEN ARC WELDING

TILT

U ATTITUDE [INCLINATION]

TILT WING AIRCRAFT

NT CL-84 AIRCRAFT

Tilt wing-propeller VTOL model, comparing static wind tunnel with moving-track test data based on coefficient forms of freestream and slipstream dynamic pressures [AIAA PAPER 70-574] 13 p2343 A70-29895

TILTING

U ATTITUDE [INCLINATION]

TILTING ROTORS

U.S. rotorcraft research regarding materials and engine technologies of conventional and compounded helicopters 02 p0226 A70-12314

Dynamic stability of complex aeroelastic structures including V/STOL aircraft using simplified technique, noting application to tilt rotor aircraft design [AIAA PAPER 70-22] 06 p1170 A70-18119

Rotorcraft design and aerodynamics, discussing structural vibrations and all-weather operation 13 p2344 A70-28545

Blade flexibility effects on static stability derivatives of prop/rotors in propeller flight mode
17 p3013 A70-34701

Aerodynamic and structural considerations in prop/rotor design for tilt-rotor aircraft, discussing blade twist effect on/cruise efficiency and figure of merit
17 p3014 A70-34719

Tilt-fold-proporotor VTOL aircraft characteristics, stability and control, emphasizing flying qualities
17 p3014 A70-34722

TIMBER IDENTIFICATION
Mixed hardwoods and pine area forest cover types identification by aerial photography
14 p2577 A70-30981

TIMBER INVENTORY
Aerial photography applications to timber management programs of forest industries
10 p1879 A70-24746

K band SLR /side-looking radar/ imagery mapping tropical lowland vegetation compared to photographic coverage
10 p1879 A70-24747

Forest inventory data collection by 70 mm photography, creating correction surface over model area of large scale pair
10 p1880 A70-24754

Multistage sampling of space and aircraft remote sensor imagery for forest inventory
12 p2228 A70-26921

Mixed hardwoods and pine area forest cover types identification by aerial photography
14 p2577 A70-30981

Earth resources information systems using space, aerial and ground measurements, discussing Apollo 9 IR color photograph of Mississippi Valley and timber inventory applications
23 p4192 A70-44679

TIMBER VIGOR
Day/night thermal IR imagery detection of moisture stress of girdled trees in upland forest
16 p2898 A70-34047

TIME
NT ACCESS TIME
NT BURNING TIME
NT EPHEMERIS TIME
NT FLIGHT TIME
NT REACTION TIME
NT RELAXATION TIME
NT RESPONSE TIME [COMPUTERS]
NT TESTING TIME
NT TRANSIT TIME
NT UNIVERSAL TIME
Meteorite falls statistics correlations for fragmentation relationships with mass, time of fall and class
05 p0912 A70-16447

Time variations and angular collimation of radiation emitted by source with relativistic streaming
06 p1134 A70-17281

Singularity for absolute zero of time suggested for beginning of universe by Einstein relativity theory
07 p1336 A70-19922

Artifices to allow computing time reduction in recursive data elaboration for high order differential system
09 p1720 A70-22647

Time dilation in space travels at light velocity under influence of special theory of relativity
10 p1943 A70-24760

Science of time considered with reference to quantum physics, special theory of relativity, directivity and symmetry and conditional probability, discussing clock designs
12 p2271 A70-27276

Time travel and cosmological model based on Einstein relativity theory, considering hypothetical motor design, energy supply, tachyons and four dimensional orbits implications
20 p3710 A70-40132

TIME CONSTANT
NT PERCEPTUAL TIME CONSTANT
Gas laser beams short time constant and thermal self defocusing following small spot focusing on thin dye sample
01 p0109 A70-10431

Decay times for thermal disturbances near cloud tops in Jupiter atmosphere, discussing hydrogen absorption
02 p0368 A70-11827

Magnetic flux trapping experiment with Al conductor, showing decay time constant connection with sun-spot theory
02 p0299 A70-12393

Synthetic molybdenum diselenide oxidation kinetics between 375-530 C, determining isothermally reaction rate constants in dry air
[ASLE PREPRINT 69-LC-8] 02 p0321 A70-12537

Dynamic time constants for specific transition and relaxation times of hydrogen maser, noting coupling between hyperfine differences and atomic polarization
03 p0498 A70-13007

Time constant of man machine system as adaptive variable in training devices derived from combined vehicle properties and human control characteristics
05 p0805 A70-16005

Thermometer dynamic response under various working conditions predicted from time constant curves
05 p0849 A70-16518

Spectroradiometer with paramagnetic traveling wave quantum amplifier applied to radio telescope, studying noise, temperature and fluctuation sensitivity at given time constant
08 p1495 A70-21054

Time constant, steady state and tracking error of AGC loops at input/output of FM link in AM-FM telemetry system
12 p2184 A70-27250

Time constant equations for hair and film radiosonde hygrometers, allowing for inertial errors in humidity and cloud boundary measurements
14 p2603 A70-30412

Time constants of low inertia resistance thermometers by heating with alternating AC and DC currents
19 p3420 A70-37263

Finite difference time integration method for computing seismic ray intensities
19 p3412 A70-37837

InAs pulsed injection laser at cryogenic temperature for measuring time constant of IR radiation detectors
20 p3630 A70-39449

Human sweating transient state characterized by time constant following abrupt ambient temperature rise
21 p3761 A70-41140

Signal arrival time variance in optical communication system with high lag photodetectors, examining input, detection and amplification noise
23 p4196 A70-44410

Spacecraft thin walled tubular booms thermal curvature time constants in relation to solar induced despin of satellites
23 p4258 A70-44521

TIME LAG
U TIME LAG
TIME DEPENDENCE
Nimonic Ni-Cr based alloys fracture characteristics used to determine temperature and time effects on equicohesive points positions
01 p0116 A70-10073

Time dependent telegrapher equation solution for studying transient neutron waves propagation
01 p0130 A70-10086

Data acquisition methods and position in data processing with respect to time and quantity requirements
01 p0047 A70-10260

Sea-level pressure interval to prevent decompression sickness in humans flying in commercial aircraft after diving
01 p0032 A70-10366

Anomalous temperature-time cooling data for surface material of Tycho, Copernicus and Aristarchus craters, suggesting relation to magnetic phase transitions during lunar nights
01 p0183 A70-10825

Mathematical theory of time domain statistical description of random signals in terms of probability theory
01 p0044 A70-11042

Time dependent behavior of separated and unseparated unsteady flow of incompressible viscous and inviscid fluids without heat transfer
01 p0067 A70-11162

Time course of end bulb material formation in vitro in rodent myelinated nerve fibers, confirming elastic capillary concept
02 p0233 A70-11725

Time dependence of contact zone radius of rigid sphere pressed against viscoelastic half space by normal force
02 p0384 A70-11738

Premature saturation in strongly magnetic systems explained by model with nonuniform magnon modes, applying time dependent Green functions
02 p0338 A70-11886

Forward scattering by nonergodic system of identical particles, relating temporal correlation function of scattered radiation and intensity moments
02 p0255 A70-11919

Viscoelastic boundary value problems involving time dependent boundary regions reduced to elastic problems, starting with aging viscoelastic body
02 p0388 A70-12269

Ammonia absorption band at 6450 A in Jovian atmosphere, clarifying controversial absorption time variations
02 p0375 A70-12428

Jovian atmosphere photometric activity determination, showing time variation and difference in strength between Northern and Southern Hemisphere
02 p0375 A70-12430

Threshold visibility of uniformly moving colored gratings, noting chromaticity discrimination dependence on spatial and temporal frequencies
02 p0237 A70-12460

Electromagnetic pulse scattering in time varying inhomogeneous medium, applying finite difference method to Maxwell equations
02 p0261 A70-12588

Neutron star atmospheric composition as function of time, including effects of diffusion, cooling and nucleosynthesis
02 p0378 A70-12698

Rigid plastic body of material insensitive to strain rate under time dependent surface tension and time independent body forces
02 p0391 A70-12816

Optical echoes using model of spins precessing in magnetic field, presenting time dependent theory of perturbation
02 p0341 A70-12830

Stefan heat conduction problem with time dependent first kind boundary conditions approximate solution, taking into account unsteady temperature field of solidifying liquid
03 p0604 A70-13210

Light alloys cold hardening effect and fatigue strength estimation, considering residual stress variability with time
03 p0587 A70-13239

O-C diagrams of RR Lyrae variables in M5, considering representation by parabolas or intersecting straight lines
03 p0567 A70-13321

Thermoelastic stresses in plate due to arbitrary temperature variations of heat transfer agent calculated in second approximation, allowing for transfer coefficient time dependence
03 p0590 A70-13400

Heat transfer under conditions of forced convection from flat plate in laminar flow, considering plate surface temperature arbitrary variation in time
03 p0605 A70-13518

Temporal and statistical characteristics of HF oscillations from electron beam interaction with plasma in magnetic field
03 p0532 A70-13524

Rotating prism method for obtaining time correlation between streak photographs and characteristic waveforms of flash X ray discharges
03 p0492 A70-13762

Recall and recognition memory in concept identification, discussing presentation time /PT/
03 p0424 A70-13767

Motion stability and time dependent deflections of thin flexible cylinder with zero bending rigidity in viscous stream
03 p0595 A70-13783

Readaption times of eyes adapted to darkness using night vision training device in relation to helicopter flight safety conditions
03 p0436 A70-13823

Time of establishment of steady state mixing in plane and axisymmetrical jets determined, using self similar motions in unsteady state boundary layer and free turbulence
03 p0409 A70-13875

Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence
03 p0425 A70-13894

Evaporative weight losses by sweating in man exposed to warm environment as function of time, including graphical method for heat storage prediction
03 p0430 A70-14164

Muonic and hadronic component arrival time distribution in EAS measured under rock compared to Monte Carlo computation
03 p0562 A70-14187

Polyurethane rubber time- and temperature-dependent visco- and photoviscoelastic coefficients using two dimensional strain and stress wave propagation photoviscoelastic analysis
03 p0599 A70-14243

Dipole shielding tensor of atom in arbitrary time dependent field, giving conditions for general variational calculations yielding results
04 p0721 A70-14389

Niobium powder hot pressing compaction in terms of porous body volume viscous flow, determining viscosity shift time dependence
04 p0696 A70-14461

Natural vibrations damping of holonomic mechanical systems with feedbacks not explicit function of time reduced to optimal stabilization problem
04 p0718 A70-14494

Time transient and step-jump dynamic analyses of gas lubricated bearing, illustrating hybrid journal and Rayleigh-Step thrust bearings
[ASME PAPER 69-WA/LUB-5] 04 p0697 A70-14768

Transient temperature distribution in inhomogeneous material, using finite difference representation for temperature time derivative
[ASME PAPER 69-WA/HT-33] 04 p0782 A70-14807

Instantaneous heat transfer from oscillating wire in free convection in still air as function of time
[ASME PAPER 69-WA/HT-15] 04 p0783 A70-14819

Chapman-Ferraro two dimensional problem with neutral sheet, investigating magnetospheric flows and time dependence
04 p0679 A70-15109

Thermoplastic behavior of bodies under variable loads obtainable as function of time variable external temperature field

04 p0775 A70-15200

Intermediate aging influence on Bauschinger effect in low carbon steel at 270 C and 2 hr holding time

04 p0776 A70-15266

Time dependent transmission of carbon dioxide in air flowing through molecular sieve adsorber beds, developing and programming weighted least squares analysis

04 p0786 A70-15315

Aluminized composite solid propellants burning rates in acceleration fields noting time dependent increase

[AIAA PAPER 68-529]

04 p0709 A70-15581

Multiple time scaling analysis of reentry roll rate and angle of attack for missiles with center of gravity and aerodynamic trim asymmetries

04 p0764 A70-15597

Optically trapped filaments in liquid carbon disulfide by side illumination and crossed polarizers using glass laser, noting birefringence and duration time

04 p0703 A70-15619

Polycrystalline metals strength factors in aircraft and aerospace construction as relation between rupture time and embrittled grain boundary at high temperatures

04 p0779 A70-15671

Terminal states and time specifications influence on optimum control systems, using Pontryagin principle for boundary value problems application

05 p0824 A70-15874

Temporal behavior of NP 0532 in radio and optical bands compared for second derivative of period

05 p0906 A70-15893

Time dependent variation of first and second harmonics amplitudes of diurnal cosmic ray variations during SC magnetic storms

05 p0898 A70-15942

Frequency bandwidth reduction for geophysical data transmission from satellites or lunar stations by time correlation of signal and transmission channel band changes

05 p0847 A70-15968

Photoelastic and photorheological analysis of time-dependent variation of stress distribution in long strip compressed oppositely with elastic flat punches

05 p0928 A70-16012

Time dependent expansions into vacuum of monatomic gases with spherical symmetry, obtaining moments expressions for Maxwellian molecules

05 p0831 A70-16015

Diffusion rates in refractory metal alloys for thermionic emitters as function of time and temperature

[GA-9495]

05 p0892 A70-16075

Spatial and temporal relations between auroral emission at green line 5577 and cosmic noise absorption studied to determine energy spectra and particles distribution

05 p0907 A70-16281

Energy spectrum time dependence of solar cosmic ray event of 28 January 1967 measured in Northern Hemisphere, discussing particle diffusion and magnetic trap

05 p0902 A70-16459

Ocean surface roughness time variation effect on incident laser beam, analyzing motion picture data by computer program

05 p0860 A70-16687

Maraging steel mechanical properties as function of aging temperature and time

05 p0865 A70-16873

Time-varying loads effect on linear elastically hereditary media described by generalized fractional-order exponential functions and Rzhansyn type viscoelastic kernels

05 p0946 A70-16954

Rapid fine structure in hard solar X ray bursts observed by OSO-5, explaining time structure by mechanism based on repetitive production of monoenergetic electrons

05 p0904 A70-16980

Orbital rendezvous for inspection, rescue, etc, discussing launch bases number, warning time and alert status effect on reaction time

06 p1027 A70-17173

Viscoelastic fluid flow through circular tube under time dependent pressure gradient superposed on steady Poiseuille flow

06 p1032 A70-17200

Accumulated dose and dose rate during Gemini 4 and 6 flights measured as function of elapsed time and position within spacecraft

06 p0990 A70-17270

Time of useful function (TUF) determination for human exposure to toxic gas combinations due to fire

06 p1000 A70-17294

Microwave frequency radar terrain echoes simulation concerning variation of echo delay, Doppler shift, random fine structure and time variation

06 p1008 A70-17482

Electron recombination in inert gases at various pressures, studying electron density decrease in time by UHF and optical methods

06 p1109 A70-17495

Corpuscular radiation as F region ionization source, solving time dependent ionospheric continuity equation

06 p1054 A70-17588

Finite elements of time dependent phenomena using Hamilton variational principle for time integration

06 p1165 A70-17645

Time characteristics of pulsed calcium fluoride-dysprosium laser in single mode, observing constant emission and peak regime

06 p1082 A70-17808

Solar radio bursts time-variable structure at 12 M wavelength recorded on Ediswan pen oscillograph

06 p1144 A70-18005

Time dependent transport equations for full Reynolds stress tensor and turbulence decay function using flux approximations and relaxation model

[AIAA PAPER 70-3]

06 p1038 A70-18080

Temperature and pressure effects as function of time in spectral and total normal emittance of metal coated refractory metals

[AIAA PAPER 70-68]

06 p1092 A70-18136

Finite difference solution of time dependent Navier-Stokes equations for two and three dimensional laminar incompressible flow, discussing results for flat plates

[AIAA PAPER 70-46]

06 p1041 A70-18170

Time dependent inviscid gas flow on infinite domain computed by finite difference method

[AIAA PAPER 70-45]

06 p1042 A70-18188

Isentropic model for time behavior of steady spherical source expanding into arbitrary ambient gas

[AIAA PAPER 70-232]

06 p1042 A70-18215

Microsecond-response bolometer for measuring thermal fluxes as function of time in high explosion driven shock tubes and plasma jets

06 p1070 A70-18445

Brazing time and temperature effect on depth of Ag based brazing alloys penetration into thin Ti-Al-V sheet substituted by microprobe analysis

06 p1078 A70-18513

Local time dependence of geomagnetic cut-offs for solar protons in 0.52-4.0 Mev range from satellite observations

06 p1136 A70-18529

Magnetic activity effect on magnetospheric plasmopause position, measuring ion concentrations as function of local time fromOGO 5 observations

06 p1058 A70-18530

Temporal behavior of energetic particle precipitation during auroral substorm, discussing electron energy spectra and pitch angle distributions

06 p1059 A70-18536

Optimal guaranteeing control for single switching representable in form of two different successive stages in time, ensuring invariance with respect to motion perturbations

07 p1332 A70-18664

Laminar boundary layer development on cylindrical body set in motion from state of rest, determining time for boundary layer separation occurrence

07 p1253 A70-18771

Stainless steels case hardening in hydrogen, nitrogen, propane and butane mixture, showing temperature and process duration effects

07 p1291 A70-18831

Integral method for time development of viscous, heat and mass conducting layer over leading edge of volatile drop instantaneously immersed in gas stream

07 p1358 A70-18916

Time dependent stability of viscous rotational Couette flow induced by impulsively started rotating inner cylinder, using dye injection and motion pictures

07 p1255 A70-19209

Circular plates dynamic response to axisymmetric time dependent loads, analyzing transverse restraint effects on response maxima by plate theory

07 p1404 A70-19251

Digital data transmission over discrete time Gaussian channel with noisy feedback, investigating error-exponent/reliability/ and finite SNR

07 p1235 A70-19362

Electrolyte purity effect on initiation times and growth rate of Zn dendrites in alkaline zincate solution, discussing dendrite initiation retardation

07 p1356 A70-19387

Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters

07 p1266 A70-19438

Magnetic field filtration into time-variable and constant parts, using signal to noise analogies

07 p1266 A70-19440

Hypokinesia effects on cellular and humoral indices of antibody formation in rats, noting exposure time role

07 p1208 A70-19509

Opening distance and inflation time prediction for parachutes deployed supersonically based on subsonic performance

07 p1394 A70-19725

Visual backward masking facilitation dependence on target duration as opposed to interstimulus interval or target-onset/mask-onset interval durations

07 p1221 A70-19850

Human physiological responses to lower body negative pressure (LBNP), studying presence or absence of change for orthostatic tolerance as function of time

07 p1222 A70-19933

Thermal explosion criterion for explosion/ignition delay of exothermic material surrounding heated wire as function of time

07 p1424 A70-20005

Magnetospheric plasmopause-high latitude electron density trough relations using satellite topside ionograms, noting local time and magnetic disturbance effects

07 p1270 A70-20074

Time variations of reflectance measured for carbon dioxide laser beam splitters

07 p1302 A70-20095

Time block pooling of atmospheric noise data, basing randomness conclusion on observations correlation

07 p1236 A70-20161

Unsteady flow behind circular cylinder by flow visualization, determining vortices length variations with time at various Reynolds numbers and dimensionless accelerations

07 p1261 A70-20236

Time dependent matrix elements for multistate impact-parameter calculations for atom-atom inelastic cross sections

07 p1346 A70-20242

Spatial and temporal cosmic plasma variations over various energy and wavelength ranges using cosmophysical and aeronautical facility

07 p1372 A70-20339

Solar corpuscular fluxes directional distribution time dependent changes effect on lower ionospheric electron production rates

07 p1373 A70-20344

Solid state lasers thermal resonator buckling time dependence and compensation, graphing results of resonator field analysis

07 p1303 A70-20359

Time dependent electrostatic probe theory relating measurements to internal properties of plasma, calculating free stream ion density from collected electric charge

07 p1289 A70-20466

Stability criteria for systems of nonlinear stochastic differential equations on finite time interval, considering stable motion of physical processes

08 p1533 A70-20488

Stability in systems finite over given time interval under permanent perturbations bounded in mean

08 p1543 A70-20490

Matrix method for converting time variable stress vector into strain vector allowing for linear creep and aging

08 p1583 A70-20531

Integral equation for time development of harmonic oscillations in finite one dimensional chain of elastically coupled discrete elements, using Bessel functions for solution

08 p1547 A70-20535

Tunable Q switched pulsed discharge carbon dioxide laser intensity dependence on time delay investigated for various vibrational/rotational lines and gas mixtures

08 p1512 A70-20618

Visual tracking of horizontally moving object, noting acuity dependence on target angular velocity and observation time

08 p1444 A70-20745

Time requirement determined for visual acuity restoration after illumination with short duration bright light flash

08 p1450 A70-20746

Optimal control systems design involving time delays as functions of time and system state, considering stability constraints

08 p1478 A70-20779

Organic adhesives preparation and application to metal surface for bonding, examining time, pressure and temperature effects on curing

08 p1503 A70-20881

Metal adhesive joints behavior under prolonged static stresses, showing time dependence of tensile strength

08 p1504 A70-20887

Steel structure and mechanical properties under preliminary loading at elevated temperature and liquid Li at various exposure times

08 p1515 A70-20935

Temperature fields creation in infinite or finite regions by moving surfaces with given time dependence of temperature studied by subjecting diffusion equation to transformations

08 p1597 A70-20959

Horizontal turbulent diffusion model of cloud, determining particles dispersion as function of time

08 p1538 A70-21111

- Mutual thermal influence zone between parts of die casting during solidification established as function of time
08 p1506 A70-21138
- Nickel boronizing in high temperature vacuum, studying mechanical properties and layer thickness time dependence
08 p1517 A70-21148
- Fiberglass reinforced plastics creep behavior under axial compression, studying time dependence of elasticity modulus and Poisson coefficient
08 p1526 A70-21174
- Gamma radiation effects on emission time, excitation threshold and efficiency of four level Nd glass laser under multimode operation
08 p1512 A70-21209
- Solar microwave bursts with double structure, discussing single frequency observations and flare patrols, time variations of flux density and brightness
08 p1561 A70-21259
- Fluidic air gauge back pressure signal frequency response as function of time
[ASME PAPER 68-WA/FE-16] 08 p1441 A70-21316
- Einstein gravitational equations general solution having physical singularity with respect to time
08 p1546 A70-21424
- Dynamic response of joined elastic quarter spaces of solids to time varying free surface shear tractions parallel to plane of juncture
[ASME PAPER 69-APMW-16] 08 p1591 A70-21467
- Aluminum-base reinforced material synthesis by liquid impregnation, investigating transition layer dependence on holding time and fiber/matrix microhardness
08 p1520 A70-21500
- Transient thermal stresses in plates with distributed heat source and heat exchange with arbitrary time dependent surroundings
08 p1593 A70-21623
- Phase variable canonical form for time varying multivariable systems requiring less computational effort
08 p1463 A70-21645
- Thunderstorms lightning flashes time distribution recorded visually and on radar screens, discussing statistical variations in sigma
08 p1539 A70-21648
- Time course of changes in rat brain norepinephrine levels after olfactory bulb lesions, discussing automatic and biological mechanisms
08 p1448 A70-21841
- Fluids equilibrium stability within medium at constant temperature and pressure, discussing time behavior of thermodynamic processes
09 p1786 A70-22062
- Longitude and latitude dependence of pc geomagnetic micropulsations related to local time, using analog spectral analysis
09 p1666 A70-22064
- Perseids time distribution, based on observations during meteor showers, contradicting appearance of homogeneous Poisson process
09 p1750 A70-22099
- Single-pulse laser radiation losses dependence on operation time length due to angular dispersion
09 p1694 A70-22140
- Time resolved photoelectric light detection, discussing photoelectric emission probability time dependence and radiation interaction with bound charge
09 p1726 A70-22232
- Automated crop surveys from integrating observations made at different times /time dimensioning/ during growing season, noting earth resources satellites role
09 p1666 A70-22263
- LC circuit with time dependent resistance containing wire explosion physics, solving differential equation of discharge circuit
09 p1726 A70-22492
- Amino acid metabolism time dependent variations, studying tyrosine transaminase rhythm in rat liver
09 p1618 A70-22525
- Linear one degree of freedom mechanical system loaded by time dependent force with constraints on loading/unloading rate, studying minimum of dynamic coefficient
09 p1727 A70-22536
- Strain rate and hold time effects on steels low cycle fatigue behavior, graphing various correlations among stress amplitude, time to fracture, etc
09 p1774 A70-22589
- Movement information from space-temporal integration in binocular-kinetic space perception of time varying optical inputs
09 p1618 A70-22672
- Time, temperature and composition dependent regularities in Ni-Al and Ni-Nb alloys oxidation processes, discussing Oxygen ion migration and Ni ion diffusion
09 p1704 A70-22752
- One dimensional discrete time nonlinear filters synthesis using Bayes theorem and digital techniques
09 p1654 A70-22934
- Layered conical shell creep under axisymmetric load and time dependent temperature field by iterating boundary integral equation
09 p1779 A70-23099
- Thermal cyclic loads effects on heat resistant materials strength during strain hardening, considering role of time factors in durability
09 p1779 A70-23104
- Stress concentration at circular hole in plate, considering material creep and aging effects
09 p1782 A70-23290
- Satellite observational data on time history of inner radiation belt /October 1963-December 1968/
09 p1746 A70-23488
- Time-temperature charts for one dimensional unsteady conduction with uniform internal heat generation
09 p1791 A70-23567
- Shock wave initiated two dimensional time dependent ducted flows in nonuniform regions using fluid-in-cell method, discussing density, pressure and energy distributions
09 p1665 A70-23740
- Airglow hydroxyl emissions diurnal variations as function of height, using digital computer for time dependent solution of equations for oxygen-hydrogen atmosphere
10 p1872 A70-23826
- Heat conduction analysis for plane body with boundary condition and time variable heat exchange coefficient, applying automatic control technique
10 p1966 A70-23869
- Time variations in human spectral response, considering sequential gain and phase estimates formation by Gabor elementary signals theory
10 p1823 A70-23895
- Laser beam interaction with metals on basis of energy balance measurements, obtaining time dependent radiation reflectance
10 p1898 A70-23982
- Epoxy glass fiber composites pyrolyzates IR spectra as function of time, observing changes in fingerprint region
10 p1828 A70-24065
- Finite difference methods stability for time dependent Navier-Stokes equations coupled to energy equation with quadratic terms in velocity gradients
10 p1866 A70-24106
- Newtonian gravitational system of three point masses with oscillatory motion at time t approaching infinity, discussing particles mutual distance
10 p1938 A70-24182
- Heat resistant materials strength characteristics with long service periods, formulating equation for time dependence of rupture resistance
10 p1903 A70-24237
- Test results extrapolation for heat resistant alloys long time strength using exponential relation between time to rupture and value for initial stress decrease
10 p1903 A70-24240
- Digital controlled phase-locked loop in burst mode operation, comparing recovery characteristics with carrier and bit-timing recovery techniques based on statistical analysis
10 p1835 A70-24704
- Reaction time dependence on sound signal probability determined by temporal structure of signal presentation
10 p1818 A70-24713
- Siderial time variations in cosmic ray intensity observed by inclined muon telescopes
10 p1933 A70-24858
- Time dependent radiative transfer equation for plane-parallel isotropic scattering medium in first Gaussian approximation
10 p1933 A70-24986
- Slowly varying parameters as engineering problem in nonlinear lumped systems
10 p1856 A70-25239
- Pi2-type pulsations in and near auroral zone observed for amplitude variation dependence on geomagnetic latitude and local time
10 p1885 A70-25280
- Time dependence of shock wave attenuation at multiple reflection in shock tube after diaphragm burst, using damped vibration solution
11 p2034 A70-25495
- Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique
11 p1976 A70-25974
- Hypokinesia effects on cellular and humoral indices of antibody formation in rats, noting exposure time role
11 p1988 A70-26108
- Linear time-varying control process with bounded control amplitudes and rates, deriving conditions for recoverability
11 p2028 A70-26314
- Resistance bridge balancing by time method for dynamic digital measurements
11 p2054 A70-26433
- Multipoint time correlations of longitudinal velocity fluctuations in grid-generated turbulence
11 p2039 A70-26532
- Effusion steady state pressures time dependence of carbon monoxide and calcium vapors generated during calcium oxide-graphite interaction
11 p1995 A70-26602
- Elastic wedge under spatially uniform but time dependent shear tractions, studying shear stress and transient wave propagation
11 p2142 A70-26629
- Transient analysis of stress waves around cracks under antiplane strain with time dependent loadings based on integral transforms
11 p2145 A70-26698
- Cotton leaf light reflectance and transmittance changes with maturity
12 p2218 A70-26919
- Decimeter radio sources flux density time variations, discussing possible causes and radio emission spectra
12 p2299 A70-27308
- Nonlinear time-varying multivariable adaptive control system design using signal synthesis technique
12 p2203 A70-27415
- Spatial-temporal distribution of meteorological elements allowing for effects of underlying surface
12 p2263 A70-27511
- Spatial-temporal distribution of wind swell HF components measured by two dimensional antenna array fed by DC signals
12 p2263 A70-27516
- Time or space decay of turbulent parameters along flow direction in jets, wakes or grid-generated turbulence, illustrating time variation of wave number spectrum
12 p2211 A70-27831
- Current sheet speed in coaxial plasma accelerator computed as function of time, comparing results with velocity measurements
12 p2281 A70-27833
- Wave propagation in spatially homogeneous time varying dispersive media, emphasizing excitation and source dependent phenomenon
12 p2188 A70-27961
- Thin cylindrical DC pulse driven antenna radiation fields time variation as function of angle
12 p2198 A70-27964
- Soft electron fluxes spatial distribution and temporal variations in magnetosphere based on Elektron 2 charged particle trap data
12 p2295 A70-28259
- Mixed boundary value problems involving time dependent boundary regions for penny-shaped crack in viscoelastic materials with one relaxation function
12 p2508 A70-28489
- Time comparative low energy proton measurements in inner radiation belt by Rubis rocket with detector telescopes and omnidirectional counters
13 p2475 A70-28572
- Book on linear time varying systems analysis and synthesis covering multivariable systems, operational algebra, controllability, observability, canonical structures, minimal realization, etc
13 p2381 A70-28975
- Stable auroral red /SAR/ arc alignment-movement relationship, suggesting dominant local time control
13 p2397 A70-29193
- Low energy solar flare electrons scatter-free propagation through interplanetary medium, considering rise, decay and travel times
13 p2477 A70-29194
- Versamid cured epoxies time-dependent mechanical properties, determining loading mode, strain level and reinforcing agent effects on time-temperature shift factors
13 p2438 A70-29205
- Free convection flow and heat transfer from semi-infinite horizontal flat plate with time-oscillating temperature, using successive approximations process
13 p2522 A70-29537
- Residence times distribution in confined round swirling jet, considering mass conservation of hypothetical tracer substance in combustion efficiency prediction
[WSCI PAPER 70-7] 13 p2522 A70-29609
- Magnetotail plasma sheet temporal variations during substorms and plasma pressure as related to dynamic pressure of solar wind from Vela satellites observation
13 p2480 A70-30061
- Solar wind parameters time variations influence on geomagnetic activity from measurements by electrostatic analyzers on Vela satellites
13 p2481 A70-30065
- Radial diffusion role in radiation belt dynamics from flux profiles time variations observations or equilibrium states analysis
13 p2484 A70-30094
- Fog droplet size growth time dependence and spectral variations during simulated cloud formation by water vapor condensation in chamber
14 p2601 A70-30128

Stefan-Boltzmann formula validity for flames and combustion products radiation affected by time dependence of emissivity coefficient, place and wavelength 14 p2662 A70-30179

Meteoroid radio reflections time variation based on observations at two frequencies, analyzing angular dimensions in reflecting regions 14 p2635 A70-30315

Meteor radio reflections time-amplitude characteristics, discussing dependence on mirror point position in trail, wavelength, diffusion factor and initial radius 14 p2636 A70-30324

Switching initiation in Ovonic, discussing temperature profile in semiconducting sandwiches as function of time and thermally forced double tunneling 14 p2626 A70-30333

GaAs junction lasers output oscillations, analyzing time dependent equations for low temperatures 14 p2593 A70-30335

Surface wind speed durations statistical analysis, discussing meteorological, orographic and physiographic features 14 p2607 A70-30582

Time dependent simultaneous solution for continuity, heat conduction and motion equations of system involving neutral, electron and ion gases 14 p2665 A70-30744

People as conservative processors of fallible information, treating stationary data generating process as nonstationary 14 p2537 A70-30898

Night airglow space and time variations from jet aircraft observations, measuring conjugate enhancements 14 p2580 A70-31266

Optimal control theory for system model dependence on state and control variables history 14 p2562 A70-31410

Thermoplastics fatigue strength, considering stress variations with time in constant strain tests 14 p2598 A70-31425

Temporal dependence of photoelectron multiplier output waveform and focusing under photocathode alternating modulation, noting thresholds for optical reception 15 p2696 A70-31505

Magnetospheric protons and electron energy spectra time and magnetic activity dependence during solar maximum 15 p2792 A70-31671

Ionospheric currents time-space distribution noting rocket data, induction mechanism and geophysical effects 15 p2730 A70-32087

Spherical shaped rotor unbalance effect on electrostatic gyroscope runout time, discussing energy dissipation 15 p2738 A70-32152

Inertial load-time effects in instrumented impact tests, showing corrections for bending stress and dynamic fracture toughness measurements 15 p2820 A70-32240

Wolf numbers Zurich time series monthly values, evaluating mathematical expectation with probability smoothing by Whittaker operator 15 p2802 A70-32489

Geomagnetic disturbances temporal behavior and spatial scales 15 p2732 A70-32543

Linear time varying low pass filters computer aided design, introducing quadratic performance criterion to calculate steepest descent in function space 15 p2710 A70-32588

System failure rate estimation as function of age using incomplete field reliability data 15 p2748 A70-32660

Spherical liquid drop deformation time dependence in unbound fluid at low Reynolds number, investigating effects of temperature, pressure, velocity and size 15 p2722 A70-32795

Ruby laser spatial and temporal characteristics improvement with bleachable dye filter, using local negative feedback 15 p2754 A70-32865

Human and animal adaptation and responses to time intervals and temporal activity cycles, discussing conditioned reflexes in terms of physiological factors 15 p2687 A70-32869

Classical and modern approaches to tracking problem, discussing optimal control in frequency domain and time domain terms 16 p2882 A70-33039

Fluid urethane laminating resin for bonding nylon and glass fabrics, giving physical properties as function of room temperature curing time 16 p2938 A70-33381

Time ordered system for air traffic control providing data link, collision avoidance and navigation data through single channel 16 p2948 A70-33476

Time frequency concept application to air traffic control and collision avoidance systems 16 p2948 A70-33477

Transonic flow in convergent and convergent-divergent conical nozzles with nonuniform inlet predicted by time dependent flow equations, discussing discharge and thrust coefficients 16 p2834 A70-33548 [AIAA PAPER 70-635]

Invariant imbedding application to solution of partial differential equations by continuous-space discrete-time /CSDT/ method, discussing time dependent heat diffusion 16 p2942 A70-33735

Elastoviscoplastic medium filled half space motion under pressure front moving along surface with time varying velocity, analyzing penetrating wave fronts form 16 p2990 A70-33780

Turbulence spectrum functions time variations, examining electron density fluctuations in ionized gas 16 p2894 A70-33886

Cosmic time varying gravitational constant effects on stellar age determination 16 p2978 A70-33966

Doppler shifted radiation production, using time and space dependent radiant energy sources 16 p2952 A70-34255

Ti alloys embrittlement, investigating time temperature dependence of brittle subsurface layer formation during elevated temperature air exposure 17 p3112 A70-34365

Time dependent solution for inviscid hypersonic flow of chemically reacting gas mixture about blunt bodies 17 p3009 A70-34502 [AIAA PAPER 70-771]

Systems subject to failure and repair cycles, describing performance and reliability by stochastic processes in terms of excess time 17 p3099 A70-34580

Crab Nebula pulsar NP 0532, describing quasiperiodic oscillation in arrival times of radio pulses 17 p3157 A70-34842

Pulsars as cosmic ray sources, emphasizing time properties of acceleration mechanisms 17 p3151 A70-34913

Time span in total electron content /TEC/ measurements on BE-B and BE-C ionospheric satellites by differential Doppler method, applying chi sub O super 2 test 17 p3077 A70-34986

Time dependent characteristics of dense argon plasma formed by pulsed lasers, measuring shock wave front velocity with streak camera 17 p3104 A70-35083

Shakedown theory of elastic-plastic structures under time dependent loadings 17 p3188 A70-35191

Iterative algorithm for free terminal time control in trajectory optimization 17 p3168 A70-35290

Chamber solution of Boltzmann time dependent equation in relaxation time approximation 17 p3136 A70-35596

Harmonic oscillator with exponentially decreasing spring constant, obtaining closed form solution for equation of motion 17 p3137 A70-35602

Exposure duration effect on luminance requirements for hue perception and identification 17 p3040 A70-35724

Carbide precipitation and grain boundary migration in solution annealed duplex stainless steel as function of aging time 18 p3274 A70-36050

Regular and stochastic oscillations in plasma beam discharge produced by beam instability from observing time dependent variations in spectral line luminescence intensities 18 p3294 A70-36147

Reciprocity law between radiation intensity and exposure time for photographic films in vacuum UV spectrum region, investigating departure at various wavelengths 18 p3257 A70-36281

Two dimensional time dependent solution for impulsive motion of circular cylinder involving viscous cross flow at moderate angles of attack 18 p3207 A70-36454

Time dependence of laser rod focal length, measuring thermal lensing effects 18 p3270 A70-36756

Horizontal ionospheric drift over Northern Hemisphere during low solar activity, studying spatiotemporal distribution patterns of drift parameters 18 p3249 A70-36912

Magnetic field filtration into time-variable and constant parts, using signal to noise analogies 18 p3249 A70-36914

Time and altitude dependences between 340-1000 km of delta parameter for height scale ratio of neutral and electron-ion gases, discussing diffusion coefficient 18 p3254 A70-37030

Power and exponential time dependences of long term creep strength for wide stress range, assuming linear heat resistance 19 p3449 A70-37340

Auroral substorm temporal relationship to particle kinetic energy increases within trapping region, observing geomagnetic field distortions at higher latitudes during disturbed epochs 19 p3411 A70-37494

Proton spectra and time history in interplanetary space during solar flare by satellite observation, investigating particle flux by shock waves 19 p3495 A70-37503

Time transient and step-jump dynamic analyses of gas lubricated bearing, illustrating hybrid journal and Rayleigh-Step thrust bearings 19 p3436 A70-37619 [ASME PAPER 69-WA/LUB-5]

Linear time varying systems optimal control through decoupling of boundary value problems 19 p3393 A70-37866

Rossby wave critical level time dependent behavior on latitudinally varying flow 19 p3414 A70-38259

Heat transfer in boiling liquid from temperature field and temporal changes in liquid above heating surface, determining isotherms by laser interferometry 19 p3447 A70-38455

Light alloys cold hardening effect and fatigue strength estimation, considering residual stress variability with time 19 p3548 A70-38457

Multi-aircraft flight test program time compression by management techniques, discussing program length and costs 19 p3355 A70-38530

Sound level vs duration evaluated for noise exposure using different exchange rates 20 p3578 A70-39125 [ASA PAPER FF2]

High energy radiation belt proton flux time dependence at low altitudes, examining atmospheric density influence 20 p3620 A70-39340

Butterfly diagram showing time dependent distribution of sunspots across heliographic latitudes 20 p3704 A70-39473

Geometrical figure fragmentation produced by intermittent illumination, examining dependence on presentation frequency and temporal factors 20 p3580 A70-39491

Cost and time optimization for complex aircraft development projects via network planning 20 p3740 A70-39644

Convergent-divergent nonequilibrium nozzle flow numerical solution by time dependent technique, investigating rapid vibrational nonequilibrium supersonic expansion of gas mixture with population inversion 20 p3609 A70-39655

Temporal and spectra combination effects on aircraft sound judged noisiness, using human subjects in anechoic chamber 20 p3580 A70-39712

Invariance conditions for control systems with time varying parameters 20 p3602 A70-39827

Fatigue phenomena based on solid body model, establishing breaking stress dependence on time or load cycles number 20 p3724 A70-39854

Cosmic hard X ray sources spectra and time variations by balloons and OSO-3 satellite observations of Crab Nebula 21 p3872 A70-40657

Thermo-electret surface charge and dielectric constant time variation measurements, considering hole-electron pairs production hypothesis 21 p3797 A70-40890

Universal time control of south polar F layer during IGY attributed to low energy electron precipitation, comparing IGY and recent satellite data 21 p3818 A70-41101

Time dependent adhesion in ultrahigh vacuum of Apollo 11 lunar soil sample 10065-33, considering microchemical and microphysical properties 21 p3915 A70-41658

Time average holographic interferometry of circular plate vibrating simultaneously in rationally related modes 21 p3829 A70-41927

Excited state complexes laser action in coumarin dyes indicated from stimulated fluorescence time dependence 22 p4048 A70-42328

Random ergodic process extremal behavior, determining mean time to reach maximum or minimum for first time 22 p3985 A70-42400

Dynamical linear thermoelasticity theorem generalization with time dependent conductivities, elasticities and density 22 p4112 A70-42483

Time dependent shock wave structure, considering shock tube flow as initial and boundary value problem 22 p4009 A70-42516

Air-earth current density time variation in stratosphere by high altitude balloon, comparing with potential gradient diurnal variation over ocean 22 p4017 A70-42798

Heart rate-time curves before, during and after step-up exercise in relation to physical fitness

22 p3978 A70-42873

Output coordinates probability distribution density of nonlinear automatic control systems at fixed time, using multiple integrals

22 p4003 A70-42888

Glass-epoxy composites, measuring embedding filaments effect on time-temperature relationship under ultimate stress conditions

22 p4118 A70-43549

Laminated composites time dependent static strength and reliability under uniaxial tension

22 p4119 A70-43678

Polarization of short period oscillations Pc2-Pc4 dependence on time of day, oscillation type and geoelectromagnetic field activity

23 p4190 A70-44086

Time dependent visual perception probability under prolonged testing at eccentricities, using observer exposed to flashed stimulus with dark-adapted retina

23 p4147 A70-44782

Optimal timing for aerial photographic mapping of landscape types including tundra, forest, steppe, meadow, desert and mountain areas

24 p4328 A70-45196

Amplification factor time dependence of dye lasing under rectangular pumping pulse, noting threshold conditions and burnout time relation to material parameters and resonator

24 p4352 A70-45473

Time dependent inviscid transonic flow past two dimensional and axisymmetric bodies, presenting numerical procedures including imbedded shock waves as discontinuities

[AIAA PAPER 70-1322] 24 p4288 A70-45943

Elastic-viscoplastic bar quasi-static torsion problem, using approximate method for time dependent torsion function

24 p4425 A70-45993

Time evolution of instantaneous light intensity mean and variance for Q switched single mode laser near oscillation threshold

24 p4355 A70-46090

Pulsars radio evolution mechanism by phenomenological analysis, deriving time dependences of period, luminosity and emitting region size

24 p4412 A70-46101

Modified time-domain reflectometer method for waveguide system evaluation, detecting and displaying radar echoes as function of time

24 p4315 A70-46234

TIME DISCRIMINATION

Time sense in human subjects kept in caisson or cave isolation determined as function of upper brain stem paraconsciousness

01 p0041 A70-11474

Book on sense of time covering psychological and physiological aspects and electrophysiological experimental results in man

05 p0800 A70-16129

Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on limer of temporal ordering of sensory events in haptic space

13 p2354 A70-29596

Optimal temporal and spatial-temporal resolution for unknown parameter of interfering signal on white noise background

17 p3048 A70-35680

TIME DIVISION MULTIPLEXING

PCM time division satellite multiple access communication system to increase time slot utility, considering individual earth station control and common signaling circuit features

06 p1011 A70-18409

Acquisition system design and experimental results for time division multiple access satellite communication system

06 p1011 A70-18410

Clock synchronization system design and test results for PCM time division multiple access satellite communication system

06 p1011 A70-18411

Multiple access channel control system operating in variable destination multiple access mode for application in PCM-TDMA satellite communication system

06 p1011 A70-18412

PCM-TDMA satellite communication system for maximum time slot utility without guard time slots

10 p1834 A70-24330

TDMA system burst synchronizer with periodic channel slots reallocation feature

10 p1835 A70-24331

Multichannel PCM/TDMA INTELSAT network with time preassignment and time assignment speech interpolation features for field test

10 p1835 A70-24332

Carrier recovery circuits synchronization for PSK demodulators used in TDMA satellite communication

10 p1835 A70-24338

Equipment design for burst synchronization control in TDMA experiment system

10 p1836 A70-24339

Independent burst and burst coherent TDMA methods compared for ground station-satellite communication

10 p1836 A70-24340

Demand assignment techniques applicability to TDMA satellite communication systems, discussing operational modes and optimum mode selection

10 p1837 A70-24351

PCM-TDMA satellite communication systems operation modes and applicability, considering efficient circuit utility, equipment cost and control complexity

10 p1837 A70-24352

Time division multiple access /TDMA/ system for Symphonie communication satellite using PCM phase shift keyed RF carrier

10 p1837 A70-24353

Integrated TDMA switching/transmission system implementation into existing network

10 p1837 A70-24354

FDMA and TDMA systems for demand assignment of satellite circuits noting PCM/TDM operation trends in satellite and ground communications

10 p1838 A70-24355

Adaptive multiple access satellite communication system at millimeter wavelengths in time- and frequency-division modes, compensating rainfall attenuation

10 p1838 A70-24358

TDMA demand-assigned satellite communication system developed for INTELSAT, discussing PCM, voice signals and channels, etc

10 p1839 A70-24362

Intermeshed TDMA systems efficiency in interconnecting ground stations in communications satellite systems, discussing rigid and variable burst lengths

10 p1839 A70-24363

TDMA system control, considering access process control and switching process control, discussing burst transmission phase control and channel selection at receiving end

10 p1839 A70-24366

Bit clock synchronous system for communications satellites TDMA

10 p1839 A70-24368

Time allocation with sampling interpolation /ATIC/ for TDMA satellite telephone communications, considering auxiliary circuits, transmission quality, bit rates, demand assignment, etc

10 p1840 A70-24370

TDMA communication satellite system compared favorably with FDMA or CDMA systems in efficiency, flexibility and feasibility for commercial and military uses

10 p1842 A70-24884

TDMA applicability to military satellites, describing synchronization process

12 p2187 A70-27916

Injection lasers as logic elements in optical communication systems with time division multiplexing, examining optimal switching and pulse duration reduction

13 p2428 A70-29406

Differential time division multiplexing system, discussing errors due to imperfections of field effect transistor as multiplexer switch

19 p3388 A70-37906

TIME FUNCTIONS

Stationary Gaussian stochastic processes sample functions properties and local times

02 p0324 A70-12504

Positive time-periodic solutions to parabolic problems with Stefan-Boltzmann boundary conditions using straight lines method

07 p1333 A70-18748

Distributional results pertaining to complex Wishart processes and time varying spectral estimators on null hypothesis of stationary Gaussian time series

07 p1323 A70-19028

Random process noncommutative transformations and correlation functions in linear form of time functions

09 p1655 A70-23695

Time-convergent approximations to statistical turbulence functions constructed starting with functions expansion as Taylor series in time

11 p2074 A70-26534

Maximum impact force and central deflection time function of transversely struck beam, assuming no reflected elastic wave effects on stresses

12 p2325 A70-27619

Computerized Monte Carlo prediction of maintenance time distribution of complex system, concerning man hours, elapsed time and schedule meeting

13 p2524 A70-29566

Electron camera with two stage image intensifier control electrode tube for rapidly evolving and slightly luminous phenomena, discussing exposure times

14 p2590 A70-31406

Forcing time functions prediction for structures under shock tube test, relating aerodynamic parameters to mechanics terminology

17 p3060 A70-35180

Time correlation functions approach to calculation of properties of nonequilibrium ensembles in fluid molecular motions

17 p3197 A70-35535

Transient system decay characteristics, discussing equilibrium point damping time for asymptotically stable systems of ordinary differential equations

19 p3542 A70-38066

Sequential Bayes procedure for demonstrating mean time to failure beyond minimum acceptable value

20 p3658 A70-39642

Be star rotation dynamics phenomenon, discussing time variations on main sequence scale

23 p4252 A70-44828

TIME LAG

Upper atmosphere temperature lag behind solar decimeter flux 27 day variation maximum attributed to varying solar EUV heating

01 p0070 A70-10404

Delay times elimination in pulse operated X band Gunn effect oscillators, using RF power injection

01 p0050 A70-10463

Analog time delay device for returning respiratory flow signal to correct time

01 p0035 A70-10654

Computer applications in French missile testing center, describing real and delayed time equipment and computations

01 p0057 A70-10798

Autonomous functional differential equations with finite time lag using Liapunov functionals, discussing stability and instability

01 p0132 A70-11070

Pc 1 range geomagnetic pulsation sweepers /MHD waves/ event in evening sector, considering delay time between sweepers appearance and polar magnetic substorms onset

02 p0290 A70-12121

Time lag of commencement of PCA effect behind occurrence of Y-shaped phase of solar flares, tabulating data for several flares and particle effects

02 p0358 A70-12373

Correlations between organizational factors and individual engineer performance, analyzing stability of relationships and time lags in measurement

02 p0246 A70-12378

Propagation velocity relation with time delay in human visual system, using various sets of line stimuli having different spatial distance

02 p0237 A70-12457

Envelope delay and amplitude characteristics measurement of modulated carrier wave channel in radio relay link

02 p0258 A70-12475

Total electron content /TEC/, time delay and polarization errors on one way path through ionosphere, discussing measurements and predictions

02 p0293 A70-12568

Soviet book on oscillations of quasi-linear time lag systems, emphasizing asymptotic methods in nonlinear oscillation theory

02 p0340 A70-12826

Flexible lifting vehicles longitudinal stability with tandem lifting surfaces, studying aerodynamic time delay effects by root locus technique

03 p0408 A70-13802

Group delay characteristics of C band nondegenerative parametric amplifier determined by Nyquist method and compared to phase frequency derivative measurement

03 p0458 A70-14037

Resonance oscillations onset by initial conditions in dynamic system described by hyperbolic equation containing independent time lag variable

04 p0718 A70-14485

Electron radiation-induced second breakdown in transistors indicated by time delay and failure by collector-to-emitter short

04 p0657 A70-14734

Delay characteristics of narrow band double bridge amplifier used as inertial component of photoelectric star transit recorder

04 p0693 A70-15489

Time delay between ocular movement and retinal input by yoking visual target to eye movement using real time computer systems

05 p0805 A70-16094

Delay in photoelectric recording of transit of stars, considering stellar image brightness distribution and temperature

05 p0918 A70-16920

Microwave frequency radar terrain echoes simulation concerning variation of echo delay, Doppler shift, random fine structure and time variation

06 p1008 A70-17482

Liapunov functionals for time delay systems generated by path integrals in state space in terms of convolution equations

06 p1094 A70-17953

Surface thermal factors influencing ignition delay time of composite solid propellants, using double wavelength optical detector

06 p1128 A70-18043

Differential game with opponent receiving information on phase coordinates of adversary with delay caused by reception and processing procedures
07 p1244 A70-18718

Fatal ejections in USN, suggesting initiation delay as prime causal factor
07 p1191 A70-19006

Advanced concept ejection seat /ACES/ system design and performance, considering gyro-controlled vernier rocket motor and electronic time delays
07 p1192 A70-19016

Optimal control systems design involving time delays as functions of time and system state, considering stability constraints
08 p1478 A70-20779

Optimal feedback control synthesis for linear system with time delay through error criterion minimization
08 p1478 A70-20780

Pulsed radio signals time delay due to molecular microwave resonance in earth atmosphere and interstellar medium
08 p1461 A70-20915

Delayed trace reaction under stable and unstable pauses in apes and monkeys, noting independence of conditioned reflex
08 p1446 A70-21446

Extension of Liapunov systems to time lag systems with small periodic parameter
08 p1546 A70-21628

Nonlinearity of human eye movement control system in two dimensional tracking tasks, explaining visual axis lags as time delays dependent on target motion
08 p1447 A70-21724

Time delay between pulses of discharge current and ionized argon laser power as function of current and discharge pressure
09 p1697 A70-22847

Tape recorder performance characteristics relevant to signal types handled, considering phase response and envelope delay
09 p1679 A70-22975

Elasticity stratification stabilization effect on two layer flows down inclined plane found dependent on time response difference between layers
10 p1863 A70-24009

Synchronous satellite communication system clock synchronization loop design taking into account delay time
10 p1835 A70-24335

Auditory and visual warning signals effects as reaction stimulus in time-uncertainty situation
10 p1826 A70-24719

Visual stimuli intensity influence on delay in reaction to second of pair of visual stimuli
10 p1818 A70-24721

Optimal feedback control obtained for linear time-varying system with time delay, developing numerical method for solving performance differential equations
10 p1856 A70-25235

Group delay time differences of spectral groups of VLF atmospherics respecting day and night variation for thunderstorms, determining distance dependence
10 p1884 A70-25260

Maximum principle condition of optimal control of monodimensional system described by nonlinear hyperbolic equations with time delay
11 p2021 A70-25340

Digital control program parameters synthesis to realize time optimality with pure delay for ensuring absence of auto-oscillations under steady conditions
11 p2022 A70-25577

Elastic system stability with two degrees of freedom under action of retarded follower forces
11 p2142 A70-26631

Transistorized differed synchronizer for delaying photoflash initiation in scientific photography
12 p2228 A70-26879

Transmission delay and echo effects in long distance satellite relay telephony links, describing echo suppression and speech quality
12 p2183 A70-27004

Human blinking reflex recorded by electromyography, studying latent period in response to stimulation by air stream
12 p2168 A70-27346

Visual feedback delay effects on steering and tracking performance
12 p2179 A70-28147

Delayed ionization effects in midlatitude nighttime ionosphere after geomagnetic storms, noting time lag vertical distribution
12 p2227 A70-28365

Soviet book on theory of oscillations of linear and nonlinear time lag systems
13 p2450 A70-28699

Periodic solutions to linear differential equations with delay, applying numerical-analytical procedure
13 p2441 A70-29315

Delayed moment of force relativistic definition within reference of inertia, discussing lever bent at right angles
13 p2452 A70-29635

Ignition delay-reducing catalyst for furfuryl alcohol-red fuming nitric acid hypergolic bipropellant
13 p2473 A70-29992

Auroral absorption bays meridional motion, observing absorption onset systematic lag at various ground stations
14 p2570 A70-30216

Nonlinear sampled data system transportation lag effect on limit cycle nature
14 p2560 A70-30623

Temporal wave echoes and Landau damping in collisionless plasma using signal averaging and time delay techniques
14 p2622 A70-30687

Time lag system performance index bounds determination and optimal feedback controller design based on min-max criteria
14 p2561 A70-31185

Earth/moon mass ratio and Mars mass and ephemeris from Mariners range and Doppler tracking data, noting relativistic time delay measurement possibility
15 p2798 A70-31652

Nonlinear higher order canonical time lag equations initial and boundary value problems solutions by approximate iterative two way integration
15 p2767 A70-32171

Vector valued Gaussian random processes with Gaussian measurement noise, estimating phase and time delay parameters by maximum likelihood theory
15 p2704 A70-32593

Earth-satellite range measurements using broadband pseudonoise modulation and delay lock tracking method
15 p2705 A70-32724

Earth to planet radar signal time delay in general relativity expressed in relativistic spherical polar coordinates of earth and planet
15 p2806 A70-32801

Pontryagin stability criterion interpretation for systems with time delay in parameter plane, using computer oriented method
16 p2882 A70-33046

Univibrator analysis with glow discharge thyatrons, increasing time lag for equal R and C values
16 p2873 A70-33237

Feedback delay effects on eye-hand synchronism in stimulus tracking and steering using self generated body movements
16 p2852 A70-33662

Neutral type differential equations transformation to time lag system making periodic vibrations existence and stability theorems applicable
16 p2944 A70-34282

High powered high speed helicopters autorotation entry characteristics, noting capability of meeting control time delay requirement
17 p3014 A70-34715

Wave propagation measurement by correlation techniques, discussing travelling wave representation, delay times, amplitude coefficients, etc
17 p3091 A70-35449

Pilot induced oscillation rating regression analysis, examining time delay, slope after and time to first peak and stick force per g
18 p3213 A70-36444

Computerized Pontryagin stability analysis of nonlinear multiple delay systems
18 p3235 A70-36477

Pontryagin stability for distributed delay or parameter systems, using Brin criterion
18 p3235 A70-36478

Graphical stability for linear systems in parameter plane with time delay
18 p3235 A70-36479

Linear control systems stability range with delay time examined by digital computer, discussing critical loop gain
18 p3235 A70-36501

Implementation delay error reduction in discrete Kalman filter, noting application to inertial navigation systems analysis
18 p3236 A70-36712

Delay time between beams reflected from different parts of meteor trail, using phase invariant and frequency scanning methods
19 p3512 A70-37313

Group delay times criterion of multibeam propagation of ionospheric radio echoes for communications systems
19 p3375 A70-37332

Human response time to visual stimulus preceding or following auditory stimulus as function of interstimulus interval
19 p3362 A70-38311

Navigation errors and time delays in prediction techniques for air traffic control
19 p3468 A70-38642

Optimal control of processes with lags, including linear analytical regulator problem
19 p3395 A70-38718

Pulsed diodes subnanosecond rise time estimation, considering charge carrier lifetime, junction barrier capacitance, signal frequency, etc
20 p3595 A70-38968

Lasing transitions time delay in carbon monoxide laser under pulsed electrical excitation, attributing inversion to anharmonic decoupling
22 p4048 A70-42330

Photon flow delay regarding fluctuating source field in two points, applying correlation statistics by Pearson method of moments
22 p3988 A70-42564

Transmission factors of microwave filters with prescribed attenuation and group delay
22 p3997 A70-43173

Discrete systems with and without time lags, deriving necessary conditions for singular optimal control
23 p4176 A70-44301

Thermal-acoustic oscillations in forced convection, giving time delay analog for perturbation feedback
23 p4280 A70-44369

Signal arrival time variance in optical communication system with high lag photodetectors, examining input, detection and amplification noise
23 p4196 A70-44410

Auroral absorption bays meridional motion, observing absorption onset systematic lag at various ground stations
24 p4331 A70-46291

TIME LAPSE PHOTOGRAPHY U. CHRONOPHOTOGRAPHY TIME MEASUREMENT NT. CLOCK PARADOX

Rotation period of Jupiter based on decametric component of radio emission, suggesting anticorrelation with sunspot number for drift observed
01 p0173 A70-10044

Visual detection discrepancies of temporal order suggested due to definition of interstimulus interval
01 p0039 A70-11165

Solar and lunar disks instant of contact during solar eclipse determined by chord measurements, comparing three methods for successive time intervals
01 p0191 A70-11473

Analog and digital electronically counting chronometers for extremely short times measurements
02 p0295 A70-11868

Mean signal response time relationship to nonaging foreperiod
02 p0239 A70-12627

Multiple timing in elementary space triangulation using synchronous straight line as main net element
03 p0445 A70-13192

Synchronization of ground stations clocks by time scale comparison with overflying aircraft
[ONERA-TP-759]
03 p0487 A70-13642

Time determination and georotation - Conference, Riga, Latvian SSR, June 1965
04 p0755 A70-15476

Statistical analysis for personal variations contribution to total mean square error in time determinations
05 p0914 A70-16649

Duration measurements for sampling function in dynamic crossed field photomultiplier
05 p0849 A70-16655

Monograph on time measurements covering time scales, intervals, natural and artificial clocks, frequency standards, time and time signal transmission
07 p1283 A70-19664

Nitrogen molecules pulsed high energy beams transit time measurement by gated time of flight procedure and by multichannel analyzer
07 p1345 A70-20136

Pulsars pulse arrival time measured using cesium clock during weekly observations
08 p1570 A70-20899

Clock corrections smoothing by linear transformation operator, calculating operator transfer function and averaged errors deviations
08 p1574 A70-21155

Time determination precision dependence on thermal deformations of clock, humidity of atmosphere and most probable value of instrument azimuth
09 p1673 A70-22163

Spin-lattice NMR and EPR relaxation time measurements, using train signals and free induction decays
09 p1679 A70-22995

Information processing stages by reaction time measurements permitting discovery, property assessment and separate testing of stage durations additivity and stochastic independence
10 p1826 A70-24723

Gerstenkorn moon capture theory taking into account tidal evolution of earth-moon system, discussing marine organisms time rate synopsis for earth rotation retardation
10 p1943 A70-24840

Shock-heated noble gases total ionization times, considering recombination and atom-atom and atom-electron collisions
12 p2274 A70-26856

Aircraft and ship navigation using precision time measurement signals transmitted between vehicles and earth satellites

13 p2448 A70-28748

Metal powder mixtures homogenization time calculation, using Fick equation and matrix model

13 p2433 A70-28845

Atom excited state mean lifetime measurement, using correlated cascade photons method

14 p2620 A70-31378

Strain gage maximum rise time estimation for longitudinally sweeping strain pulse, reducing gage length/pulse velocity ratio effects [SESA PAPER 1620]

15 p2739 A70-32302

Time-frequency national airspace system, using distributed sensors and closed loop control to meet safety and traffic handling requirements

16 p2948 A70-33478

S and SKS travel times for arc distances of 30-126 degrees

16 p2898 A70-33975

Frequency and time information transmission, discussing frequency and time measurement equipment at Czechoslovak facility

18 p3257 A70-36199

Geometric relations for contact moments of solar eclipse, using crescent cord photographic measurements

18 p3315 A70-36610

Circadian oscillations and photoperiodic time measurement in *Pectinophora gossypiella*

18 p3221 A70-36893

Time of acceleration to rated speed for three-phase asynchronous gyroengine rotor

19 p3420 A70-37259

Pulsed diodes subnanosecond rise time estimation, considering charge carrier lifetime, junction barrier capacitance, signal frequency, etc

20 p3595 A70-38968

Impact times measurement by photography, correlating projectile velocity with projectile-target distance

20 p3635 A70-40530

Paleomagnetic reversal in 1350 year increments, measuring declination of deep sea sediment cores

21 p3820 A70-41885

Airborne computerized time frequency systems for aircraft range and velocity determination, using stable clocks with ambiguity resolution

22 p4067 A70-42659

Crab Nebula pulsar NP 0532 optical timing, measuring frequency, arrival times and pulse interval

22 p4102 A70-42936

Multichronometer for multiple time intervals measurement with picosecond resolution, using mixed analog and digital methods [SMPE PREPRINT 112]

22 p4031 A70-43029

Corrected geomagnetic midnight local time calculations, using nomogram

23 p4187 A70-43862

TIME MEASURING INSTRUMENTS

NT ATOMIC CLOCKS

NT CHRONOMETERS

NT CLOCKS

NT TIMING DEVICES

Earth rotation seasonal fluctuations analyzed from astronomical observations using frequency markers and quartz clocks

04 p0681 A70-15478

Time measurement errors from astronomical observations resulting from thermal and refractive effects on instrument

04 p0756 A70-15482

Time determination at astronomical observatories using transit instrument observations concerning stellar distributions and magnitudes

04 p0756 A70-15486

Pulse counting frequency divider with discrete phasing device for use with quartz clock and electron beam chronoscope

04 p0694 A70-15492

Monograph on time measurements covering time scales, intervals, natural and artificial clocks, frequency standards, time and time signal transmission

07 p1283 A70-19664

Electronic time interval meter combining pulse count with phase shift for automatic measurement and processing

15 p2733 A70-31579

High resolution electronic time intervalometer using digital counting and analog time expansion circuits

23 p4196 A70-44383

TIME OF FLIGHT SPECTROMETERS

Time of flight spectroscopic measurements in arc heated supersonic molecular beam using algebraic relations, sensing modulated beam by Orbitron type detector

06 p1111 A70-18266

Gaseous pyrolysis products detection and identification during eruption from polymeric surfaces subjected to flash heating by time of flight mass spectrometer

07 p1319 A70-19887

Energy-mass analysis for steady state plasma by electrostatic analyzer and time of flight mass spectrometer, determining ion species temperature and density ratios

24 p4387 A70-45813

TIME OPTIMAL CONTROL

Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit

01 p0139 A70-11479

Minimum time turns for spacecraft about fixed axis lying beyond plane of vehicle forces

01 p0197 A70-11480

Triple mode control strategy to provide near optimal stable transient response in variably loaded electrohydraulic servomechanisms

02 p0272 A70-12728

Optimal use of adaptive renewal capability determined for first order time varying linear systems with quadratic performance index by exponential model of component failure

02 p0273 A70-12729

Algorithm for fixed time minimum energy discrete optimal control problems of linear plants with convex constraints imposed on terminal state

02 p0273 A70-12731

Algorithm for optimal controls maximizing probability of linear time dependent control processes entering target manifold under random disturbances

03 p0460 A70-13580

Time optimal attitude control for alignment of spin stabilized sounding rocket, discussing feedback control system

03 p0580 A70-13805

Time optimal control of system variable with bounded controlling input and arbitrary disturbances, deriving necessary conditions using maximum principle [ASME PAPER 69-WA/AUT-7]

04 p0661 A70-14827

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle

04 p0661 A70-15011

Reliability optimization of information systems with discrete time resource output and measured efficiency control

04 p0661 A70-15195

Optimal damping time required for gyrocompass oscillations, allowing for maximum initial deflections

04 p0692 A70-15280

Minimum time frequency transitions in phase locked loops with phase and frequency controls using Pontryagin principle, obtaining switchless control strategies

04 p0652 A70-15339

Linear regulator optimal for exponentially time-weighted quadratic performance indices, using cost equivalence concept in infinite terminal time solution

04 p0663 A70-15604

Time optimal control of nonlinear systems with distributed parameters, proposing approximate algorithm

06 p1024 A70-17814

Optimal timing of measurements to minimize dispersion of navigational observation parameters by least squares method applied to Keplerian orbit elements

06 p1103 A70-17878

Suboptimal closed-loop controller design based on quadratic equivalence for linear time varying process with minimum probability of inequality constraints violation

06 p1024 A70-17951

Optimal feedback controls design for linear systems relative to time-multiplied performance indices

06 p1025 A70-17960

Open and closed loop time optimal systems compared with respect to sensitivity measure represented by terminal error norm

06 p1026 A70-17969

Monograph on functional analysis and time optimal control as application of mathematics

07 p1322 A70-18857

Linear and quadratic programming techniques for large scale continuous time optimal control problems with accurate switching times

07 p1325 A70-19268

Primal-dual algorithm for optimal control with fixed or free terminal time

07 p1238 A70-19269

Time optimal rendezvous maneuver between neighboring elliptic orbits, discussing propulsive jet system with variable thrust

07 p1381 A70-19357

Time-variable constrained control matrix optimization using Pontryagin principle applied to minimal time transfer, payoff and rotation maximization

07 p1247 A70-20024

Time optimal control for rotation of solid supporting body with aid of pendulum, obtaining motion equations by algorithm

07 p1337 A70-20299

Time optimal control synthesis for electromechanical devices, considering acoustical vibrations elimination in magnetically controlled contacts

08 p1472 A70-21001

Variable time optimal control problem computational algorithm using only zero Hamiltonian condition, noting variable time local maximum as well as local minimum

08 p1534 A70-21459

Optimal control with time delays in system model described by constant coefficient linear differential-difference equations

09 p1653 A70-22346

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar

09 p1759 A70-22760

Minimum time interstellar trajectories for thrust limited rockets by applying Pontryagin maximum principle to relativistic rocket equations of motion

09 p1760 A70-22933

Algorithm for propellant flow rate increase of nuclear rocket in minimum time without exceeding maximum allowable stress in reactor core

10 p1914 A70-24870

Saddle point existence in determinate integrodifferential games with variable delay, assuming given control function over time interval

10 p1911 A70-25183

Iterative algorithms for numerical solution for time optimal control problems

10 p1856 A70-25232

Optimal feedback control obtained for linear time-varying system with time delay, developing numerical method for solving performance differential equations

10 p1856 A70-25235

Linear steady and unsteady systems time optimal control switching points determination by introducing parameterization to reduce number of transcendental equations

11 p2021 A70-25339

Digital control program parameters synthesis to realize time optimality with pure delay for ensuring absence of auto-oscillations under steady conditions

11 p2022 A70-25577

Optimal operational control of aircraft takeoff and landing times using stochastic programming

11 p2077 A70-25608

Minimum fuel control for discrete time Gaussian processes, applying results to spacecraft midcourse guidance for earth-Mars mission

11 p2079 A70-25958

Time optimal control for nonlinear second order system containing positive parameter and measurable control function

11 p2028 A70-26308

Continuous and discrete minimum time problems relationships and state space portraits during application of optimal strategies to system

11 p2029 A70-26749

Time optimal control synthesis of fast acting gyrocompass mounted on fixed foundation and with hydraulic damper and torsional suspension of sensor

12 p2233 A70-27564

Iterative algorithm for synthesis of discrete minimum time and amplitude controls for linear systems, noting guaranteed convergence

12 p2204 A70-27667

Linear time dependent stochastic optimal control with nonquadratic performance indices using function space approach

12 p2204 A70-27668

Nonlinear discrete time sampled systems optimal control by dynamic programming, with application to stochastic systems

12 p2204 A70-28068

Minimum-time thrust vector control law in Apollo lunar module computerized autopilot

13 p2499 A70-28399

Minimum time control for placing circular orbit satellite in gravitationally stable position

13 p2502 A70-28440

Book on differential dynamic programming covering algorithms for continuous time control, bang-bang, discrete time and stochastic systems

14 p2560 A70-30631

Recoverability for amplitude and rate bounded optimal control of linear time varying systems

14 p2562 A70-31203

Automatic optimal discrete time control for linear distributed parameter systems with quadratic cost function

14 p2562 A70-31412

Free solid body time optimal rotation about fixed central axis under action of external control moment vector, assuming zero initial and terminal angular velocity

15 p2775 A70-32447

Discrete approximation of differential game of navigation, considering control of object transfer to given set by finite time

15 p2775 A70-32472

Minimal time closed loop controller design for linear systems with bounded control amplitudes and rates using approximate functional expression

16 p2880 A70-32984

Time optimal control for linear distributed parameter system using functional analysis with method of deepest descent

16 p2882 A70-33122

Linear sequential Kalman filter for time correlated noise without state augmenting and measurement differencing demanding less computer sizing

16 p2887 A70-33350

Iterative algorithm for free terminal time control in trajectory optimization

17 p3168 A70-35290

Linear time invariant plant driven by scalar control, deriving second variation algorithm for minimum fuel problems

17 p3057 A70-35555

Self adaptation algorithm of optimally fast acting system for variable parameter plant control

18 p3234 A70-36120

Iterative determination of time optimal controls, considering dynamic system transition from initial to quiescent state with constraints on control vector

18 p3282 A70-36355

Quasi-optimal feedback control method for minimum time intercept of target in central force field

19 p3393 A70-37865

ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft

19 p3466 A70-38239

Optimal control time for second order nonlinear system with motion subject to specified conditions, determining switching line points

19 p3460 A70-38939

Large earth orbiting spacecraft minimum time attitude maneuvers with control moment gyroscopes, discussing torque calculation and gimbal angle rates

20 p3670 A70-40284

Dual mode suboptimum minimum time control of high order systems with negative roots and step displacement inputs, using simplified computer switching

21 p3801 A70-40756

Differential dynamic programming algorithm for discrete time orbit transfer optimization

21 p3919 A70-41737

Nonlinear automatic optimal control for discrete system with delay

22 p4005 A70-43563

Linear systems with phase coordinates bounded by given time functions, obtaining optimal control by iterative solution involving Lagrange multipliers

23 p4177 A70-44302

Time optimal problems involving parabolic equations in heating of rod with piecewise continuous thermophysical characteristics and temperature distribution constraints, deriving iterative solution

23 p4277 A70-44306

Computerized algorithm facilitating automatic synthesis of time invariant linear compensation for highly complex multiloop control systems

[ALAA PAPER 69-941] 23 p4177 A70-44561

Minimum-time transfer trajectories between close planar orbits, using single stage thrust-limited rocket

23 p4244 A70-44624

Ion micropropulsion for geostationary satellites

time optimal attitude control

23 p4261 A70-44669

Optimal fixed-time impulsive transfer trajectories minimizing characteristic orbital velocity, determining sufficient conditions

23 p4255 A70-45015

Adaptive time optimum inertial satellite attitude control using air jet

23 p4265 A70-45048

TIME RESPONSE

Langmuir oscillations excited by electron beam in plasma during instability development investigated for temporal and spatial structure, using visualization

01 p0150 A70-10174

Rise time relationship with signal bandwidth for class of TEM mode microwave delay line filters

02 p0257 A70-12185

Biplanar photocell in various holders noting intrinsic properties, emphasizing rise time characteristics

04 p0695 A70-15572

Photocathode internal light scattering effect on photomultiplier time response

05 p0845 A70-15806

Laser pulse registration with pyroelectric detector, noting pyroelectric phenomenon inertia limiting effect on response time

05 p0858 A70-16250

Superconductor tubes experiment, observing flux jump initiation and propagation characteristics

09 p1738 A70-22293

Linear control systems design with restricted number of feedbacks based on optimization criteria concerning responses to initial disturbance

10 p1855 A70-24703

Human reactions to successive visual signals, studying response time in single and grouped reaction

10 p1826 A70-24720

Langmuir oscillations excited by electron beam in plasma during instability development, investigating temporal and spatial structure using visualization

10 p1925 A70-25019

Time response deviation correction in hybrid computer control systems with digital feedback elements containing quantized coefficients

11 p2029 A70-26334

Human controllers nonlinear time domain mathematical model for analyzing compensatory tracking task data

11 p1992 A70-26396

Evoked cerebellar potentials time characteristics during spinal cord stimulation in cats, investigating cerebellar intercentral connections effect

13 p2353 A70-29357

Strain gage maximum rise time estimation for longitudinally sweeping strain pulse, reducing gage length/pulse velocity ratio effects

[SESA PAPER 1620] 15 p2739 A70-32302

Tracking error correction time and proprioceptive reaction time, suggesting role of central mechanism without sensory feedback

17 p3036 A70-34606

Quantum electronic space vehicle, discussing time reversing motor or inverse /anti- atomic engine

17 p3148 A70-35213

Ion-polar molecule collision time history plots and computer movies, calculating capture cross sections for mass spectrometry

18 p3292 A70-36561

Laser pulse shaping using inducible absorption with Q switched time behavior controlled by nonlinearities within optical resonator

18 p3270 A70-36745

Inverse Laplace transform of network function with allowance for initial differential equation solution, determining circuit temporal characteristics

19 p3456 A70-37269

Component decision logical and temporal arrangement in visual search, defining target by several attribute value combination

19 p3362 A70-38314

Flight test and airborne data recovery and processing, discussing data format, recorder characteristics, ground equipment and time requirement

19 p3429 A70-38517

Flip-flops switching time reduction, using equivalent amplifier circuit with positive feedback

19 p3390 A70-38580

Digital filter synthesis, discussing transfer function determination based on prescriptions for frequency or time response properties

19 p3391 A70-38746

Nonlinear acoustic absorbers behavior analysis, discussing spectral and temporal computation methods

20 p3672 A70-39237

Cool flame isothermal theory with oscillatory features accounting for damping time evolution and thermic reaction nature

21 p3942 A70-40886

Time resolving X ray grating polychromator, discussing photoelectric attachment with surface barrier semiconductor detectors

[SMPTE PREPRINT 75] 22 p4037 A70-43069

Phase delay between thermospheric neutral temperature and neutral density, considering frequency dependent time response to solar heat input

23 p4187 A70-43858

Visual system recording neuron pulse potential spatial and temporal responses to sinusoidal stimuli

23 p4144 A70-43922

E region ion composition nighttime variations, examining nitrogen monoxide and O ion nonequilibrium concentrations by ionic-molecular reactions

23 p4189 A70-44074

Threshold distribution of time intervals between atmospheric contradicting Poisson law

23 p4190 A70-44082

TIME SERIES ANALYSIS

Cosmic ray time series periodicity using variance analysis allowing for intensity variations and meteorological factors

06 p1135 A70-17543

Adaptive linear estimator for stationary time series, evaluating asymptotic mean square error bound

17 p3128 A70-34852

Statistical analysis of short periodic time series in biological rhythms including cosinor, periodic regression, harmonic and synchronization analyses

19 p3365 A70-38412

Recursive differential equation for moments of time-to-cycle slip in first and second order phase lock loops

21 p3802 A70-41350

Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals

[ALAA PAPER 69-838] 23 p4197 A70-44557

TIME SHARING

Image quality effects on human performance in simulation, discussing time sharing strategies and task difficulty factors

01 p0036 A70-10809

Time sharing computer systems to perform circuit design and analysis, discussing effectiveness in terms of immediate access, accuracy and cost

02 p0265 A70-12187

Hardware-software integrated time sharing computer system for testing transmission control units and associated terminals on line

02 p0275 A70-12189

Feedback time sharing analog electronic multiplier for two quantities, noting linearity, accuracy and stability of measurements

02 p0268 A70-12422

Time sharing computer systems for data reduction from semiconductor strain gauges applied to FORTRAN IV programs

03 p0453 A70-12969

Special purpose computer organized as time-shared digital filter for real time applications with adaptable coefficients, programming and multiplexing scheme

05 p0818 A70-16415

Loops and paths in Mason signal flow graph of linear systems using algorithm with remote time shared digital computation

07 p1238 A70-18842

Time shared computer system providing real time service to multiple laboratory instrumentation, discussing high speed channel, computer control and data abstracting techniques

13 p2375 A70-29830

Dual raster high brightness-high resolution TV display using time sharing with conventional CRT

16 p2903 A70-33131

Automatic weight analysis by calculation and orientation of mass properties /COMP/ program, using remote terminal time sharing computer system

20 p3595 A70-40353

Computer time sharing system for real time mass properties measurements

20 p3595 A70-40374

Heat transfer and viscous flow pedagogy, discussing classroom use of remote time sharing computer terminals

23 p4166 A70-44642

TIME SIGNALS

Level quantization in time compression systems using storage devices with small dynamic range of recorded signals

15 p2733 A70-31578

Receiver for artificial satellite transmission and optical tracking time signals, using crossed dipole directional antenna

16 p2867 A70-34303

Multichannel time marker network synthesis device for physiological data assembly, transformation and processing, generating pulses

18 p3223 A70-36083

Low level time truncated signals measurement by narrow bandwidth synchronous time notch filters, discussing sensitivity

19 p3380 A70-38177

TIMERS

U TIMING DEVICES

U TIME MEASUREMENT

U TIME MEASUREMENT

U TIME MEASUREMENT

Electronic timing device for light balloon payloads, describing circuit

07 p1286 A70-19975

Step recovery frequency shift keyed retimer using Gunn effect FSK pulse regenerator for microwave communication

07 p1237 A70-20285

Swinging gear drive, breather cartridge and hypocycloid timer mechanisms for reliable aerospace applications

16 p2921 A70-34104

Spacecraft hydraulic timers design and qualifications testing, discussing oil selection and temperature dependence

16 p2914 A70-34112

Timing systems using Cs frequency standard for satellite tracking

21 p3828 A70-41697

Stable clock precision timing systems, discussing quartz crystal, rubidium, cesium and hydrogen oscillators

23 p4195 A70-44289

TIN

Al and Sn composites reinforced by E glass and silicon dioxide glass fibers compared for tensile strength, noting difference due to resistivity

03 p0514 A70-14314

Thermal radiation spectrum power of small spherical tin and lead particles

20 p3737 A70-39745

Superconducting Sn bolometer under isothermal and nonisothermal conditions, measuring noise spectra dependence on displacement current and resistance

22 p4026 A70-42397

TIN ALLOYS

Metallic superplasticity and superplastic alloys in simple tension, forming tubes and sheets of superplastic Sn-Pb eutectic alloy by pressure forming techniques

16 p2916 A70-32916

Nb-Sn superconductors multiphase structure with three intermetallic phase, constructing diagram based on phase stability and composition

18 p3299 A70-37221

TIN COMPOUNDS

NT TIN OXIDES
NT TIN TELLURIDES
TIN OXIDES

Stannic or cobalt oxide film coated glasses optical and energy characteristics determined for potential use in solar energy engineering

01 p0159 A70-10766

Tin oxide film resistors reliability test based on measurement of resistance nonlinearity by third harmonic voltage

09 p1689 A70-22005

Stannic oxide-chromium oxide catalyst effects on thermal decomposition and ignition of ammonium perchlorate /AP/, calculating activation energy

11 p2100 A70-26281

TIN TELLURIDES

SnTe of various nominal hole concentrations measured for longitudinal piezoresistance effect along different crystallographic directions

10 p1927 A70-23993

TIP DRIVEN ROTORS

Pressure jet helicopter with tipjet propelled rotor system, discussing power available calculation, mission performance, power management, etc

17 p3013 A70-34707

Helicopter engine rotor matching for tip propulsion efficiency, comparing with conventional shaft drive propulsion

[ASME PAPER 70-GT-68] 18 p3215 A70-36842

TIP SPEED

Helicopter rotors noise intensity prediction for high tip Mach number, including compressibility and thickness effects

17 p3015 A70-34729

TIP VORTICES

U TIP SPEED
U VORTICES

TIPS

NT BLADE TIPS
NT WING TIPS

NT AIRCRAFT TIRES

TIROS OPERATIONAL SATELLITE SYSTEM

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena analyzed for problems of general data gathering satellite system [ALAA PAPER 70-283] 09 p1766 A70-22874

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena, analyzing problems of general data gathering satellite system [ALAA PAPER 70-283] 21 p3931 A70-41868

TIROS PROJECT

TIROS weather satellite TV system providing observations to ground stations via ESSA satellites

14 p2654 A70-31148

TIROS SATELLITES

Global cloud cover and earth atmosphere heat budget measured from weather satellites, discussing Tiros pictures, radiation charts and albedo

03 p0479 A70-14348

TIROS, Nimbus, ESSA and ATS weather satellites configurations, onboard equipment and cloud photographs

09 p1765 A70-22227

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems

10 p1950 A70-24638

Fluid thermal actuator for temperature control of ITOS /Improved Tiros Operational System/ meteorological satellite, discussing design and performance

16 p2846 A70-34129

Tiros solar proton monitor program, describing detector design, operational data processing and early warning network

17 p3180 A70-35304

TISSUES [BIOLOGY]

NT ENDOTHELIUM
NT EPICARDIUM
NT EPITHELIUM
NT PERITONEUM

Tissue protein changes under visible and UV radiation noting denaturation, chemical bonds, protein configurations, clinical disease patterns, etc

01 p0022 A70-10856

Time course of end bulb material formation in vitro in rodent myelinated nerve fibers, confirming elastic capillary concept

02 p0233 A70-11725

Graft copolymerization and chemiluminescence analysis of lipids complexes in animal and plant tissue homogenates exposed to gamma radiation

03 p0419 A70-13305

Radiation protective action of aminoalkylthiols, aminoalkyl disulfides, isothioureas, thiazolidine etc, in mouse tissues, erythrocytes and yeast cells exposed to X ray doses

03 p0419 A70-13307

Coenzyme A and acetyl CoA in tissue extracts determined for concentrations by recycling CoA through coupled enzyme system

04 p0640 A70-15754

Equation describing atmospheric oxygen conductance to human tissues compared with experiments, ascribing discrepancies to inhomogeneity in diffusion/perfusion relationships

06 p0993 A70-17434

Acute hypoxia effect on mono-, di- and triphosphonitides metabolism and content in white rats cerebral tissues, using chromatographic analysis

07 p1199 A70-18721

Ionizing radiation effects on tissues of developing cerebellar cortex of rats

09 p1619 A70-22815

Physiology of oxygen transport in human organism and genesis of tissue hypoxia, discussing pulmonary functions, blood transport properties and tissue blood flow and diffusion

10 p1821 A70-25077

High altitude acclimatization effect on tissue capillary, investigating physiological evidence in rats by tissue diffusing capacity measurement

10 p1823 A70-25220

Dimensionless parameters associated with heat transport within living tissues using biothermal model

11 p1992 A70-26513

Tissue oxygen partial pressure measurement in resting skeletal gracilis muscle of cat, using microelectrode

11 p1989 A70-26664

Glycolysis and glycolytic enzymes activity increase in tissues observed during training of rats to hypoxia, discussing adaptive reactions at cellular level

12 p2167 A70-26975

Brain tissular respiration and oxygen consumption in rats during hypothermia

12 p2168 A70-27345

Inert gas absorption from tissue cavities in body, using models with different wall distribution patterns of capillaries and diffusion resistance

12 p2171 A70-28025

Control device for micromanipulator with pacing motor during electrophysiological studies involving microelectrodes implantation into tissue

12 p2179 A70-28317

Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements

13 p2354 A70-29598

Therapeutic effects of hemopoietic tissue transplantations of bone marrow on irradiated rats, using diffusion chamber for resettlement prevention

13 p2354 A70-29753

High oxygen pressure effect on consumption rate constant for in vivo tissues

15 p2679 A70-31608

Radial acceleration effects on tissue carbohydrate in starved female rats, observing blood glucose increase and muscle glycogen levels decrease

15 p2684 A70-32536

Hybrid computer simulation of steady state oxygen transport and consumption in capillary-tissue system

15 p2694 A70-32845

Tissue respiration measurement with membrane-covered oxygen electrode, discussing effects of electrode deterioration and diffusion artifacts on accuracy

17 p3026 A70-35186

Bone and muscle tissue morphological changes in caged and immobilized rodents and in myasthenic humans

17 p3030 A70-35357

Respiratory gas metabolism of liver, heart, brain and muscle tissues in birds exposed to various ambient temperatures for long periods

18 p3220 A70-36547

Cellular irradiation sensitivity in tissue culture modified by propyl gallate as radical reactions inhibitor

21 p3767 A70-42242

Space flight effects on dogs cardiac activity, brain circulation and systemic-tissue circulation interactions

22 p3972 A70-43635

Live skin tissue electrical parameters changes due to laser radiation, showing coagulative necrosis by histomorphological studies

23 p4150 A70-44313

Lethal and sublethal radiation dosage effects on cellular Na and K distribution in rat brain, liver, kidneys and muscular tissues

23 p4145 A70-44314

Mammalian tissues metabolic and genetic alteration during weightlessness, relating rats liver regeneration delay to centrifuging intensity following hepatectomy

23 p4146 A70-44617

Critical supersaturation vs phase equilibration of tissue in computing decompression schedules from depth and exposure time

24 p4301 A70-45983

TITAN LAUNCH VEHICLES

NT TITAN 3 LAUNCH VEHICLE

Atlas /Centaur and Titan/ Centaur launching of Intelsat 4 communication satellites, discussing booster, stage characteristics and payload [ALAA PAPER 70-483] 11 p2127 A70-26605

TITAN 3 LAUNCH VEHICLE

Solar powered electric propulsion systems for automated missions throughout solar system by extending range of Atlas Centaur-Titan 3-C launch vehicles [ALAA PAPER 68-1120] 04 p0736 A70-15401

Thermal efficiency of modified transtage of Titan 3C spacecraft, discussing environmental simulation, heat rejection system and test firing [ALAA PAPER 70-171] 06 p1156 A70-18027

Titan 3C launch environmental hazards including noise and exhaust cloud content

07 p1393 A70-19225

Structural analysis of Titan 3 Stage 2 ablative nozzle extension made of composite material

08 p1595 A70-21910

Titan 3C boost phase inertia loads on payload estimated for satellite design, using frequency and interface acceleration methods [ALAA PAPER 70-485] 11 p2120 A70-25446

Titan 3 launch vehicles capabilities communication satellites deployment modes, presenting cost and availability data for preliminary mission planning [ALAA PAPER 70-482] 11 p2121 A70-25451

Titan 3C solid rocket motor exhaust plumes thermal radiation analysis for designing Stage I engines and components thermal protection [ALAA PAPER 70-842] 16 p3000 A70-33925

Titan 3 launch vehicle for scientific space missions, discussing building blocks, performance and payloads

17 p3178 A70-35260

Thermoelectric outer planet spacecraft /TOPS/ flight environment, systems design and Titan 3D/Centaur launch vehicle with Burner II upper stage

21 p3930 A70-41795

TITANATES

NT BARIUM TITANATES
NT ILMENITE
NT LEAD TITANATES
NT MAGNESIUM TITANATES
NT PEROVSKITES
NT STRONTIUM TITANATES

Internal residual stress relaxation theory in dielectric aging in tetragonal solid solutions of calcium titanate in barium titanate

19 p3486 A70-37776

Electro-optic device using ferroelectric bismuth titanate, discussing electrical and optical properties and matrix addressed display

21 p3830 A70-42114

Addition effects on lattice and electrophysical properties of trititanate prepared by Ba, Pb, Ca and Ti precipitation

22 p4087 A70-43134

TITANIUM

Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium

01 p0124 A70-11620

Crack propagation in pure alpha-Ti at room temperature using optical and electron microscopy, considering propagation rate relation to strain amplitude

01 p0125 A70-11643

SST Ti body frame optimum design for high temperature environment and economical and fatigue resistance requirements

02 p0386 A70-11937

Boron-polyimide composite reinforced Ti fuselage stringers design and test program for SST

02 p0387 A70-11950

Titanium thin films prepared in ultrahigh vacuum to determine low temperature/pressure oxidation kinetics, using electron microscopy and X ray diffraction

02 p0317 A70-12316

Ti, Zr and Nb characteristics, properties, processing procedures and applications in corrosive environments, nuclear reactors and aerospace structures

02 p0319 A70-12710

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum

03 p0508 A70-13245

Tangential cutting force measurements during Ti grinding by microtools, noting properties of W, aluminum boride and zirconium carbide

04 p0697 A70-14466

Tensile tests on alpha Ti containing oxygen and hydrogen at various temperatures and strain rates to determine deformation and fracture

04 p0706 A70-15133

Bond quality and strength of high temperature adhesive films for titanium [DGLR-69-56] 04 p0699 A70-15158

Polyomorphic transformation effects on oxygen diffusion rate in alpha and beta phases of Ti, considering temperature effects and activation energy

04 p0707 A70-15211

Young modulus anisotropy and recrystallization texture during annealing in cold rolled Ti sheets using Fourier analysis

05 p0862 A70-16200

Fillers effect on thermal conductivity in porous cermet elements, investigating powdered Ti plates with

air replaced by Hg, benzene, ethanol, ether and water vapor

05 p0957 A70-16291

Ti-hydrogen reaction at ambient temperatures, investigating factors favoring reaction and preventive measures

05 p0863 A70-16524

Metal oxides additions effect on Ti glass crystallization, studying small and large ion radii

05 p0871 A70-16593

Silicate enamel coating formulas for application on titanium exhibiting adequate adhesion

05 p0872 A70-16599

Ti demonstrated as predominantly chalcophilic in highly reduced enstatite chondrites and achondrites

07 p1391 A70-20352

Ti I spectrum oscillator strengths, determining formula for relative-absolute values transition

08 p1569 A70-20832

Ti additions influence on steel work hardening, specific weight, magnetic properties and structure

08 p1515 A70-20924

Mo mechanical properties dependence on surface defects and Ti films

08 p1515 A70-20937

Heat exchange coefficient during Ti melting in lined arc furnace, determining relation between heat flows to side walls and bottom of graphite crucible

08 p1506 A70-21140

Solidification thermal conditions during Ti casting by melting out patterns in graphite molds, investigating heat accumulation coefficients in molds

08 p1506 A70-21142

Graphite molds compaction pressure effect on Ti castings nonporosity and surface layers carburization

08 p1506 A70-21143

Low cost programming system for gas tungsten arc welding process for Ti taper and stepped joint designs

08 p1507 A70-21484

Interstitial solutes effect on athermal component of flow stress in alpha titanium

08 p1521 A70-21577

Nondestructive betatron radiographic testing techniques for Ti billets, evaluating various lead screen, film and geometry combinations

08 p1508 A70-21746

Magnesium solubility in titanium from X ray analysis of Mg distribution in diffusion zones at high temperature and pressures

09 p1703 A70-22567

Titanium and titanium alloys bonding, discussing pretreatment, adhesives and assessment of temperature, environment and nuclear radiations

09 p1704 A70-22750

Temperature and strain dependence of strain anisotropy in Ti tested on longitudinal and transverse tensile specimens

09 p1705 A70-22807

Titanium sponge secondary structure obtained by magnesiothermal reduction of concentrated Ti-containing chloride melts, discussing temperature effect on porosity

09 p1709 A70-23783

Cost effectiveness in Ti forming, discussing materials, tooling and fabrication cost ratios

10 p1970 A70-23852

Ultrasonic vibrations effects on microstructure and mechanical properties of polycrystalline titanium during phase recrystallization

10 p1903 A70-23863

Electron energy loss spectrum in Ti measured by bombarding thin films vacuum deposited on NaCl crystal with electrons of intermediate energy

11 p2065 A70-25376

High fatigue life resulting from titanium spot welding realized by preweld and postweld treatment

11 p2059 A70-25662

Diffusion and electron beam welding combined with forging for cost reduction and production enhancement of titanium structural components

12 p2241 A70-27087

Solid state diffusion bonding techniques for aerospace Ti structural components

12 p2242 A70-27093

Titanium structural element allowances requirements and test programs for SST design

12 p2318 A70-27132

Porous Ti powder sintering process activation energy determination, noting influence of oxides solution in surface layer of Ti particles

12 p2254 A70-27283

Stress relaxation in alpha titanium during plastic strain, measuring temperature and strain rate dependence

12 p2255 A70-27608

Athermal component of plastic flow stress in alpha titanium at room temperature using incremental unloading technique

12 p2257 A70-28100

Titanium effect on iron and steels nitriding at high temperature, obtaining high surface hardness

13 p2423 A70-29773

Titanium vacuum pump, discussing pumping speed, sticking factor and sorption coefficient for hydrogen

15 p2744 A70-31845

Initial stages of Ti vapor deposition on Mo, using secondary ion-ion emission and mass spectral analysis

15 p2757 A70-32120

Titanium science, technology and applications - Conference, London, May 1968

17 p3109 A70-34351

Electroslag melted titanium wrought shapes mechanical properties, comparing with double vacuum arc melted material properties

17 p3112 A70-34356

Ti equipment anodizing methods, observing corrosion resistance reduction and embrittlement hydriding due to Fe contamination

17 p3098 A70-34363

Oxidation dependence on physical nature of Ti surfaces obtained by thin film techniques under ultrahigh vacuum conditions

17 p3098 A70-34364

Ti corrosion resistance tests in active and passive states

17 p3113 A70-34367

Elastic properties of dislocations in Ti basal, prismatic and pyramidal slip systems, discussing dilatational fields of edge and screw dislocations

17 p3115 A70-34385

Elastic interactions between anisotropic crystal dislocations and twin and grain boundaries in Ti

17 p3115 A70-34386

Oxidized alpha Ti crystals strain analysis based on X ray divergent beam, discussing hardening effects

17 p3115 A70-34387

Crystallography of deformation twinning in Ti, presenting modes involving shear strains less than unity and simple shuffle mechanisms

17 p3116 A70-34388

Titanium and Ti-Al single crystals microscopic plastic deformation features, slip modes and dislocation substructures

17 p3116 A70-34389

Unalloyed alpha titanium mechanical properties, emphasizing grain size and interstitial content effects on strain hardening and deformation dynamics

17 p3116 A70-34391

Commercial purity Ti athermal plastic deformation, showing anomalous behavior with temperature variations

17 p3116 A70-34392

Unalloyed polycrystalline Ti fatigue tests, observing cyclic stresses effect on twinning

17 p3116 A70-34393

Unalloyed Ti hydrogen embrittlement, determining factors affecting brittle-ductile transition temperature

17 p3117 A70-34398

Martensitic transformation in Ti and Ti alloys, discussing shear systems influence

17 p3118 A70-34404

High temperature heating and cooling effects on mechanical properties and structure of Ti welds, using notched bar impact specimens

17 p3098 A70-34423

Argon-arc welds porosity mechanism in Ti welding

17 p3098 A70-34443

Ti hot forming, discussing sheet use as aircraft structural material

17 p3098 A70-34444

Ti explosive bonding and forming, examining peel and shear strengths on Ti clad steel plate

17 p3098 A70-34446

Ti sheet welded construction for transport aircraft fuselages, assuming use of electron beam and plasma arc equipment

17 p3198 A70-34452

Mn and Ti effects on hardening of Fe-Ni-Mn-Ti and Fe-Ni-Mn maraging martensitic steels

17 p3125 A70-35145

IV characteristics of high resistivity Ti-doped GaAs single crystals and S-diodes, using Hall constant and conductivity measurements

17 p3144 A70-35709

Photometric determination of Ti with diantipyryl-methane in steels containing Se

18 p3277 A70-36465

Ti and C effects on Fe-Cr-Ni alloys mechanical properties

19 p3449 A70-37271

Titanizing Armco iron and carbon steels, examining diffusion layer structure and phase composition

19 p3451 A70-37460

Work hardening maxima of alpha-Ti as function of strain rate and temperature

19 p3451 A70-37568

Phase formation and mass transport during iodine-refined Ti reaction with nitrogen at various elevated temperatures

19 p3452 A70-38364

Long structural shape production for titanium and super alloys, discussing rolling, extrusion, drawing, frictionless forming and filler techniques

19 p3437 A70-38420

Drilling rates improvement for Ti by adding ultrasonic vibration to conventional process

19 p3437 A70-38421

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum

19 p3453 A70-38463

Structural Ti, investigating effect of surface strain hardening by cold rolling on fatigue strength

20 p3648 A70-39250

Ti-Be composite materials production by coextrusion of powders, investigating microstructure by microprobe analysis and X ray diffraction

20 p3649 A70-39945

Ti sandwich structures low temperature brazing with Al alloy, describing fabrication process and mechanical properties

20 p3638 A70-39969

Ti mechanical properties dependence on grain boundary size and hydride precipitation characteristics, considering transcrystalline and intercrystalline fracture

20 p3652 A70-40179

Titanium powder compacts exothermic solid phase reaction ignition by focused laser pulse, obtaining temperature profile from mathematical model based on energy transport

20 p3639 A70-40473

Tooling concepts providing gas shielding in mechanized open air arc welding of Ti, evaluating effectiveness by various mechanical tests

21 p3832 A70-40788

Recrystallization kinetics and microstructure of low carbon Ti stabilized steel cold rolled and annealed in 800-1750 F range

22 p4053 A70-42730

Oxygen diffusion coefficient of alpha-Ti from oxidation of saturated and unsaturated beta phase in 932-1142 C range

22 p4053 A70-42731

Strain rate change effect on stress-strain diagram shape of polycrystalline alpha-Ti during tensile tests over temperature range

22 p4054 A70-42737

Ti embrittlement by liquid Cd, discussing ductile-brittle transition temperature dependence on strain rate

22 p4054 A70-42738

Ti phase transformation effects on thermal conductivity, electrical resistivity and spectral and total emissivities at 1100-1500 K

22 p4056 A70-43222

Ti single crystals plastic deformation in axial compression at high temperatures

24 p4358 A70-45239

Cubic titanium oxycarbide structural characteristics, noting lattice constant dependence on component proportions and mutual solubility during formation

24 p4359 A70-45477

Alpha phase Ti strengthening, investigating interaction between dislocations and interstitial solute atoms

24 p4360 A70-45516

Thread parameters effect on steel and Ti high strength fasteners fatigue life

24 p4425 A70-45881

Carbon steel diffusion saturation with Ti and B, investigating layer depth, weight gain and microhardness dependence on powdered mixture composition

24 p4364 A70-46336

TITANIUM ALLOYS

Wear resistance of Ti alloys chromosilicified by thermal diffusion in vacuum

01 p0115 A70-10072

Phase changes in Ni/Ti alloys with equiatomic composition, resolving discrepancy on nonMartensitic eutectoidal decomposition of B2 structure and intermediate precipitate

01 p0121 A70-11232

Ternary chemical element additions /O, Sn, Zr, Nb, Mo, V/ effects on solubility range of primary alpha region of Ti-Al base alloys

01 p0122 A70-11239

Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe as function of cooling rate, using X ray analysis

01 p0124 A70-11590

Quenched Ti-Mn alloy omega transition phase microstructure characteristics by transmission electron microscopy using thin foils

01 p0125 A70-11639

Ti-Mn alloy quenched in brine and aged at high temperature studied for structural transformations using electron microscope

01 p0125 A70-11640

Ti-Al-Co alloys melting points and cast structures, discussing reactions with melt

01 p0125 A70-11644

Ti-Al-Co alloys reactions in solid phase in Ti-rich region, using optical microscopy and X ray diffraction analysis

01 p0125 A70-11645

Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature

02 p0315 A70-11660

Potential lubricants in friction and cup forming tests of stainless steel, Ti- and Ni-base alloys, considering boron nitride, graphitic materials and Mo oxides

02 p0309 A70-12540

Ti-Al-Sn alloy tensile deformation mechanisms at cryogenic temperature under uniaxial and biaxial

stress noting twinning, prismatic slip and dislocation characteristics

03 p0507 A70-13141

Lattice misfit influence on metastable omega phase morphology and stability in Ti transition metal alloys

03 p0508 A70-13146

Superconducting transition temperature variation in bcc region of Ti-Nb-V ternary alloys measured as function of valence electrons and composition

03 p0538 A70-13154

Corrosion resistance of Ti-based alloys in humid subtropical climate, discussing sea and rain water effects

03 p0510 A70-13281

Phase structure and corrosion resistance of alloys in Ti-V-Cr system, discussing effects in HCl, sulfuric acid, nitric acid, acetic acid and NaCl solution

03 p0510 A70-13282

Titanium aluminide-Mo system hardness, electrical conductivity and density as function of chemical composition, presenting creep test results

03 p0510 A70-13353

Beta III Ti alloy cold formability, mechanical properties and heat treatment noting use for fasteners, sheet metal parts, honeycomb sandwich sections and metal matrix composites

03 p0512 A70-13776

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

03 p0512 A70-13855

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties emphasizing effect of primary structure

03 p0497 A70-13856

Titanium alloys case hardened by diffusion of various metals at high temperatures, measuring increase in wear resistance

03 p0513 A70-13858

Press load prediction for deep drawing Ti-Al-V alloy, stainless steel and Inconel X under various lubrication conditions at room temperature [ASME PAPER 69-WA/PROD-15]

04 p0698 A70-14835

Notch-bend strength of titanium, aluminum and copper base alloys, noting geometrical size effect [ASME PAPER 69-MET-D]

04 p0705 A70-14878

Ti alloys, high strength steels and plastics for aircraft and spacecraft constructions, including aging behavior of lap joints and prepreg laminates in vacuum [DGLR-69-58]

04 p0699 A70-15162

Hydrogen diffusion in pure Ti and beta Ti alloy VT15, determining diffusion coefficient for various temperatures

04 p0707 A70-15190

Oxidation behavior of TiC base alloys containing Mo

04 p0708 A70-15312

Ti-Al-V alloys after annealing investigated for equilibrium diagram at high temperatures

04 p0708 A70-15313

Corrosion problems in Ti and alloys chemical and aerospace applications, describing thermodynamics and electrochemistry in aqueous media

04 p0710 A70-15677

Aircraft Ti alloys failure due to stress-induced pseudocorrosion caused by trichloroethylene and Freon noting microstructure, heat treatment and welding effects

04 p0710 A70-15679

Elastic interaction energy involved in Ti solution hardening by oxygen determined using anisotropic elasticity, presenting atomistic calculations and chemical bonds breaking role

05 p0862 A70-15906

Titanium alloy wastes electrorefining by electrolytic cell with solid bipolar electrodes to eliminate non-metallic inclusions

05 p0863 A70-16544

Alpha and beta solid solutions chemical composition in two phase alloys of Ti-Al-Mo and Ti-Al-V determined by electron microprobe analyzer

05 p0864 A70-16549

Stress concentration effect on mechanical properties of Ti-Ta alloys at low temperatures, showing insensitivity to notch and suitability for cryogenics

05 p0864 A70-16869

Vibration damping properties of steels and Ti- and Al-based alloys at various temperatures under tensile and compression loads

05 p0868 A70-17048

Ti alloy tensile strength under cyclic loads at room and high temperatures, noting plastic deformation and damage accumulation effects

06 p1085 A70-17406

Microstructure effects on smooth and notched fatigue and room temperature tensile properties of Ti-Al-V alloy using heat treatment combinations

06 p1087 A70-17458

Weldability of super alpha high creep strength Ti alloy investigated by synthetic heat affected zone method using thermal cycling tests

06 p1090 A70-18501

Brazing time and temperature effect on depth of Ag based brazing alloys penetration into thin Ti-Al-V sheet substantiated by microprobe analysis

06 p1078 A70-18513

Roll diffusion bonding applicability to Ti, Ni and Fe alloys, discussing fabrication temperatures and tooling [AIME PAPER F-69-3]

07 p1290 A70-18813

Ti alloy welded sheets bending fatigue test facility, discussing test stand calibration and optimal welding

07 p1291 A70-18824

Anodic dissolution initial stages of Ti alloys in neutral salt solutions from viewpoint of electrochemical dimensional processing, noting temperature effect on anodic activation potential

07 p1294 A70-19352

Alloying elements effect on polymorphic alpha-beta transformation temperature of Ti systems, discussing heat resistance

07 p1307 A70-19555

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens [AIAA PAPER 69-585]

07 p1309 A70-19710

Soviet papers on casting of aluminum, magnesium and titanium alloys

08 p1504 A70-21126

Ti alloy band polished surfaces properties, obtaining required residual stresses by process control

08 p1507 A70-21198

Ti-based alloys with Al and Mo investigated for chemical composition and heat treatment effects on mechanical properties

08 p1518 A70-21200

High temperature thermomechanical treatment effects on stainless steels and Ti alloys microheterogeneity, noting corrosion resistance improvement

08 p1519 A70-21444

Ti alloys failure-safe design developing procedures for incorporation of stress-corrosion cracking characterizations into ratio analysis diagram system

08 p1519 A70-21456

Thermal and athermal components of flow stress and deformation dynamics in Ti-Al alloy

08 p1521 A70-21578

Cobalt modified Ti-6Al-4V plate and billet, testing effects on heat treatment response, microstructure, tensile and fatigue properties, fracture toughness, etc

08 p1523 A70-21852

Silicon containing alpha matrix Ti alloy with high creep strength and stability at elevated temperatures, studying processing and heat treatment effects on properties

08 p1509 A70-21853

Fiber composites-Ti alloy adhesive, rivet and combined joints for aircraft applications, noting fiber orientation role in joint tensile strength

08 p1509 A70-21905

Temperature effect on plastic flow in Ti-scavenged Fe, attributing microyielding to edge dislocations motion

08 p1525 A70-21959

Hydrides precipitation in Ti-Al-Mo-V alloys using transmission electron microscopy, discussing crystal structure, activation energy, hydride-matrix phase interface, etc

08 p1525 A70-21964

Gas saturation and inhomogeneity in surface layer of Ti alloys with alpha and beta stabilizers after high temperature heating

09 p1700 A70-22078

Titanium and titanium alloys bonding, discussing pretreatment, adhesives and assessment of temperature, environment and nuclear radiations

09 p1704 A70-22750

Al and Ti alloys residual stress determination by X ray diffraction

09 p1704 A70-22796

Fracture toughness and deformation kinetics dependence on compositional, microstructural and textural variations of alpha and alpha-beta Ti alloys at low temperatures

09 p1704 A70-22801

Growth kinetics of gamma prime precipitate in Ni-Ti alloy noting Ti content variation as function of aging

09 p1706 A70-22812

Electrical resistivity of TiNi and TiCo compounds and alloys measured at various temperatures after quenching or annealing

09 p1707 A70-23194

Phase diagram of Ti-Ta-Cr system, plotting isothermal and polythermal sections by microstructural and X ray analysis

09 p1709 A70-23787

Phase diagram of Ti-Ta-V system, determining solubility of sigma Ta and V in alpha and beta Ti in solid solutions

09 p1709 A70-23788

Phase equilibrium diagram and heat resistance of Ti-Al-Nb alloys along radial section by thermal and microstructural analysis

09 p1709 A70-23789

Isomorphous beta type Ti-Mo alloy omega phase transformations and morphology by electron microscopy, relating hardness to aging

10 p1902 A70-23817

Tantalum solubility in alpha titanium and Ti-Ta system physicochemical properties using metallographic, X ray, hardness and resistance analysis

10 p1903 A70-23864

Transformation kinetics of Ti alloy under isothermal conditions in solution treatment as function of temperature

10 p1903 A70-24025

Titanium high strength alloys, considering hardening by interstitials, precipitation, solid solution, etc

10 p1904 A70-24425

Metal working technology of Ti and alloys for structural parts fabrication for Concorde aircraft, describing laser cutting, electron beam welding, explosive forming, etc

10 p1895 A70-24594

Ti-Al-Zr-W-Si alloy fracture surface concentric markings number related to loading cycles after crack formation

10 p1904 A70-24837

Stacking faults developed in double hexagonal closed-packed phase of Ni-Ti alloy in cold worked and annealed conditions, using X ray line broadening

10 p1906 A70-25228

Multicomponent Ti alloys mechanical properties for use in cryogenics describing alloying advantages with tantalum

10 p1906 A70-25295

Design mean stress and ground-air cycles minimum stress effect on fatigue behavior of titanium alloy in supersonic transport operating environment [SAE PAPER 700033]

11 p2128 A70-25370

Heat resistance and elastic properties of binary Ti-Mo alloys as function of phase structure and chemical composition

11 p2066 A70-25915

Air and salt water tensile and shear mode cracking of titanium alloy sheets examined with electron fractographs

11 p2067 A70-26099

Saturn booster Ti alloy pressure vessel forging, heat treatment and welding, discussing machining, cleaning and tooling [SME PAPER AD-70-733]

12 p2241 A70-27085

Diffusion bonding processes for Ti aerospace structural elements, describing electric blanket, roll and press bondings [SME PAPER AD-70-736]

12 p2242 A70-27089

Ti alloys tensile properties correlated with microstructure for multiple heat treatment cycle variations for high strength and adequate ductility

12 p2252 A70-27107

Fatigue crack growth dependence on load profile, temperature, test frequency and environment and stress in high strength Al and Ti alloys and steels

13 p2431 A70-28604

Ti-6Al-4V dissolution in HCl-methanol, investigating corrosion rate

13 p2433 A70-28779

HF resistance welding and roll diffusion bonding fabrication of thin complex structures from Ti alloys in aerospace industry

13 p2418 A70-28828

Cu-Fe-Ti ternary system via microscopic, X ray and thermal analyses, measuring microhardness, electrical resistivity and magnetometry

13 p2433 A70-28863

Thermodynamic data for chemical reactions of Ti alloys formation with Al obtained by measuring galvanic cells emf with solid electrolytes at elevated temperatures

13 p2434 A70-28889

Carbide precipitation in metastable beta-Ti alloys, noting precipitations confinement to grain boundaries in alloys containing 15 percent Mo

13 p2434 A70-29083

PH variation effect on sea water on stress corrosion cracking behavior of Ti alloys

13 p2435 A70-29174

Titanium alloys powder metallurgy, considering manufacturing methods and physical, chemical and mechanical properties

13 p2435 A70-29214

X ray K spectra of Ti-Cr alloy for electron structure in titanium chromide phase region, discussing spectral intensities

13 p2435 A70-29375

Thick plate titanium alloy welds using filler wire to regulate chemical composition and plate phase constitution

13 p2435 A70-29456

Phase transformations in TiNi with equiatomic composition, using internal friction, electrical resistivity and dilatometry

13 p2435 A70-29499

Ti-8Al alloy embrittlement from ordered phase precipitation during aging using tensile, impact and hardness tests, optical and electron transmission microscopies

13 p2436 A70-29624

TITANIUM ALLOYS

Growth kinetics of strengthening phase during aging of NiCr-W-Mo-Al-Ti alloys, considering gamma prime particles at different Al/Ti ratios 14 p1594 A70-30169

Interatomic bond strength in solid solutions of Ti-Sn-O with respect to heat resistance at elevated temperatures 14 p2595 A70-30170

Be-Al-Ti system liquidus surfaces and invariant equilibria by chemical, thermal, X ray and microscopic methods, discussing phase diagrams 14 p2595 A70-30839

Hydride segregation in Ti alloy weldments made with unalloyed Ti filler metal, determining effect on mechanical properties 14 p2591 A70-30932

Low pressure diffusion welding for joining Ti-6Al-4V alloy in Ar atmosphere under compressive loading, evaluating performance 14 p2591 A70-30933

Optimum diffusion welding temperature for Ti-6Al-4V alloy determined from tensile and creep tests 14 p2591 A70-30934

Electrochemical processes associated with stress corrosion cracking of Ti-Al-Mo-V alloy in aqueous environments 15 p2755 A70-31474

Stress corrosion cracking of Ti and Ti-Al-V alloy in liquid dinitrogen tetroxide 15 p2755 A70-31475

Omega phase embrittlement in aged Ti-V alloys, discussing precipitation effect on tensile properties 15 p2756 A70-31570

Ti alloy suitability for fastener applications noting cold workability, high strength and stress corrosion resistance [ASM PAPER W70-17.3] 15 p2760 A70-32338

Room temperature mechanical properties and structure of age hardened Ti-Cu alloys 15 p2761 A70-32384

Ti-Al-V-Sn hardenability, using high temperature solution treated Jominy bars tests 15 p2762 A70-32393

Phase transformations in beta isomorphous Ti alloys, discussing effects on omega and alpha phases during quenching and aging and on martensite under stress 15 p2763 A70-32807

Beta phase decomposition kinetics and strain hardening inhibitions in Ti-base Mo alloys, using metallographic, dilatometric and X ray analyses 15 p2764 A70-32855

Internal friction in hydrogenated Ti-Mn alloys, observing relaxation peak formation under stress induced hydrogen diffusion in beta phase 16 p2930 A70-33082

Quench hardening and Ni content relationship in Ti-Ni intermetallic compounds, investigating heat treatment effect on mechanical properties 16 p2930 A70-33084

Optical properties of electropolished cubic Nb-Ti alloys at cryogenic and room temperatures in visible and near IR spectral range 16 p2930 A70-33205

Metastable beta phase decomposition in Ti alloy during mechanochemical treatment and aging, determining correspondence to alpha phase segregations via electron microscopy 16 p2931 A70-33207

Delayed rupture and relaxation in Ti alloys during cyclic deformation, comparing fatigue tests results for continuous and discontinuous cyclic loadings 16 p2931 A70-33209

Ti-Mo cermet alloys properties and production technology, testing corrosion resistance 16 p2931 A70-33220

Ti-Cu-Ag phase diagrams and liquidus surface structure, using metallographic, thermal and X ray techniques 16 p2931 A70-33221

Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering 16 p2931 A70-33256

Titanium electron beam welding in aerospace industry, discussing alloy properties and strength behavior 16 p2919 A70-33683

Solidification theory application to Ti alloys, predicting microsegregation in binary alloys 17 p3112 A70-34352

Homogeneity of commercially pure Ti and Ti-Al-V ingots, discussing oxygen distribution uniformity over cross section 17 p3112 A70-34353

Chemical and structural microinhomogeneity, diffusion and mechanical properties of Ti alloys in connection with phase transformation characteristics 17 p3112 A70-34354

Ti alloy ingot chemical macroinhomogeneity, investigating elimination by vacuum arc melting 17 p3112 A70-34355

Ti alloy forgings for aircraft industry, utilizing high strength/weight ratio 17 p3097 A70-34357

Ti alloys beta forging effect on physical properties and tensile ductility 17 p3097 A70-34358

Heating effect above beta transus at intermediate and final stages of processing on Ti alloys properties 17 p3097 A70-34359

Ti alloy aircraft parts heavy press forging, considering mechanical properties, temperature effects, cost factors, etc 17 p3097 A70-34360

Mono Graf casting process for Ti alloy aerospace applications, utilizing high strength/weight ratio and corrosion resistance 17 p3097 A70-34361

Ti precision casting methods, emphasizing alloys peculiarities 17 p3097 A70-34362

Ti alloys embrittlement, investigating time temperature dependence of brittle subsurface layer formation during elevated temperature air exposure 17 p3112 A70-34365

Anodic breakdown characteristics of Ti alloys as function of metal surface condition 17 p3113 A70-34366

Electrochemical mechanism in Ti alloys stress corrosion cracking, formulating mass transport kinetics model 17 p3113 A70-34368

Stress corrosion cracking of alpha-Ti alloys at room temperature, suggesting cathodic polarization promotion of film buildup 17 p3113 A70-34369

Aqueous stress corrosion dependence on microstructural features of Ti alloys, using optical and electron microscopy and X ray diffraction 17 p3113 A70-34370

Ti-Al-Mo-V alloy stress corrosion cracking, investigating correlation between dislocation substructure and ambient temperature corrosion susceptibility 17 p3113 A70-34371

Stress corrosion cracking in Ti and alloys, discussing metallurgical and environmental factors emphasizing exposure to hot salt, methanol, seawater, etc 17 p3114 A70-34372

Stress corrosion cracking in Ti-Al-V alloy exposed to Freon environments 17 p3114 A70-34373

Ti alloys crack formation during oxidation under stress, considering annealing and recrystallizing effects 17 p3114 A70-34374

Ti alloys crack initiation and propagation during hot salt stress corrosion 17 p3114 A70-34375

Ti alloys systems physical properties and structural phase stability, discussing electronic Fermi state density variation 17 p3114 A70-34376

Ti-Al alloy crystallographic structure, observing hexagonality for alpha phase 17 p3114 A70-34377

Thermodynamic properties of bcc beta phase in Ti-Cu and Ti-Al systems, discussing activities determination technique 17 p3114 A70-34378

Titanium base binary systems phase diagrams, describing component activity and compound phases heat of formation 17 p3114 A70-34379

Beta-Ti and Ti-Cr single crystals elastic moduli, determining A ratio temperature dependence 17 p3115 A70-34380

Kinetic simulation of atom rearrangements in order-disorder transformation for point defect movement in Ti alloys, considering vacancies and interstitials properties 17 p3115 A70-34381

Hydrogen behavior in Ti and alloys by internal friction measurement, attributing relaxation peaks to stress induced ordering of atoms 17 p3115 A70-34382

Binary titanium-oxygen and titanium-carbon alloys, investigating interstitial pair mechanism for internal friction peak formation 17 p3115 A70-34383

Ti interaction with elements of periodic systems, considering binary system phase diagrams 17 p3115 A70-34384

Interstitial impurities effect on mechanical properties of Ti alloys, discussing interaction between solutes and dislocations 17 p3116 A70-34390

Alpha Ti and alpha Ti-hydrogen alloys fatigue behavior, emphasizing twin formation influence and hydrogen effects 17 p3116 A70-34394

Titanium hydride deformation assisted nucleation in alpha-beta titanium alloy, showing low strain rate embrittlement and stress corrosion crack propagation in aqueous environments 17 p3116 A70-34395

Alpha Ti-hydrogen alloys, discussing fracture behavior temperature dependence 17 p3117 A70-34396

Hydrogen embrittlement of Ti and Ti alloys under plastic deformation and critical hydrogen concentration 17 p3117 A70-34397

Single phase alpha Ti alloy welds breaking strength, discussing delayed failure and cold cracking with various oxygen and hydrogen contents 17 p3117 A70-34399

Temperature cycling through phase transformation effects on plastic deformation of Ti and Ti-Al-V alloy under torsion and tension 17 p3117 A70-34400

Hot plasticity elongation of cast and wrought Ti-Al-V alloy as function of temperature and strain rate 17 p3117 A70-34401

Pressure forming Ti sheet alloy blanks in superplastic condition under controlled temperature and strain rate 17 p3117 A70-34402

Ti alloys martensitic transformations, metastable beta-phase decomposition and alpha-phase ordering 17 p3118 A70-34403

Martensitic transformation in Ti and Ti alloys, discussing shear systems influence 17 p3118 A70-34404

Twinned hexagonal martensites crystallography in Ti alloys, discussing alpha-beta and beta-fcc transformations 17 p3118 A70-34405

Cooling rate effect on beta phase transformation temperature in Ti-Nb and Ti-Al alloys 17 p3118 A70-34406

Ti alloys M sub s and beta sub s points thermodynamics, considering initiation of bcc-cph martensitic transformation 17 p3193 A70-34407

Ti binary alloys beta phase continuous cooling transformation, investigating additives effects 17 p3118 A70-34408

Metastable Ti alloys beta-omega-alpha decomposition and Ti-8Al alpha-ordered alpha transformation, using automatic measuring apparatus 17 p3118 A70-34409

Omega phase morphology in Ti alloy by electron microscope techniques, noting cubic structure 17 p3118 A70-34410

Omega phase stability in Ti and Zr alloys, interpreting upper temperature limit from critical temperature associated with peritectoid reaction 17 p3119 A70-34411

Martensite transformations and cellular phase separation in Ti-Cu alloys, using electron microscopy 17 p3119 A70-34412

Phase transformations and equilibrium diagram of titanium-oxygen alloys, using electron and optical metallography 17 p3119 A70-34413

Martensitic transformation effects on mechanical properties of beta quenched Ti binary alloys 17 p3119 A70-34414

Titanium alloys quench hardenabilities, determining variations with distance from end of Jominy bars after annealing 17 p3119 A70-34415

Age hardening process in Ti-Cu alloy at 400 C, using electron diffraction 17 p3119 A70-34416

High yield strength alpha-beta Ti alloys ductility control, observing fracture strength dependence on morphology, grain location and size for constant heat treatment 17 p3119 A70-34417

Phase diagrams of high strength metastable Ti beta alloys, showing minimum quantity of alloying elements for solid solution retention 17 p3119 A70-34418

Solution heat treatment temperature effects on strength and age hardening of Ti alloys 17 p3120 A70-34419

Shock deformation effects on strengthening and microstructure of Ti and Ti-Mo alloys 17 p3120 A70-34420

Ti alloy stability after long term creep exposure at various temperatures 17 p3120 A70-34421

Thermal exposure effect on room temperature mechanical properties of Ti alloys, noting diffusion bonding, hot forming and heat treatment 17 p3120 A70-34422

Ti-Al-Sn-Zr system high temperature creep strength and ductility retention 17 p3120 A70-34424

Al, Ga and In effects on creep and rupture stress of Ti at 500 C 17 p3120 A70-34425

Ti-Al-Nb system creep strength, oxidation resistance, density, forging and rolling 17 p3120 A70-34426

Forged alpha/beta Ti alloys, investigating relationship between mechanical properties and microstructures produced by heating 17 p3120 A70-34427

Ti-Al-Cr-Fe tensile, fatigue and creep properties at various temperatures, considering industrial applications 17 p3121 A70-34428

Ultrahigh strength alpha-beta titanium alloys, examining carbon and oxygen effects on mechanical properties

17 p3121 A70-34429

Ti-Cu alloy sheet material age hardening, considering cold and warm work effects at various stages in aging cycle

17 p3121 A70-34430

Weldability, tensile and fatigue properties of Ti sheet alloys, discussing TIG welds

17 p3121 A70-34431

Fatigue properties of solution treated and age hardened hot rolled Ti alloy bars, discussing sprayed tungsten carbide coatings effects on bearing properties

17 p3121 A70-34432

Strain gage measurements of elastic properties of Ti sheet alloys, computing polycrystalline properties from single crystal values

17 p3121 A70-34433

High strength Ti alloys depth hardenability, discussing mechanical properties and use in aircraft components

17 p3121 A70-34434

Metastable ageable beta Ti-Mo-V-Fe-Al alloy, discussing plate, sheet and forgings producibility, metallurgical characteristics and structural properties

17 p3121 A70-34435

High strength Ti alloys for aircraft gas turbine engines, determining critical properties for compressor fan blades

17 p3122 A70-34436

Heat treatment effect on strength and ductility of Ti-Al-V-Sn alloy by optical and electron microscopy and X ray diffraction

17 p3122 A70-34437

High strength Ti alloy for cryogenic applications, comparing plane strain fracture toughness

17 p3122 A70-34438

Heat treatment and composition effect on mechanical properties of alpha Ti-base alloy, discussing creep resistance, tensile strength, etc

17 p3122 A70-34439

Creep resistant Ti alloys with high temperature strength and stability, comparing tensile data for room temperature and 900 F

17 p3122 A70-34440

Fatigue characteristics of Ti alloy forgings for rotary wing vehicles, discussing effects of welding, annealing, reduction, surface finish and shot peening

17 p3122 A70-34441

Electron beam welding of Ti alloys in partial vacuum, describing mechanical tests and metallographic examinations

17 p3098 A70-34442

Forming Ti-Al-V sheet metal in heat treated conditions, showing mechanical properties improvement over mill annealed parts

17 p3098 A70-34445

Wear and fatigue of Ti-Mo-Al-Sn-Si /Hylite 50/ alloy with resistant Mo or Cr coatings

17 p3099 A70-34447

Ti alloys use in jet engines design, considering weight, structural stability, useful temperature range, cost, etc

17 p3146 A70-34448

Ti alloys use in Olympus 593 engine for Concorde SST, discussing weight saving, mechanical properties and manipulation characteristics

17 p3146 A70-34449

Ti fabrications in aircraft engines, discussing alloys properties, sheet deformation, fusion welding, porosity, etc

17 p3099 A70-34450

Alloy applications to Boeing supersonic transport airframe and components, discussing materials characteristics and manufacturing processes

17 p3099 A70-34451

Stress corrosion cracking of Ti alloys in nitrogen tetroxide and methyl alcohol environments in Apollo spacecraft pressure vessels

17 p3199 A70-34453

Aircraft structural materials, considering high strength steels Al and Ti alloys

17 p3124 A70-34675

Decomposition of unstable beta solid solution of Ti-V alloy, using X ray and microscopic analyses

17 p3125 A70-35336

Ti alloys thermomdiffusion impregnation with rarefied nitrogen and oxygen plasma, determining optimal gas pressure and temperature conditions and magnetic field frequency effects

17 p3101 A70-35391

Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C

17 p3102 A70-35409

Martensitic phase change effects in TiNi on ultrasound waves propagation in transition region, using pulse echo measurements

17 p3126 A70-35603

Low temperature effects on Ti alloys welded joints elasticity

17 p3126 A70-35637

Creep and failure tests for Ti alloys at 500 C, discussing work dissipation during creep process

17 p3126 A70-35714

Cobalt addition to Ti-Al-V alloys, examining yield strength, heat treatment, ductility and microstructure

18 p3271 A70-35964

Ti-Al binary and Ti-Al-X ternary alloys grain boundary precipitation kinetics and correlation with mechanical properties

18 p3272 A70-36035

Ti-Al alloys room temperature mechanical properties after age hardening

18 p3274 A70-36055

Chemical composition selection for Ti alloys with low susceptibility to hydrogen induced brittleness

18 p3274 A70-36121

Mechanical properties of binary Ti-Ni and ternary Ti-Mo-Ni alloys

18 p3275 A70-36122

Isothermal phase equilibria in Ti rich ternary Ti-Al-Fe alloys, noting eutectoid transformation

18 p3275 A70-36123

Polythermal phase equilibrium and heat resistance of Ti-rich Ti-Zr-Al alloys, noting creep and tensile tests

18 p3275 A70-36124

Cross sectional phase diagram of Nb-Ti-Mo-V, discussing continuous crystallization and composition dependent hardness and resistance

18 p3275 A70-36125

Ti alloy prior plastic deformation effect on fatigue strength under bending, tension, torsion and rolling

18 p3275 A70-36141

Quantitative analysis of nonmetallic inclusions in steels containing Ti after electrochemical anodic dissolution

18 p3277 A70-36464

Depth measurement of gas-saturated surface layer in Ti alloys, using microhardness method

18 p3277 A70-36472

Nuclear irradiation effect on embrittlement of Ti and Ti alloys at cryogenic temperature, determining radiation damage threshold as function of tensile properties changes

18 p3278 A70-36567

Heat resistance of cast, forged and annealed Ti-Cu alloys, discussing forged alloys mechanical properties as function of chemical composition and temperature

19 p3449 A70-37273

Alloying elements effect on diffusion coefficient of hydrogen in low-alloyed alpha titanium

19 p3449 A70-37274

Ti-Si eutectic alloys unidirectional solidification by zone melting

19 p3450 A70-37375

Ti alloys low temperature strength and plasticity, noting twinning and additive effects

19 p3450 A70-37457

Friction reducing oxide layer effects on Ti alloys low temperature plastic and mechanical properties

19 p3450 A70-37458

Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature

19 p3452 A70-38434

Ti-Nb-Zr alloys strength and plasticity at various temperatures, noting compositional effects on tensile and yield strength

19 p3453 A70-38712

Interstitial oxygen effect on properties and precipitation processes in pure V and V-Ti alloys, using electron microscope

19 p3454 A70-38812

Heat treatment and alloying element influence on phase and structure transformations in Ti alloys, investigating mechanical properties and creep resistance

20 p3645 A70-39039

Ti alloys fine structure, mechanical properties and alloying elements diffusion mobility during heat treatment, observing chemical and structural inhomogeneities

20 p3645 A70-39040

Beta Ti alloy decomposition study during aging by diffraction electron microscopy, forming finely dispersed coherent precipitates

20 p3645 A70-39041

Ti alpha alloys subjected to heating in beta region, investigating plate-like precipitates by electron transmission microscopy

20 p3645 A70-39042

Two phase Ti alloy subjected to quenching and annealing studied by diffraction electron microscope, discussing needles complex fine structure

20 p3645 A70-39043

Beta Ti-V-Cr-Al phase transformations below 500 C, discussing metastable phase, bcc formation and thermodynamics

20 p3646 A70-39106

Temperature effect on radiation characteristics and cryogenic tensile properties of irradiated Be, Ti and Al alloys

20 p3647 A70-39111

Ti binary alloys with V, Nb and Mo, determining phase boundaries by diffusion layers method and electron microscope analysis

20 p3649 A70-39727

Ti alloy bolts mechanical properties improvement by beta heat treatment

20 p3650 A70-39965

Beta III Ti alloy for aircraft fasteners, describing microstructure and mechanical properties

20 p3650 A70-39966

Metastable beta Ti alloy as-quenched microstructure stability with respect to thin foils transformation during electrolytic polishing and bulk specimens during cold rolling

21 p3841 A70-42150

Magnesium Al and Ti alloys electron beam welding for aerospace industry, discussing material requirements, weld quality and optimum conditions

22 p4042 A70-42338

Ti and Al alloy weldments plane strain fracture toughness and mechanical properties for cryogenic applications, using gas metal arc and gas tungsten arc welding

[ASME PAPER 70-MET-4]

22 p4043 A70-42423

Repair weld procedures effects on annealed Ti-Al-V weldments mechanical properties, examining defects in inert gas shielded arc welded joints

[ASME PAPER 70-MET-1]

22 p4043 A70-42425

Orthorhombic martensite tempering behavior in Ti alloys, observing distinct stages for binary and ternary alloys

22 p4054 A70-42742

Ti alloy tension creep tests at room temperature, determining strength for correlation with stress relaxation

22 p4055 A70-43097

Electro-thermal-mechanical switches based on shape-memory effect in Ti-Ni alloys

22 p3965 A70-43330

Ti alpha alloy fracture characteristics at high temperatures, discussing strain rates, deformation resistance and grain growth

22 p4056 A70-43343

Phase diagrams and nonvariant equilibria points of Ti-Si alloys subjected to prior annealing, determining phase transformations, decomposition and other properties as function of temperature

22 p4057 A70-43350

Ti and Zr based superconducting alloys with Nb content, measuring longitudinal critical currents in wire and ribbon samples

22 p4087 A70-43462

Fatigue limits of Ti alloy by Wohler and Locati loading methods

22 p4204 A70-43933

Scale factor effect on brittle fracture resistance for Ti and Al alloys and high strength steels

23 p4265 A70-43936

Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering

23 p4206 A70-44285

Cross slip between screw dislocations coplanar arrays in Ti-Al alloy, noting fringe pattern and bowing absence

24 p4359 A70-45248

Short-term creep and erosion resistance testing of Ti alloy in high speed air flows under aerodynamic vibrations

24 p4360 A70-45826

Chemical composition effects on heat resistance, elastic properties and density of Ti-Ta alloys

24 p4360 A70-45830

Phase equilibria, hardness and electroresistivity of Ti-Al-V alloys at solid compound section for reinforced metal composites

24 p4361 A70-45831

Heat treatable beta Ti alloys cold workability, fracture toughness, tensile ductility and applications

[SAE PAPER 700856]

24 p4361 A70-45880

Ti-Mo and Ti-Mn alloys omega transition phase, describing shape and crystallographic characteristics

24 p4361 A70-46178

TITANIUM BORIDES

Quantitative method developed for photometric determination of B in nickel or titanium borides, using magnezon I reagent in alkaline solutions at various pH

03 p0504 A70-12983

Ti, Zr and Hf diborides electrophysical properties, discussing temperature effects and electronic structures

23 p4205 A70-43991

Titanium diboride particles contact surface increase during sintering in vacuum as function of temperature

23 p4205 A70-44042

TITANIUM CARBIDES

Titanium carbide hemispherical and spectral emissivity and electrical resistivity measured at high temperature

03 p0512 A70-13752

Titanium carbide based cermets with steel matrices, studying heat treatment effects on hardness

04 p0696 A70-14462

Titanium carbide sintering under continuous heating in Ar atmosphere, studying ultrasonic waves effects on compaction process

04 p0696 A70-14463

Optimal temperature for sintering of compact titanium carbide in Ar atmosphere

04 p0697 A70-14468

Oxidation behavior of TiC base alloys containing Mo

04 p0708 A70-15312

Thermoelectric characteristics of graphite and titanium carbide compared with platinum after prolonged annealing at 2300 C 07 p1316 A70-19661

Phase equilibria, crystallization and solidus surface in transition conode triangle of ternary system Mo-Ti-C at high temperatures 07 p1310 A70-19804

Low temperature oxide film effect on porous titanium carbide impregnation by liquid steel 07 p1311 A70-19805

Temperature dependence of Vickers pyramid hardness for Ti, Zr and Hf carbides at wide temperature range in vacuum 08 p1516 A70-20986

Monochromatic radiation emissivity temperature dependence of monocarbides of Ti, Nb and alloys in homogeneity region 08 p1516 A70-20994

Pyrolytic C-TiC alloys obtained by precipitation from gaseous phase, discussing microstructural properties anisotropy 08 p1517 A70-21146

Compacted titanium carbide powder coarsening recrystallization within homogeneous region, determining relation between initial activation energy and carbide composition 12 p2254 A70-27284

Wear resistant titanium carbide based cermet material production by impregnation techniques, discussing grain size and heat treatment effects 19 p3450 A70-37453

Rotating Ti disk in liquid Co flow, investigating titanium carbide dissolution kinetics 20 p3648 A70-39245

Titanium dicarbide and tetracarbid vaporization at high temperatures, using Knudsen effusion method with mass spectroscopy, determining dissociation energies 21 p3773 A70-41274

Stacking fault energy determination, discussing impurities influence in equilibrium dimensions distortion of extended nodes in titanium carbide 22 p4053 A70-42727

TITANIUM CHLORIDES

Ti tetrachloride, Si tetrachloride and hydrogen gas mixtures flow over heated graphite substrates, describing Ti silicides formation 09 p1703 A70-22646

Sodium-titanium-boron-silicate glass opacity and fusibility increase during partial substitution of K for Na, noting phase composition changes 05 p0871 A70-16598

Titanium and zirconium dihydrides room and higher temperature electrical resistivity, Hall effect and thermal expansion coefficients 08 p1517 A70-21149

Mechanical and physical properties of Nb-Ti binary annealed alloys as function of compound NbTi using microscopic and X ray phase analysis 09 p1704 A70-22755

Powdered titanium oxycarbides, carbonitrides and oxynitrides oxidation by X ray phase analysis, determining titanium dioxide as final product 12 p2254 A70-27285

Titanium and Ti-Al single crystals microscopic plastic deformation features, slip modes and dislocation substructures 17 p3116 A70-34389

Molecular orbital energy level diagram for metal ion X ray emission and absorption spectra interpretation from titanium and vanadium compounds 21 p3853 A70-41901

X ray K and L emission bands and absorption spectra from TiO, TiN and TiC compared with density of states histograms, considering electronic band structure 22 p4086 A70-43003

TITANIUM DIOXIDE

U TITANIUM OXIDES

TITANIUM NITRIDES

Dissociation energy of gaseous TiN molecule at high temperature 15 p2695 A70-32748

TITANIUM OXIDES

NT ILMENITE

NT RUTILE

Aluminosilicate glass physical properties and chemical stability in water, alkaline and acidic agents, studying titanium oxides additions effect 05 p0871 A70-16596

Ingredient proportions for enamels containing titanium and boron oxides 05 p0871 A70-16597

Excess titanium dioxide effect on electric resistance of semiconductive barium titanate ceramics suitable for posistors 07 p1355 A70-18654

Titanium monoxide absorption bands in class M stars spectra, estimating band head intensities 08 p1569 A70-20829

Powdered titanium oxycarbides, carbonitrides and oxynitrides oxidation by X ray phase analysis, determining titanium dioxide as final product 12 p2254 A70-27285

Titanium monoxide thin film as low temperature getter, measuring activity coefficient and capacity under ultra high vacuum 15 p2783 A70-31844

Antireflection titanium dioxide thin films for aerospace silicon solar cells 19 p3358 A70-38201

Temperature dependence of titanium-zirconium oxide semiconductor compounds growth, using samples arc melted in purified He 20 p3687 A70-39631

Thin titania films electrical breakdown under high DC fields in high vacuum, suggesting reduction to lower order semiconducting oxide 22 p4085 A70-42621

Neutron diffraction of ordered atomic oxygen structures in titanium suboxides, noting compositional dependence of physical properties 22 p4053 A70-42735

Cubic titanium oxycarbide structural characteristics, noting lattice constant dependence on component proportions and mutual solubility during formation 24 p4359 A70-45477

TITRATION

Simultaneous titration of gases, metalloids and metals in steels and refractory alloys by far UV vacuum spectrometry 08 p1455 A70-21842

TNT (TRINITROTOLUENE)

U TRINITROTOLUENE

TOBACCO

Cerebral circulatory reactions of smokers and non-smokers exposed to altitude, measuring vasomotor, blood flow and cardiac frequency indexes using scalp electrodes 12 p2172 A70-28042

Partial nucleotide sequences for fragments isolated from ribonuclease digests of tobacco mosaic virus RNA, suggesting genetic duplication possibility 13 p2363 A70-29798

TOCOPHEROL

Plasma tocopherol concentrations and vitamin E deficiency in dogs, noting pathologic changes in smooth muscle, central nervous system, skeletal muscle and retina 20 p3569 A70-38991

Heme biosynthesis defect in vitamin E-deficient rats affecting bone marrow synthesis of delta-aminolevulinic acid and liver formation of porphobilinogen 24 p4304 A70-46146

TOLERANCES [MECHANICS]

NT IMPACT TOLERANCES

Electronic gauging machine for multipoint measurement at preselected points around turbine blade airfoil produced by electrochemical machining 01 p0105 A70-11397

Electrical discharge machining showing close tolerance sizing capability on honeycomb panels 02 p0310 A70-12665

Single dispersion statistical analysis by simultaneous parameters tolerances application 03 p0518 A70-12937

Damage tolerance as design consideration for aircraft safety and reliability, discussing application of failed single principal member concept to airframe construction 07 p1417 A70-20401

Orifice diameter for low Reynolds number flowmeter dependent on pipeline diameter tolerances 08 p1482 A70-20684

Component tolerances effect on transfer function of networks, calculating sum variance for two terminal networks 10 p1833 A70-24223

Tolerance limits for equipment periodic field checkout, considering performance failure effects on system accuracy, costs and availability 10 p1896 A70-24911

Algorithm for selective quadrupole parameter tolerance calculation, combining random search method with statistical testing 11 p2018 A70-25923

Rectangular tolerancing of dipole impedance values scatter for random passive network samples 12 p2194 A70-26968

Low Reynolds number laminar flow gas turbine regenerators, investigating manufacturing tolerances effects on heat transfer and flow friction behavior 14 p2629 A70-31022

Axial flow multistage turbines performance, examining profile manufacturing tolerances effects on cost 16 p2970 A70-33677

Soviet book on operational tolerances in radio electronic equipment from reliability criteria 20 p3597 A70-39400

Material thickness tolerances control for weight minimization of aerospace vehicles by abrasive metal grinding, improving surface quality 20 p3638 A70-40358

Two-component optical system for laser radiation collimation, calculating tolerances for fabrication and assembly 22 p4051 A70-43560

TOLERANCES [PHYSIOLOGY]

NT ACCELERATION TOLERANCE

NT ALTITUDE TOLERANCE

NT COLD TOLERANCE

NT HEAT TOLERANCE

NT HUMAN TOLERANCES

NT RADIATION TOLERANCE

Rodents hypoxia tolerance following adaptation to hypercapnia by recording time of useful consciousness /TUC/ in repeated sloped surface clinging tests 01 p0026 A70-11249

White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids 03 p0424 A70-13718

Fluorine toxicity, discussing fluorine reactions with animal proteins and lipids, short-term exposure toxicity data, emergency tolerance limits, threshold limit, etc 10 p1824 A70-24060

White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids 11 p1985 A70-25518

Hypoxia tolerance of albino rats in He-oxygen and Ar-oxygen environments in heat-pressure chamber, discussing He-oxygen mixture cooling effect 11 p1987 A70-26103

Rhesus monkeys tolerance to graded increase in closed environment carbon dioxide, examining heart rate and cardiac rhythm 11 p1988 A70-26517

Ambient temperature effects on rats and white mice tolerance to hypoxia, asphyxia and hypercapnia in nitrogen-oxygen and He-oxygen atmospheres 17 p3030 A70-35353

Rhesus monkeys PCO2 tolerance in low pressure environments, observing hypothermia and heart and respiratory rates depression 21 p3765 A70-41486

Carbon dioxide exposure limits of rhesus monkeys, examining body temperature, respiratory rate and pressure effects 22 p3973 A70-43642

Weightlessness and immobilization effects on mechanical tolerance of bone compressive and breaking strength in monkeys 22 p3973 A70-43648

TOLLMEIN-SCHLICHTING WAVES

Laminar flow mixing stability and diffusion flame flow field measurements revealing role of Tollmien-Schlichting waves in enclosed flames vibrations [WSCI PAPER 69-46] 06 p1179 A70-17985

Tollmien-Schlichting waves in flat plate Blasius boundary layer, comparing experimental and theoretical critical Reynolds number 23 p4179 A70-43975

TOLUENE

Thermal conductivity of water, toluene and benzene in coaxial cylinders, taking into account edge heat losses 23 p4276 A70-44216

TONE

U PITCH

TONGUE

Integrated static discharge frequencies of cat lingual cold receptors measured as function of constant temperature 01 p0017 A70-10472

TONOMETRY

U INTRAOCULAR PRESSURE

U PRESSURE MEASUREMENTS

TONUS

U MUSCULAR TONUS

TOOLING

Electrical discharge machining using electrical spark eroding action for machining tough metals in burr-free intricate configurations, including narrow slots and blind holes 03 p0497 A70-13564

Numerically controlled gas tungsten arc welding, discussing tape programming, fixture design and fabrication for various welded metal joint configurations 11 p2058 A70-25661

Metal matrix composite structures tooling and fabrication processes, considering forming, joining, welding, machining joining, etc [SAE PAPER 700752] 24 p4348 A70-45873

TOOLS

NT GRINDING MACHINES

NT MACHINE TOOLS
 NT MILLING MACHINES
 NT SPACE TOOLS
 Nd laser drilling and welding tool for microminature electronic device fabrication 14 p2594 A70-30639
 Epoxy laminating resin evaluation for tooling industry, considering diluent, fillers, thixotropy, hardeners and physical property testing 16 p2936 A70-33360
 Grinding by abrasive tape, superimposing transverse vibrations to improve performance and life 22 p4046 A70-42816

TOOTH DISEASES
 Ultrasonic detection of tooth surface layer demineralization, noting surface and subsurface enamel structural differences 22 p3978 A70-42955

TOPOGRAPHY
 NT LUNAR TOPOGRAPHY
 NT TERRAIN
 Microtopography effects on measuring horizontal gravity gradients by gravimeters 02 p0295 A70-11799
 Martian topographic contours determined from detected carbon dioxide abundances indicating large scale differences from previous data 02 p0373 A70-12390
 Artificial satellites for geodetic, topographic and cartographic purposes, outlining topographic and distance measuring equipment 03 p0475 A70-13831
 Bottom topography effect on jets stability in baroclinic fluid, discussing two layer model 04 p0715 A70-15518
 Martian topographical radar ranging data correlated with surface features, discussing deserts, canals and maria topography 05 p0909 A70-16388
 Earth model based on free air gravity anomaly with condensed topography for eliminating gravity reduction difficulties, noting use in Venen-Meinsz formula 05 p0840 A70-16640
 Automated techniques for topographic mapping, considering scales used 07 p1281 A70-19371
 Intercensus population estimate by air photos, topographic maps and local and state census of population and housing 10 p1878 A70-24737
 Topographic shadow linears image enhancement by low angle illumination, describing pseudoradar technique for subcontinental sized fracture systems detection 12 p2221 A70-26960
 Microtopography of fracture surfaces by stereo electron fractography, using large angle tilting of specimens 13 p2431 A70-28605
 Venus and Mercury surface height variations near equators, using radar time delay and Doppler observations 14 p2647 A70-31077
 Mars surface topography and roughness from radar measurements 14 p2648 A70-31081
 Gemini spacecraft photograph patterns revealing relationship between cloud formation and topography 18 p3258 A70-36298
 Fundamental equations of physical geodesy for earth figure by oceanic and continental parts via external gravity field 20 p3617 A70-39069
 Natural and cultural landscape pattern classification in aerial photointerpretation using land-system concept 21 p3826 A70-41401
 Internal and integral photointerpretation in aerial photography, discussing landscape information reliability increase by interdisciplinary method 21 p3826 A70-41403
 Pseudo three dimensional effect on monoscopic radar imagery for topographic relief differentiation, using offset superposition of transparencies 22 p4031 A70-42965
 Two dimensional stratified flow over extended obstacles with source disturbances, indicating topographical effect on vertical wind shear in troposphere 23 p4214 A70-44031
 Optimal timing for aerial photographic mapping of landscape types including tundra, forest, steppe, meadow, desert and mountain areas 24 p4328 A70-45196

TOPOLOGY
 NT FIXED POINTS [MATHEMATICS]
 NT HOMOTOPY THEORY
 NT IMBEDDINGS [MATHEMATICS]
 NT INVARIANT IMBEDDINGS
 NT METRIC SPACE
 Topological properties of plane flow in subsonic region behind smooth shock wave in uniform supersonic flow, discussing shock wave convexity 01 p0068 A70-11580

Topological analysis of lumped mechanical vibration systems using mathematical induction, considering linear graphs properties 04 p0773 A70-15077
 Stronger locally convex topology on space C/S/ of bounded continuous functions proved in nonagreement with strict topology on norm bounded sets 05 p0875 A70-16050
 Covering properties of topological space as function of set density 07 p1323 A70-18963
 Locally compact topologies on group G and corresponding continuous irreducible unitary representations, noting existence of subgroup 08 p1534 A70-21276
 Discontinuous weak solutions of differential equations of gas dynamics as limits in topology of functions 10 p1866 A70-24109
 Computerized data communication system /CDCS/ equipment unit capacities and topology specified with aid of vertex weighted linear graph 11 p2009 A70-26253
 Automatic input data generation for finite element method using algorithm based on complex geometrical configurations topological classification in terms of natural coordinates 11 p2144 A70-26678
 Topology and component values in computerized design of distributed lumped active networks 15 p2711 A70-32595
 Organic molecules topology, discussing Hamilton circuits, DENDROL applications, etc 16 p2855 A70-33298
 Eigenvalue problem in elasticity theory, treating nonlinear equations solutions multiplicity by topological methods 24 p4420 A70-45273

TORCHES
 Plasma torch for increasing material fusion temperatures in metallization methods 12 p2244 A70-28072
 Plasma arc welding torches nozzle dimensions and shape dependence on thermal and electrical characteristics, optimizing energy output 22 p4042 A70-42378

TORNADOES
 Tornado producing thunderstorms, using conventional surface and upper air data combined with ATS-III data, discussing mesoscale disturbances and momentum exchange 06 p1102 A70-18583
 DC-8 jet transport encounter with tornado aloft on 9 November 1963 06 p0987 A70-18586
 Velocity and pressure distributions of tornado-like two cell vortices within boundary layer, using different assumptions for eddy diffusion coefficient 14 p2604 A70-30547
 Tornadoic vortex motion equation derivation based on kinematical modification of Kelvin theorem 23 p4215 A70-44547

TOROIDAL DISCHARGE
 NT RING DISCHARGE
 Plasma electron temperature and density in Tokamak T3 toroidal discharge measured by Thomson scattering of laser light 02 p0346 A70-12199
 Toroidal solar field emergence to surface forming magnetic field of active region 13 p2493 A70-29392

TOROIDAL PLASMAS
 Tokamak-type magnetic configurations application to thermonuclear reactor, discussing equilibrium and stability parameters minimum values, operating pattern and heating method 02 p0349 A70-12756
 Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum 07 p1349 A70-19552
 Electron clouds injection and containment by magnetic field in toroidal vacuum chamber, studying causes of cloud instability 07 p1353 A70-19994
 Transverse particle and energy fluxes in toroidal magnetic traps magnetic fields with ionized plasmas, discussing particle diffusion coefficient and thermal conductivity 08 p1554 A70-21807
 Ionosphere effect on toroidal magnetodynamic waves in idealized representation, analyzing oscillations correlation between adjacent magnetospheric shells 10 p1875 A70-24444
 Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum 15 p2777 A70-31459
 Stochastic heating of plasma in toroidal trap/stellarator, showing discharge ignition potential dependence on microwave oscillator frequency 22 p4084 A70-43394
 Inertia effect on low density plasma losses in toroidal MHD equilibrium in model stellarator field 24 p4383 A70-45115

Stable ellipsoidal plasma configurations in alternating electrode annular system, considering longitudinal magnetic field strength, electrode voltage and gas discharge chamber pressure 24 p4385 A70-45456

TOROIDAL SHELLS
 Buckling of toroidal shells with reasonably uniform thickness distribution manufactured by casting epoxy resin material 04 p0779 A70-15615
 Toroidal metallic shells stability under static loads, determining snap-through pressures in pressure chamber with nitrogen working gas 08 p1588 A70-21195
 Thick-walled toroidal shell under various load distributions, analyzing stress-strain state by networks method using computer program 10 p1957 A70-24250
 Influence coefficients for toroidal shells under axisymmetric edge loads, taking one term in asymptotic expansion of Hankel function 11 p2132 A70-25693
 Elastic material filled cylindrical, segmented toroidal and conical shells thermal stability, allowing for stiffener eccentricity 13 p2516 A70-29523
 Influence function for thin toroidal shell under uniformly distributed axisymmetric load, determining stresses and displacements in various cross sections 15 p2817 A70-32163
 Elastic thin walled toroidal shell under internal pressure, investigating large deformation and stress behavior 17 p3184 A70-34910

TORIODS
 Transmitting-receiving latching ferrite switch with 180 degree differential phase shift toroids for temperature stability and receiver protection in case of driver failure 03 p0458 A70-14036
 Eckert shadow technique for radiation view factors applied to toroid inside shadow hemisphere 08 p1546 A70-21832
 Magnetic scalar potential of circular loop represented by toroidal coordinate system, solving boundary value problems determining fields of coils and toroidal magnetic conductors 18 p3215 A70-36295
 Force-reduced superconducting toroidal magnet coils built with Cu plated Nb-Zr wire, investigating current enhancement characteristics 23 p4230 A70-44356

TORPEDO ENGINES
 NT CONTROL ROCKETS
 NT ULLAGE ROCKET ENGINES
 NT VERNIER ENGINES

TORQUE
 Gyroscopic bearing cross-torque control techniques, noting ball-group misalignment coupling [ASME PAPER 69-LUB-17] 01 p0101 A70-10388
 Torque upper bounds in Couette flow between concentric rotating cylinders, considering dissipation integral and boundary and continuity conditions validity 03 p0468 A70-13787
 Torque and flow patterns in supercritical Taylor instability regime of circular Couette flow 03 p0470 A70-14235
 Monograph on shear lag measurement in rectangular section beam subjected to bending or torque free from axial restraint, using inductance probe sensors 03 p0603 A70-14351
 Solar wind-induced torque calculated considering special and general relativistic effects, extending method to pulsar rotational model 04 p0739 A70-14593
 Ball bearing performance prediction using analytical technique based on race profilometry data, considering torque variation [ASME PAPER 69-WA/LUB-4] 04 p0698 A70-14769
 Viscous frictional torque on inner cylinder of eccentrically rotating concentric cylinders measured from laminar to turbulent flow 06 p1074 A70-17134
 Pulsar slowdown by radiation field torques indicated by alignment torque in magnetized oblique sphere rotating in vacuum 07 p1389 A70-20220
 Boundary layer of MGD flow past axisymmetric insulator body analyzed to determine torque due to Hall effect 09 p1663 A70-23579
 Gyroscopic platform stabilizers /GPS/ dynamic properties improved by compensation of perturbing torques 12 p2237 A70-28155
 Constraint torque elimination from vector equations canonical system for attitude dynamics of satellite consisting of arbitrarily interconnected rigid bodies [AIAA PAPER 69-923] 18 p3316 A70-36679
 Instrument ball bearings running torque prediction at high speed under combined radial and axial loads [ASLE PREPRINT 70AM 3D-3] 19 p3438 A70-38803

Direction cosine attitude control logic for spin stabilized axisymmetric spacecraft, using control torques generated by reaction jet system 20 p3669 A70-39679

Interplanetary plasma torque due to temperature and pressure anisotropy, considering solar wind angular velocity and sun angular momentum 20 p3712 A70-40423

Aerodynamic and gravitational torque effects on orbiting satellites attitude stability, applying Liapunov direct method in case of conservative aerodynamic torque [AIAA PAPER 69-832] 23 p4258 A70-44559

ESRO 1 satellites attitude reconstruction, describing torque determination from known altitude 23 p4259 A70-44614

Aerodynamic forces and torque on airfoil in potential jet from boundary asymptotes position, determining flow characteristics by electrical analogy 24 p4288 A70-45348

TORQUE MEASURING APPARATUS

U TORQUEMETERS

TORQUE MOTORS

Torque motor driven despin bearing assembly design with integral slip ring for tactical communications satellite /TACOMSAT/ 16 p2986 A70-34160

TORQUEMETERS

Multiplying digital device for measuring motor speed, torque and power, discussing optional applications and design 02 p0297 A70-12076

Micromotor torsion moment-speed characteristic curve obtained by automatic recording apparatus 09 p1672 A70-22026

Magnetostrictive measurements of torque from high speed rotating shafts 17 p3093 A70-35501

TORQUERS

Satellite stabilization one-axis control system using earth magnetic torquer 13 p2500 A70-28405

TORSION

Lorentz invariance test using bar magnet on torsion fiber, analyzing preferred reference frame in space assuming earth velocity coupled to electron spin through specific term 02 p0341 A70-12849

Rectangular anisotropic beam torsion using Green function combined with wide step network method 03 p0593 A70-13471

Apparatus for small specimen torsion tests at room temperature, describing machine capabilities 03 p0493 A70-13960

Axial compression effect on low cycle fatigue of thin walled metal tubes in torsion [ASME PAPER 69-MET-H] 04 p0705 A70-14880

Elastic-plastic torsion of convex cylindrical bars 06 p1165 A70-17534

Dynamic torsion of anisotropic circular cantilever beams and small pitch diameter springs under linear time dependent moment calculated by Saint Venant method 06 p1037 A70-17862

Boundary value problem of torsion for equilibrium of elastic body based on moment theory in absence of bulk forces 09 p1782 A70-23381

Truncated conical shell buckling under axial compression using method for torsion buckling, correlating to equivalent cylindrical shells 11 p2135 A70-25980

Spanwise distribution of aerodynamic torsion on sailplane wings in vertical dive, discussing wing twist and lift effects 12 p2156 A70-27721

Tensor and torsion functions on Abelian semigroups 13 p2440 A70-29076

Torsion of variable diameter rods based on moment theory of elasticity, solving integral equations system 13 p2517 A70-29774

Dynamic asymmetric elasticity problems, considering longitudinal and torsional wave propagation in bounded and unbounded micropolar media 15 p2818 A70-32178

Shear stress distribution in axially nonuniform circular shaft subjected to torsion, using finite difference approximations 16 p2988 A70-33001

Thin concentric circular cylindrical shells joined at ends by rigid diaphragms, describing free and forced torsional motion 16 p2992 A70-34019

Polycarbonate thin walled cylindrical shells mechanical and material stability under torsion 17 p3127 A70-34656

German monograph on form factors and torsion at shafts with longitudinal keyways under pure torsion 17 p3189 A70-35374

Second order incompressible elastic torsion problems reduction to two dimensional classical linear elasticity problem without body force 17 p3189 A70-35434

Open and multiply connected closed sections of varying thicknesses, solving for unrestrained torsion 19 p3545 A70-38339

Shearing strain in oriented fiberglass reinforced plastics under torsion, obtaining creep curves 20 p3655 A70-39768

Torsion of composite rectangular cross section beam consisting of isotropic media, using Green function and Fourier expansion 20 p3732 A70-40334

Rigid cylinder rotation and flexible shaft torsion observation by holographic interferometry 21 p3822 A70-40813

Tension-torsion machine developed from aircraft carrier catapult principle, producing radial loading paths 22 p4117 A70-43453

Torsion in rods with rectangular and trapezoidal cross sections, using functional-analytic iterative method 23 p4268 A70-44241

Inverted torsion pendulum performance improvement, describing dashpot to dampen lateral vibrations 23 p4202 A70-44950

Rumanian book on torsion in thin walled elastic structures of various cross sections covering calculation methods for box beams, cylindrical and conical shells, aircraft wings, etc 24 p4418 A70-45147

Elastic-viscoplastic bar quasi-static torsion problem, using approximate method for time dependent torsion function 24 p4425 A70-45993

TORSIONAL STRESS

Stress-strain effect on dislocation densities of cylindrical Mg single crystals deformed by torsion basal slip compared to tension test 01 p0122 A70-11236

Elastoplastic stress concentrations calculations in notched strips and shafts under tension, bending and torsion, using approximate method 01 p0211 A70-11425

Stress distribution of thin walled structure of open section, considering warping and torsional bending, using calculus of variations 03 p0596 A70-14030

Singular integral equation applied to elasticity theory of composite beam with or without cavity under torsion 04 p0000 A70-14416

Saint Venant torsion problem using finite element method, establishing direct matrix relation between forces and displacements 04 p0778 A70-15527

Shear testing and data reduction based on torsion analysis to obtain elastic shear constants of thin orthotropic Be sheets 04 p0664 A70-15552

Torsion testing apparatus for refractory materials at 2400 C, measuring applied torsion moment, twisting angle and second order modulus of elasticity 05 p0825 A70-15881

Torsion tests on cylindrical plastic metals, considering shear stresses calculation as function of torsion angle and changes determination as function of increasing cold work 05 p0927 A70-15996

Stability of clamped, hinged and elastically supported circular cylindrical shells under critical combined torsional and transverse pressure 05 p0934 A70-16227

Cryogenic temperature effect on short life torsional fatigue properties of Ni-Cr-Mo steel, discussing cyclic strain range effects 05 p0864 A70-16807

Normalized steel low cycle fatigue strength under bending and torsional rotation, testing linear damage accumulation theory 06 p1163 A70-17404

Axially uniform stress and strain in cylindrical shells, discussing Saint Venant torsion and displacement relations 07 p1405 A70-19255

Torsion of elastic half space containing circular crack with symmetry axis coinciding with annular stamp rigidly coupled to half space 07 p1414 A70-20183

Elastoplastic torsion of combined prismatic bars with transverse distribution of constant properties solved by computer 07 p1415 A70-20189

Metal adhesive joints strength under tensile and torsional stresses, considering effects of dimensions, metal type and surface finishing 08 p1504 A70-20886

Curved thin rods torsional and flexural waves propagation equations, considering geometry and shear and Young moduli 08 p1588 A70-21201

Prismatic thin walled shells with box type cross section under torsion using Vlasov variational method in conjunction with transfer matrices 08 p1589 A70-21248

Elastic/perfectly plastic hollow cylinder unloading under monotonic twist during torsion, considering sandhill-membrane analog validity 08 p1589 A70-21249

Constant cross section beam bending and torsion with allowance for moment stresses, deriving differential equations for displacement functions 09 p1773 A70-22538

Beams torsion problems solution by variational method of variables separation, obtaining values for torsional rigidity and stress function 09 p1773 A70-22547

Unsteady creep of thin walled open section bars under free torsion using successive approximations 09 p1779 A70-23101

Cylindrical shell critical load boundaries under uniform external stress and small torsion 09 p1783 A70-23389

Cylindrical shell stability under combined torsion and internal pressure, noting yield point effect on critical load, obtaining buckling-internal pressure relationship 09 p1786 A70-23722

Flexural rigidity of thin walled beams, analyzing relationship between loads and displacements taking into account Saint Venant torsional resistance 10 p1955 A70-24052

Eccentrically stiffened thin circular cylindrical shell stability under torsion emphasizing exact finite formulas derivation 11 p2129 A70-25561

Stress relaxation in combined torsion-tension, developing expressions for torque and axial force 11 p2140 A70-26482

Semiinfinite composite medium displacement caused by nucleus of torsional strain with axis perpendicular to constituent isotropic layers interfaces 12 p2321 A70-27159

Circular cylinders torsion and plain strain analysis, completing statics by axisymmetric shear and moment stresses according to Cosserat theory for plastic flow 13 p2508 A70-28492

Book on torsion emphasizing beam stressed state calculation and civil engineering problems 13 p2512 A70-28850

Stress distribution in spirally corrugated shell under torsional deformation, calculating twisting moment for stiffness 14 p2661 A70-31327

Elastoplastic torsion problems solution by strain theory of plasticity, describing torsion function in hypergeometric series form 14 p2661 A70-31329

Elastic two cavity hyperboloid of revolution under stress due to rotating rigid stamp, solving torsional problem numerically 15 p2819 A70-32189

Stress concentration around small elastic spherical inhomogeneous inclusion on circular cylinder in torsion 17 p3183 A70-34631

Axisymmetric torsion by terminal loads of elastic shells of revolution, investigating energy inequalities for assessing quality of approximate solution of thin shell problem 18 p3335 A70-36058

Structure of flexural members, analyzing torsional and lateral stability by finite element method and matrix formulation 18 p3339 A70-36494

Optimal distribution of plastic inhomogeneity of torsioned prismatic square bars under maximum loading 18 p3343 A70-36719

Singular integral equation formulation for torsion from membrane analogy, obtaining boundary value problem solution by computer program 20 p3718 A70-39000

Thin walled fiberglass-reinforced plastic cylinders in torsion, calculating load carrying capacity as function of temperature 21 p3841 A70-40648

Stresses around circular hole in shallow conical shell under torsional load, using perturbations in parameters for curvature and cone angle 21 p3934 A70-40779

TORSIONAL VIBRATION

Torsional vibration of thin beam of varying cross section, noting moment of inertia and torsional rigidity proportionality 01 p0200 A70-10525

Transversely isotropic circular cylinder acted upon by transient shearing force at one end, noting forced torsional oscillation using cylindrical coordinates 01 p0200 A70-10550

Thin shells of revolution torsional vibration including bending terms and thickness considerations 01 p0205 A70-11142

Unidirectional carbon and glass fiber reinforced polyester resins dynamic characteristics under torsional and flexural vibration, showing damping independence of cyclic stress amplitude 03 p0514 A70-13111

Stress cycle asymmetry effects on energy dissipation in rods under torsional vibration 03 p0588 A70-13249

Finite difference method applied to solving equations of motion for computing natural torsional vibration frequencies of pretwisted cantilever beams

03 p0595 A70-13811

Upper and lower bounds for eigenvalues of lumped parameter straight line torsional system determined by receptance synthesis based on Holzer method

04 p0773 A70-15083

Inertial damping of soft rubber under forced torsional vibrations, discussing viscoelastic body linear model

04 p0712 A70-15100

Forced torsional vibration of elastic stratum produced by rigid circular disk approximated by Fredholm equations

04 p0777 A70-15497

Torsional vibrations of four cell tube, deriving cross sectional constants and natural frequencies

05 p0936 A70-16321

Convergence of eigenvalues and eigenvectors in torsional vibration problems of continuous systems via improved matrix displacement analysis using points of freedom in segments

05 p0939 A70-16502

Energy dissipation during torsional and flexural vibrations of steel and duralumin specimens subjected to plastic deformation, accounting for discrepancies due to methodical errors

06 p1166 A70-17658

Torsional vibrations of nonhomogeneous anisotropic finite circular tube, computing natural frequencies for various parameters

07 p1414 A70-20173

Rotating rotor with mass distributed along shaft analyzed for nonlinear flexural and torsional vibrations, determining dynamic instability ranges

08 p1584 A70-20694

Torsional vibrations frequency calculations for multibranch system exhibiting linear rigidity and viscous damping, constructing algorithm for digital computer

09 p1783 A70-23409

Dynamic shear modulus and depth of dominant layer of vibrating elastic medium, assuming foundation as isotropic stratum on rigid bed

10 p1957 A70-24481

Torsional vibration of rotating tapered and twisted turbomachine blade, constructing digital computer program for convergence and boundary conditions [SAE PAPER 700180]

11 p1218 A70-25373

Torsional vibration effect on gyrocompass with torsion suspension from studying sensing element forced motion, determining dynamic equilibrium position of sensor

11 p2048 A70-25578

Blade torsional degree of freedom effects on stability and flapping response of rotors operating at high advance ratios

13 p2507 A70-28444

Energy dissipation during independent flexural-torsional vibrations of rods, noting alternating shear stress superposition effect on damping

15 p2813 A70-31530

Torsional vibrations amplitude effect on polycrystalline Al stress-strain curve during uniaxial tensile test

15 p2758 A70-32125

Discrete mechanical models of single speed gears in torsional vibrations without teeth deformation and damping resistance

16 p2995 A70-34288

Mechanical models of single speed gears for torsional vibrations, taking into account nodes of first free vibration mode

16 p2995 A70-34289

Cross section deformation effect on helicopter rotor blade torsional vibration, using differential equations of vibrating beam

18 p3334 A70-35959

Kinetic instability of elastic cantilever beam under excitation by rotating masses, relating bending and torsional vibrations to masses angular velocity

18 p3334 A70-35960

Torsional vibration of thin beam with varying cross section, formulating fundamental equation and boundary conditions

18 p3339 A70-36519

Torsional and longitudinal vibrations of circular cylinders of micropolar elastic solids in terms of Laplace and Helmholtz equations solutions

19 p3537 A70-37789

Forced torsional vibrations of thin elastic spherical and hemispherical shells with free or restrained edge, using Gegenbauer transform

19 p3541 A70-38037

Stress cycle asymmetry effects on energy dissipation in rods under torsional vibration

19 p3548 A70-38467

Pretwisted slender beam coupled torsional and longitudinal vibrations under centrifugal force field, obtaining resonant frequency by Rayleigh Quotient method

20 p3719 A70-39601

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

20 p3720 A70-39676

Low aspect ratio cantilever plate wings supersonic bending torsion flutter speed calculation, using spanwise and chordwise variables and potential energy principle

22 p4112 A70-42276

TORSO

Nonlinear wave equations model for human torso under impulsive stress, obtaining asymptotic solution

16 p2854 A70-34247

Digital computer model of total body ECG surface maps, simulating male torso with lungs

20 p3578 A70-39369

TORUSES

Torospherical heads attached to cylinders and under internal pressure as elastic and/or elastic-plastic shells, using finite element

[ASME PAPER 69-WA/PVP-7] 04 p0769 A70-14792

Torospherical heads design pressures compared from results of elastic-plastic and elastic-stress analyses to examine use of limiting stress criteria

05 p0944 A70-16816

TOUCH

NT TACTILE DISCRIMINATION

Threshold excitation of cutaneous analyzer in man under vascular conditioned reflexes in response to acoustic signals with shock

12 p2173 A70-28353

TOUGHNESS

NT NOTCH SENSITIVITY

Plastic strain state effect on ductility and toughness of structural steels

13 p2432 A70-28675

Impact transition behavior and strength-toughness relation of high purity Ni maraging steels, noting intergranular fracture at grain boundaries

18 p3273 A70-36043

Cycloaliphatic epoxy resins toughness improvement by modification with elastomers, maintaining high heat distortion temperature

21 p3842 A70-40733

TOWED BODIES

Motion equations and dynamic lateral stability of towed glider in steady horizontal flight treated by small perturbations method, including design and handling influence

09 p1611 A70-23063

Free flight wind tunnel test for feasibility of hypersonic drogue deployment into reentry vehicle wake [AIAA PAPER 70-587]

17 p3060 A70-35195

TOWED TARGETS

U TARGETS

U TOWED BODIES

TOWERS

Tower influence of wind speed and direction measurements, comparing 150 meter meteorological tower and scale wind tunnel model

09 p1661 A70-22964

TOWING

Hydrostatic synchronized steering of tow tractor for Boeing 747 and wide body jets compared to mechanical system

05 p0829 A70-16421

TOWNSEND DISCHARGE

NT GAS DISCHARGES

NT RING DISCHARGE

NT TOROIDAL DISCHARGE

TOXIC DISEASES

NT CARBON MONOXIDE POISONING

Acute gasoline poisoning toxicology and prophylaxis, manner of ingestion and effects on organs and systems

08 p1451 A70-20976

TOXIC HAZARDS

Time of useful function /TUF/ determination for human exposure to toxic gas combinations due to fire

06 p1000 A70-17294

Titan 3C launch environmental hazards including noise and exhaust cloud content

07 p1393 A70-19225

Air sample removal from hermetically sealed cavities during studies of toxic gas emanations from polymeric materials

07 p1221 A70-19516

Portable unit for collection and analysis of toxic gas contaminants in enclosed aircraft and spacecraft cabin atmospheres

07 p1224 A70-20222

Fluorine toxicity, discussing fluorine reactions with animal proteins and lipids, short-term exposure toxicity data, emergency tolerance limits, threshold limit, etc

10 p1824 A70-24060

Air sample removal from hermetically sealed cavities during studies of toxic gas emanations from polymeric materials

11 p1991 A70-26115

Toxic fuel test site selection, evaluating meteorological factors in Gypsum Canyon, California

14 p2563 A70-30613

TOXICITY

NT CARBON MONOXIDE POISONING

Oral potassium chloride usefulness and toxicity in EKG nonspecific T wave abnormality evaluation

01 p0014 A70-10274

Fire extinguisher compounds /bromochloromethane and bromotrifluoromethane/ pyrolysis products inhalation toxicities for rats

07 p1219 A70-19223

Aerazine-50 toxicity therapeutic treatment by pyridoxine and phenobarbital resulting in 100 percent survival of mice

07 p1222 A70-19926

Mild temperature and dehydration effects on toxicity of caffeine and dextroamphetamine in mice

09 p1616 A70-22329

Teflon and fluropolymers relative toxicity due to thermal degradation at 370 C, testing carboxy nitroso rubber, Kapton polyimide film, perfluorated polymers, etc

13 p2439 A70-29260

Monomethylhydrazine /MMH/ missile propellant toxicity, describing symptoms and effects on blood and intellectual capacity

24 p4306 A70-45125

TOXICITY AND SAFETY HAZARD

Laser eye and skin hazard evaluation from viewpoints of threshold effect levels and worst case assumptions

07 p1219 A70-19224

Fluorine toxicity, discussing fluorine reactions with animal proteins and lipids, short-term exposure toxicity data, emergency tolerance limits, threshold limit, etc

10 p1824 A70-24060

Protective clothing for personnel handling toxic and corrosive liquid propellants in hot climatic conditions at Guyana Space Center

12 p2179 A70-28043

Behavioral changes due to repeated low doses of rocket fuel monomethylhydrazine

21 p3771 A70-41485

TOXICOLOGY

Nomograms for correlation of dose to methemoglobinemia or plasma monomethylhydrazine /MMH/ concentration observed on dogs, considering human skin contact evaluation

06 p0992 A70-17298

Volatile toxic products outgassed by polymer construction materials, discussing physico-chemical classification of outgassing reduction methods

09 p1709 A70-22085

Soviet monograph on toxicology of active human life gaseous products, noting implications for artificial atmosphere formation in pressurized compartments

09 p1624 A70-22549

Volatile toxic products outgassed by polymer construction materials, discussing physico-chemical classification of outgassing reduction methods

15 p2766 A70-32681

General aviation aircraft accident investigation toxicological findings, describing methods of examination for drugs and toxic agents

17 p3033 A70-35569

Toxicity problems from burning or heating of polymeric materials, discussing laboratory experiments and standardized toxicity testing procedures

20 p3579 A70-39406

TOXINS AND ANTITOXINS

Tetradotoxin /TTX/ effects on mammalian brain studied by introducing TTX into cat lateral geniculate body /LGB/, causing flash evoked potentials and visual cortex decrease

05 p0799 A70-16049

Anticerebral cytotoxic serum effect on white rats conditioned reflex activity

07 p1199 A70-18727

Aerazine-50 toxicity therapeutic treatment by pyridoxine and phenobarbital resulting in 100 percent survival of mice

07 p1222 A70-19926

TRACE CONTAMINANTS

Breakthrough curve shape prediction during adsorption from gas stream in fixed bed adsorbers for trace contaminant control applied to activated charcoal

04 p0786 A70-15317

Combining color response in cholesteric liquid crystals generated by trace contaminants applicable to detection of vapors trace amounts

07 p1222 A70-19930

Trace constituent changes effects on stratospheric properties after volcanic eruption, showing prolonged atmospheric temperature increase

20 p3622 A70-39490

Trace contaminants associated with habitation by man in space cabin simulator by gas chromatography and IR and mass spectroscopy

21 p3770 A70-41482

TRACE ELEMENTS

Stony meteorite trace elements groups neutron activation analysis with computer reduction of Ge/Li spectra

02 p0249 A70-11680

Major and trace element concentration in contact zones of Precambrian diabase dikes from Wyoming ranges, showing dikes as continental tholeiites

03 p0472 A70-13148

- Downstream distribution of trace element injected into boundary layer of flat plate or cone with self similar mass transfer
[SAMSO-TR-69-56] 07 p1256 A70-19313
- Short lived cosmic ray produced nuclides as lower atmospheric motion tracers, studying Na 24 characteristics and activity in rain water 07 p1373 A70-20355
- Holbrook chondrite specimen, discussing effects of weathering, leaching and trace elements enrichment over period of time before recovery 13 p2487 A70-28698
- Troposphere and lower stratosphere trace element concentration measurements, establishing origin, history and movement of various air masses 15 p2728 A70-31996
- Chondrites and terrestrial rocks trace elements by neutron activation analysis, discussing radiochemical separation and computer analysis of gamma ray spectra 20 p3582 A70-38980
- Trace elements in Apollo 11 lunar glass clinopyroxene, plagioclase and ilmenite, using ion microprobe mass analyzer 21 p3896 A70-41510
- Type 1 carbonaceous chondrites contribution to lunar soil, comparing mineralogical and trace element evidence 21 p3899 A70-41533
- Apollo 11 lunar rock trace elements, examining basalt, gabbroic igneous rocks, breccias and fines by DC arc emission spectroscopy 21 p3774 A70-41561
- Apollo 11 lunar material trace elements, examining chemical processes during and after formation and meteoritic matter influx rate 21 p3907 A70-41572
- Rare earth and trace element abundances for Apollo 11 lunar samples by neutron activation, comparing with Bruderheim chondrite and submarine basalts 21 p3907 A70-41578
- Trace elements K, Rb, Sr and Ba distributions and Rb-Sr isotopic relations in Apollo 11 lunar breccia and fine soil samples 21 p3909 A70-41594
- Halogens, mercury, lithium and osmium concentration measurements in Apollo 11 samples, using neutron and photon activation 21 p3777 A70-41601
- Apollo 11 fines and rocks major and trace elements data obtained by combined instrumental and neutron activation analysis 21 p3910 A70-41615
- Sequential instrumental activation analysis for trace elements in rocks and stony meteorites, comparing with silicate method 24 p4310 A70-46407
- TRACERS**
- Missile tracer mixture performance control facility noting chamber for pressure measurement during operation 03 p0544 A70-13758
- Continuous generation of gas trace component quantities into carrier gas flow using dosage device 09 p1672 A70-22028
- TRACHEA**
- Human lung and upper airway pressure drop and fluid flow regime of inspired air 12 p2170 A70-27660
- Surface active lipoproteids of lung, discussing quantitative determination and labeling on basis of peribronchial wash-out procedure over trachea 15 p2680 A70-31725
- TRACING**
- Delayed trace reaction under stable and unstable pauses in apes and monkeys, noting independence of conditioned reflex 08 p1446 A70-21446
- Calcium ion role in myocardial cell electrical and mechanical trace processes under normal content and manganese blocking 18 p3221 A70-36640

- Satellite optical tracking data in space geodesy, determining stations position from minimum number of stations and observations with time errors 03 p0446 A70-13195
- German satellite ground station system central station design, discussing cooperation between aerospace institute and electronic company 08 p1481 A70-21368
- Tracking of goal seeking attack vehicles, discussing error improvement and destination estimating by tracking station observer 11 p2080 A70-26243

Tactical air defense multiple site tracking data correlation equation to select gate sizes

11 p2009 A70-26263

Report to COSPAR on Australian space research /1969/ including tracking stations, sounding rockets, technology utilization, etc

15 p2829 A70-31706

SIRIO mission algorithm and computer program, determining spacecraft position, ground trace and tracking station visibility

15 p2811 A70-32286

Earth-satellite range measurements using broadband pseudonoise modulation and delay lock tracking method

15 p2705 A70-32724

Automatic meteor station jamming protection using ferrite diode logical elements

19 p3422 A70-37652

Optimal reception points for radar ranging measurement of angular coordinates of meteor trails, using central transmitter

19 p3515 A70-37665

GEOS 1 satellite short arc optical observations over North American network to improve survey coordinates of tracking stations

24 p4312 A70-45542

TRACKING STUDIES

U TRACKING (POSITION)

TRACKS

Angular contact bearing balls track position on aero gas turbine engines shaft measurement in test rig at high speeds

20 p3638 A70-40141

TRACTION

Reduced traction effects on human work performance in weightless and lunar gravity environment

01 p0037 A70-10959

Tractive behavior in elasto-hydrodynamic lubrication contact noting role of surface degradation layer

05 p0854 A70-15888

Displacements and stresses obtained for elastic half plane with variable Poisson ratio under certain traction boundary conditions, using Fourier transform method

05 p0940 A70-16512

Dynamic response of joined elastic quarter spaces of solids to time varying free surface shear tractions parallel to plane of juncture

[ASME PAPER 69-APMW-16]

08 p1591 A70-21467

Frictional traction-sliding speed relation in elasto-hydrodynamic lubrication in Barlow-Lamb model of viscoelastic liquid, discussing oscillatory and continuous shear

09 p1691 A70-22600

Optimal traction drive system design for lunar roving vehicle, considering weight, energy consumption, operational flexibility, power supply, motor and power train

[SAE PAPER 700023]

11 p2030 A70-25375

Mathematical theory of constitutive relations connecting surface tractions and moments with motion of single body in continuum

20 p3672 A70-39495

Notch stress intensity factor representation as boundary traction weighted average, deriving weight functions from stress field boundary displacements

23 p4266 A70-44021

TRACTORS

Hydrostatic synchronized steering of tow tractor for Boeing 747 and wide body jets compared to mechanical system

05 p0829 A70-16421

TRACTS

U SITES

TRADEOFFS

Cost effectiveness tradeoff analysis for reliability incentive contracts, evaluating customer requirements for military procurement

01 p0220 A70-10115

Cost tradeoff analysis of electronic equipment for systems reliability design, considering component derating, redundancy and selection

01 p0049 A70-10119

Tradeoff decision processes scheduling maintenance frequencies for commercial transport aircraft [SAE PAPER 700328]

12 p2243 A70-27461

Computer program /SORCBE/ for systems unavailability tradeoff vs added cost for various versions

15 p2706 A70-32658

Pulse compression for geodesy satellite radar altimeter, considering tradeoff based on system accuracy, power and life

16 p2911 A70-33715

Configurational and operational characteristics for space shuttle design, considering economic tradeoffs between expendable and reusable systems

[AIAA PAPER 70-045]

17 p3175 A70-34783

Air superiority fighter design philosophy, including tradeoffs between armament, detection capability, thrust, speed and load factor

[AIAA PAPER 70-930]

17 p3021 A70-35840

Measuring and test equipment economic approach to quality levels and accuracy ratios, deriving cost tradeoffs in optimum inspection fidelity

20 p3634 A70-40453

TRAFFIC

NT AIR TRAFFIC

TRAFFIC CONTROL

NT AIR TRAFFIC CONTROL

NT RADAR APPROACH CONTROL

TV raster scan display using CRT and beam steering scan systems, comparing alphanumeric capability for airport information and control problems

02 p0274 A70-11976

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 2, Transport systems and vehicle control

02 p0334 A70-12130

Operational requirements of shipping for satellite communication systems, discussing distress cases, satellite navigation systems, information distribution traffic control, etc

03 p0522 A70-13605

Message traffic problems in satellite telephone network, considering traffic distribution characteristics, interarrival mean time, bidirectional traffic, etc

10 p1839 A70-24367

Space traffic control, discussing special problems of synchronous orbiting communications satellites

13 p2449 A70-29268

Global digital navigation and traffic control system via satellites, discussing position determination, surveillance and communication requirements

21 p3848 A70-41133

TRAILING EDGES

Wing design optimization for steady and unsteady supersonic flow through computerized simulation and study of leading and trailing edge shape

02 p0223 A70-12208

Trailing edge flow of slender aerodynamic shapes terminating in cusp or wedge, analyzing boundary layer reactions

04 p0613 A70-14457

Model flow studied for viscous flow near trailing edge of semiinfinite flat plate in middle of moving channel, noting Couette flow tendencies

05 p0831 A70-15879

Stability theory for pair of trailing vortices, investigating induced field convection, modes, amplification, cut-off distance, etc

[AIAA PAPER 70-53]

06 p0969 A70-18055

Unsteady airfoil stall in incompressible flow, including pitch rate induced accelerated flow effect on leading edge and trailing edge stall

[AIAA PAPER 70-77]

06 p0976 A70-18237

Trailing edge region of flat plate in laminar incompressible flow examined for high Reynolds numbers limit using Navier-Stokes reduced equations

07 p1255 A70-19213

Boundary layer flow near flat plate trailing edge taking into account pressure gradient induced locally in external flow

10 p1862 A70-23846

Skin friction near flat plate trailing edge at high Reynolds number by linearizing velocity profile

10 p1801 A70-24159

Turbulent trailing vortex decay calculated from circumferential velocity and eddy viscosity dependent on Reynolds number

10 p1802 A70-24561

Three dimensional turbulent boundary layer development on rear of swept wing, comparing measurements with calculations

13 p2344 A70-30021

Deformable and rigid wings aerodynamic characteristics with subsonic leading and trailing edges, calculating action of gust

15 p2671 A70-31486

Airfoil trailing edge stall in laminar flow, investigating circulation around flat plate

18 p3205 A70-36194

Wake behind trailing edge of flat plate in constant velocity impulsively started stream, using boundary layer theory

18 p3206 A70-36196

Pulling force during motion of sinusoidally deformable flat profile, taking into account trailing edge vortices

18 p3241 A70-36280

Supersonic turbine blade rows design, discussing boundary layer interaction around leading edges and flow around trailing edges

19 p3490 A70-38223

Flow field model for large surface blowing problem accounting for upstream and downstream effects with large rate normal injection near trailing edge

20 p3559 A70-40110

Heat transfer at air cooled gas turbine blade trailing edges at various wall temperatures and Reynolds numbers

23 p4283 A70-44737

TRAILING-EDGE FLAPS

Wind tunnel comparative performance tests of glider laminar wing profile with fixed and flexible trailing-edge flap

02 p0304 A70-12800

Sailplane design standards concerning retractable undercarriage and trailing-edge flaps revised to achieve better performance

09 p1612 A70-23575

Axial flow compressor off-design performance optimization by adjustable inlet guide vanes with variable trailing edge flaps

18 p3304 A70-36846

TRAILS

U TRACKS

TRAINERS

U TRAINING DEVICES

TRAINING

U EDUCATION

TRAINING AIRCRAFT

NT JAGUAR AIRCRAFT

NT T-33 AIRCRAFT

Human functional changes in controlling C-8 trainer measured by flicker value, pulse rate, reaction time and instrument and control error before and after flight

04 p0643 A70-14976

Jet pilot trainee qualification requirements, training process methods and equipment, considering German-French joint trainer aircraft program

08 p1452 A70-21348

Harrier V/STOL trainer aircraft design features including fuselage, cockpit, power plant, etc

13 p2345 A70-28923

German-French jet aircraft trainers, discussing Alpha Jet TA 501, E 650 Eurotrainer and VF T 291 flight characteristics

13 p2347 A70-29052

Variable stability trainer modification of F-106 to reproduce flight characteristics of aircraft for pilot training in potentially dangerous situations

16 p2842 A70-33815

TRAINING DEVICES

NT TEACHING MACHINES

Student development and exercising of electron physics principles by designing, assembling, operating and studying electron and ion devices

01 p0093 A70-11291

Subjects trained in visual monitoring task with auto-instructional device, showing higher signal detection rate than group trained by practice alone

02 p0247 A70-12380

Adaptive training concepts, methods, implementation and comparison of characteristics with fixed trainers

05 p0805 A70-16004

Time constant of man machine system as adaptive variable in training devices derived from combined vehicle properties and human control characteristics

05 p0805 A70-16005

Direct broadcast voice satellite for educational system improvement, discussing lesson formatting, ground receiver/programmer, multichannel capacity, etc

[AIAA PAPER 70-449]

11 p1998 A70-25423

Training algorithms in designing multilevel quasi-optimal controllers for dynamic processes, using pattern recognition methods

13 p2383 A70-29581

TRAINING SIMULATORS

NT COCKPIT SIMULATORS

NT FLIGHT SIMULATORS

NT SPACECRAFT CABIN SIMULATORS

Flight training simulators recording, playback, demonstration and instructor facilities and six degrees of freedom motion system

02 p0273 A70-11840

Trainers and simulators based on digital computers, eliminating system sensitivity to ambient conditions, power fluctuations, circuit imperfections and digital to analog conversion

02 p0274 A70-11841

Digital real time simulation for training and evaluating ATC controllers, discussing system hardware, software, design and implementation

02 p0274 A70-11977

Adaptive man machine system for automated training of pilot dynamic control skills /decision and motion/, describing synthesis procedure

02 p0246 A70-12148

Visual, motion and auditory stimuli role in enhancing aircraft pilot training simulators realism, considering motion perception research

[ASME PAPER 69-WA/BHF-9]

04 p0642 A70-14853

Flight simulators for pilot training, discussing need for aircraft motion cues

09 p1655 A70-22296

French airline pilots training program at Montpellier and St-Yan, considering selection, licensing and simulators

16 p2853 A70-33675

Lunar and earth surfaces imaging for astronaut training in LEM simulator

20 p3607 A70-40320

Water immersion facility training for extravehicular activities and man physical movements in spacecraft, utilizing buoyancy-gravitation balance

21 p3804 A70-41191

Partial gravity simulators at Manned Spacecraft Center for astronaut acquaintance with dynamics of moon walking

21 p3804 A70-41192

Translation and docking simulator for Gemini support modified for Apollo LM active lunar orbital docking with CSM

21 p3804 A70-41194

Training simulation improving ejection decision making in naval aviation

23 p4178 A70-44467

TRAJECTORIES

NT ABORT TRAJECTORIES
NT ASCENT TRAJECTORIES
NT BALLISTIC TRAJECTORIES
NT CIRCULUNAR TRAJECTORIES
NT DESCENT TRAJECTORIES
NT EARTH-MARS TRAJECTORIES
NT EARTH-MOON TRAJECTORIES
NT ELECTRON TRAJECTORIES
NT HYPERBOLIC TRAJECTORIES
NT INTERPLANETARY TRAJECTORIES
NT LUNAR TRAJECTORIES
NT MIDCOURSE TRAJECTORIES
NT MISSILE TRAJECTORIES
NT MOLECULAR TRAJECTORIES
NT MOON-EARTH TRAJECTORIES
NT PARTICLE TRAJECTORIES
NT REENTRY TRAJECTORIES
NT RENDEZVOUS TRAJECTORIES
NT ROUND TRIP TRAJECTORIES
NT SPACECRAFT TRAJECTORIES

Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite

01 p0197 A70-11500

Solar U-burst radiospectrographic observations, investigating disturbing trajectories and longitudinal distribution in combination with model coronal condensation

09 p1758 A70-22737

TRAJECTORY ANALYSIS

Mathematical pendulum oscillations under clockwise and counterclockwise impact impulse, deriving differential equations describing trajectories

01 p0141 A70-10153

Oblate earth gravitational field effect on ballistic missile trajectories, including body range determination and quadratures expressed by elementary functions

01 p0178 A70-10423

Particle trajectory and associated wave determined for nonclassical trajectory problem from nonprobabilistic point of view, discussing discontinuity arising from unbounded velocities

01 p0142 A70-10657

Reentry trajectories from lunar surface and orbit obtained by computer with allowance for initial data spread

01 p0191 A70-11476

Spacecraft trajectory optimal determination without knowing measurements error distribution function, examining computer solution properties of linear programming

01 p0192 A70-11477

Optimal moments for trajectory parameters measurements determined by linear analysis to minimize error for initial conditions

01 p0094 A70-11478

Minimum time turns for spacecraft about fixed axis lying beyond plane of vehicle forces

01 p0197 A70-11480

Thunderstorm downdraft trajectories and temperatures, discussing evaluation of cooling due to evaporation

02 p0325 A70-12256

Load and strain trajectory vectors components determined for tension followed by transverse compression in five dimensional space

02 p0390 A70-12803

Soviet book on flight vehicle trajectories covering equations of motion, flight mechanics, reference systems, etc, for rockets and spacecraft

03 p0410 A70-12871

Galaxy model formulated in cylindrical coordinate system using Fokker-Planck equation for cosmic radiation particles propagation, discussing trajectories of high energy particles

03 p0553 A70-12880

Position bound determination for objects ejected from space vehicle relative to vehicle trajectory position

03 p0562 A70-12932

Optimal control of continuous and discrete observations described by linear differential and recurrent algebraic equations in presence of random perturbations

03 p0447 A70-13341

Earth-moon-earth flight characteristics, discussing spacecraft trajectory, velocity and corrections for close distance placement and return for soft landing

03 p0569 A70-13483

Osculating transfers between two prescribed trajectories without considering optimization problem, obtaining in-space launching point of artificial cosmic bodies

03 p0575 A70-13972

Interplanetary trajectory selection, discussing transfer orbits, energy considerations, launch window

computation, hyperbolic encounters and capture maneuvers

03 p0577 A70-14149

Patch-conic method accuracy and limitations in determining space trajectories as function of planetary zones of influence

04 p0750 A70-14941

Controlled vehicle disturbed trajectory multiple correction, considering constrained control or limited accessible coordinates for observations

04 p0716 A70-15007

Spacecraft design, trajectory and mission analyses for multipurpose solar electric propulsion missions, emphasizing modular ion engine and fixed attitude spacecraft designs

[AIAA PAPER 69-252] 04 p0763 A70-15412

Approximate time solutions to light aircraft projectiles velocity, altitude angles, gravity drop and downrange, reducing differential equations of motion to dimensionless forms

04 p0764 A70-15592

Criteria for particle motion with constant acceleration in curved space-time

06 p1104 A70-17186

Satellites and space probes orbital parameters calculation, considering circular and elliptical trajectories and rendezvous maneuver example

06 p1140 A70-17583

Control system employing adaptive modeler to estimate state, dynamics and future trajectory of unknown plant through performance index minimization

06 p1025 A70-17965

Heliocentric low thrust spacecraft trajectory analysis using two-variable asymptotic expansion method

[AIAA PAPER 70-214] 06 p1145 A70-18064

Low thrust trajectory and performance analysis of solar electric propulsion system for unmanned interplanetary exploration

[AIAA PAPER 70-212] 06 p1145 A70-18081

Phobos and Deimos photographic reconnaissance feasibility during 1971 orbiter and 1973 Viking missions, studying trajectory

[AIAA PAPER 70-60] 06 p1146 A70-18191

Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques

[AIAA PAPER 70-95] 06 p1146 A70-18202

Earth oblateness effects on lunar and interplanetary trajectories, using algorithm based on orbital elements variations

[AIAA PAPER 70-97] 06 p1146 A70-18203

Collisionless ions trajectories in plasma flowing about cylindrical probe calculated to determine probe ion current, ion density distribution in field and potential distribution

06 p1122 A70-18294

Hybrid patched conic technique as iterative procedure for generating translunar and transearth trajectories emphasizing computing time saving

06 p1152 A70-18495

Time-similar and isotropic geodesic curves simulating paths of test bodies in Riemann space corresponding to gravitational field

06 p1107 A70-18564

Optimal control problem solution involving functional minimization along differential vector equation trajectories, considering manifold type constraints on phase coordinates

07 p1244 A70-18747

Apollo 8 mission, spacecraft and booster details, calculating earth-moon flight parameters based on laws of mechanics

07 p1375 A70-18776

Lawden primer vector theory applied to matched conic spacecraft trajectories optimization

07 p1381 A70-19325

Circular and radial trajectories in Schwarzschild field applied to isolated metagalaxy with charged central body and nonzero cosmological constant

07 p1385 A70-19426

Resonant oscillations of coupled physical pendulums, investigating phase trajectories by Struble method

08 p1544 A70-20964

Apollo space vehicles guidance and navigation using data obtained onboard, discussing inertial platforms, accelerometers and trajectory calculations

08 p1541 A70-21023

Queue control techniques in generating predicted trajectory, discussing queue control logic requiring minimum storage

08 p1467 A70-21049

Hodographic determination of required velocity changes for space vehicle transfer orbit, involving only launching point and trajectory plane

08 p1577 A70-21505

Proportional navigation law three dimensional vectorial equation analyzed in kinematic conditions, discussing perturbation effects on linearized trajectory

09 p1720 A70-22420

Nonlinear differential equations analysis based on weighted linear approximation applied to singular

points and trajectories in phase plane in friction problems

09 p1727 A70-22665

Atomic clock applications to trajectory, discussing experimental single channel equipment for space vehicle location and results of Rb vapor clocks

09 p1722 A70-23034

Lunar swingby trajectory analysis with atmospheric reentry, characteristics of geocentric portions of earth-moon and moon-earth transfers

10 p1940 A70-24306

Computational limitations of midcourse correction velocity for lunar impact trajectories, considering impact miss magnitude correction

11 p2109 A70-25955

Controlled missile reentry trajectory through dense atmosphere, describing digital computer solution of differential equations of motion

12 p2314 A70-27768

Small meteor streams trajectories and radiants from epsilon-Lyrids, alpha-Coronids and phi-Draconids observations by amateur astronomers

12 p2311 A70-28307

Spacecraft reentry trajectory reconstruction using accelerometer and onboard navigation data from Apollo flights

13 p2485 A70-28378

Trajectory predictive lunar return atmospheric reentry guidance of roll-controlled Apollo-type vehicle, using variable integration steps

13 p2446 A70-28396

Planetary trajectory handbooks for mission and system analysis covering opportunities for Mercury, outer planets and Mars, contour charts, etc

13 p2486 A70-28525

Ordnance flight dynamics, considering trajectory analysis and inaccuracies due to projectile wobble

[AIAA PAPER 70-533] 13 p2506 A70-29001

Meteorological problems associated with accurate weather prediction affecting launch, trajectory and recovery of ballooning systems

14 p2606 A70-30555

Optimal control of continuous and discrete observations described by linear differential and recurrent algebraic equations in presence of random perturbations

14 p2561 A70-30717

Fuel savings by Jupiter moon gravity assisted transfer trajectories from earth, considering initial energy, mass ratio, approach angle, timing and aiming errors

14 p2640 A70-30761

Coordinate systems generation for optimal trajectories, considering Lagrange multiplier as motion constant

14 p2651 A70-31368

Jet assisted orbital spacecraft trajectories equations derivation, considering Kepler trajectories and orbital velocities

15 p2800 A70-32260

Semiwideband and adaptive noise variance recursive estimation techniques applicable to spacecraft trajectory analysis

15 p2803 A70-32586

Linearization error bound analysis in solution of equations of motion of reentry vehicle

16 p2974 A70-33319

Initial reentry body motion effects on angle of attack envelope value throughout trajectory, including altitude of maximum transient amplification

16 p2982 A70-33892

Optimal trajectories analysis by canonical transformation for obtaining solution to Hamilton-Jacobi equation without quadratures

16 p2943 A70-33899

Potential stability theory for linear and nonlinear systems trajectory

16 p2943 A70-34042

Nonlinear mechanical systems transient motion analysis based on phase trajectories

16 p2944 A70-34283

Nonlinear mechanical lumped dynamic systems trajectory analysis in terms of P and G sets

16 p2944 A70-34285

Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques

17 p3172 A70-35666

Circumunar trajectories with return to earth atmosphere, comparing various methods

18 p3312 A70-36165

Two dimensional reverse trajectory reaction and mass behavior for motion of material point with changing mass, using Mesherskij equation

18 p2383 A70-36401

Nomograms for meteor geocentric velocity and trajectory with correction for zenith attraction and radiant

18 p3315 A70-36605

Automatic control systems synthesis based on root locus trajectories theory

19 p3392 A70-37808

Second and higher order perturbation theory for two body trajectories, using recursive formulas

[AIAA PAPER 70-1056] 19 p3528 A70-38871

N body numerical integrator using virtual mass technique for computing trajectories with speed and accuracy suitable for spacecraft onboard computer applications
[AIAA PAPER 70-1057] 19 p3528 A70-38872

Closed form approximate solution for restricted three body motion of lunar or interplanetary spacecraft, demonstrating accuracy and flexibility in lunar mission trajectory calculations
[AIAA PAPER 70-1061] 19 p3529 A70-38875

Multiconic method space flight trajectories analysis, discussing computation time and circumlunar flight altitude and velocity errors
[AIAA PAPER 70-1062] 19 p3529 A70-38876

Jupiter swingbys and multiplanet Jupiter swingby trajectory modes for outer planet missions, comparing in terms of passage conditions
[AIAA PAPER 70-1071] 19 p3530 A70-38884

Jupiter swingby trajectory analysis for comet flyby and rendezvous missions, discussing approach velocity and payloads
[AIAA PAPER 70-1074] 19 p3530 A70-38886

Interplanetary trajectories calculation using constant and/or slowly varying functions for accuracy, noting application to earth-moon spacecraft
[AIAA PAPER 70-1076] 19 p3530 A70-38888

Monopole trajectory in magnetic dipole field by numerical integration on computer and Liouville theorem, using resolved Stormer cone to investigate motion
20 p3672 A70-39301

Resonant oscillations of coupled physical pendulums, investigating phase trajectories by Struble method
20 p3672 A70-39386

Covariance matrices estimates for trajectory parameter tracking of thrust-maneuvering spacecraft
[AIAA PAPER 70-1017] 20 p3666 A70-39516

Spacecraft trajectory initial conditions expressions as parameters dependent functions, applying results to Mars lander mission
[AIAA PAPER 70-1016] 20 p3666 A70-39517

Real time network support simulation allowing network configuration for nominal or perturbed trajectory for Saturn vehicles, applicable to any flight azimuth
[AIAA PAPER 69-936] 20 p3591 A70-39684

Algorithm for trajectory analysis in closed loop terminal guidance of solar electrically thrusted interplanetary spacecraft
[AIAA PAPER 70-1152] 20 p3670 A70-40203

Solar electric propulsion Mars high data rate orbiter trajectory design and analysis, including landing site selection and spacecraft parameters optimization
[AIAA PAPER 70-1119] 20 p3710 A70-40224

Mission analysis and trajectory simulation (MATIS) program, discussing computer controls, modular design, integration evaluation
[AIAA PAPER 69-939] 21 p3920 A70-41872

Comet Bennett /1969 i/ spectrograms, discussing linear diameter, trajectory, Lyman alpha emission and hydrogen mass
22 p4097 A70-42468

Trajectory equations for plane and three dimensional gas jets with arbitrary injection hole shapes in subsonic shear flow
22 p3960 A70-43365

Parachute trajectory and opening load prediction based on inflation process and added mass, determining drag area as function of distance
[AIAA PAPER 70-1168] 23 p4137 A70-43993

Phobos and Deimos photographic reconnaissance feasibility during 1971 Orbiter and 1973 Viking missions, studying trajectory
[AIAA PAPER 70-60] 23 p4243 A70-44507

Interplanetary periodic orbits and flyby dates for multiple earth-Venus swingby missions, describing various iterative solutions for trajectory
[AIAA PAPER 69-931] 23 p4243 A70-44508

Suboptimum filter for trajectory estimation from parameters, using modified covariance with least squares formulation in Kalman setting
23 p4177 A70-44601

GEOS A and OGO-4 satellite orbits and trajectory analysis using Definitive Orbit Determination System, discussing tracking stations error role
24 p4407 A70-45536

High energy close approach trajectories within planar free fall three body problem, using perturbation theory
24 p4412 A70-45984

Aircraft climb and descent trajectories approximation compatible with air traffic control operation, noting parameters effects
24 p4375 A70-46239

TRAJECTORY CONTROL

NT TRAJECTORY OPTIMIZATION

In-flight compensation for space probe trajectory deviations, discussing attitude determination and control of triaxial and spin stabilized space probes
01 p0186 A70-11265

Spacecraft longitudinal control during reentry of Lunar Orbiter into atmosphere, analyzing final range prediction, trajectory tracking and accelerometers performance
01 p0197 A70-11497

Spacecraft range control algorithm during reentry at parabolic velocity into atmosphere with varying parameter distributions
01 p0197 A70-11498

Controlled vehicle disturbed trajectory multiple correction, considering constrained control or limited accessible coordinates for observations
04 p0716 A70-15007

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle
04 p0661 A70-15011

Fluidics application in sounding rocket guidance control circuits used in space boosters
05 p0797 A70-15809

Optimality conditions determined for control involving trajectory with singular component equations of motion
06 p1024 A70-17813

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting, with emphasis on singular points
06 p1142 A70-17877

Apollo 11 lunar landing mission planning, control and evaluation of launch window and translunar, lunar parking orbit and transearth trajectories
[AIAA PAPER 70-24] 06 p1158 A70-18168

Queue control techniques in generating predicted trajectory, discussing queue control logic requiring minimum storage
08 p1467 A70-21049

Rendezvous control law for spacecraft moving in central gravitational field along trajectory representing target vehicle Keplerian orbit
08 p1582 A70-21636

Spacecraft mission planning for trajectory control after establishing mission objectives, trajectory plan and crew timeline for Apollo flights
09 p1725 A70-23709

Structural synthesis of automatic control systems for body motion along trajectory, using inverse method and nonlinear coordinate transformations
11 p2077 A70-25611

Space vehicle velocity-attitude optimal control for on-line trajectory control schemes
11 p2025 A70-26216

Rendezvous problems formulated as optimal control problems in combined state space, considering decomposition in optimality criteria and solution existence
11 p2127 A70-26331

Rendezvous trajectory control problems solution by regularization techniques, emphasizing equations of motion in gravitational field
13 p2446 A70-28380

Adaptive variable-parameter spacecraft trajectory control, discussing loop synthesis and model reference system stability and dynamic accuracy
13 p2380 A70-28383

Low altitude operational meteorological and navigation spacecraft, discussing need for orbit adjustment by dynamic control
13 p2500 A70-28404

Spacecraft trajectory control for hypersonic atmospheric entry
13 p2500 A70-28411

Course correction requirements for ballistic grand tours and outer planet missions, considering trajectory disturbances by random nongravitational forces
13 p2448 A70-28707

Onboard moon-to-earth trajectory approach guidance with or without midcourse guidance using optical angular measurements
14 p2615 A70-30470

Neighboring optimum feedback control scheme for aerospace vehicles to handle small disturbances from nominal trajectory with unspecified final time
16 p2887 A70-33438

Space vehicle trajectories, discussing programming method to control motion for prescribed boundary conditions
17 p3173 A70-35700

Extraatmospheric transport trajectory control by jet assistance
18 p3333 A70-36670

Airport capacity and terminal area safety increase by scanning beam instrument landing system, discussing automatic guidance trajectory example
19 p3464 A70-37913

Launch vehicle injection error sensitivity minimization by trajectory shaping using excess booster capability
[AIAA PAPER 70-1078] 19 p3534 A70-38889

Closed form expressions for linear and higher order corrections to multiimpulse approximations of space flight trajectory optimization solutions, using bang-bang thrust control
[AIAA PAPER 70-1014] 20 p3667 A70-39519

Rocket course correction by lateral air expulsion /ram air control/, deriving model for performance prediction
[AIAA PAPER 70-90] 20 p3715 A70-39559

Interplanetary solar electric spacecraft performance improvement by mission mode including earth swingby maneuver in solar orbit inclined to ecliptic
[AIAA PAPER 70-1117] 20 p3710 A70-40226

Trajectory correction propulsion subsystem /TCPS/, attitude propulsion subsystem /APS/ and pyrotechnic subsystem of thermoelectric outer planet spacecraft /TOPS/
21 p3868 A70-41800

Thermoelectric outer planets spacecraft /TOPS/ attitude control subsystem providing accurate antenna pointing and trajectory correction engine thrust vector orientation
21 p3930 A70-41801

Optimization for control processes with first and higher order constraints on phase coordinates
22 p4004 A70-43320

Spacecraft trajectory control rockets design and operational characteristics, discussing various propellant types, control valve designs, etc
24 p3493 A70-45640

TRAJECTORY MEASUREMENT

Optimal moments for trajectory parameters measurements determined by linear analysis to minimize error for initial conditions
01 p0094 A70-11478

Numerical forecasting scheme for hurricane and typhoon trajectories applied to 1967 Atlantic storm data
03 p0520 A70-13162

Optical approach navigation experiment on 1969 Mariner mission to Mars demonstrating accuracy potential of spacecraft-based measurement
[AIAA PAPER 70-70] 06 p1103 A70-18152

Soviet book on rendezvous in orbit, flight dynamics and control of spacecraft covering trajectory synthesis, optimization and control for approach stage
10 p1950 A70-24656

Satellite trajectory parameters estimation by maximum likelihood method applied to continuous satellite observations assuming random Gaussian process as measurement error
11 p2081 A70-26780

Satellite motion initial phase vector estimation for calculating satellite motion from selection of complete or increasing volume of measurements
11 p2118 A70-26781

Deep Space Network /DSN/ data accuracy limitations relation with ability to determine orbit of probe, examining improvements after Mariner 2 and trends
13 p2448 A70-28702

Meteor particle orbits, comparing inclined radio reflections with photographic and straight radar observations
14 p2636 A70-30322

Rockets trajectories recording on real time at Guiana Space Center using IR pointing deviation meter
15 p2698 A70-31960

High speed photographic systems for ballistic studies, describing high intensity lighting systems
20 p3635 A70-40527

TRAJECTORY OPTIMIZATION

Burning program for sounding rocket to reach maximum altitude with given initial and propellant masses, discussing numerical parameter optimization technique
01 p0161 A70-10150

Optimal rendezvous maneuver of two spacecraft in circular orbits with minimum fuel consumption, taking into account propelled vehicle control program and flight path
01 p0193 A70-10424

Optimum flight paths of energy and power limited rockets with generalized thrust characteristic, considering vertical, horizontal, rectilinear, zero drag and vacuum trajectories
01 p0193 A70-10425

Differential equations of optimal degenerate problem reduced to autonomous form with multiple control, noting D-stationarity application for optimal motions
01 p0053 A70-11022

Spacecraft trajectory optimal determination without knowing measurements error distribution function, examining computer solution properties of linear programming
01 p0192 A70-11477

Optimal rendezvous between satellite and spacecraft, determining power and time optimal coplanar rendezvous in circular orbit
01 p0139 A70-11479

Optimum orbital transfer of material point subjected to reactive force with minimum mass loss, discussing Kepler motion kinematics
01 p0192 A70-11514

Two step optimal motion of target and pursuer with thrust vector control in vacuum under arbitrary gravitational field, determining distance strategy
02 p0272 A70-12405

Spacecraft reentry trajectory optimization, considering minimum coolant weight requirement in internal cooling system
02 p0381 A70-12416

Sufficient conditions for relative extremum in flight dynamics optimization determined by variational method
02 p0381 A70-12417

Minimum propellant maneuver during docking of elliptical orbit rendezvous between propelled and passive target vehicles, analyzing as variational problems
02 p0380 A70-12784

Optimal two impulse transfer through 180 degree range angle between Keplerian noncoplanar orbits, minimizing impulse by transfer plane optimal orientation
[AIAA PAPER 68-93] 03 p0562 A70-12914

Medium duration optimal rendezvous between near circular noncoplanar orbits with close orbital planes, analyzing six impulse solutions
[ONERA-TP-763] 03 p0571 A70-13639

Geostationary satellite payload-optimal injection trajectory from nonequatorial firing range, describing dog-legging maneuvers
03 p0573 A70-13845

Optimal impulse orbital transfer in ring between coplanar orbits intersecting ring boundaries in central Newtonian force field
04 p0744 A70-14429

Optimal descent maneuver from planetary orbit for fixed atmospheric reentry angle, considering minimum impulse/fuel consumption/
04 p0745 A70-14496

Graphical solution of optimum trajectories for third order systems depending on single control function, including maximum error and switching time
[ASME PAPER 69-WA/AUT-6] 04 p0661 A70-14828

Optimal control of thrust limited minimum-propellant rocket-powered vehicle using expansion about optimal trajectory
04 p0750 A70-14928

Orbit determination simultaneous optimal strategy and useful information set selection, discussing Mars transfer trajectory
04 p0750 A70-14940

Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization
[AIAA PAPER 69-261] 04 p0736 A70-15404

Soviet monograph on optimal space flight trajectory control, covering vehicle CG trajectory and synthesis of automatic stabilization system using variational calculus
04 p0764 A70-15493

Multistage rocket optimum ascent regime obtained by height function of engine gas outlet velocity
06 p1155 A70-17585

Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass
06 p1155 A70-17880

Lunar module motion during optimal ascent from moon surface into circular orbit of command module, noting descent maneuver similarity
06 p1155 A70-17881

Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials
06 p1142 A70-17891

Linear-quadratic pursuit-evasion game with dynamics perturbed by additive white Gaussian noise, obtaining linear minimax solutions
06 p1025 A70-17957

Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques
[AIAA PAPER 70-95] 06 p1146 A70-18202

Analytic Trajectory Optimization Model to develop computational techniques for low thrust mission analysis
[AIAA PAPER 70-96] 06 p1159 A70-18230

Optimum impulsive velocity calculation for three dimensional deorbit from elliptical orbits to achieve specified reentry angle
06 p1152 A70-18496

Planetary atmospheric entry optimal three dimensional glide paths, considering polar curve altitude dependence, flight path changes, braking maneuvers, etc
07 p1378 A70-18985

Lawden primer vector theory applied to matched conic spacecraft trajectories optimization
07 p1381 A70-19325

Spline data techniques for error elimination in trajectory optimization to offer improvement over linear interpolation scheme
07 p1325 A70-19340

Hypersonic orbital glider range maximization, analyzing optimal angle of attack by use of rectangular velocity components
07 p1393 A70-19341

Time optimal rendezvous maneuver between neighboring elliptic orbits, discussing propulsive jet system with variable thrust
07 p1381 A70-19357

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
07 p1393 A70-19497

Indirect methods of trajectory optimization, improving convergence through normalization of state data and Lagrange multipliers
07 p1326 A70-19726

Optimality condition for singular control problems derived using differential dynamic programming to obtain expression for change in cost produced by control variation
09 p1653 A70-22345

Fourth order differential equation system with complex conjugate eigenvalues, deriving optimal control for fuel minimum
09 p1759 A70-22831

Optimal maneuver decision strategy for space vehicle midcourse trajectory corrections
09 p1760 A70-22928

Hybrid patched conic iterative technique for accurate moon-earth/transearth/trajectory generation
09 p1760 A70-22929

Minimum time interstellar trajectories for thrust limited rockets by applying Pontryagin maximum principle to relativistic rocket equations of motion
09 p1760 A70-22933

Degenerate variational problem of optimum gliding along zero proximity line, determining number of control switchings and deviation during perturbed motion
10 p1854 A70-24277

Selection of uncorrelated measurement composition ensuring optimal accuracy of space vehicle trajectory
10 p1939 A70-24301

Optimal trajectory measurement program for orbit parameter determination, assuming random errors and nondegenerate weighting matrix of normal equations
10 p1940 A70-24302

Minimal characteristic velocity of single impulse transfer between coplanar elliptical orbits with allowance for thrust action finite time
10 p1940 A70-24304

Optimal acceleration from earth orbit to hyperbolic velocities of low thrust space vehicle, constructing asymptotic expansions near and far from central field
10 p1940 A70-24305

Spacecraft optimal flight from earth orbit to outer planet orbit with ideally controlled engine using differential motion equations
10 p1941 A70-24512

Optimal longitude rendezvous for geostationary satellite by using inertially fixed orientation thrust for performing final positioning
10 p1941 A70-24541

Soviet book on rendezvous in orbit, flight dynamics and control of spacecraft covering trajectory synthesis, optimization and control for approach stage
10 p1950 A70-24656

Different gravitational force fields effecting optimal rocket trajectories and queried validity of Newtonian law
10 p1943 A70-24820

Takeoff noise minimization by prescribing optimum takeoff trajectories, considering aircraft parameters influencing noise intensity at takeoff
11 p1979 A70-25814

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for midcourse impulses
11 p2079 A70-25957

Minimum fuel continuous thrust elliptical orbit transfer problem, obtaining optimal steering function for departure and arrival points
11 p2124 A70-26214

Quasi-optimum proportional navigation for attack situations with large missile and target maneuvers, showing advantage over linearized optimization
11 p2081 A70-26316

Fuel-optimal retrothrust control in state dependent retarding force fields, taking into consideration synthesis for vertical trajectory system configuration
11 p2126 A70-26321

Optimal pulsed orbital transfer between close nearly circular orbits in central field of gravity realized by geometrical solution
11 p2118 A70-26778

Keplerian integrals analogy to integrals of adjoint equations suggested by optimum space navigation trajectories considerations
12 p2261 A70-27834

Coplanar transfer orbits optimal trajectories in central Newtonian gravitational field, using Krotov sufficient criteria
12 p2310 A70-28252

Stochastic optimal trajectory control for spacecraft reentry at supercircular velocity, deriving computer algorithm
13 p2499 A70-28382

Accelerated gradient projection method applied to rocket trajectory optimization for minimizing fuel required for placing payload in circular orbits
13 p2485 A70-28395

Minimum time control for placing circular orbit satellite in gravitationally stable position
13 p2502 A70-28440

Optimal impulse orbital transfer in ring between coplanar orbits intersecting ring boundaries in central Newtonian force field
13 p2485 A70-28454

Minimum fuel takeoff and landing paths for VTOL aircraft with constraints on state and control, determining optimal trajectories
[AIAA PAPER 70-550] 13 p2345 A70-29015

Extremum criterion for singular solutions to optimal trajectory equations in calculus of variations
13 p2443 A70-29747

Terminal guidance by dynamic programming to obtain optimal feedback control law in nominal trajectory neighborhood for minimum energy consumption
13 p2449 A70-29963

Lunar spring board effect to minimize impulses for given velocity at great distance of earth-moon system, discussing nonimpulsive grazing passage
14 p2635 A70-30289

Interplanetary low thrust orbit transfer optimization by dynamic programming, including gravitational perturbation effects from earth, Mars and Jupiter
14 p2640 A70-30759

Coordinate systems generation for optimal trajectories, considering Lagrange multiplier as motion constant
14 p2651 A70-31368

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
15 p2813 A70-32742

Jacobi conditions for singular optimization problems by transforming singular accessory minimum problem into nonclassical nonsingular form, considering optimal control theory applicability
16 p2885 A70-33331

Speed convergence of hybrid vs digital computer synthesis of optimal boost vehicle controller, considering fuel consumption and pitch dynamics
16 p2981 A70-33442

Planetary atmospheric entry optimal three dimensional glide paths, considering polar curve altitude dependence, flight path changes, braking maneuvers, etc
[DFVLR-SONDDR-49] 16 p2982 A70-33771

Optimum guidance and control law for lifting reentry bodies, investigating plane descent trajectories for minimum structural heating
16 p2982 A70-33774

Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method
16 p2977 A70-33871

Optimal trajectory and control approximate solution by asymptotic expansion, considering Mayer variational problem solution
16 p2943 A70-33897

Optimal trajectories analysis by canonical transformation for obtaining solution to Hamilton-Jacobi equation without quadratures
16 p2943 A70-33899

Interstellar drag resulting from relativistic rocket elastic collisions with interstellar matter, discussing effects on minimum time acceleration limited relativistic trajectories
17 p3155 A70-34752

Space shuttle mission trajectory optimization with steering in atmospheric flight and orbiter maneuvers
[AAS PAPER 70-048] 17 p3176 A70-34788

Minimum impulse transfer between two neighboring low eccentricity orbits, discussing fuel consumption and transfer time
17 p3167 A70-35231

Optimum low thrust ion propelled interplanetary trajectory design using two step Chebyshev method
17 p3167 A70-35232

Optimal explicit guidance equation using maximum principle for two stage vehicle injecting satellite into parking orbit
17 p3134 A70-35289

Iterative algorithm for free terminal time control in trajectory optimization
17 p3168 A70-35290

Interplanetary probes trajectory optimization for minimum energy expenditures, neglecting solar and terrestrial perturbations within earth sphere of influence
17 p3168 A70-35366

Computation methods for optimal rocket trajectories closely approaching gravitating celestial bodies, alleviating computational difficulties with regularizing techniques
17 p3172 A70-35666

STOL takeoff trajectory optimization for heavily loaded helicopter, using optimal control theory
17 p3021 A70-35841

ELDO launch vehicle FE /flat earth/ guidance, discussing perturbations, trajectory optimization, inertial navigation system, onboard computer, etc
18 p3288 A70-36299

Integrals of motion for minimum fuel rocket trajectories in inverse square field calculated for constant power and constant exhaust rockets
18 p3316 A70-36678

Minimum-fuel multiple impulse orbital fixed time rendezvous in circular orbit vicinity
18 p3289 A70-36682

Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions
18 p3316 A70-36683

Optimal control systems sensitivity analysis, discussing trajectory tracking
19 p3394 A70-38716

Optimal three dimensional impulsive orbit transfer at cuspidal point of primer locus in terms of three parameters to facilitate computation and tabulation [AIAA PAPER 70-1037] 19 p3527 A70-38852

Minimum impulse transfer between circular orbit and hyperbolic trajectory velocity vector, assuming fixed transfer times [AIAA PAPER 70-1038] 19 p3527 A70-38853

Primer vector theory applied to interplanetary trajectory optimization for high thrust chemically propelled spacecraft, considering 1973 Mars opportunity [AIAA PAPER 70-1039] 19 p3527 A70-38854

Three body numerical solutions to low thrust guidance and navigation for outer planet orbiter with nuclear-electric propulsion [AIAA PAPER 70-1040] 19 p3527 A70-38855

Low thrust interplanetary swingby trajectories optimization, considering thrusting and coasting within sphere of influence [AIAA PAPER 70-1041] 19 p3527 A70-38856

Pioneer-F Jupiter flyby mission planning, considering use of optimum broken plane trajectories to increase launch opportunity and/or payload capability [AIAA PAPER 70-1050] 19 p3528 A70-38865

Optimum launch trajectories for ATS-E mission with noncircular parking orbits, considering apogee motor size, perigee radius and duration constraints [AIAA PAPER 70-1051] 19 p3528 A70-38866

Saturn 5 launch vehicle targeting methods for lunar missions, solving earth departure variables via iterative process [AIAA PAPER 70-1052] 19 p3528 A70-38867

Optimal angle of attack transition trajectories for space shuttle from atmospheric entry to cruising flight for conventional airport landing [AIAA PAPER 70-1018] 20 p3713 A70-39515

Closed form expressions for linear and higher order corrections to multiimpulse approximations of space flight trajectory optimization solutions, using bang-bang thrust control [AIAA PAPER 70-1014] 20 p3667 A70-39519

Aircraft landing maneuver optimization by in-flight monitoring of approach and landing phases, furnishing decision making display [AIAA PAPER 70-1000] 20 p3560 A70-39531

Air to air missile launch range maximization for plane trajectories and nonmaneuvering targets, discussing optimal fuel burning rate [AIAA PAPER 70-980] 20 p3668 A70-39549

Atmospheric ascent optimal trajectories for medium to high lift drag ratio space shuttle type rocket vehicles [AIAA PAPER 70-978] 20 p3714 A70-39551

Highly constrained optimal control problems, using nonlinear programming in mathematical model for trajectory optimization [AIAA PAPER 70-964] 20 p3600 A70-39565

Optimal longitudinal takeoff trajectories, formulating obstacle clearance criterion function based on aircraft design parameters effects [AIAA PAPER 70-963] 20 p3560 A70-39566

Optimum switching in minimum fuel, time-free impulsive planar transfer problem by primer vector concept 20 p3709 A70-40074

Optimized trajectories and spacecraft for solar-electric missions to asteroids, using chemical booster for injection [AIAA PAPER 70-1120] 20 p3710 A70-40223

Solar electric propulsion Mars high data rate orbiter trajectory design and analysis, including landing site selection and spacecraft parameters optimization [AIAA PAPER 70-1119] 20 p3710 A70-40224

Fuel optimal orbital transfer trajectories by linear programming 20 p3711 A70-40337

Space vehicle trajectories power-optimal single parameter nonlinear correction, assuming ideal impulse performance 21 p3883 A70-40829

Differential dynamic programming algorithm for discrete time orbit transfer optimization 21 p3919 A70-41737

Deorbiting target intercept energy optimization by game theory approach [AIAA PAPER 70-1019] 21 p3848 A70-41778

Rocket nose cone optimal turn into horizontal ballistic trajectory after separation from booster, using dynamic programming 22 p3962 A70-43351

Solar probe trajectory optimization, using Venus gravitational field for braking 23 p4243 A70-44506

Analytic approximation for initial adjoint vector for optimal/minimum propellant/ space trajectories [AIAA PAPER 69-916] 23 p4243 A70-44509

Minimum fuel thrust limited transfer trajectories computation for coplanar elliptic orbits [AIAA PAPER 69-914] 23 p4244 A70-44558

Space shuttle transition trajectory optimization for cruising flight entry, considering longitudinal control, pitchup instability and angle of attack 23 p4244 A70-44623

Minimum-time transfer trajectories between close planar orbits, using single stage thrust-limited rocket 23 p4244 A70-44624

Lawden intermediate rocket thrust arcs numerical integration and Kelley-Contensou optimality in Newton central force field [ONERA-TP-869] 23 p4245 A70-44657

Algorithm for space trajectories optimization with delta velocity constraints 23 p4245 A70-44683

Intrinsic equations with roots for optimal two-impulse transfer between given positions 23 p4246 A70-44698

Optimal fixed-time impulsive transfer trajectories minimizing characteristic orbital velocity, determining sufficient conditions 23 p4255 A70-45015

Interorbital optimum trajectories with specified transfer angle in inverse square gravitational field, examining minimum velocity increment 24 p4412 A70-46003

TRANQUILIZERS

Amysyl effects on conditioned passive avoidance reflexes development and reinforcement in white mice under electric shock 07 p1198 A70-18717

Tranquilizers and hypnotics from rats organs analyzed by thin layer chromatography 22 p3978 A70-42879

Handbook of transducers for electronic measuring systems covering operating principles, design features, etc 01 p0094 A70-11301

Physiological signals of cardiovascular system transducing methods applied to vector ECG, heart sounds, peripheral pulse waves, chest microphone and plethysmography 02 p0243 A70-12095

Ultrasonic tracking type transducers for testing ribbed and smooth walled pipes using shadow and two probe echo methods 02 p0300 A70-12480

Sheath-enclosed steel cable inspection using induction coil transducer in conical sleeve 02 p0301 A70-12490

Local skin friction measurement on model in blow-down hypersonic wind tunnels using floating element transducer, giving results for flat plate and wedge [ONERA-TP-756] 03 p0463 A70-13629

Electronic sine-cosine converters construction in devices for visual display of hydroacoustic transducers radiation patterns 06 p1064 A70-17773

Dynamic mathematical model of proportional electromagnetic transducer in pneumatic servomechanisms derived by Lagrange-Maxwell method assuming circuit linearity 07 p1195 A70-18750

Apparatus for studying vibrations via contactless HF resonant transducers during milling 09 p1691 A70-22625

Optimizing control system design using fluidic digital circuitry and FM type transducers 09 p1614 A70-23690

Mode transducer and mode filter formed by rectangular and circular waveguide elements investigated by field expansion, calculating transmission coefficient and propagation constant 10 p1848 A70-24219

Nomogram selecting dimensions of steel or Al alloy cantilever beams for transducer design using strain gages 10 p1890 A70-24593

Vibration meter coupled with electrodynamic transducers for measurements in 3-2000 Hz range 11 p2055 A70-26448

Multichannel measurement system for inductive transducers, describing system components and capabilities 11 p2055 A70-26449

Electrocapillary transducers filled with mercury and electrolyte solution for vibration measurement, analyzing seismic operation character 12 p2235 A70-27684

Transducers for bioimplantable telemetry systems self used by nonhospitalized patients 13 p2357 A70-28816

Electrodynamic transducer electrical and mechanical parameters measurement, comparing various techniques 13 p2406 A70-28991

Open faced polyimide-backed strain gage for transducer and/or long term applications, considering drift and zero shifts 15 p2739 A70-32329

Electro-optical transducers based on photoconductive cells, phototransistors and microminiature incandescent and solid state light emitters 16 p2904 A70-33144

Heterodyne conversion transducer large signal internal parameters dependence on heterodyne, signal amplitudes and intermediate voltage 16 p2873 A70-33240

Parameter identification in distributed systems by method of characteristics, discussing noisy measurements and limited available transducers 16 p2942 A70-33338

Nerva nuclear subsystem diagnostics and control instrumentation, discussing transducers 16 p2949 A70-33551

Electromagnetic to magnetostatic wave conversion loss reduction at L band by coiled transducer 16 p2913 A70-34038

Optimum receiver for acoustical holography using discrete transducers arrays for image conversion 17 p3088 A70-35029

Exciter and instrumentation of vibration transducer calibration system 17 p3089 A70-35179

Measurement transducers transforming measured quantity into forms suitable for comparison with standards in metrological sciences 17 p3090 A70-35432

Strain transducer /optical diffraction grating/ for plastic wave propagation measurement along specimens subjected to impact 19 p3425 A70-37884

Optimal transducers distribution for estimating random field values in presence of additive noise 22 p4005 A70-43562

TRANSEQUATORIAL PROPAGATION

HF propagation losses from statistical measurement over north-south path found dependent on mode, day and night and high and low ray 04 p0649 A70-14968

Transequatorial multisite VLF records establishing solar zenith angle for midpoint of sunrise ionospheric height discontinuity, recomputing magnetic latitude dependent parameters 06 p1054 A70-17590

LOF observations of long distance transequatorial step frequency radio circuits in Pacific Area during sunspot minimum period 07 p1232 A70-19174

VLF transequatorial propagation, describing equipment, periodic variations in signal characteristics, ionospheric parameters, etc 15 p2699 A70-32298

TRANSFER FUNCTIONS

Unsteady heat conduction in hollow cylinder, using transfer functions to solve direct and inverse two dimensional problems 03 p0606 A70-13520

Holographic method for measuring optical instruments transfer function, using laser light source and beams interference 03 p0493 A70-13946

Transient electromagnetic fields coupling transfer functions for two wire uniform transmission line cable models, using long wire antenna as radiation source 04 p0658 A70-14739

Coefficient matrix-structural method for obtaining transfer function of linear automatic control systems 04 p0662 A70-15277

Algorithmic and digital computer method for approximating irrational transfer functions by rational functions in control systems 04 p0662 A70-15336

State variable diagram for transfer function of single output/input linear stationary system obtained by parallel, direct and iterative methods 05 p0928 A70-16027

Waveform-shaping transfer function rational polynomial approximation method with application to network problem in PCM communications 06 p1007 A70-17459

Linear circuit output waveform calculation without first resolving transfer functions on complex frequency plane, applied to current switching circuit analysis 06 p1018 A70-17460

Immittance, transfer and scattering characteristics for interdigital acoustic surface wave transducers, using linear equivalent circuit model 06 p1062 A70-17478

Complex control follow-up systems in transient modes, suggesting synthesis for transfer function of control signal coupling

06 p1023 A70-17775

Dynamic response of gas lubricated radial sliding bearing from transfer function derived from pH linearized mathematical model of gas lubrication

07 p1290 A70-18739

Modulation transfer function (MTF) of eye-visual system as spatial frequency filter

07 p1216 A70-18870

Microscope objective effect on accuracy of optical systems modulation-transfer function based on corrected high speed lens measurements

07 p1334 A70-19147

Dynamic characteristics approximation in transfer functions class with singularity at infinity

07 p1327 A70-19806

Reduction method for order of transfer function describing automatic control system, determining coefficients of reduced order transfer functions

07 p1247 A70-19842

Linear control circuits transfer function analysis, revising Nyquist criterion

07 p1328 A70-20212

Astronomical telescope performance at transfer process from object to image using optical transfer function and brightness standards

08 p1493 A70-20685

Transfer functions representing continuous dynamic systems, identifying parameters by obtaining coefficients of discrete system transfer function relating input and output sampled sequences

08 p1478 A70-20777

Clock corrections smoothing by linear transformation operator, calculating operator transfer function and averaged errors deviations

08 p1574 A70-21155

Reconstructed holographic image complex amplitude expression derived, showing effects of film optical transfer function, size and shape

08 p1500 A70-21789

Thermo-elastic analysis and optimum start-up in power plant, discussing transfer function for thermally loaded bodies with restricted boundary temperature

09 p1774 A70-22584

Error functional minimization in class of current distribution relay functions noting applications to linear antennas and FM signals synthesis

09 p1637 A70-23154

Atmospheric modulation transfer function measuring instrument based on Lindberg principle, discussing optical and mechanical design features and applications

09 p1688 A70-23769

Transfer coefficients calculation for equations of motion of medium, presenting mathematical experiment requiring molecular interactions only

10 p1919 A70-24157

Component tolerances effect on transfer function of networks, calculating sum variance for two terminal networks

10 p1833 A70-24223

Algorithm for transfer matrix Heaviside expansion, using Krylov and Vandermonde transformations for multiple eigenvalue case

10 p1910 A70-24705

Saddle point existence in determinate integrodifferential games with variable delay, assuming given control function over time interval

10 p1911 A70-25183

Transfer functions application to optical system specification, design and evaluation, calculating diffraction limited MTF

11 p2082 A70-25354

Roll induced cross coupling evaluation in two dimensional homing systems based on defining roll transfer matrix

11 p2122 A70-25681

Transfer functions estimation by taking Fourier transform ratio of finite length samples of input and response measurements, considering error term probability density

11 p2071 A70-25954

Time-invariant linear dynamical systems transfer equivalence leading to algorithm for minimal realizations of transfer function matrices

11 p2072 A70-26161

Linear networks fault detection and isolation using computerized test procedure and symbolic transfer function generation technique

11 p2029 A70-26337

Invariance conditions and state transition matrix of linear systems

11 p2074 A70-26400

Cylindrical shell response to random acoustic excitation, considering single point transfer functions and equivalent force power spectral densities

12 p2317 A70-27125

Transfer matrix spectrum for lattice gas models with finite interaction, constructing stochastic operator as stochastic matrices limit

12 p2272 A70-27343

Distributed-lumped-active network to produce transfer function with pair of high Q zero real part sensitivity poles

12 p2196 A70-27652

Short cables wire to wire coupling between black boxes, deriving interference transfer function

12 p2204 A70-28130

Soviet book on dynamics of rockets covering solid and liquid fuel rocket stability, controllability and transfer functions

13 p2505 A70-28799

Pilot-aircraft closed-loop characteristics, using pilot transfer functions for handling qualities prediction [AIAA PAPER 70-568]

13 p2346 A70-29033

Photodetector properties influence on opton transfer functions achieving light conversion by separating photocarriers with p-n junction

14 p2555 A70-30161

First harmonic precision improvement of dual input describing function, applying to self oscillation of nonlinear systems

14 p2560 A70-30625

SCAMP 4 program for electronic circuits statistical analysis in frequency domain, obtaining mathematical models and transfer functions

14 p2561 A70-30667

Physical signals continuous to discrete transformation by analog to digital conversion, considering coding process and transfer functions

14 p2554 A70-30679

Low pass filter synthesis with transfer function having frequency response boost in pass band

15 p2708 A70-31833

Noise effect on modulation transfer function of visual channel by threshold measurements

15 p2698 A70-32013

Multidimensional linear stationary systems controllability and observability with given transfer matrix

15 p2716 A70-32345

Algorithm for inverse Laplace transformation of irrational transfer function via fast Fourier transform

15 p2768 A70-32577

Optimal perturbation signal waveform linearizing nonlinear transfer characteristic of image sensing receptor array

15 p2705 A70-32725

Modulation transfer function (MTF) systems analysis with emphasis on target acquisition, relating image contrast characteristics of target and background

16 p2907 A70-33185

Linear multivariable feedback control systems design method based on transfer matrix, testing decoupling desirability

16 p2884 A70-33318

Iterative weighted nonlinear least squares parameter estimation for human respiratory control system by transfer function modeling, comparing results with visual curve fitting

16 p2851 A70-33322

Linear distributed dynamic system simulation using infinite product expansions for transcendental terms in transfer functions

16 p2942 A70-33348

Servosystems with random input signals, obtaining optimal transfer function by variational calculus

17 p3056 A70-34617

Photographic materials for holography, discussing spectral sensitivity, grain size, resolution, transfer functions, diffraction efficiency, etc

17 p3084 A70-35003

Spatial filter properties of antennas, discussing system performance optimization and incoherent source transfer functions

17 p3045 A70-35077

Atmospheric inhomogeneity, comparing effective mass and Curtis-Godson approximation methods for transfer function of absorbing gas distribution

19 p3461 A70-37632

Atmospheric turbulence vertical component spectral density observation by aircraft in steady flight, considering transfer function computation methods

19 p3351 A70-37646

Network function sensitivity to parameter variations, describing indirect calculation method

19 p3394 A70-37966

Selective inductorless amplifier design with four layered distributed RGC line in feedback loop, obtaining high Q factors in transfer function

19 p3390 A70-38674

Digital filter synthesis, discussing transfer function determination based on prescriptions for frequency or time response properties

19 p3391 A70-38746

Linear multivariable feedback control system, deriving conditions for existence of triangular decoupling transfer function matrices

20 p3605 A70-40118

Transfer function optimization for linear follow-up frequency filter with controlled resonance, analyzing noise band performance

22 p3985 A70-42402

Optical telescope reflecting prism angle deviations effect on modulation transfer function and image quality

22 p4072 A70-42506

Perturbation method with small parameter applied to turbulent transfer equation in lower atmosphere, solving longitudinal diffusion effect on evaporation

22 p4065 A70-42911

Lissajous figures for phase response of N-path signal filter transfer functions, using switched modulators

22 p3998 A70-43256

Modulation transfer function applied to optimal holographic nondestructive testing systems, using edge gradient analysis

22 p4039 A70-43520

Aircraft handling qualities specifications and definitions evolution based on test pilot rating correlation with engineering data and piloting ease evaluation with transfer functions

[ICAS PAPER 70-19]

23 p4138 A70-44114

Spectrophotometry of earth surface from manned Soyuz spacecraft, obtaining transfer function of atmosphere by aircraft flights

23 p4191 A70-44636

Vibration transfer coefficient of aerial camera-photographic assembly system for shock absorption during surveys

24 p4333 A70-45200

Monin-Obukhov function and nondimensional transfer coefficients variation, discussing turbulent motion decay in lower atmosphere

24 p4372 A70-46072

TRANSFER OF TRAINING

Work and exercise conditions effect in early training stages of learning sensorimotor skill, considering different body positions

03 p0432 A70-14295

Error correction training procedures convergence for committee solution to pattern recognition problem

05 p0817 A70-16175

Physiological training programs and equipment for life support in transports, discussing changes in protective helmet and quick donning harness

06 p1002 A70-17708

TRANSFER ORBITS

NT INTERPLANETARY TRANSFER ORBITS

Optimum orbital transfer of material point subjected to reactive force with minimum mass loss, discussing Kepler motion kinematics

01 p0192 A70-11514

Optimal two impulse transfer through 180 degree range angle between Keplerian noncoplanar orbits, minimizing impulse by transfer plane optimal orientation

[AIAA PAPER 68-93]

03 p0562 A70-12914

Osculating transfers between two prescribed trajectories without considering optimization problem, obtaining in-space launching point of artificial cosmic bodies

03 p0575 A70-13972

Optimal impulse orbital transfer in ring between coplanar orbits intersecting ring boundaries in central Newtonian force field

04 p0744 A70-14429

Electrostatic charged particle acceleration and ion thruster function in geostationary satellite station-keeping and attitude control, orbital transfer and drag compensation

[ONERA-TP-764]

04 p0735 A70-14934

Solar or nuclear energy powered electric propulsion systems for transferring satellite from low to geostationary orbit, discussing feasibility and costs of various designs

04 p0735 A70-15174

Electric thrusters for putting communications satellite into synchronous orbit analyzed for mission performance, finding hydrogen resistojets as attractive compromise between payload and transfer time

05 p0897 A70-16899

Satellite electric propulsion system and configuration for orbital transfer maneuvers, describing ELDO launcher, Black Arrow, orbital dynamics, sensor system, etc

06 p1130 A70-17648

Vehicles optimal flights with controlled or boundary level thrust in circular orbit neighborhood, using linearized equations of motion

06 p1142 A70-17876

Energy optimal osculating elliptical transfer orbit from low eccentricity orbit constructed for prolonged circling in equatorial plane of axisymmetric planet

07 p1374 A70-18774

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time

07 p1393 A70-19497

Unmanned and manned interorbital shuttle systems for satellite placement and repair and planetary spacecraft insertion, emphasizing cost analysis

[AIAA PAPER 70-267]

07 p1398 A70-20396

Hodographic determination of required velocity changes for space vehicle transfer orbit, involving only launching point and trajectory plane

08 p1577 A70-21505

Optimal transfer ellipse obtained by complete rotation in gravitational field of axisymmetric planet

09 p1751 A70-22161

Minimal characteristic velocity of single impulse transfer between coplanar elliptical orbits with allowance for thrust action finite time 10 p1940 A70-24304

Lunar swingby trajectory analysis with atmospheric reentry, characteristics of geocentric portions of earth-moon and moon-earth transfers 10 p1940 A70-24306

Minimum fuel continuous thrust elliptical orbit transfer problem, obtaining optimal steering function for departure and arrival points 11 p2124 A70-26214

Optimal pulsed orbital transfer between close nearly circular orbits in central field of gravity realized by geometrical solution 11 p2118 A70-26778

Coplanar transfer orbits optimal trajectories in central Newtonian gravitational field, using Krotov sufficient criteria 12 p2310 A70-28252

Optimal impulse orbital transfer in ring between coplanar orbits intersecting ring boundaries in central Newtonian force field 13 p2485 A70-28454

Dynamic programming applications to optimal stochastic orbital transfer strategy, describing computer program [AIAA PAPER 68-872] 13 p2447 A70-28502

Interplanetary low thrust orbit transfer optimization by dynamic programming, including gravitational perturbation effects from earth, Mars and Jupiter 14 p2640 A70-30759

Fuel savings by Jupiter moon gravity assisted transfer trajectories from earth, considering initial energy, mass ratio, approach angle, timing and aiming errors 14 p2640 A70-30761

Synergetic plane change maneuver optimal control, combining aerodynamic and propulsive flight phases for efficiency 15 p2715 A70-31784

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time 15 p2813 A70-32742

Minimum impulse transfer between two neighboring low eccentricity orbits, discussing fuel consumption and transfer time 17 p3167 A70-35231

Unmanned and manned interorbital shuttle systems for satellites placement and repair and planetary spacecraft insertion, emphasizing cost analysis [AIAA PAPER 70-267] 17 p3172 A70-35650

Minimum-fuel multiple impulse orbital fixed time rendezvous in circular orbit vicinity 18 p3289 A70-36682

Optimal three dimensional impulsive orbit transfer at cuspidal point of primer locus in terms of three parameters to facilitate computation and tabulation [AIAA PAPER 70-1037] 19 p3527 A70-38852

Minimum impulse transfer between circular orbit and hyperbolic trajectory velocity vector, assuming fixed transfer times 19 p3527 A70-38853

Optimum switching in minimum fuel, time-free impulsive planar transfer problem by primer vector concept 20 p3709 A70-40074

Communication satellites low thrust transfer to synchronous orbit by two-stage operation using hydrogen resistojets and Hg ion motors [AIAA PAPER 70-1116] 20 p3691 A70-40227

Kaufman ion thruster providing electric propulsion for satellite spiraling from parking to synchronous orbit [AIAA PAPER 70-1101] 20 p3692 A70-40237

Fuel optimal orbital transfer trajectories by linear programming 20 p3711 A70-40337

Differential dynamic programming algorithm for discrete time orbit transfer optimization 21 p3919 A70-41737

Optimal low thrust transfer between coplanar circular orbits, examining thrust direction and steering as Mayer problem 22 p4097 A70-42489

Minimum fuel thrust limited transfer trajectories computation for coplanar elliptic orbits [AIAA PAPER 69-914] 23 p4244 A70-44558

Minimum-time transfer trajectories between close planar orbits, using single stage thrust-limited rocket 23 p4244 A70-44624

Recoverable stages for satellites low to stationary orbital transfer, taking costs into account 23 p4245 A70-44671

Orbital mechanics of transfer orbits under small horizontal thrust, reducing second order differential equation to linear inhomogeneous equation 23 p4245 A70-44691

Intrinsic equations with roots for optimal two-impulse transfer between given positions 23 p4246 A70-44698

Optimal fixed-time impulsive transfer trajectories minimizing characteristic orbital velocity, determining sufficient conditions 23 p4255 A70-45015

Interorbital optimum trajectories with specified transfer angle in inverse square gravitational field, examining minimum velocity increment 24 p4412 A70-46003

TRANSFORM INTEGRALS
U INTEGRAL TRANSFORMATIONS
TRANSFORMATION TENSORS
U TENSORS
TRANSFORMATIONS
 Oxide transformation during oxidation of Nb in terms of O diffusion 07 p1305 A70-18967

Longwave and shortwave mode transformation in resonant layer of inhomogeneous plasma 08 p1550 A70-20847

Parametric image transformation during sum frequency generation 09 p1636 A70-23134

Random process noncommutative transformations and correlation functions in linear form of time functions 09 p1655 A70-23695

Langmuir wave beam nonlinear transformation in isothermal plasma due to induced scattering by ions 20 p3684 A70-40385

TRANSFORMATIONS [MATHEMATICS]
NT COORDINATE TRANSFORMATIONS
 Conditionally periodic orbits existence in restricted problem of three bodies, using similarity transformation 02 p0369 A70-11997

Element relations of phase transformation matrix for scattering, relating radiation field vector to scattered field vector 02 p0339 A70-12283

Monograph on generalized transforms properties and asymptotic behavior, discussing kernel functions, Bessel functions, Laplace transforms, Hankel transforms, etc 03 p0519 A70-13650

Generalized transform theory for causal operators developed, using Gelfand theory for commutative Banach algebras 03 p0520 A70-14167

Earth external gravitational potential expressed as infinite series of spherical harmonics, using transformation property on coefficients 03 p0478 A70-14178

Coupled nonlinear systems with two degrees of freedom using transformation techniques 04 p0714 A70-15084

Relativistic length contraction, time dilation and classical electrodynamics formulated in terms of special relativity using Galilean transformations 05 p0881 A70-15875

Birkhoff normalizing canonical transformation built at elliptic type of equilibrium without internal resonance, using Lie transforms 05 p0909 A70-16340

Multiplication theorem for Shtraus characteristic functions of quasi-Hermitian operators, including open systems coupling 05 p0877 A70-16880

Computational algorithm for fast Hadamard matrix transform of order 12 via factorization 06 p1093 A70-17314

Liapunov functions generation by matrix transformation of state-space system vector applicable to linear and nonlinear systems 06 p1023 A70-17544

Slack variable to transform optimal control problem with scalar inequality constraint on state variables into unconstrained problem 06 p1024 A70-17952

Transformed thermodynamics equations derived automatically by substitution codes, noting exceptions for real gas and discharge flow 08 p1597 A70-20918

Thermal contact resistance of anisotropic materials using mathematical geometric transformation [ASME PAPER 69-HT-47] 09 p1790 A70-23552

Computer-aided circuit design by imbedding singular elements to transform network synthesis into analysis problem 10 p1855 A70-24762

Radiation fields of sources in plane stratified plasma medium calculated for amplitude transformation coefficient 10 p1843 A70-25155

Reduction of satellite photographic data using transformation functions 11 p2007 A70-26186

Fourier and Hadamard transformation codings for multidimensional data channel noise immunity and bandwidth reduction 11 p2011 A70-26329

Invariant transform of motion and continuity equations for steady three dimensional flows of compressible fluids in absence of massive forces 11 p2041 A70-26598

Energy derivation for mechanics and thermodynamics with generalization to systems of more than two dynamic variables, considering transformations and Newton and Kepler laws 12 p2164 A70-27070

Ordinary differential eigenvalue problems solution by successive transformations, describing computer program and applications to hydrodynamic stability 13 p2440 A70-29085

Compressible fluids steady state equations invariant transformation, establishing sound speed-Mach number relation 13 p2389 A70-29458

Unitary solution to incompressible and nonviscous fluids in presence of slender profile 13 p2464 A70-29542

Pseudo one dimensional dissociational nonequilibrium nozzle flows, obtaining equilibrium and nonequilibrium solution through similar transformation of governing equations 14 p2527 A70-30264

Von Zeipel mappings equivalence to Lie transforms shown by order independent method 14 p2639 A70-30706

Grassmann manifold projective transformations into itself, considering matrix theorems 14 p2601 A70-31423

Axisymmetrical boundary value problem solution by net point method via transformation into self adjoint second order elliptic equation, obtaining positively determinate matrix 15 p2767 A70-31588

Generalized spectral analysis method implementing orthogonal transformations through Kronecker product representation and matrix factorization 15 p2767 A70-32099

Baecklund transformations applications to hodograph equations for steady two dimensional nondissipative MGD flows with aligned velocity and magnetic fields 15 p2781 A70-32453

Liapunov functions direct generation by state space system vector matrix transformation 15 p2768 A70-32555

Nonlinear discrete systems absolute stability exponential property proved by modified frequency condition, applying analog transformation to Szego-Kalman equations 16 p2882 A70-33044

Walsh functions and spectrum for signal processing, discussing computer compatibility 16 p2864 A70-33483

Electromagnetic waves scattering in uniformly moving media, using transformation formulas for plane waves 16 p2865 A70-33690

Radial energy eigenvalue problem conversion into one dimensional by infinite set of transformations, considering WKB quantization condition 16 p2942 A70-33691

Baecklund type matrix transformations application to hodograph equations system for aligned nondissipative MGD flows 16 p2958 A70-33747

Linear second order equation systems decoupling transformation, noting applications to structural feedback, flutter and control systems 16 p2943 A70-33891

Neutral type differential equations transformation to time lag system making periodic vibrations existence and stability theorems applicable 16 p2944 A70-34282

Relativistic three force transformation showing no contraction in static conditions 17 p3136 A70-34823

Continuous functions transformation by artificial neuron networks, investigating electrophysiological data for nerve tissues excitability 18 p3223 A70-36081

Electronic circuits design by discrete equivalent transformations for selecting components parameters within given limits 18 p3231 A70-36239

Fourier and Hermite transform methods for Vlasov equation solutions in plasma physics 18 p3296 A70-36789

Laminar incompressible flow in arbitrary cross section entrance region of ducts by numerical technique after transformation to boundary value problem [ASME PAPER 70-GT-91] 18 p3243 A70-36878

Normalized multidimensional Newton-Raphson method eliminating initial guess, using two- transformation technique 19 p3457 A70-37822

Random signal nonlinear transformations using relations between Laplace and Fourier transforms 20 p3583 A70-39123

Asymptotic equivalent functions for integral Laplace transformation transition to original in continuous media mechanics 20 p3726 A70-39873

Hollow shell theory equations for complex stress-strain states, using complex transform method 20 p3726 A70-39880

Analog communication optimal nonlinear modulation scheme design for large SNR through transformation into inner product functions 20 p3587 A70-39973

- Rank permutation codes equivalence to binary code class capable of generation and detection through direct and inverse transformations respectively
20 p3594 A70-39975
- Integral transforms applied to convective heat transfer during nonNewtonian fluid flow with power rheology in pipes and channels
20 p3613 A70-40177
- Jacobi-type conditions for singular optimization problems obtained by transformation to nonsingular form adaptable to linear quadratic optimal control theory
20 p3659 A70-40262
- Dolph-Pritchard technique limitations for transformation of array factor into Chebyshev polynomial as related to element spacing for single lobe endfire arrays
20 p3599 A70-40315
- Transformation theory for compressible turbulent boundary layer with arbitrary pressure gradient [AIAA PAPER 69-160]
21 p3809 A70-41741
- Nonlinear coupling in systems with two degrees of freedom, deriving transformation laws for uncoupling
21 p3940 A70-42054
- Novozhilov complex transformation method extended to Timoshenko theory of elastic shells constructed with allowance for transverse shear deformation
21 p3941 A70-42237
- Laminar axisymmetric incompressible boundary layer calculation based on Mangler transformation [ASME PAPER 70-FLCS-13]
22 p4008 A70-42414
- Numerical solution of nonlinear master equation for diatomic molecule dissociation and recombination from uncoupled differential equations
22 p4062 A70-42746
- Matrix transformations and minimization of computation algorithms for arbitrary linear equations systems, using direct methods
22 p4063 A70-43479
- Perturbation theories based on canonical transformations, examining von Zeipel theory and Hamiltonian functions
22 p4109 A70-43749
- Multidimensional correspondences between Helmholtz equation eigenfunctions and eigenvalues, including involutorial transformations
23 p4218 A70-44211
- Boundary value problems of fluid dynamics in dynamic cavities reduced to integral equations system
23 p4182 A70-44347
- Isotropic transformation of tensor space, proving theorem for reducing hemitropic function to N invariants of rotations and single vector
24 p4378 A70-45271
- Power spectrum of digital signals pulse modulated with random sequences, discussing phase modulation and z transform techniques
24 p4315 A70-46151
- TRANSFORMERS**
NT MODE TRANSFORMERS
Small signal opto-electronic wideband transformer with coupling element ensuring fast response and low sensibility to parasitic magnetic fields
03 p0459 A70-14266
- Acoustic noise control on Boeing aircraft electromagnetic components, noting iron-core magnetostriiction demanding transformer redesign
09 p1647 A70-22764
- Free-running parallel inverters limitations by critical characteristics of networks, transformers and switching elements
11 p1983 A70-26628
- DC signals measurement in automatic control circuits, ensuring transformer isolation by use of transistorized amplifier
12 p2196 A70-27682
- Electrical design of ferrite configuration high power rotary transformer for satellite slip ring replacement, minimizing transistor turn-off losses
21 p3759 A70-41222
- TRANSFORMS**
U TRANSFORMATIONS [MATHEMATICS]
TRANSIENT HEATING
NT PULSE HEATING
NT SHOCK HEATING
Transient heat transfer near two dimensional stagnation point in viscous incompressible fluid steady flow
01 p0002 A70-10457
- Transient temperature distribution in inhomogeneous material, using finite difference representation for temperature time derivative [ASME PAPER 69-WA/HT-33]
04 p0782 A70-14807
- Equations and techniques to analyze transient heat and mass transfer characteristics of packed adsorption beds for spacecraft life support systems
04 p0786 A70-15316
- Numerical solution of transient heat conduction with radiating surface, imposing Runge-Kutta type integration on surface
04 p0787 A70-15613

- Transient heat flow in three dimensional rectangular panels, developing criterion for problem dimensionality [AIAA PAPER 70-16]
06 p1182 A70-18212
- Transient heat conduction of thin circular disk with uninsulated surfaces rotating past stationary point source by finite element method
09 p1787 A70-22269
- Temperature distributions in multidimensional transient conduction heat transfer, using variational method and Laplace transformation
09 p1788 A70-22705
- Tungsten-rhenium thermocouple for high temperature measurement of samples under unsteady heating processes, analyzing instrument error sources
09 p1789 A70-23108
- Esophageal, rectal and quadriceps muscle temperatures, oxygen uptake, weight changes, skin conductance and skin evaporation during thermal transients caused by bicycle exercise
10 p1810 A70-24006
- Dynamic stresses, temperature and displacements fields in thin circular disk under transient heat sources, considering mechanical resonance vibration
10 p1958 A70-24518
- Transient thermal stresses in restrained-in-bending slab with surfaces heated and cooled with finite heat transfer coefficients
10 p1964 A70-25095
- Steady state and transient heat transfer by radiation and conduction in absorbing medium bounded by infinite coaxial cylindrical surfaces
12 p2331 A70-27697
- Transient heat transfer combining conduction and radiation in absorbing plane layer analyzed by differential approximation
12 p2332 A70-27801
- Wing rib structure transient thermal stresses analysis using photothermoelastic method
12 p2327 A70-27982
- Flat plate and cylinder with periodic Joulian heating from time dependent heat source, analyzing transient temperature distribution
14 p2664 A70-30269
- Heat flow measurement, discussing operation principles, heat conduction and stationary and transient temperature conditions
17 p3082 A70-34681
- Half space nonstationary temperature field with mobile heating at edges, using integral transformations
18 p3348 A70-36725
- Transient thermal stresses in spherical shell with distributed source and general Sturm-Liouville boundary conditions
19 p3539 A70-37800
- Eroding surface transient heat conduction problem, considering temperature dependent surface properties, ablation, convective heating, etc
20 p3738 A70-40279
- Charring ablators transient heat transfer model, calculating surface temperature and recession and pyrolysis mass loss [AIAA PAPER 70-1143]
20 p3738 A70-40280
- Variational formulation for steady and transient heat conduction with variable thermal conductivity, applying to cylindrical element
22 p4123 A70-42546
- Transient heating by solar radiation of semitransparent solid medium and adjoining fluid, establishing criteria for maximum fluid temperature
22 p4123 A70-42598
- Cylindrically symmetric transient heat conduction in biological systems for inhomogeneous media and internal sources, using finite difference method
23 p4150 A70-43900
- TRANSIENT LOADS**
NT BLAST LOADS
NT GUST LOADS
NT IMPACT LOADS
NT LANDING LOADS
NT SHOCK LOADS
Piezoelectric transducer for photoelastic analysis of HF stress waves in thick ring subjected to transient loads
02 p0389 A70-12500
- Impulsive and transient load disturbances in thin elastic finite circular plate on Pasternak type viscoelastic foundation
03 p0595 A70-13905
- Transient excitation methods for structures dynamic analysis, discussing suitable forcing transients choice
06 p1165 A70-17646
- Thermal strain measurement in operational and experimental components of high temperature plant, discussing full-bridge weldable type strain gage for transient strains
09 p1675 A70-22582
- Transient bending and shear stresses at clamped support of orthotropic circular cylindrical shells
11 p2135 A70-25985
- Transient analysis of stress waves around cracks under antiplane strain with time dependent loadings based on integral transforms
11 p2145 A70-26698

- Elastic waves propagation in finite thickness elastic plate under transient load, assuming material behavior in conformity with nonlinear Hookes law
15 p2814 A70-31544
- Transient overloads effect on long term fatigue strength of notchen and smooth steel samples, emphasizing heat treatment effect on notch sensitivity at high temperatures
15 p2814 A70-31546
- TRANSIENT OSCILLATIONS**
Tunnel diode studied for oscillations initiation resulting in hysteresis involving supply voltage and load conductance variations
03 p0459 A70-14284
- Ge IMPATT diodes under pulsed operation to produce LF high efficiency oscillations, recording current and voltage waveforms
05 p0821 A70-16417
- Ammonia maser transient spiking effects under periodic oscillation condition modulation, noting frequency sweep width role
07 p1299 A70-19685
- Two degrees of freedom assemblies transient motions using computer, solving acceleration and deceleration problems in mechanical systems
08 p1502 A70-20699
- Dynamic response of joined elastic quarter spaces of solids to time varying free surface shear tractions parallel to plane of juncture [ASME PAPER 69-APMW-16]
08 p1591 A70-21467
- Transient waves propagation in homogeneous isotropic linearly elastic half space excited by traveling normal point load on surface, deriving displacements [ASME PAPER 69-APMW-12]
08 p1592 A70-21468
- Transient process statistical characteristics in He-Ne laser operating near excitation threshold with pronounced rise time oscillations of light wave field
12 p2247 A70-27507
- Initial reentry body motion effects on angle of attack envelope value throughout trajectory, including altitude of maximum transient amplification
16 p2982 A70-33892
- Linear damping theory, discussing simple harmonic motion model extension to transient motion
19 p3472 A70-38041
- Transient elastic vibrations of air and liquid filled cylindrical shells under radial impact, using shadow-optical cinematography [SMPT PREPRINT 107]
22 p4031 A70-43030
- TRANSIENT PRESSURES**
Induction distances, transient pressures and wave propagation rates for detonation waves in cylindrical tube low temperature hydrogen-oxygen mixtures
03 p0607 A70-13919
- Aviation kerosene pipeline column separation after valve closure, solving differential equations for transient pressures propagation to predict vapor cavities duration
09 p1665 A70-23744
- Phenomenological theory of transient high temperature creep, considering internal back stress
15 p2763 A70-32809
- Fast response transducer for measuring transient pressures due to shock interaction
17 p3093 A70-35484
- Parachute canopy surfaces transient aerodynamic pressures during unsteady processes, using piston theory [AIAA PAPER 70-1175]
21 p3754 A70-41838
- TRANSIENT RESPONSE**
Transient magnetic resonance technique for non-destructive testing of elements with nuclei having magnetic moment, considering cereal grains, propellants, metal powder and plastics
01 p0097 A70-10014
- Transversely isotropic circular cylinder acted upon by transient shearing force at one end, noting forced torsional oscillation using cylindrical coordinates
01 p0200 A70-10550
- Transient energy transfer during expansion of plane layer of radiating gas bounded by strong shock, assuming LTE and perfect inviscid nonconducting gas
02 p0279 A70-12230
- Transient response role in limiter-discriminator detection of binary FSK signals, comparing resulting and optimum error probabilities
02 p0258 A70-12421
- Triple mode control strategy to provide near optimal stable transient response in variably loaded electrohydraulic servomechanisms
02 p0272 A70-12728
- Transient heat transfer in forced convection flow over curved wall with zero Prandtl number, applying to laminar boundary layer with variable free stream velocity
02 p0400 A70-12857
- Transient processes in ruby quantum paramagnetic amplifier during pumping, showing technique for saturation prevention and relaxation effects on population inversion
03 p0456 A70-13460
- Thermocouples response to rapid temperature rise produced by discharge from low inductance high voltage capacitor bank
03 p0486 A70-13559

Transient response of heterogeneous solid propellant combustion surface determined by step technique regarding pressure buildup and drop conditions [ONERA-TP-748] 03 p0544 A70-13635

Unsteady linear automatic control systems transient functions determined by approximation method 03 p0460 A70-13732

Transient creep analysis of simply supported circular cylindrical shells subjected to internal pressure based on strain and time hardening theories 03 p0595 A70-13813

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios 03 p0413 A70-13859

Transient thermal stresses in photoelastic models of various shapes under various steady state or transient temperature conditions, describing instrumentation and experimental methods 03 p0600 A70-14308

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness 04 p0760 A70-14428

Complementary symmetry MOS/CMOS integrated circuit transient response to electron irradiation 04 p0657 A70-14733

Nuclear rocket engine core thermal and neutronic transient and steady state dynamics digital simulation, showing advantages over lump model analysis [ASME PAPER 69-WA/NE-3] 04 p0717 A70-14757

Transient heat conduction solution by finite element methods application to nonlinear boundary condition problems 04 p0781 A70-14804

Transient processes of strain wave propagation in elastic shells and plates under time varying loads 04 p0773 A70-15010

Transient plane disturbance of stream angular to applied magnetic field, discussing relationship to airfoil and Alfvén waves 04 p0615 A70-15093

Integral-criterion optimization of transient processes in mechanical systems synthesis with favorable dynamic and damping characteristics 04 p0720 A70-15218

Control system response improvement by state variable feedback illustrated by frequency and transient response tests data from analog model 04 p0662 A70-15331

Parasitic transient process in automatic control system during switching to mode stabilized with respect to certain coordinates 04 p0662 A70-15433

Vertical electric dipole transient response over circular ground screen, studying low angle radiation patterns 06 p1021 A70-17573

Transient excitation methods for structures dynamic analysis, discussing suitable forcing transients choice 06 p1165 A70-17646

Corrective open-loop circuit, using delay elements for compensation of transient response in linear circuits with lumped parameters for pulse modulation transmissions 06 p1023 A70-17774

Heat conduction transient field problems in two and three dimensional isoparametric finite element solutions using Galerkin method 06 p1178 A70-17938

Semiinfinite simply supported cylindrical shell transient response due to axisymmetrically engulfing step pressure wave, investigating moving load critical velocity [AIAA PAPER 70-18] 06 p1170 A70-18063

Transient response analysis in isotropic material under thermal galvanomagnetic effects involving interaction electric and thermal conductions in applied magnetic field 06 p1107 A70-18213

Computerized FORTRAN equations simulation of linear and nonlinear circuits for symbolic analysis and transient response 06 p1026 A70-18424

Radiation environments effect on logic circuitry constructed of MOS and bipolar transistors, discussing permanent and transient effects 07 p1242 A70-20149

Unsteady MHD flow at forward stagnation point analyzed for magnetic field effect on transient phenomena, using difference-differential numerical method 07 p1354 A70-20235

Transient phenomena accompanying heating of fluid situated between heat conducting plane horizontal plates, using interferometry and streak photography 08 p1596 A70-20592

Transient response analysis of nanosecond pulsed transistor amplifier having common-emitter configuration with negative feedback 08 p1474 A70-21229

Transient heat conduction and stationary temperature distribution calculation in curvilinear coordinates using finite element method 08 p1590 A70-21362

Transient radial temperature distributions in cylindrical shells via Carslaw and Jaeger procedure involving binomial theorem and asymptotic expansions of Bessel function 08 p1599 A70-21588

Radar target short pulse transient scattering response computation using fast Fourier transform algorithm 08 p1463 A70-21597

Statistical characteristics of Q switched He-Ne laser emission gain during transient process from subthreshold to superthreshold value 08 p1514 A70-21814

Automatic photographic data processing system with transient reproducer to obtain digital format for computer analysis 09 p1673 A70-22030

Transient regimes of solid fuel diffusion combustion in channel with oxidizer fed in from outside, proposing finite difference scheme for integrating equations 09 p1741 A70-22114

Solid radiating sphere cooling in space, determining transient temperature distribution by finite difference computing techniques 09 p1790 A70-23562

Transient response of fin-tube space radiators sudden steady state operation halting and system cooling 09 p1790 A70-23564

Transient process statistical calculation in discrete elastic mechanical system possessing energy dissipation under time dependent cross correlated random forces 09 p1729 A70-23595

Pulse signal transmission rate increase by transient processes compensator, discussing stability relation to signal to noise ratios 09 p1639 A70-23696

Transient analysis of transistor under large input signal accounting for minority carrier life and base collector capacity 10 p1849 A70-24383

Linear time-varying systems transient responses prediction, using Krylov-Bogolubov method and parameter plane analysis 10 p1855 A70-24704

Reaction time in determining visual transient response at frequencies above flicker fusion 10 p1818 A70-24717

Dynamic characteristics of structures measured, using digital computer to analyze transient data from frequency sweep tests 10 p1961 A70-25059

Distributed gain amplifier circuits with K-type filters, deriving analytical relations for pulsed and transient characteristics 10 p1853 A70-25131

Laser field transient properties in switching-on processes, discussing Q switching, detuning switch-off and pump power switch-on 11 p2064 A70-26843

Transient processes in n-stage aperiodic amplifier during instantaneous change in phase and amplitude of emf at input 12 p2195 A70-27536

Amplitude stabilization transient processes at output of four terminal network with arbitrary phase and amplitude characteristics by representing pulse transfer function in series 12 p2184 A70-27537

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness 13 p2503 A70-28453

Digital signals transmission codes comparison for transient response by reducing channel bandwidth to obtain error probability 13 p2372 A70-28899

Differential equations of controller providing optimum transient response for plant with indeterminate parameters, allowing for nonadditive random noise 13 p2382 A70-29278

Lunar seismogram response behavior in terms of power law model of sedimentary earth rock anelasticity 13 p2497 A70-29856

Alouette spikes decrease with time equivalent to antenna transient response during hot plasma immersion 13 p2371 A70-29921

Ignition transients in solid propellant rocket engines, taking into consideration flame temperature changes with pressure and igniter secondary mass addition 14 p2628 A70-30778

Lossless waveguide propagation analysis as transient problem by means of Laplace transform 14 p2556 A70-30923

Soviet book on multivariable automatic control systems analysis and synthesis covering equations of motion, nonlinearities, pulse control, transient responses, etc 14 p2561 A70-30954

Gas turbine performance dynamic modeling by analog and digital computer simulation providing clear picture of transient behavior 14 p2629 A70-30991

Alpha-beta and Kalman tracking filters with randomly interrupted data, evaluating transient responses as function of radar measurement accuracy and valid data acquisition probability 14 p2557 A70-31186

Transient response of self adaptive systems subjected to determinate or random signal mixed with additive noise 16 p2882 A70-33234

Laminar boundary layer model for viscous losses during transient turbulent liquid flow in tube, assuming slug flow for core [ASME PAPER 70-FE-8] 16 p2891 A70-33627

Avalanche diode transient temperature response, measuring thermal impedance under pulse bias conditions 16 p2878 A70-33695

Sandwich rings inplane transient response to concentrated radial impulsive loads based on Timoshenko type theory, noting dependence on extensional to shear stiffness ratio 16 p2993 A70-34093

Transient signal generation during large amplitude ultrasonic pulse propagation through carbon tetrachloride 16 p2952 A70-34097

Nonlinear mechanical systems transient motion analysis based on phase trajectories 16 p2944 A70-34283

Double acoustical resonators transient response to excitation by single sine wave, presenting pressure magnification factors as function of frequencies 17 p3135 A70-34521

Holographic measurement of transient behavior of structures under unsteady or impulsive loading, using pulsed lasers 17 p3085 A70-35008

Transient wave propagation in homogeneous anisotropic media, using hyperbolic equations and unitary operator 17 p3137 A70-35607

Infinite Bernoulli-Euler beam transient and steady state response, considering damping, elastic foundation and constant axial load effects 18 p3339 A70-36490

Liquid fuel jet engine thrust aftereffect momentum, investigating switching off transient process 19 p3490 A70-37249

Omnidirectional dynamic stress gage as embedded elastic inclusion, discussing transient response to ground shock compression wave pressure 19 p3422 A70-37699

Transient system decay characteristics, discussing equilibrium point damping time for asymptotically stable systems of ordinary differential equations 19 p3542 A70-38066

Frequency multipliers with charge storage diode, analyzing turn-off transient effect on performance by charge control model 19 p3391 A70-38748

Weakly ionized gas subjected to pulsed DC electric field, analyzing transient relaxation of electrons velocity distribution 19 p3482 A70-38899

Laser pulse amplification by stimulated thermal Rayleigh scattering in absorbing media by transient theory 20 p3640 A70-39113

Fretting corrosion zone steel, measuring transient temperature distribution during contact friction 20 p3647 A70-39243

Second order automatic phase control system with proportionately integrating filter, calculating transient response by harmonic linearization method 20 p3584 A70-39253

Collisionless cylindrical Langmuir probe response in turbulent plasma for mean and statistical properties 20 p3684 A70-40258

Uniformly loaded thin elastoplastic spherical shells, calculating strain hardening and strain rate effects on transient response 21 p3935 A70-41255

Electromagnetic test equipment transient waveform control using on-line digital computer in near real time configuration 21 p3805 A70-41270

Digital bit synchronization phase locked loop steady state and transient performance in white Gaussian noise 21 p3802 A70-41352

Transient behavior of first order phase locked loop in presence of noise, solving Fokker-Planck equation for loop dynamics by numerical integration 21 p3802 A70-42181

GaAs point contact diodes quick response performance with glass-metal or metal-ceramic bases, obtaining Schottky-type rectifying barriers by half period currents 22 p3995 A70-42406

- Bistable wall attachment fluid amplifier, calculating unsteady end wall switching transient based on turbulent jet entrainment properties
[ASME PAPER 70-FLCS-3] 22 p3964 A70-42428
- Buoyancy effects on transient free convection heat transfer in revolving tube for zero to 100 g centrifugal acceleration
[ASME PAPER 70-HT-10] 22 p4122 A70-42437
- Thermocouple transient response characteristics in deflagrating and ablative low conductivity materials with high temperature gradients
[ASME PAPER 70-HT-7] 22 p4122 A70-42440
- Finned tube-sheet spacecraft radiator transient response for perturbations caused by power supply and heat sink temperature changes
22 p4123 A70-42519
- Elastic cylindrical shell transient response to plane acoustic shock wave traveling through light fluid medium
22 p4114 A70-42647
- Nonlinear automatic control systems transient response by frequency response curves of amplitude and phase characteristics
22 p4001 A70-42831
- Transient stresses and strains in plane wedge under dynamic load, using photoelastic, high speed photographic and strain gage studies
[SMPE PREPRINT 93] 22 p4036 A70-43062
- Gas reductors transient processes, analyzing valve equations of motion
22 p3965 A70-43357
- Cantilever beam transient response measurement by stored beam /real time/ holographic interferometry combined with high speed motion picture photography
22 p4039 A70-43452
- LF passband ideal filter instantaneous pulse response, using delta function model
22 p4005 A70-43555
- Arbitrary shells large deflection transient response, using finite difference computer program
23 p4272 A70-44710
- Integration operators for transient structural response in qualification tests for internal components of dynamically loaded structures
23 p4273 A70-44719
- Arbitrarily shaped cylindrical conducting structures with transient incident electromagnetic wave, calculating scattering from integral equation by digital computer
23 p4165 A70-44957
- Electroacoustic circuits transient behavior, examining loudspeaker effectiveness
24 p4321 A70-45374
- Pendulum dynamic stability under parametric excitation, presenting transient and steady state solutions by linear and nonlinear theory applications
24 p4379 A70-45587
- Finite thickness metal plate eddy current response to pulsed field from aperture probe
24 p4344 A70-45696

TRANSIENTS [SURGES]

TRANSISTOR AMPLIFIERS

- Noise source model of Si planar diffused bipolar IC transistors in operational amplifiers, noting base-emitter junction burst noise
02 p0257 A70-12192
- Center frequency shift prediction model for nonlinear collector junction capacitance in transistor Class C amplifiers
04 p0660 A70-15343
- Transistorized low impedance cascades as amplifiers for proportional counters in studying cosmic ray intensity variations
05 p0845 A70-15934
- Transistorized wideband amplifiers synthesis by combining dynamic parameters method with poles and zeros method
05 p0819 A70-16249
- Microwave transistor amplifier design and specifications, discussing applications and economy in design, production and use
06 p1018 A70-17358
- Transistor RF and IF amplifiers designed for 210-ft antenna of Australian National Radio Astronomy Observatory
07 p1243 A70-20350
- Gain stabilization of transistorized LF selective amplifiers in radiometric receivers, discussing two-frequency resonance system
08 p1473 A70-21061
- Transient response analysis of nanosecond pulsed transistor amplifier having common-emitter configuration with negative feedback
08 p1474 A70-21229
- Multistage microwave transistor amplifiers design for 4 GHz band, describing poor input/output impedance matching solution
08 p1475 A70-21279
- UHF transistor power amplifier, discussing CW and pulse performance and power gain
08 p1477 A70-21294

- Repetitive electronic differential analyzer with transistorized operational amplifiers for iterated solutions of differential equations
08 p1478 A70-21836

- MOS transistor amplifier circuits, analyzing circuit parameters for common-source, common-drain and common-gate configurations
09 p1643 A70-22126

- Integrated CW UHF power amplifier modules using thin film lumped elements and UHF power transistor chips
10 p1846 A70-23884

- S band CW high power broadband power source consisting of transistor amplifier-driven varactor doubler chains in hybrid integrated form
10 p1846 A70-23885

- Equivalent circuits for transistors in class A amplification over wide frequency band
11 p2021 A70-26831

- DC signals measurement in automatic control circuits, ensuring transformer isolation by use of transistorized amplifier
12 p2196 A70-27682

- Wideband high power output transistor amplifier design features and operational characteristics
12 p2199 A70-27980

- Double diffused epitaxial silicon bipolar microwave transistor design, fabrication and performance evaluation, including scattering parameters vs frequency for common-emitter amplifier
13 p2379 A70-29592

- Wideband microwave transistor IF amplifier for mm wave communication system
14 p2555 A70-30283

- Computerized design of transistorized UHF wide-band amplifier, using successive approximations for optimum circuit automatic selection
14 p2556 A70-30668

- UHF Si p-n-p transistors with low noise and high gain for small signal applications
14 p2557 A70-31161

- Transistorized amplifiers synthesis with multiloop feedback
15 p2707 A70-31518

- Transistor amplifier with back coupled emitter and parallel inductive correction, calculating optimal frequency and phase characteristics under complex load
20 p3598 A70-39790

- Low noise FET amplifier for satellite magnetometer, measuring interplanetary fields
21 p3799 A70-41923

- Transistorized IF amplifier output matching to long transmission line, deriving formulas for gain and pass-band over wide output impedance range
22 p3995 A70-42520

- Oscillatory stability of selective RF transistor amplifiers, using stage dimensioning and gain graphs
22 p3996 A70-42818

- Design tolerances and compensating networks for microwave transistor amplifier, using synthesis search and trial calculation by computer
23 p4168 A70-43780

- Low noise dual receiver system for satellite communication earth station using parametric and transistor amplifiers
23 p4169 A70-43791

- Transistorized power amplifiers, frequency multipliers and parametric multipliers design for VHF and UHF ranges
23 p4170 A70-43876

- Semiconductor microwave generator design for maser simulator using transistorized amplifier, varactor frequency multiplier and diode multiplier
23 p4171 A70-43878

TRANSISTOR CIRCUITS

- Nonlinear distortion in switching transistor mixer predicted by modifying analysis used for diode modulator and mixer circuitry
02 p0268 A70-12423
- Electronic transistorized harmonic signal integrator operating in connection with static-dynamic bridge
03 p0493 A70-13975
- Electron image projection tube for fabricating integrated circuits of micron size transistors
03 p0458 A70-14033
- Transistors used as UHF high-Q inductance active filters, utilizing internal phase shift and energy storage characteristics
04 p0694 A70-15490
- Microwave Si transistors with overlay and interdigital geometries and integrated circuit design considerations for power amplifiers, power oscillators and frequency multipliers
05 p0819 A70-16149
- Transistor circuit design with junction compensation techniques to reduce transient gamma radiation effects
05 p0821 A70-16418

- Circuit and operation of transistorized RF power attenuator with linear attenuation and binary code control by digital computer
06 p1022 A70-17777

- Circuit and operation of transistorized linear voltage-to-frequency converter performing current integration proportional to input signal
06 p1022 A70-17779

- Transistorized circuit for automatic control of photographic studies of pupillary reaction transient states in rabbits subjected to light stimulus
07 p1216 A70-18731

- Size reduction and low noise temperature in receiving antennas obtained by transistor integration and resonance frequency modulation
07 p1241 A70-19353

- Radiation environments effect on logic circuitry constructed of MOS and bipolar transistors, discussing permanent and transient effects
07 p1242 A70-20149

- Short high current pulses generation by avalanche transistors in circuits suitable for investigating low impedance laser diode
09 p1642 A70-22035

- MOS transistor amplifier circuits, analyzing circuit parameters for common-source, common-drain and common-gate configurations
09 p1643 A70-22126

- Ferrimagnetically tunable transistor oscillator in common collector configuration
09 p1645 A70-22603

- Steady state analysis of harmonic oscillations in HF synchronized transistor autooscillators, considering transistor inertial properties
09 p1649 A70-23341

- Pulse-shaping transistor circuit analysis, considering circuit elements roles and temperature, pulse duration and leading and trailing edges durations effects
09 p1650 A70-23628

- Transistorized pulse repetition frequency bandpass and band elimination filters, using trigger circuit to improve pulse-edge steepness and critical frequency stability
09 p1650 A70-23630

- Transistor bistable multivibrator design by graphic analytic method, considering effects of loading and supply voltages, temperature and component values on circuit performance
10 p1848 A70-23995

- Wideband transistorized DC amplifier circuit and operation for outputs of tensometers, thermoelectric, electrodynamic and resistance sensors
11 p2019 A70-26435

- Transistorized system for static and dynamic strain measurements of mechanical quantities
11 p2055 A70-26437

- Transistorized differed synchronizer for delaying photoflash initiation in scientific photography
12 p2228 A70-26879

- Transistorized pistol grip probe design, circuit and operation for testing wobble and asymmetry in rotating ring commutators of electric motors
12 p2165 A70-27495

- Brushless DC motor with rotor position sensor and transistor commutator for armature current switching, describing design and operation
12 p2165 A70-27525

- Transistorized pulsed activity converter for observing analog curve of change in pulse frequency
12 p2179 A70-28316

- Transistorized voltage to pulse width converter based on constant current capacitor discharge
13 p2378 A70-29457

- Large signal junction FET model involving piecewise linear approximation for ECAP circuit analysis program
15 p2711 A70-32596

- Avalanche transistor circuits for rectangular pulses generation, considering delay line for optimum results
18 p3233 A70-36774

- Thyristor circuit for storing or generating digital control signals, considering reliability at high noise levels
19 p3385 A70-37377

- Pulse shaper circuits with tunnel diodes and transistors, describing recovery time decrease
20 p3596 A70-38972

- Epitaxially grown Si contact for area reduction of MOS transistor circuits
20 p3596 A70-39099

- Matrix condenser for tuning hybrid thin film self excited quartz oscillator with common base transistor configuration, discussing electrical properties and fabrication
20 p3597 A70-39257

- Transistorized quartz oscillators, testing frequency and amplitude stabilities and functions of input and output capacitances, supply voltage and feedback
20 p3597 A70-39258

- Normal mode pulsed ruby laser system with Xe flash lamp pumping, trigger circuit and transistorized power supply
20 p3643 A70-40355

DC transistorized Nor logic gates design based on graphic analytic method permitting influence of circuit parameters variations for reliability improvement 21 p3793 A70-40765

Stress tolerant thyristor and transistor switching electronic converter for ion propulsion engine [AIAA PAPER 70-1157] 21 p3866 A70-40901

Reverse curvature silicon transistor linearizer for hot-wire and thin-film constant temperature anemometers for aorta blood flow velocity measurements 21 p3827 A70-41458

Multipurpose transistorized tachometer for rotating body speed measurement, control and recording, using electronic integrator and magnet pickup 21 p3831 A70-42245

Transistorized DC to AC converter providing sinusoidal output to power automatic spacecraft control devices via pulse width modulation 22 p3994 A70-42309

High power short rise time square wave inverter using power transistors 22 p3965 A70-43336

Transistor circuit analysis at high frequencies and large signals, considering collector current, inertia and conductance conditioned by diffusion and recombination 23 p4161 A70-43779

MOS transistor trigger circuit design parameters statistical calculation and optimization by Monte Carlo method using computer 23 p4171 A70-43957

Transistorized LF RC filter circuit design for desired frequency response characteristics 23 p4171 A70-43962

MIS model applied to memory transistor with thin insulator consisting of silicon nitride on silicon dioxide 23 p4172 A70-44197

TRANSISTOR LOGIC

Diode transistor microelectronic logic circuit reliability, efficiency and optimization using digital computer 04 p0659 A70-15210

Seven segment in-line digital readout circuit for binary-quinary decade counter, using resistance transistor logic 21 p3793 A70-40763

Digital computer constructed with diodes and transistors logic for evaluating matrix determinants and minors 23 p4166 A70-43955

TRANSISTORS

NT JUNCTION TRANSISTORS

NT PHOTOTRANSISTORS

NT SILICON TRANSISTORS

Mathematical model coefficients determination for planar diffused transistor, obtaining admittance parameters 01 p0048 A70-10050

Book on thin film transistors microelectronics covering semiconductor physics, fabrication, analysis, applications and comparison with MOS transistors 01 p0052 A70-11329

Transistor behavior prediction at threshold of large signal conditions, using nomographs to evaluate maximum drive levels before distortion onset 03 p0452 A70-13966

Device modeling for computer aided design and analysis of integrated circuits, discussing list of desirable properties and applications to transistor design 03 p0454 A70-14026

Transistor admittance and diffusion parameters in direct measurement with varying frequency, evaluating reliability 03 p0459 A70-14285

Electron radiation-induced second breakdown in transistors indicated by time delay and failure by collector-to-emitter short 04 p0657 A70-14734

Steady state electrical characteristics of double diffused planar transistor calculated by iterative algorithm under arbitrary bias conditions 06 p1016 A70-17125

Microwave transistors frequency and power characteristics and tradeoffs in relation to thermal and packaging design 06 p1023 A70-18390

Operation mode for full-bridge programmed waveform static inverter permitting saturation of power transistors in DC power conversion 08 p1439 A70-20707

Steady state finite difference solution of equations governing arbitrarily biased bipolar transistor action in two dimensions 08 p1477 A70-21641

Transistor current gain measurement at HF by two channel method 09 p1632 A70-22234

Transient analysis of transistor under large input signal accounting for minority carrier life and base collector capacity 10 p1849 A70-24383

Forced oscillations of oscillator matched to transistor as active element, obtaining stability conditions by Liapunov first method 11 p2018 A70-25945

Linville bipolar transistor model for computer-aided design programs 11 p2021 A70-26830

Temperature effects on base and surface currents of plane bipolar transistors, testing validity of surface recombination process model 11 p2021 A70-26832

Thermal feedback theory of flicker noise generation in transistors and temperature fluctuations effect in vicinity of recombination centers 12 p2196 A70-27687

Microwave power transistors design and packaging 15 p2711 A70-32589

Bipolar transistor behavior identification and characterization in static regime, discussing measurement methods for parameters of IBIS model 17 p3054 A70-35414

Microwave power transistors, considering figure of merit, performance and packaging 19 p3386 A70-37691

Microwave transistors parameters measurement by scattering S /parameter method for characterizing noise, gain and dynamic range, reading input and output impedances from Smith chart 19 p3386 A70-37692

Nonuniform emitter current distribution effect on power transistor thermal stability, discussing temperature distribution effects 19 p3387 A70-37821

Complementary metal oxide semiconductor and bipolar transistors fabrication on same integrated circuit chip by C-squared technology 20 p3598 A70-40130

Microwave transistors for power generation and amplification, discussing packaging and pellet design 20 p3599 A70-40324

Secondary breakdown meter for semiconductor diodes and transistors with reverse base drive, utilizing I-V characteristics and voltage waveform 21 p3801 A70-42248

Darlington composite transistor stability, examining biasing resistance variation effect 22 p3998 A70-43257

Microplasma and burst noise measurements on discrete silicon planar transistors indicating origin at emitter-base junction 22 p3998 A70-43331

P-n junction dependent FM noise spectrum of UHF transistor power oscillator at transit frequency 23 p4161 A70-43789

Computerized mathematical modeling of transistors statistical and dynamic characteristics as functions of structural parameters 23 p4171 A70-43954

RF power transistors failure analysis, describing IR radiometer technique 23 p4175 A70-44747

TRANSIT

Ionosphere beacon satellites BeB and BeC transits for field alignment of small ionospheric irregularities 04 p0678 A70-14975

TRANSIT SATELLITES

Automatic ship navigation system using Transit satellites and onboard digital computer for routine tasks of dead reckoning 22 p4068 A70-42666

TRANSIT TIME

Electronic distance measurements involving transit time determination for signal from instrument to far point and back 03 p0495 A70-14176

Solar flare duration effect on propagation and modification of forward-reverse shock pair between sun and 1 AU, using equations of motion for spherically symmetric flow 04 p0740 A70-15104

Transit instrument azimuthal stability, investigating horizontal axis support, screw controls and tube position during star observations 04 p0693 A70-15484

Time determination at astronomical observatories using transit instrument observations concerning stellar distributions and magnitudes 04 p0756 A70-15486

Electronic recorder design and operation for mean moments of star transit times 04 p0694 A70-15491

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux observed near earth causing magnetospheric storm of 17-19 April 1965 04 p0683 A70-15736

Aperture dissection scheme to reduce transit time of Bragg angle acousto-optical scanning of laser beam 05 p0860 A70-16657

Delay in photoelectric recording of transit of stars, considering stellar image brightness distribution and temperature 05 p0918 A70-16920

Lower ionosphere effects on HF propagation modes observed by pulse system, discussing propagation time, mode structure, transmission loss, etc 07 p1232 A70-19179

Nitrogen molecules pulsed high energy beams transit time measurement by gated time of flight procedure and by multichannel analyzer 07 p1345 A70-20136

SHF avalanche transit time oscillator with FM noise reduction by injection phase locking 08 p1462 A70-21594

Avalanche diodes properties, establishing equivalent circuit accounting for static electricity, carriers transit time and thermal effects 10 p1850 A70-24625

Air terminal and ground transfer design to provide improved access to aircraft and total transportation time reduction 12 p2208 A70-27992

Interplanetary shock wave properties in solar wind, determining propagation velocity, transit times proton density, proton and electron temperatures 13 p2481 A70-30066

Body waves in lunar models, calculating travel times and amplitudes 14 p2638 A70-30674

Unsteady state and transit time analysis of geoeffective interplanetary plasma flux near earth causing magnetospheric storm of 17-19 April 1965 14 p2575 A70-30820

Mean first passage signal time in one shot electronic system as function of threshold level 14 p2552 A70-31198

Phase shift ultrasonic flowmeter measuring transit time between oppositely propagating waves in blood vessels 15 p2691 A70-31921

Silicon avalanche transit time diodes as CW microwave generators and amplifiers 16 p2876 A70-33404

S and SKS travel times for arc distances of 30-126 degrees 16 p2898 A70-33975

Planet Mercury transit on photographs, noting role as test for terrestrial time systems 18 p3314 A70-36515

Avalanche transit time diode and transferred electron oscillators in microwave systems, discussing design, performance and applications 18 p2322 A70-36675

Mercury transit across sun on 9 May 1970, discussing observation, equipment and photographs 18 p3319 A70-37050

TRANSITION

Thioformaldehyde isotopic species reversible transition in interstellar clouds 20 p3703 A70-39164

TRANSITION FLOW

Flow stability criterion in rough pipes, deriving laminar to turbulent flow transition characteristics and drag as function of Reynolds number 01 p0064 A70-10998

Laminar-turbulent transition in free axisymmetric viscous incompressible jet from shaped nozzle and long cylindrical tube 03 p0466 A70-13396

Laminar flow separation, reattachment and transition over downstream step, including visual observations of smoke filaments, velocity fluctuation measurements and velocity profiles [ASME PAPER 69-WA/FE-5] 04 p0667 A70-14784

Acoustic technique for flow transition detection on hypersonic ablating reentry vehicles, presenting supersonic wind tunnel test results 04 p0620 A70-15531

Wall and total temperature variations effects on transition Reynolds number in hypersonic He tunnel, noting sound mode dominance 04 p0620 A70-15560

Entrance shape effects on tube rarefied flow in transition regime, noting role of Reynolds number in shape selection 04 p0675 A70-15593

Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization [AIAA PAPER 69-755] 06 p1032 A70-17212

Transition regime gas flows using Navier-Stokes equations and boundary conditions set, considering heat transfer, torque and drag in spherical geometry 06 p1049 A70-18331

Hypersonic leading edge problem solved, using merged layer theory to provide link between noncontinuum flow upstream of transition and boundary layer flow downstream 06 p0980 A70-18354

Hypersonic rarefied argon and nitrogen flows over flat plate, investigating flow field and surface measurements from merged layer into transition regime 06 p0981 A70-18355

Nitrogen hypersonic transitional flow at adiabatic sharp flat plate leading edge, presenting density, flow-

field shape and local rotational temperature for various regions 06 p0982 A70-18361

Surface pressures and shock wave shapes on sharp flat plates and wedges in rarefied hypersonic transition flow with emphasis on merged layer regime 06 p0982 A70-18362

Sphere and sharp slender cone drag coefficients in hypersonic transitional flow measured by flow modulation technique 06 p0984 A70-18389

Wind tunnel experiments for apparent reverse transition during expansion fan and turbulent boundary layer interaction, discussing Reynolds stresses 07 p1257 A70-19345

Turbulent-laminar transition in divergent radial flow between disks, relating velocity fluctuations to Reynolds number 08 p1483 A70-21235

Hypersonic spherical gas expansion into finite pressure region with transition from supersonic to subsonic flow in shock wave, discussing structure and pressure effects 09 p1658 A70-22116

Axisymmetric helium jet transition to turbulent flow in air slipstream, measuring temperature and velocity profiles 09 p1660 A70-22439

Two dimensional supersonic wake transition characteristics noting effect of heat transfer from vehicle or model body 09 p1605 A70-23184

Transition regime of rarefied gas dynamics using kinetic theory of gases, discussing Couette and Poiseuille flow, heat transfer and time dependent problems 10 p1919 A70-24141

Laminar boundary layer transition to quasi-cellular flow in natural convection above horizontal heated plates and disks 12 p2155 A70-27197

Tube relaminarization, predicting turbulent-to-laminar flow transition 12 p2212 A70-28118

Hypersonic low density transitional flow over slender conical vehicle, calculating drag coefficient and density profiles 14 p2529 A70-31365

Laminar to turbulent transitions determination in sub-/supersonic flows, reviewing methods based on hot-wire anemometer output signal [ONERA-TP-841] 15 p2720 A70-31918

Laminar to turbulent flow transition observation in laser induced vertical convection, using carbon dioxide-nitrogen laser 15 p2751 A70-31980

Stationary gas flows continuous to rarefied transition analysis based on mean free path anisotropy 15 p2721 A70-32139

Laser velocimeter application to laminar-turbulent flow transition at glass tube centerline 15 p2741 A70-32521

Hemisphere model flow field investigations in low density plasma wind tunnel, considering flow regimes of transition and shock formation 15 p2673 A70-32838

Electron density fluctuations in transitional zone of turbulent plasma jet, using digital analysis of Langmuir probe signals [AIAA PAPER 70-731] 16 p2958 A70-33495

Thin wire Langmuir probe measurements of electron temperature and density in transition and free molecular nozzle flow of short duration reflected shock tunnel 16 p2912 A70-33864

Wedge and cylinder high supersonic wakes stability and transition at various Reynolds numbers 17 p3006 A70-34465

Two dimensional supersonic wake behind heated slender flat plate, considering flow properties in transition zone 17 p3006 A70-34466

Transitional flow separation upstream of compression corner at trailing edge of sharp leading edge flat plate [AIAA PAPER 70-764] 17 p3007 A70-34487

Fluctuation measurements at wall and across laminar, transitional and turbulent compressible boundary layers on flat plate, using hot film probes [AIAA PAPER 70-745] 17 p3066 A70-34498

Temperature dependent absorption, nonsteady beam propagation and laminar-turbulent transition in laser induced convection column, measuring turbulence onset by fine wire resistance thermometer [AIAA PAPER 70-800] 17 p3107 A70-35197

Hypersonic rarefied gas flow around flat plate with sharp leading edge and circular cylinder in transition region 17 p3011 A70-35241

Acoustic measurement for transition localization on reentry vehicles, describing apparatus and techniques 17 p3093 A70-35483

Boundary layer oscillatory flow interaction with nonuniformly rotating lamina, calculating velocity distribution and transitional frequencies 19 p3406 A70-38443

Transitional flow separation upstream of compression corner for two dimensional model relationship to attached flow and boundary layer transition on plate 21 p3746 A70-41864

Laminar-turbulent transition in magnetic field using Plexiglas model, observing inlet conditions effect on MHD flow stability 21 p3861 A70-42234

Heat transfer in heated wire in supersonic flow near molecular transition zone, estimating anemometer sensitivity to motion fluctuations 22 p3959 A70-43240

Transition zone heat exchange during air mixed flow in pipes with conical duct or Vitoshinski nozzle inlets 23 p4283 A70-44729

TRANSITION LAYERS

Surface wave attenuation in homogeneous plasma cylinder caused by resonance in transition layer between plasma and vacuum 03 p0447 A70-13286

Plasma sheath transition structure surrounding cylindrical probe in weak axial magnetic field on basis of moment equations 07 p1353 A70-20230

Horizontal geomagnetic force variations, considering ionospheric wind effects on ions in transition layer 13 p2402 A70-30057

Chromosphere-corona transition region - Conference, Boulder, Colorado, August 1969 21 p3924 A70-42182

Transition region structure between chromosphere and corona, discussing temperature, theoretical models, energy balance and magnetic fields from far UV data 21 p3924 A70-42183

Chromosphere-corona transition region model from limb-disk optically thin line intensities 21 p3924 A70-42184

Energy deposition in solar corona associated with momentum transfer from heating wave in transition region, discussing wave pressures 21 p3925 A70-42190

Shock waves formation and dynamic characteristics in transition region response to infalling material from solar flares 21 p3883 A70-42193

Solar spectra isodentitraces indicating transition zones between and on sides of spicules in sheaths 21 p3926 A70-42197

Transition zone height in corona-chromosphere interface from high resolution disk spectra near limb 21 p3926 A70-42198

Two band Drude model validity for analysis of IR optical properties of transition metals obtained from experimental dielectric constant data 02 p0339 A70-12452

Lattice misfit influence on metastable omega phase morphology and stability in Ti transition metal alloys 03 p0508 A70-13146

Electron thermal capacity of d-transition metals for stable configurations determined by X ray spectral analysis 04 p0721 A70-14408

Solubilities and heats of solutions of Mo, W, V, Ti and Zr in liquid K 04 p0710 A70-15632

Optical, electrical and structural properties of transition metal dichalcogenides 05 p0890 A70-15755

Binary transition metal hydrides consisting of single metal and single hydrogen isotope, discussing preparation and kinetic, thermodynamic and structural properties 05 p0863 A70-16523

Thermoelectric power (TEP) of transition metals, detecting empirical regularities in TEP, nonlinear temperature dependence, etc 05 p0893 A70-16949

Disordered ferromagnetic binary alloys of transition metals magnetic moment distributions based on thermal neutron scattering experiments 05 p0893 A70-16950

Synthesis procedure for single crystal transition metal diborides, using high pressure capability in controlling stoichiometry 07 p1313 A70-19895

Microhardness of transition metals carbides measured after hot compression, suggesting dependence on statistical weight of C atoms with stable sp³ configurations 08 p1516 A70-21116

Transition metal alloys electronic effect on solubility of interstitials 08 p1521 A70-21695

Sigma phase occurrence in transition/nontransition elements alloys, discussing solid solubility limits 09 p1708 A70-23424

Band and localized models for electrical conduction of metal oxides, discussing Mott and semiconductor to metal transitions 14 p2627 A70-30498

Mo, W, V, Ti and Zr solubilities in liquid K 16 p2933 A70-34210

Metal matrix alloys with base of Co, Fe or Ni reinforced by transition metal carbide fibers, discussing deformation tests at various temperatures 17 p3124 A70-35142

Nitrogen solubility calculation in transition metals liquid binary systems, using quasi-chemical model 18 p3273 A70-36045

Transition metal disulfides and diselenides as solid lubricants, investigating sliding friction characteristics [ASLE PREPRINT 70AM 6E-1] 19 p3438 A70-38801

Field emission from narrow 3d bands of ferromagnetic nickel, calculating 3d and free electron transmission coefficients ratio, using triangular surface barrier model 24 p4391 A70-45671

Precompression and pressurization effects on ductile-brittle transition of polycrystalline cast Cr, W and Mo bcc transition metals 24 p4365 A70-46371

TRANSITION POINTS

Dissolved gases and carbon effect on transition temperature from plastic to brittle state of high melting metals including niobium and vanadium 01 p0124 A70-11615

Superconducting transition temperature variation in bcc region of Ti-Nb-V ternary alloys measured as function of valence electrons and composition 03 p0538 A70-13154

Pyroelectric coefficient extrema measurement at constant stress in barium titanate ceramic at various temperature ranges for various transition points 03 p0513 A70-14205

Model for predicting laminar-turbulent transition point in hypersonic wake of two dimensional laminar viscous flow 06 p0985 A70-18499

Transition matrix of Markov chain with finite states from noisy measurements of state, discussing algorithms convergence rates and computations 12 p2261 A70-27421

Strength and thickness effects on energy absorption criteria for transition temperatures in Charpy V-notch impact tests 15 p2819 A70-32234

Unalloyed Ti hydrogen embrittlement, determining factors affecting brittle-ductile transition temperature 17 p3117 A70-34398

Hydrostatic pressurization effect on ductile-brittle transition temperature of polycrystalline chromium 18 p3274 A70-36053

Polyvinyl alkyl ethers multiple transitions at low temperatures, using linear variable differential transformer 21 p3844 A70-42137

Polymers as cryogenic adhesives, evaluating role of chain structure below glass transition temperature 21 p3783 A70-42142

Heat exchange on turbine blade profiles, examining boundary layer flow transition region coordinates 23 p4283 A70-44732

Phase transitions in FeW doped strontium and barium oxides, using X ray diffraction and Mossbauer effect for transition temperature 24 p4390 A70-45605

TRANSITION PROBABILITIES

Ionized Ne, Ar and Kr first excited p states lifetime and transition probabilities, tabulating energy levels and mixing coefficients 02 p0343 A70-11887

Transition probabilities for diatomic oxygen Schumann-Runge bands determined from shock tube emission studies 02 p0344 A70-12658

Molecular hydrogen Lyman bands radiative transition probabilities, using electronic dipole moment functions 02 p0344 A70-12659

Transition probabilities computed for spectral lines due to magnetic quadrupole radiation, discussing deexcitation of excited atoms in solar corona 02 p0359 A70-12706

Electron-phonon interaction model of temperature dependence of luminescence produced by multiphonon nonradiative transitions in Cr ions of ruby crystal, deriving transition probability 03 p0538 A70-13058

Lifetimes of upper levels of N II and N III UV multiplets determined from radiative deexcitation of excited ions 03 p0527 A70-13074

Radiative lifetimes and total transition probabilities measured in polyatomic gases using phase shift method and electron beam excitation 03 p0441 A70-14009

Reliability analysis formulation for statically indeterminate structures, using modified transition probabilities and computer program for systematic failure paths counting 04 p0768 A70-14747

NH emission systems radiative lifetimes and SiD and SiH transition probabilities measured, noting effects of radiative cascading 05 p0885 A70-16424

Radiative lifetimes of transitions to ground state for CS, SO and diatomic sulfur, showing relationship to absolute transition probabilities in terms of physicochemical applications 05 p0885 A70-16456

Pionic transition in Ni isotopes to measure nuclear interaction effects, observing level shift and broadening 05 p0885 A70-16682

Transition probability and Stark profile of H alpha standards for absolute intensity calibration of spectroscopic data from thermal shock tube plasma 05 p0853 A70-17083

Spectrally and spatially resolved measurements on arc heated Ar plasma radiation for eliminating discrepancies in transition probabilities [AIAA PAPER 70-42] 06 p1122 A70-18187

Argon ion CW lasers, discussing design, inverse population, plasma, radiative transition probabilities, pumping, frequency spectra and active medium 07 p1298 A70-19642

Allowed and forbidden transitions probability in isoelectron sequences of solar corona, using scale factor method and variational wave functions 09 p1751 A70-22155

Probability coefficients computation for transitions between energy levels of ion A XIV in solar corona 09 p1761 A70-23060

Relative transition probabilities of Si I and II determined from emission spectra obtained by injecting SiCl4 vapor into argon plasma jet 09 p1737 A70-23315

Bowen levels of O III radiative lifetimes and transition probabilities measurements by beam-foil spectroscopy 10 p1936 A70-23909

Radiative lifetimes determination from beta-chi violet transition probabilities of CN 10 p1947 A70-24991

Steady state two frequency laser emission threshold and intensity, studying effects of two photon transitions and optical transition probabilities-radiation density relations 12 p2245 A70-27301

Vibrational relaxation time and transition probability in bromine collisions with He, Ne, Ar, Xe atoms determined by shock wave method 12 p2275 A70-27353

Integral Hellmann-Feynman formula for dissociation energies in H, Li and LiH molecules, discussing transition densities and dissociation energy 12 p2275 A70-27569

Gaseous nebulae electron densities based on interpretation of forbidden CI III lines using collisional strengths and transition probabilities 15 p2798 A70-31746

Transition probabilities for Markov chain describing bond breaking and molecular energy transfer in vibrational relaxation and dissociation 16 p2953 A70-33009

Mean lives of excited levels in neutral He by beam foil method testing calculations for radiative transition probabilities 16 p2955 A70-33296

Inelastic energy losses in oxygen ion beams collisions with neutral molecules, determining vibrational transition probabilities 16 p2955 A70-34011

Argon II line transition probabilities, observing UV spectral region, upper energy levels and temperature differences 16 p2956 A70-34251

Diatomic molecules inelastic collision cross sections for specific rotational transitions, discussing S matrix energy requirements for statistical analysis 19 p3474 A70-38268

Transition probabilities of visible and near-IR neon lines, using gas-driven shock tube spectroscopy 20 p3674 A70-39134

Absorptivity, transition probability and collision broadening frequency of dimethylether at 3.51 micron He-Xe laser wavelength, noting pressure dependence, transition lifetime and saturation intensity 21 p3835 A70-40573

LTE verification for argon plasma generated in free burning arc by measuring atomic line transition probability at various pressures 21 p3854 A70-40588

Solar iron abundance from forbidden Fe II magnetic dipole transition probabilities 21 p3888 A70-41118

Rotational transition probabilities of molecular collisions, using time dependent perturbation theory along linear trajectories 21 p3853 A70-41390

Numerical molecular rotational transition probabilities and cross sections in HCN-HCN and ICN-ICN collisions, using perturbation theory and multipole potentials 21 p3853 A70-41391

Strong coupled rotational excitation problem in atom-diatom molecule scattering system, discussing transition probability matrices statistical analysis 23 p4212 A70-44600

Comparative arterial pressure pulse transmission velocity in dogs, relating wall elasticity with vascular disease 15 p2682 A70-31939

Transmission calculations for homogeneous and nonhomogeneous water vapor atmospheres, evaluating various methods 22 p4065 A70-43170

TRANSMISSION CIRCUITS

Corrective open-loop circuit, using delay elements for compensation of transient response in linear circuits with lumped parameters for pulse modulation transmissions 06 p1023 A70-17774

Algorithm applied to specific classes of random processes for calculating minimum channel capacity required by transmission system for sources in each class 06 p1012 A70-18621

Integrated TDMA switching/transmission system implementation into existing network 10 p1837 A70-24354

Wideband transmission media for global communication networks, comparing submarine cables and satellites based on economic tradeoff in terms of circuit density and distance 11 p2901 A70-25475

Transmission factors of microwave filters with prescribed attenuation and group delay 22 p3997 A70-43173

TRANSMISSION EFFICIENCY

Low altitude 24-hr orbit twin satellite system joined by long light cord, assessing communications efficiency and physical limitations 03 p0579 A70-13621

Information transmission capability of hologram without distortion, considering confocal resonator reconstructible transparencies for bounded hologram 05 p0848 A70-16265

Paraboloidal- and spherical-reflector antennas efficiency optimization obtained from optimum combination of amplitude and phase of hybrid modes propagating in guide 07 p1240 A70-19220

Coding and decoding efficiency in data transmission over Gaussian channels, comparing error probability, power, bandwidth and equipment complexity 09 p1637 A70-23320

Pulse signal transmission rate increase by transient processes compensator, discussing stability relation to signal to noise ratios 09 p1639 A70-23696

Transmission performance of telephone calls routed through PCM satellite circuit between London and White Plains 10 p1837 A70-24349

TRANSMISSION LINES

TDMA communication satellite system compared favorably with FDMA or CDMA systems in efficiency, flexibility and feasibility for commercial and military uses

10 p1842 A70-24884

Pulsed system accuracy increment by increasing number of modulated signal parameters in addition to pulse duration modulation

10 p1843 A70-25137

Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number

11 p1995 A70-25345

Spacecraft phased array antenna techniques, discussing tape helix radiators design for applications in navigation, TV broadcasting and data relay systems [AIAA PAPER 70-425]

11 p2015 A70-25452

Time-bounded pulses with energy maximum in frequency band, solving integral equations for band-pass filters for maximum efficiency and optimum pulse shapes

11 p2004 A70-25799

IF combinator for broadband transhorizonal radio relay transmission improvement by providing optimum SNR

11 p2020 A70-26821

Broadband transhorizonal radio relay system transmission improvement by applying switching equipment designed for protective channel

11 p2034 A70-26822

Transmission delay and echo effects in long distance satellite relay telephony links, describing echo suppression and speech quality

12 p2183 A70-27004

Local losses distribution effect on intensity and opposing waves generation in ring gas laser analyzed in approximation of noninteracting modes

12 p2248 A70-27510

Cost effective data transmission method for high performance under intersymbol interference and noise

12 p2187 A70-27935

Lossless pulse-shaping active line for unipolar transmission, considering construction by loading two terminal Esaki diode to coaxial cable

15 p2697 A70-31827

Lower reliability estimates for block codes of binary channels with feedback noise

18 p3235 A70-36599

Efficiency of holographic gratings in instrumental spectroscopy

19 p3421 A70-37360

Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number

20 p3589 A70-40457

Transmission power formula for slant to ground station and slant ranges calculations

21 p3785 A70-40755

Microwave waveguide mount characterization of varactor diodes, using transmission resonance and Dolph-Chebyshev taper

21 p3797 A70-40759

Spacecraft data transmission efficiency improvement by budgeting onboard electric energy consumption among data types

21 p3790 A70-41364

Parabolic reflector microwave antenna flared horn primary feeds design for maximum aperture efficiency based on electric field matching

21 p3800 A70-41946

Line-by-line and two dimensional image processing performance, considering transmission rates and distortion

23 p4160 A70-43762

TRANSMISSION LINES

NT BEAM WAVEGUIDES

NT COAXIAL CABLES

NT COMMUNICATION CABLES

NT FLUID TRANSMISSION LINES

NT PLASMA GUIDES

NT POWER LINES

NT STRIP TRANSMISSION LINES

NT SUBMARINE CABLES

NT WAVEGUIDES

Book on microwave theory and applications covering transmission line theory, microwave measurement, signal sources and analysis, network analysis, etc

03 p0455 A70-13001

M-type transmission line with cyclotron waves to achieve phase inverter and delay line operation, showing phase sensitivity to magnetic field changes near cyclotron resonance

03 p0447 A70-13292

Transient electromagnetic fields coupling transfer functions for two wire uniform transmission line cable models, using long wire antenna as radiation source

04 p0658 A70-14739

Iterative solution to transmission lines termination problems [ASME PAPER 69-APM-M]

04 p0627 A70-14861

Asymmetrical and symmetrical directional couplers coupling characteristics during linear and exponential variations of coupling coefficient

04 p0659 A70-15310

Pneumatic line losses due to friction in pneumatic control systems

04 p0628 A70-15399

Shielded multiconductor transmission line capacitance calculated by integral equations with Green function kernel

05 p0820 A70-16383

Errors arising in torsion-type ponderomotive wattmeter connected in homogeneous microwave transmission line with mismatched oscillator at input and mismatched load at output

06 p1024 A70-17861

Noise and gain formulas for wideband distributed-gain amplifiers using quadrupole elements and transmission line configurations

08 p1472 A70-20863

Interference emission filtering in high power microwave transmitters, discussing spurious emissions removal or rejection by transmission line filters

08 p1474 A70-21257

Slot line wavelength, impedance, transitions and tolerances measured at S band using different dielectric constant materials

08 p1475 A70-21282

Slot transmission line applicability to miniature ferrite phase shifter design exploiting elliptically polarized H field existence

08 p1475 A70-21283

Commensurate transmission line circuits design approximating periodic frequency characteristics on digital computer

08 p1476 A70-21286

Extraneous earth satellites interferences in ground communication line, determining combined duration and numbers average values

11 p1996 A70-25346

Traveling wave amplifier on section of inhomogeneous transmission line with tunnel diodes

11 p2020 A70-26808

Log-periodic dipole (LPD) antennas compressed along transmission-line axis, considering frequency dependent behavior in narrow bands and radiation pattern

12 p2198 A70-27955

Coupled microstrip transmission lines characteristics from parameters evaluation, considering various geometries, inductive and coupling coefficients, dielectric constant and impedance

12 p2190 A70-28167

Quasi-TEM analysis justification for limit cases of guided waves on microstrip transmission lines with dielectric constant approaching free space

12 p2190 A70-28168

Multilens quasi-optical transmission lines construction by determining lens profile for optimal conversion of source field into specified field at receiver end

13 p2366 A70-29403

Surface wave transmission lines used at millimeter wavelengths

14 p2549 A70-30443

Microstripline and balanced stripline, discussing parameters affecting maximum attainable Q in microwave integrated circuits

14 p2561 A70-30921

Microstrip circuit design, obtaining dimensions by computer programs incorporating subroutine sets

14 p2561 A70-30922

Electrostatic discharge at magnetopause by idealized circuit analog, discussing transmission lines and terminal impedances

14 p2579 A70-31247

Strip lines transmission characteristics with rectangular outer conductor and multielectric layers within TEM wave approximation, using Green function and variational principle

14 p2558 A70-31316

Stripline skin effect in digital equipment transmitting fast rising pulses

15 p2708 A70-31828

HF electrical communication based on Kelvin transmission line and Maxwell field theories, noting linear arrays

16 p2860 A70-32951

Integrated X band superheterodyne receiver design using planar transmission lines as components

16 p2874 A70-33388

Packaging and grounding for electrical noise control in nanosecond switching circuits using transmission line design

16 p2879 A70-33960

Electroacoustic transducer driven by acoustic pressure and electronic generator, describing electrical properties for functioning as characteristic impedance of acoustic transmission line

19 p3422 A70-37701

Extraneous earth satellites interferences in ground communication line, determining combined duration and numbers average values

20 p3589 A70-40458

Transmission line modal analysis for nonlinear polarizability in optical and quasi-optical waveguides

21 p3784 A70-40564

Circular and nearly rectangular irises for resonant cavities in transmission line for microwave band stop filters, discussing design based on merit factor

21 p3792 A70-41992

Transistorized IF amplifier output matching to long transmission line, deriving formulas for gain and pass-band over wide output impedance range

22 p3995 A70-42520

Nonradiating higher order modes on shielded slot lines for TM and TE cases, using series matching and Wiener-Hopf technique

22 p3990 A70-43420

Book on guided EM wave theory covering mathematical methods transmission lines cavity resonators, perturbation theory, electrostatics, electric and magnetic fields, propagation, etc

23 p4172 A70-44242

Broadside-endfire array of cylindrical dipoles and monopoles driven by interconnecting transmission lines, calculating admittance and field patterns

23 p4176 A70-44955

Traveling wave amplifier on section of inhomogeneous transmission line with tunnel diodes

24 p4317 A70-45180

Natural dispersion effect on bandwidth of glass fiber transmission line using optical glasses

24 p4319 A70-46079

TRANSMISSION LOSS

Radiometric method for calibrating loss of multimode antenna-feed components with linear or circular polarization, deriving calibration and error analysis equations

01 p0050 A70-10711

Diffraction loss measurement in solid state laser to determine laser material contribution to total cavity loss

01 p0113 A70-10919

Aircraft controls response critical speed as function of transmission lag and transfer function of control link elements

02 p0227 A70-12410

Intrinsic noise of passive waveguide multipoint with losses, obtaining mean values and wave correlation functions using scattering matrix

04 p0655 A70-14402

HF propagation losses from statistical measurement over north-south path found dependent on mode, day and night and high and low ray

04 p0649 A70-14968

Transmission losses of plexiglass radome measured as function of frequency and antenna elevation angle, determining material dielectric constant

06 p1019 A70-17505

Lower ionosphere effects on HF propagation modes observed by pulse system, discussing propagation time, mode structure, transmission loss, etc

07 p1232 A70-19179

Supersonic flight vehicle plasma sheath effect on effective range of onboard radar installation, discussing SNR

08 p1461 A70-20869

Single-pulse laser radiation losses dependence on operation time length due to angular dispersion

09 p1694 A70-22140

Self focusing antennas directive gain losses reduction for wave with jagged phase front impinging on linear array having passed through inhomogeneous atmosphere

09 p1648 A70-23163

Radio propagation over sea water path, predicting transmission loss by computer programs

12 p2188 A70-27936

Leaky waveguide radiation patterns with periodic loading slots along axis

13 p2377 A70-29105

Laser with telescopic resonator, examining characteristics at different Fresnel zones and emission losses with geometric optics approximation

13 p2427 A70-29280

Light transmission losses in optical resonators partially filled with inhomogeneous dielectric, specifying optimal geometrical parameters

13 p2378 A70-29404

Circular low loss waveguides for millimeter waves, discussing construction, geometry, surface texture, etc

14 p2556 A70-30442

Space-surface path loss due to atmospheric gases, rain and clouds, considering military ground site location for space communication

14 p2608 A70-30596

H-guide dielectric losses reduction by use of artificial and laminated dielectric slabs

16 p2875 A70-33401

Ionospheric VLF diurnal transmission loss differences on two long paths, analyzing values for first and second modes

20 p3585 A70-39455

Acoustic pulse transmission through plane vortex sheet, examining zone of silence, geometrical acoustics and sound radiation

21 p3849 A70-41243

- Centrifugal compressor losses as function of suction chamber exit nonuniform flow field delivered to impeller
21 p3747 A70-41954
- Thin film microwave acoustic transducers, calculating top electrode thickness effect on frequencies of infinite conversion loss
24 p4333 A70-45218
- Confocal microwave Fabry-Perot interferometer resonator diffraction loss and field configuration measurements, noting agreement with theory
24 p4381 A70-46242
- Phosphorus and selenium oxychloride based liquid laser transmission loss measurement
24 p4355 A70-46265
- TRANSMISSIVITY**
Spectral band transmission functions of atmospheric water vapor, nitrogen, ozone, nitrous oxide and methane in IR region
07 p1330 A70-20306
- Transmission coefficient for perforated screen related to orientation of rectangular and cross shaped narrow openings and field polarization during normal wave incidence
12 p2191 A70-28174
- Nondestructive examination for plastics, discussing transmission, microwave and ultrasonic tests
24 p4346 A70-45720
- TRANSMISSOMETERS**
UHF radio telemetry for transmissometers measuring airport runway visibility
16 p2889 A70-34222
- Runway visual range assessment using automatic transmissometer-reflector measurements
17 p3132 A70-34641
- TRANSMITTANCE**
Optical measurements of mirrors reflectance and solar radiation transmittance to solve problems specific to solar energy engineering by standard optical equipment
01 p0010 A70-10765
- Atmospheric transmittance line by line calculations along variable pressure and mixing ratio paths from 1.7-20 microns
[AFCL-70-0061] 02 p0289 A70-11908
- Resin bonding material suitable for IR detectors noting transmission properties
02 p0321 A70-11926
- Atmospheric IR radiation transmittance in 590 to 750 per cm interval, using balloon-borne spectrometer
02 p0256 A70-11928
- Transmission and reflection coefficients calculated for electromagnetic waves incident on inhomogeneous absorbing layer applicable to ionosphere, plasma and p-n junction
06 p1009 A70-17834
- Optical hardness effect on dispersed particles spectrum determination accuracy by spectral transmittance
07 p1330 A70-20309
- Optimal atmospheric transmittance windows for underlying surface and cloud temperature determination from satellites
08 p1538 A70-21426
- Vacuum-UV monochromators polarization and effective transmittance measurements, comparing characteristics of parallel and pyramidal biotite polarizers
08 p1546 A70-21791
- Spatial and energy characteristics of laser with nonuniform transmittance across resonator mirrors, analyzing transverse modes interaction
08 p1514 A70-21816
- Seasonal measurements of atmospheric transmittance spectra for horizontal near-earth paths in IR region under haze and clear weather
09 p1666 A70-22179
- Far IR radiation transmission through bismuth and gallium normal and superconducting thin films, considering transition temperature role
09 p1739 A70-22323
- Fluorel spectral reflectance, transmittance and absorbance under monochromatic irradiation, considering thermal analysis and surface finish
09 p1710 A70-22794
- Real nonnegative function representing transmittance of computer synthesized Fourier transform hologram displayed on flying spot scanner and recorded on film
11 p2049 A70-25631
- Cotton leaf light reflectance and transmittance changes with maturity
12 p2218 A70-26919
- Side scattered light effects on atmospheric transmittance measurements, showing influence on total receiver illumination
14 p2603 A70-30411
- Spectral transmittance coefficients at Naugarzan astronomical station, using Bouguer method
15 p2809 A70-32909
- Bidirectional reflectance and transmittance calculation for irradiated layer of monodisperse matrix suspended pigment particles
[AIAA PAPER 70-839] 16 p2940 A70-33923
- Earth atmosphere transmission coefficient and optical stability based on solar aureole observation
16 p2899 A70-34186
- Integrating sphere theory with wall mounted specular sample in reflectance and transmittance measurements
18 p3284 A70-36776
- Spectral radiative capacity of lower level clouds in specific transmittance window, using airborne diffraction spectrometer measurements
19 p3461 A70-37424
- IR absorption by water vapor in transmittance windows, considering continuous absorption coefficient dependence on window width
19 p3461 A70-37425
- Plane wave diffraction by periodic array at boundary between two media, discussing asymptotic behavior of reflection and transmission coefficients
21 p3806 A70-40614
- Corrective light filter performance evaluation by spectral transmittance normalization
22 p4072 A70-42503
- Interference-polarization light filter, calculating phase shifter errors effects on transmittance by Poincare sphere method
22 p4072 A70-42505
- Semiconductor luminescence and photodetector diodes near IR region transmission, describing frequency response measurements
22 p4087 A70-43445
- Atmospheric horizontal stratification and UV transmittance by signal reflection from satellites
23 p4191 A70-44268
- Planar conducting screen with periodic rectangular perforations, determining transmission and reflection coefficients and aperture field distribution
24 p4311 A70-45219
- TRANSMITTER RECEIVERS**
Tracking method for simultaneously tuned transmitter and receiver with different maximum-to-minimum capacitance ratios in ganged variable capacitors
01 p0051 A70-10888
- Transmitting-receiving latching ferrite switch with 180 degree differential phase shift toroids for temperature stability and receiver protection in case of driver failure
03 p0458 A70-14036
- Statistical ionospheric model of sporadic E layer frequency characteristics dependence on equipment parameters, determining permissible variation of transmitter power and receiver gain
04 p0682 A70-15727
- Statistical ionospheric model of sporadic E layer frequency characteristics dependence on equipment parameters, determining permissible variation of transmitter power and receiver gain
14 p2575 A70-30811
- Airborne equipment microelectronics technology application to interrogators, transponders and UHF/VHF transceivers
14 p2558 A70-31294
- S band transmitters frequency deviations optimization enabling designer to determine optimum value within constraints of associated receiving equipment
14 p2559 A70-31373
- Doppler effect pulsed ultrasonic blood flowmeter using transducer alternating as transmitter and receiver
15 p2690 A70-31919
- Transceiving system for recording D region radio signal absorption and reflection, describing component circuitry and operation
16 p2880 A70-34225
- Automatic resonance tuning of transmitting and receiving antennas by electronic control for use in mobile communications
23 p4172 A70-44385
- TRANSMITTERS**
NT INSTRUMENT TRANSMITTERS
NT IONOSPHERES
NT OMNIDIRECTIONAL RADIO RANGES
NT RADAR TRANSMITTERS
NT RADIO BEACONS
NT RADIO TRANSMITTERS
NT RADIOSONDES
NT RAWINSONDES
NT REPEATERS
NT TRANSMITTER RECEIVERS
Laser transmitter and optical superheterodyne receiver performance tests at 6328 A, demonstrating aperture size effect and noncoherent operation superiority
03 p0450 A70-13675
- Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-IC stage, using IR radiation data
12 p2196 A70-27725
- Injection laser communication link for high data rate transmission, discussing design and construction of transmitter and receiver
16 p2862 A70-33139
- Thermal control through fusible materials for missile S band transmitter package, using computer analysis
18 p3231 A70-36349
- Multiple remote control systems design, emphasizing transmitter and receiver characteristics matching to overall network parameters
18 p3235 A70-36426
- Radiosonde receiver and transmitter system optimization, obtaining increased microwave power by appropriate oscillator operating modes
22 p4038 A70-43379
- TRANSOCEANIC COMMUNICATION**
Remote data processing and wideband data transmission between France and U.S. via telecommunication satellites, discussing error detection and correction
02 p0263 A70-12612
- Satellite Integrated Communications, Navigation and Identification System for implementing worldwide command-control system and equipment and signal integration
[AIAA PAPER 70-503] 11 p2000 A70-25466
- Global commercial communications satellite system arrangements, considering evolutionary political, economic and technological developments within INTLSAT context
[AIAA PAPER 70-446] 11 p2152 A70-25478
- Radio propagation over sea water path, predicting transmission loss by computer programs
12 p2188 A70-27936
- TRANSOCEANIC SYSTEMS**
NT TRANSOCEANIC COMMUNICATION
Inertial navigation techniques application to commercial air traffic control, indicating decreased dependence on external navigation aids in oceanic operations
01 p0136 A70-10304
- Data analysis of inertial systems for commercial aircraft overseas operations, classifying systems error propagation as linear time drift or Foucault period oscillation
01 p0137 A70-10314
- Spot III satellite-supported system for transoceanic aircraft navigation, traffic control, voice and data communication, etc
07 p1331 A70-19291
- Navigation-traffic control satellite system application to transoceanic traffic surveillance
[AIAA PAPER 70-487] 11 p2000 A70-25462
- SOFAR/sound fixing and ranging systems for location and recovery of reentry vehicles and missile cases and rescue of disabled transoceanic aircraft
13 p2449 A70-29169
- International cooperation in global meteorological network, outlining World Weather Watch
14 p2670 A70-31140
- Global weather forecasting network costs and benefits evaluated using mathematical criteria
14 p2670 A70-31142
- Global weather prediction network economic benefits to key industries, discussing adverse weather effects on production schedules, fuel supplies, construction, harvesting, etc
14 p2610 A70-31143
- Satellite communication/navigation/surveillance systems for domestic and transoceanic ATC
16 p2949 A70-33479
- TRANSONIC AIRCRAFT**
U SUPERSONIC AIRCRAFT
TRANSONIC COMPRESSORS
Transonic two stage compressor design and performance, discussing interblade row traverse data
09 p1608 A70-23742
- Transonic compression grid functions, considering shock wave configurations
16 p2836 A70-33752
- Two dimensional compressor cascades of double circular arc and wedge shape blades testing performance in transonic and supersonic wind tunnels
[ASME PAPER 70-GT-7] 18 p3302 A70-36829
- Buzz-saw noise of transonic compressor due to rotating pressure field at supersonic blade tip speeds
[ASME PAPER 70-GT-54] 18 p3303 A70-36838
- Transonic high turning low aspect ratio stator cascades flow field performance prediction, reducing secondary flows by partial slots
[ASME PAPER 70-GT-63] 18 p3209 A70-36875
- TRANSONIC FLIGHT**
Airframe flow field effects on propulsion system performance in transonic flight, studying case of underwing aft mounted turbojet engine nacelles
01 p0004 A70-10321
- Ground based radar surveillance for SST to avoid convective clouds and thunderstorm activity during transonic acceleration phase ensuring minimum demands on maneuverability
09 p1610 A70-22242
- Transonic aircraft testing capabilities and limitations, considering tunnel wall interference and Reynolds number effects
[AIAA PAPER 70-580] 13 p2348 A70-29876
- Wind tunnel and flight test methods for determining transonic buffet characteristics on model F-4 aircraft
[AIAA PAPER 70-584] 13 p2348 A70-29886

- Harrier aircraft development history, discussing V/STOL constraints on transonic flight properties [ICAS PAPER 70-51] 23 p4139 A70-44148
- TRANSONIC FLOW**
- Boundary value problem for quasi-linear equation of unsteady transonic gas flow, including linear model and operators for group of transformations 01 p0069 A70-11628
- Asymptotic method based on Landahl small perturbation theory applied to perturbation velocity potential for oscillating delta wing in transonic flow 02 p0223 A70-11775
- Harmonically oscillating semiminfinite rectangular wing perturbation velocity potential in unsteady transonic flow without heat exchange 02 p0279 A70-12118
- Axisymmetric sonic flow around slender body, determining boundary regions for slender body approximation and Guderley expansion utility 03 p0409 A70-14233
- Boundary value problems of Cauchy-Riemann differential equations using solution to derive integral equation for stationary infrasonic flow 04 p0671 A70-15094
- Unsteady pressure distributions on elastic swept wing upper and lower sides at high subsonic to transonic flow, investigating torsional and bending vibrations [DGLR-69-31] 04 p0615 A70-15151
- Von Karman transonic similarity law applied to flow through plane turbine blade cascades [DGLR-69-24] 04 p0616 A70-15183
- Transonic flow about slender profiles computed for flow velocities slightly below and above Mach 1 04 p0616 A70-15185
- Plane and axisymmetric transonic vortex flow approximate equations of inviscid noneat conducting gas for point on sonic line with entropy having extremal value 04 p0617 A70-15234
- Transonic flow theory, investigating thin three dimensional lifting wings, similarity for lift and drag, plane flow past airfoil, far field and hodograph solutions [D1-82-0878] 05 p0834 A70-16693
- Far and near field solutions of plane steady transonic flow past thin airfoil including imbedded shock waves using small disturbance theory [AIAA PAPER 70-188] 06 p0969 A70-18056
- Closed form solution of modified inviscid transonic equation embodying character of viscous-transonic equation applied to shockless transonic airfoils [AIAA PAPER 70-187] 06 p0970 A70-18096
- Steady supercritical planar inviscid transonic flows over lifting airfoils, generating unsteady flow by impulsively imposing airfoil boundary condition [AIAA PAPER 70-47] 06 p0972 A70-18130
- Free piston compression with sonic flow outlet for determining orifice size by matching with bounce parameters 07 p1249 A70-19334
- Pressure recovery for stagnation of underexpanded sonic jet in chamber having transparent walls and containing nozzle and diffuser in coaxial positions 07 p1189 A70-19811
- Stable flow distribution of sonic jet exhausting counter to low density supersonic airstream 07 p1189 A70-19982
- Perfect fluid sonic flows around weakly lifting three dimensional bodies downstream of shock wave, proving existence of lifting boundary layer 08 p1433 A70-21238
- Trisonic high pressure wind tunnel simulating flow conditions on large transonic aircraft, noting high Reynolds number capability 09 p1655 A70-22023
- Shock wave configurations across compression cascades in transonic approach flow 09 p1604 A70-22657
- Transonic aerodynamics problems concerning plane and spatial rotational flows of perfect gas, discussing analytical and numerical methods 10 p1800 A70-24132
- Near equilibrium transonic flows of reacting gas mixtures based on linearization of thermodynamic and kinetic quantities 10 p1867 A70-24133
- Symmetrical, asymmetrical and three dimensional sonic flows past finite obstacle, investigating regions upstream and downstream from shock waves for airfoil 10 p1800 A70-24134
- Viscous transonic flow past wavy wall analyzed by approximate method for inviscid transonic equation 10 p1800 A70-24137
- Bidimensional curved weak shock wave structure, deducing transonic equation from Navier-Stokes equations 10 p1800 A70-24138
- Combustible gas /hydrogen-air/ subsonic and transonic flow past sphere, approximating combustion zone structure by model 10 p1801 A70-24142
- Head wave distance from body determined for slender pointed profile in subsonic region of transonic flow 10 p1803 A70-24780
- Cylindrical afterbody drag reduction in transonic flow by combined gas ejection and boat-tailing 11 p1976 A70-25991
- Slender body transonic wave drag double integral, describing computer program for numerical evaluation 11 p1977 A70-26644
- Regularity domain and singularity location of stream function of transonic two dimensional compressible fluid flow, using integral operators 12 p2260 A70-26972
- Sonic surface and Cauchy problem of Monge-Ampere equations in plane unsteady transonic channel flow solved by hodographic analysis 12 p2156 A70-27299
- Subsonic, transonic and supersonic laminar boundary layers acceleration and cooling effects, discussing heat transfer and gas enthalpy 12 p2211 A70-27830
- Transonic flow theory for two and three dimensional streamlined bodies in steady irrotational flow of inviscid perfect gas 12 p2158 A70-28201
- Specific heat ratio and configuration effects on flow in subsonic, transonic and supersonic sections of Laval nozzle 12 p2159 A70-28233
- Transonic scaling effects for shock boundary layer interaction on circular and two dimensional airfoil models, discussing separation and reattachment [AIAA PAPER 70-541] 13 p2339 A70-29008
- Pressure distribution and drag for inviscid flow past slender sharp-nosed fuselages and afterbodies at arbitrary transonic Mach numbers [AIAA PAPER 70-556] 13 p2340 A70-29021
- Airfoil sections in transonic flow, discussing wind tunnel tests on mixed flows and shock waves [ONERA-TP-815] 13 p2341 A70-29139
- Bistable fluidic thrusters and circular sonic control jets interaction with airstream surrounding tactical missile configuration, investigating effect on amplification factors 13 p2391 A70-29887
- Rotovale induced flow angle variations associated with data repeatability and scatter in blow down wind tunnels at transonic speed 13 p2385 A70-29888
- Discrete sonic jets as boundary layer trips producing turbulent hypersonic flows with negligible intrinsic drag and downstream distortions 13 p2523 A70-29973
- Wing section pressure distributions, lift and drag in transonic mixed flow, considering prediction methods 14 p2529 A70-30866
- Two dimensional transonic flows bounded by free surface and wall with interior heat release and external burning, indicating application to control or propulsion 14 p2665 A70-30947
- Subsonic and transonic gas flow in wake behind finite thickness plate based on Navier-Stokes equations 15 p2719 A70-31484
- Integral equation for transonic small disturbance flow applied to plane flows over lifting airfoils 15 p2673 A70-32768
- Aerodynamic drag coefficients of micron size particle clouds in compressible transonic flow, using light extinction method 16 p2894 A70-33882
- Transonic flow around perpendicular plate, determining front side velocity and pressure from known stagnation point and transonic region 16 p2839 A70-34236
- Air jets from sonic orifice, investigating three zones of isochor families by visualization and density measurement 17 p3070 A70-35046
- German monograph on transonic plane flow past wavy wall in blocked wind tunnel covering flow theory, interferometric density measurements, etc 17 p3070 A70-35375
- Lifting and side force distributions acting on body in transonic flow 17 p3012 A70-35696
- Real gas transonic flow transition through critical velocity in Laval nozzle, examining reasons for increment of viscosity and heat conduction effects 18 p3239 A70-36217
- Plane compressible sonic flow around symmetrical cylinder subjected to parallel incident flow, using function-theoretic method 18 p3241 A70-36378
- Modified linearized transonic flow theory application to pressure coefficient distribution on circular arc bodies of revolution 20 p3608 A70-39614
- Aerodynamics of steady, inviscid transonic flows around slender bodies and wing-body combinations at free stream Mach number one [AIAA PAPER 70-798] 20 p3559 A70-39900
- Transonic flow past bodies of revolution, using finite difference scheme 21 p3743 A70-40611
- Plane parallel transonic flow with curved compression shock discontinuity in supersonic region, obtaining solution by indeterminate coefficients and hypergeometric functions 21 p3748 A70-42212
- Viscous transonic flow past cascades by semiempirical approach, discussing pressure distribution, boundary layer parameters and compression shock 22 p4088 A70-42343
- Transonic turbine cascades exit flow parameters taking into account blade profile 22 p4088 A70-42346
- Two dimensional transonic cascade flow, using Von Karman similarity law 22 p4089 A70-42347
- Plane transonic flow around airfoils, using hodograph based methods for shock free flow and finite difference methods for flow with shock waves [ICAS PAPER 70-12] 23 p4132 A70-44123
- Iterative method based on slender body approximation applied to axisymmetric sonic flow fields, splitting differential equation into coupled parabolic equations [ICAS PAPER 70-13] 23 p4132 A70-44124
- High subsonic and transonic effects on pressure distributions for swept wing with oscillating control surface 23 p4274 A70-44763
- Time dependent inviscid transonic flow past two dimensional and axisymmetric bodies, presenting numerical procedures including imbedded shock waves as discontinuities [AIAA PAPER 70-1322] 24 p4288 A70-45943
- TRANSONIC FLUTTER**
- F-8D aircraft transonic flight and wind tunnel tests for buffet onset prediction, considering effects of g level and fluctuation amplitude and frequency [AIAA PAPER 70-341] 09 p1611 A70-23020

- F-106B aircraft in-flight study of airframe installation effects on propulsion system performance at transonic speeds 08 p1437 A70-21732
- Transonic static and dynamic stability of large angle spherically blunted high-drag cones [AIAA PAPER 70-564] 13 p2341 A70-29029
- Aerodynamic performance of axisymmetric body traveling at transonic Mach numbers for predicting installed nozzle flow fields and efficiency [AIAA PAPER 70-700] 16 p2835 A70-33562
- Aerodynamic characteristics of transonic and supersonic blunt vehicles, reviewing numerical methods 17 p3012 A70-35895
- Airframe installation effects at transonic speeds on underlying supersonic cruise exhaust nozzles, using flight and wind tunnel tests 22 p3960 A70-43274
- TRANSONIC TURBINES**
- U SUPERSONIC TURBINES**
- TRANSONIC WIND TUNNELS**
- 60 cm intermittent blowdown type trisonic wind tunnel, discussing main parts basic dimensions and characteristics determination method, detailing design and construction 01 p0055 A70-10148
- Transonic wind tunnel of aerodynamic research station in Goettingen, Germany, taking into account fixed nozzle replacement by flexible nozzle 03 p0463 A70-13799
- Wind tunnel testing technique innovations, reducing time and cost for low drag aircraft configurations by simultaneous force and pressure model transonic testing [SAE PAPER 690677] 05 p0825 A70-15868
- Two dimensional wind model with harmonically oscillating control surface in transonic range, comparing theoretical with experimental results on unsteady pressure distribution 06 p0966 A70-17252
- Characteristics and calibration of flow in gas induction driven close return transonic wind tunnel 11 p2030 A70-25687

Corona point discharge current magnitude in transonic wind tunnel, giving current characteristics at different wind speeds

12 p2264 A70-28001

Blockage ratio effect on supersonic zone with shock layer interaction on nonlifting circular arc airfoils at transonic speeds in wind tunnels

16 p2835 A70-33674

Wing camber and twist effects on transonic drag, using wind tunnel measurements

16 p2840 A70-34321

Calibration tests in transonic wind tunnel with two and four sided perforation section

19 p3353 A70-38475

Transonic wind tunnel porous walls, investigating interference effects and aerodynamic characteristics

22 p3958 A70-42337

Wind tunnel testing at transonic speeds, discussing boundary layer transition and dynamic sting interference

23 p4134 A70-44581

TRANSONICS

U TRANSONIC FLOW

TRANSPARENCE

Jovian polar zones enhanced optical transparency causes, discussing thin clouds and difference in molecular optical depth between north and south poles

01 p0180 A70-10531

Transparent bodies photon thermal conductivity temperature dependence

03 p0515 A70-13206

Plasma optical transparency criterion, estimating nonequilibrium plasma layer optical density limit

03 p0531 A70-13255

Hydrostatic models of sunspot penumbra and umbra, analyzing spot transparency influence on Wilson effect

03 p0571 A70-13596

Three dimensional structure determination for weakly scattering semitransparent objects from holographic data, discussing inverse scattering problem and refractive index calculation

03 p0487 A70-13647

Shadow optical raster method for quantitative investigation of dynamic stress states in two dimensional transparent or reflecting bodies

03 p0496 A70-14215

Semitransparent Pt film reflectance in vacuum UV evaporated on glass, quartz, Al, Au and Cr on glass compared with opaque films

04 p0731 A70-15023

Spectral absorption and transparency of water vapor, carbon dioxide, carbon monoxide, methane and nitrous oxide bands in IR region

04 p0715 A70-15255

Dispersion and correlation function for atmospheric transparency due to water vapor, from statistical model of absorption bands and effective mass

06 p1053 A70-17204

Nomograms for spectral transparency of atmosphere at 2.8-5.6 microns

06 p1053 A70-17208

Spectral transparency inversion of aerosol-containing atmosphere

06 p1098 A70-17832

Transparent gas radiation behind strong shock wave front with small pressure gradient due to energy losses

08 p1486 A70-21986

Corneal stroma transparency analysis based on refractive index and lattice theories

09 p1618 A70-22675

Radiative transfer effect on thermal instability and critical Rayleigh number in gray transparent fluid layer heated from below

10 p1967 A70-23952

Mars border-disk brightness comparison noting atmospheric transparency effects

12 p2311 A70-28303

Pulse duration and beam diameter effects on threshold energy density in laser induced transparent dielectric breakdown

13 p2428 A70-29382

Holography technique for dual real images reconstruction of transparent objects with all planes in focus

15 p2738 A70-32053

Holographic techniques, investigating ultrasonic fields in transparent media based on light separation by grating into optical moments

16 p2915 A70-34330

Hologram interferometry for measuring surface deformation under force and anisotropy in transparent objects

17 p3085 A70-35009

IR balloon observations of absolute solar brightness and stratosphere transparency, discussing BCA and HSRA models

17 p3078 A70-35580

Aircraft-borne spectrometer for atmospheric IR spectral transparency

18 p3260 A70-36972

High efficiency semitransparent III-V semiconductor photocathodes fabrication and operation

19 p3486 A70-37756

Transparent ceramic armor fabrication using dense polycrystalline magnesite

19 p3437 A70-38422

Transparent polymers stress-strain state induced by elastic waves, using model with space and time dependence of laser beam

20 p3654 A70-39248

Mach-Zehnder interferometer for holographic investigation of inhomogeneities in transparent media, discussing photointerpretation error reduction

20 p3633 A70-39749

Holographic recording in transparent bodies with optical characteristics changeable under intensive light

20 p3633 A70-39999

Holographic interferometry for study of transparent media, noting application to aerodynamic phenomena

[ONERA-TP-851] 22 p4039 A70-43455

Transparent objects holographic interferometry with illumination derived from phase gratings to eliminate laser speckle

22 p4040 A70-43611

Optical damage center structural defects in transparent dielectrics under high energy ruby laser radiation, noting nontransparent inclusions and dislocation centers

24 p4351 A70-45209

TRANSPARENT MATERIALS

U TRANSPARENCE

TRANSPARATION

Fluid transpiration arc radiation source based on forced convection effect on electric arc

17 p3023 A70-35153

TRANSPARATION COOLING

U SWEAT COOLING

TRANSPANTATION

Phonocardiographic and ultrasound observations of acute rejection following cardiac transplantation, considering rejection treatment at early stage

03 p0415 A70-12888

Electrocardiac events observed in cardiac transplant recipient emphasizing unique finding

03 p0433 A70-12893

Therapeutic power of bone marrow transplanted from mice earlier irradiated by high energy protons into newly irradiated mice

09 p1619 A70-22814

Cytoplasm, nucleus and membrane combination techniques for reassembly to form viable amoebae

11 p1986 A70-25849

Therapeutic effects of hemopoietic tissue transplantations of bone marrow on irradiated rats, using diffusion chamber for resettlement prevention

13 p2354 A70-29753

Circadian rhythms from electrocardiogram and cardiostachogram of patient with human heart transplant, noting P waves relationship between donor and recipient tissues

20 p3570 A70-39166

TRANSPONDERS

Airborne secondary surveillance radar transponders performance and system optimization for automatic altitude reporting, separation standards maintenance and automatic plot extraction

02 p0267 A70-11990

Directional transponders for telemetry command, tracking and communications in retrodirective communication satellites

03 p0457 A70-13838

Active AM scatterer/spiral antenna used as transponder in elementary CW radar system

04 p0652 A70-15346

L band transponder design for aeronautical satellite, giving block diagrams

07 p1234 A70-19292

Communication satellite transponders design, cost, reliability, manufacturing, testing and future developments

07 p1241 A70-19620

PSK distortion spectra generated in satellite transponders by interactions of FDMA PSK modulated carriers, developing computer programs for multichannel FDMA PSK modulated systems

10 p1839 A70-24364

Hybrid microwave integrated circuits application to phased array and Data Relay Satellite System space transponder

10 p1851 A70-24879

Canadian geostationary satellite communication system design and performance, discussing transponder with six RF channels

[AIAA PAPER 70-429] 11 p1996 A70-25402

VHF satellite transponders for ranging and position fixing, studying ionospheric and multipath effects

[AIAA PAPER 70-489] 11 p1999 A70-25433

Channel separation in RF transponder for communication satellite achieved with RF multiplexers consisting of microwave filters and combiners with superior electrical performance

[AIAA PAPER 70-509] 11 p2016 A70-25457

ATC radar beacon system, discussing interacting factors lowering reply reliability from transponder

12 p2267 A70-27639

Meteorological transponder rocketsonde instrumentation system evolution and data error analysis

14 p2585 A70-30579

Airborne equipment microelectronics technology application to interrogators, transponders and UHF/VHF transceivers

14 p2558 A70-31294

Sirio satellite SHF transponder for experiments in atmospheric propagation and communication between ground stations

15 p2709 A70-32285

LM-Apollo rendezvous radar and transponder electronic assemblies packaging and mechanical design

18 p3232 A70-36762

Ground station requirements for transition to multitransponder INTELSAT 4 satellite, discussing interference filtering, group delay distortion, etc

21 p3789 A70-41346

Single multiple access satellite communication system requirements for worldwide, trunked and local operations, considering transponder allocation and antennas

21 p3790 A70-41365

Multiple channel VHF testing on ATS 1 and 3, describing transponder intermodulation and compression corrections

21 p3791 A70-41366

Military inertial navigation technology applied to civil air transport aircraft

01 p0137 A70-10311

Air traffic control methods for transport aircraft delay elimination

01 p0139 A70-11367

Air cargo transport development and organization trends, considering cost and aircraft types

02 p0401 A70-11736

Electronic head-up display experience in transport aircraft flight tests including human factor, installation, operational applications, etc

02 p0224 A70-11836

Three dimensional navigation and guidance system for transport aircraft to alleviate operational problems, noting application to STOL aircraft

02 p0334 A70-11983

Air traffic congestion alleviation by applying general purpose computers for navigation in civil transport aircraft

02 p0334 A70-11985

Transport aircraft takeoff length reduction by applying various runway inclinations with respect to takeoff accelerations

02 p0275 A70-12223

VTOL transport aircraft stability and maneuverability compared with conventional aircraft

02 p0228 A70-12759

A-300B twin engine short haul giant transport aircraft, discussing engines, aircraft performance and systems reliability

[RAES PAPER 11] 03 p0411 A70-13543

Collection of papers on jet transport design covering subsonic zero lift drag rise properties, performance characteristics, supersonic aircraft design, etc

03 p0414 A70-14018

Flight characteristics differences between VTOL and conventional transport aircraft, recommending differences consideration in regulations

03 p0414 A70-14095

Design specifications for low noise turbofan engine used on long range subsonic transport aircraft

[ASME PAPER 69-WA/GT-7] 04 p0734 A70-14888

German VTOL transport aircraft projects, discussing Dornier 231/lift by turbojets/ and Bolkow 140/swiveling wing with gas turbine propellers/

04 p0623 A70-14955

German transport VTOL projects, discussing VC-500 swiveling wings with turbine powered propellers

and HFB-600 blade cascade flow deflectors for vertical takeoff

04 p0623 A70-15349

Aircraft design in commercial air transport safety, discussing turbine blade oxidation and crack prevention, engine cooling, fuels, lightning protection, etc

04 p0624 A70-15644

V/STOL and fixed wing tactical transport aircraft survivability while supporting forward area logistics bases, noting V/STOL advantage

[SAE PAPER 690705]

05 p0792 A70-15857

Wing vibration problems associated with roll attitude control in hovering autostabilized VTOL transport aircraft with wing-mounted jet lift engines

05 p0794 A70-16116

VTOL technical problems relating to military and civil transport applications, discussing sensitivity to mission requirement variations including design costs, noise levels, etc

05 p0797 A70-17077

Commercial navigation systems for long range subsonic transports, discussing accuracy, avionics hardware and crew responsibility optimization

06 p1102 A70-17638

Physiological training programs and equipment for life support in transports, discussing changes in protective helmet and quick donning harness

06 p1002 A70-17708

Aircraft transport tariffs used to determine economic approach to design

07 p1426 A70-18841

Monograph on HFB 600 V/STOL transport for civil and military air traffic, discussing intercity travel, military dispersal requirements, systems performance, cockpit layout, etc

07 p1194 A70-19605

Air cargo transportation systems in 1970s, discussing market expansion, payload capacity and fleet growth, containerization, etc

07 p1250 A70-19875

V/STOL transport aircraft design in Germany, analyzing demands in military and civil sectors

08 p1435 A70-20639

Personnel protection against accidental decompression in transport aircraft at high altitudes, recommending flight stations with capsule to achieve ground level oxygen equivalent

09 p1627 A70-23459

V/STOL transport aircraft cockpit design in terms of size, geometry and equipment accommodation

10 p1804 A70-24048

Civil VTOL transport aircraft handling and performance qualities using fixed base simulator with electronically generated display

10 p1859 A70-24214

Transport aircraft flight recorders for parameters essential for operation and aircraft maintenance

11 p2050 A70-25818

Maintenance trends for transport aircraft jet engine, considering engine and component pooling, inspection accessibility, monitoring, etc

[SAE PAPER 700316]

12 p2290 A70-27455

Automatic engine maintenance recording system on air transport aircraft noting data reduction

[SAE PAPER 700317]

12 p2335 A70-27456

Reliability and maintainability from airline standpoint, discussing concepts, language and standards for aircraft design

[SAE PAPER 700326]

12 p2335 A70-27460

Jet transport wakes resulting from high engine thrusts considered hazardous to following aircraft, discussing multiple-instrumented runways for measuring visibility

12 p2162 A70-27995

Gust response calculations compared with flight measurements for two fighter aircraft and jet transport to determine accuracy

[AIAA PAPER 68-892]

12 p2162 A70-28077

Book on Polish air cargo transport covering transport volumes, aircraft, preparation and loading operations

13 p2524 A70-29453

Design costs for large subsonic transport engines in terms of size, engine ratings and community noise

14 p2629 A70-30944

R and D impact on transport aircraft design economics

14 p2669 A70-30945

Short haul Mercure airliner weight saving design and manufacture

14 p2593 A70-31371

Hypersonic aircraft technology, discussing long range transport, reusable launch vehicles and propulsion systems

15 p2673 A70-31851

Human survival problems of transport aircraft in various airport ground-air situations and environmental conditions

15 p2676 A70-32224

Twin jet light transport Corvette airframe, discussing flight characteristics and economical aspects

15 p2676 A70-32793

Transport aircraft interior design based on anthropological, architectural and engineering factors

16 p2841 A70-33767

Low pressure ratio lift fan propulsion system for intercity VTOL transports, considering thrust, safety, noise, weight, components, speed, turbine and transmission

[AIAA PAPER 70-670]

16 p2971 A70-33952

Ti sheet welded construction for transport aircraft fuselages, assuming use of electron beam and plasma arc equipment

17 p3198 A70-34452

Maneuver load alleviation /MLA/ configurations for wing bending load relief on transport aircraft, showing improved payload and span performance

[AIAA PAPER 70-877]

17 p3016 A70-34813

Wide body commercial jet transport structural design considerations applied to DC 10 aircraft

[AIAA PAPER 70-895]

17 p3193 A70-35812

Large capacity transports influence on air cargo operations, and joint use cargo terminal planning

[AIAA PAPER 70-920]

17 p3204 A70-35832

Air transport operations and economics in 1970 decade, taking into account cost-revenue ratio and cost effectiveness of various aircraft

17 p3204 A70-35852

Subsonic and supersonic transport aircraft design, discussing supercritical wing concept, fuel consumption reduction, composite aircraft structures, short haul transports, etc

17 p3022 A70-35854

European A-300-B Airbus program, discussing technical and economical aspects

18 p3213 A70-36509

High speed civil and commercial transport aircraft, discussing jet-orbital flight

18 p3333 A70-36664

V/STOL aircraft for short haul transportation, discussing speed, noise, reliability, economy, etc

[SAE PAPER 700333]

18 p3214 A70-36797

Propulsion system impact on military/commercial STOL transport aircraft commonality, taking into account augmented jet flap and externally blown flap powered lift wing concepts

[SAE PAPER 700269]

18 p3214 A70-36819

Military and commercial transports turbofan propulsion systems impact on future aircraft design and development

[SAE PAPER 700267]

18 p3214 A70-36820

European airbus designs, considering potential market and financial problems

19 p3357 A70-38952

Jumbo jets turbofan engines design, considering fuel consumption, maintenance, reliability, noise reduction, etc

19 p3491 A70-38953

Pilot/vehicle feedback systems with flight director computer for transport aircraft longitudinal control during landing, discussing design by manual control displays theory

[AIAA PAPER 70-1001]

20 p3560 A70-39530

Transport aircraft noise at three major airports by noise exposure forecast /NEF/ contours methodology

21 p3750 A70-40896

Short haul jet transport aircraft design, discussing Computer Aid Design, Airline System Simulator and Traffic Demand Predictor computer programs

[ICAS PAPER 70-28]

23 p4284 A70-44105

Emergency life saving instant exits for transport aircraft, using electromechanical confined transfer shaped explosive device

23 p4141 A70-44487

Commercial transport aircraft fatigue loading data from NASA VGH /airspeed-acceleration-altitude/ program, discussing instrumentation, sample sizes, etc

23 p4270 A70-44548

Airframe skin panels adhesive bonding in wide-bodied jet transports, emphasizing fuselage fatigue and corrosion resistance

[SAE PAPER 700863]

24 p4349 A70-45875

Noise reduction regulations effects on subsonic transport design and configuration

[SAE PAPER 700806]

24 p4290 A70-45876

Airline selection of Auxiliary Power Unit /APU/ for transport aircraft, noting benefits of air conditioning during ground operation

[SAE PAPER 700816]

24 p4394 A70-45901

Noise reduction design for subsonic transport turbofan engines

[SAE PAPER 700807]

24 p4395 A70-45907

Quiet V/STOL transport aircraft from DC-9-10 modification, discussing flying qualities, propulsion and control system interfaces, configurations, etc

[AIAA PAPER 70-1409]

24 p4291 A70-45916

Air transportation beyond 1970, discussing general aviation, short haul systems, STOL, helicopter, V/STOL, subsonic, supersonic and hypersonic aircraft

[AIAA PAPER 70-1262]

24 p4291 A70-45918

All-body configuration hypersonic transport aircraft performance by computer synthesis, considering sonic boom constraint, maximum payload ratio and optimal cruise speed

[AIAA PAPER 70-1224]

24 p4291 A70-45957

Thermodynamic and transport properties of Na, K, Rb and Cs vapors to 3000 K, for use in liquid metal coolant and power systems

01 p0214 A70-10299

Direct solar radiation concentration by paraboloid mirrors, analyzing energy transport and distribution functions, based on statistically distributed imperfections of reflecting surfaces

01 p0010 A70-10762

Surface catalysis and variable transport properties effects on chemically frozen dissociated hypersonic air flow boundary layers enveloping flat plates and slender wedges

01 p0067 A70-11179

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions

01 p0068 A70-11567

Density effects on transport coefficients of gaseous mixtures, solving modified Boltzmann equation including collisional transfer and three-particle collision effects

03 p0606 A70-13576

Sealed-off He-Cd laser construction, describing life test, noise, Cd transport characteristics and transverse magnetic field effect

03 p0501 A70-13582

Electric discharges in low pressure Ar in external magnetic fields, studying charge in transport coefficients and drift due to MHD forces

04 p0724 A70-14529

Faraday type open circuit MPD generator model obtained with allowance for temperature and pressure losses and gas transport properties dependence on static parameters

04 p0725 A70-14530

Transpiration-cooled electric arcs for high temperature high density plasma generation, considering uncertainties in plasma transport properties and temperature distributions

04 p0729 A70-15591

Test apparatus for investigating crystal defects influence on simultaneous measurement of metals thermal and electric conductivity under plastic deformation at cryogenic temperature

05 p0829 A70-16399

Beam transformation laws and matrices for Gaussian beams, discussing propagation, reflection and refraction in geometrical optics

05 p0883 A70-16773

Monte Carlo calculations of nonequilibrium radiative transport, including weighting and biasing techniques

05 p0958 A70-17084

Equation describing atmospheric oxygen conductance to human tissues compared with experiments, ascribing discrepancies to inhomogeneity in diffusion/perfusion relationships

06 p0993 A70-17434

Viscosity, thermal conductivity, specific heat and Prandtl number of hydrogen, methane and hydrogen-methane mixtures calculated for variation with temperature neglecting dissociation effects

06 p1177 A70-17700

Dissociating hydrogen transport coefficients analysis compared with data calculated as function of temperature and pressure without allowance for ionization

07 p1338 A70-19654

Transport properties of high temperature gases compared with room temperature differences, considering chemical equilibria, heat conduction and atom-free radical forces

07 p1424 A70-19880

Electrical conductivity of fully ionized plasma in strong magnetic field computed as application of method for plasma transport coefficients

07 p1354 A70-20246

Dynamics of multicomponent plasma involving charged or neutral gases with transport phenomena for case of no magnetic field

09 p1738 A70-23580

Flux equations of single velocity Boltzmann type for unsteady transport problems applied to concentration discontinuity propagation through plane layer

10 p1966 A70-23871

Thermomagnetic transport coefficients in anisotropic metals based on theory for galvanometric properties, producing closed form expression for conductivity tensor

11 p2097 A70-25618

Thermodynamic and transport properties of high temperature and pressure gases measured with ultrasonic pulse technique

11 p2147 A70-25753

Plasma transport properties at temperatures up to 15000 K, considering electrical and thermal conductivity, radiation source strength and viscosity

11 p2089 A70-25759

Nitrogen transport properties to 26,000 degrees K, measuring current-field intensity properties and radial temperature distributions in molecular nitrogen cascade

11 p2151 A70-26841

Interplanetary shock waves layer formation in collisionless medium, using bulk transport parameters for dissipation requirement

12 p2308 A70-27885

Dilute gas transport properties calculation, investigating numerical techniques to minimize computation time to prescribed accuracy

13 p2441 A70-29089

Active and passive ion transport mechanisms in excitable animal cell maintaining constant membrane polarization

13 p2352 A70-29351

Transport cross sections for isotopic methane and mixtures, considering inelastic and thermal diffusion effects

14 p2665 A70-30652

Statistical transport, energy and chemical reaction rate in turbulent flow field with uniform velocity gradient, using Brownian motion theory

14 p2566 A70-31029

Electron distribution for transport coefficients in Lorentzian plasma under magnetic field, determining electrical conductivity, thermal diffusion and viscosity

14 p2623 A70-31033

Transport properties of partially ionized argon based on electron velocity distribution function, comparing to Chapman-Enskog calculations

15 p2774 A70-31799

Thermoelectric power measurement of thin Au films, relating results to transport parameters and internal stresses

15 p2785 A70-32582

Dissociating hydrogen transport coefficients analysis comparison with data calculation as function of temperature and pressure without allowance for ionization

15 p2828 A70-32691

Transport and relaxation processes prediction for turbulent fluid, noting similarities to Fourier integral representation of flow field

16 p2895 A70-33969

Absolute stability and turbulent transport upper bounds in Couette flow, using variational analysis

17 p3066 A70-34543

Exact and normal solutions of Boltzmann equation linearized around total equilibrium, yielding Navier-Stokes and Burnett transport coefficients

17 p3128 A70-34628

Turbulent boundary layer structure, considering flow properties prediction, wake-like behavior, bursts, compressibility, transport properties, etc

17 p3068 A70-34665

NTWO Fortran IV family of subroutines for thermodynamic and transport properties of nitrogen

17 p3195 A70-34746

Collection of papers on transport phenomena in fluids covering hydrodynamics, thermodynamics, kinetic theory, thermal diffusion, etc

17 p3072 A70-35528

Isotropic fluid systems in nonequilibrium, investigating thermodynamic characteristics of transport phenomena

17 p3072 A70-35529

Transport processes in chemical reactions and biological functions of living systems, using nonequilibrium thermodynamics approach

17 p3032 A70-35539

Soviet papers on transfer phenomena in low temperature plasmas

19 p3480 A70-38180

Intercomponent momentum and energy exchange in weakly ionized gases, examining kinetic theory of subsonic and supersonic transport processes

19 p3482 A70-38945

Auxin downward transport by gravity in leaves, examining ethylene inhibition

20 p3570 A70-39234

Transport coefficients of inhomogeneous magnetized bounded and unbounded plasmas based on quasi-linear approximation

21 p3857 A70-41385

Reacting planetary carbon dioxide-nitrogen atmospheres high temperature equilibrium thermodynamic and transport properties

21 p3950 A70-41747

Nitrogen transport coefficients as function of high temperature in stationary plasma produced in cascade arc chamber

22 p4082 A70-43373

Near critical heat transfer in cryogenic fluids, discussing thermodynamic and transport properties

23 p4279 A70-44357

Enskog theory extended to three particle collisions for gas transport properties

23 p4222 A70-44427

Intermolecular forces at close approach distances in calculating thermodynamic and transport properties of high temperature dilute gases, using molecular beam methods

23 p4222 A70-44430

Gas transport properties at high temperatures and pressures, discussing Ar plasma arc characteristics

23 p4226 A70-44433

Partially ionized Ar transport properties, computing electron velocity distribution function as perturbation for Lorentzian mixture

23 p4220 A70-44437

Kinetic transport theory for mixed dilute gases consisting of linear rotating diamagnetic molecules in external homogeneous magnetic field

23 p4223 A70-44927

Low Reynolds number gas flow past heated circular cylinder, considering Stokes region transport properties

23 p4284 A70-44978

TRANSPORT THEORY

NT CHAPMAN-ENSKOG THEORY

NT MIXING LENGTH FLOW THEORY

Galerkin method applied to boundary layer flows, considering transport problems in unbounded domains

01 p0066 A70-11129

Shear stress transport equation derivation from turbulent energy equation based on properties of turbulent velocity fluctuations

02 p0284 A70-12346

Transport theory application to differential approximations for radiative transfer problems

[ASME PAPER 69-WA/HT-45] 04 p0781 A70-14801

Fast neutron transport characteristics of helical ducts using Monte Carlo code FASTER, computing neutron fluxes and attenuation

05 p0884 A70-16163

Scalar radiative transport equation solved iteratively for microwaves backscattering from turbulent plasma, deriving model for direct and cross polarized cross section

07 p1353 A70-19993

Nonlinear transport equations linearization by hodograph and inversion techniques

08 p1597 A70-21125

Boundary value problems in one speed transport theory, applying Green function technique to neutrons with spherical symmetry

08 p1542 A70-21253

Variational principle of steady state transport process derived from basic inequality in macroscopic theory of nonequilibrium thermodynamics

09 p1789 A70-23224

Elastic scattering effect on photoelectron transport and escape in upper sunlit atmosphere

12 p2222 A70-27187

Transport equations for interaction between radiation and matter under arbitrarily large nonequilibrium in comoving system

13 p2521 A70-29414

Cosmic ray transport in solar wind generalized with anisotropic diffusion approximation

14 p2632 A70-30887

Equatorial F 2 region response during solar eclipse of 7 March 1970, emphasizing ionization production and loss, transport processes and electron temperature

16 p2897 A70-33826

Thermodynamic effects and transport phenomena in discontinuous system of gas filled containers connected by membrane, deriving entropy production and diffusion flux in membrane

17 p3197 A70-35531

Statistical theory of irreversible transport processes in fluids, considering deviation from equilibrium as stochastic process

17 p3131 A70-35532

Dilute gas transport expressions experimental substantiation, emphasizing nonequilibrium thermodynamics as macroscopic theory rather than empirical postulate

17 p3072 A70-35536

Semiempirical theory of anisotropic turbulent transport, deriving closed system of flow equations

17 p3073 A70-35736

Ballistical transport in collisionless exosphere, discussing heat flux of ballistical oxygen and model temperatures for day and night conditions

17 p3080 A70-35765

Solar corona streamer and interstreamer regions, examining geometrical and dynamic structure by energy transport process

20 p3712 A70-40417

Approximate calculations of thermal and viscous transport in high temperature air based on empirical transport equations

21 p3951 A70-41750

Macroscopic equations of motion established by Maxwell transport equations for relativistic perfect gas

22 p4011 A70-42716

Radiation shield design and transport calculations, reviewing kernel methods development and relevant computer programs

23 p4217 A70-43811

Transport equation relation between irreducible tensorial sets, examining geometrical symmetry influence and thermomagnetic and galvanomagnetic effects

24 p4428 A70-45520

Monovalent cations active transport model in mitochondria, noting membrane potential as driving force and ion pump omission

24 p4304 A70-46230

TRANSPORT VEHICLES

Ram wing tube ground transportation vehicle, analyzing optimum lift-drag ratio and induced power requirements

11 p1975 A70-25966

Reusable ballistic orbital-global transportation systems using rocket sled-assist-takeoff compared to SST systems in terms of effectiveness and cost

11 p2122 A70-26048

Interstellar transport vehicles design around thermomolecular propulsion plants, discussing weight, mission velocity, acceleration time and fuel costs

11 p2123 A70-26054

Space propulsion systems for public transportation to and from orbit and throughout near solar system, discussing commercial requirements

11 p2102 A70-26060

Transportation vehicle noise control measures and acceptability, discussing physical and operational source modifications using aircraft noise examples

12 p2336 A70-27849

TRANSPORTATION

NT AIR TRANSPORTATION

NT HIGHWAYS

NT RAIL TRANSPORTATION

NT RAPID TRANSIT SYSTEMS

NT SPACE TRANSPORTATION

NT URBAN TRANSPORTATION

Manned reusable space transportation system technology requirements and vehicle types

[AIAA PAPER 69-1116] 01 p0194 A70-10613

Ram wing vehicles aerodynamics application to high speed ground transportation, studying effect on passenger ride quality

[AIAA PAPER 70-142] 06 p0973 A70-18145

Test facilities and procedures for obtaining aerodynamic data required for studying vehicle-in-tube transportation systems

[AIAA PAPER 70-225] 06 p1030 A70-18221

High speed ground tube vehicle transportation system aerodynamics, presenting drag coefficients and static wall pressure measurements

16 p2839 A70-34264

Air freight containers in continuous air/land transportation chain, discussing weight, performance, cost, technical concepts and inter and nonintermodal prototypes

22 p4007 A70-43273

TRANSURANIUM ELEMENTS

NT PLUTONIUM ISOTOPES

TRANSVERSE ACCELERATION

Two dimensional supersonic turbulent near wake saddle point singularity during recompression analyzed by including transverse momentum integral equation

[AIAA PAPER 70-228] 06 p1039 A70-18106

Intracerebral, peripheral and central blood circulation relationship in humans during transverse accelerations

07 p1209 A70-19520

Prolonged transverse acceleration effects on rats kidney and posterior hypophysis neurosecretions

20 p3575 A70-40188

TRANSVERSE OSCILLATION

NT H WAVES

Transverse vibration of viscoelastic polymethyl methacrylate column with initial curvature under periodic axial load, determining amplitude-frequency curves

[ASME PAPER 69-WA/APM-13] 04 p0772 A70-14915

Transverse mode locking for carbon dioxide laser achieved with nonlinear boron chloride absorber, observing emission spatial buildup

06 p1083 A70-18425

Simultaneous partial integrodifferential equations for transverse oscillations of uniform short beams

07 p1406 A70-19306

Transverse oscillation periods of cylinder containing flowing fluid obtained by solving nonlinear partial

differential equations describing transverse and longitudinal motion

08 p1592 A70-21480

He-Ne laser emission in transverse oscillation mode, analyzing spatial and temporal coherence characteristics

09 p1694 A70-22135

Thin rectangular plates transverse natural frequencies, deriving equations of motion and boundary conditions in bending moment terms by vibrational principle

11 p2143 A70-26645

Complex plates free transverse oscillation modes and frequencies using Ritz method

15 p2818 A70-32183

Rope transverse oscillations due to impact taking bending rigidity into account

24 p4424 A70-45627

TRANSVERSE VIBRATION

U TRANSVERSE WAVES

TRANSVERSE WAVES

Centrally clamped spinning circular disk free transverse vibration analysis within accuracy of numerical computations

03 p0584 A70-12931

Fabry-Perot resonator misalignment effect on TEM wave transmission coefficient in gas laser

03 p0492 A70-13749

Adiabatic disturbances propagating as transverse waves in inviscid fluid rotating as Rankine vortex about cylindrical container axis, discussing harmonics

03 p0467 A70-13779

Smoked-foil technique for transverse wave quantitative study in condensed-phase explosives

03 p0606 A70-13814

Radial vibration of cylindrical shell of transversely isotropic material determined using finite Hankel transform

03 p0595 A70-13904

Dielectric loaded waveguide with symmetric microstrip line, evaluating transverse wave number by finite difference method

03 p0458 A70-14035

Solid viscoelastic cylinder bonded to thin elastic casing, analyzing normal and tangential stresses for stress and displacement frequency responses in forced transverse vibration [ASME PAPER 69-WA/APM-20]

04 p0771 A70-14911

Horizontal transverse vibration effects on manual tracking performance, relating tracking errors to frequency rather than acceleration

04 p0643 A70-14981

TEM wave reflection incident on conducting thin strips semifinite array in free space not accompanied by emission

05 p0812 A70-16243

HF conductivity tensor of isotropic plasma, taking into account particle correlations describing weakly Langmuir turbulent plasma

05 p0889 A70-16532

Transverse vibrations of isotropic truncated-cone beam fixed at ends compared with cylindrical beam

05 p0942 A70-16666

Parallel plate TEM waveguides radiation pattern slope diffraction analysis

06 p1021 A70-17570

Gaseous detonation transverse wave propagation and measurement from smoked foil records

07 p1424 A70-20006

TEM waves penetration into magnetoactive semibounded plasma using Vlasov and Maxwell equations, obtaining electric field for specular reflection of electrons

08 p1551 A70-21255

Simply supported rectangular plate investigated for effect of thermal gradient on transverse vibrational frequencies

08 p1595 A70-21976

Quasi-transverse constant profile wave in finite elasticity with isothermal shock at discontinuity compared to Whitham breakdown

10 p1956 A70-24191

Transverse vibrations of rods, plates and shells based on hyperbolic, circular and Bessel functions

10 p1959 A70-24586

Plasma instability in TEM wave field, considering nonpotential HF oscillations buildup with frequency near external wave frequency

13 p2463 A70-29283

Fabry-Perot resonator higher modes excitation by external TEM wave, discussing optimal mismatch for maximum intensity

13 p2408 A70-29358

Boundary value problems reduction to variational problem by transversality conditions of calculus of variations

14 p2599 A70-30644

Strip lines transmission characteristics with rectangular outer conductor and multielectric layers within TEM wave approximation, using Green function and variational principle

14 p2558 A70-31316

Transverse vibration of thin circular elastic turbine disk of variable thickness rotating axially at constant angular velocity

16 p2916 A70-32994

Longitudinal and transverse hypersonic mm waves excitation in quartz single crystal at liquid helium temperature

16 p2952 A70-33258

Plane TM wave scattering by systems of two parallel conducting elliptical cylinders, metal tapes and combinations

19 p3374 A70-37278

Transversely magnetic and electric wave critical frequency spectra in Pi and H section waveguides, using summary representation method

19 p3378 A70-37735

Edge distribution of transverse reactive forces of rectangular plate with nonuniform flexural rigidity at buckling load

19 p3541 A70-38042

Radiation theory circular waveguide in dominant TE mode and flush mounted to infinite conducting flat ground plane covered by plasma or dielectric sheath

20 p3586 A70-39500

Acoustic frequency spectra of transverse vibrations in bracketed bar caused by dry friction, using Lagrange method

22 p4073 A70-42612

Solar wind instability from TEM waves propagating parallel to magnetic field in electron-proton plasma

23 p4235 A70-43826

Ionospheric parametric amplification and frequency mixing due to polarized TEM waves nonlinear interaction with longitudinal electrostatic waves

23 p4185 A70-43838

Longitudinal and transverse hypersonic mm waves excitation in quartz single crystal at liquid helium temperature

23 p4218 A70-44281

Acoustic plasma wave excitation by transverse electromagnetic wave beam, calculating LF instabilities and energy losses

24 p4384 A70-45149

TRAPEZOIDAL WINGS

Ackeret theory for infinite aspect ratio, rectangular and trapezoidal constant cord wings with arbitrary spanwise variation of profile in supersonic flow

16 p2836 A70-33748

Aerodynamic lift, drag and momentum coefficients in supersonic regime for rectangular and trapezoidal wings with spanwise variable profile

22 p3958 A70-42615

TRAPEZOIDS

Illusions of rotation perception with oscillating trapezoid and oscillation perception with rotating trapezoid, correlating magnitudes

05 p0807 A70-16673

TRAPPED MAGNETIC FIELDS

Auroral oval position with trapping region phi s boundary compared with closed geomagnetic field lines phi c, using Alouette 2 satellite data

13 p2398 A70-29229

TRAPPED PARTICLES

NT ARTIFICIAL RADIATION BELTS

NT INNER RADIATION BELT

NT MAGNETICALLY TRAPPED PARTICLES

NT OUTER RADIATION BELT

NT PROTON BELTS

NT RADIATION BELTS

Electron trapping effect on ion-wave instability in plasma, deriving expression for saturation energy spectrum

01 p0152 A70-11361

Charged particle self resonant motion in field of plane electromagnetic wave, showing trapped particles existence in whistlers

02 p0256 A70-12116

Accumulated plasma density and lifetime measurement of trapped ions between accelerator and periodic magnetic mirror, showing limitation by collisions and charge exchange

03 p0532 A70-13683

Satellite measurement of auroral particles and particles trapped in Van Allen belts

03 p0559 A70-13852

Spacecraft surface secondary electron emission effects on electron trap measurements in magnetosphere and solar wind, noting agreement with positive ion densities

03 p0561 A70-13994

Optically trapped filaments in liquid carbon disulfide by side illumination and crossed polarizers using glass laser, noting birefringence and duration time

04 p0703 A70-15619

Al foil exposed to solar wind on moon during Apollo 11 mission examined for helium particles, finding lunar solar wind albedo

05 p0900 A70-16093

Electron distribution function in quasi-static free moderately ionized plasma with partial radiation trapping determined from electron-electron collisions

05 p0889 A70-16452

Satellite radiation dose rate experiment with simultaneous trapped particle and absorbed dose rate measurements, discussing proton spectra, material distribution, shielding effects, etc

06 p1061 A70-17263

Kinetic theory of longitudinal ionic oscillations pertaining to LF plasma oscillations monitored in Ariel 1 satellite wake due to ions trapped in potential trough

06 p1120 A70-17591

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons

06 p1121 A70-17802

Fission gases trapped in fuel particles, cladding and matrix of irradiated refractory metal-uranium oxide cermets determined by gamma counting

07 p1332 A70-19851

Quasi-trapped electrons precipitating at high latitudes measured from low altitude polar orbiting satellite

08 p1562 A70-21382

Trapped particle vibrations stability during quasi-neutral plasma disturbance due to centrifugal drift in stellarator electric field

08 p1555 A70-21982

Electron diffusion in trap with magnetic mirrors under pulsed field perturbations, determining coefficients by numerical integration of drift equation

10 p1931 A70-24311

Swiss Solar Wind Composition Experiment, analyzing trapped particles characteristics of Apollo 11 and 12 lunar exposed aluminum foil

11 p2105 A70-25950

Particle spectrometer for Apollo measurements of trapped protons and electrons, using directional telescope composed of solid state and scintillation counters

12 p2232 A70-27404

Plasma turbulence in Van Allen belts, examining weak turbulent electromagnetic wave properties, with emphasis on trapped energetic particles radiation

13 p2486 A70-28555

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons

13 p2460 A70-28653

Trapped particle interactions with plasma waves, analyzing pitch angle scattering, oscillating electric field, transverse waves and resonance effects

13 p2468 A70-29929

Finite Larmor radius interchange and LF drift oscillations due to magnetospheric temperature and density gradient stresses in trapped plasma

13 p2401 A70-29936

Trapped and polar proton and electron flux observations during 9 June 1968 magnetic storm

13 p2482 A70-30072

Trapped alpha particle and proton spectra from satellite measurements, considering magnetosphere injection

13 p2484 A70-30093

Trapped particles radial diffusion in formation and decay of radiation belts

13 p2484 A70-30096

Trapped protons population explanation by combined pitch angle scattering and radial diffusion across L shells

13 p2484 A70-30097

Magnetospheric particles, fields, electromagnetic waves and data on collisionless bow shock structure

13 p2484 A70-30098

Book on space physics covering charged particles in magnetic, electric and dipole fields, cosmic rays, magnetically trapped radiation and interplanetary plasma

14 p2633 A70-30099

Hysteresis in MOS transistors attributed to trapped charge carriers on oxide near silicon oxide interface

14 p2555 A70-30338

Sideband instability and trapped particle charge density response of large periodic Bernstein-Green-Kruskal waves in collisionless plasma

14 p2623 A70-31039

Geomagnetic dipole field disturbances by trapped particles, calculating self consistent equilibrium configuration for ring current dipole moments

15 p2727 A70-31905

Longitudinal electric field effect on trapped particle motion in asymmetric magnetosphere, considering electron precipitation

15 p2728 A70-31990

Longitudinal and transverse electric field effects in magnetospheric electron precipitation, discussing trapped particle drift

16 p2972 A70-34188

Magnetospheric electric field configuration from trapped particle flux asymmetries, using Explorer 14 electron data

18 p3306 A70-36024

Elongation characteristics of modulation type charged particle traps and analyzers, discussing ions and electrons trapping

18 p3307 A70-36171

Trapped particle population changes associated with solar events, discussing solar wind discontinuity effects on magnetosphere

19 p3495 A70-37487

Trapped and precipitated electron observations at northern high latitudes in 45-450 keV range, using ESRO-1 satellite 19 p3496 A70-37515

Apollo 11 lunar fines trapped noble gas elemental and isotopic abundances, suggesting solar wind origin 21 p3906 A70-41565

Trapped and cosmogenic rare gases from stepwise heated Apollo 11 lunar dust and crystalline rocks, using mass spectrometry 21 p3908 A70-41584

Ion cyclotron resonance spectroscopy for detecting trapped gaseous ions in analyzer cell, observing ion-molecule reactions 23 p4196 A70-44390

Energy dependence of equatorial pitch angle distribution for protons trapped in radiation belt, based on adiabatic theory and observational data 23 p4192 A70-44923

TRAPPED RADIATION

U RADIATION BELTS

U TRAPPED PARTICLES

TRAPPING

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect 08 p1560 A70-20568

Fields in wave interaction region during spatial trapping of parametrically amplified waves by radiation of pumping, using Laplace transformation 10 p1844 A70-25157

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect 15 p2795 A70-32723

Gunn effect in two-valley semiconductors with traps explained by model, assuming field-dependent trapping times and field-independent carrier generation rates 20 p3686 A70-39116

Trap filling dependence on intensity, temperature and wavelength of photoexcitation in CdS crystals subjected to electron radiation damage and annealing 21 p3864 A70-42013

TRAPS

NT ION TRAPS (INSTRUMENTATION)

NT VAPOR TRAPS

TRAVELING CHARGE

Fourier and perturbation methods applied to radiation from uniformly moving charge in inhomogeneous magnetoactive medium, deriving expressions for radiation spectrum and energy losses 03 p0531 A70-13285

Cerenkov radiation of electron-positron pair as moving radiating dipole in EAS, discussing emission effects of primary energy, production height and inclination angle 03 p0561 A70-14186

Electromagnetic wave scattering from charged particle in hot electron plasma in magnetic field, considering relativistic corrections for scattered radiation spectra 07 p1352 A70-19992

TRAVELING WAVE AMPLIFIERS

Spectroradiometer with paramagnetic traveling wave quantum amplifier applied to radio telescope, studying noise, temperature and fluctuation sensitivity at given time constant 08 p1495 A70-21054

TWT amplifiers for 4-8 GHz frequency range exhibiting decreased weight and volume and increased efficiency 08 p1477 A70-21370

Stationary regime stability of one dimensional model of optical quantum traveling wave amplifier, determining trapping band of traveling wave laser 10 p1901 A70-25158

Traveling wave tube amplifier performance in numerous orbiting communication satellites, emphasizing life test data [AIAA PAPER 70-507] 11 p2015 A70-25406

Traveling wave amplifier on section of inhomogeneous transmission line with tunnel diodes 11 p2020 A70-26808

Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength 11 p2020 A70-26816

Anomalous LF noise in receiving devices with traveling wave quantum paramagnetic amplifier 11 p2020 A70-26817

SHF traveling wave tube amplifier design and characteristics 17 p3054 A70-35413

Traveling wave amplifier on section of inhomogeneous transmission line with tunnel diodes 24 p4317 A70-45180

Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength 24 p4317 A70-45188

Anomalous LF noise in receiving devices with traveling wave quantum paramagnetic amplifier 24 p4351 A70-45189

TRAVELING WAVE MASERS

Superradiant traveling wave laser emission observed with polymethine cyanine dyes pumped by

mode locked ruby laser for picosecond duration pulse generation 01 p0110 A70-10564

Traveling wave maser with increased linear gain obtained by slow wave structure through asymmetrical positioning of dielectric 06 p1082 A70-17778

Three channel traveling wave maser with cryogenic superconducting magnet for C-band monopulse radar system, describing construction and electrical characteristics 10 p1900 A70-24894

Gain-stabilization of SHF traveling wave maser radiometer, using thermal noise from neon discharge tube 12 p2228 A70-26881

Broadband traveling wave masers bandwidth increased by staggering direct current magnetic field along active structure length 12 p2249 A70-27690

Pulse area-pulse energy description of traveling-wave laser amplifier 24 p4351 A70-45257

TRAVELING WAVE MODULATION

Uncontrolled and controlled neodymium glass laser outputs, using ultrasonic traveling wave diffraction modulator 08 p1510 A70-20514

Diffraction shaped ruby laser monopulse during excitation of modulated ultrasonic traveling waves in phototropic Q switch 09 p1696 A70-22483

CW HCN laser driven phase matched traveling wave lithium niobate electro-optic light modulator performance 15 p2750 A70-31976

Carrier frequency transfer of amplitude modulated signal at two coupled transitions in traveling wave gas laser 23 p4202 A70-45055

TRAVELING WAVE TUBES

Pulse position modulation focused TWT for airborne electronic countermeasure broadband jamming, considering output power and thermal design 04 p0653 A70-15656

Traveling wave tubes used in electronic countermeasure chain or repeater for deception jammer, discussing design and performance 04 p0653 A70-15658

Electron trajectories in M-type backward wave tube, TWT and magnetron, giving output power expressions 05 p0823 A70-16885

Nonlinear equations for TWT derived allowing for electron beam defocusing and slow wave structure deposition current 05 p0823 A70-16887

Two frequency electron beam modes produced by O-type TWT at simultaneous input of HF signals of different amplitudes and frequencies 05 p0824 A70-16894

Parametric interactions in three frequency TWT parametric amplifier, using power series 05 p0824 A70-16895

Crossed field amplifiers properties and applications, comparing performance to TWT 09 p1642 A70-22008

Low noise TWT, discussing dynamic range, gain and phase tracking, environmental performance, life behavior and noise factor interrelations 09 p1644 A70-22233

TWT model with slow wave structure and realized negative depression coefficient and Q factor described by variational method 09 p1644 A70-22410

High sensitivity photomultiplier TWT microwave photodetector with internal lowered secondary electron multiplier and spiral HF getter 09 p1645 A70-22413

Optimal construction of microwave filters with TWT and ferrite direct gain receivers 09 p1648 A70-23166

Multibeam O-type TWT characteristic equation analyzed for arbitrary space diversity, calculating gain for various velocity parameter values and electrical lengths 09 p1651 A70-23638

TWT characteristic equation with arbitrary coupling between two electron beams over wide range of velocity difference, analyzing wave amplitude constant 09 p1651 A70-23639

Magnetron-type electron gun structure with high design perveance for TWT applications 09 p1651 A70-23642

Space charge parameters influence on electron wave and traveling wave interactions in TWT 09 p1652 A70-23654

Wave propagation constants in electron wave TWT, studying nonuniformity parameter influence to determine relationships between beam and system parameters 09 p1652 A70-23655

Input and memory-storage traveling wave tubes for electronic countermeasures 10 p1852 A70-24888

Microwave tubes for high power transmission from space to ground and in deep space communications, discussing klystrons, TWT and crossed field amplifiers [AIAA PAPER 70-435] 11 p2016 A70-25456

Spacecraft S band power amplifier TWT electrical, environmental and life tests under saturated conditions [AIAA PAPER 70-506] 11 p2016 A70-25468

TWT, obtaining life performance data from spacecraft, discussing distortion characteristics [AIAA PAPER 70-505] 11 p2017 A70-25494

Unidirectional heat pipe system design to control temperature of high power traveling wave tubes in synchronous orbit communication satellite, dissipating waste heat 11 p2127 A70-26362

Nonlinear phase shift equation derived from TWT single carrier performance, predicting multicarrier performance of communications satellites 12 p2195 A70-27248

CW traveling wave tubes and klystrons LF output signal fluctuations 14 p2555 A70-30303

TWT noise level minimization in 8 mm band with circular spiral slow wave structure and five electrode gun 15 p2707 A70-31519

High power TWT for satellite communications ground stations, including Intelsat experience 17 p3054 A70-35282

Electrons nonlinear interaction with field in traveling wave tube, using approximate quasi-classical quantum mechanics method 19 p3387 A70-37741

Traveling wave tube with two mixed different velocity electron beams, analyzing nonlinear operation by integro-differential equations 19 p3387 A70-37742

Magnetron type backward wave tube with negatively charged slow wave structure, analyzing electron beam wave interaction for starting conditions 20 p3596 A70-39251

TRAVELING WAVES

Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows 01 p0068 A70-11582

Combustion chamber traveling oscillating shock wave as driving mechanism of high amplitude axial mode solid rocket combustion instability 02 p0353 A70-12009

Traveling wave velocity in human cochlea determined by equally loud tonal pairs, comparing results to psychophysical and electrophysiological findings 02 p0237 A70-12323

Horizontal ionospheric drift rates and traveling wave disturbances, showing differences between winter and summer 09 p1667 A70-22493

Standing wave measurements on radiating traveling wave dipole arrays with glide symmetric excitation, showing multimode propagation and effect on log periodic balancing 09 p1633 A70-22688

Ultrasonic traveling waves for nondestructive testing, discussing scattering and velocity anisotropy in polycrystalline metals, propagation in glass, epoxy resins shear moduli, etc 10 p1894 A70-24171

Numerical solution of optimal control with dimensionality not exceeding phase space, using nonlinear programming and traveling wave method 10 p1911 A70-25185

Single mode TW ruby laser with ring resonator, analyzing emission spectral characteristics by Fabry-Perot etalon 12 p2246 A70-27356

Solid state laser with traveling wave during steady state emission, determining pulse shape, duration and amplitude 12 p2247 A70-27497

Circular loop antenna with traveling wave current distribution, considering phase change effects on radiation pattern and gain 12 p2198 A70-27965

Surface wave antenna radiation pattern from finite aperture of corrugated horn antenna 12 p2199 A70-28017

Transverse laser modes interaction in traveling and standing wave generators allowing for spatial distribution 13 p2424 A70-28597

Quantum noises in laser systems, deriving kinetic equation for traveling wave generation field density matrix 13 p2428 A70-29360

Quasi-periodic influence of traveling disturbances on ionospheric F 2 layer small scale drift discontinuities 14 p2570 A70-30226

Atomic collision effect on frequency range of opposing traveling wave modes in gas ring laser, using density matrix equation

15 p2749 A70-31553

Traveling wave light modulator with 15 GHz bandwidth using cubic ZnS crystal with anomalous response

16 p2876 A70-33403

Self excited systems limiting states with traveling wave, analyzing oscillator moving along string under tension

16 p2990 A70-33781

Electrodeless traveling wave accelerator for wind tunnel use, determining gas stream density for subsonic and supersonic operation

16 p2889 A70-33868

Traveling wave antennas, analyzing modal characteristics of various waveguiding structures

17 p3052 A70-35070

Wave propagation measurement by correlation techniques, discussing travelling wave representation, delay times, amplitude coefficients, etc

17 p3091 A70-35449

Statistical directivity, radiation pattern, drift and dispersion of segmented traveling wave antennas

17 p3055 A70-35687

Infinite elastic plates traveling wave flutter in compressible flow, investigating viscous damping effects on critical flow velocity

18 p3343 A70-36701

Electro-optical SHF modulator characteristics calculation from light wave interaction with traveling wave

19 p3443 A70-37291

Traveling wave antenna array single lobe design using mode charts to reduce errors

19 p3376 A70-37688

Traveling horizontal ionospheric waves relationship to magnetic storm onset, showing ionization displacement occurrence

19 p3413 A70-38029

Traveling wave antenna arrays with resistance elements for coupling, measuring noise elimination capabilities

20 p3598 A70-40146

Faraday rotation of radio beacon satellite signals during traveling ionospheric disturbances simulated for spaced ground stations

20 p3590 A70-40481

Traveling thermal wave induced channel flow, examining velocity profile thermal boundary conditions and shear stress

21 p3948 A70-41247

Quasi-equispaced traveling wave slot arrays with below sidelobe crosspolarization, considering computer designed X band prototype

21 p3800 A70-42050

Quasi-periodic influence of traveling disturbances on ionospheric F 2 layer small scale drift discontinuities

24 p4331 A70-46301

TREADMILLS

Multistage treadmill exercise tests on healthy business executives noting S-T-segment responses

08 p1445 A70-21265

TREADS

Aircraft tires tread design for improved adhesion under wet runway conditions

14 p2532 A70-31336

TREES

Load distribution in Christmas tree turbine attachments due to centrifugal force on blades, showing strain diagrams

05 p0939 A70-16488

TREES [MATHEMATICS]

Decision trees application to research projects selection, cost stages, probable return on investment and control device

07 p1427 A70-19001

Computer program for system reliability prediction, using probability tree approach and block probabilities

13 p2373 A70-29565

TREES (PLANTS)

Phenolic aldehydes generated from lignin in fossil woods and carbonaceous sediments by oxidative degradation

13 p2361 A70-28911

Phenological network observations comparison for phase behavior of trees and plants in open landscapes and in populated areas

15 p2732 A70-32460

TREMORS

Short duration high workload effects in pilot rr interval and finger tremor during Boeing 747 aircraft let-down, approach and landing

11 p1993 A70-26521

Muscular group response to sinusoidal and trapezoidal force applied to forearm, discussing frequency dependent limb oscillations and neuromuscular effects

21 p3767 A70-42161

TRESCA FLOW

Incremental strain theories for nonproportionate loading of thin walled cylinders, discussing Tresca flow, von Mises theory and Prandtl-Reuss relations

03 p0480 A70-12953

Limit load of cylindrical shell with rigidly clamped edges under varying pressure and axial force, using Tresca yield condition

18 p3343 A70-36722

TRIANGLES

Triangular Lagrangian equilibrium points stability in planar restricted problem of three bodies at order two mass ratio using two variable expansion method

10 p1939 A70-24184

Plate bending triangular finite element for shell structure analysis, considering displacement functions, stiffness matrix and load vector

10 p1957 A70-24482

Shallow shell finite element of triangular shape, noting application to static problems

17 p3184 A70-34908

TRIANGULAR WINGS

U DELTA WINGS

TRIANGULATION

Least squares method adjusting observation functions in satellite triangulation with correlated observations

01 p0082 A70-11455

Space triangulation equations based on simultaneous measurements of satellite topocentric coordinates and distances between tracking station and satellite

02 p0254 A70-11753

Satellite triangulations scale and orientation control, describing terrestrial methods of geodetic bases determination

02 p0254 A70-11755

Azimuth between two stations of triangulation net determined by simultaneous observation of two satellites, discussing mathematical principles and applications in Europe

02 p0289 A70-11797

Earth satellite tracking data reduction for determining geodetic ground nets, examining errors in triangulation procedures

03 p0445 A70-13184

Simultaneous ground and space triangulation procedures, recommending use of satellite photographic observations for error reduction

03 p0445 A70-13185

Satellite surveys and astronomic-geodetic nets for joint terrestrial, space triangulation and gravimetric measurements, including laser distance determination

03 p0445 A70-13191

Multiple timing in elementary space triangulation using synchronous straight line as main net element

03 p0445 A70-13192

Great circle vector formula in space triangulation, discussing topocentric and geocentric position of satellite and tracking stations and absolute distance determination

03 p0445 A70-13193

Space triangulation net using direction and distance measurements from satellite photographic and Doppler observations, including tracking data leveling

03 p0446 A70-13194

Weighting coefficient matrix parameters for European satellite triangulation determined, considering sequence of separate points shown by photographs instead of single point

05 p0839 A70-16345

Optimally ordered triangular factorization for solving symmetrical systems of linear matrix equations

05 p0876 A70-16573

Finite element method using cubic polynomials over triangle as trial functions for solving second order boundary value problems in linear theory of elasticity

07 p1324 A70-19075

Astronomical and physical geodesy, discussing geometrical methods involving triangulation and trilateration and geocentric coordinates method in navigation

07 p1265 A70-19370

Three vector coplanarity equations for space geodetic triangulation grid, discussing role of satellite photographic observation

09 p1667 A70-22488

Analytical phototriangulation block equalization by two stage polygon method, discussing computer algorithm for problem solution

09 p1681 A70-23344

Short arc method and spatial fitting of orbit in satellite triangulation, establishing sequential order between methods

09 p1670 A70-23440

Real time opto-triangulation by cinetheodolites for data acquisition used in rocket impact prediction

09 p1640 A70-23779

Analytical aerial triangulation iterative solution mathematical convergence parameters tests, considering photogrammetric relations for standard conditions in variable size block

10 p1878 A70-24729

Photogrammetric three dimensional control extension investigated by plotter and method of Independent Model Aerotriangulation

10 p1890 A70-24731

Method of dependence involving triangulation applied to reducing photographs of earth satellites

11 p2006 A70-26185

U.S. Coast and Geodetic Survey satellite triangulation data reduction methods, discussing data acquisition system, plate preparation, etc

11 p2046 A70-26190

Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction

12 p2308 A70-27875

Lunar surface large scale maps by photogrammetric method requiring triangulation of convergent high resolution Lunar Orbiter photographs by block process

16 p2979 A70-34045

Computer programs for photogrammetric aerial triangulation with independent models

18 p3248 A70-36778

Adjustment program for aerial block triangulation with independent models, using planimetry-height iterations

18 p3248 A70-36779

Instrumental measurement of projection center coordinates for aerial triangulation with independent models

18 p3248 A70-36780

Spatial aerotriangulation by analytical method based on independent models matched with geodesic grid

22 p4013 A70-42597

Horizontal passpoint error in block analytic aerotriangulations with dense perimeter ground control

22 p4031 A70-42964

Field control method for aerial photograph planar tying in, applying to cartographic reference point coordinate determination in triangulation

24 p4334 A70-45499

TRIATOMIC MOLECULES

Semiempirical potential energy surface generation for triatomic hydrogen from London equation by evaluating Coulomb and exchange integrals taking into account effective orbital overlap

01 p0147 A70-10469

Hydrogen triatomic molecules existence, stability and ionization in molecular beams

07 p1345 A70-20139

Free radicals role in astrophysics, considering diatomic or triatomic radicals in atmospheres of earth, sun, planets, comets, stars and interstellar space

10 p1943 A70-24839

Triatomic hydrogen ion role in solar photosphere opacity implied from limb darkening and specific intensity data

11 p2104 A70-25739

Triatomic hydrogen positive ion-yielding reactions, using EVA ion-molecule beam apparatus

16 p2855 A70-33012

TRIAXIAL STRESSES

Weak interfaces effects in laminates under triaxial tensions at crack tip, analyzing delamination during crack propagation and fracture resistance

01 p0127 A70-10482

Three dimensional nonlinear viscoelastic body stability under triaxial compression, extending results obtained for elastic body

07 p1408 A70-19542

Isotropic elastic three dimensional body steady stressed state under large subcritical triaxial strains described by solving linearized equations

13 p2515 A70-29316

Isotropic nonlinear elasticity problems of stress concentration near spherical cavity in field of triaxial tension, using small parameter method

22 p4120 A70-43714

Low friction seal for axial loading piston in triaxial soil testing cells

23 p4199 A70-43873

TRIAXIALITY

U TRIAXIAL STRESSES

TRICHLORIDES

U CHLORIDES

TRIDENT AIRCRAFT

U DH 121 AIRCRAFT

TRIGGER CIRCUITS

Trigger scaling circuits with pulsed and blanking feedback analysis for minimizing number of couplings

01 p0047 A70-10984

High speed camera synchronization by frame reference pulses for strobe triggering

06 p1060 A70-17147

Monolithic zero crossing AC trigger IC for thyristor power control systems operating in on-off mode

08 p1478 A70-20786

Transistorized pulse repetition frequency bandpass and band elimination filters, using trigger circuit to improve pulse-edge steepness and critical frequency stability

09 p1650 A70-23630

X band Gunn oscillators for binary FSK regenerator operation employing signal injection triggering

12 p2199 A70-28015

High voltage gas laser trigger pulse generators featuring high pulse rate with semiconductor controlled rectifier

14 p2594 A70-31181

Logic circuits reliability with series and parallel connected elements during random malfunctions, obtaining failure formulas for trigger 15 p2716 A70-32901

Gunn effect pulse regenerators, describing random domain triggering rate voltage dependence comparison with Johnson noise predictions 19 p3387 A70-37820

Normal mode pulsed ruby laser system with Xe flash lamp pumping, trigger circuit and transistorized power supply 20 p3643 A70-40355

MOS transistor trigger circuit design parameters statistical calculation and optimization by Monte Carlo method using computer 23 p4171 A70-43957

Air spark gap to switch stored charge in LC circuit, using auxiliary triggering circuit to clamp magnetic flux 23 p4177 A70-44471

Spark gap triggering with Q switched laser, comparing performance with electrical method 24 p4353 A70-45560

TRIGGERS
U ACTUATORS

TRIGONOMETRIC FUNCTIONS
NT TANGENTS

Dual trigonometric series solution for mixed boundary value problems in two dimensional elasticity 05 p0926 A70-15979

Center fed cylindrical half wavelength dipole antenna, computing radiation pattern by trigonometric expansion approximation for current distribution 19 p3388 A70-37869

Soviet book on conjugate functions and trigonometric series covering Hilbert transform, Fourier series properties, Cesaro methods, etc 19 p3459 A70-38799

TRIGONOMETRY
Trigonometric interpolation of polynomials by Lagrangian type orthonormal functions, noting satellite geodesy applications 10 p1909 A70-24185

TRIM (BALANCE)
U AERODYNAMIC BALANCE

TRIMETHYL COMPOUNDS
Hydroxy fatty acid methyl esters gas chromatography and mass spectrometry, noting trimethylsilylation usefulness for locating double bond 02 p0252 A70-12515

TRINITROTOLUENE
Expansion isentropes of TNT/hexogen melts explosion products from measured shock wave parameters in Al, organic glass, foam polystyrene, argon and air 01 p0216 A70-11003

Expansion isentropes of TNT/hexogen melts explosion products from measures shock wave parameters in Al, organic glass, foam polystyrene, argon and air 10 p1960 A70-25008

TRINITROTRIAZOCYCLOHEXANE
U RDX

TRIODES
Input conductance variation for common-emitter triode distributed-gain wideband amplifier, deriving energy equations improving tube characteristics 08 p1472 A70-20862

Microwave pencil triodes and cavities of miniature design for Air Traffic Control Beacon Systems 10 p1852 A70-24886

TRIPHENYLS
Synthesis of alpha-dichloro-seco-A-norcholestone from diol monoacetate reaction with triphenylphosphine followed by hydrolysis and repeated chlorination 06 p1005 A70-17975

TRIPLET EXCITATION
U ATOMIC ENERGY LEVELS

TRIPLET STATE
U ATOMIC ENERGY LEVELS

TRIPROPELLANTS
U LIQUID ROCKET PROPELLANTS

TRITIUM
Daily rhythm in accumulation of rat brain catecholamines synthesized from circulating tritiated tyrosine 16 p2848 A70-33096

Tritium and Ar radioactivities attributable to galactic and solar cosmic ray interactions in Apollo 11 lunar rocks and soil 21 p3906 A70-41564

TRITONS
Average triton energy required to produce electron-hole pair in silicon measured, describing precision charge calibration of amplifier system 15 p2784 A70-32396

TRIVALENT IONS
Resonant energy transfer of trivalent Yb into trivalent Eb for optical pumping improvement for fluorophosphate glass lasing 02 p0314 A70-12725

Strontium titanates ceramics containing various trivalent rare earth ions, observing dielectric relaxation 19 p3486 A70-37755

TROCHOIDS
U PIVOTS

TROILITE
Gray hypersthene Ramsdorf chondrite with thermal and mechanical alterations, discussing shock heating, metal plus troilite melt redistribution, collision and rapid cooling effects 03 p0563 A70-13147

Iron troilite meteorites lead isotopic, Pb and U concentrations, considering fractionation and terrestrial contamination effects 07 p1388 A70-20035

Crystallography of euhedral single crystals from lunar troilite indicating hexagonal forms consistent with high temperature NiAs type structure 21 p3898 A70-41522

High crystallization temperatures for igneous rocks from Tranquillity Base indicated from late formation of sulfide liquid forming complex troilite intergrowths and iron 21 p3902 A70-41553

TROJAN ORBITS
Trojan Relay system with satellites preceding and following earth in solar orbit ensuring radio communication throughout solar system 15 p2698 A70-32061

Trojan asteroids in sun-Jupiter system, determining density near preceding Lagrangian point 17 p3171 A70-35445

Nonperiodic Transtrojan orbits for various mass parameter values in three body problem, discussing double libration 21 p3888 A70-41144

TROPICAL METEOROLOGY
Suppression balloon flight trajectories for dynamics of tropical stratosphere, revealing distinctive circulation features 02 p0228 A70-12694

Pacific ocean equatorial trough zone disturbances structure, discussing organized convective downdrafts role in rapid structural decay 06 p1101 A70-18578

F 2 layer midday ionization equatorial anomaly during summer and winter solstices, using calculated mean critical frequencies 11 p2042 A70-25533

Diurnal variation of equatorial ionospheric electron concentration from Schooner observations 11 p2043 A70-25548

Tropical storms and hurricanes critical winds forecasting accuracy by NASA Manned Spacecraft Center 14 p2606 A70-30558

Tropical circulation structure and energetics from numerical time integration of global atmospheric model with realistic orography 19 p3462 A70-38257

F 2 layer midday ionization equatorial anomaly during summer and winter solstices, using calculated mean critical frequencies 21 p3819 A70-41283

Diurnal variation of equatorial ionospheric electron concentration from schooner observations 21 p3819 A70-41298

TROPICAL REGIONS
Adrenocortical responses of military recruits to subtropical climate, making serum and urinary 17-OHCS measurements on subjects fasting, inactive and at thermoneutrality 01 p0032 A70-10359

Ionospheric F layer in equatorial, mid and high latitude regions for various major phenomena including anomalies, neutral air winds, photoelectrons, etc 01 p0073 A70-10585

Magnetic bay microstructures occurrences at low latitude not restricted to day or night hemisphere 01 p0076 A70-10668

Rocket sounding data on ionospheric currents at mid and low latitudes noting absence in D and above E region 01 p0082 A70-11529

Solar eclipse effects in equatorial F region electron density, noting data analysis method for reexamining existing measurements 02 p0290 A70-12157

Corrosion resistance of Ti-based alloys in humid subtropical climate, discussing sea and rain water effects 03 p0510 A70-13281

Jupiter observations /1966-1967/, discussing variations in size and position of polar caps and tropical belts 03 p0574 A70-13887

Uniform stratified layers in equatorial E region determined from Centaur rocket capacitance probe electron density observations, suggesting internal atmospheric gravity waves mechanism 03 p0478 A70-14222

Book on methods of geodetic astronomy for intertropical zone covering azimuth, latitude and time determination, spherical geometry and geographical coordinate reduction 04 p0677 A70-14750

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required 04 p0682 A70-15735

Equatorial jet stream excitation of longitudinal waves, analyzing plasma beam instability and spectrum of short wave inhomogeneities by quasi-hydrodynamic equations 05 p0842 A70-16759

Atmospheric circulation in tropics using weather satellite data 06 p1095 A70-17220

Transequatorial multisite VLF records establishing solar zenith angle for midpoint of sunrise ionospheric height discontinuity, recomputing magnetic latitude dependent parameters 06 p1054 A70-17590

Solar particles penetration to lower ionospheric heights at low latitudes indicated from proton flux measurements by Explorer 33 satellite and Calcutta station 07 p1366 A70-18849

Simultaneous Thomson scatter measurements for middle and low latitudes, comparing electron density and temperature and exospheric and global temperature distributions 10 p1872 A70-23821

Intertropical convergence zone /ITCZ/ movements, analyzing data obtained by ship and ESSA satellite cloud photography 10 p1912 A70-23939

K band SLR /side-looking radar/ imagery mapping tropical lowland vegetation compared to photographic coverage 10 p1879 A70-24747

Tropical and midlatitude stratospheric dust by twilight photometry, considering possible causes of anomalous turbidity levels 11 p2046 A70-26388

Low latitude scintillations from satellite transmission scintillations correlation with solar activity spread F, electron content and ionospheric irregularities 13 p2397 A70-29189

Altitude dependence of low latitude cosmic ray diurnal variations from cosmic ray neutron data 13 p2479 A70-29792

VLF auroral and low latitude emissions along N-S chain of stations, discussing daytime and nighttime observations 13 p2371 A70-29925

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required 14 p2575 A70-30819

Radiation fields structural characteristics of fronts, intertropical convergence zones and cyclone formations from radiation charts based on meteorological satellite observations 15 p2770 A70-32068

Equatorial atmospheric density during geomagnetic storm and quiet days by satellite observation 15 p2811 A70-32284

Humidity resistance test method involving flight simulation for airborne equipment in tropical environment 17 p3058 A70-35159

Statistical properties of subtropical jet stream maxima over U.S. from Nimbus II IR radiometry 17 p3133 A70-35931

Tropical UV nightglow, considering oxygen ion-ion neutralization reaction as primary source 18 p3244 A70-36015

Steady state nonlinear dynamics of low latitude atmospheric global boundary layer, indicating inverse relation between air flow vertical velocity and distance from equator 19 p3460 A70-37417

Temperate equatorial and auroral zones sporadic E observations and formation theories survey for prediction 19 p3416 A70-38441

Tropical UV nightglow measurement by Ogo-4 spectrometer, considering ionospheric recombination excitation mechanism 20 p3620 A70-39338

Diurnal variations and spatial distribution of total electron content in equatorial ionosphere 20 p3623 A70-40477

Equatorial F layer irregularity extent from propagation path observations to synchronous satellites 20 p3624 A70-40485

Low latitude boundary of ionospheric absorption during winter anomaly showing enhancement dependence on solar zenith angle 21 p3815 A70-40944

Lunar tidal effects on horizontal magnetic field compared at equatorial and midlatitude stations 22 p4021 A70-43279

Solar high energy particles penetration into ionospheric heights at equator, analyzing optical flare and solar proton data from ATS-1 and Explorer 34 23 p4235 A70-43816

F region night airglow in equatorial and midlatitudes, discussing red and blue emission origins 23 p4185 A70-43839

Air current in upper atmosphere meteor zone above equator, noting diurnal and semidiurnal harmonics in wind velocity components 23 p4188 A70-44049

TROPICAL STORMS NT HURRICANES

Numerical forecasting scheme for hurricane and typhoon trajectories applied to 1967 Atlantic storm data 03 p0520 A70-13162

Incipient tropical storm location and synoptic weather pattern analysis from environmental satellite system data utilization 07 p1329 A70-19196

Tropical storms and hurricanes critical winds forecasting accuracy by NASA Manned Spacecraft Center 14 p2606 A70-30558

Tropical cyclone development model for axisymmetric vortex and quasi-balanced conditions, considering vertical heat distribution, rate of intensification and energy budget 23 p4213 A70-43896

TROPICS

U TROPICAL REGIONS

TROPISM

NT AEOLOTROPISM

NT GYROTROPISM

TROPOPAUSE

Tropopause role in stratospheric-tropospheric exchange processes for radioactive debris transport 03 p0476 A70-13908

CO vertical distribution near tropopause from photochemical atmospheric model with CO recombination with OH for stratospheric sink 07 p1265 A70-19282

Temperature and gust velocity turbulence at tropopause level over hurricane Beulah by instrumented U-2 aircraft 24 p4371 A70-45422

TROPOSPHERE

Periodic cellular convection in troposphere with allowance for anisotropic turbulent mixing, showing cyclone association and intervals 01 p0135 A70-10206

Clear air layer type radar echoes intensities compared with refractive index variations in troposphere 01 p0043 A70-10331

Hydrodynamic explanation of upper atmosphere perturbation effects on tropospheric circulation, discussing experiments for solar activity effects on atmospheric dynamics 01 p0073 A70-10582

Tropospheric parameters determination using combinations of measurement and transhorizon radio signals propagation techniques 01 p0044 A70-11086

Vertical ion concentration profile in troposphere and stratosphere from ozone distribution satellite measurements using aeronomical reactions 02 p0291 A70-12389

Troposphere microwave transmission factor determined from dispersion and attenuation caused by water vapor isolated molecular resonance 02 p0261 A70-12593

Stratospheric air intrusion into troposphere calculated for speed and frequency of occurrence, considering mass and energy transfer 02 p0329 A70-12690

Troposphere effects on low incident Explorer 22 satellite signal amplitude, noting role of diffraction 03 p0449 A70-13611

Tropospheric fine structure influence on radio wave propagation, including atmospheric gases and precipitation effects and radar, navigation and TV applications 03 p0449 A70-13612

Tropospheric circulation transformation from meridional to zonal forms due to macrostructure activity of solar wind, considering magnetosphere perturbations 03 p0559 A70-13757

Tropospheric periodic responses to chromospheric flares, analyzing stations atmospheric pressure power spectra 04 p0742 A70-15524

Omega equation interpretation showing vertical motion related to advection of vorticity in upper troposphere and to warm advection in lower troposphere 05 p0838 A70-16154

Radiometeorology research emphasizing interaction between troposphere and VHF waves to improve space and terrestrial radio communication 07 p1234 A70-19216

Radio signal reception beyond normal horizon by partial reflection from elevated layer in troposphere calculated by computer 07 p1234 A70-19218

Tropospheric and stratospheric turbulent horizontal heat and momentum transfer spectral density profiles calculations from radio launchings data 07 p1269 A70-19646

Prognostic maps of geopotential and wind in middle troposphere derived from hydrodynamic equations 07 p1330 A70-20307

Seasonal variation of vertical profiles of atmospheric radioactivity concentration between stratosphere and troposphere due to meridional zonal wind distribution caused by eddy diffusion 08 p1539 A70-21923

Troposphere-stratosphere kinetic energy transfer during 1967-1968 midwinter warming, comparing calculation by pressure interaction term with direct calculation of vertical velocity fields 08 p1540 A70-21969

Tropospheric elevated layers fine structure characteristics by balloon-borne spaced cavity refractometer 09 p1714 A70-22353

Dew-point temperature of lower troposphere by diffusion equation, noting use for fog and strati forecasting 09 p1717 A70-22655

Classical model regarding general tropospheric circulation, exploring momentum, heat and moisture exchange 09 p1718 A70-23050

Tropospheric electrical path length estimated by microwave radiometry using atmospheric models 09 p1640 A70-23806

Downward ozone transport from troposphere to atmospheric boundary layer by turbulent diffusion calculated by model, estimating annihilation rate 10 p1875 A70-24486

Maximum wind velocity regions in tropospheric jet streams under synoptic conditions concerning troughs, ridge sections and cyclonic-anticyclonic curvatures 11 p2075 A70-25919

Digital computer simulation of Bake concept as related to tropospheric CW signal scatter measurement 11 p2009 A70-26240

Tropospheric negative small ions formation reaction scheme, considering hydration degree 11 p2046 A70-26390

Vertical and intensity distributions of wind velocity focuses in tropospheric jet streams 13 p2444 A70-28590

Balloon-borne measurement of troposphere refractive index vertical distribution using spaced-cavity refractometer 13 p2394 A70-28789

Vertical tropospheric turbidity distribution determination from intensity measurements of inclined searchlight beams 13 p2445 A70-29471

Monograph on troposphere pressure, temperature and humidity and satellite TV photographs interpretation 13 p2446 A70-29786

Atmospheric dust natural radioactivity effect on tropospheric Pb 210 mean residence time determination for Pb210 and Ra226 fallout in rain near Moscow 14 p2630 A70-30131

Troposphere-stratosphere kinetic energy transfer /1964-1968/, annual variations and vertical flux correlation to circulation pattern 15 p2722 A70-31441

Field amplitude distribution parameter in long distance tropospheric communications based on fading depth 15 p2696 A70-31512

Troposphere and lower stratosphere trace element concentration measurements, establishing origin, history and movement of various air masses 15 p2728 A70-31996

Upper troposphere pressure variations through 20 km separation layer, noting interdiurnal temperature changes 15 p2772 A70-32458

Tropospheric turbidity detection and measurements by lidar, considering performance limitations and thickness resolution vs range curve 16 p2862 A70-33015

Decimeter waves propagation along overland path, considering tropospheric radio relay systems development 16 p2863 A70-33238

Tropospheric inhomogeneities properties and wind conditions in relation to lunar limb image deformations 16 p2979 A70-34178

Satellite-borne instruments for thermal sounding of troposphere, noting information limitation due to atmospheric effects 17 p1312 A70-35338

Long range tropospheric radio wave propagation, calculating signal impulse function and time lag between diffraction and reflection 17 p3048 A70-35678

Long wave radiation fluxes calculation in troposphere based on principal radiant heat transfer components separation 18 p3285 A70-36632

Soviet papers on relations between earth troposphere phenomena and solar activity covering geomagnetic and stratosphere perturbations, warmings and circulation, solar cycles, etc 20 p3618 A70-39181

Synoptic processes in Arctic tropospheric and lower stratospheric warming correlated with atmospheric circulation transformations 20 p3619 A70-39186

Synoptic processes in troposphere and stratosphere with large air temperature anomalies during early summer in U.S.S.R. 20 p3663 A70-39272

Troposphere and lower stratosphere circulation during natural synoptic autumn seasons in Northern Hemisphere, noting temperature role 20 p3663 A70-39273

Midtropospheric frontogenesis, using three hourly rawinsonde data for isentropic trajectories to describe velocity field in space and time 20 p3664 A70-39374

Aeolus A satellite for position fixing and automatic meteorological signal transmission in link with balloons for tropospheric observation 22 p4068 A70-42665

Two dimensional stratified flow over extended obstacles with source disturbances, indicating topographical effect on vertical wind shear in troposphere 23 p4214 A70-44031

Multiplicative noise reduction during transmission of analog signals over tropospheric microwave relay links 23 p4162 A70-44090

Ionospheric electron content measurement from Faraday effect of troposphere on beacon satellite Explorer 22 radio signals 23 p4163 A70-44231

Statistical interpolation for numerical analysis of middle troposphere AT potential based on geopotential and wind observations 24 p4371 A70-45135

VHF and UHF radio field strength changes due to tropospheric reflecting layers disintegration during anticyclonic weather, using ray tracing technique 24 p4315 A70-46153

TROPOSPHERIC RADIATION

Short wave radiation model of single layer stratus and stratocumulus cloud based on actinometric soundings of lower troposphere 08 p1537 A70-21104

Vertical short wave albedo profiles in lower troposphere under cloudiness and clear sky using actinometric sounding 08 p1537 A70-21105

TROPOSPHERIC SCATTERING

Doppler spectrum and radio troposcatter beam swinging in thin homogeneous turbulent scatter layer as function of height, crosswind speed and refractivity 02 p0326 A70-12288

Specular reflections influence on bistatic tropospheric radio scatter from turbulent perturbations in refractivity 02 p0326 A70-12289

Crosspath wind motion measurement by dual arm noncoherent bistatic radio troposcatter link 02 p0326 A70-12290

Tropospheric scattering ability investigation with radar transmitter emitting vertical pulses, considering implications for scatter propagation from backscattering detection 03 p0453 A70-14298

Optimal design of tropospheric scatter radio link between two localities, investigating power, antenna, diversity, frequency deviation and equipment 05 p0814 A70-16361

Microwave propagation along earth-air path, studying tropospheric layer role 08 p1461 A70-20968

Tropospheric refractive index homogeneity from beam-swinging experiments, noting relationship to meteorological parameters and height 09 p1715 A70-22363

High resolution FM-CW radar sounder for tropospheric refractive index studies, describing equipment design and performance and clear air scatter observations 09 p1716 A70-22368

Acoustic energy backscattered from vertically directed beam of sound by lower troposphere density structure inhomogeneities 12 p2262 A70-26953

Troposphere effects on microwave and optical signals, correlating refractive index and dispersion variabilities 16 p2862 A70-33020

TROPOSPHERIC WAVES

F 2 region acoustic waves over Kansas and Nebraska attributed to local storms in troposphere 02 p0290 A70-12158

Wave disturbances in tropical lower troposphere, discussing cross spectrum analysis of wind, temperature, relative humidity and surface pressure 07 p1275 A70-20304

Linear nonstationary quasi-geostrophic model with external and internal heating and forcing for dynamics of ultralong waves in troposphere and lower stratosphere 09 p1713 A70-22304

- Field strength correlation with micropressure variations caused by internal gravity waves propagating in lower troposphere 10 p1883 A70-25252
- Earth profile influence on two dimensional non-linear lee waves in troposphere, discussing Helmholtz perturbation equation and stream function field 11 p2075 A70-25391
- Lee wave flow disturbances due to mountains by midtroposphere balloon and aircraft observation, noting flow features nonstationarity 12 p2262 A70-26883
- Mesoscale waves in jet stream flow within Coriolis force over rotating earth by amplitude functions and phase velocities asymptotic series representation 12 p2265 A70-28334
- TROUBLESHOOTING**

- X ray topography of postannealing substructure of neutron irradiated W and Mo single crystals, indicating increase in disorientation 01 p0115 A70-10065
- Temperature effect on work function minimum of cesiated W surfaces 01 p0154 A70-10108
- Tungsten metal oxidation retardation by W-F bonds 02 p0249 A70-11651
- Tensile strength of flat specimens of Ni reinforced by W wire gauze 02 p0315 A70-11661
- Thermionic emission characteristics of W and Mo subjected to focused CW carbon dioxide laser radiation, discussing direct energy conversion 02 p0312 A70-12068
- Epitaxial growth of Cu vapor deposited on W single crystal /110/ surface using low energy diffraction, Auger electron and work function techniques 03 p0538 A70-13100
- Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum 03 p0508 A70-13245
- Energy accommodation coefficients for He3-W and He4-W, comparing results with classical gas-solid interaction theory 04 p0721 A70-14388
- Ceramic fibers formation by particles mechanical deformation by extrusion in W matrix, describing grain structure of various extruded metal oxides 04 p0699 A70-15643
- Work function measurement for adsorption of diatomic I, Br and Cl on W crystal using electron beam retarding potential method 05 p0891 A70-15973
- Electron work function variation of W in Ba-Cs- Sr vapor combinations determined using thermionic diode 05 p0891 A70-15974
- Quasi-equilibrium treatment of heterogeneous reactions applied to flash desorption data for oxygen reaction with tungsten surface, discussing species desorption dependence on adsorption temperature 06 p1004 A70-17331
- Nitrous oxide molecular beam reflection and dissociation on tungsten surface at high temperatures from angular distribution measurements 06 p1004 A70-17493
- High energy Ar atomic beams scattering from single crystal face of W measured for distribution pattern 06 p1112 A70-18270
- Tungsten and tungsten base alloy weldability, discussing powder metallurgy, postweld annealing, high temperature tensile strength, etc 06 p1078 A70-18514
- W oxidation kinetics as function of ribbon temperature and absorption time using flash technique with sweep pulse mass spectrometer 07 p1306 A70-19275
- High temperature creep rupture tests of arc cast and powder metallurgy wrought unalloyed W sheets 07 p1313 A70-19884
- Neutron irradiation damage in W, observing consistency of activation energy for self diffusion with vacancy mechanism 07 p1314 A70-20012
- Chromium films obtained on tungsten by sputtering, studying structure and work function at various temperatures 08 p1516 A70-21123

TUNGSTEN ALLOYS

Anisotropic angular distribution of electrons and ions emitted from W targets irradiated by ruby laser pulses

08 p1512 A70-21211

Microstrain characteristics of continuously reinforced W-Cu composites as function of volume fraction of fibers and prestrain, discussing dislocation friction stress

08 p1524 A70-21917

Microstructure of wrought arc-cast polycrystalline W sheet after high temperature creep deformation at various stress levels

08 p1525 A70-21962

Tungsten emissivity and radiance properties obtained at high surface temperatures

09 p1725 A70-22068

Thermochemical predictions for high temperature oxidation of Mo and W, discussing oxide films or scales, reactant gases flow rate, etc

09 p1630 A70-22943

Tungsten-rhenium thermocouple for high temperature measurement of samples under unsteady heating processes, analyzing instrument error sources

09 p1789 A70-23108

Exploding tungsten wires in air and vacuum, describing visible and X-ray spectrum characteristics

10 p1915 A70-23994

Oxygen sticking coefficients and desorption kinetics on tungsten crystal by step desorption/ reflection technique, postulating formation and decomposition of surface oxide phases

10 p1832 A70-25147

Helium ion bombardment activated tungsten crystal surface migration using field emission microscopy

11 p2097 A70-25378

Porosity and intergranular crack formation in tungsten fusion welds using electron fractography

11 p2059 A70-25666

Field ionization from hydrogen layers adsorbed at 4.2 K on W emitters in sealed-off tubes

12 p2274 A70-26858

Oxygen adsorption on W(110) surface determined for coverage as function of exposure by Auger electron spectroscopy

12 p2180 A70-27253

Tungsten crystalline structure defects caused by alpha particles bombardment using helium ion projector at 78 K

12 p2255 A70-27544

Tungsten strip lamps spectral radiance calibration, discussing accuracy requirements for radiation constants, wavelength and black body temperature

13 p2410 A70-29655

Metal fiber multiple necking effect on uniaxial metal matrix composites ductility and plastic deformation behavior for brass-W model system

15 p2761 A70-32378

Peak emission currents from tungsten under ruby laser focused radiation, describing integral emission by heat conduction theory and Richardson equation

15 p2754 A70-32875

Heat transfer in tungsten-tungsten and Armco Iron-Armco Iron specimens, confirming Bowden-Tabor model of elastoplastic events during cyclic engagement of surfaces

[ALAA PAPER 70-853]

16 p3000 A70-33920

Tungsten filled urethane in aircraft areas as balancing agent

17 p3126 A70-35418

Tungsten exploding wires electron emission during vacuum melting

17 p3137 A70-35726

Electron impact desorption kinetics of ions and neutrals from polycrystalline W surfaces, using cylindrical magnetic spectrometer

18 p3225 A70-36321

Tungsten fiber reinforced copper based composite material, investigating moulding and sintering conditions effect on mechanical properties

19 p3450 A70-37454

Critique of paper on electron diffraction study of Ce adsorption on W surface, discussing electron work function changes and data discrepancies

19 p3473 A70-37548

Cesium films structure and work function on W (011) face, discussing order-disorder transition

19 p3487 A70-37817

Nitrogen diffusion coefficient in Mo and W using degassing method

19 p3452 A70-37828

Tensile strength of flat specimens of Ni reinforced by W wire gauze

19 p3452 A70-38435

Mechanical properties, optimum deformation and rupture of W wire reinforced Ni and Ti metal composites obtained by hot rolling in vacuum

19 p3453 A70-38463

Tungsten wire reinforced copper matrix composite, determining fibers pull-out contribution to fracture work

20 p3651 A70-40047

Dislocation network recovery kinetics of cold worked undoped powder metallurgical W wires by

electrical resistivity measurements, determining activation energy

21 p3839 A70-40797

Hydrogen adsorption and coadsorption with oxygen on W single crystal surface measured by mass spectroscopy and low energy electron diffraction method

21 p3862 A70-41887

Tungsten adatoms migration and binding energies on W surfaces, taking relaxation effects into account

21 p3862 A70-41888

Direct electrical heating for high temperature thermal conductivity measurements of pure W, giving results for graphite

21 p3850 A70-42057

Orientation and applied stress effects on pure Nb-6W bcc single crystals yield stress, discussing thermal activation strengthening and crystal dislocations

22 p4052 A70-42318

Intergranular brittleness in powder metallurgy W by Auger Electron Emission Spectroscopy for fracture surfaces chemical analysis

22 p4053 A70-42733

Gas porosity in fusion welds of chemical vapor deposited W, noting formation of microfissures due to pore linkup

22 p4046 A70-43149

Room temperature oxygen adsorption on tungsten surfaces

22 p4087 A70-43235

Thin metal matrix composite rods elastic properties, examining Al-W system by Young and shear modulus measurements

22 p4061 A70-43687

Surface potential and electron work function of single crystal plane W(110) under zero-field and strong-field conditions

23 p4230 A70-44797

Corona discharges from fine W points in liquid He initiated by field ionization or emission, noting anomalous characteristics

23 p4221 A70-44889

Al and W specific heat and Al heat of fusion by quasi-adiabatic calorimetry, estimating anharmonic lattice vibrations role via atomic thermodynamic analysis

23 p4208 A70-44931

Impurities and heat treatment effects on W internal friction at high temperatures, considering relaxation processes, recrystallization and microstructure

24 p4357 A70-45227

Gas bubbles effect on recovery and recrystallization in W sheet deposited from tungsten fluoride vapor

24 p4358 A70-45243

TUNGSTEN ALLOYS

Tungsten effect on phase transformations and carbide reactions to attain equilibrium at 850 C in Ni-base superalloys

01 p0118 A70-10727

Internal nitriding kinetics of W-base alloys containing Hf, investigating morphology of resulting Hf nitride dispersion

02 p0317 A70-12319

Mo separation from W during chemical processing of W in binary Mo-W alloys, using organic reagents for precipitation and extraction

03 p0504 A70-12982

Refractory metals in rocket propulsion devices, applying tungsten in uncooled rocket nozzles and tungsten and rhenium to electrothermal propulsion

03 p0512 A70-13617

Tungsten and tungsten base alloy weldability, discussing powder metallurgy, postweld annealing, high temperature tensile strength, etc

06 p1078 A70-18514

Precision tungsten alloy tubing manufacture and properties, discussing direct conversion of metal powder to finished tubing with high temperature structural stability

07 p1292 A70-18928

Thermal diffusivity measurements for Ta-W, Ta-W-Hf, Hf-Ta-Mo alloys using pulse technique

07 p1305 A70-18960

Cobalt effects on Ni-W alloys mechanical and metallurgical properties including thermal stability, fabrication response, weldability and impact resistance

07 p1306 A70-19070

Specific radiant heat flow and spectral blackness degree of tungsten with different surface finish

07 p1309 A70-19662

Carbide layer formation on Ta and Ta-W alloys, discussing Ta-C phase diagram and phases

07 p1320 A70-19892

Tungsten alloy fiber reinforced Ni-base superalloy composites evaluated for high temperature turbojet engine applications, considering stress-rupture strength, oxidation and impact resistance

08 p1523 A70-21907

Polycrystalline W-Re alloy creep tests in tension, investigating dislocation substructure formation as function of stress, temperature and strain

12 p2255 A70-27606

Single crystal W and W alloys dislocation structures as function of strain, temperature and dilute alloys addition, using electron microscopy

15 p2756 A70-31563

W-3 percent Re-W-25 percent Re thermocouple reliability and stability, describing emf vs temperature table in 0-2400 C range

18 p3257 A70-36200

Electronegative adsorbate effect on work function of Ba-W system

18 p3298 A70-37111

W-Mo-Nb-Ta system structure and properties at room and high temperature by microstructural analysis and hardness measurements, discussing Mo addition effects

19 p3453 A70-38713

W-Mo-Nb-Ta system with constant 30 percent W, discussing specific weight and hardness

19 p3453 A70-38714

TUNGSTEN CARBIDES

WC-Co alloys noting polishing and grinding effects on residual stress and crack resistance

03 p0508 A70-13145

Plastic properties of tungsten carbide single crystals at room temperature, determining slip system crystallographic orientations

08 p1520 A70-21557

Residual stresses effect on strength and hardness of tungsten carbide-cobalt alloy by application of small plastic deformations, observing crack formation anisotropy

10 p1904 A70-25168

Fuel cell electrolytes, describing porous tungsten carbide as catalyst

12 p2164 A70-27068

WC as densification aid for NbC-C composites, examining fabrication temperature, mechanical properties, solid solution composition, etc

15 p2757 A70-31797

Fatigue properties of solution treated and age hardened hot rolled Ti alloy bars, discussing sprayed tungsten carbide coatings effects on bearing properties

17 p3121 A70-34432

Carburizing spherical powders of Nb, Mo and W to obtain carbides, noting agreement between theoretical and experimental data

17 p3125 A70-35410

Carburization and grain size of tungsten carbide powder from W powder as function of temperature, using optical and electron micrographs

21 p3839 A70-41412

WC radiation damage by resonant absorption following Coulomb excitation observed from gamma ray spectra

23 p4231 A70-44888

TUNGSTEN COMPOUNDS

NT CALCIUM TUNGSTATES

NT TUNGSTEN CARBIDES

NT TUNGSTEN OXIDES

NT ZINC TUNGSTATES

TUNGSTEN INERT GAS WELDING

U GAS TUNGSTEN ARC WELDING

TUNGSTEN OXIDES

Photographs of ferroelectric tungsten oxide crystal domains obtained with photoemission microscope, noting memory effect after electron beam sweeping

11 p2099 A70-26463

TUNGSK METEORITE

Tungusk meteorite as comet nucleus, discussing comet structure, composition and behavior analysis

08 p1572 A70-20943

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage

08 p1572 A70-20944

Night time upper atmosphere light phenomena and Tungusk meteorite observed on 30 June 1908

10 p1876 A70-24499

Tungusk meteorite as comet nucleus, discussing comet structure, composition and behavior analysis

15 p2806 A70-32755

Tungusk meteorite atmospheric shock waves obtained from simulation experiments based on forest damage

15 p2806 A70-32756

TUNING

Tracking method for simultaneously tuned transmitter and receiver with different maximum-to-minimum capacitance ratios in ganged variable capacitors

01 p0051 A70-10888

Angular dependence of one dimensional first and second index matching for optical parametric mixing of laser and SRS Stokes beams for tunable laser source

03 p0498 A70-13157

Tunable optical parametric oscillators including Gaussian beams amplification, threshold, tuning techniques, spectral output, etc

05 p0822 A70-16651

Flash lamp pumped tunable organic dye laser, using capacitor bank for reliable operation

05 p0861 A70-16845

Tuning range slope steepness as criterion for evaluating microwave resonators tuning range 05 p0824 A70-16893

Multiple maser-magnet units packaging in single cryostat for maximum tunability 08 p1513 A70-21599

Ferrimagnetically tunable transistor oscillator in common collector configuration 09 p1645 A70-22603

Static error of varactor-controlled tuning-locked discriminator using computer 09 p1638 A70-23323

KDP crystal single cut for laser beam frequency conversion and tuning 12 p2245 A70-27302

Electronic tuning range of solid state microwave oscillators, deriving equations in terms of tuning device Q factor and available power output 13 p2376 A70-28802

Tunable and fixed frequency high power magnetrons parallel operation to achieve stable output 13 p2379 A70-29667

Reflex klystrons operation, efficiency and electronic tuning range, discussing resonators, tuners, voltage and retarding field oscillators, etc 14 p2548 A70-30428

Coaxial, inside-out and rising-sun magnetrons for millimeter waves generation under pulsed conditions, discussing tunability, frequency stability and weight 14 p2555 A70-30429

Mode controlled Q switched tuneable ruby laser, obtaining frequency scanning by temperature and pressure control 15 p2752 A70-32048

Organic dye lasers output bandwidth and tunability extension by acidification of solution 19 p3445 A70-37675

Mutual synchronization of oscillators at multiple frequencies, analyzing effect of tuning on frequency and phase 20 p3597 A70-39252

Smooth periodic wavelength retuning in organic dye laser, using neodymium glass laser with YAG for pumping 20 p3642 A70-39742

Accurate tuning methods for laser mode locking device, using diffracted light measurement and photodiode with LF spectrum analyzer 21 p3838 A70-42047

Antennas with controlled current distribution in medium wavelength range for optimal radiation pattern over desired area, discussing maximum gain tuning for daytime and nighttime operation 22 p3995 A70-42521

Two stage gas turbine engine optimal tuning for RPM, thrust, fuel rate and gas temperature, describing automated bench tests 22 p4092 A70-43361

Automatic resonance tuning of transmitting and receiving antennas by electronic control for use in mobile communications 23 p4172 A70-44385

TUNING FORK GYROSCOPES
Increasing sensitivity of tuning fork gyroscope by parametric signal amplification 07 p1289 A70-20297

TUNNEL CATHODES
Microscopic behavior and excitational processes found similar in argon ion lasers with hollow cathode or conventional heated oxide cathode discharge 11 p2063 A70-26370

TUNNEL DIODES
Wideband parametric and tunnel diode amplifiers synthesizing method for obtaining maximum flat amplitude frequency response 03 p0457 A70-13727

Tunnel diode studied for oscillations initiation resulting in hysteresis involving supply voltage and load conductance variations 03 p0459 A70-14284

GaAs tunnel diodes excess current nature and voltage dependence, considering thermal current measurements, depletion layer processes, electron barrier height, etc 04 p0656 A70-14713

Parasitic elements influence on stability of linear equivalent circuits with tunnel diodes 06 p1022 A70-17674

Analytical expressions for amplitude and frequency modulation characteristics of bias modulated tunnel diode oscillator on steady state mode 06 p1022 A70-17836

Equivalent scheme for tunnel diode oscillator operating mode and parameters effect on LF modulating signal phase correlations 07 p1241 A70-19287

Pulse duration approximation in tunnel diode monostable multivibrator during low duty cycle operation 08 p1472 A70-20867

Tunnel diode parametric phase locked oscillators as memory elements, considering optimum subharmonic pumping frequencies determination 08 p1477 A70-21642

Spectral criteria for approximating tunnel diode nonlinear characteristics obtained by minimizing deviations of moduli of harmonic amplitudes 09 p1649 A70-23340

Traveling wave amplifier on section of inhomogeneous transmission line with tunnel diodes 11 p2020 A70-26808

Miniature electromechanical gallium antimonide tunnel diode transducer theory fabrication and performance 12 p2236 A70-28055

High frequency tunnel diode quartz crystal oscillator circuits with inductive element compensating circuit capacitor 13 p2376 A70-28874

Self excited cavity oscillators with tunnel and parametric diodes and nonequilibrium medium, noting single and multimodes, energy capabilities and frequency interactions 13 p2366 A70-29405

Microwave backward tunnel diodes in InAs, predicting reliability and sensitivity improvements over other materials 13 p2379 A70-29593

Millimeter waves generation by tunnel, Gunn and avalanche diodes, tabulating frequency, efficiency and power data 14 p2548 A70-30435

Lossless pulse-shaping active line for unipolar transmission, considering construction by loading two terminal Esaki diode to coaxial cable 15 p2697 A70-31827

Integrated tunnel diode amplifiers design using hybrid technique for communications satellites, noting stability and noise performance 15 p2710 A70-32469

Terminal negative resistance of X band Gunn diodes, discussing frequency conditions for modulation and parametric amplification 16 p2877 A70-33417

Wideband microwave IC tunnel diode amplifier /TDA/ for artificial satellites, discussing noise, size and weight reduction 17 p3053 A70-35277

Pulse shaper circuits with tunnel diodes and transistors, describing recovery time decrease 20 p3596 A70-38972

Semiconductor diodes, discussing characteristics and applications of Schottky barrier, varactor, tunnel, Gunn and field effect diodes, etc 20 p3600 A70-40500

Tunnel diode microwave oscillator design, discussing fixed frequency or varactor tuned operation, power instabilities and load variations 22 p3997 A70-43129

Tunnel diode amplifier design, using gain-bandwidth nomograph 22 p3999 A70-43487

Tunneling electron and local mode phonon interaction in MIS n-type semiconductors 23 p4231 A70-44916

High cutoff negative resistance silicon carbide diodes, noting temperature independent current-voltage curve 23 p4176 A70-45067

Traveling wave amplifier on section of inhomogeneous transmission line with tunnel diodes 24 p4317 A70-45180

TUNNEL RESISTORS

U ELECTRON TUNNELING

U RESISTORS

TUNNELS

Forward air cushion performance of tracked hovercraft entering tunnel, determining arrival of reflected expansion wave at vehicle front 02 p0226 A70-12313

Test facilities and procedures for obtaining aerodynamic data required for studying vehicle-in-tube transportation systems [AIAA PAPER 70-225] 06 p1030 A70-18221

Ram wing tube ground transportation vehicle, analyzing optimum lift-drag ratio and induced power requirements 11 p1975 A70-25966

TUPOLEV AIRCRAFT

NT TU-134 AIRCRAFT

TUPOLEV TU-134 AIRCRAFT

U TU-134 AIRCRAFT

TURBIDITY

Illuminating conditions in deep layers of turbid plane-parallel medium for highly elongated scattering characteristic 04 p0745 A70-14497

Atmospheric turbidity measurements over U.S. using Volz sunphotometer 06 p1098 A70-18245

Tropical and midlatitude stratospheric dust by twilight photometry, considering possible causes of anomalous turbidity levels 11 p2046 A70-26388

Vertical tropospheric turbidity distribution determination from intensity measurements of inclined scintillation beams 13 p2445 A70-29471

Circumsolar sky radiation effect on pyrheliometric measurements, considering atmospheric scattering and turbidity 13 p2400 A70-29660

Tropospheric turbidity detection and measurements by lidar, considering performance limitations and thickness resolution vs range curve 16 p2862 A70-33015

Unsteady light field spatial moments in turbid medium boundary layer with intense anisotropic scattering during illumination by narrow beam 18 p3285 A70-36631

Solar constant measurements by high altitude balloon sounding, noting anomalous turbidity in upper atmospheric layers due to nuclear explosions and volcanic eruptions 20 p3703 A70-39375

Anomalous seasonal variation in worldwide ozone above 40 km from Umkehr measurement, considering turbidity effects 23 p4187 A70-44037

TURBINE BLADES

Loads effects on refractory alloy fatigue strength and life at high temperatures, describing aircraft turbine blade tests 01 p0115 A70-10069

Axial flow turbine stator and impeller blade twist calculated from gas flow stage area diameter using continuity and vorticity equations 01 p0001 A70-10175

Airfoil cascade blade design by iteration method equating normal velocity distribution about contour with imposed tangential velocity 01 p0001 A70-10263

Heat transfer coefficients in transpiration cooled gas turbine blades, using two dimensional theory covering porous wall and internal cooling passages 01 p0166 A70-11392

Electronic gauging machine for multipoint measurement at preselected points around turbine blade airfoil produced by electrochemical machining 01 p0105 A70-11397

Stress analysis of eyebolts in turbine blades hinged locks based on perforated plate theory with concentrated force, discussing stress distributions 01 p0210 A70-11416

Turbine blades durability and fatigue characteristics, plotting fatigue diagram from statistical tests 01 p0105 A70-11418

Aerodynamic performance of cascade of porous gas turbine blades with cooling air effusion compared with solid noneffusing blades 02 p0355 A70-12311

Monograph on application of semicooled thermosiphon system to gas turbine blade cooling, covering heat transfer and temperature distribution analysis, etc 03 p0551 A70-12992

Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads 03 p0587 A70-13241

Internally air cooled turbine blades and vanes emphasizing coolant aerodynamics, heat transfer and blade life, high temperature in jet engines, etc [RAES PAPER 22] 03 p0551 A70-13545

Embedded sheathed thermocouples temperature measurement of cooled jet engine turbine buckets subjected to high heat flux 03 p0486 A70-13560

Flow characteristics of compressible fluid in compressor or turbine stage, determining radial distribution of downstream Mach number 03 p0410 A70-14271

Two dimensional cascade tests of turbine blade airfoil plotted by Legendre hodograph method, discussing pressure distribution measurements 03 p0410 A70-14272

Tangential jet, tandem, jet flap and vortex generator blade concepts investigated for turbine blade loading efficiency [ASME PAPER 69-WA/GT-5] 04 p0734 A70-14890

Turbine blade designs considered for increasing load capacity covering tandem, jet-blade and base plain blade configurations and test results [ASME PAPER 69-WA/GT-1] 04 p0734 A70-14894

Von Karman transonic similarity law applied to flow through plane turbine blade cascades [DGLR-69-24] 04 p0616 A70-15183

Turbine blade materials resonant vibration resistance criterion dependence on temperature and cyclic and static stresses amplitude 04 p0776 A70-15262

Load distribution in Christmas tree turbine attachments due to centrifugal force on blades, showing strain diagrams 05 p0939 A70-16488

Gas turbine blade material properties change effect on thermal fatigue strength after long term heating 05 p0864 A70-16700

Heat resistant enamel coatings effect on vibration damping of cast steels for turbine blades 05 p0868 A70-17050

Fatigue life tests for heat resistant gas turbine blade alloys under power and thermal loads simulating aircraft flight

05 p0953 A70-17051

Gas turbine blades thermal fatigue strength under simultaneous temperature cycles and static tensile loads, analyzing temperature and stress fields

05 p0953 A70-17053

Test stand design and automatic recording of turbine blade fatigue test data, including statistical evaluation

05 p0953 A70-17054

Stress rupture strength of turbine blades for tree type root joints under prolonged loads at high temperatures, studying disk teeth shearing

05 p0953 A70-17055

Temperature field in internally cooled gas turbine blades determined, using integrator combined with coordinating device

05 p0954 A70-17057

Fatigue strength of T-shaped blade roots of steam turbine regulating stages subjected to combined static tension and cyclic bending

05 p0954 A70-17060

Error resulting from elasticity modulus and linear thermal field coefficient removal from integral in Burger formula for turbine blade thermal stresses

05 p0954 A70-17061

Turbine blades root joints endurance limit concerning tensile stress determination at stress raiser contour for elastoplastic deformation and creep

05 p0954 A70-17062

Thermal fatigue cracks in gas turbine blade models under simultaneous thermal cycling and static tensile loads simulating pulsed regimes

06 p1166 A70-17652

Flow separation angle and loss coefficient in cascades with small aspect ratio blades under secondary vortex pair expansion over channel

06 p1130 A70-17858

Turbine rotor and stator blades twist inaccuracies in assembly due to shroud induced stresses and blade root mountings clearances

07 p1291 A70-18827

Gas turbine engine blades grinding and polishing procedures, considering fatigue life increase and physical properties stabilization

07 p1292 A70-18833

Mechanical and electrochemical polishing effect on turbine blade alloy fatigue strength, discussing surface strain hardening as function of temperature in mechanical polishing

07 p1304 A70-18838

Turbine blade tip clearance effect on aerodynamic characteristics in nonuniform flow

07 p1187 A70-18980

Heat transfer at inlet edge of turbine blade based on wind tunnel study of cylinder in air flow

07 p1362 A70-19061

Centrifugal force induced stressed state in gas turbine blades using photoelastic analysis, emphasizing stress distribution at shroud holes

07 p1403 A70-19118

Soviet book on unsteady attached turbulent flow in turbine lattices, studying blade aeroelastic vibrations onset and attenuation in compressible and incompressible fluids

07 p1189 A70-19602

Flow turbulence effect on heat turbines efficiency using energy losses in blade cascades

08 p1432 A70-21073

Cooled turbine blades temperature field calculated considering variations at turbine inlet, over blade length, material temperature dependence and heat transfer boundary conditions

08 p1597 A70-21185

Turbine blade and vane air cooling need established by advantages of operating aircraft turbines at high turbine entry temperatures

[AGARDOGRAPH-120] 08 p1559 A70-21931

Wear resistance of turbine rotor blade stabilizing elements in form of bolts connecting overlapping leading and trailing edges of adjacent tips

09 p1768 A70-22095

Gas turbine blades design and exploitation processes, discussing long time fatigue strength, static durability and heating effects at elevated temperatures

09 p1772 A70-22469

Thermal fatigue cycle produced by cooled gas turbine blades, using stress-strain tests and thermal simulation

09 p1655 A70-22585

Thermal stresses in gas turbine blade calculated, showing role of initial temperature increase of blade cooling air

09 p1775 A70-22596

Secondary losses in axial turbine cascades without end clearance noting correlation with blade loading

09 p1743 A70-22980

Turbine blade vibration measurement by contactless discrete-phase method, discussing sensor positioning for displacement amplitudes and flutter speeds determination

09 p1681 A70-23199

Thermal stresses determination in turbine blades by making analogy between actual and electrical model, using EGDA integrator

09 p1785 A70-23598

Stepwise averaged parameters of nonuniform three dimensional flow through turbine blade cascade determined from conservation conditions

09 p1606 A70-23611

Heat transfer at inlet edge of turbine blade based on wind tunnel study of cylinder in air flow

10 p1930 A70-25212

Shrouded aircraft engine turbine blades vibration stresses found minimum by setting up paired blades with fixed tension along shroud

10 p1964 A70-25288

Critical load, force characteristics and pressure variation on blades of axial compressor under rotating stall

11 p2133 A70-25795

Device for measuring turbine blades natural frequencies by converting vibrations to electric current at same frequency

11 p2033 A70-26443

Gas turbine blade materials investigated for effect of prolonged heating on mechanical properties and thermal fatigue strength

13 p2434 A70-28994

Diffusion layer microprobe analysis during chromaluminization of Inconel turbine blade

14 p2595 A70-30293

Low temperature tensometry application to stress-strain state of turbine disks

15 p2733 A70-31537

Unidirectional-solidification casting of superalloys of refractory metals in turbine blade production

15 p2757 A70-31811

Periodic flow structure between gas turbine blades, using asymptotic representation

[ONERA-TP-790] 16 p2833 A70-33102

IR optical radiometer for jet engine turbine blade temperature measurement, comparing with junction wire thermocouple

16 p2905 A70-33168

Hydrodynamic internal streamline flow analysis for turboprop inducer blades under cavitating and non-cavitating conditions

[AIAA PAPER 70-629] 16 p2964 A70-33528

Stress and vibration analysis of rocket engine turboprop inducer blades, using finite element method

[AIAA PAPER 70-630] 16 p2964 A70-33529

Two dimensional film cooled turbine blade aerodynamics, investigating massive blowing effect through discrete holes in single blade test facility

[AIAA PAPER 70-713] 16 p2834 A70-33537

Gas-particle mixture cascade flow over turbine blades, considering momentum/heat transfer and particle trajectories

[AIAA PAPER 70-712] 16 p2835 A70-33569

German monograph on stress calculation for rotating elliptical rimmed and notched turbine disks using Weinel integral equations and cascade computer procedure

16 p2993 A70-34079

Turbine blades vibrations based on thick curved shell theory, deriving element from isoparametric solid

17 p3187 A70-34989

Ni alloys with protective coatings for gas turbine blades, testing corrosion resistance in diesel fuel combustion products with intermittent salt water sprays

17 p3125 A70-35394

Fiber-metal matrix composites for gas turbine blades, discussing stress rupture strength, modulus of elasticity, fabrication, etc

[ASME PAPER 70-GT-133] 18 p3302 A70-36827

Internal efficiency of turbine stages with long twist-varying blades

19 p3490 A70-37250

Thermal fatigue cracking of gas turbine blades in fuel combustion product flow, investigating surface composition, microhardness and structure under simulated loads

19 p3490 A70-37338

Supersonic turbine blade rows design, discussing boundary layer interaction around leading edges and flow around trailing edges

19 p3490 A70-38223

Velocity distribution in boundary layer on thin rotating turbine blade of impeller driven at wind tunnel outlet, solving turbulent and laminar flows momentum equations

19 p3352 A70-38224

Structural fatigue strength model tests for turbine blade root connections, using asymmetric load cycle and working temperature

19 p3547 A70-38433

Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads

19 p3548 A70-38459

Turbine blade profiles calculation by hodographs, obtaining compatibility with continuous flow velocity distribution and improved boundary layer stability

19 p3491 A70-38949

Internally cooled turbine blade with longitudinal cooling channels, calculating temperature field by combined analytical and analog method

21 p3868 A70-41772

Temperature distribution measurement inside solid samples by Mossbauer effect, considering application to turbine blades

21 p3830 A70-42165

Transonic turbine cascades exit flow parameters taking into account blade profile

22 p4088 A70-42346

Turbomolecular pumps with uniformly distributed small plane blades, calculating rotor efficiency

22 p3964 A70-42604

Equations solution for turbine blade flexural vibration, considering internal friction

22 p4117 A70-43363

Heat exchange coefficients on side surfaces of constant thickness gas turbine disk, using temperature distribution method and integral transformations

22 p4125 A70-43367

High temperature gas turbine blades cooling by liquid Na-K alloy

[ONERA-TP-872] 22 p4125 A70-43458

Stationary turbine blades heat flux measurements, considering heat exchange coefficients and turbulent boundary layer

[ONERA-TP-871] 22 p4126 A70-43459

Aircraft turbine engines durability estimated from rotor blade minimum tip clearance measurements

22 p4092 A70-43529

Nonsteady temperature and thermal stress distribution in gas turbine blades, using plastic model and photothermoelastic method

22 p4093 A70-43743

Hologram interferometry as noncontact tool for vibration mode measurements of turbine blade groups

23 p4193 A70-43925

Step-amplitude stress cycle program effects on durability of heat resistant alloy for turbine blades under cyclic loading

23 p4204 A70-43934

Fatigue of turbine blades stainless steels and nickel alloys as function of temperature, stress and surface layers

[ICAS PAPER 70-38] 23 p4205 A70-44135

Heat exchange on turbine blade profiles, examining boundary layer flow transition region coordinates

23 p4283 A70-44732

Heat transfer at air cooled gas turbine blade trailing edges at various wall temperatures and Reynolds numbers

23 p4283 A70-44737

High melting point fibrous composites, discussing fiber-matrix systems for high temperature applications

24 p4357 A70-45168

Cascade flow field analysis from given blade geometry, deriving expressions for numerical solution of inverse turbine design problem

24 p4288 A70-45501

Turbine blades aerodynamic forces theoretical and experimental investigation, noting cascade series interaction induced pressure pulsations

24 p4288 A70-45504

Turbine blades deformation by centrifugal and aerodynamic forces, discussing theory for bending stress free blade design

24 p4288 A70-45505

Static and centrifugal filters merits for turbine engine lubrication systems, considering mechanical reliability, efficiency, dirt capacity and maintenance

01 p0164 A70-10686

Turbine engine starting system design requirements, outlining lifetime improvement of hot section parts

01 p0167 A70-11460

Helicopter turbine engine bleed air requirements obtained by compressor extraction for engine designers

01 p0167 A70-11462

Turbine engine checkout techniques, describing oil, sonic-vibration, X ray, gas path and hot section analysis methods

[AIAA PAPER 69-581] 02 p0356 A70-12526

Circumferential contour shape influence on three dimensional flow pattern of fan shaped annular turbine stages

03 p0407 A70-13417

Turbine noise significance in civil aircraft noise problem

[ASME PAPER 69-WA/GT-12] 04 p0734 A70-14884

Development trends, design and gas dynamic characteristics of turbine engines for helicopter

propulsion systems including pressure, turbofan and integral engines

05 p0896 A70-16350
Turbulence effect on heat transfer in flow carrying section of turbine engines, considering flow velocity pulsations frequency characteristics

07 p1362 A70-19067
Supersonic fluid turbomachine components and systems innovations and performance trends [AGARDGRAPH-120]

08 p1434 A70-21927
Axial compressor aerodynamics and efficiency in aircraft turbine engines [ONERA-TP-767]

09 p1604 A70-22656
Turbulence effect on heat transfer in flow carrying section of turbine engines, considering flow velocity pulsations frequency characteristics

10 p1930 A70-25218
Aircraft turbine engines structural materials and design concepts, describing fiber reinforced materials, oxide dispersion hardened alloys and integral and honeycomb structures

11 p2101 A70-25625
Tip clearance contactless measurement in jet engine turbine based on radioactive isotopes properties

11 p2055 A70-26446
Turbine flowmeter dynamic characteristics dependence on individual parameters, deriving equations of motion and time constant

11 p2055 A70-26450
Aircraft turbine engines gaseous emission measurements, discussing instrumentation for continuous pollutant concentration monitoring [SAE PAPER 700249]

12 p2290 A70-27428
Optimum alkali metal vapor humidity for turbine equipment estimated from energy output

14 p2535 A70-31008
Humidity measurement for alkali metal vapor in turbines by electric calorimeter with two heaters

14 p2587 A70-31009
Aircraft turbine engine components vibrational testing by holographic interferometry methods

16 p2903 A70-33134
Digital simulation for turbine engine propulsion system testing [AIAA PAPER 70-633]

16 p2869 A70-33593
Vibration monitoring for turbine engine malfunction detection

17 p3061 A70-35480
Sliding friction effects of nonlinear asymmetric supports on turbine engine rotor-shaft stability [SAE PAPER 700320]

18 p3301 A70-36799
Jet transport aircraft turbine engine performance monitoring by flight data, discussing historical highlights and future prospects [SAE PAPER 700314]

18 p3301 A70-36801
Aircraft turbine engines emission sampling, handling and measurement, evaluating various instruments and techniques [SAE PAPER 700338]

18 p3226 A70-36810
Fire and overheat detection system design for turbine powered vehicles [ASME PAPER 70-GT-125]

18 p3260 A70-36891
Soviet book on vibration and balancing of aircraft engine rotors covering structural deformation and dynamics of turbine engines and compressors

19 p3489 A70-37237
Two stage turbine engine parts adjustment optimization in terms of fuel consumption or thrust control by linear programming techniques

19 p3489 A70-37241
Turbine engine combustion chambers with various frontal devices, investigating burnout mechanism and heat yield in secondary air flow injection zone

19 p3489 A70-37246
Internal efficiency of turbine stages with long twist-varying blades

19 p3490 A70-37250
Condition Monitored Maintenance program for turbine engines eliminating total overhauls at specified time, using NDT

19 p3441 A70-38830
Aircraft turbine engines durability estimated from rotor blade minimum tip clearance measurements

22 p4092 A70-43529
Computerized simulation and hardware for propulsion control of turbine engines [SAE PAPER 700827]

24 p4394 A70-45892
Direct drive turbine engine control components and airframe accessories, noting weight and frontal area reduction [SAE PAPER 700821]

24 p4394 A70-45896
TURBINE EXHAUST NOZZLES

Air inlet and exhaust nozzle form and location effect in afterburning turbofan engines, discussing stalling, afterburner blowouts and thrust losses prevention

05 p0895 A70-15807
Nozzle geometry effects on turbine gas ejector characteristics

21 p3867 A70-41765
Radial flow microturbines deflection and wave losses in circular nozzle ring oblique exit section

22 p3965 A70-43359

TURBINE INSTRUMENTS

Turbine flowmeter theoretical model [ASME PAPER 69-WA/FM-2]

04 p0689 A70-14841
Turbine flowmeter with hydraulic bearings operation based on photosensitive recording of light beam interruptions, discussing test results

06 p1065 A70-17911
Turbine flowmeter in-place calibration for measuring cryogenic propellant flow rates in rocket engine testing

06 p1071 A70-18448
Turbine flow meters dynamic calibration employing sinusoidally perturbed orifice flow

12 p2236 A70-28033
TURBINE PUMPS

Liquid rocket technology for chemical engineers, discussing insulating tanks, flexible lines, turbopumps and combustion chamber

05 p0896 A70-16168
Twin spool hydrogen turbopump performance at zero net positive suction pressure /NPSP/ saturated fluid in propellant tank, including steady state and simulated transient engine tests [AIAA PAPER 69-550]

07 p1295 A70-19709
Turbine pump systems operation in terms of liquid rocket engine combustion stability, noting altitude effects on pressure pulsations

08 p1559 A70-21849
Gasdynamic test stand analyzing elastoplastic strains in aircraft gas turbine disks and liquid-propellant rocket engines turbopumps under alternating nonisothermal loads

10 p1862 A70-25298
Turbopump-fed rocket engine for satellite launchers, discussing gas cooling, fuel tank pressurization, etc

13 p2474 A70-29138
Combustion chamber, turbopump and combustion control system for French turbopump-fed booster rocket motor

20 p3688 A70-39649
Turbomolecular pumps with uniformly distributed small plane blades, calculating rotor efficiency

22 p3964 A70-42604
Turbomolecular pumps efficiency calculation by Maxwell transport equation, assuming gas molecules perfect specular reflection from blade surface

22 p4009 A70-42607
TURBINE WHEELS

Air lubricated foil bearing support design with external pressurization for high speed rotor in high temperature turbomachinery [ASME PAPER 69-LUB-D]

01 p0100 A70-10377
Rigid body dynamics of turborotors in fluid film journal bearings, investigating initial transients effect on motion stability by Runge-Kutta technique [ASME PAPER 68-LUB-7]

02 p0307 A70-12165
Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc

03 p0588 A70-13243
Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability

03 p0588 A70-13251
Gas turbine rotating disks failure analysis, studying strength as function of material properties, thermal stresses and hole dimensions

04 p0775 A70-15260
Gas dynamic stand for testing turbine disks strength under mechanical and cyclic thermal loads, analyzing breakdown data for various disk geometry

05 p0953 A70-17052
Stress rupture strength of turbine blades fir tree type root joints under prolonged loads at high temperatures, studying disk teeth shearing

05 p0953 A70-17055
Thin gas turbine disk strength under axisymmetric flexural vibrations, noting agreement of calculated and experimental rotor rpm danger zone

06 p1166 A70-17654
Outside-matching functioning of single rotating disk of axial compressor, investigating critical disengagement and rotary detachment [ONERA-TP-701]

07 p1193 A70-19127
Stability and potential cavitation of centrifugal pump operating with four working wheels with different geometric parameters

08 p1558 A70-21196
Stetson-Powell time fringe hologram technique of vibration analysis applied to nodal patterns in compressor blade and turbine disks

09 p1679 A70-22979
Creep and stability of perforated and unperforated turbine disks under operating conditions

09 p1779 A70-23097
Stress concentrations in turbine disks with eccentric holes under steady creep

09 p1780 A70-23200
Plane disks and turbine disks of complex profile made of heat resistant Cr-Ni alloys studied for rupture strength under various temperature conditions

09 p1785 A70-23599

Gas turbine components, discussing material selection, fabrication and assembly with emphasis on combustion and turbine sections, turbine coatings, shafts, bearings and seals

10 p1929 A70-23851
Computerized analysis of shear failure at initial fragment collision during trifragment rotor disk interaction with containment rings

14 p2563 A70-30870
Soviet book on bearing capacity of turbomachine rotor elements covering testing methods, stress analysis, design factors on stability, etc

14 p2658 A70-30958
Transverse vibration of thin circular elastic turbine disk of variable thickness rotating axially at constant angular velocity

16 p2916 A70-32994
German monograph on calculation and measurement of stress distribution in turbine rotors with radial flow, discussing differential equations for rotating disks

16 p2993 A70-34076
Sliding friction effects of nonlinear asymmetric supports on turbine engine rotor-shaft stability [SAE PAPER 700320]

18 p3301 A70-36799
Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc

19 p3548 A70-38461
Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability

19 p3548 A70-38469
Discrete components formation in noise spectra of axial turbocompressor intake, considering relationship between blades and rotor disk

19 p3353 A70-38652
Critical rotation rates of gas turbine rotors disk-drum designs, describing initial parameters of model in matrix form

20 p3721 A70-39782
Thermal stress and changes in modulus of elasticity and expansion coefficient effects on dynamical properties of turbine disks at high temperatures

20 p3721 A70-39783
Gas lubricated foil bearing performance as support for turborotor simulator, examining heating and thermal gradient effects [ASME PAPER 70-LUBS-12]

22 p4044 A70-42448
Dynamic characteristics of turborotor simulator supported on gas lubricated foil bearings, considering rotor response to imbalance [ASME PAPER 70-LUBS-11]

22 p4044 A70-42449
Turbomolecular pumps with uniformly distributed small plane blades, calculating rotor efficiency

22 p3964 A70-42604
TURBINES

NT AXIAL FLOW TURBINES
NT GAS TURBINES
NT SHROUDED TURBINES
NT STEAM TURBINES
NT SUPERSONIC TURBINES
NT TWO STAGE TURBINES

Small three stage hydraulic turbine for aerospace and commercial applications, discussing design and performance

04 p0628 A70-15640
Air brake with compressed air fed bearings for testing small turbines, determining power and friction moment

08 p1481 A70-21188
Turbine components design for low cycle fatigue, estimating thermal cycle number for high temperature crack initiation and propagation

09 p1774 A70-22583
Turbine components thermal stress calculations for static and variable loads, considering plastic strain, creep and temperature effects

09 p1775 A70-22592
Flow pattern of axial flow of turbine stage calculated from cascade characteristics

11 p1975 A70-25794
Rolls-Royce RB 211 three shaft turbofan engine, discussing centrifugal compressor, tubular combustion chambers and single stage turbine

15 p2787 A70-31949
Nuclear space power three stage potassium turbine erosion testing in stainless steel loop with various contamination levels

21 p3756 A70-41005
Variable geometry radial inflow turbine performance estimation based on one dimensional flow theory

22 p3960 A70-43738
Radial inflow turbine optimum design geometry, calculating nozzle and rotor geometrical parameters efficiency

24 p4395 A70-46012
TURBOALTERNATORS

U AC GENERATORS
U TURBOGENERATORS
TURBOCHARGERS

U SUPERCHARGERS
U TURBOCOMPRESSORS

TURBOCOMPRESSORS

TURBOCOMPRESSORS

Two stage axial flow compressor with variable pitch guide vanes, discussing HF vibration reduction of rotor blades

01 p0166 A70-11419

Strong shocks and high temperature gases production using multistage gaseous detonation driven shock tube

02 p0274 A70-11855

Discrete frequency noise generation from axial flow compressor blade row, using experiments in small scale Freon loop

[ASME PAPER 69-WA/FE-22] 04 p0733 A70-14777
Rotating acoustic modes generated at blade passing frequencies in inlet duct of axial flow fan or compressor measured

04 p0691 A70-15079

Flow field calculation for axisymmetrical gas flow in axial compressor cascade applicable to optimal blade design

04 p0617 A70-15191

Aircraft engine fan and compressor noise theory as basis for improved noise prediction

05 p0896 A70-16790

Turboblowers and compressors air tests for gas operation performance prediction

06 p1129 A70-17136

Inviscid flow through staggered airfoil cascades in oscillatory and distorted flow simulating axial flow compressor

[AIAA PAPER 70-131] 06 p0969 A70-18049

Outside-matching functioning of single rotating disk of axial compressor, investigating critical disengagement and rotary detachment

[ONERA-TP-701] 07 p1193 A70-19127

Multistage axial compressor performance described by mathematical model based on maximum probability principle

08 p1558 A70-21190

Machine-plotted pseudo three dimensional turbocharger rotor whirl display, discussing amplitude and frequency

08 p1496 A70-21300

Far field directionality and acoustic power of noise radiated by axial flow fans and compressors using fluctuating forces model

08 p1547 A70-21860

Supersonic compressor applications for airborne vehicles propulsion systems, discussing axial flow compressors, three dimensional design methods, supersonic radial machines, etc

[AGARDOGRAPH-120] 08 p1434 A70-21929

Axial compressor aerodynamics and efficiency in aircraft turbine engines

[ONERA-TP-767] 09 p1604 A70-22656

Tandem axial compressor performance for various blade stagger and flap angle values of rotor row, investigating gap influence

09 p1608 A70-23736

Stage matching under local stall conditions for multistage axial flow compressor off-design and surge initiation characteristics

09 p1608 A70-23741

Annulus wall boundary layer effect on spatial flow in subsonic axial compressors by shearing stresses concept between stream surfaces

11 p1974 A70-25777

Axial flow compressor blade rings interaction effect on angular speed of rotating stall zones

11 p1974 A70-25780

Critical load, force characteristics and pressure variation on blades of axial compressor under rotating stall

11 p2133 A70-25795

Supersonic axial flow compressors, studying shocks shared by rotor and stator to obtain high efficiency

11 p2101 A70-25819

Acoustic wave transmission and reflection through blade row in axial flow compressor analysis based on semiautuator disk theory and acceleration potential method

11 p2103 A70-26705

Axial flow compressor clearance control coatings at blade tip paths for efficiency

[SAE PAPER 700330] 12 p2291 A70-27462

Nonfree vortex flow in contrarotating axial flow fans under radial equilibrium assumption, discussing pressure rise coefficient and static efficiency

12 p2156 A70-27600

Axial compressor stage head determination by measuring axial thrust, noting fluid velocity nonuniform distribution influence

13 p2474 A70-28892

Axial-flow compressors stall characteristics measurement using water as working fluid

13 p2341 A70-29446

Axial flow compressors off-design performance calculation using radial equilibrium equation

15 p2791 A70-32770

Axial compressor aerodynamics investigation methods concerning compressor flow for efficiency improvement

16 p2836 A70-33757

Kuznetsov NK 8-4 bypass turbojet air entry vanes, pressure compressors, gear case, combustion chamber and turbine drives

17 p3147 A70-34629

Compressor erosion correlation with aerodynamic parameters in gas turbine engines

17 p3147 A70-34711

Rotating stall in axial compressors, using finite difference method

17 p3011 A70-35450

Pure impulse principle applied to axial compressor impellers with high solidity high camber blades

18 p3301 A70-36647

Three dimensional inviscid small perturbation compressible flow past lifting axial compressor rotor at subsonic and transonic speeds

18 p3208 A70-36691

Two dimensional compressor cascades of double circular arc and wedge shape blades testing performance in transonic and supersonic wind tunnels

[ASME PAPER 70-GT-7] 18 p3302 A70-36829

Plane and annular cascade facilities data application to aerodynamic design of axial flow compressors

[ASME PAPER 70-GT-106] 18 p3303 A70-36845

Axial flow compressor off-design performance optimization by adjustable inlet guide vanes with variable trailing edge flaps

18 p3304 A70-36846

Rotor wakes intrastator transport effects on high Mach number axial flow compressors performance, considering stagnation temperature profile and rotor blade loss factor

[ASME PAPER 70-GT-39] 18 p3209 A70-36869

Axial flow compressor cascades, predicting total pressure losses for inlet relative Mach number greater than unity

[ASME PAPER 70-GT-57] 18 p3209 A70-36872

Sound transmission and suppression in turbomachinery fans and compressor ducts, using three dimensional wave equation

[ASME PAPER 70-GT-58] 18 p3304 A70-36873

Boundary layer optimization for high turning axial flow compressor blades, using flow theory and conformal mapping

[ASME PAPER 70-GT-88] 18 p3209 A70-36879

End wall boundary layers effect included in performance prediction method for multistage axial compressors

[ASME PAPER 70-GT-80] 18 p3210 A70-36884

Off-design pressure losses in single stage axial flow compressor, using test rotor in annular duct

[ASME PAPER 70-GT-78] 18 p3210 A70-36886

Axial flow compressor stage efficiency under rotor separation conditions, investigating dependence on flow rate

19 p3490 A70-37252

Blade root design for axial flow compressors and turbines, avoiding tensile stress concentration

19 p3490 A70-38616

Discrete components formation in noise spectra of axial turbocompressor intake, considering relationship between blades and rotor disk

19 p3353 A70-38652

Axial compressor air intake wall design influence on sound propagation

19 p3353 A70-38653

Turbocompressor disk materials selection by low cycle fatigue tests, discussing stop and start repetition and cracks in stress concentration zones

21 p3867 A70-41261

Jet engine compressor noise analysis, noting inlet swirl role

22 p4090 A70-42725

Optimum manifold and injector hole area of pulsed exhaust systems of two cycle engine with turbosupercharger

22 p4091 A70-42809

German monograph on three dimensional flow and blade pressure measurements at axial flow compressor casing wall, discussing test control and digital data processing

24 p4332 A70-45093

German monograph on supersonic strongly deflecting retardation cascades covering flow geometry and application to axial flow compressor stage

24 p4287 A70-45095

German monograph on casing and hub wall friction effects on three dimensional flow in turbocompressors in subsonic compressible working fluids

24 p4287 A70-45096

Turbine compressor blades vibration mode measurements by holographic interferometry

24 p4334 A70-45563

Axial flow compressor fan discrete tone noise radiation directivity pattern measurement and theoretical explanation for cut-off effect, power and harmonics

24 p4380 A70-46069

Turbofan, turbojet and turboprop engine development in aircraft gas turbine evolution, discussing VTOL propulsion, centrifugal and axial compressor engines

24 p4396 A70-46251

Turbofan VTOL or STOL intercity transports noting lift engines, noise, aircraft design and interior

[AIAA PAPER 69-1039] 01 p0005 A70-10645

Twin turbofan executive aircraft /Falcon/ development, describing modifications and antinoise features

12 p2162 A70-28026

Air deflection and modulation /ADAM/ turbofan propulsive wing /VSTOL design

[AIAA PAPER 69-201] 12 p2162 A70-28087

TURBOFAN ENGINES

Rolls-Royce RB 211 three shaft turbofan engines development and tests, noting preparation, building, cradle installment, open air facilities and noise measurements

01 p0161 A70-10079

Optimum R and D organization in aircraft engine production illustrated on turbofan engine

01 p0161 A70-10080

Ice tunnel testing facility at Naval Air Propulsion Test Center /NAPTC/, describing methods, systems, instrumentation and various turbofan and turbojet engine tests

01 p0056 A70-10691

A-7 aircraft TF-41 engine tolerance to steam ingestion, discussing test program and results and engine modifications

01 p0165 A70-10700

Positive displacement low pressure air motors for Boeing 747 fan thrust reverser pneumatic actuators and controls

03 p0550 A70-12881

Design specifications for low noise turbofan engine used on long range subsonic transport aircraft

[ASME PAPER 69-WA/GT-7] 04 p0734 A70-14888

Gross thrust coefficient for turbofan engines thrust estimates, discussing full scale nozzle simulation

04 p0736 A70-15390

Air inlet and exhaust nozzle form and location effect in afterburning turbofan engines, discussing stalling, afterburner blowouts and thrust losses prevention

05 p0895 A70-15807

Engine cycle and low pressure-intermediate pressure compressor aerodynamic design of TF41 turbofan engine

[SAE PAPER 690687] 05 p0895 A70-15864

Dip brazing aluminum fan vanes used in high bypass turbofan jet engines

10 p1893 A70-23858

Three spool turbofan engine design regarding maintainability, noting on-condition module removal and overhaul

[SAE PAPER 700204] 11 p2101 A70-25877

Aircraft turbofan and turbojet engines military-commercial interrelationships

[SAE PAPER 700268] 12 p2290 A70-27436

Aircraft turbojet and turbofan engines cost correlation to performance statistically analyzed in terms of various parameters

[SAE PAPER 700270] 12 p2335 A70-27437

Rolls-Royce RB 211 turbofan engine, discussing fuel consumption, specific weight, noise and smoke level, reliability and maintainability

15 p2787 A70-31948

Rolls-Royce RB 211 three shaft turbofan engine, discussing centrifugal compressor, tubular combustion chambers and single stage turbine

15 p2787 A70-31949

Turbofan engine compressor system performance dependence on circumferential extent, magnitude and rate of change of inlet temperature in altitude test facility

[AIAA PAPER 70-625] 16 p2968 A70-33590

C-5A turbofan engine thrust determination using pressure and temperature values in exhaust nozzles

[AIAA PAPER 70-611] 16 p2969 A70-33606

Turbofan engine gross thrust dependence on nozzle pressure ratio and simulated flight Mach number, considering altitude chamber test data

[AIAA PAPER 70-612] 16 p2969 A70-33608

Cooperative airline program for aircraft turbofan engine parts aging and performance deterioration evaluations

[SAE PAPER 700329] 18 p3301 A70-36798

High bypass turbofan engine design concepts and development program for airline operation

[SAE PAPER 700292] 18 p3302 A70-36804

High bypass ratio aircraft turbofan engines, discussing program of factory, flight and operational suitability testing
[SAE PAPER 700290] 18 p3302 A70-36806

JT9D engine design and performance, describing operational problems
[SAE PAPER 700288] 18 p3302 A70-36807

Military and commercial transports turbofan propulsion systems impact on future aircraft design and development
[SAE PAPER 700267] 18 p3214 A70-36820

Turbofan engine performance optimization by closed form solution of operating cycle parameter functions
[ASME PAPER 70-GT-65] 18 p3303 A70-36840

Jumbo jets turbofan engines design, considering fuel consumption, maintenance, reliability, noise reduction, etc
19 p3491 A70-38953

Turbofan engine aerodynamic interactions, cryogenic space storable propellants, space station attitude control biowaste resistojet and long burning time solid propellants
20 p3688 A70-39667

Turbofan engines afterburner flame stabilization at low inlet temperature, noting flame holder geometry role
22 p4088 A70-42336

Acoustically treated inlet and fan exhaust duct configurations for JT3D turbofan engine on DC 8 aircraft
22 p4090 A70-42533

High bypass model jet noise study, describing test setup and noise measurement results as function of secondary/primary flow velocity ratio
23 p4233 A70-44394

Allison/Rolls-Royce TF41 turbofan engine improved power and reduced weight versions, comparing afterburning Model 912-B23 to nonafterburning TF41-A-2
23 p4234 A70-44596

Noise suppression for high-bypass ratio CF6 turbofan engine in DC-10 airplane, considering effect on engine design
[SAE PAPER 700804] 24 p4393 A70-45878

Engine control concepts for augmented turbofan, discussing integrated electrical/hydraulic/mechanical system
[SAE PAPER 700826] 24 p4394 A70-45893

Turbojet and turbofan engine control evolution, noting increased complexity and adoption of hybrid fluidics and computer technologies
[SAE PAPER 700825] 24 p4394 A70-45894

Noise reduction design for subsonic transport turbofan engines
[SAE PAPER 700807] 24 p4395 A70-45907

TURBOFANS

Aircraft engine fan and compressor noise theory as basis for improved noise prediction
05 p0896 A70-16790

Steady and unsteady flow through Napier turboblower axial flow turbine for full and partial admission, estimating mass flow and power output
07 p1189 A70-20294

Far field directionality and acoustic power of noise radiated by axial flow fans and compressors using fluctuating forces model
08 p1547 A70-21860

Sound transmission and suppression in turbomachinery fans and compressor ducts, using three dimensional wave equation
[ASME PAPER 70-GT-58] 18 p3304 A70-36873

Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan power plants
[AIAA PAPER 69-492] 22 p4090 A70-42708

Axial flow compressor fan discrete tone noise radiation directivity pattern measurement and theoretical explanation for cut-off effect, power and harmonics
24 p4380 A70-46069

TURBOGENERATORS

Thermal gradients and associated strains measurement in steam turbogenerator casings, considering strain gage placement and heat transfer calculations
09 p1774 A70-22590

TURBOJET AIRCRAFT

U JET AIRCRAFT

TURBOJET ENGINE CONTROL

Turbojet engine controls and control devices design, considering fuel properties and fuel consumption
03 p0552 A70-13806

Concorde microelectronic power plant control system, noting overfueling prevention by throttle actuator during startup and speed governor function
05 p0896 A70-16003

Dual flow turbojet engine rotor slip constraints during turning, investigating turbine blade strength, thrust deviation, fuel consumption and compressor stability
10 p1930 A70-24285

Fluidic gas turbine controls, discussing high temperature operation, hybrid sensors and logic in hostile environment applications
12 p2164 A70-27074

Dual flow turbojet engines automatic control and guidance characteristics
17 p3147 A70-34687

Multidimensional control for turboramjet engine, relating system characteristics to invariance conditions during startup and ascent
20 p3689 A70-39847

Turbojet and turbofan engine control evolution, noting increased complexity and adoption of hybrid fluidics and computer technologies
[SAE PAPER 700825] 24 p4394 A70-45894

TURBOJET ENGINES

NT DUCTED FAN ENGINES

NT T-56 ENGINE

NT TURBOFAN ENGINES

NT TURBOPROP ENGINES

Turbojet engines air pollution emissions processes resulting from combustor primary and secondary zone conditions, discussing engine design modifications
[AIAA PAPER 69-1040] 01 p0162 A70-10602

Turbojet aircraft engine performance correlation with relative humidity, noting air density effect on rotor performance resulting from moisture content
01 p0165 A70-10689

Ice tunnel testing facility at Naval Air Propulsion Test Center /NAPTC/, describing methods, systems, instrumentation and various turbofan and turbojet engine tests
01 p0056 A70-10691

Embedded sheathed thermocouples temperature measurement of cooled jet engine turbine buckets subjected to high heat flux
03 p0486 A70-13560

Turbine noise significance in civil aircraft noise problem
[ASME PAPER 69-WA/GT-12] 04 p0734 A70-14884

Tungsten alloy fiber reinforced Ni-base superalloy composites evaluated for high temperature turbojet engine applications, considering stress-rupture strength, oxidation and impact resistance
08 p1523 A70-21907

Supersonic turbojet propulsion systems and components - NATO/AGARD Conference, Varenna, Italy, May 1967
[AGARDOGRAPH-120] 08 p1559 A70-21926

V/STOL aircraft turbojet engine design and quality control for in-service reliability
09 p1743 A70-22572

Turbojet engines departure from equilibrium performance during thermal soak transient attributed to heat absorption in turbine and compressor metals, observing thrust loss
09 p1744 A70-23739

External supersonic potential flow effects on turbojet engine ring and needle nozzle performance, considering gas overexpansion operation
10 p1930 A70-24286

Nickel cadmium battery for aircraft jet engine starting, discussing selection for optimum service life and reliability under maintenance and environmental conditions
[SAE PAPER 700211] 11 p1980 A70-25883

Aircraft turbofan and turbojet engines military-commercial interrelationships
[SAE PAPER 700268] 12 p2290 A70-27436

Aircraft turbojet and turbofan engines cost correlation to performance statistically analyzed in terms of various parameters
[SAE PAPER 700270] 12 p2335 A70-27437

Supersonic and subsonic air breathing engines, discussing single and ducted fan turbojets, ramjets, turboprop engines and land based gas turbine engines
12 p2291 A70-28071

Soviet book on aerodynamics of Tu 134 aircraft, covering 30 turbojet engines, flight characteristics, etc
13 p2344 A70-28875

Turbojet engine testing in ground level facilities with automatic instrument reading and parameters calculation
13 p2474 A70-29688

Aircraft turbojet engine/inlet compatibility, using data system for acquisition, identification and analysis of critical time variant pressure parameters
[AIAA PAPER 70-594] 13 p2375 A70-29877

Liquid propane turbojet exhaust simulator for wind tunnel propulsion testing, emphasizing nozzle jet properties
[AIAA PAPER 70-634] 16 p2888 A70-33595

Kuznetsov NK 8-4 bypass turbojet air entry vanes, pressure compressors, gear case, combustion chamber and turbine drives
17 p3147 A70-34629

Ground test noise measurements accuracy and repeatability on JT8D turbojet engine
17 p3060 A70-35183

Turbojet aircraft engine fuels quality control, considering chemical composition, physical properties and handling problems
18 p3299 A70-36550

Olympus 593 engine for Concorde aircraft, describing design and test procedures
[SAE PAPER 700291] 18 p3302 A70-36805

Soviet book on VTOL design covering aerodynamic and weight characteristics, turboprop and turbojet engines, flight regimes, etc
19 p3354 A70-37233

Aircraft engine design combining turbojet and ramjet features to ensure optimum performance
20 p3690 A70-40148

Otomat surface to surface missile with turbojet engine for extended range subsonic cruise and two solid propellant rocket engines for launch
22 p4110 A70-43211

Turbojet engines noise-suppressing nozzles flow rate and thrust characteristics calculation
22 p4092 A70-43371

NASA research in turbojet aircraft propulsion noting inlet, compressor, combustor, turbine and nozzle component technology
[ICAS PAPER 70-46] 23 p4233 A70-44144

TURBOMACHINE BLADES

NT COMPRESSOR BLADES

NT ROTOR BLADES [TURBOMACHINERY]

NT STATOR BLADES

NT TURBINE BLADES

Sound generation by multibladed single stage fans operating in free field, deriving model as boundary value problem involving inhomogeneities due to quadrupole distribution
01 p0166 A70-11197

Discrete frequency noise generation associated with wakes due to fluid flow over turbomachine blades, supporting spokes, flat plates, etc
[ASME PAPER 69-WA/GT-13] 04 p0733 A70-14883

Theoretical model of fan/compressor noise blade passing frequency generation and transmission, noting duct length and configuration in engine operation
04 p0734 A70-14886

Turbine cascade designs with constant reactivity over blade vertical profiles contributing to effective manufacturing of short and long blades
04 p0617 A70-15192

Creep and strength criteria reliability for turbomachine disks, determining stresses, destructive rotations and strength margin
05 p0953 A70-17056

Blade inter-row distances upstream and downstream related to potential flow velocity disturbances created by cascade in turbomachines
09 p1607 A70-23734

Pressure waves of varying amplitude effect on flow through turbomachine blade passages, discussing interaction with curved diffusers geometry
09 p1608 A70-23743

Subsonic compressible or incompressible inviscid flow field through turbomachine blade row determined by matrix and streamline curvature methods
09 p1608 A70-23745

Streamwise perturbations in flow downstream of self excited blades cascade calculated by two dimensional theory, discussing periodic circulation shedding
09 p1608 A70-23746

Torsional vibration of rotating tapered and twisted turbomachine blade, constructing digital computer program for convergence and boundary conditions
[SAE PAPER 700180] 11 p2128 A70-25373

Optimal efficiency of axial turbomachines limit loading of blade root and hydrodynamic criteria
11 p1975 A70-25791

Flow equations for flow field in entry to radial or mixed flow impellers of turbomachines
[ASME PAPER 70-FE-36] 16 p2892 A70-33640

Incompressible flow interaction of perfect irrotational fluid through two blade wheels in relative motion, observing pressure variations at nozzle profile
16 p2836 A70-33755

Base function selection for energy calculation optimal convergence conditions of frequencies and stresses in turbomachine blades vibrations
20 p3722 A70-39784

Vibration loads in turbomachinery blading, examining blade detuning effects on resonant response levels and fatigue life
24 p4392 A70-45157

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc
02 p0352 A70-11659

Optimal lift-drag ratio of cascades dependence on optimal pitch of cascades calculated for axial flow turbomachinery
02 p0356 A70-12750

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes
03 p0588 A70-13242

Brayton cycle electric power generator simulation to study turbomachinery startup 03 p0415 A70-14050

Sound attenuation in acoustically lined turbomachinery ducts with no air flow, indicating spinning lobes and generation frequency effect on liner material performance [ASME PAPER 69-WA/GT-11] 04 p0734 A70-14885

Difference equations and axial stress tensor component for turbomachinery in curvilinear coordinates systems 04 p0776 A70-15268

Packing rub effect on rotating machinery produced by unstable vibration generated by friction and heat of rubbing rotor in sliding contact 05 p0854 A70-15908

Radial outflow effect on fluid motion between rotating and stationary plane disks associated with rotor cooling in turbomachinery 05 p0833 A70-16503

Deformation and failure of refractory metals at high temperatures under constant and variable thermal loads concerning turbomachine components 05 p0865 A70-17027

Compressible fluid flow velocity profile in turbine stage evaluated by streamline correlation and actuator disk method 06 p0967 A70-17469

Turbine machine elements approximation by difference equations of axisymmetrical elasticity theory problem 06 p1167 A70-17663

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes 08 p1580 A70-21657

Brush collector for strain measurement in jet engine compressor and turbine elements at high RPM 11 p1983 A70-26439

Fluid mechanics of jet engine turbomachinery, considering supersonic compressor and blade rows flows and airframe propulsion system compatibility 11 p1977 A70-26574

Automatic computation at SNECMA for turbomachines R and D, emphasizing digital computer for scientific calculation and analog simulator for engine regulation 12 p2193 A70-28073

Turbine technology application to high speed roller bearing design, considering reduction of roller skidding and skewing 13 p2419 A70-28918

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc 19 p3547 A70-38432

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes 19 p3548 A70-38460

Dynamic testing of turbine machine parts using strength and vibration equations and similarity method 19 p3437 A70-38472

Incompressible axisymmetric flow through turbomachines, developing flowfield for given velocity distribution along arbitrary streamline 19 p3354 A70-38933

TURBOPROP AIRCRAFT

NT CL-84 AIRCRAFT

NT G-222 AIRCRAFT

NT OV-10 AIRCRAFT

Sound levels and frequency spectra of noises measured in AN-24 and IL-18 turboprop aircraft cockpits 05 p0796 A70-16925

Remote control turboprop drone aircraft for long unmanned electronic intelligence or tactical communications relay missions 08 p1435 A70-20625

Air conditioning systems design for turboprop commuter and business aircraft [SAE PAPER 700224] 11 p1980 A70-25895

Servoactuator for stick force augmentation on light turboprop STOL aircraft at high angles of attack [AIAA PAPER 70-909] 17 p3019 A70-35821

Prototype grill device for turboprop aircraft engine inlet protection against bird ingestion, discussing performance tests 18 p3212 A70-35996

TURBOPROP ENGINES

NT T-56 ENGINE

Bird deflection grid device for turboprop engine inlet ducts, noting effects on inlet flow characteristics, engine performance, etc 01 p0165 A70-10688

Acceleration and regulating system of free turbine turboprop engines studied by graph-analytical method used for nonlinear circuit analysis 03 p0552 A70-13927

Annular combustion chamber for turboprop engines, analyzing design data and development stages, discussing performance characteristics 03 p0552 A70-13928

Vibrational overloads development in turboprop engines ascribed to natural vibrations mode shape frequency approaching rotor revolutions number 07 p1363 A70-19110

Mixture composition and airflow rate dependence of combustion efficiency in turboprop afterburner chamber with air-fuel flame stabilizer 10 p1929 A70-24282

Small turboprop engine development, flight tests, performance and weight reduction [SAE PAPER 700206] 11 p2102 A70-25878

Supersonic and subsonic air breathing engines, discussing single and ducted fan turbojets, ramjets, turboprop engines and land based gas turbine engines 12 p2291 A70-28071

Turboprop aircraft engine service life extension, correcting deficiencies via accelerated tests based on relation between failure rate and usage 15 p2787 A70-31535

Hydrodynamic internal streamline flow analysis for turboprop inducer blades under cavitating and non-cavitating conditions 16 p2964 A70-33528

Soviet book on VTOL design covering aerodynamic and weight characteristics, turboprop and turbojet engines, flight regimes, etc 19 p3354 A70-37233

Low and medium power turboprop engines for V/STOL aircraft, discussing development trends concerning operational control 22 p4091 A70-43081

TURBOPUMPS

Optical scintillation measurements applied to turbulence diagnostics, inferring spatial spectrum of turbulent scatterers, using Monte Carlo numerical procedure 02 p0296 A70-11892

Turbulence intensity, light intensity fluctuations and frequency optical measurement in diffusion flames of city gas with air, deriving turbulence spectral functions 02 p0398 A70-12038

Dissipation spectrum /viscous dissipation of turbulent kinetic energy as function of wave number magnitude/ data compared and plotted 02 p0327 A70-12294

Turbulence characteristics in liquids measured by hot film anemometry, discussing calibration methods selecting criteria as temperature control, drift influence and relative speed determination 02 p0303 A70-12687

Direction fluctuations in radio wave scattering in turbulent gyrotropic medium using Einstein-Fokker-Kolmogoroff equation 04 p0653 A70-15722

Turbulence - Conference, Seattle, June 1969 11 p2038 A70-26526

Burger turbulence model late decay statistical analysis using kernels of Cameron-Martin-Wiener expansion of random velocity field 13 p2386 A70-28820

Multiwavelength laser beam propagation with point source transmitters, determining turbulence levels independently 13 p2426 A70-28837

Fast time-resolved spectra of earth bow shock electrostatic turbulence based on broadband analog electric data from OGO-5 13 p2396 A70-29111

Direction fluctuations in radio wave scattering in turbulent gyrotropic medium using Einstein-Fokker-Kolmogoroff equation 14 p2350 A70-30806

Turbulent flows calculation based on two parameter turbulence model, considering model application to free jets 16 p2895 A70-34199

Book on stochastic tools in turbulence covering generalized functions, probability, moments, characteristic functions, Gaussian distribution, random functions and multidimensional fields 17 p3128 A70-34601

Acoustic turbulence spectrum in compressible fluid with potential motion, using complex traveling wave amplitudes in hydrodynamic equations 18 p3242 A70-36637

Turbulence characteristics determination by measuring light beam arrival angle fluctuation using photoelectric recording shadow devices 20 p3634 A70-40401

Astrophysical hypothesis of vorticity expulsion from strong turbulence regions, indicating mechanism of thermally driven circulation currents 22 p4010 A70-42690

Single and crossed light beam techniques for optical measurement of fluid turbulence with refractive index fluctuations 22 p4011 A70-42694

Early type Ia and Iab supergiant stars macro turbulence and rotation, investigating spectral line broadening, mass loss and angular momentum 23 p4250 A70-44813

TURBULENCE EFFECTS

Helical journal bearings analysis operated in turbulent regime with incompressible lubricant, determining optimum groove parameters for maximum radial stiffness 01 p0100 A70-10381

DC dynamo models for planetary electromagnetic conditions, considering nonrotationally symmetric turbulence induction actions and critical values for field maintenance 01 p0185 A70-10956

Noise generation in turbulent premixed flames, turbulent diffusion flames and liquid-spray combustion of hydrocarbon fuels, using optical method 02 p0399 A70-12040

Atmospheric turbulence effects on accelerations experienced by passengers in supersonic and subsonic transport aircraft compared 02 p0325 A70-12219

E layer kinetic energy viscous dissipation and transfer to potential energy by turbulence and irregular winds shear 02 p0327 A70-12292

Internal stability of turbulent combustion, deriving analysis for one dimensional model and developing sufficient instability criterion 03 p0607 A70-13862

Free stream turbulence effect on heat transfer in circular cylinder stagnation region 03 p0469 A70-14216

Free stream turbulence effect on drag coefficient of bluff sharp edged cylinders with small square section 05 p0789 A70-15923

Plane Poiseuille flow stability as function of periodic disturbances of finite amplitude in channel axis direction 05 p0832 A70-16018

Aircraft wake turbulence effects, using hot film anemometry from nearby towers and penetration by instrumented aircraft 05 p0794 A70-16300

Kolmogoroff constant determined by Heisenberg turbulence formula and model for transfer of turbulent energy between different wave numbers 06 p1034 A70-17467

Heat and mass transfer across laminar boundary layer around stagnation line of cylinder in crossflow affected by free stream turbulence intensity 06 p1176 A70-17693

Mathematical model for testing theory of solar differential rotation maintenance by two dimensional turbulence 06 p1144 A70-18009

HF periodic velocity oscillations effect on axisymmetric wake diffusion flames [AIAA PAPER 70-10] 06 p1182 A70-18179

Weak shock thicknesses with turbulent scattering as dissipative mechanism compared with magnitude in sonic boom flight tests and explosions [AIAA PAPER 70-54] 06 p1042 A70-18190

Telescope resolution limit dependence on refractive index mean square fluctuation and effective aperture in turbulent medium 06 p1067 A70-18396

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests

07 p1254 A70-19063

Turbulence effect on heat transfer in flow carrying section of turbine engines, considering flow velocity pulsations frequency characteristics

07 p1362 A70-19067

Error estimation of gondola encased tugged undersea magnetometer as function of turbulence parameters

07 p1281 A70-19466

Acoustic turbulence generated noise intensity and spectrum using statistical thermodynamics

07 p1194 A70-19618

Finite disturbance effect on laminar incompressible wake behind flat plate determined by interaction between two dimensional fluctuation amplitude and mean flow

08 p1433 A70-21605

Partial statistical description of turbulent flame interior and turbulent flame speed determination for effects of turbulence on flame propagation

08 p1485 A70-21607

Mean flow and turbulent velocity over noise-producing regions of subsonic jet nozzle with and without delta wings

09 p1610 A70-22239

Fossil turbulence / three dimensional quasi-isotropic refractive index microstructure left behind during turbulence patch decay/ effects on radio wave propagation

09 p1717 A70-22377

Turbulent energy budgets in atmospheric boundary layer near ground scalar fluctuations and CAT

09 p1717 A70-22380

Laser measurements of permittivity fluctuations spectrum of turbulent atmosphere, noting proportionality to temperature spectra at optical frequencies

09 p1635 A70-22962

Amplitude measurement of plane light wave propagating in turbulent atmosphere, giving log amplitude dependence on dispersion of logarithm fluctuations

09 p1636 A70-23136

Turbulent medium refractive index fluctuations effect on parameters of focused plane light wave, calculating diffraction patterns center of gravity

09 p1636 A70-23138

Laser beam intensity fluctuations during propagation through turbulent atmosphere

09 p1637 A70-23142

Self diffusion in turbulent fluid motion attributed to flow turbulence and linked to mean motion by mass conservation

09 p1663 A70-23310

Microwave signal fading in Venus atmosphere due to turbulence, discussing atmospheric dielectric permittivity variance

09 p1764 A70-23484

Air flow turbulence intensity and plug effect influence on local heat exchange on cylinder surface

10 p1797 A70-24028

Atmospherically induced phase fluctuations for various path lengths using near ground horizontal Mach-Zehnder, discussing turbulence effects

10 p1916 A70-24413

Clear air turbulence effect on supersonic aircraft safety and comfort, noting shallow zones and effects of topography and thunderstorms

10 p1912 A70-24506

Focal plane intensity of focused laser beam passed through turbulent atmospheric layer

10 p1901 A70-25160

Laser light propagation along strongly inhomogeneous turbulent path, measuring intensity fluctuations dispersion and light amplitude

10 p1844 A70-25161

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests

10 p1871 A70-25214

Turbulence effect on heat transfer in flow carrying section of turbine engines, considering flow velocity pulsations frequency characteristics

10 p1930 A70-25218

Atmospheric turbulence effects on line-of-sight electromagnetic wave propagation, deriving signal statistics for nonvalid weak scattering solutions case

11 p2012 A70-26764

Semiquantitative study showing variations in degree of laser beam coherence due to turbulence

12 p2245 A70-26980

Magnetic field equation for gyrotropic and anisotropic turbulence, observing large scale magnetic field generation

12 p2210 A70-27546

Rotation law and circulation velocities in solar hydrogen convection zone under anisotropic turbulent velocity

12 p2302 A70-27588

Optical processing for measuring frequency spectrum of PM wave induced by turbulent medium in laser beam

12 p2249 A70-27756

Aircraft dynamic response to homogeneous isotropic atmospheric turbulence analyzed for power spectral density, taking into account spacewise variations in airframe loading

[AIAA PAPER 70-544] 13 p2345 A70-29010

Rotor blade random vibrations in response to turbulence

[AIAA PAPER 70-548] 13 p2339 A70-29013

Strongly accelerated turbulent boundary layer, investigating free stream turbulence effect on heat transfer

14 p2564 A70-30252

Space vehicle response to in-flight wind turbulence, describing operational procedure for launch advisability determination

14 p2653 A70-30587

M31 continuum radio emission produced by magnetic field aligned along arms, discussing field turbulence effects

14 p2642 A70-30891

Time autocorrelation and power spectrum of radar returns from underdense turbulent ionized gas as function of electron density decay

14 p2551 A70-31035

Heat transfer from acceleration induced boundary layer reverse transition, considering free stream turbulence effects

14 p2667 A70-31169

Isolated convective plumes immersed in return flow turbulent downdraft

15 p2769 A70-31440

Atmospheric turbulence effects on optical communication systems in geosciences

16 p2900 A70-33019

Shear flow turbulence effect on chemical reactions, considering two dimensional low speed turbulent mixing layer between high velocity cold gas and air at rest [AIAA PAPER 70-721]

16 p2855 A70-33493

Turbulence spectrum functions time variations, examining electron density fluctuations in ionized gas

16 p2894 A70-33886

Collisionless shocks structure in turbulent wave-particle interactions, obtaining ion distribution function

16 p2959 A70-33970

Load carrying capacity of self acting hydrodynamic journal bearings, considering turbulence and whirling motion in closed form solution

17 p3101 A70-35148

Radio sources angular broadening by solar wind turbulence used for solar corona probe

18 p3311 A70-36003

Ring current belt stability against LF electrostatic perturbations, including effects of finite electric field along magnetic lines of force

18 p3306 A70-36009

Error estimation of gondola encased tugged undersea magnetometer as function of turbulence parameters

18 p3260 A70-36940

Atmospheric turbulence effects on light propagation, measuring refractive index variations by high speed temperature sensors

18 p3285 A70-36961

Laser radar tracking systems, calculating atmospheric turbulence effects on angular errors

19 p3379 A70-37857

Heat transfer in plasma flow incident normally on cylinder, examining laminar boundary layers in presence of turbulence

19 p3552 A70-38187

Propagation mode conversion of Gaussian light beam due to random fluctuations of turbulent medium, discussing effect of aperture size and fluctuations anisotropy

20 p3585 A70-39451

Turbulence effects on lateral directional flying qualities, examining pilot task performance, control workload and compensatory behavior

[AIAA PAPER 70-998] 20 p3560 A70-39533

Gas dynamics turbulence of controlled properties effect on electrical discharge across plasma stream, preventing filamentary nature

20 p3681 A70-40008

Differential rotation at solar surface caused by anisotropic turbulent viscosity in hydrogen convection zone, solving via Navier-Stokes equation

20 p3711 A70-40404

Galactic evolution and secular variations of cosmic rays, magnetic fields and turbulence, assuming stellar birth rate dependence on gas density and temperature

21 p3919 A70-41700

Optical communication in turbulent media, investigating error rate for binary single path fading channels by photocount detection

21 p3837 A70-41935

Free stream turbulence effect on heat transfer to stagnation point of sphere

21 p3953 A70-42095

Atmospheric inhomogeneity and temperature gradient effects on sonic booms, discussing displacement, growth rate and shock wave radii refraction

22 p3961 A70-42311

Linear antenna radiation pattern broadening due to atmospheric turbulence

22 p3995 A70-42386

Large fluid-amplifier-type jets, measuring upstream flow disturbances effects on spreading velocity profiles

[ASME PAPER 70-FLCS-A] 22 p3964 A70-42431

Synthetic aperture terrain-imaging radar systems, calculating tropospheric turbulence induced phase errors for comparison with microwave propagation experiment

22 p3991 A70-43579

Jet aircraft noise reduction devices directed at turbulence fluctuation noise sources, noting effects on flight characteristics

[ICAS PAPER 70-21] 23 p4233 A70-44112

Aerodynamic drag and local convective heat transfer on smooth plate for various flow velocities, determining effects of turbulator in boundary layer transition region

23 p4283 A70-44733

Reynolds stress measurement, using laser flowmeter with cylindrical lenses and square aperture mask

23 p4202 A70-44945

TURBULENCE METERS

Probe geometry effects on hot film anemometer probe performance during turbulence measurements in liquids

06 p1032 A70-17213

Hot wire turbulence measurements of cylindrical wall jet compared to results from free circular and plane wall jets

06 p1034 A70-17526

IR crossed beam system for direct density turbulence measurements in mixing region of subsonic air jet

[AIAA PAPER 70-235] 06 p1065 A70-18091

Turbulence measurement by piezoceramic acoustic sensors, considering capacitance

07 p1284 A70-19829

HF arc anemometer for subsonic and supersonic gas flow turbulence measurement

07 p1285 A70-19837

Optical heterodyning of Doppler shifted signal with minimal instrumental spectral broadening and high SNR, applying to turbulence structure measurement by CW laser

11 p2062 A70-25630

MHD turbulence suppression by magnetic field in tubes, using conduction anemometers

15 p2778 A70-31480

Laser Doppler velocimeter for measuring turbulence in gas and fluid flows

16 p2926 A70-33140

Hypersonic velocity and turbulence measurements in wind tunnels, using spectral analysis of Doppler shifted laser light

17 p3103 A70-34849

Airborne atmospheric turbulent flow measurement system with fast response wind velocity, temperature, humidity and aircraft motion sensors, discussing performance and data reduction

20 p3665 A70-40109

TURBULENT AIR CURRENTS

U AIR CURRENTS

U TURBULENT FLOW

TURBULENT BOUNDARY LAYER

Hot-wire probe support orientation to minimize flat plate turbulent boundary layer mean velocity determination errors

01 p0087 A70-10665

Turbulent boundary layer computations for flows with various pressure distributions

01 p0063 A70-10928

Density and heat transfer effects on compressible turbulent boundary layers used to investigate velocity and temperature profiles, skin friction, Mach number and Reynolds number

01 p0003 A70-10936

Heat transfer in turbulent boundary layer of airflow injected on smooth plate from nozzle in subsonic stepwise heated wind tunnel

01 p0216 A70-11001

Incompressible turbulent boundary layer and separation flow into forward facing normal step, considering step heights and boundary layer thickness

01 p0066 A70-11133

Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle

01 p0069 A70-11627

Turbulent boundary layers computations - Conference, Stanford University, August 1968, Volume 2

02 p0280 A70-12271

Turbulent boundary layers computation - Conference, Stanford University, California August 1968, Volume 1, Methods, predictions, evaluation and flow structure

02 p0280 A70-12326

Prediction systems for turbulent boundary layers, noting momentum integral equation use in all integral methods

02 p0281 A70-12327

Method of weighted residuals /MWR/ for nonlinear partial differential equations applied to incompressible two dimensional turbulent boundary layer momentum and continuity equations

02 p0281 A70-12328

Method of weighted residuals /MWR/ applied to turbulent boundary layer equations, describing two parameter prediction technique

02 p0282 A70-12330

Integral relations method efficiency and accuracy in solving incompressible turbulent boundary layer equations, noting acceptability for turbulent flows with small wake components

02 p0282 A70-12331

Turbulent boundary layers behavior prediction by strip integral momentum equation method, considering velocity profiles and shear stresses

02 p0282 A70-12332

Extended mixing length method for computing turbulent shear stress distribution required in calculating two dimensional incompressible turbulent boundary layer

02 p0282 A70-12333

Modified Granville moment of momentum method used with integral equations in integral moment method for turbulent boundary layer flow, considering pressure gradient influence

02 p0282 A70-12334

Integral theory for two dimensional incompressible turbulent boundary layer in nonequilibrium flows, describing velocity profile in momentum and energy equations

02 p0283 A70-12335

Turbulent boundary layer development calculation by shear work integral method involving Reynolds number introduction procedure

02 p0283 A70-12336

Energy dissipation and entrainment methods for calculating turbulent boundary layer development, involving simultaneous numerical solutions of ordinary differential equations for local variables

02 p0283 A70-12337

Dissipation integral method for turbulent boundary layer problem based on nonequilibrium flow, analyzing inner and outer regions

02 p0283 A70-12338

Integral dissipation method for predicting turbulent boundary layers, taking into account semipirical past history

02 p0283 A70-12339

Turbulent boundary layer calculations by integral dissipation method, using various dissipation coefficient laws

02 p0283 A70-12340

Mixing length theory improvement to calculate turbulent boundary layers based on velocity profiles

02 p0284 A70-12342

Integral method for computing two dimensional incompressible turbulent boundary layer development, including entrainment process of irrotational fluid

02 p0284 A70-12343

Momentum integral method for turbulent boundary layers based on equilibrium profiles family, considering weighting function specification techniques

02 p0284 A70-12345

Conservation equations for mass, mean momentum and kinetic energy for incompressible turbulent boundary layer, using finite difference procedure

02 p0284 A70-12347

Governing equations determined for turbulent boundary layer and quasi-parallel turbulent shear flows, taking into account effects of convection, diffusion, pressure, etc

02 p0285 A70-12348

Mean velocity and mean turbulent energy field methods of calculating boundary layer behavior based on numerical solutions of equations of motions

02 p0285 A70-12349

Boussinesq eddy viscosity concept solving equations of two dimensional incompressible turbulent boundary layer, using implicit five point finite difference method

02 p0285 A70-12350

Hydrodynamic turbulent boundary layer on smooth wall, using finite difference theory

02 p0285 A70-12351

Differential strip method developed for turbulent boundary layer equations, describing flow by law of wall coupled to wake solution utilizing constant eddy viscosity

02 p0285 A70-12352

Finite difference solution of compressible turbulent boundary layer equations of motion, using eddy viscosity concept

02 p0286 A70-12353

Three dimensional turbulent boundary layers on high aspect ratio bodies /swept wings/, discussing shear stress direction determination

02 p0286 A70-12354

Integral methods for turbulent boundary layer solutions, emphasizing shape factor improvement in differential equations

02 p0286 A70-12357

Prediction criteria regarding turbulent separation in fluid mechanical devices and systems, emphasizing vanishing wall shear stress

02 p0286 A70-12358

Turbulent boundary layer response to sudden changes in surface conditions or pressure gradients, considering equilibrium attainment

02 p0287 A70-12360

Waves vs eddies in dynamics of turbulent boundary layer fluctuating motions with scale of mean flow

02 p0287 A70-12361

Graphical display of diverse methods of flow predictions by various authors for turbulent boundary layers

02 p0287 A70-12363

Laminar and turbulent boundary layer equations with or without wall injection over two dimensional or axisymmetric bodies solved by finite difference techniques

02 p0287 A70-12370

Eddy viscosity equation derived from flat plate turbulent boundary layer velocity data, considering shear stresses and mixing length profiles

03 p0464 A70-12943

Porous wall material entrainment in turbulent boundary layer during supplementary inert gas injection, including nonisothermicity effects in heat and mass transfer equations

03 p0440 A70-13385

Turbulent boundary layer of incompressible fluid flow in axisymmetric channels with swirl at inlet, considering components interaction, velocity, circulation profiles and resistance

03 p0466 A70-13389

Energy equation for thermal turbulent boundary layer on adiabatic flat plate

03 p0466 A70-13421

Boundary layer transition from laminar to turbulent in hypersonic wind tunnel, determining Reynolds and Mach number effects [ONERA-TP-737D]

03 p0467 A70-13641

Reaction of three dimensional shock wave with turbulent boundary layer in supersonic flow around plate

03 p0409 A70-13876

Similarity properties of laminar or turbulent boundary layer separation in uniform supersonic flow, discussing wall cooling, pressure evolution, etc

03 p0469 A70-14234

Turbulent fluctuation rates of temperature and velocity on basis of measurements in boundary layer with wall heat transfer

03 p0470 A70-14237

Velocity structure associated with motion of interface between turbulent and nonturbulent fluid at turbulent boundary layer edge, considering shear flows

03 p0470 A70-14240

Secondary velocities analysis in turbulent boundary layer in dihedron interior based on turbulence anisotropy and effects on wall pressure gradient

03 p0471 A70-14354

Boundary layer equations for axial laminar and turbulent incompressible flows over slender bodies of revolution solved by finite difference method

[ASME PAPER 69-WA/FE-2]

Linearized velocity profiles for turbulent free shear layers using transverse shift and longitudinal motion equation

[ASME PAPER 69-WA/APM-28]

04 p0668 A70-14904

Turbulent boundary layer model using two region characterization for eddy viscosity and similarity solution taking into account interfacial conditions

[ASME PAPER 69-WA/APM-27]

04 p0668 A70-14905

Interaction between surface liquid film and hot gaseous turbulent boundary layer analyzed for hypersonic vehicle surface thermal protection design problems

04 p0669 A70-14927

Linear stress distribution insertion into equations of motion for turbulent boundary layer, considering velocity profile in wall region

04 p0670 A70-14987

Radiation from and panel response to supersonic turbulent boundary layer, emphasizing panel mode coupling to acoustic field

04 p0615 A70-15081

Pressure pulsations and velocity measurements in turbulent boundary layer without longitudinal gradient, analyzing Reynolds numbers, self similarity and structural characteristics

04 p0673 A70-15250

Reattachment of supersonic jet with turbulent shear boundary layer abruptly expanding into axisymmetric parallel diffuser, using surface flow technique

04 p0619 A70-15323

Karman formula generalization for turbulent motion in atmospheric boundary layer, including improved variant for thermally stable and unstable conditions

05 p0878 A70-16205

Razor blade calibration and measurement of wall jet flow shear stress in turbulent boundary layer with secondary injection

05 p0833 A70-16504

Acoustic intensity determined from time, length and velocity scales in mixing region of jet from nozzle with turbulent boundary layers

05 p0834 A70-16779

Experimental and analytical work on structural panels vibratory response and acoustic radiation excited by turbulent boundary pressure fluctuations, evaluating applicability to noise research

05 p0835 A70-16789

Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method [AIAA PAPER 69-397]

06 p1032 A70-17214

Two dimensional laminar and turbulent boundary layer flow theory covering heat and mass transfer, compressibility, turbulence, roughness, chemical reactions and axial symmetry

06 p1032 A70-17227

Negative pressure gradients effects on wall heat flow and characteristic patterns for turbulent boundary layer profiles

06 p1033 A70-17231

Turbulent boundary layers and wall jets development investigated for effect of mass injection through porous smooth and rough surfaces

06 p1034 A70-17679

Rotta differential equation for turbulent boundary layer flow with fixed profiles of length scale, shear stress and kinetic energy

06 p1035 A70-17694

Blowing intensity influence on turbulent boundary layer of incompressible fluid and friction drag of flat plate

06 p1036 A70-17852

Laminar ablation testing under turbulent boundary layer heating conditions, obtaining recession rate and heat of ablation for turbulent ablation of Teflon [AIAA PAPER 70-226]

06 p1179 A70-18071

Turbulent boundary layer control by wall jet, analyzing wall jets in adverse pressure gradients for two limiting cases [AIAA PAPER 70-107]

06 p1041 A70-18160

Static pressure, temperature profiles, heat transfer and optical data for turbulent boundary layer-shock interaction with/without injection [AIAA PAPER 70-91]

06 p1042 A70-18210

Steady turbulent boundary layer of compressible perfect gas on heat insulated surface with suction and longitudinal pressure gradient

07 p1254 A70-19081

Turbulent incompressible boundary layer on porous heat insulated plate with uniform suction, calculating ratio of friction drag coefficients

07 p1254 A70-19082

Supersonic oblique shock wave reflection on turbulent boundary layer, considering layer separation and pressure effects

07 p1255 A70-19210

Surface inhomogeneities effect on sound radiated by nearby turbulence near flexible boundary, using converted Lighthill wave equation to obtain far field radiation

07 p1256 A70-19262

Integral methods for predicting two dimensional incompressible turbulent boundary layers development in arbitrary pressure gradients, using momentum integral equation and wall friction relation

07 p1256 A70-19308

Wind tunnel experiments for apparent reverse transition during expansion fan and turbulent boundary layer interaction, discussing Reynolds stresses

07 p1257 A70-19345

Unsteady boundary layer in compressible fluid laminar flow over accelerating semiinfinite flat plate

07 p1258 A70-19566

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution allowing for initial unheated plate segment

07 p1423 A70-19657

Air flow disturbances over mountains in terms of turbulent boundary layer separation dissolution

07 p1330 A70-19800

Wall proximity and velocity gradient effects on thermocouple readings in turbulent boundary layer

07 p1285 A70-19834

Transverse curvature effects on turbulent boundary layer thickness and velocity profiles on circular cylinders in water and air

07 p1261 A70-20301

Turbulence coefficient and profile in atmospheric boundary layer from wind and temperature distribution, obtaining formulas from model approximating coefficient by altitude function

08 p1538 A70-21112

Transverse pressure gradient effect on parameters of turbulent boundary layer on body rotating in axial flow

08 p1483 A70-21193

Laminarization parameter magnitude determination for turbulent boundary layer in convergent channel flow

08 p1484 A70-21518

Turbulent Prandtl number and eddy viscosity distribution in thermally stratified turbulent boundary layer of air shear flow dependent on wall distance and thermal stability

08 p1599 A70-21581

- Temperature increase effects on fully turbulent boundary layers at low Reynolds number in air investigated in wind tunnel 08 p1485 A70-21606
- Surface roughness effects on measured cross spectral density of wall pressure fluctuations beneath turbulent boundary layer 08 p1486 A70-21859
- Heat and mass transfer in binary turbulent boundary layer during natural convection on vertical surface, allowing for diffusional heat conduction 09 p1787 A70-22267
- Stratospheric CAT layer energy budget analysis, considering energy shear feeding, buoyant extraction and frictional dissipation 09 p1715 A70-22357
- Turbulent energy spectra in stably stratified atmospheric boundary layer flow 09 p1715 A70-22360
- Aerodynamic characteristics of plane straight walled diffusers initial and stabilized flow segments, assuming incompressible fluid and turbulent boundary layer 09 p1659 A70-22430
- Cross hatching on surface of ablating bodies exposed to supersonic turbulent boundary layer flow using mathematical model 09 p1605 A70-23232
- Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method [ASME PAPER 69-HT-7] 09 p1663 A70-23560
- Laminar-turbulent boundary layer transition in incompressible fluid under surface roughness action, developing theory by generalizing Taylor hypothesis 09 p1664 A70-23713
- Boundary layer atmospheric turbulence at Kennedy Space Center obtained for engineering spectral model, discussing energy balance 10 p1911 A70-23926
- Compressible turbulent boundary layer with adverse pressure gradients and crossflow over revolving bodies, integrating numerically three dimensional compressible integral equations 11 p2035 A70-25689
- Film cooling effectiveness measured following air injection through discrete holes into turbulent boundary layer of air on flat plate 11 p2146 A70-25690
- Three dimensional incompressible turbulent boundary layer detachment on rotating blading of axial impellers 11 p1975 A70-25793
- Compression process in turbulent boundary layer on control surface at hypersonic speeds, noting influence on surface effectiveness and heating [ONERA-TP-814] 11 p1979 A70-25815
- Turbulent boundary layer vortex structures using hydrogen bubble technique 11 p2035 A70-25864
- Wall pressure fluctuations beneath turbulent boundary layers on flat plate and cylinder 11 p2038 A70-26529
- Atmospheric turbulent boundary layer velocity signals correlation with lognormal distribution 11 p2076 A70-26531
- Turbulent boundary layer interaction with wavy wall in wind tunnel, discussing wall pressure drag and surface waves interaction 11 p2039 A70-26538
- Motion and shape of interface at separation of turbulent and nonturbulent regions in boundary layer with zero pressure gradient 11 p2040 A70-26539
- Superlayer structure in turbulent boundary layer on flat plate obtained by statistical processing of signals from hot-wire probes 12 p2209 A70-27226
- Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point 12 p2209 A70-27289
- Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer 12 p2278 A70-27324
- Turbulent Prandtl number values for air with injection and suction obtained from velocity and temperature profile data 12 p2210 A70-27699
- Compressibility transformation theory extended for turbulent boundary layer, involving mass transfer with/without chemical reactions 12 p2211 A70-27825
- Compressible turbulent boundary layers velocity profiles, Coles universal wake function, least squares methods, wake-wall representation, etc 12 p2157 A70-28080
- Turbulent boundary layer and base pressure profiles of supersonic flow past conical models in wind tunnel 12 p2159 A70-28229
- Two dimensional turbulent boundary layer with pressure gradient, calculating velocity distribution and local skin friction by Pohlhausen method 13 p2391 A70-29672
- Discrete sonic jets as boundary layer trips producing turbulent hypersonic flows with negligible intrinsic drag and downstream distortions 13 p2523 A70-29973
- Axisymmetric compressible boundary layer on body of revolution transformed into two dimensional turbulent boundary layer 13 p2391 A70-29995
- Turbulent boundary layer formation in upstream wake of accelerated flow indicated from boundary layer profile and wall static pressure measurements 13 p2392 A70-29996
- Three dimensional turbulent boundary layer development on rear of swept wing, comparing measurements with calculations 13 p2344 A70-30021
- Logarithmic and Coles velocity profiles validity for turbulent boundary layers on radial rotating impeller blades 14 p2527 A70-30176
- Strongly accelerated turbulent boundary layer, investigating free stream turbulence effect on heat transfer 14 p2564 A70-30252
- Two dimensional incompressible turbulent boundary layer with mass addition and heat transfer, calculating temperature and velocity profiles by marching integration 14 p2564 A70-30261
- Turbulent boundary layer characteristics on simple shapes in hypersonic flow, using mixing length theory and eddy exchange coefficient 14 p2564 A70-30262
- Atmospheric wind profiles and boundary layer turbulence power spectra for calculation of wind loads on space vehicles during prelaunch and launch 14 p2653 A70-30600
- Turbulent boundary layer loading function for use with finite element structural analysis system applied to elastic aircraft structures random vibration [AIAA PAPER 69-20] 14 p2658 A70-30853
- Starting criterion for hypersonic inlets with large turbulent boundary layers, considering total pressure recovery from all shock and viscous losses 14 p2529 A70-30865
- Turbulent boundary layer correlations on flat plate, noting inadequate Spalding-Chi predictions 14 p2567 A70-31396
- Incompressible turbulent boundary layer calculation based on shearing stress hypothesis, considering layer at flat plate, boundary conditions and velocity profiles 15 p2719 A70-31490
- Longitudinal velocity and temperature fluctuation spectra in turbulent boundary layer, showing highest spectral densities at internal zone 15 p2826 A70-32021
- Turbulent boundary layer instability on rotating cylinder in axial stream, correlating mixing length to Richardson number 15 p2722 A70-32372
- Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution taking into account initial unheated plate segment 15 p2828 A70-32694
- Subsonic turbulent boundary layer with mass addition and combustion for combustion effects on velocity profiles in constant pressure and accelerating flows [AIAA PAPER 70-724] 16 p2997 A70-33498
- Turbulent boundary layer response in flow field downstream of upstanding step change in surface roughness [ASME PAPER 70-FE-17] 16 p2891 A70-33630
- Laminar and turbulent boundary layer equations solutions for incompressible/compressible flows about two dimensional and axisymmetric bodies, using finite difference method [ASME PAPER 70-FE-A] 16 p2892 A70-33641
- Control efficiency of flaps at hypersonic speeds, considering thick turbulent boundary layer compression process 16 p2836 A70-33751
- Aerodynamic admittance of paraboloid dish aerial in scaled atmospheric turbulent boundary shear layer simulated in wind tunnel by vortex generators 16 p2878 A70-33766
- Turbulent boundary layer growth and thickness on yawed cones, discussing angle of attack effect along windward and leeward rays 16 p2838 A70-33875
- Uniform two dimensional turbulent boundary layer with hydrogen-nitrogen mixture injection and combustion at flame front, obtaining velocity distribution by kinetic energy equation 16 p2894 A70-33880
- Axisymmetric blunt base cylindrical body with turbulent initial boundary layer, investigating flow structure in annular nozzle wind tunnel [AIAA PAPER 70-796] 17 p3006 A70-34464
- Analytical model for jet interaction induced separation of supersonic turbulent boundary layers, conducting flat plate tests at Mach 4 [AIAA PAPER 70-765] 17 p3007 A70-34486
- Nozzle wall hypersonic turbulent boundary layers at free stream Mach number using pitot, hot wire, and wall fluctuation and static pressure measurements [AIAA PAPER 70-746] 17 p3065 A70-34497
- Fluctuation measurements at wall and across laminar, transitional and turbulent compressible boundary layers on flat plate, using hot film probes [AIAA PAPER 70-745] 17 p3066 A70-34498
- Temperature and Mach number distributions measurements on supersonic turbulent boundary layers for reanalyzing heat transport [AIAA PAPER 70-744] 17 p3066 A70-34499
- Mean electron density profiles and fluctuations in equilibrium high speed turbulent boundary layers, calculating temperature effects [AIAA PAPER 70-743] 17 p3066 A70-34500
- Probst-Gold model for ablated materials crosshatching patterns, using interaction between inelastic deformable surface and supersonic turbulent boundary layer [AIAA PAPER 70-768] 17 p3009 A70-34504
- Compressible turbulent boundary layers with heat and mass transfer in two dimensional and axisymmetric flows, using eddy transport coefficients [AIAA PAPER 70-741] 17 p3066 A70-34506
- Turbulent boundary layer structure, considering flow properties prediction, wakelike behavior, bursts, compressibility, transport properties, etc 17 p3068 A70-34665
- Turbulent boundary layer velocity, temperature and concentration instantaneous measurements, describing automatic circuit procedure 17 p3088 A70-35041
- Turbulent boundary layer on porous surface with fluid injection into layer reexamined for causes of discrepancy with experimental results 17 p3072 A70-35547
- Heat transfer and friction drag calculation for turbulent boundary layer of gas with temperature dependent physical properties 17 p3012 A70-35729
- Heat and gas curtain efficiency in turbulent boundary layer on flat plate, including heat transfer data 17 p3198 A70-35731
- Local skin friction law for turbulent boundary layers in incompressible flow, applying rule for compressible flow conditions 17 p3075 A70-35922
- Turbulent boundary layer of flat plate, investigating superlayer structure by hot wire anemometer 18 p2338 A70-36066
- Two layer model of burning in turbulent boundary layer on porous surface for carbon monoxide oxidation reaction 18 p3346 A70-36268
- Error analysis of Corcos hypothesis concerning cross spectra of pseudoacoustic LF turbulent pressure pulsations on flat plate 18 p3241 A70-36305
- Previous history effect on parameters relation in similar turbulent boundary layers under pressure distributions 18 p3241 A70-36375
- Conical shock wave-turbulent boundary layer interaction data obtained for adiabatic wall conditions at supersonic free stream Mach numbers, including suction effects 18 p3241 A70-36448
- Wall cooling effects on turbulent boundary layer in low speed air flow, using smooth tube and thermocouple measurements 18 p3347 A70-36505
- Finite plate length effect on two dimensional supersonic turbulent boundary layer with large distributed surface injection 18 p3242 A70-36688
- Favorable pressure gradient effect on compressible two dimensional supersonic turbulent boundary, using temperature and pressure probes and shear balance 18 p3242 A70-36690
- Turbulent boundary layer characteristics on unblown flat plate at low Reynolds numbers, extending to cases with blowing and suction 19 p3405 A70-38020
- Velocity distribution and shear stress measurements in three dimensional turbulent boundary layer approaching separation 19 p3405 A70-38021
- Velocity distribution in boundary layer on thin rotating turbine blade of impeller driven at wind tunnel outlet, solving turbulent and laminar flows momentum equations 19 p3352 A70-38224
- Plane symmetrical and axisymmetrical laminar and turbulent free jets, interpreting statistical character of boundary layer profiles 19 p3407 A70-38684
- Wind speed pulsations measurement at atmospheric boundary layer and different heights, analyzing turbulent energy intensity 19 p3463 A70-38757
- Heat transfer from cylinder in axial air flow with induced turbulence of incident boundary layer, noting temperature effects 20 p3736 A70-39264

Oscillatory flow in turbulent boundary layer modeled by eddy viscosity distribution, deriving mass transport velocity induced by progressive and standing waves

20 p3608 A70-39358

Asymptotic turbulent boundary layer semiempirical Taylor formula, investigating average motion formed in mixing jet region and surrounding liquid

20 p3611 A70-39809

Turbulent boundary layer calculation in incompressible fluid, using one parameter method

20 p3612 A70-39810

Chemically active surface decomposition in dissociated gas flow with turbulent boundary layer, determining diffusion fluxes in laminar sublayer

20 p3612 A70-39812

Turbulent boundary layer on cone in supersonic flow in presence of inflowing foreign substance, considering local surface friction coefficient

20 p3559 A70-39814

Plasma accelerator compressible turbulent boundary layers numerical calculation taking into account MHD effects, electron thermal nonequilibrium and finite rate ionization

20 p3682 A70-40017

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor

20 p3684 A70-40269

Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point

20 p3613 A70-40339

Wall proximity and velocity gradient effects on thermocouple readings in turbulent boundary layer

20 p3634 A70-40341

Turbulent gas boundary layer at finite Reynolds numbers, investigating relative changes in friction and heat transfer coefficients and temperature factor

20 p3614 A70-40390

Two dimensional turbulent boundary layer computation using two parameter family of velocity profiles and skin friction law

21 p3806 A70-40921

Boundary layer transition application to space shuttle design, relating aerodynamic noise to turbulent boundary layers

21 p3744 A70-41015

Turbulent boundary layers calculation with and without mass addition based on eddy viscosity concept, including accelerating flows

21 p3807 A70-41029

Turbulent boundary layers produced by nonuniform shock tube flow, considering effects on chemical kinetic measurements

21 p3807 A70-41315

Eddy currents in Hall generator with conducting side wall, studying velocity and temperature effects for turbulent boundary layer and laminar flows

21 p3859 A70-41733

Transformation theory for compressible turbulent boundary layer with arbitrary pressure gradient

[AIAA PAPER 69-160] 21 p3809 A70-41741

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer

21 p3860 A70-42065

Three dimensional laminar and turbulent boundary layers separation criteria

21 p3811 A70-42206

Karman-Pohlhausen method applied to unsteady thermal boundary layer on isothermal flat plate

21 p3954 A70-42208

Turbulent hydrodynamic and thermal boundary layer development in internally heated annulus

[ASME PAPER 70-HT-9] 22 p4008 A70-42438

Steady incompressible turbulent boundary layer form on permeable curvilinear surface with uniform suction, assuming small pressure gradients

22 p4011 A70-42803

Stationary turbine blades heat flux measurements, considering heat exchange coefficients and turbulent boundary layer

[ONERA-TP-871] 22 p4126 A70-43459

Turbulent boundary layer control by uniform fluid injection and suction, discussing velocity profiles, wall and wake laws, skin friction and shear stress transport equation

[ICAS PAPER 70-10] 23 p4180 A70-44121

Laminar to turbulent boundary layer flow transition over flat plate, using space amplified numerical solutions of Orr-Sommerfeld equation

23 p4181 A70-44234

Entrainment theory for incompressible turbulent boundary layer velocity and drag on bodies of revolution employed in fuselage, submersible and cowlings for propulsion design

23 p4182 A70-44400

Vane type vortex generators to prevent turbulent compressible boundary layer separation, measuring drag in supersonic flow

23 p4133 A70-44527

Heat transfer from turbulent boundary layer interacting with shock and expansion waves in supersonic flow

23 p4134 A70-44573

Turbulent boundary layer velocity profiles and shear stress distributions computation based on mixing length approach

23 p4182 A70-44574

Cracked Teflon heat shields ablative behavior for laminar and turbulent boundary layers in supersonic flow, describing heat transfer to substructure

23 p4282 A70-44585

Highly accelerated boundary layer turbulence structure, measuring intermittency factor distribution with hot-wire probe

23 p4182 A70-44587

German monograph on radioactive gases and decomposition products mass transport in turbulent atmospheric boundary layer, noting Boussinesq approximation and Reynolds decomposition

24 p4324 A70-45094

Sphere rotating in viscous fluid at rest, investigating surrounding flow field from creeping flow to turbulent boundary layer

24 p4326 A70-45989

TURBULENT DIFFUSION

Vortex diffusion in viscous compressible fluid, deriving nonlinear differential equations from density velocity and pressure discontinuities considerations

01 p0060 A70-10145

Book on turbulent diffusive flames in combustion of gaseous fuels covering mass, heat, flame exchange and stabilization processes, etc

01 p0219 A70-11377

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions

01 p0068 A70-11603

Velocity and density profiles obtained from mass diffusivity time measurements in axisymmetric turbulent air pipe flow over specific Reynolds number range

02 p0295 A70-11853

Stellar model surface convective zone using diffusion equation taking into account transport due to gravitational separation, noting role of turbulent diffusion

03 p0574 A70-13932

Plasma turbulence theory formulated using averaging operators, obtaining nonlinear dispersion relation for turbulent diffusion coefficients

03 p0537 A70-14377

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions

[AIAA PAPER 69-421] 07 p1365 A70-19706

Vertical eddy diffusion effect on chemical composition of mesosphere and lower thermosphere using photochemical model containing oxygen and hydrogen

07 p1274 A70-20269

Atmospheric turbulence parameters in meteor zone determined from simultaneous photographic and radar observations, determining turbulent diffusion coefficient dependence on height

08 p1563 A70-20546

Horizontal turbulent diffusion model of cloud, determining particles dispersion as function of time

08 p1538 A70-21111

Modified diffusion approximation for spectral transfer of isotropic turbulent pulsation energy for temperatures with low Prandtl number

08 p1538 A70-21429

Turbulent diffusion and ion heating in plasmas in presence of current instability

08 p1554 A70-21813

Turbulent combustion stability in chamber, taking into account boundary effects due to acoustic perturbations reflection

09 p1786 A70-22106

Self diffusion in turbulent fluid motion attributed to flow turbulence and linked to mean motion by mass conservation

09 p1663 A70-23310

Eddy penetration model for heat transfer from trailing face of cylinder in transverse flow

09 p1791 A70-23566

Downward ozone transport from troposphere to atmospheric boundary layer by turbulent diffusion calculated by model, estimating annihilation rate

10 p1875 A70-24486

Plasma turbulent diffusion across constant magnetic field, noting magnetic, kinetic energy and relaxation times ratio effects

11 p2094 A70-26755

Turbulent diffusion coefficients and time dependent velocity pulsations in air flow, considering relation between Eulerian and Lagrangian turbulence characteristics

12 p2213 A70-28235

Turbulent diffusion random model of foreign substance, investigating latent parameters existence

13 p2387 A70-29211

Global atmospheric models computations based on treating molecular and eddy diffusion as dynamic processes

14 p2606 A70-30561

Atmospheric turbulence parameters in meteor zone determined from simultaneous photographic and radar

observations, determining turbulent diffusion coefficient dependence on height

15 p2796 A70-31455

Annoyance assessment for sonic boom series exposure near airport

16 p2843 A70-34325

Model diffusion equation for inhomogeneous incompressible turbulent flow, applying to free turbulent flows

17 p3069 A70-34825

Turbulent velocity pulsations characteristics determination by diffusion measurements

18 p3240 A70-36265

Free atmosphere turbulent diffusion coefficient determination, releasing dipole reflectors from helicopter for radio echo observation

19 p3461 A70-37423

Ring current protons turbulent diffusion in magnetospheric plasmapause, considering ion cyclotron wave lifetime and geomagnetic storms

21 p3881 A70-41085

Turbulent charge diffusion during unipolar injection in nitrobenzene between plane-parallel electrodes, discussing liquid motion at high voltages

22 p4080 A70-42719

German monograph on soot formation and separation in turbulent diffusion flame in power plant combustion chamber, noting pyrolysis role

24 p4428 A70-45087

TURBULENT FLOW

NT CAVITATION FLOW

NT SUPERCAVITATING FLOW

Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects

[ASME PAPER 69-LUB-25] 01 p0100 A70-10383

Inertia forces effect in turbulent and laminar, self acting and infinitely long film bearings, considering compressible and incompressible lubricants

[ASME PAPER 69-LUB-2] 01 p0103 A70-10400

Goertler vortices effect on boundary layer transition on concave surface, discussing instability oscillations breakdown leading to turbulent motion

01 p0061 A70-10539

Polarographic probe for wall studies of turbulent flow velocity and direction by measuring maximum reduction current on redox compound microelectrode

01 p0062 A70-10664

Flow velocity pulsations effect on frequency spectrum of flow optical fluctuations, discussing methods for separating turbulence characteristics

01 p0092 A70-10996

Mass transfer analysis for axisymmetric turbulent flow in circular tube, deriving turbulent velocity profile from two part model, based on von Karman similarity hypothesis

01 p0064 A70-11092

Nonaxisymmetric mass transfer in turbulent flow in plain circular tube, considering diametral line and discontinuous ring sources

01 p0065 A70-11093

Pitot tube measurements of mixing zone of turbulent shear flow, discussing velocity gradient effects

01 p0066 A70-11134

Sound radiation from airfoil in turbulent jet flow, discussing direct correlation of fluctuating lift

01 p0004 A70-11192

Turbulent fluid flow analysis described by Navier-Stokes equations, introducing asymmetric tensors for anisotropic cases

01 p0068 A70-11605

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers

01 p0069 A70-11624

Turbulent viscous fluid flow characteristics obtained from integrating Navier-Stokes equation for unsteady flow with periodic momentum variation

01 p0069 A70-11626

Pressure drops in turbulent flow through circular or plane parallel section pipes, obtaining mean velocity expressions suitable for application to lubrication

02 p0277 A70-11912

Volumetric reaction rates and mass transport coefficients as function of position for ducted two dimensional turbulent hydrogen-air diffusion flame

02 p0398 A70-12036

Spiral grooved turbulent screw seal/viscoseal/analysis, combining results of spiral grooved journal bearing study with turbulent fluid film theory

[ASLE FICFS PREPRINT 32] 02 p0308 A70-12169

Energy reversal zones in turbulent shear flows with asymmetric mean velocity distribution, implying zones of opposing shear

02 p0279 A70-12228

Integral method for turbulent shear flow based on momentum and moment-of-momentum equations and Cole velocity profile family, determining shear stress integral

02 p0282 A70-12329

Integral relations method efficiency and accuracy in solving incompressible turbulent boundary layer equations, noting acceptability for turbulent flows with small wake components

02 p0282 A70-12331

- Shear stress transport equation derivation from turbulent energy equation based on properties of turbulent velocity fluctuations 02 p0284 A70-12346
- Governing equations determined for turbulent boundary layer and quasi-parallel turbulent shear flows, taking into account effects of convection, diffusion, pressure, etc 02 p0285 A70-12348
- Experimentation in fluid mechanics research, discussing equilibrium flows, relaxation processes, turbulence structure and digital techniques 02 p0286 A70-12355
- Wave packet dynamics recapitulation and tentative application to turbulent shear flow 02 p0287 A70-12362
- Statistical model of turbulent chemically reacting shear flows, analyzing wave number fluctuations effect and Couette flow 03 p0464 A70-12928
- Schlieren photograph intensity variations correlated with statistical parameters for turbulent flow density variations 03 p0464 A70-12941
- Laminar-turbulent transition in free axisymmetric viscous incompressible jet from shaped nozzle and long cylindrical tube 03 p0466 A70-13396
- Turbulence in hypersonic nozzle due to two phase flow of ideal gas and solid spherical particles, discussing thermal and dynamic differences 03 p0407 A70-13494
- Selectivity and pulsation sensitivity of electroacoustic transducers in turbulent flow under non-coherent reception of random pressure field 03 p0467 A70-13514
- Swirling flow through axisymmetrically deformed tube without consideration of viscosity and compressibility, noting wall flow for critical Rossby number values 03 p0468 A70-13788
- Heat transfer coefficient in turbulent duct flow of fine particles suspension, using coupled similar equations 03 p0608 A70-14382
- Turbulent flow velocity and stress components simultaneous measurement by single hot wire, discussing equations and computer program 04 p0685 A70-14447
- Structural similarity hypothesis for fully developed turbulence in smooth circular tubes, using intensity correction procedure 04 p0665 A70-14453
- Settling length for turbulent air flow velocity profile in smooth concentric annuli with square-edged and bellmouth entrances [ASME PAPER 69-WA/APM-24] 04 p0669 A70-14908
- Laminar and turbulent flows of compressible media in rotating pipes, analyzing velocity distribution, angular velocity and Coriolis effects using Abel equation 04 p0672 A70-15159
- Curvature effects on two dimensional turbulent wall jet flow over plane surface and circular convex and concave surfaces in still air 05 p0832 A70-16118
- Inviscid Burger turbulence spectral equations for cumulant approximation, obtaining energy spectrum and transfer as initial value problems 05 p0832 A70-16147
- Nozzle exit turbulence and excess fuel combustion as low and high speed jet noise source using Lighthill theory 05 p0834 A70-16782
- Frictional drag reducing polymer solution injection into boundary for turbulent pipe flow, discussing Reynolds number, injection rate, injection points and concentration 06 p1032 A70-17215
- Conservation equation for thermal energy in turbulent shear flow, including turbulence kinetic energy equation terms [WSCI PAPER 69-43] 06 p1179 A70-17983
- Long chain molecule additive effect on drag reduction in turbulent flow of aqueous polymeric solutions [AIAA PAPER 70-56] 06 p1037 A70-18030
- Isoenergetic mixing and reattachment processes of two dimensional supersonic turbulent separated flow, modeling mixing process by constant pressure theory [AIAA PAPER 70-108] 06 p1037 A70-18039
- Time dependent transport equations for full Reynolds stress tensor and turbulence decay function using flux approximations and relaxation model [AIAA PAPER 70-3] 06 p1038 A70-18080
- IR crossed beam system for direct density turbulence measurements in mixing region of subsonic air jet [AIAA PAPER 70-235] 06 p1065 A70-18091
- Shear wave interaction in infinite homogeneous reacting fluid, using Fourier and Taylor series for velocity, temperature, density, pressure and composition [AIAA PAPER 70-146] 06 p1040 A70-18154
- Frequency analysis of arterial sounds used in studying atherosclerosis, correlating spectra with jet flow turbulence past occlusion [AIAA PAPER 70-144] 06 p1003 A70-18220
- Yawed hot wire measurements of turbulence fluctuations, discussing calibration and mutual interference of adjacent wire and wire supporting prongs in X-ray wire case 06 p1071 A70-18487
- Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas 07 p1252 A70-18671
- Strain rate tensor coincidence in Lagrangian and Eulerian descriptions of turbulence demonstrated for homogeneous flow of incompressible fluid 07 p1252 A70-18672
- Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field 07 p1252 A70-18673
- Turbulent friction in gas flow core determined on basis of maximum stability principle 07 p1253 A70-18719
- Viscous fluid flow calculations in fine clearance eccentric annuli allowing for pressure losses in laminar or turbulent flows 07 p1293 A70-19120
- Microphone output level in airstream relation to sound pressure and pressure fluctuations caused by turbulent flow 07 p1334 A70-19372
- Turbulent velocities of convective motions in active and unperturbed photospheric faculae based on spectral observations 07 p1384 A70-19415
- Vertical plume velocity and temperature measurements by hot wire probe on turbulent free convection zones over model fires 07 p1282 A70-19582
- Soviet book on unsteady attached turbulent flow in turbine lattices, studying blade aerodynamic vibrations onset and attenuation in compressible and incompressible fluids 07 p1189 A70-19602
- Turbulent shear flow kinematic characteristics determined by photographic method and flow visualisation using vortex model 07 p1259 A70-19827
- Circular nozzle contraction and Reynolds number effects on turbulent pulsation damping, measuring longitudinal and transverse components 07 p1259 A70-19830
- Damped turbulent whirling tube flow friction characteristics and heat exchange, solving equation of maximum tangential flow rate 07 p1261 A70-20464
- German book on fluid dynamics for nonideal fluids covering viscosity effects, Prandtl boundary layer, turbulence and aerodynamics 08 p1431 A70-20751
- Flow turbulence effect on heat turbines efficiency using energy losses in blade cascades 08 p1432 A70-21073
- Flow turbulence in wind tunnel model tests, observing generation methods effect on aerodynamic flow characteristics distribution 08 p1483 A70-21074
- Flame propagation rate and combustion zone extension dependence on chamber dimensions for turbulent flow of homogeneous mixtures 08 p1597 A70-21187
- Elastic coatings effect on turbulent friction using turbulence flow theory based on mixing length concept 08 p1483 A70-21227
- Dissolved macromolecules effect on flow resistance due to turbulent friction in nonNewtonian liquids, considering physical parameters and hydrodynamic conditions 08 p1483 A70-21228
- Turbulent-laminar transition in divergent radial flow between disks, relating velocity fluctuations to Reynolds number 08 p1483 A70-21235
- Static pressure gradient influence on turbulent shear stresses and energy production in asymmetric wall jet flow 08 p1484 A70-21314
- Prandtl-Kolmogoroff model of turbulence with inclusion of second order terms for stress and velocity gradient not to vanish coincidentally 08 p1484 A70-21458
- Turbulence model, noting possibility of turbulence energy to vanish with distance from tunnel central point of entrance 08 p1486 A70-21770
- Instantaneous velocities measured for wall region of smooth duct during turbulent fluid flow by chronophotography of particles 09 p1658 A70-22046
- Turbulent MHD channel flow velocity profiles and hydraulic resistance relations for various Reynolds numbers, using two layer model 09 p1658 A70-22175
- Stably stratified atmospheric turbulent shear flow governing spectral equations asymptotic solutions for buoyancy subrange 09 p1659 A70-22372
- Laminar-turbulent regions boundary, discussing convective layer form and FM-CW microwave and acoustic radar measurement techniques 09 p1717 A70-22378
- Steady turbulent perfect compressible gas flow in axisymmetrical or plane channel, using equations governing channel height and static pressure variations 09 p1659 A70-22429
- Axisymmetric helium jet transition to turbulent flow in air slipstream, measuring temperature and velocity profiles 09 p1660 A70-22439
- Average velocities profile measurement in wall region of turbulent fluid flow in smooth duct 09 p1661 A70-22838
- Self diffusion in turbulent fluid motion attributed to flow turbulence and linked to mean motion by mass conservation 09 p1663 A70-23310
- Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles [ASME PAPER 69-HT-4] 09 p1790 A70-23558
- Blade inter-row distances upstream and downstream related to potential flow velocity disturbances created by cascade in turbomachines 09 p1607 A70-23734
- Streamwise perturbations in flow downstream of self excited blades cascade calculated by two dimensional theory, discussing periodic circulation shedding 09 p1608 A70-23746
- Compressor blade performance dependence on Reynolds number, turbulence intensity and axial velocity ratio, considering wind tunnel tests with porous side walls 09 p1609 A70-23748
- Turbulent flow criterion for negligible initial boundary layer case, introducing corrections regarding Korst criterion as function of geometric and aerodynamic flow 10 p1799 A70-24128
- Pulsating flow mean total pressure measurement accuracy in high turbulence regions, discussing standing and traveling acoustic waves produced at measuring system entrance 10 p1867 A70-24160
- Low Mach number aerodynamic sound generation by turbulent flow at sharp edged thin scattering half plane solved with Green function 10 p1802 A70-24521
- Turbulent trailing vortex decay calculated from circumferential velocity and eddy viscosity dependent on Reynolds number 10 p1802 A70-24561
- Turbulent water flow velocity distribution measurement using laser light intensity fluctuation spectroscopy 10 p1869 A70-24600
- Turbulent flow downstream from abrupt widening of circular jet, using flow and momentum equations 10 p1870 A70-24782
- Turbulent flow generation by interacting principal stream with transverse jets, obtaining flow domains in test chamber of two dimensional wind tunnel 10 p1870 A70-24785
- Grid turbulence unified analysis, estimating turbulence intensity, dissipation length and integral scale for any grid flow 10 p1871 A70-24976
- Ultraclean technology to eliminate pollution traces present in laboratories, discussing turbulent flow and horizontal and vertical laminar flow rooms 10 p1828 A70-25240
- Turbulence model with level and scale functions for flows including homogeneous turbulence, logarithmic boundary layer, duct center flow, linear shear layer and viscous sublayer 11 p2035 A70-25685
- Fluid material line growth in grid-generated isotropic turbulent flow measured by tagging lines with hydrogen bubbles 11 p2035 A70-25843
- Three dimensional turbulent flow, using direct interaction approximation for growth and propagation of point-to-point velocity field deviations energy spectrum 11 p2036 A70-26013
- Turbulent flow detachment in incompressible fluid around thick bodies, considering plate perpendicular to wind 11 p2037 A70-26466
- Nonturbulent fluid entrainment into turbulent flow dependent on flow properties controlling energy balance 11 p2038 A70-26528

Nearly homogeneous turbulent shear flow for flow field structure, determining pressure/ velocity tensor using wind tunnel

11 p2039 A70-26530

Multipoint time correlations of longitudinal velocity fluctuations in grid-generated turbulence

11 p2039 A70-26532

Equilibrium properties of nearly normal turbulence assuming near-Gaussian nonlinear model equations and real turbulence

11 p2039 A70-26533

Time-convergent approximations to statistical turbulence functions constructed starting with functions expansion as Taylor series in time

11 p2074 A70-26534

Momentum transport bounds in turbulent shear flow using variational methods

11 p2039 A70-26535

Turbulent flow-Conference, Seattle, June 1969

11 p2039 A70-26536

Plane wave disturbances introduced in turbulent channel flow by vibrating ribbons near each wall, obtaining amplitude and relative phase

11 p2039 A70-26537

Two dimensional incompressible mixing layer investigated by constant temperature linearized hot wire anemometers, discussing turbulent/nonturbulent interfaces

11 p2040 A70-26540

Turbulence theory based on Wiener-Hermite expansion of velocity distribution to predict energy decay rate for Reynolds numbers greater than two

11 p2040 A70-26542

Turbulent three dimensional Poiseuille channel flow at large Reynolds numbers, investigating eddy shapes and energy balance

11 p2041 A70-26546

Turbulence of fluids and plasmas - Conference, New York, April 1968

11 p2093 A70-26751

Interaction between turbulent air flow and water surface based on Fourier analysis of finite intervals of field

11 p2042 A70-26775

Intermittency role in free turbulent flow and EM wave scattering by hypersonic wakes

11 p1978 A70-26776

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation

12 p2210 A70-27321

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

12 p2331 A70-27323

Time or space decay of turbulent parameters along flow direction in jets, wakes or grid-generated turbulence, illustrating time variation of wave number spectrum

12 p2211 A70-27831

Compressible turbulent plane Couette flow solution with variable heat transfer based on von Karman model extended to arbitrary wall temperature

12 p2211 A70-27839

Tube relaminarization, predicting turbulent-to-laminar flow transition

12 p2212 A70-28118

Incompressible fluid turbulent motion statistical equations, considering Lagrangian distributions of fluid particles coordinates and velocities

12 p2212 A70-28190

Turbulence energy balance equations for conducting fluid flow in longitudinal magnetic field with Joule dissipation

12 p2282 A70-28227

Turbulent diffusion coefficients and time dependent velocity pulsations in air flow, considering relation between Eulerian and Lagrangian turbulence characteristics

12 p2213 A70-28235

Suspended Stokes particle-single wave interaction effect on energy dissipation and vorticity of random turbulent incompressible fluid approximated by Fourier-Stieltjes integral

12 p2213 A70-28236

Turbulent flow of incompressible fluid, obtaining closed system of approximate equations for probability distribution of velocities

12 p2213 A70-28237

River bed channel flow instantaneous velocities described by logarithmic law, determining turbulent energy dissipation

12 p2265 A70-28336

Turbulent shear flow energy spectrum theory for unstratified fluid with arbitrary eddies-mean velocity gradient interaction

12 p2214 A70-28364

Turbulent base flowfields in multinozzle configurations, considering adiabatic flow and determining base pressure distribution from reverse jet impingement [AIAA PAPER 69-570]

13 p2338 A70-28511

Mathematical background for strong turbulence analysis in liquids and MHD

13 p2457 A70-28554

Graphite mass removal rates under ohmic heating in reacting gas turbulent flows

13 p2519 A70-28579

Turbulent base pressure on conical afterbodies in supersonic axisymmetric flow, including initial direction effect

[AIAA PAPER 70-555]

13 p2340 A70-29020

Turbulent shear flow direct interaction equations simplification to differential equations amenable to computation

13 p2389 A70-29463

Hydrodynamic forces by oscillating foils in ideal incompressible fluid turbulent flow with stream separation

13 p2390 A70-29649

Sting diameter and cylindrical protuberance length effects on axisymmetric body base pressure in turbulent supersonic flow

[AIAA PAPER 70-585]

13 p2342 A70-29885

Incompressible turbulent fluid flow through ducts and pipes by integral boundary layer techniques, considering entrainment principles

14 p2564 A70-30258

Two dimensional incompressible steady turbulent flows based on Prandtl hypothesis relating eddy viscosity to kinetic energy and scale

14 p2564 A70-30259

Radiation effects on heat transfer in turbulent channel flow for small optical depths and optically thin limit

14 p2665 A70-30548

Statistical transport, energy and chemical reaction rate in turbulent flow field with uniform velocity gradient, using Brownian motion theory

14 p2566 A70-31029

Turbulent chemical reactions invariance preservation for zero diffusivity

14 p2546 A70-31044

Boundary value problems and Cauchy problem considered for mathematical model of turbulent motion in liquid or gas

15 p2718 A70-31463

Strain rate tensor coincidence in Lagrangian and Eulerian descriptions of turbulence demonstrated for homogeneous flow of incompressible fluid

15 p2718 A70-31464

Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field

15 p2718 A70-31465

Homogeneous isotropic turbulence velocity field space-time variable correlation functions in fluid flow

15 p2719 A70-31487

Model for hydraulic resistance reduction for turbulent fluid flows by injecting suspended impurities

15 p2719 A70-31489

Turbulent flow theory of dilute linear polymer solutions in smooth and rough tubes based on Reynolds equation

15 p2719 A70-31491

Laminar to turbulent transitions determination in sub-/supersonic flows, reviewing methods based on hot-wire anemometer output signal [ONERA-TP-841]

15 p2720 A70-31918

Laminar to turbulent flow transition observation in laser induced vertical convection, using carbon dioxide-nitrogen laser

15 p2751 A70-31980

Annular turbulent flow between coaxial rotating cylinders, analyzing energy balance of averaged and pulsating motions

15 p2721 A70-32138

Laser velocimeter application to laminar-turbulent flow transition at glass tube centerline

15 p2741 A70-32521

Book on flow separation covering steady/unsteady, turbulent and incompressible flows, base pressure, thermal effects, etc

16 p2833 A70-32913

Ignition and combustion in ducted turbulent supersonic flow, discussing premixed and unpremixed ethylene

[AIAA PAPER 70-720]

16 p2997 A70-33488

Chemiluminescent processes accounting for radiation from turbulent wake flows behind hypersonic spheres in air

[AIAA PAPER 70-729]

16 p2997 A70-33492

Turbulent and reacting flows temperature and mixing rates determination, using gaseous HF tracer spectroscopy

[AIAA PAPER 70-726]

16 p2856 A70-33497

Diffusion flame development in homologous turbulent shear flow, investigating flame structure and chemical reaction by statistical theory

[AIAA PAPER 70-722]

16 p2997 A70-33499

Nuclear rocket nozzle cooling passages, discussing heat transfer and friction correlations for single-phase hydrogen turbulent flow

[AIAA PAPER 70-661]

16 p2950 A70-33622

Normalized Reynolds stress tensor in upstream region of fully developed turbulent shear flow as function of position, using inviscid linear model

[ASME PAPER 70-FE-2]

16 p2891 A70-33626

Laminar boundary layer model for viscous losses during transient turbulent liquid flow in tube, assuming slug flow for core

[ASME PAPER 70-FE-8]

16 p2891 A70-33627

Incompressible free jet characteristics determination from unique differential equation in laminar and turbulent flow regimes by unitary method

16 p2893 A70-33750

Incompressible viscous fluid divergent turbulent flow detection in conical tube of revolution based on measuring wall pressure differences along tube generatrix

16 p2894 A70-33849

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams

16 p2894 A70-33856

Transport and relaxation processes prediction for turbulent fluid, noting similarities to Fourier integral representation of flow field

16 p2895 A70-33969

Turbulent flows calculation based on two parameter turbulence model, considering model application to free jets

16 p2895 A70-34199

Turbulent flow in stratified fluids over flat plate, relating density profile curvature and heat transfer

16 p2895 A70-34242

Turbulent shear flow asymptotic theory, discussing channel, pipe and two dimensional boundary layers

16 p2895 A70-34244

Annoyance assessment for sonic boom series exposure near airport

16 p2843 A70-34325

Upper pulmonary airways plastic conduit model, measuring laminar and turbulent flow velocity profiles by hot-wire anemometer

17 p3035 A70-34469

Long chain molecule additive effect on drag reduction in turbulent flow of aqueous polymeric solutions

17 p3066 A70-34525

Absolute stability and turbulent transport upper bounds in Couette flow, using variational analysis

17 p3066 A70-34543

Atmospheric radon concentration ratios diurnal and vertical variations used for turbulent exchange and washout study

17 p3132 A70-34611

Model diffusion equation for inhomogeneous incompressible turbulent flow, applying to free turbulent flows

17 p3069 A70-34825

Temperature dependent absorption, nonsteady beam propagation and laminar-turbulent transition in laser induced convection column, measuring turbulence onset by fine wire resistance thermometer [AIAA PAPER 70-800]

17 p3107 A70-35197

Turbulent gas flows shear turbulence structure at various Reynolds numbers in nonconducting channels with and without heat transfer under transverse magnetic field

17 p3141 A70-35245

Micropolar fluids turbulent flow, investigating microstress couples, stability, inviscid flow, etc

17 p3071 A70-35435

Variational principle for turbulent shear flow between parallel plates, taking into account isothermal flow and Malkus theory

17 p3073 A70-35595

Turbulence theory from Liouville equation for Navier-Stokes velocity field distribution

17 p3073 A70-35629

Semiempirical theory of anisotropic turbulent transport, deriving closed system of flow equations

17 p3107 A70-35736

Fluid turbulence unified heuristic model, defining determinate solutions for Navier-Stokes equations numerical integration at high Reynolds numbers

17 p3074 A70-35884

Chemical kinetics effect on combustion rates of fuel plate in turbulent oxidizer flow, deriving conservation equations in boundary layer and diffusion equation

18 p3346 A70-36245

Turbulent velocity pulsations characteristics determination by diffusion measurements

18 p3240 A70-36265

Turbulent shear flow velocity and kinetic energy distributions in tunnel

18 p3241 A70-36383

Turbulent air flow in vertical square duct, investigating local heat transfer and friction coefficients

18 p3347 A70-36506

Turbulent flows shadowgraph analysis, solving electromagnetic equations for optical response

18 p3242 A70-36692

Flame propagation velocity of gasoline-air mixture during two stage combustion process in laminar and turbulent flows, discussing combustion products effect

19 p3550 A70-37253

Turbulent velocity correlation function computation in Burger fluid model, using functional integral expression

19 p3403 A70-37530

- Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects [ASME PAPER 69-LUB-25] 19 p3435 A70-37611
- Inertia forces effect in turbulent and laminar, self acting and infinitely long film bearings, considering compressible and incompressible lubricants [ASME PAPER 69-LUB-2] 19 p3435 A70-37613
- Eringen theory of micropolar fluids for hydrodynamic turbulence 19 p3404 A70-37783
- Turbulent flow phase velocity fluctuations measurement by hot-wire anemometers, obtaining cross-spectral density by Fourier analysis digital techniques 19 p3404 A70-38019
- Energy spectrum function for Gaussian initial velocity field of inviscid turbulence Burger model, using Cameron-Martin-Wiener exact expansion 20 p3609 A70-39653
- Steady turbulent flow heat exchange in near wall region at large Prandtl numbers, plotting temperature distribution curves 20 p3612 A70-39811
- Turbulent shear stress correlation with turbulent kinetic energy for wake and circular jet flow conditions 20 p3613 A70-40277
- Longitudinal averaged and pulsating turbulent flow velocities in rectangular channel with one-sided air injection through porous wall 20 p3614 A70-40346
- Neutron star superfluid turbulent state, applying dynamic model to conditions in pulsars 20 p3713 A70-40429
- Wall jet turbulent flow regions with shear stress and mean velocity gradient of opposite sign, considering theoretical explanation 20 p3615 A70-40501
- Turbulent flow asymmetrical mechanics equations derivation from conservation laws, discussing Navier-Stokes equation, angular momentum and transport theory 21 p3806 A70-40612
- Transport model for flow field and convective heat transfer in planar turbulent supersonic base flow 21 p3744 A70-41030
- Flow field, heat transfer rates and reattachment surface wall temperature of planar supersonic turbulent flow 21 p3744 A70-41036
- Turbulent density fluctuations statistical properties analysis by cross correlation technique with schlieren instruments 21 p3807 A70-41242
- Unsteady convective heat transfer and hydrodynamics of laminar and turbulent channel flows 21 p3808 A70-41374
- Heat transfer and skin friction in quasi-steady axisymmetric turbulent pipe flow of incompressible fluid with variable physical properties 21 p3808 A70-41375
- Constant temperature linearized hot-wire anemometer for low velocity high turbulence flow 21 p3827 A70-41455
- Turbulence measurements in ducted coaxial air flow with faster outer stream pertinent to gas core nuclear rocket feasibility 21 p3809 A70-41748
- Interactions between components of turbulent flow velocity correlation tensor due to pressure fluctuations 21 p3810 A70-41956
- Vibrational response of thin walled pipes to internal turbulent water flow as function of Strouhal number 21 p3940 A70-42052
- Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation 21 p3810 A70-42062
- Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter 21 p3952 A70-42064
- Closing method for turbulence equations of velocity field quantities joint probability distributions 21 p3811 A70-42075
- Mass flow rate correlation for nonsteady convective heat transfer in thin walled tubes with turbulent air flow 21 p3953 A70-42087
- Turbulent air flow measurements through heated pipe, determining local heat flux from simultaneous velocity and temperature fluctuation 21 p3811 A70-42091
- Turbulent flow velocity profile in constant transverse magnetic field, determining resistance coefficient 21 p3861 A70-42235
- Newtonian fluid turbulent flow development characteristics in inlet region of smooth concentric annulus from momentum integral equations 22 p3957 A70-42304
- Downstream heat transfer and wall friction predictions for quasi-developed strongly heated turbulent pipe flow, using mixing length model [ASME PAPER 70-HT-8] 22 p4008 A70-42439
- Incompressible fluid turbulent motion statistical equations, considering Lagrangian distributions of fluid particles coordinates and velocities 22 p4012 A70-43315
- Flowing medium turbulent velocity measurement using laser Doppler device 22 p4040 A70-43615
- Aerodynamic noise scattering by semifinite compliant plate in turbulent flow, using Lighthill theory and Wiener-Hopf technique 23 p4179 A70-43968
- Sunyach-Mathieu intermittence measuring method applied to turbulent flow boundary studies, discussing flow transition line definition 23 p4180 A70-44201
- Turbulent nonadiabatic flow of compressible gas at inlet and main sections of variable cross section plane channel 23 p4183 A70-44739
- Reynolds stress measurement, using laser flowmeter with cylindrical lenses and square aperture mask 23 p4202 A70-44945
- Velocity profile in viscous sublayer at wall based on maximum stability principle applied to Karman constant for turbulent channel flow 24 p4325 A70-45495
- Turbulent flow mechanics heuristic exposition, discussing random processes, instability, nonlinear interactions, energy exchange, intermittency dependence on Reynolds number, fluid properties and boundary conditions effects, etc 24 p4326 A70-45948
- Heat flux exchange by natural convection along flat vertical isothermal plate in laminar, transition and turbulent flows, using fluxmeters 24 p4429 A70-46207
- Pulsation and turbulence damping in pulsed jet from energy spectra of longitudinal velocity fluctuations 24 p4327 A70-46267
- TURBULENT HEAT TRANSFER**
- Turbulent heat transfer on heated horizontal circular cylinder rotating freely in space, discussing dimensionless numbers relations and frictional heating 01 p0215 A70-10926
- Turbulent fluctuation rates of temperature and velocity on basis of measurements in boundary layer with wall heat transfer 03 p0470 A70-14237
- HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe 07 p1348 A70-19551
- Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum 07 p1349 A70-19552
- Tropospheric and stratospheric turbulent horizontal heat and momentum transfer spectral density profiles calculations from radio launchings data 07 p1269 A70-19646
- Thermal entrance region effect on Nusselt number determination in asymmetrically heated rectangular duct with uniform heat flux 07 p1425 A70-20223
- Damped turbulent whirling tube flow friction characteristics and heat exchange, solving equation of maximum tangential flow rate 07 p1261 A70-20464
- Monograph on convective heat flow in stagnation points of turbulent partly premixed free jet flames at cooled plates 08 p1598 A70-21343
- Gas flow in pipe with uniform wall heat flux, analyzing turbulent heat transfer using heat balance equation [ASME PAPER 69-HT-H] 08 p1486 A70-21834
- Turbulent heat transfer in boundary layer at inlet of porous tube under nonisothermal conditions, studying velocity variations 09 p1787 A70-22169
- Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law 09 p1789 A70-23169
- Eddy penetration model for heat transfer from trailing face of cylinder in transverse flow 09 p1791 A70-23566
- Turbulent gas nonresonant pressure pulsations effects on local convective heat transfer in tube flow 10 p1968 A70-24288
- Energy equations solved for step change of wall temperature and heat flux, determining turbulent heat transfer in tube, discussing asymptotic solutions validity 11 p2146 A70-25334
- Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers 12 p2210 A70-27322
- Turbulent and laminar heat transfer to gases in circular ducts entry region, considering various gas properties 12 p2212 A70-28114
- Turbulent heat transfer in concentric annuli entrance region with uniform wall heat flux 12 p2333 A70-28117
- Temperature-dependent physical properties effects on turbulent heat transfer, determining corrective factor for semiempirical equations 13 p2520 A70-28847
- HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe 15 p2777 A70-31458
- Ionic noise during plasma turbulent heating in toroidal facility, discussing oscillation spectrum 15 p2777 A70-31459
- Laminar boundary conditions for heat transfer in gradient flow region for plane turbulent jet impingement on plate normal to flow 15 p2721 A70-32134
- Temperature and Mach number distributions measurements on supersonic turbulent boundary layers for reanalyzing heat transport [AIAA PAPER 70-744] 17 p3066 A70-34499
- Roughness effects on heat transfer to surfaces in supersonic compressible turbulent boundary layer [AIAA PAPER 70-742] 17 p3066 A70-34505
- Turbulent gas flows shear turbulence structure at various Reynolds numbers in nonconducting channels with and without heat transfer under transverse magnetic field 17 p3141 A70-35245
- Heat transfer and friction drag calculation for turbulent boundary layer of gas with temperature dependent physical properties 17 p3012 A70-35729
- Heat and gas curtain efficiency in turbulent boundary layer on flat plate, including heat transfer data 17 p3198 A70-35731
- Two dimensional turbulent film cooling, predicting initial region temperature distribution by solving finite difference form of thermal energy equation 18 p3346 A70-36497
- Turbulent air flow in vertical square duct, investigating local heat transfer and friction coefficients 18 p3347 A70-36506
- Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law 19 p3552 A70-38392
- Liquid He 4.2 K in narrow channels with laminar and turbulent flow, measuring boiling heat transfer as function of temperature difference 20 p3735 A70-39155
- Steady turbulent flow heat exchange in near wall region at large Prandtl numbers, plotting temperature distribution curves 20 p3612 A70-39811
- Turbulent jet system with previously unmixed chemically active gases, calculating heat and mass transfers during diffusion combustion 20 p3737 A70-39813
- Heat transfer in cooled turbulent tube flow downstream region at high bulk-to-wall temperature ratios 21 p3945 A70-41037
- Turbulent plasma heating by adiabatic magnetic compression with longitudinal ring current 21 p3857 A70-41387
- Stochastic kinetic theory for plasma turbulent heating by random fields, predicting acceleration effects 21 p3859 A70-41899
- Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers 21 p3811 A70-42063
- Turbulent heat/mass transfer from solid boundary with shear stress dependent on wall distance for various Schmidt or Prandtl numbers 21 p3953 A70-42088
- Heat transfer from turbulent axisymmetric jet to normal flat wall at critical point with small Reynolds numbers 23 p4181 A70-44321
- Lifting entry vehicles turbulent boundary layer aerodynamic heating, comparing heat transfer prediction methods 23 p4258 A70-44530
- Heat transfer from turbulent boundary layer interacting with shock and expansion waves in supersonic flow 23 p4134 A70-44573
- Turbulent heat exchange coefficient and Prandtl number in turbulent air flow through heated pipe with constant heat flux 23 p4183 A70-44740
- TURBULENT JETS**
- Turbulence intensity and fluctuation rates in isothermal swirling free jets, using constant temperature hot wire anemometer method 01 p0059 A70-10031
- Axisymmetric turbulent incompressible and isothermal self preserving jet investigation using linearized constant temperature hot-wire anemometers 01 p0065 A70-11099

Pressure gradient required for self preserving of turbulent jets and wakes with small mean velocity variations compared with free stream velocity

02 p0223 A70-11860

Growth rate and shear stress parameter of symmetric, turbulent, two dimensional and axisymmetric self preserving wakes and jets in streaming flow

02 p0223 A70-11861

Turbulence detection and velocity fluctuations in jets and flames based on equations of motion and impact probes

02 p0398 A70-12037

Boundary layer calculation for semiinfinite plane turbulent jet on porous wall

02 p0287 A70-12691

Turbulent and wall jets with wide varieties of geometries and boundary conditions, predicting jet inflow effects on entrainment rate, lift, drag, etc

02 p0288 A70-12840

Boundary layer equations describing flow field in turbulent swirling jet diffusion flame solved in von Mises plane

03 p0603 A70-12911

Pulsation energy distribution in free turbulent incompressible jets, noting role of mean velocity distribution

03 p0466 A70-13384

Flow parameters of two interacting submerged turbulent jets from rectangular nozzles, determining total pressure profiles of coincident flow

03 p0466 A70-13504

Turbulent submerged plasma jet boundaries calculated theoretically and compared with experimental results from dynamic head profiles

03 p0532 A70-13515

Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses

03 p0409 A70-13871

Propagation of turbulent jet impinging on flat surface at certain incidence angle analyzed for application to V/STOL aircraft, ventilation equipment, etc

03 p0468 A70-13878

Similarity of velocity profiles and pressure distribution of turbulent jet over inclined wall, indicating limitations of Glauert analysis [ASME PAPER 69-WA/FLCS-1]

04 p0668 A70-14849

Sound vibrations effect on pulsation characteristics of turbulent gas jet

04 p0618 A70-15248

Transverse and longitudinal correlation coefficients of electron density fluctuations in turbulent jet related through equation specifying velocity fluctuations isotropy

04 p0674 A70-15551

Free plane turbulent jet virtual origin using tests determining influence of upstream conditions and nozzle shape

04 p0674 A70-15554

Curvature effects on two dimensional turbulent wall jet flow over plane surface and circular convex and concave surfaces in still air

05 p0832 A70-16118

Hot wire turbulence measurements of cylindrical wall jet compared to results from free circular and plane wall jets

06 p1034 A70-17526

Cold ducted supersonic flow of premixed ethylene and air ignition by hot turbulent jet [AIAA PAPER 70-148]

06 p1131 A70-18057

Time mean flow property measurements for homogeneous and nonhomogeneous free turbulent jets

06 p1041 A70-18159

Circular turbulent air jet from flat plate into deflecting stream using potential flow model, noting applicability to V/STOL aircraft technology [AIAA PAPER 69-223]

07 p1190 A70-20406

Heat exchange at stagnation point of subsonic and supersonic axisymmetric jets interacting with perpendicular plane partition, allowing for turbulence

08 p1482 A70-20919

De Laval nozzle behavior in vacuo, discussing flow rate parameters, viscosity and real gas effects, thermal effects, turbulent jet separation and reattachment, etc [AGARDOGRAPH-120]

08 p1434 A70-21932

Axisymmetric swirling jet ejection from semiinfinite tube into free space filled by fluid, solving flow equation by Wiener-Hopf method

09 p1658 A70-22153

Turbulent jet injection from circular opening into unbounded transverse shear flow, determining velocity distribution along axis

09 p1659 A70-22427

Turbulent three dimensional incompressible wall jets issuing into quiescent air ambient, tangent to and at surface of flat plate, investigating shear stress and flow field

09 p1661 A70-23215

Velocity and friction stress profiles of semibounded plane turbulent jets discharging from finite slit along smooth plate into moving medium

09 p1663 A70-23617

Suction force increase resulting from turbulent jet interaction with transverse flow

10 p1868 A70-24166

Time or space decay of turbulent parameters along flow direction in jets, wakes or grid-generated turbulence, illustrating time variation of wave number spectrum

12 p2211 A70-27831

Coaxially flowing jets axisymmetric turbulent mixing between inner and outer streams

12 p2211 A70-27837

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities

12 p2213 A70-28218

Heat transfer increase near stagnation point for turbulent jet impinging on paraffin coated plates used for flow visualization

13 p2521 A70-28866

Plane turbulent wall jet from small slot, investigating velocity distribution dependence on slot inclination

13 p2388 A70-29448

VTOL aircraft multiple and nonuniform jets aerodynamics, considering induced field and secondary flows

14 p2528 A70-30851

Radial static pressure distribution of turbulent jet flow over rotating cylinder with constant curvature

14 p2567 A70-31399

Plane turbulent impinging jet by iterative finite difference technique, assuming eddy viscosity dependence on energy fluctuations and turbulence length scale [ASME PAPER 70-FE-27]

16 p2835 A70-33634

Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures

16 p2998 A70-33860

Plane turbulent jet expansion from linear wedge apex, allowing for ejected air axial velocity attenuation and static pressure variation

17 p3011 A70-35349

Velocity fluctuations in temperature gradient turbulent jets and in turbulent flames, using hot wire in cooled pitot tube

17 p3096 A70-35749

Viscosity effect on turbulent supersonic underexpanded jet flow into submerged region

18 p3206 A70-36262

Free turbulent incompressible jet, analyzing pulsating characteristics and energy balance with Reynolds stress equations

18 p3240 A70-36264

Flame stabilization in boundary layer during mixing of cold homogeneous fuel mixture and hot gas based on combustion and turbulent jet theories

20 p3736 A70-39267

Turbulent jet system with previously unmixed chemically active gases, calculating heat and mass transfers during diffusion combustion

20 p3737 A70-39813

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities

20 p3612 A70-40091

Laminar incompressible free shear layers by method of weighted residuals for turbulent jets, obtaining velocity profiles for similarity and physical planes

20 p3613 A70-40286

Thermal boundary layer theory for turbulent jets of incompressible fluids from relationship between velocity fluctuations and temperature

20 p3614 A70-40347

Flow structure in plane submerged turbulent jet, determining velocity, friction stress and correlation coefficients distributions

21 p3749 A70-42221

LF acoustic disturbances effect on root portion of turbulent jet from conical nozzle

21 p3954 A70-42223

Turbulent incompressible conducting fluid jets velocity and temperature characteristics in presence of longitudinal and transverse magnetic fields

21 p3860 A70-42226

Liquid metal turbulent jet flow dependence on longitudinal magnetic field, measuring mean velocity profiles at various cross sections

21 p3861 A70-42230

Two dimensional peripheral turbulent jet curtain structure, determining curved and impinging jet flow field by pressure and velocity measurements

22 p3957 A70-42277

Monochromatic acoustic wave interaction with turbulent jet fluctuating vorticity field, using Fourier analysis to extend spectral relations [ASME PAPER 70-FLCS-6]

22 p4008 A70-42426

Aircraft noise sources, examining compressors with dynamic pressure devices and jets with turbulence investigations [ICAS PAPER 70-22]

23 p4232 A70-44111

TURBULENT MIXING

Gas-particle primary and pure gas secondary streams turbulent mixing, solving for various mixing zone flow field parameters

01 p0061 A70-10337

Pitot tube measurements of mixing zone of turbulent shear flow, discussing velocity gradient effects

01 p0066 A70-11134

Mixing length relationship in Prandtl theory for turbulent channel and pipe flow, deriving universal velocity distribution law

02 p0277 A70-11911

Turbulent mixing and supersonic combustion theories applied to internal flow, comparing various mixers and relating mixing intensity to kinetic energy of turbulence

02 p0399 A70-12045

Mixing length theory improvement to calculate turbulent boundary layers based on velocity profiles

02 p0284 A70-12342

Constitutive equations for Reynolds fluxes in large scale transversely isotropic turbulent mixing using gradients of mean quantities

05 p0836 A70-17103

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system [AIAA PAPER 69-85]

06 p1130 A70-17171

Cone bluntness effect on merging onset and downstream flow in merged region at Mach 8 and various Reynolds numbers

06 p0980 A70-18352

Potential refractive index mean vertical gradients role in turbulent mixing, noting applications to radar detection of CAT

09 p1716 A70-22365

Two dimensional incompressible mixing layer investigated by constant temperature linearized hot wire anemometers, discussing turbulent/nonturbulent interfaces

11 p2040 A70-26540

Coaxially flowing jets axisymmetric turbulent mixing between inner and outer streams

12 p2211 A70-27837

Homogeneous and stationary turbulence in incompressible fluid, proposing dynamic model for strong wave interactions during cascade process

13 p2457 A70-28557

Turbulent mixing at contact surface in driven shock wave in shock tube with bursting diaphragm for He-Ar test gas mixtures

14 p2566 A70-31030

Shear flow turbulence effect on chemical reactions, considering two dimensional low speed turbulent mixing layer between high velocity cold gas and air at rest [AIAA PAPER 70-721]

16 p2855 A70-33493

Turbulent and reacting flows temperature and mixing rates determination, using gaseous HF tracer spectroscopy [AIAA PAPER 70-726]

16 p2856 A70-33497

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams

16 p2894 A70-33856

Chemical kinetic and turbulent transport coefficients effects on afterburning rocket exhaust plumes and sea level transverse radar attenuations [AIAA PAPER 70-733]

17 p3194 A70-34513

Turbulent mixing of axisymmetrical supersonic air jet into hot air, investigating Mach number and temperature difference effects on axial decay of velocity

17 p3072 A70-35546

Base flow component of total drag for axisymmetric supersonic afterbody with single exhaust jet, considering turbulent mixing

17 p3011 A70-35656

High speed combustion chambers for gas turbine applications, using finite rate chemistry and turbulent mixing computer program for burner design [ASME PAPER 70-GT-25]

18 p3304 A70-36866

Turbulent mixing in supersonic cone near wake, using laser planogram technique for flow visualization

19 p3351 A70-37529

Probability densities and distributions, moments and spectra from time derivatives of streamwise velocity fluctuation in curved mixing layer, measuring small scale turbulence structure

20 p3609 A70-39652

Turbulent mixing effect on vertical distribution of ionosphere atomic and molecular oxygen, using equations of motion and continuity

21 p3813 A70-40907

Interaction zone between gas flow and injected air jets, measuring turbulence characteristics by thermocouple

21 p3809 A70-41773

Computerized integral treatment of turbulent constant pressure mixing of two dimensional gas jet with atmosphere having different temperature and composition

22 p4011 A70-42755

TURBULENT WAKES
NT SLIPSTREAMS

- Vortex street parameters in free wake behind body in plane fluid flow, deriving equations for vortex frequency, circulation and interspacing
01 p0060 A70-10146
- Pressure gradient required for self preserving of turbulent jets and wakes with small mean velocity variations compared with free stream velocity
02 p0223 A70-11860
- Growth rate and shear stress parameter of symmetric, turbulent, two dimensional and axisymmetric self preserving wakes and jets in streaming flow
02 p0223 A70-11861
- Gram-Charlier method generalization for curve fitting analytic forms to velocity covariances measured in turbulent wake of circular cylinder
03 p0480 A70-12950
- Power spectrum of backscattered radiation from turbulent reentry wake illuminated by radar pulse train, discussing electron density decay and pulse shape effects
03 p0408 A70-13585
- Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses
03 p0409 A70-13871
- Hypersonic near wake, discussing correlations from optical studies, laminar near wake, blunt body and turbulent wake measurements
05 p0790 A70-16120
- Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity
05 p0915 A70-16754
- Two dimensional supersonic turbulent near wake saddle point singularity during recompression analyzed by including transverse momentum integral equation
[AIAA PAPER 70-228] 06 p1039 A70-18106
- Turbulent wake behind plate due to confluence of two incompressible fluids with different densities
07 p1261 A70-20463
- Relaxational oscillations produced by interaction between rarefaction wave in external two dimensional supersonic flow and turbulent near wake
09 p1603 A70-22426
- Turbulent flames bluff-body stabilization model, measuring recirculation zone concentrations and temperatures for methane and propane-air mixtures
10 p1967 A70-24092
- Regional growth functions of turbulent wakes at small Mach numbers using regression equations
11 p1976 A70-25998
- Turbulent ionized wakes Doppler radar scattering spectrum parameters in terms of wake characteristics using double convolution integral
11 p2010 A70-26271
- Turbulent reacting wakes properties prediction models validity, discussing Lagrangian formulations and eddy diffusivity and mixing models
11 p1978 A70-26772
- Gas and electron density fluctuations in weakly ionized turbulent wake behind hypersonic spheres and cones
11 p1978 A70-26773
- Turbulent wakes in Canadian Armament Research and Development Establishment free flight ranges measured for mean and fluctuating properties
11 p1978 A70-26774
- Time or space decay of turbulent parameters along flow direction in jets, wakes or grid-generated turbulence, illustrating time variation of wave number spectrum
12 p2211 A70-27831
- Turbulent wakes density fluctuations measurement using pulsed laser holographic interferometry in ballistic range
[AIAA PAPER 70-727] 16 p2834 A70-33494
- Flow structure in wake of blunt bodies placed perpendicular in parallel airstream determined from hot-wire anemometry
[AIAA PAPER 69-746] 16 p2838 A70-33876
- Sound wave phase fluctuations from ultrasonic waves traveling through turbulent wakes of circular cylinders and plates, using multichannel pulse height analysis
16 p2839 A70-34086
- Blunt based right circular cylindrical body at subsonic speed, investigating turbulent near wake in wind tunnel
17 p3006 A70-34463
- Turbulent energy distribution in plane wake in incompressible fluid, using pulsational energy balance equation
17 p3011 A70-35348
- Ionospheric plasma disturbances due to moving space vehicle, investigating by electron density measurements in rarefied wake regions using gyro-plasma probe
17 p3142 A70-35763
- Shock wave attenuation and reflection effects on turbulent hypersonic wakes in ballistic ranges
18 p3237 A70-36708
- Turbulence in supersonic wake behind flat plate at zero incidence and heat transfer rate, using hot-wire anemometer
19 p3403 A70-37528
- Turbulent wake behind plate due to confluence of two incompressible fluids with different densities
20 p3557 A70-39263
- Turbulent near wake of symmetrical airfoil, determining universal constant in mixing length formula for inner wake
20 p3559 A70-40276
- Turbulent shear stress correlation with turbulent kinetic energy for wake and circular jet flow conditions
20 p3613 A70-40277
- Hypersonic sphere turbulent wake velocity measurement by spark technique, determining distribution from least mean squares fits of Gaussian curves
20 p3559 A70-40283
- Turbulent energy balance and spectra of axisymmetric wake behind sphere in incompressible fluid, measuring flow velocity
21 p3745 A70-41376
- Radar backscattering from turbulent rocket exhaust plumes
[AIAA PAPER 69-71] 21 p3791 A70-41730
- Hypersonic projectile turbulent wake measurements, discussing velocity, mass density and temperature determination
[ICAS PAPER 70-07] 23 p4132 A70-44130
- Chemical reaction product fluctuations in reacting and nonreacting turbulent wake of sphere in water tunnel detected by injected salts conductimetric titration
[AIAA PAPER 68-686] 23 p4134 A70-44570
- Two dimensional turbulent wake theory, considering shear stress and velocity distribution behind flat plate and circular cylinder
23 p4134 A70-44575
- TURING MACHINES**
Permanent memory faults effects on sequential machines finite-state behavior, considering masking role in synthesis of fault-tolerant sequential networks
11 p2072 A70-26220
- TURNING FLIGHT**
Sonic boom pressure signatures for uniform and maneuvering flight conditions determined for fighter and SST aircraft
[AIAA PAPER 69-1134] 01 p0005 A70-10606
- Banked position and angle of attack changes in fighter aircraft sighting and attacking target, determining spatial zone of possible attack
02 p0227 A70-12406
- Asymptotic expansions and energy methods applied to three dimensional aircraft maneuvers involving energy climbs and turns
07 p1190 A70-20416
- Oculogyrall illusion provoked by angular accelerations during flying stationary and spiral turns in jet aircraft, considering semicircular canals stimulation
11 p1992 A70-26512
- Tactical fighter requirements and designs, considering operational environment and weapon characteristics with emphasis on turning performance
[AIAA PAPER 70-516] 13 p2346 A70-29035
- Supersonic aircraft stability and controllability during turns about longitudinal and vertical axes
16 p2840 A70-33204
- Single and coaxial dual rotor helicopter piloting characteristics during turning flight, discussing operational problems in snow
22 p3962 A70-43530
- TURTLES**
H ion increased activity effect on sodium transport across short circuited turtle bladder
02 p0234 A70-11730
- ADP-ATP catalyzed exchange reaction in turtle bladder microsomes, using chromatographic measurements of conversion rates
17 p3034 A70-35900
- Turtle bladder walls osmotic properties, discussing transrenal water flow transient acceleration by sodium transport inhibition
21 p3762 A70-41223
- Turtle bladders isolated mucosal and serosal fractions histological and physiological properties, discussing ion transport and oxygen consumption
21 p3762 A70-41224
- TVC [CONTROL]**
U THRUST VECTOR CONTROL
- TWENTY-FOUR HOUR ORBITS**
Low altitude 24-hr orbit twin satellite system joined by long light cord, assessing communications efficiency and physical limitations
03 p0579 A70-13621
- Orbit determination program for launching and stationkeeping of 24 hr geostationary satellites, using azimuth and elevation of single autotrack antenna
03 p0578 A70-14339
- Orbit mechanical investigations for increasing Europa 2 booster rocket payload to place German-French communications satellite Symphonie into 24 hr orbit
04 p0754 A70-13153
- Navigation systems using 24-hour orbit satellites, discussing system concept options for U.S., Western Hemisphere and global coverage
12 p2270 A70-27924
- Low thrust station keeping guidance scheme for gravity gradient stabilized 24-hour satellite, solving equations of motion for near circular equatorial orbit
18 p3289 A70-36676
- TWENTY-SEVEN DAY VARIATION**
Upper atmosphere temperature lag behind solar decimeter flux 27 day variation maximum attributed to varying solar EUV heating
01 p0070 A70-10404
- Solar magnetic discontinuity fluxes analyzed by studying 27-day cosmic ray and geomagnetic activity variations using linear filtration method
05 p0900 A70-15969
- IQSY 27-day recurrence sequence for 1964 solar and terrestrial activity, considering geomagnetic, auroral and ionospheric disturbances correlation with plage
05 p0841 A70-16646
- 27-day variations in ionization layer created by galactic cosmic rays, discussing association with 27-day cosmic ray and geomagnetic field variations
07 p1373 A70-20345
- Cosmic ray intensity variation correlated with amplitude changes in 27 day variation during solar cycle 18
09 p1745 A70-22740
- Daily horizontal intensity spectrum for equatorial observatories, computing power densities near 27 day variation during high, moderate and low solar activity
10 p1875 A70-24440
- Exospheric density from Echo 2 orbit, observing 27 day variations associated with sun rotation and correlation with geomagnetic disturbances
11 p2046 A70-26566
- Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles
14 p2571 A70-30240
- Cosmic ray anisotropy 27 day and seasonal variations, considering neutron component data and sunspot magnetic field strength
20 p3696 A70-39277
- Cosmic ray 27 day variations during solar activity minimum, noting unipolar magnetic regions role
20 p3696 A70-39280
- Soviet book on geomagnetic storms 27-day recurrence as function of intensity and onset characteristics, establishing forecasting indices
20 p3623 A70-39897
- Interplanetary magnetic field and plasma structure observed with Mariners magnetometer, noting 27-day deviations from Parker spiral model
23 p4239 A70-43827
- Solar corpuscular flux and visible solar spot area correlation with geomagnetic planetary index for 27-day intervals, considering relationship to earth satellites motion
24 p4408 A70-45547
- Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles
24 p4332 A70-46315
- TWILIGHT**
U TWILIGHT GLOW
- TWILIGHT GLOW**
Twilight and nightglow measurements with stratospheric balloons, discussing use for upper atmosphere exploration, meteoric influence and French network
01 p0079 A70-11217
- Twilight brightness measurements with balloons, scattering coefficient and indicatrix for high altitudes and comparison with Rayleigh-Cabann theory
01 p0079 A70-11218
- Twilight sky polarization data in visible spectrum obtained by high altitude balloon-borne photoelectric photometers
01 p0079 A70-11219
- Antarctic twilight observation by photoelectric scanning spectrometer in search for metallic emission lines in upper atmosphere
01 p0081 A70-11231
- Atmospheric penetration of UV and visible solar radiation during twilight, oxygen and ozone absorption, Rayleigh scattering and atmosphere refraction
02 p0357 A70-12155
- Antarctic twilight Na emission abundance and concentration in lower E region, discussing meteor ablation models
05 p0836 A70-15819
- Airglow and skylight polarization measurements at twilight compared for possible relationship
05 p0837 A70-15927
- Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres
06 p1053 A70-17207
- D region electron density distribution during night and presunrise period, using full wave integration method for propagation parameters for waves reflected from electron density model
06 p1054 A70-17587

- Twilight atmospheric brightness calculation for models of vertical distribution of aerosol scattering coefficient, using numerical data
06 p1056 A70-17828
- Light intensity and polarization in twilight sky atmosphere at solar depressions
07 p1263 A70-19047
- Atmospheric ray paths calculations applied to determination of optical air mass and twilight ray paths in earth atmosphere
10 p1873 A70-23830
- Neutral atomic oxygen auroral and nebular emissions in twilight airglow, suggesting photodissociation of molecules by sunlight
10 p1873 A70-23832
- Spectral, angular and spatial evolution of earth twilight aureole brightness pattern from visual observation and spectrophotometry on Soyuz 5 spacecraft
10 p1873 A70-24270
- Atmospheric sodium concentration in twilight and daytime sky from D1 and D2 line intensities in twilight
13 p2399 A70-29239
- Balloon-borne photometer for collecting twilight and daytime OH intensity and rotational temperature variations data
13 p2399 A70-29240
- Red twilight emission enhancements origin, concerning atomic lithium release effect in upper atmosphere
14 p2580 A70-31264
- Twilight sky color visual estimation from Soyuz 5 spacecraft noting cloudiness effects
15 p2723 A70-31597
- Spectrophotometric and visual observations of twilight glow from Soyuz 5, comparing vertical monochromatic brightness profiles with calculations for Elterman aerosol model
16 p2896 A70-33218
- Twilight colorimetry from horizon spectra obtained by Soyuz 5, computing chromaticity coefficients for purely scattering molecular atmosphere
16 p2896 A70-33260
- Twilight sky brightness measurements at 5200 Å for estimating upper atmospheric dust component, discussing error rates
16 p2899 A70-34184
- Upper atmosphere temperatures from vapor cloud diffusion, eliminating errors from bright sky background at twilight
17 p3076 A70-34940
- Direction and time variations of O I 4368 Å emission following evening twilight
18 p3245 A70-36026
- Evening twilight airglow oxygen IR band ground based observation by two-channel photometric technique
19 p3415 A70-38385
- Light polarization during twilight at zenith from photoelectric recordings, noting intensity decrease with altitude
19 p3417 A70-38770
- Winter pre dawn enhancement of 6300 Å airglow at higher midlatitudes, considering roles of oxygen dissociative recombination and photoelectrons production at magnetically conjugate point
22 p4019 A70-43110
- Spectrophotometric and visual observations of twilight glow from Soyuz 5, comparing vertical monochromatic brightness profiles with calculations for Elterman aerosol model
24 p4328 A70-45193
- TWINNING**
- NT MECHANICAL TWINNING**
- Transmission electron microscope study of deformation mode during rapid tensile testing of Ni-base superalloy, discussing twinning and stacking fault modes
01 p0118 A70-10705
- Elastic interactions between anisotropic crystal dislocations and twin and grain boundaries in Ti
17 p3115 A70-34386
- Crystallography of deformation twinning in Ti, presenting modes involving shear strains less than unity and simple shuffle mechanisms
17 p3116 A70-34388
- Unalloyed polycrystalline Ti fatigue tests, observing cyclic stresses effect on twinning
17 p3116 A70-34393
- Alpha Ti and alpha Ti-hydrogen alloys fatigue behavior, emphasizing twin formation influence and hydrogen effects
17 p3116 A70-34394
- Pure Ni recrystallization, noting stacking faults and parallel sided and thin annealed twins formation during boundary migration
24 p4363 A70-46192
- TWISTED WINGS**
- Camber and twist distributions for closed ground effect wing optimum design for zero induced drag, employing linearized theory
10 p1801 A70-24158
- Dual controlled elastically twisting rotor blade performance during flight with azimuthal and collective variations compared to direct control rotor
13 p2345 A70-29012

Wing camber and twist effects on transonic drag, using wind tunnel measurements
16 p2840 A70-34321

TWISTING

- Axial flow turbine stator and impeller blade twist calculated from gas flow stage area diameter using continuity and vorticity equations
01 p0001 A70-10175
- Elastic bending of pretwisted elliptical bars, showing stiffness response
02 p0387 A70-12216
- Structural characteristics of supersonic twisting underexpanded air jet, using filming and schlieren photography
04 p0618 A70-15246
- Modulus of rigidity and stress-strain state measured in square plate during shear produced by twisting
06 p1060 A70-17132
- Turbine rotor and stator blades twist inaccuracies in assembly due to shroud induced stresses and blade root mountings clearances
07 p1291 A70-18827
- Composite spherically aeolotropic sphere with isotropic core, analyzing stress concentration during twisting
12 p2327 A70-27836
- Open cross section thin walled prismatic beam twisting and bending based on virtual displacements
13 p2511 A70-28744
- Axisymmetric nonuniform initial thickness disk under pressure and twisting along interior surface of circular hole using incremental theory of plasticity for deformation analysis
15 p2816 A70-32004
- Internal efficiency of turbine stages with long twist-varying blades
19 p3490 A70-37250

TWITCHING

- Local contractures in K depolarized amphibian skeletal muscle fibers by intracellular injection or by microperfusion, discussing intracellular Ca ion concentration
02 p0234 A70-11728

TWO BODY ORBITS**U TWO BODY PROBLEM****TWO BODY PROBLEM**

- Two spheres moving in ideal incompressible fluid, studying velocity field, hydrodynamic forces, kinetic energy, etc
03 p0465 A70-13335
- Plane two body contact creep problem in presence of adhesive forces reduced to solving coupled integral equations with complex valued kernels
04 p0766 A70-14421
- Gravitational radiation damping effect on motion of two bodies, evaluating field components in approximation by Einstein-Infeld-Hoffman method
05 p0882 A70-16308
- Motion near collision singularity in perturbed two body problem, applying method to boundedness proof for Sperling cluster energy
05 p0909 A70-16339
- Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit
07 p1386 A70-19484
- Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption
08 p1565 A70-20562
- Steady motions and stability of gravitating gyrost and spheroid, considering dynamically asymmetrical and symmetrical conditions
08 p1544 A70-20965
- Momentum vector and spin tensor definitions for extended body moving in arbitrary gravitational and electromagnetic fields, considering test body in de Sitter universe
08 p1545 A70-21352
- Nomogram construction for graphical solution of two body problem using radius-vector and velocity components applied to solar system
12 p2311 A70-28310
- Computer program for two body problem literal series expansions using Kepler functions with Bessel and Poisson series operation
14 p2638 A70-30702
- Plane wave ray optical scattering by two spheres for arbitrary angle of incidence and observation, noting importance of first order interaction terms
14 p2551 A70-31157
- Orbit calculation based on first integrals of two body problem in spherical coordinates
15 p2797 A70-31620
- Book on celestial mechanics covering perturbation methods, two body problems, astronomical coordinates, orbital mechanics, satellite rotation, gravitational effects, etc
15 p2799 A70-31998
- Matrizant of two body problem or integrable dynamic system for applications to computing perturbations and differential correction of orbits with observations
15 p2768 A70-32611

Mass point motion in celestial mechanics, investigating two and three body problems without equal counteraction assumption
15 p2805 A70-32717

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit
15 p2805 A70-32729

Second and higher order perturbation theory for two body trajectories, using recursive formulas
19 p3528 A70-38871

Steady motions and stability of gravitating gyrost and spheroid, considering dynamically asymmetrical and symmetrical conditions
20 p3672 A70-39387

Potential flow around oscillating shell-plate structure subjected to supersonic gas flow at zero angle of attack, solving nonlinear aeroelasticity problem
22 p4117 A70-43362

Two particles relative motion in elliptical orbits in inverse square central force field
23 p4244 A70-44576

Restricted osculating two body orbit with time derivative of eccentric anomalies difference position as independent variable in perturbation differential equations
23 p4244 A70-44635

Celestial mechanics covering two body problem, orbital improvement, perturbation theory and dynamics, planetary and satellite theory, lunar motion, etc
23 p4255 A70-45032

Relativistic two body system in circular orbits, examining quantum theory with massless and massive scalar fields and energy and angular momentum for bound system
24 p4379 A70-45521

Plane parallel collision between two solid bodies of similar shape, discussing kinetic energy losses and motion after impact
24 p4427 A70-46376

TWO DIMENSIONAL BODIES

Combustion effects on base pressure of two dimensional body in supersonic flight, considering air-fuel ratio, combustion length and free stream Mach number
02 p0354 A70-12046

Two dimensional and axisymmetric bodies shapes providing minimum wave drag to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves
03 p0409 A70-13863

Shadow optical raster method for quantitative investigation of dynamic stress states in two dimensional transparent or reflecting bodies
03 p0496 A70-14215

Hypersonic cruise vehicle data to define temperature, load criteria and materials for air induction systems associated with two dimensional variable geometry inlet
05 p0791 A70-15839

Incompressible boundary layer flow of conducting fluid on solid two dimensional and axisymmetric bodies under transverse magnetic field approximated by momentum method
06 p1031 A70-17199

Base bleed fluid injection effect on steady separated flow past two dimensional bluff body, studying streamline pattern near object
06 p0967 A70-17518

Minimum weight design for two dimensional bodies with given load system determined by variational method
09 p1771 A70-22400

Two dimensional structures large strain elastoplastic analysis by finite element method, using variational principles to derive equilibrium equations
12 p2320 A70-27148

Elastic-plastic plane stress analysis of two dimensional structures based on Tresca yield criterion, using finite element technique
12 p2326 A70-27795

Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer
13 p2343 A70-29951

Thin two dimensional shells static linear elastic deformations analysis using difference based variational method
15 p2815 A70-32001

Supersonic flows past two dimensional blunted bodies, using method of ascertainment
16 p2833 A70-33248

Laminar and turbulent boundary layer equations solutions for incompressible/compressible flows about two dimensional and axisymmetric bodies, using finite difference method
16 p2892 A70-33641

Forces on two dimensional oscillating airfoil in subsonic compressible wind tunnel flow, solving partial differential equation for pressure potential by integral transform technique
16 p2839 A70-34248

Laminar free convection near two dimensional and axisymmetric nonisothermal bodies, examining surface temperature distribution and heat flux
18 p3345 A70-35999

Two dimensional body slow motion through stratified fluid bounded by parallel vertical walls, examining flow at different Peclet numbers 21 p3744 A70-41246

Two dimensional electromagnetic scattering body geometry reconstruction from given incident and scattered far field distributions 23 p4165 A70-44958

Time dependent inviscid transonic flow past two dimensional and axisymmetric bodies, presenting numerical procedures including imbedded shock waves as discontinuities [AIAA PAPER 70-1322] 24 p4288 A70-45943

TWO DIMENSIONAL FLOW

NT COUETTE FLOW

Boundary layer equations for plane steady incompressible flow, studying given velocity profiles effects on equations solutions 01 p0060 A70-10144

Vortex street parameters in free wake behind body in plane fluid flow, deriving equations for vortex frequency, circulation and interspacing 01 p0060 A70-10146

Film-vapor interface shape for thin liquid lubricating film, analyzing two dimensional Newtonian flow including gravity, inertia and surface tension effects [ASME PAPER 69-LUB-3] 01 p0103 A70-10399

Plane supercavitating flow past symmetric wedge via open cavity model and application of conformal mapping theory and Riemann-Hilbert techniques 01 p0002 A70-10544

Conservation laws for viscous incompressible two dimensional and axisymmetric flow written in integrodifferential form 01 p0063 A70-10935

Petrov proof of plane Couette and Poiseuille flow stability with respect to infinitesimal disturbances, rejecting validity of proof 01 p0064 A70-11071

Topological properties of plane flow in subsonic region behind smooth shock wave in uniform supersonic flow, discussing shock wave convexity 01 p0068 A70-11580

Incompressible viscous fluid plane flow using series expansion 02 p0277 A70-11910

Self similar wave solutions of continuity and momentum equations for two dimensional unsteady isentropic motion of polytropic gas 02 p0278 A70-11998

Integral method for computing two dimensional incompressible turbulent boundary layer development, including entrainment process of irrotational fluid 02 p0284 A70-12343

Momentum integral method using auxiliary equation for two and three dimensional flows 02 p0284 A70-12344

Stratified air flow above relief in baroclinic atmosphere, considering plane nonlinear and three dimensional linearized flow models 03 p0521 A70-13270

Unsteady heat conduction in hollow cylinder, using transfer functions to solve direct and inverse two dimensional problems 03 p0606 A70-13520

Viscous incompressible laminar two dimensional flows using Navier-Stokes equations, emphasizing near wake and flow around leading edge [ONERA-TP-757] 03 p0467 A70-13640

Incompressible inviscid free shear layer stability with respect to spatially growing three and two dimensional disturbances, considering hyperbolic tangent velocity profile [DFVLR-SONDDR-10] 03 p0468 A70-13786

Martin method for reducing determination of steady plane MHD flow to Bernoulli and direct functions satisfying quasi-linear partial differential equations 03 p0533 A70-14200

Plane model of magnetosphere shape and structure, considering rarefied plasma flow past two dimensional magnetic dipole with dynamic and static boundary pressure, using conformal mapping 04 p0675 A70-14435

Sonic throat formation from two dimensional viscous layer interaction with supersonic inviscid outer stream, using boundary layer equations 04 p0665 A70-14452

Heat transfer from two dimensional hypersonic low density stream to wedges and sharp flat plates at expansion angles of attack 04 p0615 A70-14944

Boundary layer along flat plate at zero incidence with homogeneous suction using momentum and kinetic energy integral equations through boundary layer velocity profile 04 p0615 A70-15052

Plane and axisymmetric transonic vortex flow approximate equations of inviscid nonheat conducting gas for point on sonic line with entropy having extremal value 04 p0617 A70-15234

Flow stability of plane channel formed by incompressible viscous fluid injection through porous parallel walls 04 p0673 A70-15238

Hydromagnetodynamic equations of two dimensional unsteady geostrophic wind field in turbulent ionosphere 04 p0680 A70-15254

Incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries [AIAA PAPER 69-185] 04 p0779 A70-15616

Plane Poiseuille flow stability as function of periodic disturbances of finite amplitude in channel axis direction 05 p0832 A70-16018

Periodic perturbations of plane Poiseuille flow, observing neutral curve relationship to disturbance amplitude 05 p0832 A70-16019

Singularity method applied to two and three dimensional potential flow described by Poisson, Helmholtz or related partial differential equations 05 p0832 A70-16114

Two and three dimensional flow using TRIC and TRIM-like triangular finite elements 05 p0832 A70-16115

Curvature effects on two dimensional turbulent wall jet flow over plane surface and circular convex and concave surfaces in still air 05 p0832 A70-16118

Second order wave structure theory for shock wave system from body in supersonic flight analyzed for planar flows 05 p0790 A70-16797

Two dimensional plasma modes involving geometry and velocity spaces, discussing Vlasov equation 05 p0890 A70-17025

Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method [AIAA PAPER 69-397] 06 p1032 A70-17214

Two dimensional laminar and turbulent boundary layer flow theory covering heat and mass transfer, compressibility, turbulence, roughness, chemical reactions and axial symmetry 06 p1032 A70-17227

Isoenergetic mixing and reattachment processes of two dimensional supersonic turbulent separated flow, modeling mixing process by constant pressure theory [AIAA PAPER 70-108] 06 p1037 A70-18039

Two dimensional supersonic turbulent near wake saddle point singularity during recompression analyzed by including transverse momentum integral equation [AIAA PAPER 70-228] 06 p1039 A70-18106

Multiphase two dimensional mixing and combustion of flow fields suspended in gaseous medium for propulsion systems problems, obtaining governing equations [AIAA PAPER 70-145] 06 p1181 A70-18175

Plane Couette flow and heat transfer problem numerical solution, using Krook kinetic equation and Maxwell boundary condition 06 p1048 A70-18326

Model for predicting laminar-turbulent transition point in hypersonic wake of two dimensional laminar viscous flow 06 p0985 A70-18499

Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field 07 p1252 A70-18673

Nonlinear stability of plane Couette flow, computing stream function, vorticity distribution and Reynolds stresses 07 p1255 A70-19211

Peristaltic motion of viscous incompressible fluid, applying long wave approximation to two dimensional urine flow model 07 p1219 A70-19247

High electrical conductivity effects on alignment between magnetic field and flow velocity vector in two dimensional plasma flow 07 p1349 A70-19568

Roshko model cavity solution based on Falkovich method application to two dimensional permanent irrotational flow of subsonic gas jet 07 p1258 A70-19571

Instability of plane Couette flow of three superposed layers of fluids of different viscosity between two horizontal planes 07 p1260 A70-19978

Two dimensional flow field behind shock wave resulting from boundary layer growth in driven gas of shock tube 07 p1260 A70-19983

Circular turbulent air jet from flat plate into deflecting stream using potential flow model, noting applicability to V/STOL aircraft technology [AIAA PAPER 69-223] 07 p1190 A70-20406

Flow structure in rectangular cavity in lower wall of two dimensional channel for various aspect ratios and Reynolds numbers 08 p1484 A70-21313

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas 08 p1485 A70-21638

Airfoil research in S-10 French wind tunnel for two dimensional flow, noting Reynolds and Mach number ranges [ONERA-TP-766] 08 p1433 A70-21843

Static tank visualizations obtained in two dimensional flow and on rotors hovering or in transition in ONERA hydrodynamic tunnel 08 p1434 A70-21846

Plane Couette flow stability numerical analysis, predicting eigenvalue behavior for arbitrary Reynolds and wave numbers 09 p1658 A70-22124

Plastic bodies plane flow Lagrangian description applied for prescribed deformation path of material fibers 09 p1769 A70-22251

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques 09 p1603 A70-22265

Relaxational oscillations produced by interaction between rarefaction wave in external two dimensional supersonic flow and turbulent near wake 09 p1603 A70-22426

Two dimensional Poiseuille flow stability at deformable walls, assuming pressure proportionality to displacement and rate 09 p1660 A70-22533

Second order boundary layer equations for incompressible flow, presenting simplified integral momentum equation for two dimensional and axisymmetric flow 09 p1660 A70-22681

Two dimensional radial flow of inviscid infinitely conducting compressible fluid under influence of magnetic field 09 p1735 A70-22757

Two dimensional equations of boundary layer with arbitrary pressure gradient solved using successive approximations for numerical integration 09 p1605 A70-23168

Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law 09 p1789 A70-23169

Two dimensional supersonic wake transition characteristics noting effect of heat transfer from vehicle or model body 09 p1605 A70-23184

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow [AIAA PAPER 69-10] 09 p1662 A70-23219

Velocity and friction stress profiles of semibounded plane turbulent jets discharging from finite slit along smooth plate into moving medium 09 p1663 A70-23617

Circle theorem for potential flows extended to two dimensional steady incompressible ideal fluid flows of constant vorticity 09 p1664 A70-23714

Shock wave initiated two dimensional time dependent ducted flows in nonuniform regions using fluid-in-cell method, discussing density, pressure and energy distributions 09 p1665 A70-23740

Streamline curvature technique for two dimensional flow equations, deriving optimal damping factor for quasi-orthogonal method to test stability, convergence and accuracy 09 p1609 A70-23749

Upstream influence distance estimation associated with critical pressure rise in two dimensional shock-boundary layer interactions based on Lighthill subsonic inner boundary layer concept 10 p1862 A70-23840

Motion and continuity equations for unsteady two dimensional flow of incompressible viscous fluid along infinite flat plate with time dependent suction 10 p1862 A70-23877

Two dimensional MHD flow past solid body at large Reynolds numbers, treating boundary layer transition 10 p1922 A70-24011

Perturbed equations solutions for plane supersonic steady and nonsteady gas flows, considering propagation of perturbations in initially nonstationary main flow 10 p1866 A70-24107

Transonic aerodynamics problems concerning plane and spatial rotational flows of perfect gas, discussing analytical and numerical methods 10 p1800 A70-24132

Bidimensional curved weak shock wave structure, deducing transonic equation from Navier-Stokes equations 10 p1800 A70-24138

Orr-Sommerfeld equation of hydrodynamic stability theory solved for incompressible two dimensional

boundary layer flow on basis of reduction to integral equation 10 p1867 A70-24161

Hydrodynamic lubrication theory two dimensional problem, comparing numerical methods for elliptical nonlinear differential equations 10 p1893 A70-24164

Steady two dimensional cavity flow past sharp-edged airfoil and blunt nosed obstacle, using linearization hypothesis 10 p1801 A70-24193

Plane Couette oscillating flow stability to small disturbances under composed unsteady velocity at high Reynolds number 10 p1868 A70-24197

Numerical integration method for function and solution of differential equation, considering equations governing two dimensional motion of particle in air stream 10 p1910 A70-25099

Earth profile influence on two dimensional nonlinear lee waves in troposphere, discussing Helmholtz perturbation equation and stream function field 11 p2075 A70-25391

Velocity distribution around isolated and cascaded airfoils in plane potential flows of incompressible fluid determined by use of nonsingular integrals 11 p1974 A70-25781

Two dimensional unsteady fluid flow in square cavity numerically analyzed from continuity and Navier-Stokes equations and recorded as computer-generated motion picture 11 p2035 A70-25971

Steady state two dimensional flow velocity profiles at low Reynolds numbers of homogeneous incompressible viscous liquid in straight channel inlet region 11 p2037 A70-26476

Two dimensional incompressible mixing layer investigated by constant temperature linearized hot wire anemometers, discussing turbulent/nonturbulent interfaces 11 p2040 A70-26540

Two and three dimensional flow analysis using various versions of finite element techniques 11 p2042 A70-26680

Two and three dimensional potential flow analysis using finite element technique based on method of singularities 11 p2042 A70-26681

Regularity domain and singularity location of stream function of transonic two dimensional compressible fluid flow, using integral operators 12 p2260 A70-26972

Two dimensional viscous incompressible conducting fluid flow between parallel porous walls in magnetic field, studying skin friction fluctuations 12 p2209 A70-27157

Incompressible two dimensional and axisymmetric oscillating laminar boundary layer flows approximated by momentum integral equation, discussing flow along flat plate 12 p2158 A70-28205

Two dimensional irrotational incompressible fluid motion bounded by flexible stretched and unstretched film, noting hydrodynamic shock for closed film 12 p2213 A70-28238

Plane model of magnetosphere shape and structure, considering rarefied plasma flow past two dimensional magnetic dipole with dynamic and static boundary pressure, using conformal mapping 13 p2392 A70-28460

Plane flow problem for two hinged plates in motion toward each other with fluid displacement, discussing single vortex application to biomechanics 13 p2338 A70-28481

Two dimensional MHD turbulence under strong magnetic field in Zeta device, measuring density, temperature, electric/magnetic fluctuations and various statistical characteristics 13 p2457 A70-28553

Plane incompressible conducting fluid laminar jets analysis in magnetic field, using boundary layer equations for zero electric field 13 p2461 A70-28964

Compressible fluid two dimensional irrotational flow past Roshko model in channel, deriving exact solution by hodograph method 13 p2341 A70-29487

Two dimensional unsteady incompressible fluid flow through airfoil lattice 13 p2389 A70-29491

Linearized steady plane axisymmetric flows of inviscid finitely conducting incompressible fluid past insulator under magnetic induction with zero components 13 p2464 A70-29541

Incompressible ideal plane fluid flow complex potential caused by profile motion in presence of fixed infinite wall 13 p2390 A70-29632

Ideal weightless fluid plane potential flow in channel with permeable wall, deriving expressions for dynamic characteristics 13 p2390 A70-29648

Two dimensional turbulent boundary layer with pressure gradient, calculating velocity distribution and local skin friction by Pohlhausen method 13 p2391 A70-29672

Axisymmetric compressible boundary layer on body of revolution transformed into two dimensional turbulent boundary layer 13 p2391 A70-29995

Two dimensional unsteady flow of weakly conducting fluid in perpendicular magnetic field using Green function 14 p2621 A70-30180

Two dimensional incompressible steady turbulent flows based on Prandtl hypothesis relating eddy viscosity to kinetic energy and scale 14 p2564 A70-30259

Two dimensional incompressible turbulent boundary layer with mass addition and heat transfer, calculating temperature and velocity profiles by marching integration 14 p2564 A70-30261

DMC computer code for simulation of two dimensional viscous incompressible flow about arbitrarily shaped bodies 14 p2527 A70-30271

Steady plane relativistic flow small irrotational perturbation theory determining subsonic, transonic and supersonic approximation 14 p2566 A70-30472

Two dimensional incompressible laminar boundary layers asymptotic structure with injection, obtaining velocity profiles 14 p2566 A70-30995

Self similar one dimensional flow behind plane shock propagating in exponentially decreasing atmosphere, considering radiation mean free paths and radiative heat transfer 14 p2567 A70-31032

Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field 15 p2718 A70-31465

Nonself similar problem of plane submerged fluid jet expelled from annular nozzle, obtaining asymptotic expansion for stream function 15 p2719 A70-31485

Force acting on cylinder in ideal incompressible fluid plane flow with steady vorticity 15 p2719 A70-31498

Baecklund transformations applications to hodograph equations for steady two dimensional nondissipative MGD flows with aligned velocity and magnetic fields 15 p2781 A70-32453

Integral equation for transonic small disturbance flow applied to plane flows over lifting airfoils 15 p2673 A70-32768

Two dimensional hydromagnetic turbulence model for maintained seed field amplification, noting applications to star formation, stellar convection and gas cloud motions 15 p2781 A70-32813

Shock wave stability in plane steady flow at uniform entropy and limiting velocity 16 p2890 A70-33101

Shear flow turbulence effect on chemical reactions, considering two dimensional low speed turbulent mixing layer between high velocity cold gas and air at rest [AIAA PAPER 70-721] 16 p2855 A70-33493

Plane turbulent impinging jet by iterative finite difference technique, assuming eddy viscosity dependence on energy fluctuations and turbulence length scale [ASME PAPER 70-FE-27] 16 p2835 A70-33634

Incompressible ideal fluid plane laminar flows at large Reynolds numbers in region bounded by moving walls with closed concentric streamlines, establishing functional properties 16 p2892 A70-33635

Two dimensional supersonic wake behind heated slender flat plate, considering flow properties in transition zone 16 p2893 A70-33749

Compressible turbulent boundary layers with heat and mass transfer in two dimensional and axisymmetric flows, using eddy transport coefficients [AIAA PAPER 70-741] 17 p3066 A70-34506

Steady two dimensional MHD boundary layer flow with uniform suction or injection past semiinfinite flat plate in cross fields 17 p3067 A70-34618

Steady and unsteady gas dynamics analogies with two dimensional water flow, taking into account energy and continuity equations 17 p3069 A70-35032

Two dimensional hypersonic viscous flow, analyzing viscosity and bluntness induced pressure effects 17 p3010 A70-35034

Turbulent energy distribution in plane wake in incompressible fluid, using pulsational energy balance equation 17 p3011 A70-35348

German monograph on oscillations of tandem wing without outgoing wake in plane incompressible flow, using numerical computations 17 p3011 A70-35372

German monograph on transonic plane flow past wavy wall in blocked wind tunnel covering flow theory, interferometric density measurements, etc 17 p3070 A70-35375

Viscous incompressible liquid two dimensional flow around flat plate, discussing visualization techniques and velocity distribution measurement 18 p2339 A70-36218

Plane stationary supersonic flows with laminar separation zones at large subcritical Reynolds numbers 18 p2306 A70-36257

Unsteady two dimensional gas flow calculation axisymmetric shock tube of variable cross section, using numerical method 18 p2340 A70-36275

Plane compressible sonic flow around symmetrical cylinder subjected to parallel incident flow, using function-theoretic method 18 p3241 A70-36378

Pressure distribution shock pattern and impact wave resistance in frictionless plane parallel and source shaped supersonic flow 18 p3207 A70-36385

Two dimensional cascades for incompressible plane potential flows with given velocity distribution [ASME PAPER 70-GT-87] 18 p3209 A70-36880

Quasi-two dimensional supersonic cascade flow, taking into account transverse stream contraction effect 18 p3210 A70-37206

Method of characteristics for two dimensional steady supersonic gas flows with foreign particles in plane and axisymmetric nozzles 18 p3210 A70-37228

Perfect and dissociating gas nonstationary supersonic flow around sharp profile of finite thickness analyzed by linearization and method of characteristics 19 p3351 A70-37242

Supersonic flow of rarefied plasma around plane bodies, allowing for electric field effect on ion motion 19 p3351 A70-37302

Liquid with small electrical conductivity and kinematic viscosity in intense transverse magnetic field, examining plane and three dimensional duct flow 19 p3478 A70-37589

Thin airfoil theory in magnetoaerodynamics, considering steady two dimensional flow of compressible perfectly conducting inviscid fluid in presence of uniform magnetic field 19 p3351 A70-37597

Film-vapor interface shape for thin liquid lubricating film, analyzing two dimensional Newtonian flow including gravity, inertia and surface tension effects [ASME PAPER 69-LUB-3] 19 p3435 A70-37610

Boundary layer equations for two dimensional flow of incompressible constant density micropolar fluid past plane wall, noting skin friction 19 p3404 A70-37962

Steady two dimensional incompressible shear flow, correlating velocity profiles with resistance distribution 19 p3406 A70-38350

Two dimensional equations of boundary layer with arbitrary pressure gradient solved using successive approximations for numerical integration 19 p3406 A70-38390

Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law 19 p3552 A70-38392

Hodograph equations for relativistic irrotational steady plane flows, investigating transformation to physical plane 19 p3406 A70-38664

Two dimensional steady inviscid incompressible flow past profiles in parallel flow with nonuniform velocity distribution 19 p3354 A70-38676

Two dimensional MHD Couette flow in slip regime, considering constant suction on stationary plate to determine transverse magnetic effects 20 p3677 A70-39047

Bearing force and moment produced by motion of inclined plate supported by compressed air in ground effect machines with small angle of attack 20 p3557 A70-39140

Shock wave nonlinear refraction by upstream disturbances in two dimensional steady nonuniform flow 20 p3608 A70-39354

Compressible viscous fluid steady plane flow in laminar boundary layer on impermeable isothermic surface, describing parametric method of integrating flow equations 20 p3611 A70-39806

Plane parallel viscous conducting fluid flows stability in transverse magnetic field, considering small perturbation spectrum, Hartmann and Reynolds numbers 20 p3684 A70-40397

Two dimensional turbulent boundary layer computation using two parameter family of velocity profiles and skin friction law 21 p3806 A70-40921

Two dimensional compressible laminar MHD boundary layer flow past flat plate with heat transfer, considering continuity, momentum and energy equations 21 p3856 A70-41039

Shock wave extinction point within plane steady upstream flow with uniform entropy and limit velocity 21 p3808 A70-41441

Two dimensional unsteady viscous incompressible MHD flow past infinite flat plate with uniform suction, considering Hartmann and Reynolds numbers 21 p3858 A70-41450

Irrational incompressible flow through two dimensional channel with asymmetric contraction 21 p3809 A70-41757

Plane Poiseuille flow in second order Rivlin-Ericksen fluids with small viscoelastic parameters, calculating three dimensional disturbance stability 21 p3810 A70-42030

Plane parallel transonic flow with curved compression shock discontinuity in supersonic region, obtaining solution by indeterminate coefficients and hypergeometric functions 21 p3748 A70-42212

Spoiler theory based on mathematical model, using two dimensional potential theory in conjunction with experimental data on wake phenomena 22 p3957 A70-42273

Two dimensional peripheral turbulent jet curtain structure, determining curved and impinging jet flow field by pressure and velocity measurements 22 p3957 A70-42277

Two dimensional turbine cascade air flow, examining boundary layer regime, thickness, velocity and pressure coefficient at any point by Mach-Zehnder interferometer 22 p4026 A70-42344

Two dimensional transonic cascade flow, using Von Karman similarity law 22 p4089 A70-42347

Two dimensional flow about supersonic airfoil, considering trailing Taylor columns behavior like sonic booms 22 p4009 A70-42629

Two dimensional incompressible flow, calculating strong suction effects on laminar boundary layer separation by linear model 22 p4010 A70-42630

Hydrogen and air nonequilibrium chemical recombination effects in two dimensional exhaust nozzles, using Bray freezing criterion 22 p3982 A70-42760

Isentropic gas two dimensional unsteady flow through channel contraction, using hydraulic analogy 22 p4012 A70-43438

Two dimensional steady flow around slender profiles at free transonic stream with curved compression shocks, approximating by hodographic method 23 p4131 A70-44023

Two dimensional stratified flow over extended obstacles with source disturbances, indicating topographical effect on vertical wind shear in troposphere 23 p4214 A70-44031

Rotational two dimensional steady shear flows of perfect incompressible fluid, considering channel flow characteristics for various wave modes 23 p4181 A70-44202

Mass transfer and velocity gradient fluctuations at wall in two dimensional or rotational flow for large Schmidt numbers 23 p4181 A70-44210

Ladyzhenskaya-type fluids linear flow stability criteria for two dimensional case 23 p4218 A70-44238

Two dimensional turbulent wake theory, considering shear stress and velocity distribution behind flat plate and circular cylinder 23 p4134 A70-44575

Pressure distribution on thin nonlifting airfoils in steady two dimensional flow with freestream Mach number at or near unity 23 p4134 A70-44583

Two dimensional laminar near wake of slender body in supersonic flow at high Reynolds number 23 p4135 A70-44693

Incompressible viscous fluid two dimensional flow in absence of mass forces, considering Tollmien-Schlichting wave perturbation effect on flow stability 24 p4324 A70-45365

Two dimensional aperture flow with downstream asymmetric pressure distribution due to jet reattachment to boundary, simulating flows in hydraulic spool valves and fluidic devices 24 p4325 A70-45582

Two dimensional boundary layer growth with suction for oscillating circular cylinder, considering stream functions and phase angles 24 p4326 A70-46002

Viscous fluid two dimensional steady natural convection between horizontal concentric cylinders for low Grashof numbers 24 p4429 A70-46007

Two dimensional incompressible air flow past circular cylindrical body, investigating separation point control by suction and jet injection 24 p4288 A70-46010

Plane flow of incompressible elastic perfectly plastic solid, deriving hyperbolic stress and velocity equations 24 p4427 A70-46043

TWO DIMENSIONAL JETS

Growth rate and shear stress parameter of symmetric, turbulent, two dimensional and axisymmetric self preserving wakes and jets in streaming flow 02 p0223 A70-11861

Fourier expansion method applied to hydrodynamic stability of plane jet, testing boundary conditions 03 p0469 A70-14180

Linear spatial stability of two dimensional laminar wake- and jet-like similarity solution of Falkner-Skan equation 04 p0613 A70-14455

Instability of viscous laminar plane jet of incompressible fluid, finding minimum critical Reynolds number for various assumptions of parallelism 04 p0670 A70-14990

Boundary layer equations closed form similarity solutions for laminar jet of compressible pseudoplastic fluid, discussing velocity transverse behavior 04 p0671 A70-15053

Free plane turbulent jet virtual origin using tests determining influence of upstream conditions and nozzle shape 04 p0674 A70-15554

Heat transfer during plane air jet impact into concave surface with parabolic profile, determining specific thermal fluxes by electrocalorimetry 07 p1189 A70-19810

Mixing region and potential cone of two dimensional jet, measuring velocity fluctuations 08 p1485 A70-21587

Velocity and friction stress profiles of semibounded plane turbulent jets discharging from finite slit along smooth plate into moving medium 09 p1663 A70-23617

Flat plate normal to two dimensional impinging air jet, investigating heat /mass/ transfer structure using naphthalene method 11 p1977 A70-26411

Cavity pressure and velocities distributions of interfering two dimensional dual jets from parallel slot nozzles 11 p2037 A70-26419

Two dimensional jet velocity profile evolution under symmetrical and antisymmetrical perturbations 14 p2567 A70-31200

Linearized two dimensional double vortex sheet model of inviscid compressible jet instabilities over all Mach numbers 15 p2722 A70-32375

Vortex streets characteristics determination for plane jet having uniform initial velocity profile 16 p2890 A70-33108

Two dimensional sonic secondary fluid jet interaction with uniform primary supersonic stream in wind tunnel [ASME PAPER 70-FE-33] 16 p2835 A70-33638

Reaction jets for control force generation in supersonic environment, analyzing downstream pressure distributions for two dimensional jet interactions 16 p2838 A70-33890

Plane turbulent jet expansion from linear wedge apex, allowing for ejected air axial velocity attenuation and static pressure variation 17 p3011 A70-35349

Laminar two dimensional wall jet with small natural disturbances, examining flow stability at various Reynolds numbers 19 p3402 A70-37526

Noise spectra of two dimensional jet flowing from nozzle ejector, using dispersion equation 19 p3354 A70-38662

Heat transfer during plane air jet impact into concave surface with parabolic profile, determining specific thermal fluxes by electrocalorimetry 20 p3736 A70-39260

Computerized integral treatment of turbulent constant pressure mixing of two dimensional gas jet with atmosphere having different temperature and composition 22 p4011 A70-42755

Trajectory equations for plane and three dimensional gas jets with arbitrary injection hole shapes in subsonic shear flow 22 p3960 A70-43365

Two dimensional incompressible laminar free jet, analyzing higher order viscous interactions with surrounding fluid by matched asymptotic expansions method 24 p4326 A70-45944

[AIAA PAPER 70-1321] Vortices growth in vortex sheets bounding jets flowing from two dimensional slit and circular orifice observed by computer experiments 24 p4327 A70-46244

TWO FLUID MODELS

Two layer truncated harmonic model of Rossby wave dynamo for solar cycle, accounting for maintenance and reversal of magnetic fields 01 p0174 A70-10238

Internal waves breaking on sloping surface in two fluid system, studying interfacial shear instability by capacitance probe on-line computer system 09 p1717 A70-22371

Two fluid hydrodynamic model of heat conductivity and viscosity effects on drift laminar flow stability of dense inhomogeneous plasma 10 p1926 A70-25125

Heat transport by internal convection through He 2 in two fluid hydrodynamics model noting roles of thermal flux, superfluid component vorticity, normal component turbulence, etc 12 p2329 A70-27022

Two fluid model for solar wind treating constant temperature electrons hydrodynamically and protons as collisionless 13 p2477 A70-29178

Classical single fluid dynamics theory derived from unitary formulation of two fluid theory 15 p2827 A70-32261

Current sheet structure of hydromagnetic boundary layer formed by mixing two conducting fluid streams containing oppositely directed magnetic fields 17 p3140 A70-34930

Two component warm plasma wave propagation along magnetic field, considering full pressure tensor equation with momentum and pressure relaxation mechanisms 18 p3294 A70-36405

Two fluid hydrodynamic model of heat conductivity and viscosity effects on drift laminar flow stability of dense inhomogeneous plasma 20 p3685 A70-40518

Solar wind two fluid model with boundary conditions describing electron and proton behavior in expanding corona 24 p4397 A70-45770

TWO PHASE FLOW

Shock wave structure in two phase media with temperature and velocity gradients and possible phase transitions 01 p0060 A70-10147

Two phase flow in cylindrical channel, formulating maximum momentum flow variational principle for laminated adiabatic vapor- and gas-liquid flows 01 p0213 A70-10216

Laminar boundary layer analysis of heat and mass transfer in dispersed two phase flow over heated surface 01 p0214 A70-10293

Wet vapor flow with/without inert diluent, assuming momentum and heat transfer between phases according to Stokes law and Nusselt number of unity 01 p0061 A70-10332

Two velocity hydrodynamic scheme for describing dynamic behavior of two phase supersonic flow past slender body 01 p0003 A70-10995

Flow patterns in circular ducts with circumferential roughness variation, determining axial turbulence, Reynolds number effect and applications as two phase flow analog 01 p0066 A70-11132

Two phase flow instrumentation - Conference, Minneapolis, August 1969 02 p0304 A70-12833

Two phase flow visualization by various photographic and optical methods, describing equipment and lighting used and types of data obtainable 02 p0305 A70-12834

Two phase density and void fraction measurement using beta, gamma and X ray radiation, considering optical accuracy and beam collimation 02 p0305 A70-12835

Hot-wire and hot-film anemometry in two phase air-water and steam-water flow, discussing bubble passage, signal processing and measurements 02 p0305 A70-12836

Electronic spray analyzers and conductance and capacitance probes for two phase flow studies, describing operation, characteristics and types of data obtainable 02 p0305 A70-12837

Nonequilibrium two phase forced convection flow, describing pressure, temperature and void fraction measurement techniques 02 p0305 A70-12838

System of equations describing isothermal two phase-two component fluid flows with negligible dissipation effects, emphasizing slug flow 02 p0288 A70-12856

Turbulence in hypersonic nozzle due to two phase flow of ideal gas and solid spherical particles, discussing thermal and dynamic differences 03 p0407 A70-13494

Supersonic nonequilibrium two phase flow in Laval nozzle from numerical solution of quasi-linear hyperbolic equations 04 p0617 A70-15229

Approximate solution for far downstream flow of condensation in hypersonic wind tunnels and nozzles for colloidal thrusters and EHD generators
04 p0621 A70-15600

Nonequilibrium models describing two phase critical discharge of initially saturated or subcooled liquid through sharp edged and smooth inlet geometries
05 p0956 A70-16162

Laser beam for measuring particles velocity in two phase air-water jets by heterodyning, describing signal properties
05 p0858 A70-16258

Repetitive scanner for wave velocity measurements in annular two phase gas or liquid flow using pivoted mirror
06 p1062 A70-17618

Water flow with solid particles, obtaining predictions for two component two phase gas flow
06 p1037 A70-17899

Stable two phase water flow system for transpiration cooling in thermal protection of SST noise suppressor situated in afterburning engine exhaust gas stream
[AIAA PAPER 70-151] 06 p1181 A70-18146

Water droplets and air supersonic mixing, determining droplets size and optical properties
[AIAA PAPER 70-90] 06 p0975 A70-18199

Two phase supersonic continuum flow of dispersed equal gas-liquid volume ratio in shock tunnel using continuum theory, considering sound propagation
07 p1256 A70-19311

Film heat transfer coefficients and thicknesses for condensation and evaporation and two phase flow inside circular tubes
[ASME PAPER 67-HT-1] 08 p1599 A70-21827

Aerothermochemistry of two phase flow in gaseous media of solid or liquid particles or spherical gas pockets
[ONERA-TP-691] 08 p1600 A70-21848

Sonic speed and damping in two phase potassium flow, discussing linear equations and propagation velocity
09 p1725 A70-22036

Flow formation in Couette motion of viscous fluids containing suspended rigid spherical particles using theory of fluids with microstructure
11 p2037 A70-26169

Growth rate and spatial distribution of solid deposit freezing onto vertical surface in presence of convective heat transfer at moving phase interface
12 p2331 A70-27696

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations
12 p2212 A70-28196

Single component two phase pipe flow choking and shock phenomena, including flashing flow vibratory effects
13 p2386 A70-28846

Liquid metallic particles fragmentation in two phase flow injected into vacuum, noting atomization enhancement by sodium nitrate
13 p2391 A70-29994

Laminar flow of suspension over flat plate, analyzing particulate velocity and concentration profiles relationships to drag and lift forces
14 p2565 A70-30270

Two phase convex corner flows of particle imbedded inviscid incompressible fluid using small perturbations method
14 p2565 A70-30279

Two phase axisymmetric jet, studying dispersion of pulverized impurity consisting of particles of various sizes
15 p2721 A70-32135

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549] 15 p2791 A70-32511

Gaseous flows and local droplet velocity measurement in dense gas/liquid sprayfields, using noninterference technique
[AIAA PAPER 70-728] 16 p2910 A70-33491

Boron particles ignition and combustion in supersonic air stream, emphasizing axial and lateral two phase flow injection
[AIAA PAPER 70-737] 16 p2856 A70-33496

Gas-particle mixture cascade flow over turbine blades, considering momentum/heat transfer and particle trajectories
[AIAA PAPER 70-712] 16 p2835 A70-33569

Gas-liquid two phase flow dynamics, explaining behavior under normal and oblique shocks
16 p2893 A70-33684

Plastic deformation of two phase alloy with small nondeformable particles in ductile matrix, discussing cross slip, yield and flow stress, work hardening etc
17 p3126 A70-35460

Thin cylinder longitudinal two phase dispersed flow, examining heat transfer coefficient
18 p3345 A70-36112

Compressible flow of two component two phase mixtures through convergent nozzles and orifices, determining initially or annular dispersed flow patterns
18 p3239 A70-36231

Two phase flows and atomization jet during fluid injection into supersonic flow, determining vaporization range
20 p3736 A70-39268

Liquid-gas separator design with reduced friction loss for MHD generators using two phase convergent-divergent nozzles
20 p3612 A70-40014

Axial pressure, electric current and potential distribution in two-phase particulate electrodynamic flow, discussing space charge electric field effect
20 p3683 A70-40257

One dimensional unsteady equilibrium flow stability of relaxing two phase medium consisting of perfect gas and incompressible liquid
20 p3613 A70-40295

Stagnation temperature of two phase nozzle gas jet containing solid particles on particle density and velocity
21 p3748 A70-42220

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations
22 p4012 A70-43321

Two phase liquid one dimensional motion in variable cross section tube, deriving mass transfer, motion and phase interaction differential equations
22 p4012 A70-43721

Heat and mass transfer for liquid film evaporation during two phase two component flow in vertical steel tube under adiabatic and nonadiabatic conditions
23 p4276 A70-44215

Two phase plume at various incidence angles on flat plate, determining impinging particle mass flux, forces and damage
23 p4134 A70-44566

Critical heat flux during forced pipe flow of boiling ethanol-water and acetone-water binary mixtures
23 p4283 A70-44730

Hydrogen slush characteristics, discussing advantages of liquid-solid mixture over liquid hydrogen, production methods, aging effects, transfer and pumping losses, storage, instrumentation, etc
23 p4232 A70-45075

German monograph on flow phenomena in gas containing fluids, covering pressure and ultrasonic induced cavitation in steady and unsteady flow
24 p4324 A70-45098

Laser light scattering by moist air flows with condensed droplets of water vapor
24 p4353 A70-45565

Resistance to two phase gas-liquid flow in airways simulating human bronchial tree
24 p4303 A70-46111

TWO PHASE SYSTEMS

U BINARY SYSTEMS [MATERIALS]

TWO REFLECTOR ANTENNAS

Field correlation theorem for deducing Cassegrain antennas performance from internal field distributions, considering two reflector diffraction problems
15 p2698 A70-31953

Illumination efficiency in shaped two reflector Cassegrain antenna system related to feed pattern deviation
16 p2861 A70-32968

TWO STAGE TURBINES

Two stage turbine engine parts adjustment optimization in terms of fuel consumption or thrust control by linear programming techniques
19 p3489 A70-37241

Two stage gas turbine engine optimal tuning for RPM, thrust, fuel rate and gas temperature, describing automated bench tests
22 p4092 A70-43361

Two shaft bypass jet engine analog simulation, determining angular acceleration dependence on angular velocity and fuel consumption
24 p4393 A70-45442

TYCHO CRATER

Small craters number density in southern lunar highlands, supporting Tycho Association cometary impact origin
21 p3920 A70-41882

Tycho crater northeast rim scale relief model including lava lakes in outer walls
23 p4253 A70-44881

TYPE 2 BURSTS

Radioheliograph observations of position and motion of type 2 and 4 radio sources during flares based on proton model
01 p0168 A70-10255

Electron gyrofrequencies computed from split pair bursts in 1966 compared with results from type II bursts in 1967
04 p0738 A70-14510

Solar corona magnetic field estimated from type II bursts correlated with photospheric, chromospheric and geophysical phenomenon
10 p1934 A70-25275

Expanding arch structure of type 2 solar radio burst observed with Culgoora radioheliograph
11 p2105 A70-25749

Type 2 and 4 solar radio emission, showing bursts excitation by common shock wave ejected from flare region
15 p2794 A70-32620

Type 2 irregularities in equatorial electrojet associated with plasma density vertical gradients
18 p3244 A70-36017

Two dimensional positions of fundamental and harmonic type 2 solar bursts, using coronal streamer plasma and backward refracted radiation model
21 p3891 A70-41179

Two dimensional position measurements of harmonic type 2 solar bursts, using 80 MHz observations
21 p3891 A70-41180

Shock wave excitation of type 2 and moving type 4 solar bursts from Culgoora radioheliograph and spectrograph recording
21 p3891 A70-41181

Type 2 solar radio burst shock wave exciter velocity from dynamic spectrograms, relating correction to shock strength gradient
24 p4401 A70-45322

TYPE 3 BURSTS

Meter wave type 3 solar radio waves associated with solar X ray flares, discussing sudden enhancements of LF field strength due to D layer ionization enhancement
01 p0168 A70-10257

Kinetic temperature estimate for solar corona based on time profile of type 3 bursts
08 p1565 A70-20565

Type 3 burst sources velocity calculated by frequency drift and Newkirk model of electron density, discussing frequency range extension of Weissenau radiospectrograph
10 p1934 A70-25274

Solar radio types I and III sources spatial distribution of circular polarization and coronal magnetic field configurations in active regions
12 p2294 A70-27710

Galactic noise and solar type 3 bursts using Alouette 2 satellite HF receiver voltage recordings
12 p2226 A70-28065

Type 3 solar bursts theory covering beam-type instabilities and quasi-linear relaxation of fast electron distribution functions
13 p2478 A70-29389

Solar type 3 burst theory, considering plasma wave energy conversion into radio emission
15 p2802 A70-32484

Kinetic temperature estimate for solar corona based on time profile of type 3 bursts
15 p2805 A70-32720

Dynamic spectra of type 3 solar bursts fromOGO-3 antenna/radiometer observations
17 p3150 A70-34835

Type 3 solar bursts classification, measuring diameter, lifetime and position
17 p3151 A70-35581

Type I burst effects on type III and V bursts occurrence, suggesting Langmuir waves excited by suprathermal electrons
17 p3173 A70-35746

Position scatter of 80 MHz sources of type 3 solar bursts reflecting outer corona structure
21 p3891 A70-41182

Solar type 3 burst theory, considering plasma wave energy conversion into radio emission
23 p4240 A70-43908

Solar VHF radio spectra indicating type 4 burst activity associated with type 3 formation
24 p4401 A70-45318

TYPE 4 BURSTS

Coronal electron densities and magnetic fields determined from K-coronameter and type 4 radio burst data
01 p0168 A70-10255

Radioheliograph observations of position and motion of type 2 and 4 radio sources during flares based on proton model
01 p0168 A70-10256

Microwave spectra of type 4 bursts at cm and dm waves compared to related PCA
02 p0359 A70-12774

Magnetic structure of type 4 solar outburst from continuous record of 80 MHz image and polarization
03 p0358 A70-13587

Magnetic field effect on burst emissions in plasma frequency range, observing radiation band widening and modes transmission in terms of Appleton-Hartree theory
10 p1949 A70-25273

Type 4 solar radio bursts compared with flare observations, geophysical effects and satellite monitors data to detect proton flares spectra
10 p1934 A70-25278

Type 2 and 4 solar radio emission, showing bursts excitation by common shock wave ejected from flare region
15 p2794 A70-32620

Moving type 4 solar burst on 1 March 1969 observed at 80 MHz, discussing plasma cloud associated with prominence

21 p3880 A70-40967

Shock wave excitation of type 2 and moving type 4 solar bursts from Culgoora radioheliograph and spectrograph recording

21 p3891 A70-41181

Solar type 4 event flux density and circular polarization radiopolarimetric recording, showing peculiar phases of short duration

22 p4095 A70-43263

Solar VHF radio spectra indicating type 4 burst activity associated with type 3 formation

24 p4401 A70-45318

TYPE 5 BURSTS

Type I burst effects on type III and V bursts occurrence, suggesting Langmuir waves excited by suprathermal electrons

17 p3173 A70-35746

U MANOMETERS

U.S.S.R.

Reflector radio telescope of Pulkovo Astronomical Observatory noting high resolution

01 p0094 A70-11585

Soviet SS-9 ICBM role in international debates over antiballistic missile, multiple independently targeted reentry vehicles, superhard silos and offensive forces

04 p0760 A70-14501

Quasi-optical design methods applied to mm microwave resonators characterized by high Q and low spectral densities

04 p0655 A70-14623

Space role in competition between U.S. and U.S.S.R. since August 1957, discussing armament control agreements regarding space

07 p1426 A70-18882

Parametric amplifier for spectral radiometer of U.S.S.R. astronomical telescope, showing improved sensitivity observations of neutral H emission

08 p1473 A70-21066

Meteorite craters on U.S.S.R. territory, discussing impact, explosive and complex craters

12 p2311 A70-28308

U.S.S.R. SPACE PROGRAM

Visual photometric tracking data obtained in SPIN program for satellites 1965-II-4 and 1965-53-6 at Kishinev station

03 p0444 A70-13181

TV data transmitted by Iantar series automatic ionospheric laboratories released by geophysical rockets at 100-400 km, discussing plasma-ion propulsion system performance

04 p0735 A70-14936

Soviet Venus probes Venera 1, 2, 3, 4 and 5 emphasizing aims, implementation means and information yields influence on theory of solar system planets origin and evolution

04 p0757 A70-15672

Soviet unmanned spacecraft and components displayed at Le Bourget show, including Molniya 1, Proton 4 satellites, Venus 4 station, vertical cosmic probe, etc

05 p0921 A70-15814

Soviet aerospace manufacturing technologies development, considering forging, extrusion, metal working and joining, etc

05 p0853 A70-15826

Soviet space activities /1969/, discussing Soyuz orbital flights, Venera probes, Zond lunar orbiters and Proton 4 space laboratory scientific results

05 p0917 A70-16862

Soviet manned space flight radiation dosimetry evaluation, comparing U.S. and Soviet techniques for astronaut protection

06 p0990 A70-17271

Space flight candidate selection and physical training, comparing American and Soviet training programs for efficiency and physical requirements

07 p1216 A70-18792

Soviet Venus probes 5 and 6 observation data concerning Venus atmospheric composition, temperature and pressure, etc

08 p1568 A70-20624

Soviet cameras for photographic observation of artificial celestial bodies, noting equatorial platform mount, mirror lenses and installations

10 p1892 A70-25128

Soyuz 6, 7 and 8 group flight as step in Soviet space program to place manned station in earth orbit

11 p2121 A70-25623

Soviet lunar and interplanetary space missions during 1969 including Venera, Cosmos, Luna and Meteor satellite activities

13 p2505 A70-28901

Signal analysis from Russian Cosmos, Proton and Soyuz satellites, showing pulse width and pulse code telemetries

14 p2551 A70-30975

Monograph on upper atmosphere and outer space studies in U.S.S.R. /1969/ covering Soiuz 4, 5, 6, 7, 8 and Venera 5, 6 flights

15 p2829 A70-31702

Soviet and American lunar exploration by probes, manned surveillance flights and lunar landings, discussing NASA program

18 p3238 A70-37079

Soviet communication satellites orbit and design characteristics, operational uses and ground stations, discussing Molniya 1 series transmitting television, multichannel radio, telephone and telegraphy

18 p3230 A70-37225

U.S. and Soviet space program administration and management

21 p3956 A70-41893

International space program cooperation, discussing NASA projects, Apollo 11 flight and European and Soviet programs

22 p4129 A70-43655

UBV SPECTRA

Photometric measurements in Cygnus, analyzing formulas used for conversion to standard UB system for Javan reflector /Sweden/

02 p0297 A70-12065

Photoelectric UB photometry of stars in Carina, Vela and Centaurus, giving standard connection sequences for continued photometry

02 p0370 A70-12074

Multicolor photometry of Orion flare stars in U, B, V and R, constructing diagrams confirming flare stars scattering about main sequence

03 p0567 A70-13317

Icarus asteroid positions, UB magnitude, brightness, colors, light curves and polarization, noting stony-iron composition

11 p2113 A70-26470

Bright southern Cepheids UB observations, discussing blue companion effect on two color plot

14 p2639 A70-30726

Binary AX Monocerotis brightness variations in UV from photoelectric UB observations

15 p2796 A70-31610

Absolute photovisual magnitude and classification of supernova in NGC 3389 spiral galaxy, using UB measurements and comparison stars

15 p2797 A70-31611

Three color photometry of RW Auriga stars, discussing UB curves, H-R diagram and UV emission excess

15 p2797 A70-31612

Nova HR Delphini 1967 UB photometric photometry, examining absolute magnitude, distance, response curves and spectra

21 p3889 A70-41154

UBVr colors of A0-K0 main sequence stars, deriving B-V relation to effective temperature

23 p4246 A70-44757

Radial velocity-light amplitude ratios of grouped variable stars in continuous sequence, comparing pulsation prediction

23 p4247 A70-44793

A type stars rotation, examining UB color and rotational velocity relationship, spectral classification and spectroscopic binaries

23 p4251 A70-44822

Photographic photometry in astronomy, considering Becker method and UB system

24 p4333 A70-45145

Southern early stars away from galactic plane, reporting magnitudes and colors on UB system and MK spectral classifications

24 p4404 A70-45412

UDIMET ALLOYS

Creep-low cycle fatigue interactions in Udimet alloy at elevated temperatures, investigating cumulative damage

06 p1086 A70-17455

UH-1 HELICOPTER

UH-1C, AH-1G and UH-1H helicopters combat operational flight profiles, considering airspeed, altitude, rotor speed, load factor, etc

17 p3014 A70-34717

U.S. Army UH-1/ AH-1 helicopter maintainability and reliability field program, including statistical data

19 p3356 A70-38827

UHTREX [NUCLEAR REACTORS]

U HIGH TEMPERATURE NUCLEAR REACTORS

ULLAGE

Gas-wall heat losses reduced and heated gas pressurization systems performance improved by ullage mixing by gas flow from pressurant injectors

16 p2962 A70-33581

ULLAGE ROCKET ENGINES

Saturn ULLAGE solid propellant rocket motor vibration test evaluation

07 p1365 A70-20039

ULM [LIGHT MODULATION]

U ULTRASONIC LIGHT MODULATION

ULNA

Mechanical and morphological characteristics of overload and fatigue in dog ulnas, showing elastic and plastic deformation zones

15 p2682 A70-31935

Ulnar resonant frequency reproducibility as objective measure of skeletal status, discussing forearm and hand positioning effect

20 p3579 A70-39432

ULTRA SHORT WAVE RADIO EQUIPMENT

U VERY HIGH FREQUENCY RADIO EQUIPMENT

ULTRAHIGH FREQUENCIES

UHF signal amplification by electron beam-plasma interaction, defining amplification frequency ranges

01 p0043 A70-10658

Transient Faraday rotation of S-band telemetry carrier observed during Pioneer 6 occultation by solar corona, correlating with decametric solar radio bursts

02 p0369 A70-12059

UHF ranging system principles, discussing output proportional to approach angle

02 p0257 A70-12179

Airborne UHF transmitters, discussing data on designs, performance, packaging and limiting factors of solid state devices for RF utilization

02 p0267 A70-12183

UHF radio telemetry system using pulse signal to measure and transmit sea waves amplitude and frequencies data to shore-based recorder

03 p0453 A70-14352

Circular polarization measurements of Jovian decimeter radiation by 210-ft radio telescope at Goldstone, California

05 p0921 A70-16986

S-band omnidirectional antenna patterns measurement procedure and results for Apollo spacecraft configurations, tabulating measure gains

06 p1019 A70-15707

L band transponder design for aeronautical satellite, giving block diagrams

07 p1234 A70-19292

Galvanoplasty process for parts for UHF circuits, discussing cost, safety and quality

08 p1468 A70-20611

UHF transistor power amplifier, discussing CW and pulse performance and power gain

08 p1477 A70-21294

Integrated CW UHF power amplifier modules using thin film lumped elements and UHF power transistor chips

10 p1846 A70-23884

Tunable L band high power anomalous mode avalanche diode oscillator with coaxial circuit

10 p1847 A70-23888

Silicon L-band avalanche diodes as high power pulsed microwave sources, discussing fabrication, circuit requirements, radar applications, etc

10 p1852 A70-24893

Air traffic control system using ground controlled satellite-borne phased array antenna to overcome UHF downlink path loss

11 p2077 A70-25421

Aerial and ground UHF noise measurement in Phoenix area, correlating air and ground data

11 p2001 A70-25480

Microwave acoustic delay lines design and fabrication for UHF to X band frequency ranges

11 p2005 A70-26163

Discrete extragalactic radio sources integrated linear UHF polarization values, discussing optical identification and radio spectral index correlations

11 p2117 A70-26656

UHF frequency doubler with series-parallel array of eight punch-through diodes, preventing spurious oscillations

12 p2196 A70-27650

Cassiopeia A high resolution map at UHF revealing main source physical characteristics and enhanced emission compact components

12 p2309 A70-27976

High power L-band avalanche diode oscillators fabrication and performance

13 p2376 A70-28977

High power L- and S-band transferred-electron oscillators from epitaxial GaAs

13 p2377 A70-28978

Radio sources positions on solar disk by 2800 and 408 MHz high resolution fan beams

13 p2491 A70-29161

Parametric excitation of potential oscillations in plasma near cyclotron frequency subjected to UHF electric and constant magnetic fields

13 p2463 A70-29281

UHF propagation measurement over sea for varying surface refractivity and meteorological conditions, noting diurnal variations

14 p2549 A70-30513

Synchrotron model involving electron trapping in dipolar magnetic field for Jupiter decimetric radiation

14 p2649 A70-31089

UHF Si p-n-p transistors with low noise and high gain for small signal applications

14 p2557 A70-31161

S band transmitters frequency deviations optimization enabling designer to determine optimum value within constraints of associated receiving equipment

14 p2559 A70-31373

S band GaAs FET fabrication technology and frequency response 16 p2877 A70-33414

Lx band characteristics and utilization, describing evolutionary systems based on TACAN and IFF 16 p2948 A70-33452

Cosmic ray air showers UHF emission detection at 500 MHz 17 p3151 A70-34850

Wideband UHF amplification in bulk n-type GaAs during domain generation, comparing cut-off and Gunn frequency 17 p3143 A70-35684

Transmit only solid state radar module built with microstrip techniques for phased array systems operating at L and S dual bands 17 p3056 A70-35899

Solar radio bursts recording by spectrographs in 500-1500 MHz band, discussing sensitivity 18 p3307 A70-36109

Radio sources near 2 flux units at 408 MHz, presenting data on positions, optical identifications, angular size and flux densities 18 p3321 A70-37125

Multiquantum combination effects in ferrites at UHF frequencies 19 p3484 A70-37624

S band telemetry antenna with electronic tracking and polarity diversity for remote location missile testing 19 p3388 A70-37901

ATS-5 spacecraft L band propagation performance, describing up and downlink test methods 21 p3790 A70-41363

Tunable high efficiency high peak power UHF avalanche diode oscillator 21 p3800 A70-42117

P-n junction dependent FM noise spectrum of UHF transistor power oscillator at transit frequency 23 p4161 A70-43789

Transistorized power amplifiers, frequency multipliers and parametric multipliers design for VHF and UHF ranges 23 p4170 A70-43876

ULTRAHIGH VACUUM

Solar simulator built into multivall ultrahigh vacuum chamber, describing simulator and chamber modifications 09 p1657 A70-23264

Lead type channel electron multipliers gain degradation in ultrahigh vacuum 10 p1849 A70-24557

Titanium monoxide thin film as low temperature getter, measuring activity coefficient and capacity under ultra high vacuum 15 p2783 A70-31844

Gas formation by sliding friction of self lubricating Teflon with carbon black on steel in ultrahigh vacuum, using mass spectrometry [DFVLR-SONDDR-54] 15 p2745 A70-32446

Superhigh vacuum pump with orbitron ionizer, describing construction and ionization 16 p2843 A70-33214

Space molecular sink simulator facility (Molsink) for extreme high vacuum outer space environment simulation, discussing Mariner Mars 1969 spacecraft components tests 16 p2889 A70-34167

Surface interaction between Al single crystals in ultrahigh vacuum, investigating galling, distortion and adhesion 16 p2924 A70-34168

Cryopumping systems of ultrahigh vacuum space environmental chambers 17 p3060 A70-35247

Ultrahigh vacuum gages absolute calibration by controllable conductance method, discussing accuracy 19 p3421 A70-37463

Ultrahigh vacuum calibration system for vacuum gages and mass spectrometers based on pressure attenuation and molecular beam techniques 22 p4029 A70-42620

Reaction kinetics of microbial sterilization in ultrahigh vacuum and in outer space 23 p4148 A70-44841

Ultravacuum measurement and calibration assembly for pressures down to one picotorr for vacuum gage standards 23 p4143 A70-44871

ULTRALOW FREQUENCIES

U EXTREMELY LOW RADIO FREQUENCIES

ULTRAPURE METALS

High purity V and V-Cr-Ti process, describing aluminothermic reduction and electron beam purification 15 p2761 A70-32387

ULTRASONIC AGITATION

Erythrocyte suspension subjected to gas bubble ultrasonic oscillation, investigating hemolysis mechanism 20 p3573 A70-39981

Pure Ni plastic flow threshold measurement under combined ultrasonic and static loadings, noting annealing 22 p4053 A70-42644

ULTRASONIC GRINDING MACHINES

U GRINDING MACHINES

U ULTRASONIC MACHINING

ULTRASONIC INSPECTION

U ULTRASONIC TESTS

ULTRASONIC LIGHT MODULATION

Diffraction shaped ruby laser monopulse during excitation of modulated ultrasonic traveling waves in phototropic Q switch 09 p1696 A70-22483

Longitudinal distortion reduction in ultrasonic holograms 09 p1689 A70-23805

Ultrasonic LF modulation of solid state traveling medium lasers radiation intensity attributed to elastic vibrations of rods 11 p2062 A70-25398

Ultrasonic effects on synchronization of ruby laser radiation, investigating emission pulse structure and peak sequence 12 p2245 A70-27297

Silicon elastic constant measurement by Debye-Sears effect, using He-Ne laser source 18 p3298 A70-36952

Ultrasonic LF modulation of solid state traveling medium lasers radiation intensity attributed to elastic vibrations of rods 20 p3643 A70-40092

Nondestructive testing by ultrasonic acousto-optical imaging in opaque objects 22 p4047 A70-43518

Ultrasonic light modulation using single crystal lithium niobate transducers in laser communication and information processing systems 22 p3992 A70-43734

ULTRASONIC MACHINING

Rotary Ultrasonic Machining with diamond tools for hard and brittle materials compared to ultrasonic impact grinding method 09 p1692 A70-22797

Drilling rates improvement for Ti by adding ultrasonic vibration to conventional process 19 p3437 A70-38421

Ultrasonic machining of glass and cemented carbide, measuring ambient pressure effect on workpiece removal rate 21 p3833 A70-41253

ULTRASONIC RADIATION

Titanium carbide sintering under continuous heating in Ar atmosphere, studying ultrasonic waves effects on compaction process 04 p0696 A70-14463

Standing wave ratio of ultrasonic field determined by holographic method, using acoustic transmission lines with termination impedances 05 p0848 A70-16403

Structural analysis of thin walled cylinder material using normal ultrasonic wave to achieve high resolution determination of components 06 p1172 A70-18630

LF ultrasound not producing irreversible denaturation of blood serum proteins but capable of modifying electrophoretic properties 07 p1206 A70-19470

Ultrasonic vibration effect on strength and plastic properties of metals undergoing torsion tests 08 p1520 A70-21499

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation 08 p1486 A70-21808

Ultrasonic pulse frequency spectrum analyzer, describing electronic components, transducer type and positioning, beam collimation, applications in testing, etc 10 p1895 A70-24830

Ultrasonic wave absorption and dispersion in mixtures of air and water vapor with water droplets, investigating equilibrium distribution and hydrodynamic equations [ASTME PAPER MR-69-733] 11 p2085 A70-26691

Acoustographic imaging system (AGIS) using liquid crystal detection screen to provide color display of ultrasonic wave information 12 p2235 A70-27724

Ultrasonic wave propagation guided by fluid layer between two elastic solids, plotting normalized velocities and layer thicknesses 12 p2273 A70-28097

Interference phenomenon observable by ultrasonic fields visualization in 1-10 MHz range, discussing beam stratification 13 p2404 A70-28646

Amplitude modulation of ruby and neodymium-doped glass lasers via ultrasonic acoustic wave injection 16 p2926 A70-33162

Elastic constants for plates of unidirectional fiber reinforced anisotropic composite material determined by ultrasonic wave propagation 16 p2991 A70-33847

Ultrasonic pulses velocity and attenuation in fluids by coherent detection technique, measuring delay and

decrease in amplitude due to transmission path length increase 16 p2913 A70-34084

Sound wave phase fluctuations from ultrasonic waves traveling through turbulent wakes of circular cylinders and plates, using multichannel pulse height analysis 16 p2839 A70-34086

Transient signal generation during large amplitude ultrasonic pulse propagation through carbon tetrachloride 16 p2952 A70-34097

Holographic techniques, investigating ultrasonic fields in transparent media based on light separation by grating into optical moments 16 p2915 A70-34330

Martensitic phase change effects in TiNi on ultrasonic waves propagation in transition region, using pulse echo measurements 17 p3126 A70-35603

Combined ultrasonic and ionizing radiation effects on electrophoretic mobility of tumor cells from albino mice 17 p3034 A70-35762

Ultrasonic irradiation effects on steel hardenability and carbon diffusion rate during annealing, noting microstructure 18 p3273 A70-36049

Ultrasonic surface waves amplification in piezoelectric crystal-Si semiconductor system, observing dependence on permittivity 19 p3488 A70-38675

Ultrasonic sensor for detecting altitude and vertical velocity of aircraft near ground, applying to helicopter hovering flight or conventional airplane takeoff and landing [AIAA PAPER 70-1031] 20 p3631 A70-39506

Phase velocity and attenuation of shear waves in gases from sampled-CW ultrasonic crystal resonator reflection measurement 21 p3827 A70-41457

Pulse superposition measurements of small ultrasonic waves velocity changes using automatic recording phase sensitive detection 21 p3827 A70-41468

Frequency shifted diffraction of monochromatic Gaussian light beam by reflection off ultrasonic surface wave 21 p3850 A70-41907

Ultrasonic absorption in gaseous molecular relaxation processes, considering error due to neglecting thermal conductivity effect on frequency dependence 22 p4073 A70-42649

Ultrasonic and electron paramagnetic double resonance in Fe-doped corundum 22 p4074 A70-43010

Ultrasound inductive absorption coefficient of metals in quantized magnetic field 22 p4075 A70-43474

Ultrasonic absorption in SbSI semiconducting semiconductor as function of temperature, illumination and constant electric field strength, noting absorption coefficient rise near Curie point 24 p3899 A70-45207

Sintered material density-sound velocity relation, deriving ultrasonic wave propagation time dependence 24 p4360 A70-45731

ULTRASONIC SOLDERING

Ultrasonic Al wire bonding for microelectronic applications, discussing tensile strength dependence on machine parameters and aging 15 p2747 A70-32647

ULTRASONIC SPEEDS

U SUPERSONIC SPEEDS

ULTRASONIC TESTS

Ultrasonic detection of service induced cracks near tenon base region of second stage Al compressor disks 01 p0096 A70-10003

Ultrasonic detection system for crack initiation and propagation in notched low cycle axial fatigue testing using surface and longitudinal waves 01 p0096 A70-10004

Ultrasonics inspection applied to reentry vehicle heat shields and composite materials, verifying anomalies by microscopic area examination 01 p0097 A70-10016

Lamb wave techniques using guided ultrasonic waves for solid cylindrical objects nondestructive testing 01 p0098 A70-10019

Ultrasonic methods for materials evaluation, discussing goniometry, measuring techniques and acoustic wave propagation in various materials 01 p0104 A70-10878

Aluminum alloys fatigue properties tested at ultrasonic frequencies 01 p0120 A70-10879

Ultrasonic image superposition technique for visualization of impact fractures in glass reinforced plastics 01 p0059 A70-11101

Aircraft nondestructive testing, discussing radiography requirements, ultrasonic bond testing technique, etc 01 p0104 A70-11319

Ultrasonic wheel-type portable inspection device with internal coupling immersion fluid contained in silicone tire, allowing angle beam inspection without temperature correction

01 p0105 A70-11396

Inexpensive schlieren system for medical ultrasonic research, discussing equipment and application to short wave transducer beam patterns used in ophthalmology

02 p0300 A70-12472

Ultrasonic tracking type transducers for testing ribbed and smooth walled pipes using shadow and two probe echo methods

02 p0300 A70-12480

Electrodynamic contactless method for ultrasonic nondestructive testing of materials based on natural frequencies shift with and without defects

02 p0301 A70-12483

Optimum prism angles and ultrasonic frequencies for detecting fatigue cracks

02 p0301 A70-12487

Ultrasonic Doppler method for timing mitral and aortic valves rapid movements, using filter to eliminate LF signals due to heart walls

03 p0432 A70-12891

Al alloy rectangular beam stress corrosion crack initiation and propagation measurement using ultrasonic techniques, showing relationship between crack velocity and initial stress

[SESA PAPER 1564]

03 p0481 A70-12958

Materials fatigue failure ultrasonic early detection by continuous surface wave irradiation

06 p1077 A70-17920

Nomograms for ultrasonic shadow defectoscope acoustic channel parameters calculation

06 p1065 A70-17921

Ultrasonic surface waves detection of transverse fatigue crack initiation in rails under load, applying results to fatigue life determination

06 p1168 A70-17924

Nondestructive testing of small metal tubing, discussing eddy current, ultrasonic and electromagnetic inspection and dye penetrants

08 p1509 A70-21748

Ultrasonic testing of hydraulic liquids and aircraft and engine lubricating oils resistance to viscosity decrease, analyzing large molecule compounds disintegration

09 p1693 A70-23405

Ultrasonic traveling waves for nondestructive testing, discussing scattering and velocity anisotropy in polycrystalline metals, propagation in glass, epoxy resins shear moduli, etc

10 p1894 A70-24171

Ultrasonic pulse frequency spectrum analyzer, describing electronic components, transducer type and positioning, beam collimation, applications in testing, etc

10 p1895 A70-24830

Ultrasonic echography for ventricular size determination, calculating stroke volume and valvular regurgitation severity

10 p1820 A70-24938

Ultrasonic pulse technique for measuring fiber reinforced composites elastic constants

11 p2052 A70-26341

Elastic stiffness of unidirectional glass reinforced epoxy fiber composite determined from ultrasonic velocity measurements

11 p2071 A70-26692

Nonlocalized ultrasonic defectoscopy resonance method for qualitative difference determination of small sized articles of complex form

13 p2417 A70-28662

Nondestructive bond inspection by interferometric holography of ultrasonically excited plates

14 p2588 A70-31166

Ultrasonics for steel cleanliness rating, considering advantages and fatigue life

15 p2743 A70-31768

High temperature metal fatigue crack growth monitoring by ultrasonic detection

[SESA PAPER 1622]

15 p2744 A70-32321

Training effect on strength per unit cross sectional area of arm muscle, using ultrasonic measurement

17 p3024 A70-34592

Single ventricle and hypoplastic left and right heart syndromes, investigating with reflected ultrasound

17 p3032 A70-35472

Ultrasonic measurement of temperature distribution in solid, liquid and gaseous media, using reflection and transmission techniques

19 p3427 A70-37963

Holographic ultrasonic imager using liquid surface detector for real time imaging of test objects moving through viewfield, discussing nondestructive test applications

19 p3433 A70-38829

Ultrasonic pulse echo flaw detection, relating defect size to echo amplitude

20 p3636 A70-39192

Ultrasonic nonsearch Doppler cardiography for cycle phase analysis, recording single functions

20 p3581 A70-40199

Elastic wave propagation mathematics in visual form for ultrasonic testing

21 p3831 A70-40746

Nondestructive ultrasonic measurements of crack depth in high strength steel plate weldments, studying low cycle fatigue

21 p3834 A70-41943

Ultrasonic spectroscopy in nondestructive materials tests, discussing electronic equipment design, FM, pulse and pulsed FM methods

22 p4027 A70-42583

Ultrasonic imaging systems of nondestructive testing, discussing photographic and chemical systems, thermal, optical and mechanical methods and electronic systems

22 p4027 A70-42584

Ultrasonic Rayleigh critical angle reflectivity of liquid-solid interface energy, detecting near-surface properties changes

22 p4027 A70-42585

Ultrasonic holography for nondestructive testing, discussing reference beams and analogies to optical and electronic methods

22 p4028 A70-42586

Ultrasonic detection of tooth surface layer demineralization, noting surface and subsurface enamel structural differences

22 p3978 A70-42955

Ultrasonic wave velocity measurements for flaw detection and modulus of elasticity of carbon-carbon composites

22 p4047 A70-43519

Ultrasonic velocity in human bones measured for calcium content and density

22 p3979 A70-43522

Acoustic fields of circular, rectangular and line focused ultrasonic emitters for small defect detection

22 p4048 A70-43618

Apparatus characteristics determination for ultrasonic inspection, recommending calibration block

22 p4041 A70-43622

Ultrasonic crack detection in fastener holes in C-5A wings

24 p4341 A70-45571

Ultrasonic delta technique inspection method for flaw detection in weldments or wrought materials

24 p4335 A70-45572

Reflector materials flaw size and orientation using ultrasonic spectral frequency analysis

24 p4335 A70-45573

Nondestructive testing - Conference, Hanover, June 1970, Ultrasonic, Part 1, Instruments, methods and defect evaluation

24 p4342 A70-45680

Noncontact electromagnetic acoustic transducer/E-MAT/ for metallic products ultrasonic thickness testing

24 p4336 A70-45682

Thickness measurement and internal defects inspection by ultrasonic resonance technique

24 p4343 A70-45683

Ultrasonic pulse emitter with interference-free near field and sidelobe suppression for materials testing

24 p4343 A70-45685

Angle beam ultrasonic testing of metals, considering beam and depth scanning characteristics and wave reflectability of various flaws

24 p4343 A70-45687

Flaw echo height dependence on ultrasonic testing pulse frequency spectrum

24 p4336 A70-45688

Defect size estimation, using ultrasonic angle beam probes and distance-gain-size/DGS/ diagram

24 p4343 A70-45689

Ultrasonic inspection sensitivity loss, discussing depth compensation methods

24 p4343 A70-45690

Cylindrical boreholes as reference defects in ultrasonic inspection, discussing geometrical parameters effects on echo height

24 p4343 A70-45691

Automated ultrasonic testing and facsimile data recording systems, discussing aerospace, marine and automotive applications

24 p4343 A70-45692

Crack detection in cyclic strained steel and Al alloys, using ultrasonic Rayleigh and longitudinal waves

24 p4424 A70-45718

Nondestructive examination for plastics, discussing transmission, microwave and ultrasonic tests

24 p4346 A70-45720

ULTRASONIC WAVE TRANSDUCERS

High temperature thermometer using pulsed excitation ultrasonic resonance with ruthenium sensor, discussing resonator types, transmission lines and transducer

02 p0300 A70-12468

Piezoelectric transducers performance in ultrasonic devices evaluated from loss and admittance measurements, using Mason equivalent circuit method

03 p0496 A70-14026

Ultrasonic flowmeter with electronic components, discussing flow rate parameters and wave propagation relative to flow

12 p2236 A70-28074

Doppler effect pulsed ultrasonic blood flowmeter using transducer alternating as transmitter and receiver

15 p2690 A70-31919

Left ventricular dynamics ultrasonic visualization, involving catheter-borne transducers array and computer for data acquisition and display

18 p3225 A70-36750

Ultrasonic transducer diffraction fields in highly anisotropic crystals obtained by plane waves angular spectrum

22 p4029 A70-42643

Contactless electrodynamic ultrasonic transducers design and operation, discussing applications and developmental state

24 p4343 A70-45684

Ultrasonic angle probes with circular and rectangular transducers, discussing radiation field characteristics

24 p4336 A70-45686

ULTRASONIC WAVES

U ULTRASONIC RADIATION

ULTRASONICS

Ultrasonic imaging of internal structure by Bragg diffraction, noting reflection and dark field extension and use for flaw detection and medical diagnostics

01 p0111 A70-10570

Ultrasonics for industry - Conference, London, October 1969

01 p0089 A70-10877

Transcutaneous Doppler-shift flowmeter for arterial blood velocity measurement by ultrasound

01 p0037 A70-10880

Ultrasonic imaging system for flaw detection, analyzing welds

01 p0104 A70-10881

Ultrasonic holography in nondestructive testing, discussing metal block with simulated defects

01 p0089 A70-10882

Piezoelectric ultrasonic crystal on cardiac catheter tip measuring cardiac diameter in vitro and in excised canine hearts

01 p0038 A70-11025

Ultrasonic atomizer system for liquid fuels combustion

02 p0356 A70-12470

Ultrasonic beam scanning measurements in high temperature axisymmetric gas flow, discussing errors and use of numerical transformation methods

04 p0685 A70-14536

Laser beam trajectory equation in scanning ultrasonic cell for nonzero incidence angle, relating input and output beam divergence

07 p1300 A70-19865

Uncontrolled and controlled neodymium glass laser outputs, using ultrasonic traveling wave diffraction modulator

08 p1510 A70-20514

High intensity ultrasonics for changing solids properties, discussing effects on metal powder sintering, yield strength, fatigue life, crystallization rate, etc

09 p1728 A70-23348

Ultrasonic vibrations effects on microstructure and mechanical properties of polycrystalline titanium during phase recrystallization

10 p1903 A70-23863

Thermal imaging device adaptable to IR, microwave or ultrasound radiation, projecting image on heat sensitive surface

11 p2050 A70-25643

Thermodynamic and transport properties of high temperature and pressure gases measured with ultrasonic pulse technique

11 p2147 A70-25753

Isotropic finite strain expressions for compressional and shear velocities, noting no discrepancy with ultrasonic and seismic data

20 p3619 A70-39218

Hydraulic fluids and lubrication oils resistance to mechanical shear forces by ultrasonic method based on acoustically induced cavitation effects

20 p3655 A70-39718

Ultrasonic measurements of flow velocity and fluid rate, using high speed switching and synchronous demodulator

22 p4041 A70-43619

ULTRAVIOLET ABSORPTION

Impurities effects on UV absorption in semiconductors, deriving kinetic type equation for two particle Green function

13 p2471 A70-29511

Solid state laser glass filters for absorbing UV light emitted by pumping tubes

20 p3641 A70-39739

ULTRAVIOLET FILTERS

Diffraction filters characteristics used in XUV spectroscopy involving solar, stellar and laboratory experiments

09 p1729 A70-23526

Solid state laser glass filters for absorbing UV light emitted by pumping tubes

20 p3641 A70-39739

ULTRAVIOLET LIGHT

U ULTRAVIOLET RADIATION

ULTRAVIOLET PHOTOMETRY

- UV photometry of stars and galaxies from OAO-2, discussing instruments and observational results
02 p0378 A70-12580
- UV photometry from OAO, observing planets, gaseous nebulae, X ray source, quasars, Crab Nebula, extragalactic nebulae, etc
02 p0303 A70-12705
- Stratospheric balloon measurement of near UV from early type stars, discussing gondola, observation method, telescope and photographic recordings analysis
04 p0750 A70-14704
- UV rocket-borne up-down photometer measuring zenith and nadir intensities for auroral profile studies
06 p1072 A70-18518
- Solar far UV continuum photometry illustrating spectral temperature minimum transition, comparing to far IR temperature
13 p2496 A70-29841
- Photometric calibration changes in EUV solar satellite instruments during orbital operation
15 p2737 A70-32045
- Far UV photometer for space research, isolating specific bands by combining spectral response of individual solar blind photocathodes with thin metallic films transmission qualities
17 p3096 A70-35766
- Satellite-borne UV TV system for photometric investigations of UV stars
19 p3428 A70-38456
- UV photometry from OAO-2, describing Wisconsin instrumentation and equipment
20 p3624 A70-39009
- Atmospheric horizontal stratification and UV transmittance by signal reflection from satellites
23 p4191 A70-44268

ULTRAVIOLET RADIATION

- NT FAR ULTRAVIOLET RADIATION
NT LYMAN ALPHA RADIATION
NT NEAR ULTRAVIOLET RADIATION
- Coherent short wave and UV radiation generation using continuous ion gas laser, discussing efficiency, stability and feedback effects
01 p0108 A70-10356
- UV sensitive spiropyran films coloration mechanism and color structure stabilization, discussing film and laser applications to optical data recording and storage
01 p0086 A70-10357
- Tissue protein changes under visible and UV radiation noting denaturation, chemical bonds, protein configurations, clinical disease patterns, etc
01 p0022 A70-10856
- UV radiation effects on mucopolysaccharide compounds in tears and on cornea epithelium of albino rabbits
01 p0037 A70-10860
- Keratinocyte development on epidermal surface of female patient exposed to cosmetic UV irradiation with quartz lamp
01 p0029 A70-11406
- Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae
01 p0095 A70-11614
- Cs seeding effect on bound-free UV photoabsorption of Cs-H plasma at constant electron density and energies below H ionization
02 p0343 A70-11904
- He-Ne ring lasers with plane mirrors investigated for amplitude and frequency characteristics at high gain operation at 3.39 microns
02 p0312 A70-12099
- Atmospheric penetration of UV and visible solar radiation during twilight, oxygen and ozone absorption, Rayleigh scattering and atmosphere refraction
02 p0357 A70-12155
- Multicolor Venus photography, discussing anomalous markings association with anomalous UV polarization
02 p0378 A70-12557
- Venus photography in UV by 61-inch telescope, discussing low contrast clouds recognition technique
02 p0378 A70-12558
- UV radiation scattering and rocking instrument error source in vertical ozone profile determination with optical ozone probes
03 p0557 A70-13296
- UV Ceti type flare stars observational and theoretical results related to nebular or chromospheric flare models
03 p0566 A70-13316
- Atmospheric absorption anomalies of UV sunlight near 50 km altitude in rocket-borne radiometer determination of ozone distribution
03 p0478 A70-14197
- UV radiation propagation in atmospheric boundary layer, analyzing solar UV background and UV signal attenuation along horizontal path
05 p0882 A70-16241
- Horizontal atmospheric surface layer propagation path for 3370 A UV signal, studying reception distances for given SNR
05 p0812 A70-16242

- X and UV radiation effects on Escherichia coli B/r in vacuum, noting irradiated cell inactivation and radiation sensitivity increases
06 p0995 A70-17750
- Previous radiation exposure effect on photographic film noting increased sensitivity at UV frequencies
06 p1065 A70-17890
- Ar beam scattering and UV radiation from glass target surface with adsorbed gas layer
06 p1112 A70-18274
- Absorption cross sections for single and double molecules of oxygen and in UV region noting disagreement with Beer law
06 p1114 A70-18632
- UV radiation effects on pea plant chloroplasts photosynthesis at high altitudes, noting disruption of electron-transport chain reactions and cyclic phosphorylation
08 p1445 A70-21216
- Center to limb variation of solar brightness measured at 5, 10 and 20 microns, discussing data collection and reduction and previous IR and UV measurements
08 p1562 A70-21396
- Supernova fluorescent light excited by radiation impingement on material surrounding explosion site, assuming explosion time and UV energy
09 p1749 A70-21997
- Photon scattering by Ar in vacuum UV measured for cross sections
09 p1730 A70-22071
- Ozone formation in presence of nitrogen oxides and hydrocarbons during long wave UV irradiation, noting energy yield
09 p1629 A70-22328
- Mariner 6 spectra establishing Fox-Duffendack-Barker bands and ionized carbon dioxide UV doublet bands as important components of Martian dayglow
10 p1938 A70-24073
- Mirror adjustment effect on transverse structure, time dependence and spatial coherence of pulsed UV molecular nitrogen laser emission
11 p2062 A70-25394
- Open magnetic electron multipliers /MEM/ with continuous dynode and field strips for satellite-borne detection systems, emphasizing extreme UV detectors
11 p2049 A70-25628
- Iron cyanide additive for surface stabilization of ZnO irradiated with UV in vacuum
12 p2181 A70-27258
- Raman scattering by oxygen and nitrogen in atmosphere observed by using pulsed nitrogen UV laser
12 p2189 A70-28093
- Dye laser small signal gain via pumping by UV nitrogen laser
13 p2426 A70-28811
- Flashlamp-excited organic liquid UV lasers
13 p2427 A70-29141
- Hereditary UV luminescence of transplanted cancerous and lymphosarcomatous cells in mice and rats after ionizing radiation exposure
13 p2358 A70-29341
- Stimulated emission cut-off characteristics of laser based on crystals with Nd ions under UV irradiation
13 p2429 A70-29505
- UV, visible and IR radiation measurement, discussing spectral distribution, thermopiles, monochromatic radiation and power measurements
13 p2410 A70-29653
- Crossed field nitrogen laser operation in second positive band to obtain high UV pulse output
13 p2429 A70-29669
- Spectral characteristics of secondary emission alloys for photocathodes in extra atmospheric radiation open-type detectors in UV range
14 p2582 A70-30166
- Retrograde rotation of equatorial spots of Venus cloudy exterior layer, using UV photographic and spectroscopic observations
14 p2649 A70-31215
- Hydrogen UV geocorona photoionizing effect on nighttime E region electron density in low and midlatitudes, comparing with ionosonde data
14 p2581 A70-31270
- Binary AX Monocerotis brightness variations in UV from photoelectric UVB observations
15 p2796 A70-31610
- Three color photometry of RW Auriga stars, discussing UVB curves, H-R diagram and UV emission excess
15 p2797 A70-31612
- Gas pressure effects on visible and UV laser action in small argon Z-pinch plasma discharge, using streak photographs
15 p2750 A70-31968
- Intercomos 1 satellite for observing solar UV and X-ray emission in solar flares prediction
15 p2738 A70-32145
- UV irradiation effects on ZnO used as pigment for spacecraft thermal control coatings [AIAA PAPER 70-829]
16 p2940 A70-33937
- ZnO coating pigment for spacecraft thermal control, examining UV irradiation effects on electrical properties
16 p2961 A70-34056

- Photolysis of 3-phenyl-oxadiazol-5-one by UV irradiation, eliminating carbon dioxide
17 p3041 A70-34772
- UV interstellar extinction from comparison of epsilon and zeta Persei, noting graphite features
17 p3159 A70-34877
- UV interstellar extinction, examining reddened and unreddened early stars with OAO satellite spectrophotometric scans
17 p3159 A70-34878
- UV stellar spectra absorption, considering silicon and carbon opacity effect on Balmer discontinuity and Paschen continuum
17 p3159 A70-34880
- Stellar UV and visual continuum observations, discussing recalibration of absolute energy distribution of alpha Lyr to improve model atmospheres
17 p3160 A70-34881
- UV solar opacity observations, comparing solar model predictions
17 p3160 A70-34884
- Supergiant alpha Car UV spectrophotometry from Gemini II, comparing with model atmosphere
17 p3161 A70-34888
- Galactic UV emission attributed to solar radiation scattered by hydrogen atoms, using Mariner 5 measurements
17 p3163 A70-34902
- UV background radiation observed above atmosphere for intergalactic gas, Galaxy and subcosmic ray components
17 p3163 A70-34903
- Ozone content effect on presunrise fall in LF radio waves amplitude from Radio Tashkent to Delhi, noting UV light role
17 p3077 A70-34947
- Multispectral UV sky mapping and heavenly body intensity measurement onboard OAO 2 satellite
17 p3179 A70-35264
- Tropical UV nightglow, considering oxygen ion-ion neutralization reaction as primary source
18 p3244 A70-36015
- Upper atmospheric gas components vertical distribution by airborne photometric absorption and attenuation measurements in UV spectrum
18 p3248 A70-36633
- Solar UV radiation contributing to ionization in higher ionospheric layer over Dushanbe during partial solar eclipse of 20 May 1966
19 p3417 A70-38786
- High speed electro-optic spectral scanning in UV, visible and IR regions, using monochromator deflection of dispersed light
20 p3671 A70-39090
- UV oxygen nightglow observation by OGO-4, examining ion-ion neutralization and radiative recombination production mechanisms
20 p3621 A70-39344
- UV and nonthermal X ray interaction with intergalactic gas, considering photoionization and recoil associated with Compton X ray scattering
21 p3878 A70-40706
- Molecular oxygen density and vibrational distribution in lower atmosphere, observing solar UV radiation absorption by satellite OSO-4
21 p3816 A70-41066
- Near earth solar UV flux measurement by Spades satellite, discussing nonrandom variations and Ca plage regions
21 p3881 A70-41078
- Auroral UV night airglow radiation distribution over latitude range, using scanning spectrometer onboard Convair 990 aircraft
21 p3818 A70-41106
- Luminescence efficiencies of Apollo 11 lunar and terrestrial rocks and minerals, using UV excitation
21 p3915 A70-41656
- UV Ceti type variable flare stars, observing radio and optical spectral regions for X ray production
24 p4397 A70-45763
- UV excited powdery fluorescent products, describing cryostat for photo and thermoluminescence at various temperatures
24 p4339 A70-46097

ULTRAVIOLET REFLECTION

- High reflectivity mirror construction for H Lyman alpha line using vacuum deposited Al layer coated by magnesium fluoride
02 p0299 A70-12367
- Semitransparent Pt film reflectance in vacuum UV evaporated on glass, quartz, Al, Au and Cr on glass compared with opaque films
04 p0731 A70-15023
- EUV reflectance data for optical constants obtained in digital form directly on punched cards by data acquisition system
23 p4197 A70-44470

ULTRAVIOLET SPECTRA

- Chromospheric structural parameters determined from XUV spectroheliograms, discussing He 2 emission, O 4 and O 5 emission distribution, etc
01 p0175 A70-10246
- Far UV spectroscopy of Jupiter by rocket-borne spectrograph
01 p0179 A70-10528

- Venus and Jupiter Aerobee rocket photoelectric UV spectra, determining geometric albedos using reflecting layer and cloud models 02 p0367 A70-11812
- Polarization observations of Saturn in UV and visible regions compared with Jupiter data, noting multiple scattering 02 p0368 A70-11818
- Giant pulse Q switched lasers generated plasmas, noting VUV spectral line shifts, asymmetries and existence of satellite lines 02 p0345 A70-11894
- Extreme UV spectral line intensity enhancement during class 3 flare related to abundance of radiating element 02 p0358 A70-12205
- L-alpha absorption equivalent width measurements in UV spectra of beta-one, delta and pi Scorpii for interstellar hydrogen densities 04 p0748 A70-14586
- He isoelectronic sequence 3d-nf transitions, determining UV wavelengths and oscillator strengths 04 p0739 A70-14601
- Rocket-borne spectrometer intensity measurements UV region of solar spectrum, noting agreement with IR observations of solar temperature minimum 06 p1143 A70-17998
- Vacuum UV spectrum interferometer with grazing incidence reflections between plane parallel mirrors to obtain coherent beams, discussing fringe patterns 07 p1286 A70-20081
- O and B type stars neutral He lines, studying UV line blanketing effects on predicted departures from LTE 08 p1571 A70-20912
- UV absorption cross sections of CO, HCl and ICN, analyzing reactions causing various spectral features 08 p1455 A70-21340
- Pulsed nitrogen gas laser to obtain continuously tunable dye laser action to 3550 Å with output at 3771 Å in UV 08 p1513 A70-21553
- Solar equatorial XUV limb brightening for resonance lines of Li-like ions from OSO-4 observations interpreted by coronal model 09 p1757 A70-22732
- Luminous hot stars mass loss attributed to negative effective gravities in outer parts of reversing layers from ionic UV resonance lines 10 p1946 A70-24981
- Solar XUV lines photon flux based on one dimensional model of chromosphere-corona transition region 10 p1949 A70-25271
- Radiative intensity calculations for carbon dioxide and carbon dioxide-nitrogen plasmas for various temperatures, densities and path lengths, computing UV and continuum spectra 12 p2275 A70-27170
- UV flash spectra of total solar eclipse of 7 March 1970 obtained by Aerobee 150 rocket 12 p2304 A70-27717
- Herschel effect in UV solar photography in developing autotensive photographic film for bright photospheric recording 13 p2497 A70-29853
- Rocket spectroscopy of zeta puppis, identifying multiplets of stellar and interstellar origin included in atmospheric models 14 p2641 A70-30883
- Solar UV flash spectrum by spectroheliographs flown aboard Aerobee 170 mission during total solar eclipse 16 p2977 A70-33838
- Argon II line transition probabilities, observing UV spectral region, upper energy levels and temperature differences 16 p2956 A70-34251
- UV stellar spectra and related ground based observations - Conference, Luneren, Netherlands, June 1969 17 p3158 A70-34876
- Stellar UV spectra observation methods, discussing objective spectrograph, scanning spectrometer system with telescope and grating cameras 17 p3160 A70-34885
- Stellar UV spectral line profiles interpretation, using atmospheric models and line formation theory 17 p3161 A70-34890
- Symbiotic stars UV spectrum, discussing molecular fluorescence phenomena 17 p3161 A70-34891
- Solar atmosphere structure and chemical composition by UV spectrum analysis 17 p3161 A70-34892
- Solar UV spectrum variations due to flares and solar activity diurnal variations from satellite spectrometry 17 p3161 A70-34894
- High resolution solar spectrum at 2000-2200 Å from sunpointing Skylark rocket flight, noting detectable absorption lines 17 p3162 A70-34896
- Non-LTE effects on flux and center to limb variation of solar spectrum at 1500-1680 Å 17 p3169 A70-35384
- Continuous UV opacity effects on visual spectrum observations and predictions for solar photosphere 17 p3169 A70-35385
- UV absorption lines in H I regions heated by cosmic rays, discussing possible detection by rocket or satellite spectroscopic observations 17 p3152 A70-35748
- Reciprocity law between radiation intensity and exposure time for photographic films in vacuum UV spectrum region, investigating departure at various wavelengths 18 p3257 A70-36281
- Horizon sky UV spectral radiance, noting solar position and cloud cover effects 18 p3248 A70-36752
- Mars UV reflectivity, examining spectrum, absorption features, planet albedo and ozone content by rocket-borne instruments and atmospheric models 18 p3317 A70-37011
- Interstellar molecular H Lyman resonance-absorption bands in far UV spectrum using rocket observation 20 p3701 A70-39002
- Spiral galaxy NGC 4319 arms high red shift Seyfert nucleus, discussing UV continua of Markarian 205 20 p3701 A70-39005
- Emission cross sections of nitrogen in vacuum UV by electron impact 20 p3675 A70-39617
- OSO far UV solar spectroheliograms atlas, describing instrumentation, data acquisition, etc 20 p3713 A70-40540
- Quark in stars, discussing electronic transitions and UV spectral lines 21 p3921 A70-41975
- EUV solar spectral intensity distribution and cyclic variations 22 p4106 A70-43299
- Monochromator design for UV and visible wavenumbers linear output, noting application to absorption coefficient measurement 24 p4336 A70-45669
- Solar spectrum O I, obtaining high resolution UV line profiles from rocket-borne spectrograms 24 p4410 A70-45766
- ULTRAVIOLET SPECTROGRAPHS**
- U ULTRAVIOLET SPECTROMETERS**
- ULTRAVIOLET SPECTROMETERS**
- Rocket telescope spectrometer precision pointing achieved by servocontrolling secondary mirror, discussing use for planetary atmospheres far UV spectrum studies 02 p0296 A70-11916
- Grate spectrometer with high resolution for 20-45 micron range, describing water vapor transmission spectrum [ONERA-TP-782] 10 p1886 A70-23912
- LiF prism spectrometer for space applications, discussing vacuum UV transmission and mechanical properties 11 p2049 A70-25629
- Scanning UV spectrometer for Mariner Mars 1971 orbital mission, investigating atmospheric composition for biological activity 16 p2978 A70-34030
- Scanning mirror system for Apollo telescope mount UV spectroheliometer, describing design, fabrication and testing 17 p3083 A70-34764
- Thin high vacuum gate valve design for use with UV grating spectrograph 19 p3357 A70-37687
- Solar stimulated terrestrial materials luminescence remote detection by Fraunhofer line depth method using UV grating spectrometer 23 p4199 A70-45007
- ULTRAVIOLET SPECTROPHOTOMETERS**
- Single beam grazing incidence spectrophotometer with concave diffraction grating for far UV region, emphasizing instrument adjustment 16 p2915 A70-34218
- OAO 2 for UV telescope sky mapping and spectrophotometric measurements of celestial bodies 23 p4261 A70-44666
- ULTRAVIOLET SPECTROSCOPY**
- Vacuum-UV monochromators polarization and effective transmittance measurements, comparing characteristics of parallel and pyramidal biotite polarizers 08 p1546 A70-21791
- Diffraction filters characteristics used in XUV spectroscopy involving solar, stellar and laboratory experiments 09 p1729 A70-23526
- Sulfur beam foil spectrum in 600-4000 Å range, identifying transitions in S I-S VI 11 p1994 A70-25362
- CO dissociation kinetics in Ar and mixtures of O in Ar by shock tube study using vacuum UV absorption 12 p2180 A70-26857
- Stellar UV photometry using telescope experiment in OAO 17 p3160 A70-34883
- Optical density of valence and conduction states by UV photoelectric spectroscopy, outlining experimental techniques and inelastic scattering effects 19 p3471 A70-37711
- Tropical UV nightglow measurement by Ogo-4 spectrometer, considering ionospheric recombination excitation mechanism 20 p3620 A70-39338
- Extreme UV spectroscopy with synchrotron radiation storage ring light sources in 40-400 Å range, including thin film photoabsorption measurements 21 p3826 A70-41451
- UMBRA (SHADOWS)**
- U SHADOWS**
- UMKEHR EFFECT**
- Umkehr observation days selectivity effects on calculated mean ozone distributions in layers 2 and 3 08 p1492 A70-21970
- UNCERTAINTY**
- U PROBABILITY THEORY**
- UNCONSCIOUSNESS**
- NT BLACKOUT PREVENTION**
- Syncope proneness correlation with episodes of impaired consciousness in pilots during flight using physiological tests 07 p1223 A70-19944
- Commercial jet passenger emergency oxygen needs for cabin decompression studied in determining time of safe unconsciousness 11 p1992 A70-26511
- UNCOUPLED MODES**
- Complex uncoupled modes to analyze forced vibrations of three layer damped sandwich beam with arbitrary boundary conditions, discussing orthogonality 04 p0773 A70-15076
- Ion motion neglecting conditions for radio waves in plasma based on Ohms law uncoupling from momentum transfer 16 p2957 A70-32980
- UNDAMPED OSCILLATIONS**
- Multilevel maser oscillators undamped output pulsations, investigating effect of coupling between signal frequency energy storage and circuit properties at pump frequency 13 p2430 A70-29704
- Bleachable dye filters selection for periodic undamped output power oscillations in laser 15 p2753 A70-32859
- Linearly elastic skeletal structures, calculating natural frequencies of undamped vibration by computer program 21 p3935 A70-41254
- UNDERCARRIAGES**
- Airline pitot and static altimeter systems and undercarriage maintenance and checkup, discussing wear in systems, case leaks, trash, dirt, inoperative heaters, etc 16 p2842 A70-33823
- UNDERGROUND EXPLOSIONS**
- Hydrodynamic energy flow down horizontal tunnel from nuclear explosive detonated underground, recording shock front luminosity and time of arrival 10 p1857 A70-23985
- UNDERGROUND NUCLEAR EXPLOSIONS**
- U NUCLEAR EXPLOSIONS**
- U UNDERGROUND EXPLOSIONS**
- UNDERWATER ACUSTICS**
- Electronic sine-cosine converters construction in devices for visual display of hydroacoustic transducers radiation patterns 06 p1064 A70-17773
- German book on propeller theory covering airfoil theory, propeller flow and pressure fields, propeller vibrations, shrouded and tilted propellers, helicopter rotors, etc 23 p4180 A70-44097
- UNDERWATER EXPLOSIONS**
- Stereophotogrammetric measurement for dynamic deformation of circular membrane subjected to underwater detonation 05 p0927 A70-16009
- UNDERWATER SOUND**
- U UNDERWATER ACOUSTICS**

- Interface stresses in ceramic/metallic spherical shells for deep submergence structures using hydrostatic testing and photoelastic analysis 06 p1170 A70-18089
- Error estimation of gondola encased tugged undersea magnetometer as function of turbulence parameters 07 p1281 A70-19466
- Error estimation of gondola encased tugged undersea magnetometer as function of turbulence parameters 18 p3260 A70-36940
- UNDERWATER TESTS**
- Underwater saturation habitats application as behavioral workshops for mission planning and human engineering of manned space flight, discussing Project Tektite [ALAA PAPER 69-1120] 01 p0034 A70-10611
- Human peripheral blood circulation during prolonged underwater activity, showing compensation for

high humidity, noise levels, low water temperatures, isolation and confinement 10 p1822 A70-25178

Microbial flora in human subjects confined to long term Tektite I underwater habitat 15 p2681 A70-31879

Airborne bacteria and fungi in atmosphere of Tektite I underwater habitat 15 p2681 A70-31880

Tektite II program safety planning for ambient pressure habitat under saturation diving conditions [AAS PAPER 70-053] 17 p3036 A70-34796

Tektite I marine laboratory underwater mission in marine biology and geology 17 p3168 A70-35306

Water immersion facility training for extravehicular activities and man physical movements in spacecraft, utilizing buoyancy-gravitation balance 21 p3804 A70-41191

UNDERWATER VEHICLES

NT SUBMARINES

Manned vehicles rendezvous missions in space and hydrospace, proposing functional structure involving concurrent ship control, navigation, perception, communication and prehension [AIAA PAPER 69-1102] 01 p0034 A70-10615

UNIAXIAL STRAIN

U AXIAL STRAIN

UNIFORM FLOW

NT BLASIS FLOW

Uniform supersonic flow with receding shock wave past smooth profile 07 p1187 A70-18674

Circle theorem for potential flows extended to two dimensional steady incompressible ideal fluid flows of constant vorticity 09 p1664 A70-23714

Two dimensional circular cylinder vortex excitation in uniform flow using linear binary system for flutter analysis 13 p2341 A70-29057

Uniform supersonic flow with receding shock wave past smooth profile 15 p2671 A70-31466

Boundary value problems in uniform incompressible inviscid flows past complex profile bodies by R functions method and variational technique 20 p3610 A70-39772

Turbulent boundary layer control by uniform fluid injection and suction, discussing velocity profiles, wall and wake laws, skin friction and shear stress transport equation [ICAS PAPER 70-10] 23 p4180 A70-44121

Axysymmetrical nozzle aerodynamic shape design for conical to axially uniform flow conversion, using method of characteristics 23 p4136 A70-44991

Momentum source interaction with viscous uniform stream, constructing perturbation solutions from non-linear equations 24 p4327 A70-46040

UNIONS [CONNECTORS]

Natural frequency calculation accuracy for coupled beam bending vibrations shown dependent on connection stiffness determination 03 p0595 A70-13929

UNIPOLAR TRANSISTORS

U FIELD EFFECT TRANSISTORS

UNIQUENESS

Existence and uniqueness of optimal control for one dimensional linear system with distributed control parameter using input-output integral with quadratic functional 17 p3057 A70-35627

UNIQUENESS THEOREM

Navier-Stokes equation generalized solutions to initial boundary value problems, considering uniqueness theorem and smoothness 01 p0132 A70-11068

Elasticity theory contact type problems, proving solutions existence and uniqueness 03 p0589 A70-13346

Plane static boundary value problems solutions in zero moment elasticity theory, proving solutions existence and uniqueness 04 p0775 A70-15214

Stefan free boundary problems with prescribed flux reduced to form solvable by numerical methods, proving existence and uniqueness theorems 05 p0956 A70-15783

Existence and uniqueness of nonlinear boundary value problem solutions formulated by fixed point theorem and Green function 05 p0876 A70-16562

Uniqueness and reciprocity theorems in elastic medium occupying infinite domain extended to electromagnetic wave propagation in plasma 05 p0890 A70-17097

Existence and uniqueness, stability and asymptotic stability of nonlinear operator differential equation 05 p0878 A70-17098

Linear Boltzmann equation in bounded domain, studying solutions existence, uniqueness and structure 06 p1047 A70-18317

Existence and uniqueness theorem for boundary value problem solution for parabolic equation in domain with singular points on boundary 07 p1322 A70-18853

Uniqueness theorem for coupled dynamic problem of linear thermoviscoelastic theory assuming contact-type boundary conditions 07 p1416 A70-20296

Kramer problem in kinetic gas theory and gas dynamics applied to Boltzmann equation, discussing uniqueness theorem [ONERA-TP-776] 08 p1486 A70-21845

Existence and uniqueness of mixed problem solution for Tricomi equation proved by a priori estimates 10 p1908 A70-23925

Solution uniqueness in limit load theory for unbounded regions, obtaining infinity as unique value for critical load from elastoplastic analysis 10 p1954 A70-24013

Local uniqueness and instability theorem for Einstein-Liouville equations using energy inequalities, noting relevance to Cauchy problem 11 p2084 A70-26458

Uniqueness theorem in Mindlin theory of elastic materials with microstructure 13 p2508 A70-28488

Generalized Frankl boundary value problem solution uniqueness formulation and proof using auxiliary function 13 p2390 A70-29647

Unique solvability of mixed semihyperbolic linear equations of higher order with respect to spatial variables and time 15 p2768 A70-32475

Existence and uniqueness theorem for boundary value problem solutions to nonlinear canonical ordinary differential equations 17 p3131 A70-35339

Forced vibration in Cartesian half space filled with elastic medium, investigating uniqueness conditions 18 p3337 A70-36289

Nonuniqueness of collapse load for isotropic frictional material with or without cohesion 19 p3433 A70-37385

Nonrigorous hyperbolic systems, discussing existence and uniqueness theorems contradiction in linear equations and proof of Cauchy problem 19 p3478 A70-37582

Uniqueness theorem for first boundary value problem of heat conduction equation with discontinuous coefficient 20 p3737 A70-39710

Linear discrete feedback systems uniqueness, existence and stability under various input-output conditions 22 p4004 A70-43024

Cauchy problem for singular parabolic equation, establishing existence, uniqueness and representation theorem by integral operator techniques in conjunction with function-theoretic methods 23 p4212 A70-44895

Linear viscoelastic solid quasi-static deformation, deducing associated minimum principles under assumption of unique solutions existence for boundary value problems 24 p4420 A70-45264

One-phase Stefan problem of heat conduction with melting, proving existence and uniqueness theorems for solid and free boundary temperature determination 24 p4429 A70-46036

UNITED NATIONS

UN General Assembly outer space treaties governing international exploration and use and rescue and return of astronauts and objects 02 p0402 A70-12308

UN treaty based on U.S.-U.S.S.R.-UK agreement banning nuclear arms in space and establishing international law covering space exploration 07 p1428 A70-19106

Peaceful uses of outer space, discussing committee reports and recommendations, direct broadcast satellites, administrative and financial implications, etc 07 p1428 A70-19688

Earth Resources Technology Satellite program and international participation, taking into account UN involvement in outer space 20 p3741 A70-39796

International cooperation in space exploration, UN role and benefits for nonspace nations 22 p4128 A70-43632

Cosmic ray latitude survey in western U.S. and Hawaii in summer 1966 using neutron and muon monitors 01 p0167 A70-10228

Land use mapping of southwestern U.S. using photographs from Apollo and Gemini missions [AAS PAPER 69-576] 04 p0676 A70-14640

DOD systems acquisition management tools and policies, emphasizing role of development concept paper and outside personnel dialogue in DOD decision making 05 p0959 A70-16460

Future U.S. aerospace power in terms of military technology and defense policies and attitudes 05 p0960 A70-16633

Life styles of engineering, comparing U.S. and European attitudes to aircraft development and design 06 p1184 A70-17198

Domestic telecommunication via satellite to reduce terrestrial switching to two levels, discussing system parameters, operation, hardware and cost estimate 06 p1006 A70-17344

Atmospheric turbidity measurements over U.S. using Volz sunphotometer 06 p1098 A70-18245

Space role in competition between U.S. and U.S.S.R. since August 1957, discussing armament control agreements regarding space 07 p1426 A70-18882

DOD procurement practices for advanced weapon systems, discussing government errors in contracting policies 07 p1428 A70-19678

Book on solar cells U.S. patent literature, discussing Si semiconductors, panel fabrication techniques, photoemissive devices, Cd, Ga and organic compounds, etc 09 p1612 A70-22050

Instructional communication system for U.S. using synchronous satellites over 15 regions [AIAA PAPER 70-450] 11 p2000 A70-25465

SST feasibility for U.S., considering program costs, financing, investment return and airport and community noise aspects 12 p1612 A70-27991

Report to COSPAR on U.S. space science program, discussing NASA projects, stellar and solar astronomy, lunar and planetary research, cosmic particles, upper atmosphere, etc 15 p2831 A70-31724

Air traffic control system for continental U.S.A. in 1980s, discussing ATC Advisory Committee recommendations 18 p3349 A70-36400

UNITS OF MEASUREMENT

Aircraft altimeter measurement for vertical separation based on atmospheric pressure unit changes /Cayleys/ compared with linear measurements in meters and feet 13 p2411 A70-29778

Canadian laser stabilization program involving metrology and absolute standard replacing international meter 17 p3105 A70-35089

UNIVERSAL TIME

Energy concept in cosmology based on relativistic considerations, indicating universal time by synchronous clocks system 11 p2109 A70-25870

Universal time control of south polar F layer during IGY attributed to low energy electron precipitation, comparing IGY and recent satellite data 21 p3818 A70-41101

Lunar effects on vertical and shape of geoid in universal time 22 p4100 A70-42852

UNIVERSE

Einstein equations for Bianchi type IX universe model suitable for numerical solution and application to cosmology with pure fluid stress tensor 01 p0142 A70-10522

Einstein-Friedman cosmology of vanishing constants assumed in deducing relations between antipodal radio sources red shifts and universe parameters 01 p0187 A70-11274

Finite rotating universe model construction not possessing Goedel cosmos pathological properties, discussing relation to Mach principle 01 p0191 A70-11358

Book on unitary relativistic theory of universe covering conservation and quantization axioms, general relativity equations, applications to corpuscular, electromagnetic and gravitational phenomena, etc 02 p0337 A70-11686

Lemaître universe and galaxy formation effect on stability of quasi-static epoch, deriving limits for red shift, cosmic ray and electromagnetic fluxes 02 p0363 A70-11779

Universe oscillating closed model dynamics emphasizing conditions of collapse by contraction in terms of relativity theory 02 p0370 A70-12114

Symmetric cosmologies within gamma ray measurement context showing antimatier limits in Milky Way and metagalaxy 02 p0371 A70-12196

Soviet papers on universe evolution covering interstellar structure, stellar evolution, multiple galaxies, galactic nuclei, etc

03 p0562 A70-12976

Electron and hard photon /X and gamma ray/ production and propagation in expanding metagalaxy, deducing universe matter density, cosmic ray sources, etc

03 p0557 A70-13225

Astronomical and space research methods probing fundamental questions concerning universe unsolvable by classical astronomy, discussing solar wind and stellar formation and evolution

03 p0571 A70-13790

Cosmochemistry, discussing interdisciplinary nature, goals, nuclear roots, information sources, key concepts involving elements age and origin, nuclear species abundances, chemical fractionation, etc

03 p0578 A70-14346

Mass-energy content of universe, discussing galactic formation in positive energy systems and missing mass problems

04 p0753 A70-15073

Elliptical cosmology, discussing evolutionary geometry, Synge distribution, galactic age and distance from earth, Friedman equations and independence of constants

05 p0905 A70-15794

Nonequilibrium processes and initial conditions in early universe, discussing neutrino viscosity efficiency at removing shear anisotropy and Misner model

05 p0907 A70-16002

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra

05 p0904 A70-16903

Book on space observatories covering rocket mounted telescopes for atmospheric structure, opaque wall, air diffusion, clouds and refraction, particle bombardment, meteorite melting, etc

07 p1379 A70-19099

Circular and radial trajectories in Schwarzschild field applied to isolated metagalaxy with charged central body and nonzero cosmological constant

07 p1385 A70-19426

Radiation catastrophe in universe in terms of cosmological models

07 p1368 A70-19628

Singularity for absolute zero of time suggested for beginning of universe by Einstein relativity theory

07 p1336 A70-19922

Cosmic rays formation time and evolution in expanding universe, discussing high energy electrons, energy losses and spectra and metagalaxy cascade processes

07 p1371 A70-20328

Hot universe model for determining magnitude constraints on Dirac monopole annihilation cross section and mass in cosmic rays

07 p1371 A70-20330

Shear and rotation limits on universe from X ray background, using Euclidean shear and vorticity models with open and closed geometries

08 p1561 A70-20901

Electron and hard photon /X and gamma ray/ production and propagation in expanding metagalaxy, deducing universe matter density, cosmic ray sources, etc

08 p1563 A70-21658

Conditions for life in universe, analyzing evolutionary stages of matter to determine steps producing complex organic compounds

09 p1762 A70-23121

Instability of Godel rotating universe, discussing stability to perturbations in rotation plane and unstable density perturbations along rotation axis

10 p1937 A70-23973

Universe neutrino energy density estimation based on photon-neutrino weak interaction coupling theory

10 p1920 A70-24567

Homogeneous open anisotropic relativistic world model with negative space curvature, observing shear decrease with time and magnitude reciprocal variation with function R/t

11 p2109 A70-25866

Mankind role in cosmos as function of self realization developed by science and technology

11 p2153 A70-26057

Iconoclastic cosmology and remote sensing of universe, discussing cosmic scale photometry and extra-galactic red shift spectroscopy

12 p2296 A70-26924

Cosmological constant role in closed universes with matter and radiation

13 p2490 A70-28936

Galactic, stellar and solar magnet fields origin, considering fluid motions role

14 p2641 A70-30876

Nuclear reactions and elementary particle reactions in Friedman universe with positive lepton abundance and degenerate electrons, discussing prestellar helium synthesis

14 p2620 A70-30877

Hot universe model for demonstrating distortions in Rayleigh-Jeans region of microwave relic radiation spectrum by primeval plasma heating before recombination epoch

14 p2632 A70-31287

Cosmogonic phenomena instability, discussing red shift, expanding universe, galactic nuclei and quasars

15 p2800 A70-32144

Entropy increase, discussing universe heat death, earth energy balance, etc

15 p2809 A70-32907

Equations of motion and continuity for early and later stages of expanding universe, explaining matter concentration process of galaxy formation

16 p2976 A70-33783

Model classification for relativistic universes containing noninteracting matter and radiation by cosmological constant and density parameters

16 p2979 A70-34190

Uniform model universes containing gaseous matter and background blackbody radiation, solving Einstein equations without zero pressure assumption

18 p3313 A70-36215

Cyclic models of evolving universe corresponding to positive, negative or zero cosmological constant

18 p3314 A70-36421

Cosmological models with matter and radiation for evolution of universe

18 p3322 A70-37132

Antimatter distribution in universe, investigating mass lower limit

19 p3518 A70-38025

High energy electron and photon cascades in Metagalaxy, considering electromagnetic radiation density and cosmic ray origin estimation

19 p3500 A70-38081

Critique of metagalactic origin of high energy cosmic rays, reviewing neutrino hypothesis

19 p3500 A70-38082

Fermi momentum upper limit for universe neutrinos in cosmic ray propagation, determining maximum proton energy

20 p3700 A70-39592

Cosmic ray superhigh energy electrons and neutrinos propagation in degenerate neutrino gas universe, considering gas density in cosmological models

20 p3700 A70-39593

Radio source counts from Ohio State University observations, noting faint sources decrease relative to uniform Euclidean universe

20 p3713 A70-40427

Universe homogeneous isotropic model with thermal radiation at outset, considering nucleons and antinucleons interactions

21 p3884 A70-40910

Friedmann universe evolution after big bang via Hagedorn hadronic equation of state, noting primordial He abundance criterion

21 p3888 A70-41122

Radio source count formula in zero pressure model universe for background radiation differential density evolution function

21 p3923 A70-42104

Einstein gravitational equations solution for expanding universe, discussing possible sudden collapse into zero volume with infinite density

22 p4105 A70-43215

Universe cold matter structure and distribution from far IR data

22 p4096 A70-43395

Friedman-Lemaître model role in big bang cosmology

23 p4238 A70-43812

Einstein field equations for spatially homogeneous spaces, considering rotating matter model in regularized Euler-Lagrange form

23 p4219 A70-44406

UNIVERSITIES

Network analysis for systems application program /NASAP/ computer-aided circuit design program for network analysis, discussing application in education

06 p1015 A70-18418

Personnel and organizational policies for university research management

12 p2336 A70-27750

UNIVERSITY PROGRAM

Industry-university interaction in competitive teaching of spacecraft design

23 p4285 A70-44643

UNKNOWN

U DEPENDENT VARIABLES

U PROBLEM SOLVING

UNLOADING

Elastic/perfectly plastic hollow cylinder unloading under monotonic twist during torsion, considering sandhill-membrane analog validity

08 p1589 A70-21249

Nonlinear stress-strain model of unloading in symmetric longitudinal impact of two elastic-plastic bars, using numerical method

19 p3541 A70-38046

Extraction parachute deployment for airdropping multiple loads from C-5A aircraft

[AIAA PAPER 70-1203] 21 p3752 A70-41814

Human ventilatory response to resistance unloading during muscular exercise

23 p4144 A70-43823

UNLOADING WAVES

Unloading wave in elastic-plastic half space with rigid unloading for two parameter loads, discussing deformation body model

05 p0925 A70-15825

Unmanned teleoperator spacecraft /UTS/ for future orbital demonstration, discussing manipulators, multifunction viewing, stabilization, human factors, etc

[AIAA PAPER 69-1067] 01 p0195 A70-10649

Earth and planetary entry vehicle designs for manned and unmanned space missions, noting thermal protection, environmental control requirements and communication systems

[AIAA PAPER 68-1080] 01 p0195 A70-10826

Solar powered electric propulsion systems for automated missions throughout solar system by extending range of Atlas Centaur-Titan 3-C launch vehicles

[AIAA PAPER 68-1120] 04 p0736 A70-15401

Automated mars surface sample return /AMSSR/ mission, discussing Saturn 5 chemical and nuclear approach

[AIAA PAPER 69-1066] 04 p0764 A70-15626

Soviet unmanned spacecraft and components displayed at Le Bourget show, including Molniya 1, Proton 4 satellites, Venus 4 station, vertical cosmic probe, etc

05 p0921 A70-15814

Support facilities requirements and goals for manned and unmanned solar and stellar orbital astronomy

[MDAC-WD-1258] 05 p0847 A70-16074

Unmanned exploration program to study magnetic fields and chemical composition of five outer planets in solar system

07 p1375 A70-18871

Instrumental space flight internationalization considering manned flight and military obstacles, suggesting scientific and political steps

07 p1427 A70-19097

Onboard modular computer research in strapdown guidance technology for computational ability and long term reliability of unmanned missions

07 p1238 A70-20062

Unmanned and manned interorbital shuttle systems for satellite placement and repair and planetary spacecraft insertion, emphasizing cost analysis

[AIAA PAPER 70-267] 07 p1398 A70-20396

Manned and unmanned earth resources observation satellite program, noting international cooperation

10 p1971 A70-24636

Manned and unmanned earth observation satellite programs technology gains, discussing atmospheric temperature, pressure, winds, clouds and moisture

10 p1876 A70-24637

Unmanned spacecraft landing shock absorption by hybrid pneumatic configuration having hard surfaced footpad with dual pneumatic bag attenuator

12 p2312 A70-27115

Lunar exploration by manned and unmanned space flights, discussing seismology, composition, surface features, etc

15 p2798 A70-31678

Space based reusable manned/unmanned tug, discussing potential missions, system requirements and auxiliary hydrogen oxygen propulsion system [AIAA PAPER 70-719] 16 p2964 A70-33533

Unmanned electric propulsion spacecraft with external fuel and flashlight thermionic reactors, discussing thruster arrays, weight and performance for reference Jupiter orbiter mission [AIAA PAPER 70-644] 16 p2966 A70-33547

Manned and unmanned orbital space facilities pointing and stability requirements, noting application to stellar and solar astronomy, earth observations, etc 16 p2979 A70-34068

Unmanned flyby missions to Mercury in 1973-1990, discussing scientific objectives and payloads [AAS PAPER 70-027] 17 p3155 A70-34798

Mariner, explorer, high Data Orbiters, Viking and Rover landers as required systems for unmanned Mars exploration, examining ballistic and lifting entry [AAS PAPER 70-030] 17 p3156 A70-34805

Expandable and modular structures technology for manned and unmanned space missions, discussing expandable air lock experiment 17 p3177 A70-35230

Unmanned and manned interorbital shuttle systems for satellites placement and repair and planetary spacecraft insertion, emphasizing cost analysis [AIAA PAPER 70-267] 17 p3172 A70-35650

Mission success model for unmanned space exploration, combining expected data return with computer technique 19 p3527 A70-38838

Unmanned spacecraft for earth resources survey, investigating ERTS payload, performance characteristics and ground station 20 p3713 A70-39057

Solar electric propulsion unmanned asteroid belt probe, discussing propulsion system, flux data acquisition, etc [AIAA PAPER 70-1121] 20 p3717 A70-40525

High Energy Astronomy Observatory for space X rays, gamma and cosmic rays research via unmanned spacecraft 23 p4261 A70-44680

Automated and manned spacecraft design, discussing mission objectives and present and potential applications 23 p4264 A70-45003

UNSTABLE BURNING

U COMBUSTION STABILITY

UNSTEADY FLOW

NT OSCILLATING FLOW

Flow velocity pulsations effect on frequency spectrum of flow optical fluctuations, discussing methods for separating turbulence characteristics 01 p0092 A70-10996

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem 01 p0064 A70-11032

Unsteady incompressible laminar flow under time dependent body force solved for rectangular and circular conduit and plane and cylindrical Couette flows 01 p0066 A70-11130

Time dependent behavior of separated and un-separated unsteady flow of incompressible viscous and inviscid fluids without heat transfer 01 p0067 A70-11162

Turbulent viscous fluid flow characteristics obtained from integrating Navier-Stokes equation for unsteady flow with periodic momentum variation 01 p0069 A70-11626

Boundary value problem for quasi-linear equation of unsteady transonic gas flow, including linear model and operators for group of transformations 01 p0069 A70-11628

Self similar wave solutions of continuity and momentum equations for two dimensional unsteady isentropic motion of polytropic gas 02 p0278 A70-11998

Average pressure at downstream end of pipe discharging into reservoir with upstream end under pulsed flow, considering application to pneumatic control system 02 p0279 A70-12110

Harmonically oscillating semiinfinite rectangular wing perturbation velocity potential in unsteady transonic flow without heat exchange 02 p0279 A70-12118

Numerical method for attacking-lifting problems of general three dimensional wing executing arbitrary motion in potential flow [AIAA PAPER 69-23] 03 p0405 A70-12930

Boundary layer processes under unsteady suction allowing for compressibility, relating suction value to external velocity and wall temperature 03 p0465 A70-13275

Pulsation energy distribution in free turbulent incompressible jets, noting role of mean velocity distribution 03 p0466 A70-13384

Unsteady heat transfer theories reviewed to assess steady state heat transfer relations applicability 03 p0605 A70-13401

Unsteady heat conduction in hollow cylinder, using transfer functions to solve direct and inverse two dimensional problems 03 p0606 A70-13520

Supersonic unsteady state three dimensional flow around blunt bodies with detached shock wave 03 p0409 A70-13864

Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave 03 p0409 A70-13865

Gas dynamics analysis of explosion phenomena based on unsteady flow fields and thermodynamic properties of chemically reacting substance 03 p0607 A70-13922

Unsteady MHD flow of viscous incompressible electrically conducting fluid through rectangular duct under transverse magnetic field 03 p0471 A70-14333

Plasma unsteady one dimensional flow behind shock wave front in shock tube MGD channel, deriving differential gas dynamics equations 04 p0726 A70-14540

Initial value method for solution of nonlinear two point boundary value problems in fluid mechanics, considering Blasius equation and unsteady gas flow [ASME PAPER 69-WA/FE-8] 04 p0667 A70-14782

Unsteady problems of gas dynamics solved by method of characteristics, Godunov method, difference methods, etc 04 p0670 A70-14958

Unsteady flows effects on aircraft longitudinal motion, flight stability and control, discussing horizontal and vertical effects of rough air 04 p0623 A70-15172

One dimensional unsteady gas flows formation theories extended to include viscosity, heat conductivity, diffusion and chemical reactions effects 04 p0672 A70-15230

Unsteady pressure at slender blunt body surface in three dimensional hypersonic gas flow 04 p0618 A70-15244

Suction influence on skin friction fluctuations of MHD flow along infinite flat wall using Navier-Stokes equations 05 p0886 A70-15787

Unsteady flow equations for periodic axisymmetric laminar flow of second order fluids in circular cylindrical pipes 05 p0831 A70-15871

Unsteady laminar free convection caused by heating semiinfinite flat vertical plate, obtaining velocity and temperature distributions 05 p0957 A70-16370

Unsteady laminar gas flow near infinite flat plate using Laplace transforms, obtaining closed form solutions for plate velocity and temperature 05 p0836 A70-17106

Ti alloy tensile strength under cyclic loads at room and high temperatures, noting plastic deformation and damage accumulation effects 06 p1085 A70-17406

Yawed hot wire measurements of turbulence fluctuations, discussing calibration and mutual interference of adjacent wire and wire supporting prongs in X-ray wire case 06 p1071 A70-18487

Unsteady boundary layer flow with suction, deriving equations for circular cylinder impulsive motion 07 p1253 A70-18862

Unsteady hydrodynamic coefficients of supercavitating hydrofoil in harmonic oscillation in Helmholtz flow with free surface, investigating frequency, angle of attack and submergence depth 07 p1255 A70-19134

Flat plate boundary layer induced pressures in unsteady hypersonic flight 07 p1257 A70-19327

Navier-Stokes equations solved for unsteady incompressible three dimensional stagnation point flow, noting reduction to two dimensional and axisymmetric cases 07 p1188 A70-19343

Soviet book on unsteady attached turbulent flow in turbine lattices, studying blade aeroelastic vibrations onset and attenuation in compressible and incompressible fluids 07 p1189 A70-19602

Spectral functions of airflow velocity pulsations in circular pipe at various Reynolds numbers, considering laminar, transition and turbulent regimes 07 p1259 A70-19826

Velocity pulsations of hypersonic working flow in wind tunnel using miniature pressure transducers, discussing rms error 07 p1259 A70-19828

Circular nozzle contraction and Reynolds number effects on turbulent pulsation damping, measuring longitudinal and transverse components 07 p1259 A70-19830

Unsteady MHD flow at forward stagnation point analyzed for magnetic field effect on transient phenomena, using difference-differential numerical method 07 p1354 A70-20235

Unsteady flow behind circular cylinder by flow visualization, determining vortices length variations with time at various Reynolds numbers and dimensionless accelerations 07 p1261 A70-20236

Steady and unsteady flow through Napier turboblower axial flow turbine for full and partial admission, estimating mass flow and power output 07 p1189 A70-20294

Local heat transfer coefficients for unsteady conditions in tube determined by gradient method, noting use in reacting flow and jet nozzle protection 08 p1598 A70-21189

Unsteady flow in circular tube of constant section with time dependent discharge, determining pressure gradient and velocity distribution 08 p1484 A70-21477

Unsteady free convection laminar power-law fluid flow past porous vertical wall, studying similarity solution dependence on wall temperature and suction 08 p1486 A70-21765

Heat transfer coefficient to gas in tube under unsteady heat flow conditions, studying Nusselt number dependence on Reynolds and Prandtl numbers 09 p1787 A70-22173

Navier-Stokes equation for plane unsteady axisymmetric rotation of viscous fluid in steady radial flow from source or sink 09 p1660 A70-22437

Unsteady flow equations and thermodynamics for studying homogeneous fluidic transmission in circular and rectangular cross section lines 09 p1613 A70-23403

Boundary function of unsteady temperature field in bodies with moving surface at constant temperature calculated by least squares method 09 p1791 A70-23620

Unsteady heat transfer on electronic analog model, using installation prescribing variable boundary conditions of third kind 10 p1966 A70-23872

Unsteady laminar free convection on heated axially symmetric body under stepwise surface temperature variations and unity Prandtl number 10 p1967 A70-23875

Motion and continuity equations for unsteady two dimensional flow of incompressible viscous fluid along infinite flat plate with time dependent suction 10 p1862 A70-23877

Fluid microstructure effects on velocity, boundary layer and shear stress in nonsteady parallel flows, including accelerated plane wall equation 10 p1863 A70-23955

Unsteady MHD flow in circular pipe with nonconductive walls under transverse magnetic field 10 p1921 A70-23959

Spectrum analysis of unsteady duct flow caused by pressure loss induced instability 10 p1863 A70-24026

Unsteady MHD flows of viscous, incompressible and electrically conducting fluid, proving boundary value problem solutions existence and uniqueness 10 p1922 A70-24095

Perturbed equations solutions for plane supersonic steady and nonsteady gas flows, considering propagation of perturbations in initially nonstationary main flow 10 p1866 A70-24107

Numerical methods of viscous liquid dynamics, considering unsteady flow in simply and multiply connected regions 10 p1866 A70-24110

Small linear disturbance and stability of potential unsteady motion of finite mass of liquid with free boundary 10 p1866 A70-24111

Shock wave and gas flow structure at constant Mach number past three dimensional blunt bodies, applying method for unsteady flow 10 p1799 A70-24127

Radiating shock wave reflection from rigid wall studied for velocity and structural changes, assuming unsteady and one dimensional flow 10 p1867 A70-24140

Pulsating flow mean total pressure measurement accuracy in high turbulence regions, discussing standing and traveling acoustic waves produced at measuring system entrance 10 p1867 A70-24160

Viscous incompressible flows nonlinear stability theory, considering perturbed flows tending toward stationary or flow periodic in time [ONERA-TP-802] 10 p1869 A70-24542

Conducting gas unsteady efflux from plane tube into vacuum, determining time dependent position of expanding rarefaction wave fronts 10 p1924 A70-24569

Polygonal wings oscillatory motions in unsteady supersonic flow 10 p1803 A70-24778

Unsteady supersonic flow past tail-body system with harmonic oscillatory motions 10 p1803 A70-24789

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem
10 p1871 A70-25001

Nonsteady flow past duct junctures, investigating ventilation system of underground bomb shelter for blast wave passage prevention
11 p2036 A70-26139

Shock waves in unsteady aortic blood flow at systole beginning, considering aorta elastic properties and shock formation distances
11 p1992 A70-26479

Stability analysis using energy method applied to Navier-Stokes equations for unsteady viscous flow
11 p2042 A70-26849

Computer applications in aerospace research involving flutter, supersonic flow, unsteady wing flow, etc
12 p2191 A70-27025

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation
12 p2210 A70-27321

Contact and unsteady heat transfer through vacuum cavity applied to hollow cylinders, solving nonlinear integral equations by piecewise linear approximation
12 p2331 A70-27326

Transient flow of viscous incompressible fluids with free surfaces calculated using Lagrangian coordinates
12 p2210 A70-27425

Unsteady heat or mass transfer to translating fluid sphere thermal boundary layer, determining analytical solution method accuracy
12 p2333 A70-28116

Unsteady compressible pipe flows with large cross sectional variations studied by two dimensional difference method
13 p2386 A70-28806

Unsteady fluid flow around circular cylinder with sudden acceleration using flow pattern photographs
13 p2387 A70-29056

Two dimensional unsteady incompressible fluid flow through airfoil lattice
13 p2389 A70-29491

Unsteady one dimensional motion of reacting gas mixtures in presence of supercompressed detonation waves, discussing transformation into Chapman-Jouguet wave
13 p2522 A70-29772

Boundary conditions and initial value lines for unsteady homentropic flow, performing straight pipe calculations
13 p2392 A70-30023

Two dimensional unsteady flow of weakly conducting fluid in perpendicular magnetic field using Green function
14 p2621 A70-30180

Unsteady incompressible laminar boundary layer equations solution after Crocco transformation by implicit finite difference scheme for flow around blunt body
14 p2528 A70-30290

Nonsteady coupled MHD Couette flow, presenting solution by Fourier series expansion method
14 p2621 A70-30549

Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method [ASME PAPER 69-GT-35]
14 p2529 A70-31024

Unsteady aerodynamic forces on oscillating circular cylinder, using wind tunnel two dimensional dynamic model
14 p2529 A70-31050

Nonstationary MHD Couette flow of viscous incompressible fluid between two parallel walls caused by instantaneous fluctuations of applied transverse magnetic field
15 p2777 A70-31479

Steady and nonsteady engine/inlet flow field simulation for engine/compressor testing, determining feasibility of variable ramp aerodynamic device [AIAA PAPER 70-591]
15 p2672 A70-31788

Upper atmospheric unsteady horizontal wind flow from differential equations unstable solution
15 p2772 A70-32889

Book on flow separation covering steady/unsteady, turbulent and incompressible flows, base pressure, thermal effects, etc
16 p2833 A70-32913

Unsteady hydromagnetic flow of viscous electrically conducting incompressible fluid due to rotating disk under perpendicular magnetic field
16 p2958 A70-33297

Boundary value problem of two dimensional Poisson equation solution procedure with Hockney formulas, applying to unsteady viscous incompressible flow past flat plate
16 p2943 A70-33737

Mathematical model of pulsatile viscous entrance flow in thick walled elastic tube, investigating flow development effects in large arteries
17 p3035 A70-34471

Analytic theory of unsteady separated flow effects on dynamics of heat sink type reentry bodies and elastic launch vehicles
17 p3008 A70-34489

[AIAA PAPER 70-762]

Unsteady laminar boundary layers on infinite porous plate, considering radiative heat transfer and transpiration cooling
17 p3067 A70-34632

Steady and unsteady gas dynamics analogies with two dimensional water flow, taking into account energy and continuity equations
17 p3069 A70-35032

Unsteady convective heat transfer in pipes in presence of heat flux density and flow rate aperiodic variations
17 p3198 A70-35730

Free turbulent incompressible jet, analyzing pulsating characteristics and energy balance with Reynolds stress equations
18 p3240 A70-36264

Unsteady two dimensional gas flow calculation axisymmetric shock tube of variable cross section, using numerical method
18 p3240 A70-36275

Half space nonstationary temperature field with mobile heating at edges, using integral transformations
18 p3348 A70-36725

Perfect and dissociating gas nonstationary supersonic flow around sharp profile of finite thickness analyzed by linearization and method of characteristics
19 p3351 A70-37242

Velocity profiles in steady and unsteady rotating flows for impulsive slow down and acceleration in cylindrical chamber
19 p3403 A70-37527

Unsteady incompressible planar gas jets with stable vortex street, investigating near flow field region to establish oscillatory component
19 p3404 A70-37799

Unsteady laminar incompressible fluid flow in parallel plate channels and circular tubes, solving Navier-Stokes equations for prescribed discharge
19 p3405 A70-38347

Unsteady flow and heat transfer in viscous incompressible fluid due to infinite porous cylinder oscillations about axis with suction at surface
19 p3406 A70-38445

Skin effect for unsteady radio waves emitted into homogeneous nonmagnetic isotropic half space, calculating electric field
19 p3381 A70-38571

MHD nonsteady Beltrami flow between two infinite parallel walls with transverse magnetic field, calculating velocity, skin friction and induced magnetic field
20 p3678 A70-39610

Unsteady viscous flow of incompressible fluid through porous straight channel under time varying pressure gradient, determining suction and injection effects
20 p3609 A70-39670

One dimensional unsteady equilibrium flow stability of relaxing two phase medium consisting of perfect gas and incompressible liquid
20 p3613 A70-40295

Longitudinal averaged and pulsating turbulent flow velocities in rectangular channel with one-sided air injection through porous wall
20 p3614 A70-40346

Unsteady incompressible flow in laminar boundary layer with homogeneous suction during longitudinal flow past flat plates, investigating boundary layer stability
20 p3614 A70-40391

Energy dissipation in laminar unsteady incompressible viscous fluid flows, discussing velocity fields, boundaries, tangential motion and entrainment
20 p3614 A70-40402

Unsteady flow in rectangular cavity with moving wall, using iterative solution of Navier-Stokes equations
21 p3807 A70-41317

Two dimensional unsteady viscous incompressible MHD flow past infinite flat plate with uniform suction, considering Hartmann and Reynolds numbers
21 p3858 A70-41450

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation
21 p3810 A70-42062

Contact and unsteady heat transfer through vacuum cavity applied to hollow cylinders, solving nonlinear integral equations by piecewise linear approximation
21 p3952 A70-42067

Combined effects of flow unsteadiness and surface mass transfer on displacement thickness of boundary layer, using flat plate geometry
21 p3811 A70-42092

Constant property unsteady laminar flow thermal entrance problems, using variational formulation in Laplace transformed domain
21 p3954 A70-42169

Karman-Polhausen method applied to unsteady thermal boundary layer on isothermal flat plate
21 p3954 A70-42208

Acoustic waves generation from decay region of pulsating supersonic jet expelled from nozzle
21 p3748 A70-42211

Bistable wall attachment fluid amplifier, calculating unsteady end wall switching transient based on turbulent jet entrainment properties
21 p3964 A70-42428

[ASME PAPER 70-FLCS-3]

Unsteady supersonic flow around oscillating cross-shaped wing-fuselage system, determining perturbation velocities and pressure distributions
22 p3958 A70-42609

Unsteady hydromagnetic boundary layer flow past semiinfinite flat plate under steady magnetic field and small free stream perturbation
22 p4080 A70-42631

Equations for unsteady frozen nonequilibrium flow of dissociating and relaxing gas, using Lighthill ideal dissociating diatomic gas for aerothermochemical model
22 p4124 A70-42754

Downwash angle behind straight wing for unsteady aperiodic flight at subsonic speeds, using vorticity model
22 p3959 A70-42802

Liquid propellant rocket engine combustion instabilities, describing unsteady combustor flow by single nonlinear wave equation with stable and unstable finite amplitude limit cycles
23 p4233 A70-44425

Unsteady radiating nongray gas diffuse boundary conditions, emphasizing monochromatic radiation slip and one dimensional radiant flux
23 p4282 A70-44593

Potential liquid flow in pulsating bulb applied to blood flow
23 p4155 A70-44847

Unsteady incompressible thermal boundary layer flow past three dimensional obstacle for Prandtl numbers near unity
24 p4428 A70-45366

HF pulsating air flow measuring technique with sharp edged orifice meter, discussing experimental setup and pulsation frequency and intensity effects
24 p4335 A70-45591

Three dimensional laminar boundary layer in unsteady incompressible flow, presenting solution by successive approximations method
24 p4325 A70-45594

Pulsatile flow in circular rigid tube with and without longitudinal vibration, obtaining momentum integral solution
24 p4325 A70-45623

Simple wave functions solutions in multidimensional nonviscous polytropic gas unsteady and steady flow
24 p4327 A70-46030

Pulsation and turbulence damping in pulsed jet from energy spectra of longitudinal velocity fluctuations
24 p4327 A70-46267

Unsteady separation criteria for three dimensional laminar boundary layer on finite obstacle
24 p4327 A70-46268

UNSTEADY STATE

Unsteady state lift and moment action on lattice of profiles moving in incompressible fluid, determining suction originating at leading edges of profiles
03 p4049 A70-13868

Splitting procedures application to steady and unsteady problems of mathematical physics and predictor-corrector method application to unsteady problems
04 p0719 A70-14959

Unsteady heat conduction numerical approximation for infinite cylinder with variable heating and boundary conditions of third kind
05 p0936 A70-16294

One dimensional unsteady heat conduction with variable boundary conditions solved by difference-differential method using rectangular and cylindrical coordinates
05 p0957 A70-16295

Electronic-vibrational coupling in nonequilibrium MHD generator with molecular gas to suppress electrode layer shorting and recombination in supersonic nozzles
06 p0988 A70-18222

[AIAA PAPER 70-41]

Unsteady heat conduction in plate, solid or hollow infinite cylinder and sphere with internal heat source and radiative heat transfer on surface
07 p1423 A70-19818

Correlation functions of nonlinear auto-oscillatory system under nonstationary conditions determined by statistic linearization
11 p2022 A70-25341

Elastic scattering formation and decay of unstable particle gases, discussing density and corrections to chemical and nuclear statistical equilibrium equations
13 p2455 A70-29223

Unsteady nonlinear aerodynamic loads measurements in wind tunnel, using linearized mathematical analog
13 p2343 A70-29896

[AIAA PAPER 70-573]

Two dimensional detonations structure by nonlinear theory for systems with hydrodynamically unstable steady state solutions, imposing periodic boundary conditions

20 p3609 A70-39658

Nonsteady temperature and thermal stress distribution in gas turbine blades, using plastic model and photothermoelastic method

22 p4093 A70-43743

UNSWEEP WINGS

NT RECTANGULAR WINGS

UP CONVERTERS

U PARAMETRIC FREQUENCY CONVERTERS

UPDRAFTS

U VERTICAL AIR CURRENTS

UPPER AIR

U UPPER ATMOSPHERE

UPPER ATMOSPHERE

Harmonic analysis of upper atmospheric wind periodic data from radar sounding of meteor trails, defining principal diurnal wind variations

01 p0134 A70-10201

Upper atmosphere temperature lag behind solar decimeter flux 27 day variation maximum attributed to varying solar EUV heating

01 p0070 A70-10404

Upper atmosphere structure and energy budget based on IGY/IQSY spectroscopic observations of temperature distribution and stratosphere-mesosphere composition

01 p0072 A70-10578

Hydrodynamic explanation of upper atmosphere perturbation effects on tropospheric circulation, discussing experiments for solar activity effects on atmospheric dynamics

01 p0073 A70-10582

Upper atmospheric atomic H and He concentration height distribution, considering L alpha and H alpha emissions, He emission, light components and direct measurements

01 p0074 A70-10589

Intensity distribution determination in spectrum of solar XUV fluxes incident upon upper atmosphere, considering quantitative model construction

01 p0170 A70-10593

Upper atmospheric contribution to Faraday rotation angle above 5000 km determined from beacon frequencies of geostationary satellite, noting geomagnetism weighting and electron content decrement role

01 p0076 A70-10874

Satellite observations of semiannual density variations in upper atmosphere

01 p0077 A70-11205

Twilight and nightglow measurements with stratospheric balloons, discussing use for upper atmosphere exploration, meteoric influence and French network

01 p0079 A70-11217

Electrical phenomena in upper atmosphere and solar wind may control geomagnetic disturbances and aurorae

01 p0082 A70-11523

Upper atmospheric thermal fluctuations study based on correlation characteristics of rapid thermal perturbations, using linear differential equations

02 p0288 A70-11761

Solar activity indices and upper atmospheric density interrelationship from Explorer I satellite observations, showing statistical variations

02 p0356 A70-11762

Aeronomy of Jovian upper atmosphere at pressures below 25 mb, discussing stratospheric heat sources, thermal emissivity, photochemistry of methane, ammonia, etc

02 p0366 A70-11804

Soviet collection of papers on theoretical problems of upper atmosphere physics, discussing various models, atmospheric composition, etc.

02 p0327 A70-12383

Static atmosphere model above 120 km, assuming oxygen atoms and molecules and nitrogen molecules presence to determine diffusion velocity and recombination coefficient

02 p0327 A70-12385

Zonal circulation model of atmosphere below altitude of 200 km using rocket, meteor and ionospheric drift observations

02 p0328 A70-12388

Pion production characteristics during high energy nucleons interactions from data on production in upper atmosphere by gamma-quanta families/isobaric production/

03 p0555 A70-13032

Statistical analysis of satellite drag data for characteristic time of thermal fluctuations in upper atmosphere caused by soft solar X-rays

03 p0472 A70-13179

Parachute design for decelerating upper atmosphere rocket probes at high altitudes, using high drag coefficients in Stokes flow regime

04 p0624 A70-15410

Solar and sky far IR radiation in upper atmosphere, estimating precipitable water quantities and low absorption regions

04 p0681 A70-15521

Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates

04 p0682 A70-15733

Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states

04 p0684 A70-15750

Upper atmosphere wind and semidiurnal and diurnal tide interactions observed by meteoric radar, noting relation to gravity waves

05 p0878 A70-15818

Antarctic twilight Na emission abundance and concentration in lower E region, discussing meteor ablation models

05 p0836 A70-15819

Spectral intensity recording facility design for high energy electrons and hard gamma quanta in upper layer and beyond atmosphere

05 p0846 A70-15959

Na abundance in terrestrial upper atmosphere, solving steady state continuity and momentum equations for Na atoms and ions

05 p0840 A70-16475

Pulsation velocities distribution wind in meteor region of atmosphere during hourly intervals over eleven month period, noting normal distribution

06 p1095 A70-17206

Penumbra during lunar eclipses analyzed photometrically, considering effects of earth upper atmosphere and lunar luminescence

07 p1377 A70-18973

Hydrogen and helium emissions in upper atmosphere, observing amplifications towards geomagnetic poles and in winter hemisphere

07 p1266 A70-19439

Midlatitude upper atmosphere soft electron energy flux nighttime measurements by sounding rocket

07 p1368 A70-19500

Upper atmospheric horizontal sounding, discussing satellites uses in atmospheric structure studies

07 p1268 A70-19603

Geocoronal glow as resonant scattering of solar Lyman-alpha-radiation by H atoms in upper atmosphere

07 p1270 A70-20032

ARCAS meteorological rocket system designed for upper atmospheric soundings to provide thermodynamic and wind data, discussing payloads

07 p1395 A70-20256

Rocket-borne radar chaff wind sensor synoptic application above 65 km, describing low fall velocity

07 p1237 A70-20258

Upper atmosphere climatology including latitudinal and longitudinal variations in wind, temperature, density and zonal momentum

07 p1275 A70-20279

Turbulence in quiescent prominences relationship to shock waves in upper atmosphere

08 p1570 A70-20840

Photometric profiles of Jupiter shadows cast by large natural satellites used as upper atmosphere probes

08 p1579 A70-21571

Geoactive low energy particles and fresh photoelectron interactions with upper atmosphere observed by satellite Cosmos 261

08 p1492 A70-21796

Upper atmosphere research by U.S.S.R. mass spectrometers onboard French rocket probes, discussing design, payloads and equipment tests

09 p1766 A70-22658

Upper atmosphere aerosols and cosmic dust properties investigation by laser beam scattering measurements using photoelectron counters for weak signal detection

10 p1898 A70-23818

Upper atmospheric waves nonlinear interactions based on tides and gravity waves propagation, taking into account terrestrial rotation

10 p1872 A70-23820

Sodium night airglow analyzed by Chapman mechanism, considering nocturnal intensity seasonal behavior and location in upper atmosphere

10 p1873 A70-23829

Cosmic ray particle abundance in upper atmosphere during minimum solar activity estimated by nuclear photographic emulsions on balloon flight

10 p1932 A70-24438

Night time upper atmosphere light phenomena and Tungusk meteorite observed on 30 June 1908

10 p1876 A70-24499

Solar cosmic ray ionization of upper atmosphere, calculating electron production rate distribution

10 p1934 A70-25199

Sound speed and horizontal wind velocity components determined in upper atmosphere from measured data of Rocket Grenade Experiment

11 p2121 A70-25678

Mars upper atmosphere semiempirical model, reducing density uncertainties by allowing for solar cyclic variations

11 p2111 A70-26031

Project HARP gun-launched projectiles as vertical sounding probes for upper atmospheric meteorological and geophysical measurements, discussing payloads development for high acceleration

11 p2122 A70-26047

Kalman filtering applied to moving balloon position and velocity estimates related to upper atmosphere wind measurements by balloon-satellite experiment

11 p2025 A70-26206

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption

11 p2106 A70-26797

Elastic scattering effect on photoelectron transport and escape in upper sunlit atmosphere

12 p2222 A70-27187

Upper atmosphere electromagnetic probing theory and techniques, noting applications to aeronomic problems

12 p2223 A70-27726

Upper atmosphere probing based on light scattering from laser radar beam by atmospheric constituents

12 p2185 A70-27740

Earth radiation balance /net flux/ determination from satellite measurements of long wave radiance and reflected solar radiation in upper atmosphere

12 p2264 A70-28090

Midlatitude upper atmospheric low energy proton intensity obtained from meteorological rocket data

12 p2296 A70-28265

Solar activity effects on midlatitude upper atmosphere corpuscular radiation intensity via rocket sounding

12 p2296 A70-28266

Upper atmospheric composition by nitrogen molecules radiative transition analysis, using laser resonance backscattering effect

12 p2227 A70-28267

Bora-Sond rocket for cost effective upper atmospheric sounding, discussing Li-Al-O systems performance

13 p2504 A70-28684

Upper atmosphere superrotation velocity based on satellite polar orbit calculation of 1968-59A, correcting for lunisolar perturbations

13 p2394 A70-28895

Topsider sounder profiles interpretation, discussing ionosphere-protonosphere dynamic coupling

13 p2398 A70-29199

Upper atmospheric wind evaluation in radar measurements by radio sounding technique, discussing equipment design

13 p2445 A70-29468

Upper atmospheric ion and neutral composition from rocketborne mass spectrometry, allowing for rocket velocity and analyzers orientation with respect to velocity vector

14 p2568 A70-30140

Transverse structural function of velocity field of turbulent motion in upper atmosphere, using meteor speed ratio observations

14 p2635 A70-30312

Solar activity predictions for earth upper atmosphere models emphasizing linear regression method

14 p2638 A70-30565

Three camera method for studying upper atmosphere winds via smoke trails providing wind velocity, earth coordinate data and error indication

14 p2607 A70-30572

Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates

14 p2575 A70-30817

Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states

14 p2576 A70-30834

Mars upper atmosphere refractivity, free electron number density and plasma temperature altitude profiles from Mariner 1969 radio occultation measurements

14 p2646 A70-31072

Concentrations model of metallic atoms and ions in upper atmosphere with deposition from meteors, using diffusion equation

14 p2580 A70-31262

Red twilight emission enhancements origin, concerning atomic lithium release effect in upper atmosphere

14 p2580 A70-31264

X rays and primary cosmic radiation intensity measurements near top of atmosphere, describing rocket payload and launch

14 p2632 A70-31307

Upper atmospheric short lived disturbances connected with geomagnetic storms characterized by determining equivalent duration /DJ/ values

15 p2723 A70-31651

Atomic hydrogen distribution in upper atmosphere and solar system obtained during spin operation of OGO 5 with Lyman alpha photometer

15 p2798 A70-31655

Upper atmosphere density and temperature height profiles perturbations in falling sphere probe 15 p2723 A70-31663

Atmospheric density near 180 km /1968-1969/ from orbit of satellite 1967-31A /ATS 2/, noting weak dependence on solar activity and correlations to geomagnetic disturbances 15 p2724 A70-31680

Upper atmosphere turbulence spectra of passive contaminants deposited by rockets from radiometrically calibrated photographs of chemical trails 15 p2725 A70-31688

Monograph on upper atmosphere and outer space studies in U.S.S.R. /1969/ covering Soiuz 4, 5, 6, 7, 8 and Venera 5, 6 flights 15 p2829 A70-31702

Continuous differential energy pulse height spectra reduction to photon upper atmospheric spectra 15 p2694 A70-31800

Spatial distribution of energy deposited by auroral electrons in upper atmosphere, using Monte Carlo method 15 p2725 A70-31860

Dynamic spectral characteristics of LF whistler signals for outer ionosphere electron profile determination, using satellite observation 15 p2729 A70-32081

Rocket and satellite data on upper atmospheric neutral/charged particles, short wave solar radiation, temperature and photochemical reactions 15 p2730 A70-32089

Upper atmosphere sounding vehicle /Bora-Sond/, describing payload section, launch acceleration, apogee time, weight and length, staging, etc 15 p2811 A70-32259

Midlatitude upper atmosphere soft electron energy flux nighttime measurements by sounding rocket 15 p2795 A70-32745

Upper atmospheric unsteady horizontal wind flow from differential equations unstable solution 15 p2772 A70-32889

Venus upper atmosphere carbon atoms detection based on low resolution spectra analysis of solar illuminated atmosphere 16 p2979 A70-34036

Twilight sky brightness measurements at 5200 Å for estimating upper atmospheric dust component, discussing error rates 16 p2899 A70-34184

Upper atmosphere temperatures from vapor cloud diffusion, eliminating errors from bright sky background at twilight 17 p3076 A70-34940

Bora-Sond atmospheric probe providing two stage minimum cost high altitude sounding for supersonic transport /SST/, discussing hot water propulsion system 17 p3178 A70-35257

Radar receiving station equipment for studying upper atmosphere by radio meteor echoes 17 p3047 A70-35605

Model calculations of Martian upper atmosphere expanding above mesopause, taking into account effects of molecular and eddy diffusion and chemical reactions 17 p3172 A70-35643

Mean molecular mass determination method for upper atmosphere based on Nicolet equation for scale height, using satellite orbit and spin decay data 17 p3138 A70-35773

Upper atmosphere IR emission model with reference to thermal excitation, chemical reactions and electron excitation 18 p3246 A70-36173

Upper atmosphere neutral component temperature measurement from thermal spread of charged particles beam 18 p3247 A70-36182

Upper atmospheric ion composition during Orionid meteor shower activity by rocket-borne RF mass spectrometer 18 p3247 A70-36183

Upper atmospheric gas components vertical distribution by airborne photometric absorption and attenuation measurements in UV spectrum 18 p3248 A70-36633

Hydrogen and helium emissions in upper atmosphere, observing amplifications towards geomagnetic poles and in winter hemisphere 18 p3249 A70-36913

Soviet papers on physical processes in earth upper atmosphere covering emissions, dust, particle distribution, Rayleigh scattering, temperature, inhomogeneities, etc 18 p3250 A70-36976

Vertical distribution of upper atmospheric 7600 Å oxygen glow, discussing 8645 Å band and nitric oxide data 18 p3251 A70-36977

Upper atmospheric dust composition and optical properties by crepuscular technique, using photometric measurements in 5200 Å region 18 p3251 A70-36978

Upper atmospheric neutral components temperature determination by rocket-borne mass spectrometers 18 p3252 A70-36983

Upper atmospheric layers neutral composition by rocket-borne mass spectrometers, indicating gravitational separation of argon from molecular nitrogen 18 p3252 A70-36984

Upper atmospheric ions kinetic temperatures based on chromatic broadening of mass spectral lines 18 p3252 A70-36985

Upper atmospheric atomic nitrogen reaction with carbon tetrachloride, estimating radiation intensity and brightness of artificial luminescent cloud 18 p3252 A70-36989

Upper atmospheric wind velocity and diffusion coefficient measurement by radar observation of artificial electron cloud from atomic K ejection 18 p3253 A70-36993

Upper atmosphere wind, density, temperature and pressure from Soviet meteor data 19 p3412 A70-37651

Upper atmospheric density and temperature diurnal phase and amplitude discrepancy reconciled by dynamic diffusion model 19 p3414 A70-38381

Upper atmosphere semiannual variations dependence on lower thermosphere dynamic properties seasonal variations, using steady state models 19 p3415 A70-38384

Luminous intensity profile of optically thick Sr artificial clouds in upper atmosphere, using Monte Carlo calculations 19 p3415 A70-38388

Ozone concentration variations in upper atmosphere during solar eclipses 19 p3418 A70-38906

Solar constant measurements by high altitude balloon sounding, noting anomalous turbidity in upper atmospheric layers due to nuclear explosions and volcanic eruptions 20 p3703 A70-39375

Upper atmospheric wind currents differential equations, obtaining physical data in terms of asymptotic expansion of Gaussian error functions 20 p3622 A70-39763

Pulsar NP 0535 X rays detection by ground based observations of upper air fluorescence 21 p3871 A70-40654

Synoptic surface and upper air analysis and APT mosaics of meridional circulation over Mediterranean by remote satellite images 21 p3846 A70-41399

Upper atmosphere electric field nature, considering solar radiation as major source of ionization 22 p4017 A70-42788

Upper atmosphere and magnetosphere DC electric field measurement using artificial clouds 22 p4017 A70-42791

Sodium D lines airglow nocturnal and seasonal variations in upper atmosphere 22 p4023 A70-43295

Upper atmosphere photoionization by extreme UV solar radiation compared with ionization by charged particles collisions 22 p4096 A70-43302

Venusian and Martian upper atmosphere chemistry, emphasizing ionization height distribution 22 p4106 A70-43312

Global upper atmosphere circulation pattern by daytime tracking of high altitude rocket vapor trail, using differential radiometer 23 p4214 A70-44039

Upper atmosphere optical properties sounding by twilight observation and successive brightness approximation 23 p4187 A70-44047

Air current in upper atmosphere meteor zone above equator, noting diurnal and semidiurnal harmonics in wind velocity components 23 p4188 A70-44049

Diurnal variation symmetry of upper atmosphere molecular oxygen concentration in terms of ozone photodissociation 23 p4190 A70-44083

Upper atmosphere tidal pressure and wind variations from meteor trail drift data 23 p4215 A70-44266

Solar L alpha absorption in upper atmosphere, using rocket-borne ionization chamber 23 p4191 A70-44270

Upper atmosphere average rotation speed and height variation, presenting atmospheric and earth angular velocity ratio from satellite orbit inclinations 24 p4328 A70-45353

Upper atmosphere diurnal, annual and solar activity induced density variations effects on satellite orbits 24 p4408 A70-45553

Optical laser radar for upper atmospheric density and aerosol concentration measurements 24 p4353 A70-45561

Meteorological NEXAIR /Next Generation Upper Air System/ for atmospheric data from balloon-borne instrument packages 24 p4372 A70-46049

UPPER IONOSPHERE

Alouette 2 Langmuir probe measurements analyzed for size and amplitude of electron concentration fine structure irregularities in topside ionosphere, discussing F spread 04 p0679 A70-15111

Topside ionosphere ionization compared during magnetic storms with steep onset, smooth variation and sudden commencement 05 p0838 A70-16283

Upper ionospheric electron density variations at low magnetic activity times observed with Alouette 2 satellite 05 p0901 A70-16307

Nighttime recombination model of O ion plasma in upper ionosphere, showing temporal behavior and variation of electron concentration 07 p1265 A70-19432

Topside ionosphere morphology during IQSY, emphasizing plasma scale height diurnal and latitudinal variations role in satellite data interpretation 07 p1270 A70-20073

Solar wind and Venus topside ionosphere interaction, discussing charged particle density, temperature and pressure distribution 08 p1578 A70-21550

Ion temperature gradient along magnetic field lines in outer ionosphere by thermal diffusion equations compared with electron temperature observations 11 p2047 A70-26568

Topside ionosphere structural analysis, considering electron density profiles deduced from Alouette 2 satellite data 12 p2226 A70-28062

Topside ionosphere nighttime structure over Japan deduced from Alouette 2 satellite plasma frequency measurements 12 p2226 A70-28063

Proton cyclotron echoes in topside ionograms using Alouette 2 satellite data 12 p2226 A70-28064

Topside ionosphere structure deduced from electron density profiles observed by Alouette 2 satellite 13 p3295 A70-29090

Topside ionosphere structure deduced from resonance spikes on ionograms obtained by Alouette 2 satellite and electron density distributions 13 p3295 A70-29091

Proton cyclotron echoes in topside ionograms from Alouette 2 satellite 13 p3296 A70-29092

Molecular oxygen positive ion density in upper ionosphere as function of photoionization, ambipolar diffusion velocity and altitude effect 13 p3299 A70-29233

Electrostatic waves for upper ionospheric plasma model, obtaining solutions to dispersion relation at multiples of electron cyclotron frequency 13 p4400 A70-29914

Topside ionospheric plasma scale height, showing influence of magnetic activity level 14 p2569 A70-30207

Venus daytime upper ionosphere observations by mariner 5 in terms of ionization sources and sinks, ambipolar diffusion and model atmospheres 18 p3311 A70-36002

Hydrogen, He and oxygen ion density, and ion and electron temperatures in upper ionosphere fromOGO 4 observations 18 p3244 A70-36016

Nighttime recombination model of O ion plasma in upper ionosphere, showing temporal behavior and variation of electron concentration 18 p3249 A70-36906

Lower hybrid resonance frequency propagation ducts in multilayer upper ionosphere, showing association with VLF hiss bands 20 p3584 A70-39331

Topside plasma frequency resonance below electron cyclotron frequency, discussing ray paths and delay times 20 p3620 A70-39336

Seasonally biased electron density enhancements in nighttime response of topside ionosphere to magnetic storms 20 p3621 A70-39342

Satellite-borne loop antenna resistive and reactive impedance measurements in topside ionosphere 22 p4019 A70-43112

Topside ionospheric plasma scale height, showing influence of magnetic activity level 24 p4330 A70-46282

UPSTREAM

Upstream influence distance estimation associated with critical pressure rise in two dimensional shock-boundary layer interactions based on Lighthill subsonic inner boundary layer concept 10 p1862 A70-23840

Turbulent boundary layer formation in upstream wake of accelerated flow indicated from boundary layer profile and wall static pressure measurements 13 p2392 A70-29996

Upstream disturbances propagation during hypersonic flow boundary layer interaction 21 p3748 A70-42205

Large fluid-amplifier-type jets, measuring upstream flow disturbances effects on spreading velocity profiles
[ASME PAPER 70-FLCS-A] 22 p3964 A70-42431

UPWASH

Upwash interference on oscillating wing in slotted wall wind tunnels, analyzing acceleration and velocity potentials using small wing theory 04 p0621 A70-15605

URANIUM

NT URANIUM ISOTOPES

NT URANIUM 233

NT URANIUM 238

Neutron activation analysis for U and Th in various tektites, discussing evolution and extraterrestrial origin 03 p0576 A70-14090

Uranium plasma design and characteristics, measuring emission and absorption coefficients as function of temperature and pressure [AIAA PAPER 70-43] 06 p1122 A70-18084

Uranium abundance in hypersthene chondrites determined by homogenized fission track analysis, comparing age estimation with iron meteorite event occurrence 07 p1391 A70-20354

U and Th abundances correlation in tektites and achondrites based on oxygen isotopic composition of lunar rock specimens 13 p2488 A70-28720

Engine weight estimation for showing effect on thrust, specific impulse and uranium loss rate for open cycle gas fueled nuclear rocket engine [AIAA PAPER 70-690] 16 p2949 A70-33553

Uranium plasma emission coefficients as function of DC arc operation, measuring intensity spectrum with scanning spectrometer [AIAA PAPER 70-692] 16 p2950 A70-33554

Spiking in deep partial penetration electron beam weld in U dependence on machine parameters 18 p3264 A70-37116

Uranium ion impact ejection and electronic excitation of thin foil particles, observing optical spectra of Be, carbon and Al atoms and ions 20 p3674 A70-39135

Fission track uranium distribution studies of Apollo 11 lunar volcanic rocks, using Lexan plastic print method 21 p3900 A70-41537

Uranium plasma diagnostics, measuring emission and absorption coefficients as function of pressure and temperature 22 p4069 A70-42361

URANIUM ALLOYS

Depleted uranium for gamma radiation shielding, discussing properties, alloys, fabrication and applications 19 p3469 A70-37834

URANIUM COMPOUNDS

NT URANIUM OXIDES

URANIUM ISOTOPES

NT URANIUM 233

NT URANIUM 238

Open cycle gas core nuclear rocket reactor, evaluating critical mass for U isotopes 18 p3290 A70-36564

Uranium and Th isotopic composition in Apollo 11 samples compared to earth, using mass and alpha spectrometries 21 p3777 A70-41603

Apollo 11 lunar rocks, breccia and fines U, Th and Pb isotopes systematics, considering implications for lunar history 21 p3909 A70-41605

URANIUM OXIDES

Fission gases trapped in fuel particles, cladding and matrix of irradiated refractory metal-uranium oxide cermets determined by gamma counting 07 p1332 A70-19851

Uranyl ion luminescence and absorption cross section in silicate glass excited by high power light beam, considering Q switching action of ion 08 p1510 A70-20516

URANIUM 233

Nuclear light bulb engine critical fuel mass and design changes effects [AIAA PAPER 68-571] 01 p0140 A70-10835

URANIUM 238

Alpha particle emissivity measurement of moon by Explorer 35 spacecraft for U 238 abundance in outer crust 01 p0181 A70-10573

Pu/U ratio in St. Severin meteorite at time of Xe retention beginning 13 p2488 A70-28723

Th 232 and U 238 pionic X ray energies and widths, suggesting anomalous effect for interaction between high-Z nuclei and pion 15 p2776 A70-31738

URANUS [PLANET]

Effective pressure and rotation line intensity in Uranus upper atmosphere obtained from methane band spectrograms, calculating maximum temperature at subsolar point 07 p1385 A70-19423

Bode law development from dynamical relaxation suggested from comparison of Jupiter, Saturn and Uranus inner satellite systems with planetary system 09 p1765 A70-23796

Uranus and Mars satellite relative measures, tabulating observations 19 p3516 A70-37932

Uranus and Saturn reciprocal mass determination based on astronomical observations of Saturn and Jupiter respectively 20 p3705 A70-39477

Uranus and Neptune millimeter wave observations, showing brightness temperatures in excess of black body equilibrium temperatures derived from solar heating 24 p4403 A70-45398

URBAN DEVELOPMENT

Systems engineering applied to airborne, airport and community socioeconomic structure in determining air freight and passenger demand impact on airport location and configuration [AIAA PAPER 69-1091] 01 p0055 A70-10605

Remote sensor capability in land use, urban and soil moisture analysis data acquired by NASA Earth Resources Program [AAS PAPER 69-575] 04 p0676 A70-14641

Automatic change discrimination applications to weather prediction, land resource management and city planning, using photographic, IR and radar sensor imagery [AIAA PAPER 70-311] 09 p1677 A70-22876

Aerial photographic surveys of urban land use and natural resources, considering data analysis, display, computer compilation, updating and remote sensing 10 p1891 A70-24738

Urban development detection by remote sensing imagery of highway and rail linkage 12 p2216 A70-26908

Aerospace technology and system analysis application possibilities to urban social and economic planning problems 14 p2670 A70-31191

URBAN RESEARCH

Aerial and ground UHF noise measurement in Phoenix area, correlating air and ground data [AIAA PAPER 70-437] 11 p2001 A70-25480

Residential urban environment data extraction from high and low resolution images 12 p2216 A70-26907

K band imagery of New England for evaluating size, shape and distribution of built-up areas 12 p2216 A70-26912

Total community annoyance measurement (TACM) applied to urban VTOL port planning for aircraft noise [SAE PAPER 700286] 12 p2161 A70-27442

Remote sensors applied to classification of aerial data concerning housing quality at different scales, using variables observation 14 p2577 A70-31234

Radio frequency indigenous noise measurement in urban areas 18 p3228 A70-36568

Metropolitan airports environmental considerations, noting aircraft noise role in planning [SAE PAPER 700253] 18 p3237 A70-36826

URBAN TRANSPORTATION

NT RAIL TRANSPORTATION

California future transport complex, considering STOL and ESTOL/extremely short takeoff landing aircraft/design requirements 06 p0985 A70-17197

V/STOL intercity airliner potential and development noting benefits of noise reduction, ground space economy, etc 08 p1434 A70-20619

VTOL aircraft applications to intercity traffic compared to competing transportation methods, discussing possible transportation time reductions [DGLR-70-005] 10 p1970 A70-24045

Urban development detection by remote sensing imagery of highway and rail linkage 12 p2216 A70-26908

Gemini 12 photographs examined for urban and transportation data content 12 p2228 A70-26909

V/TOL aircraft approaches to air passenger surface travel time reduction, emphasizing Manhattan-to-airport transportation problems [SAE PAPER 700287] 12 p2335 A70-27443

VTOL profitability in Northeast Corridor, discussing city center ports accessibility for S-65-200 short hauls and economic and ground acreage advantages [SAE PAPER 700310] 12 p2335 A70-27452

Economic factors in developing STOL and VTOL metroflight service, proposing evolutionary process beginning with short term demonstration [SAE PAPER 700313] 12 p2335 A70-27454

American Airlines-McDonnell Douglas inter-metropolitan STOL evaluation tests, noting microwave landing guidance system [SAE PAPER 700336] 12 p2161 A70-27464

Helicopters for short haul intercity transport, discussing power failure safety, weather factors and costs 12 p2161 A70-27596

Air terminal and ground transfer design to provide improved access to aircraft and total transportation time reduction 12 p2208 A70-27992

Low pressure ratio lift fan propulsion system for intercity VTOL transports, considering thrust, safety, noise, weight, components, speed, turbine and transmission [AIAA PAPER 70-670] 16 p2971 A70-33952

Computerized metropolitan air transit system, discussing system redundancy for safety level maintenance and all-weather dependability 17 p3199 A70-34730

Metropolitan air transit system design, considering compound helicopters, automatic control by central computer, onboard avionics system and terminal facilities 21 p3956 A70-41250

STOL system traffic analysis simulation model for interurban transportation system as tool for flight hardware evaluation 22 p4007 A70-43731

STOL operations from city centers, discussing safety requirements, navigation and guidance systems, airport criteria, etc 23 p4140 A70-44174

Planning criteria for optimum metropolitan airport system considering operational, physical, social and economic factors [AIAA PAPER 70-1266] 24 p4430 A70-45921

Short haul transportation needs in multimodal transportation systems planning, discussing modeling in Northeast Corridor Project [AIAA PAPER 70-1265] 24 p4431 A70-45925

Short haul metropolitan air transportation, considering systems engineering as unifying technology [AIAA PAPER 70-1281] 24 p4373 A70-45927

Demand analysis data generation for V/STOL systems suitable for New York-Philadelphia-Washington business travel market, applying model to selected designs [AIAA PAPER 70-1241] 24 p4374 A70-45961

STOL aircraft operational constraints, considering economics, short haul market characteristics, community acceptance, speed, propulsion system, takeoff/landing performance and maneuverability [AIAA PAPER 70-1283] 24 p4374 A70-45972

UREAS

Metabolism and biological activity of urea, citrulline, arginosuccinic acid in organism ornithine cycle, discussing role in brain and liver 01 p0019 A70-10513

URETHANES

Fire performance of spray applied rigid urethane foam applied as storage vessel insulation, noting continued functioning until destruction 09 p1710 A70-23345

Fluid urethane laminating resin for bonding nylon and glass fabrics, giving physical properties as function of room temperature curing time 16 p2938 A70-33381

Tungsten filled urethane in aircraft areas as balancing agent 17 p3126 A70-35418

URIC ACID

Human metabolic study showing effect of yeast RNA and allopurinol on serum and urinary uric acid formation 08 p1454 A70-20679

Dietary protein and yeast RNA levels effect on uric acid metabolism in normal man 11 p1987 A70-26002

Serum uric acid reduction in men during chronic physical exercise 13 p2355 A70-29802

URINALYSIS

Adrenocortical responses of military recruits to subtropical climate, making serum and urinary 17-OHCS measurements on subjects fasting, inactive and at thermoneutrality 01 p0032 A70-10359

Renal and hepatic glutamine synthetase distribution in mammals, studying relation between glutaminase and urinary activities/ammonia metabolism/ 02 p0232 A70-11710

Standard urinary excretion by healthy adult for free adrenaline, noradrenaline, creatinine and hydroxymethoxy mandelic acid, making catecholamine determinations 12 p2168 A70-27622

Daily electrolyte excretion dynamics of subjects with shifted work-rest schedule, noting disagreement with Sharp results 13 p2358 A70-29343

URINATION

Rat water intake and urine output during chronic centrifugation at resultant inertial fields of 1.7 and 3.0 g 02 p0231 A70-11705

Peristaltic motion of viscous incompressible fluid, applying long wave approximation to two dimensional urine flow model 07 p1219 A70-19247

Ureter fluid mechanical model from lubrication theory viewpoint, discussing waveforms, pressure distribution, etc 23 p4179 A70-43966

URINE

Prolonged hypokinesia effect on dynamics of 5-oxindoleacetic acid elimination in rat urine, showing occurrence of shifts in serotonin metabolism 09 p1615 A70-22092

Urinary calcium phosphate and carbonate precipitates reduction by protein and carbohydrate diet change to casein and sucrose in Macaca nemestrina 09 p1621 A70-23456

Sympathoadrenals activity in pilots during supersonic flight, investigating urinary catecholamine output 15 p2690 A70-31891

Prolonged hypokinesia effect on dynamics of 5-oxindoleacetic acid elimination in rat urine, showing occurrence of shifts in serotonin metabolism 15 p2685 A70-32688

Mountain climbing effects on urinary excretion of vanillylmandelic and homovanillic acids, discussing circulatory system acclimatization 17 p3039 A70-35425

Transmeridian flights effect on diurnal urinary excretion of unconjugated 17-hydroxycorticosteroids in males, evaluating time shift effects 21 p3770 A70-41477

Lateral and angular acceleration effects on blood and urine contents in specific metabolic indices of healthy young men 22 p3971 A70-43136

USA [UNITED STATES]

U UNITED STATES OF AMERICA

UTILITIES

Astronautics utility in astronomy, physics, earth observation, communication, commercial, military, navigational, meteorological, social applications, considering present and future possibilities 15 p2831 A70-32062

UTILITY AIRCRAFT

NT BO-105 HELICOPTER

NT UH-1 HELICOPTER

Helicopter utilization in emergency transportation of civilian patients, discussing questionnaire results from medical and police agencies 08 p1454 A70-21937

British light aircraft designs, engines and costs, considering business, agricultural, gliding, private, school and club flying 14 p2532 A70-31394

UTILIZATION

NT REUSE

NT WASTE UTILIZATION

UTRICLE

Mammalian ultraclear macula design, considering microelectrode data and information from light and electron microscopy, behavioral experiments and computer simulation 11 p1988 A70-26231

V/STOL air traffic control and equipment considerations for increased demand, suggesting time/velocity separation system using direct routing, positive and automated control [AIAA PAPER 69-1055] 01 p0137 A70-10639

Noise reduction for V/STOL aircraft operation by introducing quiet propellers, discussing variable camber propellers, propeller aerodynamics, etc [AIAA PAPER 69-1038] 01 p0005 A70-10646

Composite fibrous materials applicability to V/STOL rotor blades design and fabrication confirmed by structural analysis 02 p0225 A70-11953

Harrier close-support fighter aircraft with short or zero takeoff run capability, discussing design, cruise efficiency, maneuverability and navigation-attack system 02 p0225 A70-12310

V/STOL fatigue design parameters, balancing failure and safe-life design procedures [AHS PAPER 376] 02 p0228 A70-12764

Tactical landing approach radar (TALAR) guidance system for V/STOL aircraft steep angle approach and landing 02 p0336 A70-12767

V/STOL supersonic fighter VJ 101, transport Do 31 and VTOL fighter/reconnaissance VAK 191 development in West Germany, discussing control and stabilization during hovering 03 p0413 A70-13794

Propagation of turbulent jet impinging on flat surface at certain incidence angle analyzed for application to V/STOL aircraft, ventilation equipment, etc 03 p0468 A70-13878

Mil-10 Soviet giant helicopter cargo and altitude record, VTOL and STOL capability and weight design 03 p0414 A70-14286

V/STOL power drive systems structural efficiency, comparing mechanical and pneumatic components from weight-optimal viewpoint [ASME PAPER 69-WA/AV-7] 04 p0622 A70-14901

V/STOL aircraft propellers featuring thrust augmenting air jet slots for increased lift [DGLR-69-36] 04 p0616 A70-15175

Large-tilt-angle lifting surface theory for V/STOL aircraft based on inclined actuator disk analysis 04 p0619 A70-15377

V/STOL and fixed wing tactical transport aircraft survivability while supporting forward area logistics bases, noting V/STOL advantage [SAE PAPER 690705] 05 p0792 A70-15857

Experiment design and data acquisition for V/STOL aircraft flying qualities simulations, emphasizing pilot rating and comment data and control usage information [SAE PAPER 690695] 05 p0825 A70-15860

V/STOL Flight Profile Indicator display system development to present pilot situation information in vertical plane [SAE PAPER 690694] 05 p0792 A70-15861

DO-231 fixed wing V/STOL airliner project based on DO-31 development, construction and flight tests, considering design problems, controls, safety, performance targets, etc 05 p0793 A70-15901

VTOL technical problems relating to military and civil transport applications, discussing sensitivity to mission requirement variations including design costs, noise levels, etc 05 p0797 A70-17077

Dynamic stability of complex aeroelastic structures including V/STOL aircraft using simplified technique, noting application to tilt rotor aircraft design [AIAA PAPER 70-22] 06 p1170 A70-18119

Lift fan V/STOL tactical aircraft performance capabilities determination, using digital computer program 07 p1191 A70-18975

Monograph on HFB 600 V/STOL transport for civil and military air traffic, discussing intercity travel, military dispersal requirements, systems performance, cockpit layout, etc 07 p1194 A70-19605

V/STOL R and D, comparing civil aviation in U.S. and Europe, discussing system approach 07 p1194 A70-19679

V/STOL demand for short haul business travel noting time savings, convenient approach, safety records, weather reliability and comfort 07 p1428 A70-19680

Optimal V/STOL wind tunnel interference study of slotted tunnel walls, including porosity and height to width ratio effects [AIAA PAPER 69-171] 07 p1251 A70-20407

Wing lifting surface theory for V/STOL aircraft based on inclined actuator disk theory to predict span loading and downwash angle 07 p1190 A70-20408

V/STOL concepts for short haul commercial aircraft compared for gross weight, operating cost, gust sensitivity and noise levels [AIAA PAPER 67-938] 07 p1195 A70-20409

Longitudinal stability of V/STOL aircraft at low speeds, discussing three tilt wings and quad ducted propeller configurations 07 p1195 A70-20410

V/STOL intercity airliner potential and development noting benefits of noise reduction, ground space economy, etc 08 p1434 A70-20619

V/STOL transport aircraft design in Germany, analyzing demands in military and civil sectors 08 p1435 A70-20639

V/STOL Do 231 design, discussing propulsion, control, safety, traffic control and economic factors 08 p1435 A70-20640

V/STOL aircraft turbojet engine design and quality control for in-service reliability 09 p1743 A70-22572

V/STOL transport aircraft cockpit design in terms of size, geometry and equipment accommodation 10 p1804 A70-24048

V/STOL cockpit three degree of freedom multicrew research simulator, utilizing visual display and digital computer [AIAA PAPER 70-356] 10 p1858 A70-24207

Flight test instrumentation specifications for V/STOL aircraft, considering design, installation and accuracy [AIAA PAPER 70-376] 10 p1892 A70-24927

Edwards Report on UK domestic air services, considering unprofitability, trunk route competition and V/STOL development exploitation 11 p2153 A70-25860

V/STOL air transportation systems for short haul traffic, considering vehicle guidelines, ground facilities and operational requirements [SAE PAPER 700312] 12 p2161 A70-27453

V/STOL aircraft ground guidance systems using microwave instruments for approach and landing [SAE PAPER 700322] 12 p2266 A70-27458

Air deflection and modulation /ADAM/ turbobfan propulsive wing V/STOL design [AIAA PAPER 69-201] 12 p2162 A70-28087

Harrier V/STOL trainer aircraft design features including fuselage, cockpit, power plant, etc 13 p2345 A70-28923

Wind tunnel boundary interference on V/STOL model calculated in test section with solid vertical and slotted horizontal walls, using image method and Fourier transforms [AIAA PAPER 70-575] 13 p2343 A70-29894

Noise of large commercial V/STOL aircraft and effect on design and operation, predicting acoustic signatures 14 p2531 A70-30854

Large scale V/STOL service introduction for decongesting short haul routes between major cities of Northeast Corridors 14 p2615 A70-31276

V/STOL propulsion for commercial needs, considering best tradeoff between propulsion size, weight, noise generation and fuel consumption 14 p2629 A70-31277

V/STOL control systems design for aircraft stabilization and pilot workload reduction 14 p2615 A70-31278

V/STOL 5000 hp engine design optimization, considering component arrangements, rotor design, blade cooling method and fuel control 17 p3147 A70-34709

Convertible fan-shaft engine for V/STOL tactical and transport aircraft, discussing design and performance 17 p3147 A70-34710

On-line final V/STOL Wind Tunnel Data Encoding and Evaluation System /WINDEE/ for complex powered models, using computer monitoring 17 p3049 A70-35494

Static weight tare compensation for V/STOL wind tunnel models, using accelerometer outputs 17 p3062 A70-35500

Flight test instrumentation for V/STOL stability derivatives extraction, noting instrument errors and required compensation 17 p3094 A70-35502

Fluidic parallel flow low airspeed indicator for V/STOL instrumentation tested in wind tunnel [AIAA PAPER 70-906] 17 p3096 A70-35818

Ground simulations data of jet lift V/STOL compared with visual flight tests, noting hover, lateral quick start and stop maneuver 18 p3236 A70-35954

V/STOL testing wind tunnel section with solid vertical and slotted horizontal zero interference walls 18 p3237 A70-36461

V/STOL aircraft for short haul transportation, discussing speed, noise, reliability, economy, etc [SAE PAPER 700333] 18 p3214 A70-36797

V/STOL attitude control system as integral propulsion system part, analyzing design and weight tradeoffs [ASME PAPER 70-GT-31] 18 p3214 A70-36832

Lightweight lift jet engine design, testing and performance for V/STOL aircraft [ASME PAPER 70-GT-32] 18 p3302 A70-36833

V/STOL short haul air transportation program in western U.S., assessing public acceptance and economic viability [AIAA PAPER 70-888] 19 p3552 A70-37394

Mass flow ion drift anemometer applicable to aircraft speed measurement including V/STOL 19 p3425 A70-37885

- V/STOL aircraft automatic flight control, guidance and navigation by onboard computer, discussing mathematical model and simulation results [AIAA PAPER 70-1035] 20 p3665 A70-39502
- High speed track facility for V/STOL aircraft tests, discussing characteristics and design 21 p3803 A70-40581
- Radar inertial system flight evaluation, discussing V/STOL program for approach and landing by use of ground based radar for updating onboard inertial navigator 22 p4066 A70-42651
- Harrier flight testing in terms of V/STOL capability compared with conventional aircraft 22 p3962 A70-42975
- Low and medium power turboprop engines for V/STOL aircraft, discussing development trends concerning operational control 22 p4091 A70-43081
- V/STOL aircraft landing performance, discussing relationships between approach speeds, rates of descent, structural criteria and weight penalties [ICAS PAPER 70-53] 23 p4139 A70-44149
- Wind tunnel wall interference effects for V/STOL aircraft with lift jets, using modified theoretical model for complex jet arrangements [ICAS PAPER 70-54] 23 p4139 A70-44150
- V/STOL guidance and control system with bad weather landing capability, requirements for V/STOL integration into overall air traffic, terminal area guidance procedures, etc 23 p4216 A70-44843
- V/STOL powerplant development, discussion airframe and engine design, application to large aircraft and planned evolutionary process [SAE PAPER 70809] 24 p4395 A70-45905
- Quiet V/STOL transport aircraft from DC-9-10 modification, discussing flying qualities, propulsion and control system interfaces, configurations, etc [AIAA PAPER 70-1409] 24 p4291 A70-45916
- Demand analysis data generation for V/STOL systems suitable for New York-Philadelphia-Washington business travel market, applying model to selected designs 24 p4374 A70-45961
- VACANCIES [CRYSTAL DEFECTS]**
- NT FRENKEL DEFECTS**
- Vacancies influence on macrodefect nucleus formation in single metal crystals under uniaxial strain explaining Griffith crack initiation 05 p0861 A70-15784
- Neutron irradiation damage in W, observing consistency of activation energy for self diffusion with vacancy mechanism 07 p1314 A70-20012
- Steady creep process microscopic mechanisms, discussing creep due to glide of jogged screw dislocations, climbing of edge dislocations and stress directed vacancy diffusion 08 p1593 A70-21519
- Critique of paper on diffusion in Si isotopes and excess vacancies generation by motions of diffusion induced dislocations 08 p1553 A70-21696
- High temperature fatigue crack growth in metal, suggesting condensation of vacancies at crack front after each loading cycle 09 p1776 A70-22644
- Impurities solubility in semiconducting indium telluride with stoichiometric vacancies, verifying thermodynamic model by phase diagrams 16 p2960 A70-33224
- Calcium tungstate crystals, investigating electron paramagnetic resonance centers produced by neutrons and gamma rays to obtain information on lattice vacancies, defects, etc 16 p2961 A70-33963
- Kinetic simulation of atom rearrangements in order-disorder transformation for point defect movement in Ti alloys, considering vacancies and interstitial properties 17 p3115 A70-34381
- Vacancies in vanadium carbide /V3C2C8/ crystals with predicted lattice defects at low temperature, considering entropy 24 p4365 A70-46353
- VACCINES**
- Decreased mental and physical performance of human beings due to T-oral and placebo vaccine reactions 19 p3359 A70-37389
- VACUUM**
- NT HIGH VACUUM**
- NT ULTRAHIGH VACUUM**
- Noncontacting minimum leakage dynamic seals requiring liquid-vapor interface with leakage tolerance [ASLE FICFS PREPRINT 40] 02 p0308 A70-12175
- Free molecular mass flow rate through vacuum seal separating two rarefied gas environments, using coupled integral equations formulated on kinetic theory [ASME PAPER 69-WA/FE-18] 04 p625 A70-14779
- Gravitational-repulsion forces of interstellar vacuum, investigating relations between magnitudes and red shift of galactic objects and quasars 05 p0920 A70-16968

- Vacuum metrics with null geodetic expanding shear-free congruences using holomorphic solution 07 p1334 A70-19600
- Supersonic gas jets applicability as vacuum locks for molecular fluxes at thermal velocity in magnetic trap 08 p1549 A70-20509
- Vacuum science and technology - Conference, Seattle, October 1969 12 p2284 A70-27251
- Vacuum-like state of physical medium as initial state of Friedmann cosmology, noting fluctuation instability for conversion into ordinary matter 18 p3315 A70-36643

VACUUM APPARATUS

- NT ION PUMPS**
- NT IONIZATION GAGES**
- NT KNUDSEN GAGES**
- NT MOLECULAR PUMPS**
- NT VACUUM CHAMBERS**
- NT VACUUM FURNACES**
- NT VACUUM GAGES**
- NT VACUUM PUMPS**
- Vacuum-type thermionic laboratory diode featuring variable electrode spacing, interchangeable electrodes and guard-ring structure 04 p0628 A70-15400
- Microbiological evaluation of modified vacuum probe surface sampler for handling and fallout contamination compared with swab-rinse technique 05 p0807 A70-16574
- Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 05 p0808 A70-16703
- Vacuum probe as effective device for sampling surface contamination of airborne microorganisms 05 p0808 A70-16704
- Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 09 p1623 A70-22340
- High temperature vacuum dilatometer for continuous photographic recording of expansion curves for refractory materials, determining thermal expansion coefficient 09 p1675 A70-22565
- Vacuum interferometer strain gage for absolute earth strain measurement via length change comparison with wavelength standard 16 p2925 A70-33024
- Vacuum distillation vapor filtered catalytic oxidation for water reclamation from human waste, using radioisotopes for thermal energy 20 p3579 A70-39437
- Ultrahigh vacuum measurement and calibration assembly for pressures down to one picotorr for vacuum gage standards 23 p4143 A70-44871

VACUUM CHAMBERS

- Hardness measuring instrument by dynamic method at high temperatures in vacuum, using magnetic or nonmagnetic indenter balls 01 p0092 A70-11111
- Bubbles elimination in glass filament wound parts involving total or partial placement of production equipment and process in vacuum 05 p0856 A70-16825
- Radicals in low pressure supersonic free jets, investigating production by flash photolysis 07 p1343 A70-20126
- Space environment simulation chamber free from oil molecules contamination 09 p1655 A70-22830
- Solar simulator built into multiwall ultrahigh vacuum chamber, describing simulator and chamber modifications [AIAA PAPER 69-1001] 09 p1657 A70-23264
- Environmental engineering at NASA MSC, surveying Lunar Receiving Laboratory, micro incinerator, radon adsorption, Apollo Post-Landing Environmental Test Tank and vacuum chamber 10 p1860 A70-24411
- Vacuum chamber for adjusting and calibrating spaceborne optical instruments used in studying UV radiations 10 p1860 A70-24479
- Hemispherical emissivity measurement in vacuum chamber for thermal testing of space satellite structural materials 12 p2332 A70-27984
- Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation [AIAA PAPER 69-1033] 13 p2384 A70-28518
- Test machine for partial gravity environment simulation for aerospace subsystem testing in vacuum chamber 17 p3060 A70-35181
- Cryopumping systems of ultrahigh vacuum space environmental chambers 17 p3060 A70-35247
- Residual gases partial pressure measurement in vacuum chamber by mass spectrometer with electromagnetic scanner and electron multiplier, detecting electron current 19 p3421 A70-37466

- Laser aided frequency and amplitude analysis of vacuum test chamber vibration during alignment of orbiting UV spectroheliograph 19 p3396 A70-37877

VACUUM DEPOSITION

- Wear resistance of Ti alloys chromosilicified by thermal diffusion in vacuum 01 p0115 A70-10072
- Vacuum deposition of Cr-Al film on Ni-Mo alloys, describing operating pressure, temperature and film thickness 01 p0124 A70-11617
- Vacuum cleavage device for producing small area evaporated metal semiconductor contacts free from oxygen or other contamination 02 p0304 A70-12748
- Vacuum deposited thin film bridges in electroexplosive devices, discussing composition, surface conditions, substrate temperature, bell jar atmosphere and deposition rate 03 p0546 A70-14107
- P-n heterojunction diode strain sensor fabricated by vacuum evaporation onto substrate, investigating mechanical input and output impedance characteristics 03 p0495 A70-14192
- Ge films crystallinity deposited on Ge substrates in vacuum as function of deposition rate, substrate temperature and thermal treatment and background O pressure 03 p0543 A70-14204
- Two step B vacuum diffusion from boron oxide into Si surface using evacuated tube and N atmosphere 05 p0891 A70-15791
- Vacuum deposited thin cadmium sulfide films semiconducting properties, discussing captured free carriers effects on temperature dependence of dark and photo current 05 p0893 A70-16543
- Vacuum condensed thin carbon films graphitization stages using electron diffraction 11 p2068 A70-25381
- Thin films of vanadium niobium and tantalum obtained by vacuum thermal decomposition of metal iodides 12 p2253 A70-27210
- Au, Ag and Al films evaporation in ultrahigh vacuum on LiF and MgO surfaces, showing insignificant role of lattice misfit for epitaxy 12 p2285 A70-27260
- Bi polycrystalline film grown by vacuum deposition on amorphous substrates investigated for electron microscope beam effects 12 p2285 A70-27261
- Corrosion resistance of molybdenum coatings on steel and Pb-Bi eutectic alloy obtained by vacuum contact fusion method 12 p2258 A70-28320
- Au films nucleation and growth on single crystal graphite substrates in ultrahigh vacuum, using transmission electron microscopy for examination 14 p2627 A70-30499
- Refractory metals interaction with boron during vacuum boronizing, investigating kinetics and optimal process conditions 19 p3434 A70-37452
- Printing, electro etching and vacuum deposition stencil methods for preparing moire grids 19 p3432 A70-38721
- Metallic surfaces vacuum electric spark alloying, investigating pressure effects on coating layer thickness and area 20 p3636 A70-39195
- Optical multilayer metal coatings vacuum deposition by cathode sputtering, using automatic apparatus 22 p4045 A70-42510
- In thin film resistance thermometers fabrication by vapor deposition in vacuum, considering electrical properties dependence on temperature 22 p4039 A70-43446
- Heat resistant alloys with metal coatings applied by diffusion in vacuum, investigating structure and fatigue strength at high temperatures 24 p4364 A70-46342
- VACUUM EFFECTS**
- Cost-effective look at vacuum testing of spacecraft components, noting sensitivity prediction and thermal cycle test 01 p0055 A70-10113
- Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument gearing for space systems [ASME PAPER 69-LUB-30] 01 p0100 A70-10379
- Polycrystalline Mo ductility at low pressures in tension at ambient temperature, discussing H type embrittlement mechanism 01 p0121 A70-11234
- Sliding steel specimens anomalous friction behavior in vacuum, noting friction-time plot dependence on oxide film rupture, load, environmental pressure, etc 02 p0321 A70-12534
- Reduced ambient pressure effects on hot wire sensitivity of initiating materials of electroexplosive devices used in missiles 03 p0549 A70-14139

Electron efflux effectiveness from discharge plasma into vacuum, investigating various electrodes influence 04 p0724 A70-14415

Apparatus and techniques for investigating spacecraft materials mechanical and thermal properties, using vacuum effect to simulate space environment [ASME PAPER 69-WA/PID-22] 04 p0663 A70-14752

High altitude simulation installations design for rocket motors starting tests under long term high vacuum exposure 04 p0736 A70-15179

Monatomic gas steady expansion into cylindrical vacuum, considering Maxwell molecules with cylindrical symmetry 04 p0674 A70-15557

Time dependent expansions into vacuum of monatomic gases with spherical symmetry, obtaining moments expressions for Maxwellian molecules 05 p0831 A70-16015

Exploding wire discharges in high vacuum, discussing particle emission MHD instabilities, plasma temperature and electron density 05 p0890 A70-16820

Bubbles elimination in glass filament wound parts involving total or partial placement of production equipment and process in vacuum 05 p0856 A70-16825

Q spoiled laser bombardment to obtain atomically clean surfaces in vacuum, noting damages 05 p0861 A70-16990

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc 06 p1093 A70-17650

X and UV radiation effects on *Escherichia coli* B/r in vacuum, noting irradiated cell inactivation and radiation sensitivity increases 06 p0995 A70-17750

Convergent ribbon electron beam shaping for vacuum welding with double anode gun, considering space charge effect 06 p1076 A70-17784

Evaporation rate from spherical drop into vacuum influenced by molecular collisions occurring in gas cloud formed by emitted particles 06 p1113 A70-18283

Boltzmann equation fourth moment numerically solved to study distribution function characteristics during monatomic gases spherical expansions into vacuum 06 p1048 A70-18320

Particle density of jet plumes exhausting in vacuum calculated for He, Ar and N 06 p1052 A70-18388

Niobium single crystals annealed in ultrahigh vacuum, studying stress-strain behavior, secondary slip geometry and slip line morphology 06 p1090 A70-18493

Microwave scattering from plasma column of low pressure discharge in Hg under free space conditions 06 p1125 A70-18609

Vacuum and radiation effects on *Escherichia coli*, noting role of cells water desorption in vacuum damage 07 p1203 A70-18962

Steady temperature field of two dimensional periodic contact surface in vacuum, using conjugate harmonic functions for thermal flux lines, isothers and thermal resistance 07 p1423 A70-19820

Vacuum UV spectrum interferometer with grazing incidence reflections between plane parallel mirrors to obtain coherent beams, discussing fringe patterns 07 p1286 A70-20081

Thermal decomposition of ammonium perchlorate and polymethylmethacrylate mixture thin layer between Ti plates in vacuum 09 p1741 A70-22109

Vacuum rolling of high strength hard-workable dispersion-hardened Nb base alloys excluding recrystallization 09 p1692 A70-22756

Lead type channel electron multipliers gain degradation in ultrahigh vacuum 10 p1849 A70-24557

Si-Ge air-vacuum thermocouples for thermoelectric conversion, describing construction materials, mechanical and electrical properties, radiative heat transfer operation, etc 10 p1807 A70-24896

Electrode erosion during high voltage vacuum breakdown measured by neutron activation analysis and gamma ray spectrometry, noting plasma formation from electrode material 10 p1854 A70-25317

Pulmonary blood flow direction and distribution in dogs during near vacuum exposure and recompression 11 p1984 A70-25351

Spectroscopic diagnostics of erosion plasma jets from cylindrical pulsed plasma generator operating in vacuum 11 p2093 A70-26745

Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material 11 p2146 A70-26794

Friction and wear of Ni sliding on Ni, Cu on Cu and Au on Au tested in vacuum at room temperature with constant load 12 p2242 A70-27229

Iron cyanide additive for surface stabilization of ZnO irradiated with UV in vacuum 12 p2181 A70-27258

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects 12 p2243 A70-27290

Congruent vaporization rates of niobium monocarbide phase at high temperatures in vacuum, using method of least squares 12 p2254 A70-27320

Contact and unsteady heat transfer through vacuum cavity applied to hollow cylinders, solving nonlinear integral equations by piecewise linear approximation 12 p2331 A70-27326

Vacuum annealing treatments effect on oxidation rate of Co-Cr alloy at high temperatures 12 p2257 A70-28007

Phase transformations of molybdenum carbide under elevated temperature in vacuum, using X ray and differential thermographic analysis 13 p2433 A70-28852

DC arc facing welding device using vacuum to minimize pores, slag inclusions, cracks and defects 13 p2384 A70-28867

Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument ball bearings and instrument gearing for space systems 13 p2419 A70-29120

Variable temperature plasma with two ion species, noting rarefaction wave propagation during one dimensional expansion into vacuum 13 p2464 A70-29415

Degassing kinetics during dry friction in vacuum, suggesting gas separation correspondence to oxide film breakdown 13 p2421 A70-29430

Transition radiation in plasma sheet in vacuum assuming specular reflection of electrons at vacuum boundary 13 p2464 A70-29512

Short term creep of Ni in vacuum, stationary air and high speed air flow at various temperatures and loads 14 p1594 A70-30167

First pulse vacuum startup measurements of monopropellant hydrazine thrust reactors with spontaneous catalyst, simulating spacecraft control dynamics 14 p2628 A70-30753

Antifriction and wear properties of iron fluoride materials and white cast iron under sliding friction in air and vacuum 15 p2743 A70-31637

Pentolite spherical charge gaseous explosion products expansion into vacuum, using Taylor similarity solution for flow in detonation wave 15 p2774 A70-31764

Solar furnaces in space for treatment of high purity products in space vacuum, discussing design and operational problems 15 p2717 A70-31802

Power reduction consumed in vacuum by direct-current voltage converter by introducing delay into breaker transistor control at output stage 15 p2677 A70-31945

Vacuum effect on explosive coupling seismic energy considered in lunar geophysical experiment 16 p2896 A70-33092

Thermal conductivity of multilayer and mixed powder high temperature insulation systems over wide temperature range and vacuum conditions [AIAA PAPER 70-637] 16 p2997 A70-33596

Sliding electrical contacts in vacuum and space - Conference, Virginia Polytechnic Institute, September-October 1969 16 p2919 A70-33805

Contacting metal surfaces thermal conductance prediction in vacuum, formulating dimensionless parameters in terms of properties, surface measurements and load/temperature conditions of contact [AIAA PAPER 70-852] 16 p2932 A70-33919

Lubrication system components behavior in vacuum environment, investigating evaporation, friction, adhesion, wear, etc 16 p2923 A70-34156

Electron beam welding of Ti alloys in partial vacuum, describing mechanical tests and metallographic examinations 17 p3098 A70-34442

Ultrahigh vacuum creep rate measurements with continuously increasing loads on Ta-base alloy, relating creep life with temperature and stress rate 17 p3122 A70-34552

Ball bearing materials for ultrahigh vacuum space environments, determining frictional and wear behavior 17 p3099 A70-34573

Zero pressure balloon as base for stratopause pressure and temperature measurements, analyzing winds and balloon trajectory and dynamics 17 p3075 A70-34608

Metal-silicate rock friction in ultrahigh vacuum of lunar environment 17 p3101 A70-34760

Accelerated vacuum testing of ball bearings and slippers at 30-130 F, considering dry lubricated brush/slipping material combinations 17 p3101 A70-34762

Underexpanded carbon dioxide free jet expanding into vacuum from conical nozzles 17 p3070 A70-35246

Dry friction and wear tests of various materials in vacuum at low temperatures 18 p3263 A70-36471

Radiant heat transfer at vertex of adjoint flat plates separated by vacuum 18 p3243 A70-36711

High vacuum effects on creep properties of single crystal low carbon nickel base superalloy 19 p3451 A70-37705

Lunar basalt lava bed formations, examining vacuum and gravity effects during cooling 19 p3517 A70-37988

Pure metals structure effect on friction and lubrication under steady slip in ultrahigh vacuum at low temperatures 19 p3438 A70-38729

Long term life test and vacuum tests of high temperature resistojets using ammonia and hydrogen propellants [AIAA PAPER 70-1136] 20 p3567 A70-40212

Ambient near vacuum pressure effect on blood circulation, examining thoracic aorta blood flow, pressures, gas expansion and water vaporization 20 p3576 A70-40326

Heat resistance of machined stainless steel and molybdenum contact pairs in vacuum, discussing compressive loads and surface defects effects 20 p3638 A70-40340

Temperature dependent anomalous optical absorption of thin yttrium films under static ultrahigh vacuum 21 p3862 A70-40816

Surface films effect on thermal contact conductance of aluminum surfaces contacting in high vacuum environment 21 p3944 A70-41024

Ultrahigh vacuum metal bonding by twist compression technique, reporting adhesion and friction coefficients for atomically ordered Pt-Co alloy 21 p3833 A70-41465

Time dependent adhesion in ultrahigh vacuum of Apollo 11 lunar soil sample 10065-33, considering micromechanical and microphysical properties 21 p3915 A70-41658

Contact and unsteady heat transfer through vacuum cavity applied to hollow cylinders, solving nonlinear integral equations by piecewise linear approximation 21 p3952 A70-42067

Thin titania films electrical breakdown under high DC fields in high vacuum, suggesting reduction to lower order semiconducting oxide 22 p4085 A70-42621

SkyLab Orbital Workshop fabrication experiments under space environment conditions, discussing weightlessness and vacuum effects on various manufacturing techniques 22 p4046 A70-43075

Apollo 11 lunar fine thermal conductivity measurement under vacuum conditions and lunar temperature range, using line heat source method 23 p4243 A70-44442

Thermodynamic equilibrium analysis of metal oxidation and thermal dissociation of oxides in vacuum, noting decreased affinity by evaporation 24 p4361 A70-45835

VACUUM FURNACES
Induction furnace for thermal treatments and melting of solid and liquid metals, alloys and sintering and degassing ceramic and metallic systems in vacuum 04 p0664 A70-15371

Soviet monograph on bimetal and refractory metals production by rolling in vacuum or inert media 19 p3433 A70-37402

VACUUM GAGES
NT IONIZATION GAGES
NT KNUDSEN GAGES
Thermocouple vacuum gauge joined to Apollo lunar sample return containers [ALSRC], describing two step welding procedure with transition cylinder 08 p1507 A70-21483

He-Ne laser light source for oil damped spiral gauge used as vacuum system pressure nulling device 09 p1698 A70-23000

Ultrahigh vacuum gages absolute calibration by controllable conductance method, discussing accuracy 19 p3421 A70-37463

Ultrahigh vacuum calibration system for vacuum gages and mass spectrometers based on pressure attenuation and molecular beam techniques 22 p4029 A70-42620

VACUUM MELTING

VACUUM MELTING

Soviet monograph on nickel and Ni vacuum melted alloys, studying physicochemical, operational characteristics and gas content

06 p1085 A70-17411

Vacuum melting and heat treating equipment for high melting point metals from phase equilibria studies viewpoint

09 p1655 A70-22562

Ti alloy ingot chemical macroinhomogeneity, investigating elimination by vacuum arc melting

17 p3112 A70-34355

Tungsten exploding wires electron emission during vacuum melting

17 p3137 A70-35726

Hawaiian basalt melted in simulated lunar environment, investigating surface characteristics, internal structure and bearing strength

23 p4254 A70-44883

VACUUM PUMPS

NT ION PUMPS

NT MOLECULAR PUMPS

Titanium vacuum pump, discussing pumping speed, sticking factor and sorption coefficient for hydrogen

15 p2744 A70-31845

Superhigh vacuum pump with orbitron ionizer, describing construction and ionization

16 p2843 A70-33214

Vacuum pump systems properties for space environment simulation installations

19 p3358 A70-38280

Clean, rough vacuum, discussing cleanliness criteria and pollution avoidance via contaminant-free pump

19 p3358 A70-38494

VACUUM SYSTEMS

Composite window permitting visual or photographic observation and IR irradiation of test materials in ultrahigh vacuum system

09 p1698 A70-22994

Coaxial energy outlets satisfying vacuum maintenance requirements of dielectric waveguide windows in dismountable prototype microwave devices

09 p1652 A70-23647

Heat transfer mechanism in foil-vacuum insulations, analyzing factors responsible for point of inflection on experimental temperature field curves

13 p2521 A70-28861

Residual atmosphere analysis and application to ion pumping on Al alloy high pressure chamber of differential vacuum system

19 p3434 A70-37464

Clean, rough vacuum, discussing cleanliness criteria and pollution avoidance via contaminant-free pump

19 p3358 A70-38494

VACUUM TUBE OSCILLATORS

Vacuum tube signal frequency converters for meteorological telemetry measurements including blocking oscillators, multivibrator and faustantron

09 p1718 A70-23332

Controlled self excited quartz triode oscillator, calculating flicker noise effect on frequency stability

23 p4171 A70-43959

VACUUM TUBES

NT VACUUM TUBE OSCILLATORS

Correlations between 100 percent inspection by automatic equipment and quality control acceptance sampling in vacuum tube industry

06 p1077 A70-17986

VACUUM ULTRAVIOLET RADIATION

U FAR ULTRAVIOLET RADIATION

VALENCE

Optical density of valence and conduction states by UV photoelectric spectroscopy, outlining experimental techniques and inelastic scattering effects

19 p3471 A70-37711

Valent state of chromium doped barium titanate from EPR spectra and magnetic susceptibility measurements

22 p4086 A70-43133

VALIDATION

U PROVING

VALIDITY

Vibration damping theory validity, discussing response curve for frequency dependence of energy dissipation

11 p2133 A70-25733

VALKYRIE AIRCRAFT

U B-70 AIRCRAFT

VALLEYS

Lunar sinuous rilles formation by fluid flow mechanisms, discussing evidence for lava and rille formation by lava tube collapse

09 p1759 A70-22799

Lunar sinuous rilles and Mojave desert stream channels similarities, discussing presence of terraces

11 p2108 A70-25701

Lunar rilles temperature distribution analysis, examining contour shape, aspect ratio and solar elevation angles effects

17 p3152 A70-34507

Lunar regolith depth measurement by Lunar Orbiters 4 and 5 high resolution photographs, discussing thickness relation with sinuous rilles in marial regions

18 p3319 A70-37054

Lunar sinuous rilles morphological and distributional observations and implications on theories of origin concerning surface water erosion

19 p3521 A70-38442

VALSALVA EXERCISE

Antigravitation suit effects on rheoencephalography changes during Valsalva maneuver and horizontal-passive orthostatism transition in humans

07 p1212 A70-19738

Human phasic right ventricular blood velocity, examining respiration, rhythm disturbances and Valsalva maneuver influence by radiotelemetry

16 p2850 A70-33111

Valsalva maneuver beat-to-beat effects on systolic cardiac intervals compared with time based measurements

22 p3972 A70-43484

VALSALVA MANEUVER

U VALSALVA EXERCISE

VALUE ENGINEERING

Beneficial and detrimental effects of value engineering change proposals on system reliability, relating cost improvement and performance factors

13 p2524 A70-29568

VALVES

NT AUTOMATIC CONTROL VALVES

NT FUEL VALVES

NT GAS VALVES

NT PRESSURE REGULATORS

NT RELIEF VALVES

Approximate determination of termination hydraulic servomotors frequency characteristics with four way valves using piecewise straight lines on Bode diagram

01 p0007 A70-10034

Valvular aortic stenosis severity estimation using digital computer program and tape recorder for determining valve area

02 p0243 A70-12094

Ultrasonic Doppler method for timing mitral and aortic valves rapid movements, using filter to eliminate LF signals due to heart walls

03 p0432 A70-12891

Ejection click of valvular pulmonic stenosis by external phonocardiograms and intracardiac pressure recordings during successive respiratory cycles

04 p0633 A70-15440

Stability of conical hydraulic poppet valve with elastic support and inlet and outlet piping

06 p1075 A70-17138

Thrust static characteristics of poppet valves with specific angle range indicating validity of momentum theory for thrust estimation

06 p1075 A70-17139

Normal and stenosed aortic valve closure wing measurements in model valve in pulsatile water tunnel showing turbulence generation

07 p1220 A70-19249

Diastolic and equivocal fluttering of mitral valve in aortic insufficiency by echocardiography

09 p1615 A70-22209

Human mitral valve morphology, distinguishing chordae tendineae types by insertion mode

10 p1819 A70-24935

Human mitral valve morphology, studying posterior and anterior leaflets partitioned by chordae tendineae

10 p1819 A70-24936

Self excited lateral vibration of poppet valve under positive and negative damping effects

11 p1983 A70-26420

Poppet valve lateral stability improved by effective seat ratio increase and use of high viscosity fluid

11 p1983 A70-26421

Rocket engine thrust chambers and valves, discussing component lifetime extension and operational flexibility of reaction control systems

[AIAA PAPER 70-603] 16 p2964 A70-33526

Liquid fluorine feed system valves, seals and seats, discussing design criteria for flight weight components

[AIAA PAPER 70-705] 16 p2844 A70-33564

Dual bellows ball seat valve design for colloid thruster coupled to pressurized feed system, demonstrating thrust decay and flow regulation

[AIAA PAPER 70-615] 16 p2919 A70-33610

Supply valve influence on dynamic characteristics of volumetric hydraulic actuator

18 p3215 A70-36126

Prototype synchronizing valves for maintaining identical flow velocities of two hydraulic actuating elements, noting unbalanced hydrodynamic forces and orifices asymmetry effects

20 p3564 A70-39717

Fluidic logic devices compared with electric relay and hydraulic/pneumatic valve equivalents

24 p4293 A70-45429

Two dimensional aperture flow with downstream asymmetric pressure distribution due to jet reattachment to boundary, simulating flows in hydraulic spool valves and fluidic devices

24 p4325 A70-45582

VAN ALLEN RADIATION BELTS

U RADIATION BELTS

VAN DE GRAAFF ACCELERATORS

Energy attenuation parameters measurements for monoenergetic source neutrons in shielding materials, using Van de Graaff accelerator

23 p4216 A70-43807

Thermal neutron radiography with 2.5 MeV Van de Graaff accelerator

24 p4376 A70-45753

VAN DER WAAL FORCES

Hydrogen atoms van der Waal dispersion interaction effects on H lines broadening in neutral medium, taking into account resonance interaction

04 p0723 A70-15714

VANADIUM

V and Cr single crystals microhardness anisotropy and causes, noting similarity with W, Nb and silicon ferrite

06 p1088 A70-17613

Vanadium single crystals substructure on different planes to growth direction using X ray diffraction

07 p1308 A70-19608

Yield stress and work hardening properties of tension-deformed vanadium single crystals as function of purity

08 p1522 A70-21750

Interstitial and substitutional impurity effects on fracture strength, plastic properties and ductile-brittle transition temperature of vanadium determined from impact and tensile tests

11 p2066 A70-25913

Star eta Arietis spectra analyzed for Fe and V abundance

13 p2487 A70-28715

V-N and V-O solid solutions magnetic, electrical, crystallographic and mechanical properties as function of gas concentration

14 p2596 A70-30842

Interstitial oxygen effect on properties and precipitation processes in pure V and V-Ti alloys, using electron microscope

19 p3454 A70-38812

V and Cu emission spectrographic analyses in chondrite types, noting distribution patterns between groups based on meteorite chemical fractionation mechanisms

24 p4411 A70-45789

VANADIUM ALLOYS

Ni-V alloys precipitation behavior with 15.4/16.5 wt percent V content, observing tetragonal equilibrium theta phase precipitation

04 p0708 A70-15368

Cold working with subsequent heat treatment increased creep rupture and creep behavior of V alloys

04 p0708 A70-15372

Alloying elements effects on vanadium alloys case hardening by boronizing

07 p1303 A70-18742

Stress corrosion testing of vanadium alloys using precracked specimens in cantilever beam apparatus, discussing strain hardening exponent role and propagation rates

07 p1306 A70-19299

Recrystallization in austenite phases of vanadium and columbium HSLA steel alloys determined in high temperature deformation tests

08 p1521 A70-21704

Phase diagram of Ti-Ta-V system, determining solubility of sigma Ta and V in alpha and beta Ti in solid solutions

09 p1709 A70-23788

Soviet monograph on V and V alloys covering phase diagrams, mechanical, chemical and physical properties, compounds and chemical composition

14 p2595 A70-30627

Omega phase embrittlement in aged Ti-V alloys, discussing precipitation effect on tensile properties

15 p2756 A70-31570

High purity V and V-Cr-Ti process, describing aluminothermic reduction and electron beam purification

15 p2761 A70-32387

Cross sectional phase diagram of Nb-Ti-Mo-V, discussing continuous crystallization and composition dependent hardness and resistance

18 p3275 A70-36125

Isothermal section at 1150 C of V-Zr-Cr cast and annealed alloys investigated by X ray and metallographic analyses, establishing various phase regions

19 p3453 A70-38711

Interstitial oxygen effect on properties and precipitation processes in pure V and V-Ti alloys, using electron microscope

19 p3454 A70-38812

Phase equilibria, hardness and electroresistivity of Ti-Al-V alloys at solid compound section for reinforced metal composites

24 p4361 A70-45831

Fe-Cr and Fe-Cr-V system miscibility gap, using differential thermal analysis and Mossbauer effect measurements

24 p4362 A70-46190

VANADIUM CARBIDES

Dissociation energy of vanadium and chromium dicarbide and vanadium tetracarbide, using Knudsen effusion mass spectrometric method

16 p2857 A70-33654

Vanadium carbide single crystals superconductivity from upper limit on electron phonon interactions at 30 mK

Vacancies in vanadium carbide /V3C28/ crystals with predicted lattice defects at low temperature, considering entropy

VANADIUM COMPOUNDS

NT VANADIUM CARBIDES

Temperature and hydrogen concentration effect on microhardness of polycrystalline beta-vanadium hydride, obtaining photomicrographs of indentations

HF electrodeless plasma discharge synthesis of niobium and vanadium intermetallic compounds

Molecular orbital energy level diagram for metal ion X ray emission and absorption spectra interpretation from titanium and vanadium compounds

Vanadium subnitride crystal structure with ordered array of nitrogen atoms in V sublattice

VANADIUM ISOTOPES

Terrestrial and chondrites vanadium isotopic ratios indicating irradiation histories difference

VANELESS DIFFUSERS

Stagnation pressure losses in radial vaneless diffusers to estimate compressor performance, noting one dimensional analysis

VANES

NT GUIDE VANES

NT JET VANES

NT WIND VANES

Internally air cooled turbine blades and vanes emphasizing coolant aerodynamics, heat transfer and blade life, high temperature in jet engines, etc [RAES PAPER 22]

Tube heat transfer augmentation by helical vane inserts, noting Reynolds number and mass flow rate effects

VAPOR DEPOSITION

NT VACUUM DEPOSITION

Epitaxial growth of Cu vapor deposited on W single crystal /110/ surface using low energy diffraction, Auger electron and work function techniques

Vapor deposited GaN single crystals tested for electrical and optical properties, determining band gap energy, electron concentration, etc

Boron and other high performance reinforcements made by vapor plating process, discussing boron filament atomic structure and morphology

AlN deposition rate from gaseous phase on Mo substrate as function of temperature

Zr, Ti, Nb and Ta carbides deposition from metal chloride, methane, hydrogen and argon mixture, studying gas concentration and temperature effects on deposition rate

Epitaxial magnetic oxide films grown by chemical vapor deposition

Metallic contacts deposition on p- or n-GaAs using vacuum evaporation by electron bombardment

ZnO epitaxial layers deposition by chemical vapor transport on sapphire single crystal substrates

Initial stages of Ti vapor deposition on Mo, using secondary ion-ion emission and mass spectral analysis

Epitaxial beta SiC film formation on SiC by reactive evaporation or sputtering at low temperature

Boron and boron carbide coatings formation on graphite by vapor deposition, determining optimum parameters for reaction control

Chemical vapor deposition of carbon matrix material in fiber structure, investigating thermodynamic fundamentals in processes

Shaping methods for filament wound carbon structures, emphasizing matrix building by chemical vapor deposition

Gas porosity in fusion welds of chemical vapor deposited W, noting formation of microfissures due to pore linkup

Metal vapor flow measurement by quadrupole mass spectrometer for control of thin film depositions by evaporation

Boron and boron-carbide coatings formation by vapor deposition, determining optimum thermodynamic parameters from experiment

Gas bubbles effect on recovery and recrystallization in W sheet deposited from tungsten fluoride vapor

Pyrolytic carbide protective coating deposition from gaseous phase on spherical particles in boiling layer

Diffusing element deposition on metal surface during saturation from gas phase based on calculation of equilibrium composition of reaction mixture

Metal layer and absorbed oxygen quantities in reactive oxidation deposition of aluminum

VAPOR JETS

Cs jet device eliminating wall influence in nonlinear radiation-atom interaction phenomena

VAPOR LIQUID EQUILIBRIUM

U LIQUID-VAPOR EQUILIBRIUM

VAPOR PHASES

Wet vapor flow with/without inert diluent, assuming momentum and heat transfer between phases according to Stokes law and Nusselt number of unity

Cavitating flow in converging channels of hydraulic system, calculating energy distribution at gas-vapor phase using Borda-Carnot theorem

Gas chromatography based on sampling gas-vapor phase at liquid surface for determining volatile oxygen containing compounds in biological media

Hydrophobic-hydrophilic zero gravity liquid-gas phase separator for Apollo 11 flight life support system [SAE PAPER 690638]

Low pressure ionic reactions in gaseous cyclobutane

Light emission and gas phase ignition of homogeneous solid propellants under shock tube conditions [AIAA PAPER 70-120]

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases

Phase growth of free vapor bubbles in water, ethanol and isopropanol at uniform superheats under normal and zero gravity

Gas phase ignition theory of evaporating fuel in stagnant hot oxidizing gas as function of temperature

Gas phase thermal decomposition of ammonium perchlorate at elevated temperatures using mass spectrometer

Thermal conductivity for organic compound gases at atmospheric pressure

Aerothermochemistry of two phase flow in gaseous media of solid or liquid particles or spherical gas pockets [ONERA-TP-691]

Polar gas phase dielectric under conditions of power saturation interacting with microwave radiation field in waveguide

Solid-gas phase equilibria of binary systems related to cryogenics

Nitrogen tetroxide thermodynamic properties calculation from pressure-volume-temperature equation of state in gas and liquid phases

Gas phase chemicals synthesis via AC diffuse discharge superimposed on propane-air flame seeded with potassium carbonate in electrically augmented flame burner

Vapor phase fluorescence spectra from benzene and deuterated benzene at zero point vibrational level

Fourth order aberration in gas lens used as focusing element in light beam waveguide systems

Gas phase stabilities of bicyclic cations, establishing heats of formation limits by ion- molecule reactions identification

Reaction kinetics of gas phase pyrolysis of polydifluoroaminomethanes in various reactors, obtaining C-N bond cleavage as rate determining step

Pressure effects on quantum yields of carbon trioxide formation in gas phase ozone photolysis with carbon dioxide

Gas phase chemical reactions effect on heat transfer to charring ablator, deriving numerical solution for multicomponent stagnation point flow [AIAA PAPER 70-869]

Film condensation rates of vaporized substance in shock tube during passage of shock wave, formulating quasi-one dimensional problem

Pressure dependence and high pressure limiting values of rate constants of gas phase reaction of monomethylamine and trimethylamine with boron trifluoride

Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection [AIAA PAPER 69-559]

Saturated nitrogen vapors condensing coefficients measurement by cryostat, comparing results with theoretical prediction

Cesium high temperature saturated liquid and vapor phase density and critical temperature and pressure

High temperature aluminum species in vapor over solid alumina, determining thermodynamic properties, composition and accommodation coefficient by Knudsen effusion and mass spectroscopy

VAPOR PRESSURE

Vapor pressures of cobalt over pure cobalt and over Ni-Co alloys determined as function of temperature by isotope exchange method

Caloric data determining saturated vapor pressure of nitrogen tetroxide and heat of sublimation for sublimation curve

Semiconductor compounds application as partial vapor pressure sensors of chemical elements, discussing electrical properties dependence

Vapor pressure of binary alloys with volatile components measured by combined Knudsen-torsion method, using thermal balance in vacuum

Microwave propagation refractive index over India, showing influence of humidity and vapor pressure

Vapor pressures and dissociation energy of yttrium carbide and tetracarbide over extended temperature, measured by Knudsen double focusing spectrometer

Knudsen effusion measurements of stoichiometric MnTe sublimation at high temperature and low pressure

Boiling point method for alkali metals vapor pressure at high temperatures, estimating data accuracy

Cs high temperature vapor and critical pressure and temperature determination for predicting thermodynamic and transport properties, liquid phase nature and state relations

VAPOR TRAILS

U CONTRAILS

VAPOR TRAPS

Aviation kerosene pipeline column separation after valve closure, solving differential equations for transient pressures propagation to predict vapor cavities duration

Aerosol impact traps for ground and airborne water vapor condensation studies

VAPORIZATION HEAT

U HEAT OF VAPORIZATION

VAPORIZERS

NT EVAPORATORS

VAPORIZING

NT BOILING

NT EVAPORATION

NT FILM BOILING

NT FLASHING [VAPORIZING]

NT LEIDENFROST PHENOMENON

NT NUCLEATE BOILING

NT PROPELLANT EVAPORATION

NT TRANSPIRATION

Mathematical model of spherically symmetric quiescent droplet undergoing quasi-steady vaporization near thermodynamic critical point

Vaporization interaction liquid rocket performance model, discussing performance loss evaluation and test data

Meteor fragments motion and vaporization based on photographs

N-heptane and Freon-13 droplets vaporizing size and temperature at supercritical pressures in heated air stream [AIAA PAPER 70-6]

Group 4A difluorides vaporization thermodynamics and bond dissociation energies, tabulating mass spec-

- tra, vapor composition, reaction enthalpies, heats of polymerization and thermodynamic functions
07 p1319 A70-19889
- Laser induced vaporization of Bi compounds with group VIa elements, analyzing vapor species, condensed phase and molecular configurations by mass spectroscopy
08 p1455 A70-21338
- Vapor composition and condensed phase structure of As and Sb compounds with group VIa elements analyzed by laser mass spectrometer
08 p1455 A70-21339
- Meteor ablation, investigating removal rate of molten film and droplet evaporation
09 p1754 A70-22476
- Laminar boundary layer behind normal shock wave with vaporization and combustion, obtaining profiles on analog computer
11 p2148 A70-25967
- Mass spectrometric analysis of lunar material from soil vaporization products ion component by electron beam
11 p2119 A70-26800
- Congruent vaporization rates of niobium monocarbide phase at high temperatures in vacuum, using method of least squares
12 p2254 A70-27320
- Radiating drop unsteady vaporization or growth for uniformly distributed internal heat sources, discussing gas temperature distribution and diffusion thermal effect
13 p2521 A70-29417
- Vaporization of small meteor particles with identical surface temperature, considering radio communication based on reflection from ionized trails
14 p2636 A70-30323
- Vaporization characteristics of solids for relationship between chemical bonding and sublimation mechanism emphasizing NaCl, CdS and GaAs
14 p2545 A70-30906
- Titanium dicarbide and tetracarbide vaporization at high temperatures, using Knudsen effusion method with mass spectroscopy, determining dissociation energies
21 p3773 A70-41274
- Boiling point method for alkali metals vapor pressure at high temperatures, estimating data accuracy
23 p4281 A70-44448
- High power pulsed laser fog dispersal, calculating vaporization regimes of droplet interaction with laser radiation
23 p4201 A70-44592
- Basalt heating with IR carbon dioxide laser, investigating vapor fractionation for inert atmospheres, very high temperatures and silicon dioxide poor materials

Mean magnitudes, colors and amplitudes for RR Lyrae variables in omega Centauri cluster obtained from photometric observations

06 p1148 A70-18455

RW Aur-type variables in Taurus, studying temporal variations from photographic and photometric observations and B, B-V diagram

07 p1376 A70-18906

Carbon particles formation and growth model for cool variable carbon star atmosphere with sinusoidal carbon star atmosphere with sinusoidal temperature variations

07 p1380 A70-19260

Carbon particles formation and growth in Mira variables atmospheres, considering extinction effects on stellar structure and appearance

07 p1380 A70-19261

Secondary minimums role in studying eclipsing variable stars, correlating observability with detection of line of apsides motion

08 p1581 A70-21759

Cepheid type variable stars nuclear reaction and opacity pulsation excitation mechanisms

10 p1940 A70-24409

Algol variable RV Ophiuchi photoelectric observation in B and V, representing light curve characteristics by gas stream model

10 p1945 A70-24967

Orion Nebula region search, giving characteristics and locations of flare type variable stars

10 p1949 A70-25249

Autocorrelation and brightness distribution functions for irregular variable star

11 p2115 A70-26579

Model for FU Orion irregular variable to determine turbulent convection characteristics in atmosphere at optical transparency level

11 p2115 A70-26580

Coordinates and brightness characteristics of variable observed during photographic studies of VX Cas

11 p2116 A70-26584

Spectra, luminescence and gas dynamic effects in variable stars, discussing nonthermal theory to explain continuous emission

12 p2306 A70-27857

Mass transfer in close binary stars and in highly variable stars

12 p2306 A70-27858

Comet-like nebulae, describing brightness and spectral characteristics of variable stars in nebulae

12 p2307 A70-27863

Cold variable stars intrinsic polarization model proposing light scattering in circumstellar dust shells

12 p2307 A70-27865

Transistor densitometer used for variable star interpretation by amateur photographers

15 p2807 A70-32348

Massive hydrogen burning stars evolution with pulsational mass loss based on minimizing pulsational instability degree to specify mass loss rate

15 p2803 A70-32612

RW Aur type variable stars percentage with photographically observable flares

15 p2807 A70-32877

AG Peg brightness variations by three color photoelectric photometry, discussing orbital motion of cold component

15 p2807 A70-32878

Long period variable stars light polarization as function of brightness and wavelength, discussing molecular scattering and nonthermal emission

15 p2808 A70-32879

CH Cygni irregular light variations and spectrum peculiarities, considering upper atmosphere perturbation by variable hot satellite

15 p2809 A70-32904

Soviet book on variable stars covering properties, evolution, structure, methods of investigation, etc

19 p3520 A70-38397

Soviet book on brightness of irregular and semiregular variable stars by statistical methods

20 p3705 A70-39899

Beta CMa variable star HD 43818 spectral observations, discussing line profiles and radial velocities

22 p4100 A70-42853

Stellar ring 274 reality confirmed by photometric measurements of OB member stars, determining variable shell star P Cygni location

22 p4101 A70-42868

Ic class variables long wavelength anomalous radiation, discussing emission from circumstellar dust shell

22 p4094 A70-42934

Radial velocity-light amplitude ratios of grouped variable stars in continuous sequence, comparing pulsation prediction

23 p4247 A70-44793

UV Cet type flare star rotational velocity upper limits from H alpha emission line width in chromospheres

23 p4251 A70-44824

Deutsch period vs line width relation for periodic Ap stars, determining rotational velocities with rigid rotator model

23 p4251 A70-44825

Massive star pulsational stability in He burning phase, investigating opacity variation effects on flux dissipation in outer layers

24 p4405 A70-45419

Light velocity frequency dependence in variable stars gravitational fields suggested from yellow and UV NP 0532 observations

24 p4405 A70-45488

UV Ceti type variable flare stars, observing radio and optical spectral regions for X ray production

24 p4397 A70-45763

VARIABLE SWEEP WINGS

Variable sweep aircraft aeroelastic stability, considering wing-tail interaction flutter

06 p1170 A70-18162

Variable sweep wing pivot joint design utilizing double shear tilted spherical journal bearings with Teflon fabric liners

12 p2318 A70-27135

Soviet book on aerodynamic, stability and controllability characteristics of variable geometry wing aircraft

13 p2344 A70-28648

European Panavia 100/200 two engine variable wing military aircraft, noting prototype design, use and production sharing

13 p2347 A70-29051

Fixed and variable sweep wing structure computerized design optimization

16 p2869 A70-33506

Variable sweep high thrust-weight ratio multirole combat aircraft /MRCA/, discussing British-French cooperation, development programs and requirements

17 p3017 A70-34916

Critical flutter behavior of variable geometry aircraft with wing of 70 degree leading edge sweep, noting wing-tail interference

18 p3338 A70-36445

Variable wing sweep aircraft angular motion mathematical model, analyzing inertial moments influence on control dynamics

20 p3562 A70-40182

F-14 carrier based fighter development program requirements, inherent difficulties and variable geometry configuration

21 p3750 A70-41264

Aircraft control surface aerodynamic characteristics, considering low aspect ratio wing elevons with variable sweep leading edge as longitudinal and lateral controls

23 p4131 A70-44107

VARIABLE THRUST

Small penetration aid rocket motors fabrication, discussing axial and tangential-thrust integral assembly, impulse levels, delay line convection for igniters, production evolution, etc

07 p1295 A70-19714

Solid propellant rocket motor combustion control by fluidic vortex valve, considering thrust variation

16 p2965 A70-33535

Throttleable thruster system for Mars soft landing, selecting catalytic decomposition engine from system weight and performance studies

16 p2966 A70-33549

VARIANCE (STATISTICS)

NT MULTIVARIATE STATISTICAL ANALYSIS

Least squares adjustment of observation equations for hybrid systems solved by regarding constraints as observations with zero variances

02 p0289 A70-11798

Noise variance extreme value estimator for biorthogonally block coded high rate telemetry system for Mariner missions

08 p1459 A70-20799

Obliquely incident spherical wave amplitude and phase fluctuations, deriving formulae to compare variances behavior for refractive index fluctuation autocorrelation functions

14 p2574 A70-30750

Density and distribution functions for quotient of ellipsoids of variance volumes, yielding probabilities and fractiles in three dimensional sets of points

19 p3382 A70-37835

Kalman filter set for state vector and observation error variance estimation in discrete-time linear system, using empirical Bayes techniques

19 p3395 A70-38873

VARIATION METHOD

U CALCULUS OF VARIATIONS

VARIATIONAL PRINCIPLES

Critical conditions for hydrodynamic stability of incompressible nonconducting fluids subjected to unipolar injection, establishing variational principle leading to characteristic relation

01 p0152 A70-10672

Variational methods for investigation of thermal and electrical properties of semiconducting materials, noting accuracy

01 p0159 A70-10759

Finite element method for thin shells using specialized form of Reissner variational principle for stresses and displacements

01 p0208 A70-11184

Equations of state for continuous media, using variational principles within framework of relativity theory

01 p0146 A70-11593

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks

01 p0212 A70-11608

Variational approach to structure of rotating polytrope with symmetry about axis of rotation in post-Newtonian approximation of general relativity

02 p0338 A70-11778

Variational principles in dynamic viscoplasticity theory, based on operator approach combined with time independent variations in elasticity theory

02 p0391 A70-12818

Shallow elliptical planform shell under uniformly distributed normal load calculated with 'ritz and Bubnov-Galerkin variational methods

03 p0593 A70-13496

Variational stress solutions for static case of bounded bodies in Cosserat continuum theory, assuming anisotropic inhomogeneous material and defining boundary value problem solution

03 p0596 A70-13973

Variational principles in linear elasticity theory with couple stresses, solving boundary value problems in Mindlin theory with microstructure and first strain gradient theory

03 p0596 A70-13974

Solutions existence for differential, integral and integrodifferential equations proved by variational imbedding of nonlocal linear Euler-Lagrange operator functioning as automatic adjoint calculator

05 p0681 A70-16060

Variational principle used in microwave breakdown predictions for rectangular aperture antenna

05 p0824 A70-16988

Einstein field equations based on variational principle applied to stability of general self gravitating relativistic gaseous mass obeying specific equation of state

06 p1138 A70-17304

Nonlinear differential equations variational formulation, giving practical applications

06 p1093 A70-17635

Finite elements of time dependent phenomena using Hamilton variational principle for time integration

06 p1165 A70-17645

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc

06 p1093 A70-17650

Micropolar homogeneous and anisotropic elastic solids linear dynamic theory, deriving reciprocity and variational theorems

06 p1172 A70-18512

Natural oscillations of three dimensional bundle of parallel strapped rods with variable elastic mass parameters determined by Hamilton-Ostrogradskii variational principle

08 p1583 A70-20485

Variational problem of determining optimal heat transfer from gas flow to porous plate boundary layer

08 p1597 A70-21176

Electromagnetic fields interaction with nonconducting neutral elastic solid, formulating relativistic variational principle for balance laws and constitutive equations

08 p1545 A70-21252

Thermoelastic energy functions bounding by variational principles for anisotropic composite materials properties

08 p1592 A70-21510

Electrical and magnetic polarizability coefficients in theory of diffraction at small apertures by formulating bilateral variational principles

09 p1631 A70-22150

Variational theorem for compatibility and plasticity for Mises solids based on stress functions

09 p1771 A70-22397

Variational principle application to stability in failure mechanics of arbitrary linearly elastic bodies, discussing inertia effect on steady state vibrations of cracked bodies

09 p1771 A70-22465

Rarefied gas flow past arbitrary three dimensional body using variational principles based on linearized BGK equation, considering constant and adiabatic wall temperature

09 p1605 A70-23178

Variational principle of steady state transport process derived from basic inequality in macroscopic theory of nonequilibrium thermodynamics

09 p1789 A70-23224

Weighted residual and Biot variational methods for solving one dimensional heat conduction problems

09 p1789 A70-23260

Hamilton modified principle applied to nonlinear control problems including time delay, servosystem with ideal relay and liquid level control

09 p1614 A70-23693

Nonconservative problems motion stability analysis based on restricted admissible displacements, establishing two variational principles

11 p2138 A70-26172

Variational principle in electromagnetics to produce linear algebraic equations with Rayleigh-Ritz procedure for application to dielectrically coated slit antenna

12 p2198 A70-27957

Variational principles derivation for inelastically deformable body mixed boundary value problem, considering loading conditions with basic functions free of discontinuities

13 p2516 A70-29524

Variational principles of linear asymmetric elasticity for dynamic problems with initial and boundary conditions, using Laplace transforms

13 p2517 A70-29724

Thin two dimensional shells static linear elastic deformations analysis using difference based variational method

15 p2815 A70-32001

Canonical variational principle for boundary condition contractions in elastic shell theory

17 p3182 A70-34545

Variational principle for turbulent shear flow between parallel plates, taking into account isothermal flow and Malkus theory

17 p3073 A70-35595

Inverse variational principles of thin plate, dividing into subregions/finite elements/ for optimal thickness distribution, sectional forces and displacement values

18 p3339 A70-36481

Vlasov high temperature plasmas numerical analysis, using Hamilton variational principle

18 p3296 A70-36793

Variational principle application to relativistic MHD, deriving Einstein field equations, Maxwell equations and equations of motion for self gravitating charged fluid

19 p3478 A70-37591

Mixed boundary value problems approximate solution in linear elasticity by variational method, noting applications to micromechanics

19 p3540 A70-37957

Safety factor limit analysis for anisotropic nonhomogeneous solids by variational method, exemplifying by four layer rectangular beam

19 p3547 A70-38355

Book on variational principles in heat transfer covering conduction, convection, dissipation, thermal potential and force boundary layer problem and Lagrangian analysis

20 p3735 A70-39224

Variational principles in linear quasi-static theory of inhomogeneous and isotropic viscoelastic solids with microstructure

20 p3718 A70-39229

MHD flow in channel of arbitrary cross section, deriving velocity and electric potential distribution by variational principle

20 p3677 A70-39360

Elastic bodies static stability theory variational principles, introducing equilibrium equations and boundary conditions of initial state by Lagrange multipliers

20 p3724 A70-39857

Statistically nonhomogeneous fields by variational principles of elasticity, obtaining bounds of average displacement for hollow sphere under pressure

20 p3732 A70-40112

Complementary variational principles applied to free oscillations of incompressible fluid in container, using linearized hydrodynamic equations

21 p3807 A70-41323

Constant property unsteady laminar flow thermal entrance problems, using variational formulation in Laplace transformed domain

21 p3954 A70-42169

Elastic plate uniform extension with rectangular crack by three dimensional bending theory, using variational principle

22 p4115 A70-42941

NonNewtonian fluids variational problems, discussing generalized solutions existence and uniqueness

23 p4179 A70-43987

Mathematical models derivation for systems of interconnected elastic segments, using variational method and energy summation via difference equations

23 p4266 A70-44019

Variational principle and reciprocity theorem for initial value problems associated with wave equations, discussing solution uniqueness conditions

24 p4380 A70-46037

VARIOMETERS

Gokhberg magnetovariational sounding method for single location analysis of magnetic storms early phases, comparing ground station network observations

07 p1277 A70-20440

Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component

14 p2582 A70-30244

Photoelectric detector sensitivity variation effect on long term instability of servomagnet variometers

14 p2588 A70-31261

Geomagnetic field variations recording by two variometers, correcting for variation components effects by instruments orientation

19 p3420 A70-37335

Quartz magnetic variometer allowing simultaneous recording of magnetic field variations and suspension axis inclination changes

19 p3420 A70-37336

Quartz Z-variometer for autonomous variation stations, describing construction and operation

23 p4194 A70-44089

Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component

24 p4339 A70-46319

VASCULAR SYSTEM

NT AORTA

NT ARTERIES

NT BLOOD VESSELS

NT CAPILLARIES [ANATOMY]

NT VEINS

Vascular anatomy correlation with human heart conduction tissue structures to study coronary artery disease cases exhibiting major conduction disturbances by ECG

01 p0013 A70-10273

Constant-inflow and constant-pressure perfusion effect on vascular responses of dog

02 p0232 A70-11716

Lower limbs circulation of peripheral vascular diseased patients transcutaneously assessed with ultrasonic flow detector, comparing results with arteriograms

07 p1217 A70-18956

Vascular and dystrophic disturbances in rat parenchymatous organs in hyperbaric pure oxygen atmospheres, observing increased tissue eosinophilia

07 p1207 A70-19504

Pulmonary extravascular /PEV/ and intravascular /PBV/ fluid volumes measured at rest and exercise

07 p1211 A70-19595

Human vascular tonus and hemodynamics during prolonged hypokinesia, observing changes in reaction to cold and reduced vascular tonicity

10 p1814 A70-24670

Left ventricle zone as principal reflexogenic zone of heart participating in greater circulation vessel tonus control

13 p2353 A70-29356

Oxygen and carbon dioxide effects on airway smooth muscle following pulmonary vascular occlusion in dogs

13 p2356 A70-29943

Beryllium sulfate effect on rabbits vascular plasma volumes, using albumin method for blood groups

15 p2681 A70-31884

Steady flow of incompressible fluid through converging-diverging tube, considering implications in occlusive vascular disease

15 p2691 A70-31936

Water and blood flow characteristics in converging-diverging plastic tube, considering implications in occlusive vascular disease

15 p2691 A70-31937

Perfusion peristaltic pump for determining smooth muscle reaction in vascular bed, discussing applications to physiological and pharmacological investigations

19 p3372 A70-38958

Acceleration Bcg dependence on left ventricular ejection flow and properties of vascular system

21 p3763 A70-41237

Vascular smooth muscle contraction regulation, discussing contractile protein, energy metabolism, excitation-contraction coupling, spontaneous rhythmicity, response to stimulants, etc

24 p4299 A70-45807

VASOCONSTRICTION

Norepinephrine release associated with vasoconstrictor response during selective activation of arterial and venous sympathetic nerves in dog hindpaw

03 p0416 A70-13012

Oxygen tension change effects on rats smooth vascular muscles electrical and contractile properties

07 p1198 A70-18715

Cholinergic nervous mechanism of autoregulatory dilatation of pial arteries under decreased blood supply to cerebral cortex in rabbits

09 p1622 A70-23583

Cutaneous liquid crystal temperature sensors for thermographic patterns of angina pectoris induced by treadmill exercise

19 p3364 A70-38361

Blood vessels constriction in rear limbs, small intestine and spleen of dog with arterial blood heated above rectal temperature

20 p3574 A70-40173

Blood flow antagonistic changes in various vascular beds following spinal cord central thermal stimulation attributed to sympathetic vasoconstrictor activity

22 p3971 A70-43405

Pulmonary arterial and venous response to cooling, discussing role of sympathetic nervous system alpha receptors in hypothermia induced pulmonary constrictions in dogs

23 p4148 A70-44788

VASOCONSTRICTOR DRUGS

Dibutylryl cyclic adenosine monophosphate stimulation of melatonin and serotonin synthesis from C-14 labeled tryptophan by rat pineals in organ culture

01 p0022 A70-10824

Autonomic drugs induced contractures of cardiac muscle of frogs, relating inotropic action with Ca influx during low membrane potential

15 p2686 A70-32837

Atropine effects on circulatory responses to diminished effective blood volume and vasodepressor syncope, noting heart rate increase

17 p3032 A70-35562

Pressor response to epinephrine in hyperbaric atmospheres measured in cats under change of sympathetic tone

17 p3032 A70-35566

VASODILATION

Dogs coronary vasodilator responses to hypoxia and induced tachycardia before and after lidoflazine and adenosine

02 p0230 A70-11702

Cardiovascular responses to sustained high skin temperature in resting men noting dizziness, impaired vision and extracutaneous vasodilatation

03 p0429 A70-14162

Posthypoxic vasodilation in extremities of anesthetized dogs preserved after carotid and aortic reflexogenic zones exclusion

07 p1204 A70-19139

Posture change effects on vasodilator responses in humans, studying reactive, postexercise and local heat hyperaemia in forearms of subjects lying and standing

07 p1211 A70-19596

Cholinergic nervous mechanism of autoregulatory dilatation of pial arteries under decreased blood supply to cerebral cortex in rabbits

09 p1622 A70-23583

Thermoregulatory vasodilation conditioned reflexes developed by combination of prolonged physical and acoustic stimuli

15 p2679 A70-31606

Hypoxia effects on cerebral blood flow in anesthetized dogs, considering acidosis and vasodilation

20 p3577 A70-40330

Vasodilating carbon dioxide effect on brain circulation in occipital cortical area in cats and rabbits using thermoelectric method

24 p4300 A70-45842

VASOMOTOR NERVOUS SYSTEM

U NERVOUS SYSTEM

VECTOR ANALYSIS

NT COPLANARITY

NT VORTICITY

Nonlocal continuity and correctness of principle for comparing functions with Liapunov vector function,

- demonstrating continuous dependence of principle on certain parameters
01 p0130 A70-10151
- Spherical earth wind field correlation matrix, relating scalar fields to isotropic vector field
01 p0135 A70-10204
- Solution existence of linear unsteady Boltzmann equation for single space variable in Hilbert space defined by scalar product
01 p0143 A70-10673
- Controllability conditions for control system described by equation with vectors x and b being non-dimensional and u and r being r dimensional
04 p0660 A70-14491
- N-local controllability conditions for system having permissible controls assumed to be certain piecewise constant vector functions
07 p1244 A70-18766
- Lawden primer vector theory applied to matched conic spacecraft trajectories optimization
07 p1381 A70-19325
- Matrix method for converting time variable stress vector into strain vector allowing for linear creep and aging
08 p1583 A70-20531
- Book on mathematical theory of electromagnetic waves covering vector analysis, reduced wave equation, linear transformations, boundary value problems and radiation patterns
08 p1533 A70-20759
- Proportional navigation law three dimensional vectorial equation analyzed in kinematic conditions, discussing perturbation effects on linearized trajectory
09 p1720 A70-22420
- Holographic recording of three dimensional rapid events, using Q switched laser pulses with sufficient coherence length for illumination
09 p1676 A70-22786
- Orbit determination from two position vectors and periastris radius, introducing polar equation for conic to obtain solution
09 p1760 A70-22932
- Azimuth determination by Vector method based on satellite observations compared to Popovich method, discussing discrepancy
09 p1670 A70-23329
- Narrow throat problems of linear dynamic programming concerning maximum linear functional determination in set of vector functions, giving algorithm for solution
10 p1855 A70-24393
- Vector-matrix differential equation for second order sensitivity coefficients applied to trajectory optimization, modeling and compensation and guidance and control
11 p2029 A70-26324
- Book on electromagnetic fields and waves covering electrostatic and magnetic fields, relativity, vectors, Maxwell equations and propagation
12 p2273 A70-28150
- Venus obliquity dynamic implications, developing equations for independent parameter set to define spin vector
13 p2489 A70-28907
- Optimal constant output feedback gains for linear multivariable systems, noting control vector as time invariant function of output vector
13 p2382 A70-29064
- Euler potentials for magnetic fields field-line structure representation, discussing cross products of gradients of scalars in plasma physics

VELOCITY DISTRIBUTION

- Boundary layer equations for plane steady incompressible flow, studying given velocity profiles effects on equations solutions 01 p0060 A70-10144
- Shock wave structure in two phase media with temperature and velocity gradients and possible phase transitions 01 p0060 A70-10147
- Velocity distribution and optical depth of line formation in solar atmosphere using blue and red wing filtergram and numerical experiment 01 p0175 A70-10241
- Chromospheric average velocity field near sunspots determined from M alpha line absorption elements wavelength shifts 01 p0176 A70-10247
- Airfoil cascade blade design by iteration method equating normal velocity distribution about contour with imposed tangential velocity 01 p0001 A70-10263
- Radiation effect on enthalpy and velocity distributions of laminar compressible planar free jet 01 p0061 A70-10295
- Velocity field measurements in NGC 5128 galaxy, discussing relative motion between gas and stars and correspondence of emission and absorption lines 01 p0184 A70-10898
- Density and heat transfer effects on compressible turbulent boundary layers used to investigate velocity and temperature profiles, skin friction, Mach number and Reynolds number 01 p0003 A70-10936
- Mass transfer analysis for axisymmetric turbulent flow in circular tube, deriving turbulent velocity profile from two part model, based on von Karman similarity hypothesis 01 p0064 A70-11092
- Rotation periods of Jovian atmospheric currents showing zonal wind velocity variations with latitude 02 p0369 A70-11829
- Particle velocity distributions in low density supersonic jets measured by molecular beam sampling technique and multidisk velocity analyzer 02 p0276 A70-11849
- Velocity and density profiles obtained from mass diffusivity time measurements in axisymmetric turbulent air pipe flow over specific Reynolds number range 02 p0295 A70-11853
- Mixing length relationship in Prandtl theory for turbulent channel and pipe flow, deriving universal velocity distribution law 02 p0277 A70-11911
- Turbulence detection and velocity fluctuations in jets and flames based on equations of motion and impact probes 02 p0398 A70-12037
- Harmonically oscillating semifinite rectangular wing perturbation velocity potential in unsteady transonic flow without heat exchange 02 p0279 A70-12118
- Energy reversal zones in turbulent shear flows with asymmetric mean velocity distribution, implying zones of opposing shear 02 p0279 A70-12228

- Molecular velocity distribution function measured in normal He shock wave in low density wind tunnel by electron beam fluorescence technique 02 p0299 A70-12229
- Warm Maxwellian plasma stabilization of velocity-space instabilities, evaluating densities and temperatures for stabilizing resonant loss-cone modes 02 p0347 A70-12237
- Upper mass limit of quasar in galactic cluster from velocity dispersion of galaxies using generalized form of virial theorem, determining B264 mass 02 p0372 A70-12245
- Turbulent boundary layers behavior prediction by strip integral momentum equation method, considering velocity profiles and shear stresses 02 p0282 A70-12332
- Integral theory for two dimensional incompressible turbulent boundary layer in nonequilibrium flows, describing velocity profile in momentum and energy equations 02 p0283 A70-12335
- Mixing length theory improvement to calculate turbulent boundary layers based on velocity profiles 02 p0284 A70-12342
- Shear stress transport equation derivation from turbulent energy equation based on properties of turbulent velocity fluctuations 02 p0284 A70-12346
- Shear velocity variation with depth in upper mantle for Basin and Range province of western North America, using S waves measurements 02 p0292 A70-12505
- Gravitational theory for disk galaxies, considering radial velocity variations, spiral structure, heat equation verification, etc 02 p0378 A70-12688
- Stagnation point velocity gradients for spherical segment models with bluntness ranging from hemisphere to flatnose cylinder in hypersonic flow 03 p0406 A70-12947
- Gram-Charlier method generalization for curve fitting analytic forms to velocity covariances measured in turbulent wake of circular cylinder 03 p0480 A70-12950
- Wing-fuselage interference influence in aircraft dihedral effect, discussing role of velocity direction on wing 03 p0406 A70-13020
- Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field 03 p0564 A70-13227
- Pulsation energy distribution in free turbulent incompressible jets, noting role of mean velocity distribution 03 p0466 A70-13384
- Critical thermal regimes in Couette flow, investigating temperature and velocity profiles of nonisothermal steady state Newtonian flow between two parallel plates 03 p0466 A70-13388
- One dimensional magnetograph scans studying photospheric velocity oscillations and supergranulation, noting downward flows coincident with chromospheric network 03 p0570 A70-13593
- Disintegration of charged distilled water jets, discussing drops size, velocity distribution and instabilities 03 p0467 A70-13781
- Microstructure of turbulent jet in concurrent flow, analyzing wake parameter and measuring profiles of pulsation velocity components and Reynolds shear stresses 03 p0409 A70-13871
- Turbulent fluctuation rates of temperature and velocity on basis of measurements in boundary layer with wall heat transfer 03 p0470 A70-14237
- Velocity structure associated with motion of interface between turbulent and nonturbulent fluid at turbulent boundary layer edge, considering shear flows 03 p0470 A70-14240
- Aerodynamic velocity field induced by plate in motion correlated with ideal gas flow at specific Reynolds number, discussing wake formation 03 p0410 A70-14270
- Radial velocity profiles measured in plasma jet thrusters with thermal and self magnetic acceleration, discussing disturbances due to discharge current-magnetic field interactions 03 p0553 A70-14374
- Whistler mode instability due to anisotropic charged particle velocity distribution, establishing general onset conditions for variable density cold plasma containing hot electrons 03 p0537 A70-14378
- MHD flow velocity and current density distributions in annular duct with radial magnetic field 04 p0725 A70-14531
- Mean flow velocity distribution calculated from momentum deficit superposed behind single cylinders in finite array of arbitrarily spaced parallel cylinders [ASME PAPER 69-WA/FE-11] 04 p0614 A70-14781

Similarity of velocity profiles and pressure distribution of turbulent jet over inclined wall, indicating limitations of Glauert analysis
[ASME PAPER 69-WA/FLCS-1]

Viscous inlet flow into straight channels, studying velocity profiles at low Reynolds numbers
[ASME PAPER 69-APM-Q]

Linearized velocity profiles for turbulent free shear layers using transverse shift and longitudinal motion equation
[ASME PAPER 69-WA/APM-28]

Setting length for turbulent air flow velocity profile in smooth concentric annuli with square-edged and bellmouth entrances
[ASME PAPER 69-WA/APM-24]

Linear stress distribution insertion into equations of motion for turbulent boundary layer, considering velocity profile in wall region

Static pressure distributions and velocity profiles for Hg flow through circular pipes in transverse magnetic field, studying laminar and turbulent flows

Boundary layer along flat plate at zero incidence with homogeneous suction using momentum and kinetic energy integral equations through boundary layer velocity profile

Solar atmospheric structure near sunspots by spectrophotometry, presenting observational and theoretical sunspot magnetic and velocity field data

One dimensional stress waves propagation in elastoplastic medium, determining stress and velocity fields due to heat sources motion by characteristics method

Transverse and longitudinal correlation coefficients of electron density fluctuations in turbulent jet related through equation specifying velocity fluctuations isotropy

Axial and rotational velocity profiles of plasma jet from Doppler shift of spectral lines
[DFVLR-SONDDR-27]

Classical Couette flow for emitting and conducting gas media, discussing velocity distribution and temperature effects at LTE and non-LTE

Velocity field characteristic for electrons in GaAs in negative differential mobility region by method involving probe measurements

State and velocity distribution measurements for air in counterflow vortex tube to determine axial variation of flow quantities

Steady MHD shear layer velocity profiles using hot film anemometry

Motion generated by spherical body moving along axis of uniformly rotating fluid, measuring particle velocities ahead of and behind body

Unsteady laminar free convection caused by heating semiinfinite flat vertical plate, obtaining velocity and temperature distributions

Motion stability of ideally plastic medium flow in conical matrix, studying surface and velocity distribution for minimum plastic deformation energy

Pulsation velocities distribution wind in meteor region of atmosphere during hourly intervals over eleven month period, noting normal distribution

Compressible fluid flow velocity profile in turbine stage evaluated by streamline correlation and actuator disk method

Wave surface elevation and velocity fluctuations in ocean upper layer under wind waves, discussing correlation coefficients between vertical and horizontal velocity components

Solar atmosphere granular convective velocity field determination methods, using realistic assumptions for typical granulation size and seeing parameter

Magnetic and velocity fields in unipolar sunspot, discussing fluctuations associated with penumbral and umbral fine structures

HF periodic velocity oscillations effect on axisymmetric wake diffusion flames
[AIAA PAPER 70-10]

Molecule spatial and velocity distributions of supersonic molecular beams, measuring scattering cross sections of He and Ar on noncondensable gases

Velocity distributions of incident and reflected Ar beams, determining partial energy accommodation

coefficients for reflection from copper and carbon dioxide deposited surfaces

Shock wave structure in He-Ar mixture velocity and temperature profiles based on kinetic model equations

Slip flow of nitrogen gas through long circular tubes, measuring mass flow, pressure drop and cross sectional velocity profiles

Whistler amplification in magnetosphere for electron interaction with background plasma to produce wave growth, discussing stability of various anisotropic velocity distributions

Model for thunderstorm downdrafts induced by rain evaporation based on one dimensional steady state formulation, deriving vertical velocity profiles

Velocity distribution of atoms evaporating from superfluid He II at low temperatures, noting roton shifting and multiexcitation processes

Plastic lubricants motion in circular pipes, determining drag and cross sectional velocity profile of laminar flows

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution

Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field

Ideal fluid planar potential flow, approximating stream function and velocity potential by matrix method

Laminar flow of compressible gas in axisymmetrical channel in absence of wall insulation using velocity profiles, heat transfer, etc

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests

Unsteady laminar boundary layers calculation for arbitrary velocity distributions at inner boundary in presence of suction/blowing through porous surface

Boundary layers calculation for nonporous surface extended to porous with suction by replacing velocity distribution with longitudinal pressure gradient

Flow velocity distribution near boundaries of model of plates of parallel faces, obtaining Laplace equation solution

Solar wind velocity anisotropy effect on interplanetary magnetic field inhomogeneity

Wall proximity and velocity gradient effects on thermocouple readings in turbulent boundary layer

Turbulent energy and velocity spectra of air flow at atmospheric boundary layer over water analyzed statistically, assuming rippling surface activity

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature

Temperature renormalization for improving velocity distribution function representation in solving nonlinear Vlasov equation, transforming Hermite polynomials

Selective harmonic excitation in one dimensional collisionless plasma conforming to Vlasov equation by counterstreaming electron beams, noting velocity distribution conditions

Stellar velocity distribution function for small mass stars in nonrotating systems

Transverse curvature effects on turbulent boundary layer thickness and velocity profiles on circular cylinders in water and air

Solar wind velocity cycles from fluid MHD viewpoint, applying Kelvin theorem on circulation stability in closed fluid system

Hot-wire anemometry equation suitable for wide regions of velocity and temperature derived by computing thermal losses by supports

Symmetrical laminar distorted velocity profiles between flat parallel plates, analyzing decay using integral method

Unsteady flow in circular tube of constant section with time dependent discharge, determining pressure gradient and velocity distribution

Harmonics generated in hot-wire anemometers responses by wires thermal lag and amplitude of flow velocity fluctuations using computerized simulation

Mixing region and potential cone of two dimensional jet, measuring velocity fluctuations

Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field

Plane jet velocity profiles determination applied to calculating gain of proportional fluid amplifier

Low pressure plasma stability in cylindrical crimped magnetic field, considering convective perturbations and particle velocity distribution

Turbulent MHD channel flow velocity profiles and hydraulic resistance relations for various Reynolds numbers, using two layer model

Average velocities profile measurement in wall region of turbulent fluid flow in smooth duct

Blast waves in low Mach number regime with assumption of power law density profile in rear, obtaining particle velocity and pressure distributions

Stability theory application to laminar boundary layer transition prediction on two dimensional and axisymmetric flows having pressure distributions in incompressible flow

Partially loaded clamped plastic shallow spherical caps collapse loads and stress and velocity distributions

Velocity distribution along cylindrical pipe in adiabatic flow with friction and known inlet parameters

Shear flow of inviscid incompressible fluid past sphere, calculating secondary vorticity and upstream velocity distribution

Pressure and velocity distribution within radial flow gas turbine rotor computed by two dimensional streamline curvature method

Near-free molecular flow through orifice measured for velocity distribution dependence on Knudsen number and angular position using time-of-flight technique

Reflected shock wave structure and velocity at rigid wall, assuming radiative heat transfer as dissipative process

Gas stream velocity field produced by shock wave impinging against wing moving at supersonic speed

Velocity and temperature distribution behind shock waves in hydrogen plasma measured to determine factors responsible for discrepancies in Rankine-Hugoniot conditions

Skin friction near flat plate trailing edge at high Reynolds number by linearizing velocity profile

Series expanding velocity profile in parabolic cylinder functions describing nonlinear evolution of steady laminar incompressible wake from arbitrary initial profile

Statistical chance characteristics of velocity profiles and friction for flow along infinite plane wall with constant suction

Turbulent water flow velocity distribution measurement using laser light intensity fluctuation spectroscopy

Gas dynamics regarding velocity field excited by vibrations propagating over elastic wing surface at finite velocity

Velocity and pressure distribution and flame front shape of confined flame in constant section duct

Ionospheric wind velocity fields calculated from atmospheric dynamo effects taking into account electric field, current density and conductivity tensor

Hydraulic loss and secondary circulation of fluid flow in three dimensional bend commercial conduits, discussing relationship to velocity distribution
10 p1871 A70-25094

Multivelocity electron beam critical fluctuation amplitudes in crossed electric and magnetic field
10 p1925 A70-25107

Laminar flow of compressible gas in axisymmetrical channel in absence of wall insulation using velocity profiles, heat transfer, etc
10 p1871 A70-25213

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests
10 p1871 A70-25214

Velocity distribution around isolated and cascaded airfoils in plane potential flows of incompressible fluid determined by use of nonsingular integrals
11 p1974 A70-25781

Velocity distribution of plane airfoil cascade given by geometry, using method of least squares
11 p1974 A70-25785

Electrons velocity distribution function in homogeneous stationary weakly ionized Lorentz plasma in neon, investigating effect on mobility, collision frequency, diffusion and kinetic energy
11 p2089 A70-25871

Ionospheric plasma drift vertical and meridional velocity components latitudinal distributions in F2 region, considering wind effects in upper atmosphere
11 p2045 A70-25931

Nozzle source design for high intensity thermal energy molecular beam with small dispersion in velocity suitable for scattering experiments
11 p2086 A70-25973

Three dimensional turbulent flow, using direct interaction approximation for growth and propagation of point-to-point velocity field deviations energy spectrum
11 p2036 A70-26013

Velocity profile and volume flow rate for rarefied gas flowing isothermal parallel plates, solving linearized Boltzmann equation by BGK model
11 p2037 A70-26168

Track-while-scan algorithm, considering probabilistic interpretation of linear recursive least squares filter for velocity variations
11 p2029 A70-26319

Incompressible inviscid fluid flow behind impeller blades, determining velocity profiles, flow-off angle and stable operation limits
11 p1977 A70-26349

Laminar boundary layer flow with exponential velocity distribution in outer flow described by differential equations, studying slip velocity at wall
11 p2037 A70-26350

Transformed distribution function of particle velocity of plasma in Debye thermodynamic equilibrium approximation based on statistical mechanics
11 p2091 A70-26459

Steady state two dimensional flow velocity profiles at low Reynolds numbers of homogeneous incompressible viscous liquid in straight channel inlet region
11 p2037 A70-26476

Incompressible boundary layers velocity distributions on cylinders rotating in axial flow, considering centrifugal force effects, momentum thicknesses, local shearing stress, etc
11 p2038 A70-26477

Large scale atmospheric turbulence using wave number frequency Fourier analysis of velocity distributions on latitude circles
11 p2076 A70-26498

Multipoint time correlations of longitudinal velocity fluctuations in grid-generated turbulence
11 p2039 A70-26532

Turbulence theory based on Wiener-Hermite expansion of velocity distribution to predict energy decay rate for Reynolds numbers greater than two
11 p2040 A70-26542

Metastable time-of-flight technique for measuring free molecular flow velocity distribution
12 p2231 A70-27255

General relativistic hydrodynamics near equilibrium, discussing velocity and kinetic energy increase spherically symmetric large masses as function of radius change
12 p2300 A70-27392

Turbulent Prandtl number values for air with injection and suction obtained from velocity and temperature profile data
12 p2210 A70-27699

Limb-SD type ascending prominences direction and velocity correlated to flares and solar radio emission
12 p2303 A70-27707

Spatial relaxation of electron gas colliding with positive ions from plasma velocity distributions, solving time independent Fokker-Planck boundary problem
12 p2280 A70-27791

Velocity distribution and structure of irregular winds near 100 km measured by differencing chemical release wind profiles
12 p2264 A70-28002

Compressible turbulent boundary layers velocity profiles, Coles universal wake function, least squares methods, wake-wall representation, etc
12 p2157 A70-28080

Kinetic theory of gas composed of identical particles with discrete velocity distribution, using Chapman-Enskog method
12 p2213 A70-28211

Turbulent flow of incompressible fluid, obtaining closed system of approximate equations for probability distribution of velocities
12 p2213 A70-28237

Preston tube errors in pipe flow wall shear stress determination due to velocity distribution deviations
13 p2387 A70-28848

Ionospheric electrons velocity distribution function in steady state with oscillating electric field imposed in arbitrary direction with respect to magnetic field
13 p2395 A70-28941

Asynchronous liquid metal MHD generator parameters, assuming constant vertical distribution of working fluid velocity
13 p2349 A70-28968

Earth core flow velocity field to construct kinematic model of hydromagnetic dynamo, discussing magnetic field development
13 p2398 A70-29209

Jeans escape rate error for atmospheric H and He attributed to perturbed velocity distribution function, using realistic atom-atom elastic scattering cross sections
13 p2398 A70-29226

Self gravitating collisionless particles instability related to anisotropic random velocity distribution function in presence of disk-galaxy type spiral wave perturbations
13 p2492 A70-29299

Plane turbulent wall jet from small slot, investigating velocity distribution dependence on slot inclination
13 p2388 A70-29448

Two dimensional turbulent boundary layer with pressure gradient, calculating velocity distribution and local skin friction by Pohlhausen method
13 p2391 A70-29672

Electron and positive ion velocity distributions measurements near earth bow shock by electrostatic analyzer on Vela 4B satellite
13 p2481 A70-30068

Logarithmic and Coles velocity profiles validity for turbulent boundary layers on radial rotating impeller blades
14 p2527 A70-30176

Rarefied gas flow in slip regime through cylindrical tube assuming parabolic velocity profile
14 p2565 A70-30263

Transverse structural function of velocity field of turbulent motion in upper atmosphere, using meteor speed radio observations
14 p2635 A70-30312

Faraday type MHD generators, investigating gas velocity and temperature profiles effect on electrical performance by equivalent circuits simulation
14 p2534 A70-30537

Velocity and pressure distributions of tornado-like two cell vortices within boundary layer, using different assumptions for eddy diffusion coefficient
14 p2604 A70-30547

High winds simultaneous occurrence and duration to 150 meter height, showing coherence tendencies
14 p2607 A70-30583

Light scattering from plasmas with nonMaxwellian electron velocity distribution function
14 p2622 A70-30694

Maximum velocity decay in wall jets calculated for comparison with experimental velocity profile
14 p2566 A70-30777

A-type supergiants microturbulence, determining atmospheric small scale velocity fields
14 p2641 A70-30885

Velocity difference across viscous tail in MHD flow, demonstrating exponential decay
14 p2623 A70-30992

Statistical transport, energy and chemical reaction rate in turbulent flow field with uniform velocity gradient, using Brownian motion theory
14 p2566 A70-31029

Two dimensional jet velocity profile evolution under symmetrical and antisymmetrical perturbations
14 p2567 A70-31200

Low aspect ratio wing aerodynamic characteristics in shear flow, noting forces dependence on flow velocity gradients
14 p2529 A70-31274

Vortex generation in water tank, discussing velocity distribution on free surface and critical depth of air entrainment for various Reynolds numbers
14 p2567 A70-31275

Galactic spiral structure effects on residual stellar velocities local distributions
14 p2652 A70-31380

Laminar velocity distribution from temperature profiles developed under steady flow through tube, constructing numerical temperature grid
15 p2718 A70-31449

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution
15 p2718 A70-31462

Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field
15 p2718 A70-31465

Homogeneous isotropic turbulence velocity field space-time variable correlation functions in fluid flow
15 p2719 A70-31487

Incompressible turbulent boundary layer calculation based on shearing stress hypothesis, considering layer at flat plate, boundary conditions and velocity profiles
15 p2719 A70-31490

Transport properties of partially ionized argon based on electron velocity distribution function, comparing to Chapman-Enskog calculations
15 p2774 A70-31799

Space charge waves in electron beams with velocity distribution, considering dispersion equation and Landau damping
15 p2708 A70-31831

Longitudinal velocity and temperature fluctuation spectra in turbulent boundary layer, showing highest spectral densities at internal zone
15 p2826 A70-32021

Orr-Sommerfeld equation asymptotic solution corresponding to boundary layer velocity distribution
15 p2721 A70-32357

H alpha and Fe I lines, calculating velocity effects on profiles for differentially moving atmosphere
15 p2804 A70-32616

Fragment ion products velocity vector distribution for dissociative collisions of molecular ions with He
16 p2953 A70-33005

Intensity and velocity distributions of thermal energy argon atoms scattered from silver /111/ face, using time of flight methods
16 p2953 A70-33007

Vortex streets characteristics determination for plane jet having uniform initial velocity profile
16 p2890 A70-33108

Subsonic turbulent boundary layer with mass addition and combustion for combustion effects on velocity profiles in constant pressure and accelerating flows
16 p2997 A70-33498

Displayed cursor velocity effect on radar target acquisition time for subjects in simulated air defense environment
16 p2853 A70-33670

Uniform two dimensional turbulent boundary layer with hydrogen-nitrogen mixture injection and combustion at flame front, obtaining velocity distribution by kinetic energy equation
16 p2894 A70-33880

Pressurized gas bearing flow field, discussing velocity transversal component, pressure distribution and profile
16 p2924 A70-34237

Lorentz plasma electron velocity distribution with allowance for elastic and inelastic collisions, using Legendre polynomial and spherical harmonic expansions in Boltzmann equation
16 p2945 A70-34337

Numerical solutions for velocity and concentration profiles to nonsimilar isothermal diffusion laminar boundary layer equations for uniform injection of foreign gas
17 p3069 A70-34824

Solar rotation effects on velocity field in nonspherical solar wind, using axisymmetric wind model
17 p3151 A70-34861

Incompressible laminar boundary layer along rectangular corner, obtaining similar solutions for velocity distribution
17 p3070 A70-35239

Turbulence theory from Liouville equation for Navier-Stokes velocity field distribution
17 p3073 A70-35629

Solar wind velocity profile in rapid acceleration of coronal plasma from type I, III and V bursts
17 p3152 A70-35745

Velocity fluctuations in temperature gradient turbulent jets and in turbulent flames, using hot wire in cooled pitot tube
17 p3096 A70-35749

Aerofoil section characteristics in shear flows of arbitrary velocity profile calculated by Glauert image method
18 p3205 A70-35957

Velocity pulsation spectra in subsonic wakes behind circular disks and sphere, using thermoanemometer with constant filament temperature
18 p3207 A70-36279

Temperature profile along hot-wire anemometer attached to wall and normal to parabolic velocity steady flow field, using singular perturbation techniques
18 p3242 A70-36488

Centrifugal impellers primary and secondary flows velocity distributions, determining vorticity generation
18 p3243 A70-36871

Three dimensional boundary layer flow on rotating axial flow turbine buckets, determining velocity profiles [ASME PAPER 70-GT-59] 18 p3243 A70-36874

Two dimensional cascades of incompressible plane potential flows with given velocity distribution [ASME PAPER 70-GT-87] 18 p3209 A70-36880

Solar wind velocity anisotropy effect on interplanetary magnetic field inhomogeneity 18 p3309 A70-36917

Peculiar velocities nonisotropic distribution in stationary differentially rotating stellar system based on Boltzmann equation solution 18 p3324 A70-37149

Stellar velocity field in M 51 from image tube spectra 18 p3327 A70-37158

Neutral H concentrations far from galactic plane associated with spiral arms 18 p3327 A70-37166

O and B stars velocity dispersion, considering Oort terms and average residual radial velocity 18 p3330 A70-37188

Young star velocity ellipse vertex deviation, discussing formation at right angles to galactic center direction 18 p3331 A70-37199

Velocity profiles in steady and unsteady rotating flows for impulsive slow down and acceleration in cylindrical chamber 19 p3403 A70-37527

Turbulent flow phase velocity fluctuations measurement by hot-wire anemometers, obtaining cross-spectral density by Fourier analysis digital techniques 19 p3404 A70-38019

Velocity distribution and shear stress measurements in three dimensional turbulent boundary layer approaching separation 19 p3405 A70-38021

Velocity profiles of laminar flow through rectangular duct with moving wall and arbitrary cross section under nonslip boundary condition 19 p3405 A70-38043

Velocity distribution in boundary layer on thin rotating turbine blade of impeller driven at wind tunnel outlet, solving turbulent and laminar flows momentum equations 19 p3352 A70-38224

Pressure and velocity distribution inside casing and around impeller of volute pumps, discussing flow at exit and in wedge shape space 19 p3437 A70-38225

Steady two dimensional incompressible shear flow, correlating velocity profiles with resistance distribution 19 p3406 A70-38350

Boundary layer oscillatory flow interaction with nonuniformly rotating lamina, calculating velocity distribution and transitional frequencies 19 p3406 A70-38443

Fully ionized magnetized rotating plasma interaction with neutral gas blanket, discussing plasma decay and velocity field 19 p3481 A70-38489

Weakly ionized gas subjected to pulsed DC electric field, analyzing transient relaxation of electrons velocity distribution 19 p3482 A70-38899

Hydromagnetic flow past infinite impulsive motion plate, determining velocity and temperature fields distribution 19 p3482 A70-38934

Turbine blade profiles calculation by hodographs, obtaining compatibility with continuous flow velocity distribution and improved boundary layer stability 19 p3491 A70-38949

Shear stress and velocity profiles in three dimensional mixing layer between grazing perpendicular streams 20 p3608 A70-39356

Midtropospheric frontogenesis, using three hourly rawinsonde data for isentropic trajectories to describe velocity field in space and time 20 p3664 A70-39374

Cesium beam velocity attenuation by He, Kr and Xe, determining scattering cross sections from gas pressure and density measurements 20 p3675 A70-39618

Flow velocity and pressure profiles due to vortex ring confined in cylindrical channel, using electromagnetic analogy 20 p3609 A70-39651

Probability densities and distributions, moments and spectra from time derivatives of streamwise velocity fluctuation in curved mixing layer, measuring small scale turbulence structure 20 p3609 A70-39652

Energy spectrum function for Gaussian initial velocity field of inviscid turbulence Burger model, using Cameron-Martin-Wiener exact expansion 20 p3609 A70-39653

Solar internal rotation, examining oblateness, velocity and magnetic fields, wind structure and Li and Be abundances 20 p3707 A70-39936

Vortex signature recognition from radial velocity field by Doppler radar 20 p3664 A70-40067

Conical diffuser-tailpipe system performance, discussing cone angle, area ratio, Reynolds number and velocity distribution effects on pressure recovery 20 p3559 A70-40082

Hypersonic sphere turbulent wake velocity measurement by spark technique, determining distribution from least mean squares fits of Gaussian curves 20 p3559 A70-40283

Wall proximity and velocity gradient effects on thermomometer readings in turbulent boundary layer 20 p3634 A70-40341

Ducted laminar and turbulent diffusion flames, examining electric fields effect on heat transfer, geometry and velocity field 20 p3739 A70-40471

Wall jet turbulent flow regions with shear stress and mean velocity gradient of opposite sign, considering theoretical explanation 20 p3615 A70-40501

Point mass impact on flexibly interconnected rigid bodies with tree structure and spherical joints without dry friction, discussing resulting velocity changes 21 p3849 A70-40552

Nonstationary compressible laminar boundary layer similar solutions by parameter-invariant method, obtaining velocity and temperature profiles by partial differential equations numerical integration 21 p3806 A70-40555

Two dimensional turbulent boundary layer computation using two parameter family of velocity profiles and skin friction law 21 p3806 A70-40921

Heat transfer in laminar channel flow with random velocity variations, using Monte Carlo technique 21 p3949 A70-41312

Closing method for turbulence equations of velocity field quantities joint probability distributions 21 p3811 A70-42075

Flow structure in plane submerged turbulent jet, determining velocity, friction stress and correlation coefficients distributions 21 p3749 A70-42221

Liquid metal turbulent jet flow dependence on longitudinal magnetic field, measuring mean velocity profiles at various cross sections 21 p3861 A70-42230

Turbulent flow velocity profile in constant transverse magnetic field, determining resistance coefficient 21 p3861 A70-42235

Flat plate airfoil unsteady lift due to chordwise velocity perturbations, using Horlock frozen gust pattern theory 22 p3957 A70-42303

Viscous flow field in pneumatic vortex rate sensor, discussing boundary layer parameters, velocity profiles and swirling flow theory [ASME PAPER 70-FLCS-16] 22 p4007 A70-42411

Isothermal steady laminar flow through tube with change in wall temperature, examining velocity profile relationship to temperature profile 22 p4008 A70-42421

Jet flow reattachment to walls of various shapes, measuring undeveloped velocity profiles at nozzle exit [ASME PAPER 70-FLCS-2] 22 p4008 A70-42429

Large fluid amplifier-type jets, measuring upstream flow disturbances effects on spreading velocity profiles [ASME PAPER 70-FLCS-A] 22 p3964 A70-42431

Ion and electron ambipolar velocity distribution near plasma sheath boundary in collisional positive column 22 p4080 A70-42542

Spherical cavity nonuniform expansion in compressible elastic plastic solid, calculating velocity field and pressure by approximate similarity solution 22 p4114 A70-42635

Buoyant hot two dimensional laminar vertical jet in quiescent colder fluid, calculating temperature and velocity distributions by integral method 22 p4010 A70-42639

Galactic noncircular velocity fields, discussing statistical correlation with radio luminosity, nuclear brightness and total mass 22 p4100 A70-42844

Globular cluster relaxation time using nonMaxwellian velocity distribution and polytropic spatial distribution 22 p4109 A70-43744

MHD laminar isothermal flow in closed cylindrical tube in rotating magnetic field, determining azimuthal velocity distribution 23 p4224 A70-44162

Mass transfer and velocity gradient fluctuations at wall in two dimensional or rotational flow for large Schmidt numbers 23 p4181 A70-44210

Partially ionized Ar transport properties, computing electron velocity distribution function as perturbation for Lorentzian mixture 23 p4220 A70-44437

Turbulent boundary layer velocity profiles and shear stress distributions computation based on mixing length approach 23 p4182 A70-44574

Two dimensional turbulent wake theory, considering shear stress and velocity distribution behind flat plate and circular cylinder 23 p4134 A70-44575

Spinning cold-flow rocket motor, studying rotation effects on chamber flow velocity field 23 p4233 A70-44579

Algorithm for space trajectories optimization with delta velocity constraints 23 p4245 A70-44683

Gas turbine engines flow velocity fields, comparing various calculation methods 23 p4136 A70-44735

Air circulation around radial flow machine rotor blades calculated without velocity distribution factor 23 p4183 A70-44774

Stellar axial rotational velocity statistical analysis to break-up limit, obtaining velocity distribution approximation from observed histogram 23 p4251 A70-44823

Solar interior differential rotation, developing angular velocity distribution equilibrium model 23 p4252 A70-44834

Atomic levels occupation numbers and ionization degree for optically thin hydrogen plasma with self consistent electron velocity distribution 23 p4227 A70-44932

Viscous conducting liquid forced vortex motion, considering radial velocity distribution and rotation effect on free surface shape 24 p3483 A70-45140

Sunspot penumbra velocity field spatial structure by filament spectrum analysis, plotting radial velocities relative to undisturbed photosphere 24 p4400 A70-45310

Molecular jet velocity distribution, investigating adiabatic focalization conditions 24 p4351 A70-45370

Combustion chamber flow visualization, obtaining information on pressure loss, velocity field, flow pattern and temperature gradients 24 p4393 A70-45444

Flow-through carbon dioxide lasers population inversion relation to individual gas components and electron velocity distribution functions 24 p4352 A70-45458

Velocity profile in viscous sublayer at wall based on maximum stability principle applied to Karman constant for turbulent channel flow 24 p3425 A70-45495

Boundary layer instantaneous velocity distributions theoretical and experimental determination 24 p4288 A70-45583

Quasi-homogeneous approximation validity for electron velocity distribution function disturbance in gas plasma column ionization waves discharge involving high currents 24 p3866 A70-45794

Spherical shape gas or liquid drop steady motion at large Reynolds numbers, examining buoyancy forces and velocity gradients 24 p4326 A70-45996

Plane flow of incompressible elastic perfectly plastic solid, deriving hyperbolic stress and velocity equations 24 p4427 A70-46043

VELOCITY ERRORS

Interplanetary midcourse velocity correction schedules optimization, discussing timing equations modifications, mission simulation and role of earth based radar 09 p1759 A70-22760

VELOCITY FIELDS

U VELOCITY DISTRIBUTION

VELOCITY MEASUREMENT

NT WIND VELOCITY MEASUREMENT

Hot-wire probe support orientation to minimize flat plate turbulent boundary layer mean velocity determination errors 01 p0087 A70-10665

Physiological interpretation of blood velocity curves recorded in right heart cavities of dogs by ultrasonic directional probe, using Doppler effect 01 p0035 A70-10709

Cosmic dust particle direction, velocity and mass from ionization and momentum measurements by dust sensor during impact on Pioneer 8 satellite 01 p0088 A70-10748

F region ion velocity measurements by Thompson scatter probe, deducing neutral winds diurnal and seasonal variations in thermosphere 01 p0078 A70-11214

Radar and photographic studies of meteors from Leonid and Perseid showers, presenting velocities, luminescence and ionization 01 p0193 A70-11602

Jupiter upper atmosphere cloud bands zonal motion velocities, examining barotropic stability criterion and geostrophic balance hypothesis 02 p0368 A70-11828

Molecular velocity distribution function measured in normal He shock wave in low density wind tunnel by electron beam fluorescence technique

02 p0299 A70-12229

Flow direction and velocity measurement in three dimensional boundary layer, discussing instrument and restrictions

02 p0299 A70-12312

Traveling wave velocity in human cochlea determined by equally loud tonal pairs, comparing results to psychophysical and electrophysiological findings

02 p0237 A70-12323

Cylindrical axial plasma flow fields velocity radial dependence measurement by double-wedge spectroscopy using Abel unfolding of Doppler shifts

02 p0349 A70-12657

Plasma velocity, electron temperature and density and ion density determined by two mutually perpendicular probes

03 p0529 A70-12940

Spatial resolution analyses of vorticity meter and hot wire arrays for measuring velocity derivatives in isotropic turbulence

03 p0492 A70-13760

Laser velocimeter measurements on drag reducing polyacrylamide solution compared to water

03 p0502 A70-13821

Flat flames in stationary gas in tubes useful for flame speed measurements without correction procedure

03 p0607 A70-13917

Burning velocity of methane-air flames inhibited by methyl bromide, using schlieren cone-nozzle burner method involving unburnt gas velocity measurement

03 p0607 A70-13918

Radial velocity profiles measured in plasma jet thrusters with thermal and self magnetic acceleration, discussing disturbances due to discharge current-magnetic field interactions

03 p0553 A70-14374

LF sound velocity measurement in carbon dioxide near critical point, noting existence of logarithmic divergence

04 p0718 A70-14685

Circular tube entrance upstream and downstream velocity profiles at small axial distances measured by laser Doppler flowmeter

[ASME PAPER 69-WA/FE-13] 04 p0667 A70-14780

Blood flow velocity and pressure measurements on conscious man with catheter-tip velocity probe

04 p0645 A70-15439

Meteoroids average velocity relative to spacecraft determined using sporadic meteors orbital elements data in interplanetary space

04 p0757 A70-15550

Velocity field characteristic for electrons in GaAs in negative differential mobility region by method involving probe measurements

04 p0732 A70-15690

Acceleration cues removal effects on vehicular velocity perception, using movie technique to control visual cues

05 p0806 A70-16143

Laser beam for measuring particles velocity in two phase air-water jets by heterodyning, describing signal properties

05 p0858 A70-16258

Laser Doppler velocimeter directly measuring detected frequency with passive confocal Fabry-Perot interferometer

05 p0860 A70-16658

Doppler shift of laser beam reflected from shock wave measuring velocity through optical mixing

05 p0852 A70-16993

Repetitive scanner for wave velocity measurements in annular two phase gas or liquid flow using pivoted mirror

06 p1062 A70-17618

Dynamic response of constant resistance anemometers, investigating unsteady probe thermal equilibrium, inductance and feedback equations

06 p1063 A70-17620

Solar atmosphere granular convective velocity field determination methods, using realistic assumptions for typical granulation size and seeing parameter

06 p1142 A70-17990

Light velocity measurement at low cost, describing circuits and experimental results

06 p1067 A70-18399

Doppler shift measurements of axial and rotational velocities in MPD arc, using references from iron arc [AIAA PAPER 69-110]

07 p1364 A70-19324

Flow mean velocity measurement using probe submerged in moving electrolyte and not requiring external power source

07 p1257 A70-19377

Solar wind velocity radioastronomical measurements, discussing radio wave fluctuations, telescope antenna designs, radiometers and observations

08 p1474 A70-21070

Instantaneous velocities measured for wall region of smooth duct during turbulent fluid flow by chronophotography of particles

09 p1658 A70-22046

Small-scale local flow velocity measurements with laser using differential Doppler method

09 p1694 A70-22125

Wave front velocity determination by analytical continuation of wave function Fourier transform into complex plane, discussing constraints imposed by finiteness requirement

09 p1726 A70-22327

Projectile acceleration under gas explosion calculated for velocity

09 p1777 A70-22723

Signal properties and measurement accuracy of noncontacting optical heterodyne velocity sensing method used in differential Doppler velocity measurements

09 p1678 A70-22926

Sphere motion in laminar flow, postulating absolute velocity as resultant of entrainment and fall velocities and stable position in tube with ascending flow

09 p1663 A70-23309

F region vertical electron drift velocity determined from Thomson scatter observations

09 p1671 A70-23665

Charged particles velocity profile across shock determined by induction velocimetry, considering eddy currents effects on induced potential gradient

09 p1738 A70-23677

Near-free molecular flow through orifice measured for velocity distribution dependence on Knudsen number and angular position using time-of-flight technique

10 p1918 A70-23969

Velocity measurements with Pitot tubes in polymer solutions /polyethylene oxide/ in water, noting viscoelastic properties effect on measured pressure value

10 p1887 A70-24093

Laser Doppler velocimeter optics, noting minimal heterodyne alignment needs and stress and vibration stability

10 p1889 A70-24556

F 2 field-aligned ion velocity measurement compared with theoretical results, discussing difference at sunspot minimum and daytime ion velocity-plasma loss relation

10 p1881 A70-24815

Kalman filtering applied to moving balloon position and velocity estimates related to upper atmosphere wind measurements by balloon-satellite experiment

11 p2025 A70-26206

Radial velocity data monitored during Venera 4 descent used for determining vertical and horizontal atmospheric flows velocities

11 p2118 A70-26792

Velocity fluctuations measurements in conducting fluids flowing through tubes

12 p2230 A70-27091

Metastable time-of-flight technique for measuring free molecular flow velocity distribution

12 p2231 A70-27255

Spiraling electron beam energy conversion and distribution using retarding-field velocity analyzer

12 p2196 A70-27651

Current sheet speed in coaxial plasma accelerator computed as function of time, comparing results with velocity measurements

12 p2281 A70-27833

Air velocities measurement with heated thermistors probe, discussing calibration and reliability dependence on flow velocity range

13 p2405 A70-28841

Acceleration influence on radar signal reception during range and velocity measurements

13 p2366 A70-29301

Solar differential rotation measurement by spectral line shift data analysis, noting angular velocity-heliographic latitude relationship

13 p2496 A70-29840

Hot-wire probe measuring He-air mixture velocity and concentration following He discharge from circular orifice, noting calibration method

13 p2412 A70-29990

Rolling reentry body velocity as function of roll, pitch, yaw rates and angle of attack

13 p2343 A70-29991

Three-reception-point radar system for radiant and speed measurement of individual meteors in stream, using forward scattering

14 p2582 A70-30311

Errors estimation in wind velocity values by radio echo observations in meteor trails of different densities

14 p2572 A70-30330

Free floating balloon position and velocity determination by satellite, using Kalman filter linear estimation theory

14 p2530 A70-30571

High resistivity Si electron drift velocity measurement by exciting surface barrier diode with subnanosecond superradiant laser pulses

14 p2594 A70-30924

Frequency locked noise effect on beat frequency measurement of angular velocity with ring laser, comparing gyroscope and phase methods

15 p2749 A70-31551

Laser Doppler heterodyning system for velocity measurements without directional ambiguity, employing incident beams of different frequencies through rotating diffraction grating or Bragg cell application

15 p2751 A70-31986

Gas flow velocity measurement by coherent detection of scattered laser radiation from small particles suspended in fluid, using Doppler effect

15 p2751 A70-32030

Laser velocimeter application to laminar-turbulent flow transition at glass tube centerline

15 p2741 A70-32521

Displacement and velocity measurements using strain gauges, linear potentiometers and seismic transducers

15 p2743 A70-32799

Laser velocity measuring system (LVMS) for high speed rocket sleds, tracking supersonic sleds through shock front

16 p2926 A70-33142

Laser Doppler-shift velocimeter with self aligning optics, discussing performance parameters

16 p2926 A70-33143

Velocity vector for boost vehicles guidance, comparing implicit and explicit computation

16 p2947 A70-33441

Airborne pulse Doppler radar for tactical aircraft velocity vector measurement, improving navigation system performance

16 p2840 A70-33448

Gaseous flows and local droplet velocity measurement in dense gas/liquid sprayfields, using noninterference technique

16 p2910 A70-33491

Observational errors effects on surface waves resolution, describing shear velocity determination in crust and mantle from observed waves

16 p2897 A70-33647

Range and velocity components for ray paths between tracking and data relay satellite and user communication satellite

16 p2866 A70-34073

Gas flow velocity measurement using hot foil probes

17 p3082 A70-34680

Hypersonic velocity and turbulence measurements in wind tunnels, using spectral analysis of Doppler shifted laser light

17 p3103 A70-34849

Holographic motion measurement verification of constant velocity, sinusoidal vibration and both, using interferometer

17 p3087 A70-35022

Turbulent boundary layer velocity, temperature and concentration instantaneous measurements, describing automatic circuit procedure

17 p3088 A70-35041

Light velocity from frequency and wavelength differences between gas laser lines, using precision long path interferometry

17 p3104 A70-35085

Low temperature plasma flow velocity measurements using transit-time technique and high speed filming

17 p3141 A70-35345

High velocity neutral hydrogen cloud observations, presenting tabulated characteristics and maps

17 p3170 A70-35439

Turbulent velocity pulsations characteristics determination by diffusion measurements

18 p3240 A70-36265

Error reduction methods for linear acceleration gyrointegrators measuring linear velocities

19 p3420 A70-37257

Ionospheric drift velocity fluctuations by similar fading method, discussing applicability and errors

19 p3408 A70-37312

Meteor velocity determination by CW radar for constant phase angle, describing reflected signal processing

19 p3514 A70-37655

Manned lunar roving vehicle (MLRV) navigation scheme based on dead reckoning concept, discussing instruments effectiveness for vehicle velocity and orientation measurements

19 p3396 A70-37849

Holographic velocity data recording /velocimetry/, discussing axial resolution enhancement by spherical wave illumination

19 p3423 A70-37859

Dual scatter laser Doppler velocimeter /LDV/ technique, considering system design, performance and experimental verifications

19 p3424 A70-37876

Turbulent flow phase velocity fluctuations measurement by hot-wire anemometers, obtaining cross-spectral density by Fourier analysis digital techniques

19 p3404 A70-38019

Aperture size effect on frequency shift and frequency width variation of beat signals observed with laser Doppler velocity meter

19 p3428 A70-38502

Gas flow velocity measurement by thermal signal emitted from thin wire fed with modulated known frequency current

19 p3406 A70-38673

Noctiluent cloud kinematics, examining wave structure and lengths, velocities and general motion 20 p3622 A70-39403

Ultrasonic sensor for detecting altitude and vertical velocity of aircraft near ground, applying to helicopter hovering flight or conventional airplane takeoff and landing [AIAA PAPER 70-1031] 20 p3631 A70-39506

Onboard velocity sensors for VOR/DME navigation systems positional accuracy improvement, describing optimal and suboptimal data filtering [AIAA PAPER 70-1024] 20 p3666 A70-39511

Second order approximations to velocity required concept for boundary value problems in guidance, deriving Riccati equation and position required concept [AIAA PAPER 70-1015] 20 p3666 A70-39518

Ballistic photography system for luminous models in gas medium, using collimator for velocity measurement 20 p3632 A70-39746

Velocity measurement by Doppler effect in two-point direction finding, calculating error dependence on angular coordinates and distance 20 p3587 A70-39792

Quasi-steady MPD arc thruster average thrust measurements, considering time-of-flight velocity determination by ion collecting probes [AIAA PAPER 70-1080] 20 p3694 A70-40255

Coaxial three coil probe measuring local electrical conductivity and velocity in plasma streams, discussing operations in electrolytes and axisymmetric plasma stream 20 p3684 A70-40259

Hydrogen-oxygen and hydrogen-nitrous oxide systems combustion, measuring isotopic substitution effect on flame speed by schlieren technique with rotating drum camera 20 p3583 A70-40472

Fraunhofer holography for small spherical particles three dimensional position and velocity measurements 21 p3822 A70-40811

Satellite-borne sensor for ionospheric ions velocity measurement, describing design and principles of operation 21 p3813 A70-40834

Ionospheric ions drift velocity horizontal and vertical components distribution, using satellite-borne sensor 21 p3813 A70-40835

Shock wave and surface velocity measurements in exploding foil testing by streak photography with image converter camera 21 p3824 A70-40863

Pulse superposition measurements of small ultrasonic waves velocity changes using automatic recording phase sensitive detection 21 p3827 A70-41468

Apollo 11 lunar sample elastic wave velocities at high pressures, examining P and S waves, Q value and geophysical implications 21 p3916 A70-41666

Collisionless nitrogen plasma drift velocity measurement by ion acoustic wave method 21 p3859 A70-41760

Thermoanemometric velocity measurements in non-stationary MHD Hg flows by insulated Pt sensors 21 p3831 A70-42229

Multipurpose transistorized tachometer for rotating body speed measurement, control and recording, using electronic integrator and magnet pickup 21 p3831 A70-42245

Target velocity estimation by lidar, examining range measurements with time response and cross correlation technique 22 p3988 A70-42567

Airborne computerized time frequency systems for aircraft range and velocity determination, using stable clocks with ambiguity resolution 22 p4067 A70-42659

Projectile velocity measurement, using laser and Fabry-Perot interferometer for Doppler shift determination [SMPT PREPRINT 29] 22 p4034 A70-43046

Gas velocity measurement by high speed schlieren observation of laser induced breakdown phenomena [SMPT PREPRINT 27] 22 p4034 A70-43048

Flowing medium turbulent velocity measurement using laser Doppler device 22 p4040 A70-43615

Hypersonic projectile turbulent wake measurements, discussing velocity, mass density and temperature determination [ICAS PAPER 70-07] 23 p4132 A70-44130

Type 2 solar radio burst shock wave exciter velocity from dynamic spectrograms, relating correction to shock strength gradient 24 p4401 A70-45322

Electro-optical light speed measurements with interference comparator using He-Ne lasers with light modulators 24 p4353 A70-45562

Intact human forearms venous blood velocity measurements, using nuclear magnetic resonance techniques 24 p4309 A70-45675

Flow visualization measuring liquid flow velocity, using flow dichroism 24 p4338 A70-45816

High pressure hydraulic fluidic vortex rate sensor feasibility, considering variable geometry sensor design, fabrication and tests [SAE PAPER 700788] 24 p4294 A70-45857

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Round pulsed jet diffusion rate from velocity measurements, considering Strouhal number and pulse amplitude 24 p4327 A70-46205

Pulsation and turbulence damping in pulsed jet from energy spectra of longitudinal velocity fluctuations 24 p4327 A70-46267

Galactic neutral hydrogen velocity distributions from 21 cm line profiles analysis 24 p4414 A70-46382

VENERA SATELLITES

NT VENERA 4 SATELLITE

Venus atmosphere optical properties on basis of Venera 4 data, proposing models for measured rotational temperature and subcloud atmosphere radiative equilibrium 01 p0192 A70-11507

Soviet Venus probes Venera 1, 2, 3, 4 and 5 emphasizing aims, implementation means and information yields influence on theory of solar system planets origin and evolution 04 p0757 A70-15672

Soviet space activities /1969/, discussing Soyuz orbital flights, Venera probes, Zond lunar orbiters and Proton 4 space laboratory scientific results 05 p0917 A70-16862

Soviet lunar and interplanetary space missions during 1969 including Venera, Cosmos, Luna and Meteor satellite activities 13 p2505 A70-28901

Monograph on upper atmosphere and outer space studies in U.S.S.R. /1969/ covering Soutz 4, 5, 6, 7, 8 and Venera 5, 6 flights 15 p2829 A70-31702

Interplanetary plasma disturbances in Venus proximity from Venera measurements 18 p3312 A70-36172

Soviet monograph on Venus atmosphere and Mars research covering Venera, Mariner and ground observations 18 p3332 A70-37230

VENERA 4 SATELLITE

Light refraction in Venusian atmosphere from Venera 4 probe measured data, noting horizontal rays traversing planet along circumference at 8.3 km height 06 p1142 A70-17889

Radial velocity data monitored during Venera 4 descent used for determining vertical and horizontal atmospheric flows velocities 11 p2118 A70-26792

VENTILATION

Airway resistance effect on ventilation and gas exchange during exercise, discussing minute volume and work of breathing response 03 p0429 A70-14157

Slope and shape of blood-gas dissociation curve as factor influencing pulmonary gas exchange in presence of ventilation-perfusion inequality 06 p0994 A70-17522

Temperature distribution in active elements of explosion proof asynchronous electric motors with multichannel bilateral axial flow ventilation systems 07 p1196 A70-19841

Altitude influence on forced ventilation of cooled electronic apparatus, analyzing flow change and temperature roles 09 p1643 A70-22040

Electronic radio equipment with encapsulated structure and natural ventilation, calculating heated zone and casing mean surface temperatures 09 p1648 A70-23147

Human pulmonary ventilation during exercise in high altitude and sea level acclimated subjects 10 p1819 A70-24774

Minimum ventilation volume requirement for space suit relation to air contaminants and body gas discharge intensities and locations 13 p2358 A70-29333

Pursed lips breathing effects on ventilation and blood gas exchange in patients with chronic airway obstruction 15 p2684 A70-32538

Ventilatory response to carbon dioxide in goats during acute and chronic hypoxia 15 p2684 A70-32539

Transthoracic mutual impedance responses to lung ventilation, discussing spatial and temporal intravariability 17 p3035 A70-34576

Athletes ventilation and heart rate dynamic responses to supine leg exercise with sinusoidal work load 20 p3576 A70-40329

Oxygen uptake at alveolar capillary membrane, investigating ventilation variability at exercise onset 20 p3577 A70-40331

Human tolerance and ventilatory response to inspiratory mechanical loads 23 p4144 A70-43822

Human ventilatory response to resistance unloading during muscular exercise 23 p4144 A70-43823

Human lung volume-to-ventilation ratios regional dispersion, using expired nitrogen concentrations analog simulation 24 p4303 A70-46113

VENTII ATORS

Nonsteady flow past duct junctures, investigating ventilation system of underground bomb shelter for blast wave passage prevention 11 p2036 A70-26139

Cinedensigraphic analysis of diaphragmatic ventilatory movements, obtaining correlation between lung volume and diaphragm and rib cage movement 14 p2537 A70-30383

VENTING

Impinging pressure analysis associated with two phase cryogenic propellant venting to space environment [AIAA PAPER 69-571] 01 p0196 A70-10845

Pressure decay prediction improvement for venting and quenching processes of solid propellants using analytical method 11 p2101 A70-25683

Aircraft multicell structures venting problem and pressure calculation 11 p2134 A70-25863

VENTRAL SECTIONS

Posterior ventral thalamic nucleus neuron reactions converging lemniscus and spinothalamic signals in cats 18 p3221 A70-36639

Myocardial Na and K content of rats exposed to high altitude, preparing isolated right ventricular strip 20 p3577 A70-40541

VENTURI TUBES

Multiple array critical flow venturi air flow metering system constructed for gas turbine engines, developing pressure control valve [ASME PAPER 69-WA/FM-5] 04 p0688 A70-14838

Venturi tube optimal design and operation parameters for small liquid quantities dosage 11 p2035 A70-25778

Throttling venturi valves for thrust modulation of liquid propellant rocket engines, testing pressure recovery, mixture ratio control and gas saturation and boundary layer effects [AIAA PAPER 70-703] 17 p3146 A70-34510

VENUS [PLANET]

Atlas of near IR spectra of Venus, Mars, Jupiter and Saturn obtained by Fourier spectroscopy, discussing observational procedures, data recording and processing 01 p0173 A70-10078

Internal structure models of Mercury, Mars and Venus based on radar measurements of radius and mass, discussing two and three zone models [JPL-TR-32-1439] 01 p0176 A70-10315

Planetary information obtained from radar installations, discussing distance and orbit measurements, rotation periods, planetary surfaces, emphasizing Mercury and Venus 01 p0185 A70-11046

High temperature effects on evolution of Venus upper lithosphere, considering magnetic differentiation, isostatic adjustments, surface relief, mountain building time and distance scales, etc 02 p0371 A70-12207

Communications of lunar and planetary laboratory, Volume 6, covering Venus atmosphere and photography, Jupiter IR spectrum and Mars multicolor photometry 02 p0377 A70-12553

Venusian atmosphere water content determined by airborne interferometer 02 p0377 A70-12554

Venus photographs taken by 82-inch telescope /1950-1956/, tabulating data 02 p0378 A70-12556

Multicolor Venus photography, discussing anomalous markings association with anomalous UV polarization 02 p0378 A70-12557

Venusian cloud layer radius, discussing error in determination of occultation level height of regulus by venus 03 p0574 A70-13881

Magnetograms by Venera 4 and Mariner 5 compared to determine interplanetary magnetic field nature in Venus proximity 04 p0744 A70-14438

- Data transmission from automatic space stations on Mars and Venus, considering relaying via artificial planet satellite or direct transmission to ground station 04 p0648 A70-14931
- Soviet Venus probes Venera 1, 2, 3, 4 and 5 emphasizing aims, implementation means and information yields influence on theory of solar system planets origin and evolution 04 p0757 A70-15672
- Radio brightness distribution observation over Venus disk, investigating absorption of millimeter radio emission of hot surface by planetary atmosphere 06 p1141 A70-17801
- Short duration manned Mars and Venus exploration mission planning with chemical propulsion and Saturn 5 boosters [ALAA PAPER 70-59] 06 p1147 A70-18238
- Solar wind flow different interactions with earth, Venus and moon 06 p1136 A70-18284
- Venus surface temperature calculations with non-gray radiation balance model and Mariner 5 and Venera 4 vertical temperature profile data 08 p1579 A70-21568
- Venus rotation period determination by radar observation of surface features 09 p1759 A70-22911
- Mars and Venus radio temperature measurements by 210 ft telescope, obtaining effective brightness 12 p2309 A70-27896
- Planet Venus motion, mass, dimensions, shape, topography and atmosphere 12 p2311 A70-28301
- Venus photographs analysis during synoptic periods, noting inconclusive results on cloud layer and planetary surface structures 12 p2311 A70-28311
- Magnetograms by Venera 4 and Mariner 5 compared to determine interplanetary magnetic field nature in Venus proximity 13 p2485 A70-28463
- Radio brightness distribution observation over Venus disk, investigating absorption of millimeter radio emission of hot surface by planetary atmosphere 13 p2487 A70-28651
- Venus obliquity dynamic implications, developing equations for independent parameter set to define spin vector 13 p2489 A70-28907
- Venus water presence from Venera 4 and Mariner 5 data suggesting polar seas and oceans saturated with hydrochloride and carbon dioxide as plant life source 14 p2637 A70-30365
- Venus and Mercury radio and radar studies concerning brightness temperature, surface reflectivity and planetary motion 14 p2647 A70-31074
- Venus spin-orbit resonance resulting in consistent inferior conjunction with earth, suggesting solar atmosphere tidal influence 14 p2650 A70-31216
- Venus radar backscattering properties indicating Muhleman theory applicability, noting radar echoes irregularity 15 p2806 A70-32802
- Venus retrograde axial period contradiction between radar echoes and violet-UV photographic and interferometric spectroscopic methods explained by theory using strong magnetic dipole 16 p2973 A70-33116
- Interplanetary plasma disturbances in Venus proximity from Venera measurements 18 p3312 A70-36172
- Mission planning for 1973 Mariner Venus/Mercury flyby, discussing trajectory and navigation aspects [ALAA PAPER 70-1049] 19 p3528 A70-38864
- Venus radius radar determination based on Mariner 5 and Venera 5 and 6 21 p3883 A70-40714
- Hydromagnetic theory of solar wind flow past earth extended to nonmagnetic planets Venus and Mars 22 p4095 A70-43106
- Venus carbon dioxide band, deriving rotational temperatures at various phase angles 23 p4241 A70-44257
- Solar probe trajectory optimization, using Venus gravitational field for braking 23 p4243 A70-44506
- Venus vegetative life suggested from algae growth under pure carbon dioxide in hot acid media at high pressures 23 p4253 A70-44836
- VENUS ATMOSPHERE**
- Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability [ALAA PAPER 69-1068] 01 p0195 A70-10633
- Venus upper atmosphere average rotational temperature determined from high dispersion spectroscopic observations of 7883 A carbon dioxide band 01 p0184 A70-10912
- Venus atmosphere ionization distribution, temperature and pressure profiles determined from amplitudes

and differential Doppler of radio signals to Mariner 5 during occultation 01 p0186 A70-11084

Venusian atmospheric model based on Venera 4 measurements, calculating probe distance travel, temperature, density and pressure profiles 01 p0192 A70-11504

Venusian atmospheric pressure and temperature measurements by Venera 4 probe, noting agreement with Mariner 5 observations 01 p0192 A70-11505

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe 01 p0192 A70-11506

Venus atmosphere optical properties on basis of Venera 4 data, proposing models for measured rotational temperature and subcloud atmosphere radiative equilibrium 01 p0192 A70-11507

Venus and Jupiter Aerobee rocket photoelectric UV spectra, determining geometric albedos using reflecting layer and cloud models 02 p0367 A70-11812

Venus atmosphere simulation at condensation level in uniform temperature mixing cloud chamber, studying artificial and natural ice nuclei nucleation 02 p0373 A70-12293

Polymers development for ablative heat shields, aeroshell structures, antennas, insulators, electronic packaging, etc, to meet Mars and Venus atmospheric entry requirements 02 p0382 A70-12525

Venusian atmosphere low reflectivity reinterpretation based on spectrophotometric data indicating constituents of yellow and upper UV haze layers 02 p0377 A70-12555

Venus photography in UV by 61-inch telescope, discussing low contrast clouds recognition technique 02 p0378 A70-12558

Thermal model for Venus ionosphere, considering photoionization and solar wind influx for possible heat sources 03 p0575 A70-13981

He 4 and Ar 40 abundance in lower Venus atmosphere, underlining He 4 dominance in upper atmosphere 03 p0575 A70-13982

Mars and Venus ionospheres from Mariner profiles, discussing radiative equilibrium thermal calculations and F1 layer hypothesis 04 p0753 A70-15069

Radiative-convective equilibrium model to investigate photodissociation of water in Venus atmosphere, considering greenhouse effect 04 p0757 A70-15516

Venus-earth carbon dioxide atomic parameters used to determine ionization and optical emission rates in Venus upper atmosphere resulting from solar cosmic rays 05 p0901 A70-16276

High resolution Venus spectra, obtaining band spectra growth curve of C13O16O18 isotope of carbon dioxide, comparing data reduction methods 05 p0910 A70-16392

Earth, Venus and Mars atmospheric structure, discussing gases escape, temperature, density, IR radiation and solar radiation absorption 05 p0914 A70-16628

Light refraction in Venusian atmosphere from Venera 4 probe measured data, noting horizontal rays traversing planet along circumference at 8.3 km height 06 p1142 A70-17889

Collection of papers on Venus atmosphere covering Venera 4 and Mariner 5 flights, lower atmosphere and surface, upper atmosphere and ionosphere and interplanetary medium 07 p1381 A70-19375

Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres 07 p1386 A70-19488

Radio wave absorption in Venusian ionosphere, estimating effective collision number 07 p1235 A70-19491

Radio wave refraction and field strength in model Venus atmosphere for various spacecraft trajectories 07 p1235 A70-19492

Turbulent thermal flux in Venus atmosphere estimated from amplitude fluctuation dispersion of Venera 4 and Mariner 5 radio signals 07 p1390 A70-20305

Soviet Venus probes 5 and 6 observation data concerning Venus atmospheric composition, temperature and pressure, etc 08 p1568 A70-20624

Venus clouds absorption spectra correlation with carbon suboxide frost reflection spectra, suggesting absence of carbon suboxide in atmosphere 08 p1571 A70-20911

Solar wind and Venus topside ionosphere interaction, discussing charged particle density, temperature and pressure distribution 08 p1578 A70-21550

IR absorption properties of CO, HCl and sulfur dioxide measured for role in Venus greenhouse effect 08 p1579 A70-21567

Venus ionosphere, discussing day and night electron density profiles, carbon dioxide presence, plasma interaction model, etc 09 p1750 A70-22058

Drop sondes dynamic and aerodynamic design for lower Venus atmosphere based on solution for free fall of body in atmosphere with constant temperature gradient 09 p1766 A70-22935

Wind and atmospheric temperature variations on Mars, Venus and Mercury interpreted from observational data in terms of earth atmospheric processes 09 p1762 A70-23127

Microwave signal fading in Venus atmosphere due to turbulence, discussing atmospheric dielectric permittivity variance 09 p1764 A70-23484

Venusian ionosphere thermal protons and/or deuterons source observed by radio occultation method, suggesting dominance at high altitudes 10 p1938 A70-24068

Similarity and dimensionality theory applied to large scale motions in atmospheric circulation of Mars and Venus 10 p1939 A70-24269

Venus planetary surface and atmosphere, reviewing American and Soviet probe results 10 p1943 A70-24761

Real gas adiabatic lapse rate applied to Venus atmosphere assumed to consist of pure carbon dioxide 11 p2107 A70-25646

Venus clouds self consistent radiative-convective model with sun as heat source 11 p2107 A70-25647

Criticism and reply to Venus cloud water drop HCl concentration preventing ice cloud formation 11 p2108 A70-25653

Light storage by Venus machine using refractive properties of gas and involving fluid mechanical optics 11 p2114 A70-26575

Radial velocity data monitored during Venera 4 descent used for determining vertical and horizontal atmospheric flows velocities 11 p2118 A70-26792

Spectral absorption characteristics for C atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere 12 p2275 A70-27317

Planet Venus motion, mass, dimensions, shape, topography and atmosphere 12 p2311 A70-28301

Energy distribution in dark and light details on Venus spectrograms, considering relation to clouds in upper atmosphere 12 p2311 A70-28304

Venus atmosphere physicochemical characteristics and composition from automatic onboard Venera measurements 13 p2495 A70-29759

Artificial satellite around Venus, investigating orbital lifetime based on atmospheric drag effect on periaapsis height 14 p2637 A70-30563

Simulated Venusian atmosphere effects on polymeric plastic and rubber materials, comparing with high temperature air and nitrogen exposures 14 p2640 A70-30781

Venus carbon dioxide absorption bands determining atmospheric scattering model suitability for all data 14 p2642 A70-30889

Spacecraft measurements revealing hot dense Venusian and cold thin Martian carbon dioxide atmospheres 14 p2646 A70-31066

Venus atmosphere data from Venera 4, 5 and 6 and Mariner 5 missions covering chemical composition, density, pressure, temperature gradients, etc 14 p2646 A70-31067

Venus surface temperature poleward variation from radio interferometry measurements 14 p2646 A70-31068

Venus atmosphere opacity law determination as function of wavelength, comparing interferometric and integrated brightness temperatures with model calculations for various atmospheric compositions 14 p2646 A70-31069

Venus atmosphere-lithosphere interactions, predicting electrically conducting cloud masses presence 14 p2646 A70-31070

Retrograde rotation of equatorial spots of Venus cloudy exterior layer, using UV photographic and spectroscopic observations 14 p2649 A70-31215

Geochemistry of venus volatile elements identifying cloud forming species as Hg compounds 14 p2650 A70-31217

Average rotational temperature of Venus atmosphere above cloud tops from carbon dioxide band spectroscopy 14 p2650 A70-31219

- Supersonic nonequilibrium gas mixture flow past segmental bodies nose areas to simulate Venusian atmosphere, determining temperature, pressure and concentration distributions 15 p2796 A70-31483
- Venus lower atmosphere models, discussing pressure, temperature and water vapor abundance based on radio and radar astronomy and spacecraft measurements 15 p2798 A70-31684
- Terrestrial planetary ionospheres, discussing charged particle density distribution of Mars daytime ionosphere and Venus day and dark sides 15 p2799 A70-31748
- Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres 15 p2805 A70-32733
- Radio wave absorption in Venusian ionosphere, estimating effective collision number 15 p2705 A70-32736
- Radio wave refraction and field strength in model Venus atmosphere for various spacecraft trajectories 15 p2705 A70-32737
- Venus atmosphere and surface conditions, describing temperature, accumulation of carbon dioxide and runaway greenhouse effect 15 p2806 A70-32771
- Edson layer theory explaining phase anomaly of inner planets in terms of light scattering by thin layer above Venus cloud cover 16 p2973 A70-33113
- Venus surface atmospheric conditions from radar and radio observations, including cross sections, microwave brightness spectrum and angular scattering law 16 p2974 A70-33645
- Spectral line formation in Mars and Venus atmospheres, discussing Lorentz and Doppler broadening 16 p2976 A70-33793
- Venus upper atmosphere carbon atoms detection based on low resolution spectra analysis of solar illuminated atmosphere 16 p2979 A70-34036
- Venus deep mantle water degassing rate from atmospheric hydrogen escape data 17 p3154 A70-34610
- Buoyant Venus station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels 17 p3063 A70-35658
- Venus daytime upper ionosphere observations by mariner 5 in terms of ionization sources and sinks, ambipolar diffusion and model atmospheres 18 p3311 A70-36002
- Venus exploration by space probes, discussing orbital and physical data, planetary rotation, atmosphere, surface conditions and magnetic field 18 p3319 A70-37047
- Venus atmosphere water content, discussing chemical reactions, temperature, dehydrogenation, etc 18 p3320 A70-37075
- Venus lower atmosphere structure and brightness temperature spectrum analysis for composition, temperature and pressure profiles 18 p3323 A70-37139
- Soviet monograph on Venus atmosphere and Mars research covering Venera, Mariner and ground observations 18 p3332 A70-37230
- Venus cloud displacement, measuring formations longitudes and latitudes for evidence of cytherean upper atmosphere rapid bulk motion 19 p3518 A70-38027
- Periodic thermal forcing role in Venus atmosphere dynamics, investigating momentum transport to support mean shear for channel flow 19 p3519 A70-38251
- Venus atmospheric visible clouds circulation, determining zonal flow induced by moving heat sources 19 p3519 A70-38252
- Terrestrial atmospheric tidal theory applicability to Venus and Mars, considering dependence on parameters variation among planets 19 p3519 A70-38253
- Venus atmospheric temperature, pressure and density measurements by Venera 5 and 6 space probes, developing model 19 p3520 A70-38255
- Venus atmosphere heat transfer processes from Venera 4, 5 and 6 probes data, evaluating radiative and convective motions model 19 p3520 A70-38256
- Venus atmosphere physicochemical characteristics and composition from automatic onboard Venera measurements 19 p3520 A70-38391
- Buoyant Venus station using superpressure balloon, discussing requirements for structural design and station position tracking capability 20 p3715 A70-39677
- Venus atmosphere and water vapor, finding ice clouds by spectrum analysis 20 p3708 A70-39961
- Venusian atmosphere carbon dioxide, water, molecular oxygen and nitrogen contents from Venera 5 and 6 data 21 p3883 A70-40837
- Aeolian regime of Venus surface resulting from high surface temperature and pressure, discussing spurious radar echoes, dust and sand transport and deposition 21 p3885 A70-40929
- Pressure dependence and efficiency of carbon trioxide formation in Mars and Venus atmospheres 21 p3887 A70-41107
- Spectral absorption characteristics for c atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere 21 p3854 A70-42058
- Venus spectrum from high resolution Michelson interferometers with Fourier transform and digital computation, discussing Venus atmospheric models 22 p4099 A70-42721
- Venusian and Martian upper atmosphere chemistry, emphasizing ionization height distribution 22 p4106 A70-43312
- Venus atmospheric parameters from microwave spectrum, discussing brightness temperature, carbon dioxide content, opacity, water vapor, dust and models 23 p4241 A70-44256
- Venus polywater hydrosphere, discussing vapor phase, surface temperature, evolution, observations and model data 23 p4242 A70-44260
- Venus atmosphere flight vehicle configuration, discussing payload capacity, range, velocity, flight altitude and aerostatic aerodynamic, ground effect and underwater capabilities 23 p4260 A70-44627
- Linear polarization of sunlight scattered by Venus atmosphere, giving data for integrated disk and equatorial region 23 p4246 A70-44756
- Venus atmospheric speculations compared to Soviet and American probe findings, discussing composition, evolution cloud layer and ionosphere 23 p4253 A70-44863
- Venus atmosphere exploration by multiple entry probe, describing spacecraft system design, launch and earth-Venus transfer trajectory, approach and entry sequence, etc [AIAA PAPER 70-1245] 24 p4417 A70-45963
- VENUS PROBES**
- NT MARINER 2 SPACE PROBE
- NT MARINER 5 SPACE PROBE
- NT VENERA SATELLITES
- NT ZOND 3 SPACE PROBE
- Venus probe high level entry deceleration simulation, discussing test program, equipment and results 03 p0463 A70-13541
- Soviet Venus probes 5 and 6 observation data concerning Venus atmospheric composition, temperature and pressure, etc 08 p1568 A70-20624
- Venus planetary surface and atmosphere, reviewing American and Soviet probe results 10 p1943 A70-24761
- Interplanetary magnetic field intensity and geomagnetic activity level correlation with 27-day solar activity cycle based on Venera 4 and Mariner 5 data comparison 12 p2310 A70-28263
- Venus exploration by space probes, discussing orbital and physical data, planetary rotation, atmosphere, surface conditions and magnetic field 18 p3319 A70-37047
- Mars and Venus orbiter spacecraft electric propulsion system, discussing Hg electron bombardment ion engine [AIAA PAPER 70-1154] 21 p3868 A70-41786
- Venus atmosphere exploration by multiple entry probe, describing spacecraft system design, launch and earth-Venus transfer trajectory, approach and entry sequence, etc [AIAA PAPER 70-1245] 24 p4417 A70-45963
- VENUS RADAR ECHOES**
- Venus and Mercury surface height variations near equators, using radar time delay and Doppler observations 14 p2647 A70-31077
- Venus radar mapping using fixed base line interferometer for hemispheric ambiguity resolution 14 p2647 A70-31078
- Venus radar anomalous features, examining rotation period, polarized and cross polarized scattering properties and topography 14 p2647 A70-31079
- Venus radar brightness map, using 40 km separation between range gates and comparable distances between Doppler slices 21 p3883 A70-40710
- VERBAL COMMUNICATION**
- U VOICE COMMUNICATION
- Retroactive and proactive inhibition in verbal discrimination learning, using paradigms characteristic of paired-associate retention studies 03 p0435 A70-13768
- VERIFICATION [PROVING]**
- U PROVING
- VERNIER ENGINES**
- NT CONTROL ROCKETS
- Surveyor spacecraft vernier propulsion system survival in lunar environment, suggesting temperature resistant seal and valve seat material for fluid loss prevention 06 p1129 A70-17170
- Advanced concept ejection seat /ACES/ system design and performance, considering gyro-controlled vernier rocket motor and electronic time delays 07 p1192 A70-19016
- VERTEBRAE**
- Lumbar vertebrae transverse processes fractures in air crashes, considering factors involved, incidence and pathogenesis 17 p3033 A70-35578
- VERTEBRAL COLUMN**
- Vertebral injury prediction of seated human subjected to caudocephalad acceleration, suggesting consideration for head and torso forward flexion and external restraints effects 09 p1627 A70-23462

- NT SWINE
- NT TURTLES
- Reticular formation of central nervous system in vertebrates described as behavior controlling circuit of interconnected modules, proposing hybrid computer method for operational scheme 08 p1447 A70-21461
- VERTICAL AIR CURRENTS**
- Thunderstorm downdraft trajectories and temperatures, discussing evaluation of cooling due to evaporation 02 p0325 A70-12256
- Power spectral density functions of vertical gust velocities, comparing theoretical results and C-141A flight test measurements 04 p0624 A70-15384
- Omega equation interpretation showing vertical motion related to advection of vorticity in upper troposphere and to warm advection in lower troposphere 05 p0838 A70-16154
- Momentum considerations in thunderstorm dissipation by disrupting organized cloud base updraft structure 06 p1100 A70-18570
- Air flow in updraft through and around cloud region containing precipitation particles using numerical model, computing horizontal divergence 06 p1100 A70-18572
- Model for thunderstorm downdrafts induced by rain evaporation based on one dimensional steady state formulation, deriving vertical velocity profiles 06 p1100 A70-18573
- Vertical wind distribution associated with thunderstorm outflow, measuring wind direction oscillations at Kennedy Space Center 06 p1101 A70-18576
- Pacific ocean equatorial trough zone disturbances structure, discussing organized convective downdrafts role in rapid structural decay 06 p1101 A70-18578
- Pulsed Doppler radar observation of thunderstorm updraft structure, noting vertical velocity perturbations 06 p1101 A70-18581
- Cloud layer vertical displacement effects on upper boundary and temperature changes in st-sc using aircraft sounding data 08 p1537 A70-21107
- Vertical air motions rate from aerodynamic loads on aircraft and pitch angle and center of mass vertical velocity fluctuations 08 p1538 A70-21113
- Lee wave theory for two dimensional stratified atmospheric models, noting local intense vertical beam into high stratosphere 08 p1540 A70-21972

Vertical wind profiles, deriving wind shear-layer thickness exponential relationship

09 p1715 A70-22356

Anisotropic turbulent energy spectral distribution approximated assuming homogeneous and axisymmetric turbulence with vertical axis of symmetry

09 p1717 A70-22374

Vertical wind components from balloon ascent observations, considering drag, atmospheric density, wind velocity, etc

10 p1911 A70-23927

Vertical air velocity in convective clouds by pulsed Doppler radar observations of thunderstorm

11 p2004 A70-25650

Atmospheric pressure variations as function of vertical movements caused by friction and orography, considering numerical forecasting

11 p2076 A70-26073

Laminar boundary layer transition to quasi-cellular flow in natural convection above horizontal heated plates and disks

12 p2155 A70-27197

Vertical momentum flux correction for planetary scale gravity waves in equatorial lower stratosphere

13 p2445 A70-29623

Atmospheric moisture balance solution for altitude dependent vertical velocity and turbulence coefficient, considering cloud water content and boundaries height calculation

14 p2601 A70-30137

Vertical flux densities of momentum and sensible heat dependence on displacement height and surface roughness

14 p2602 A70-30371

Atmospheric cellular convection, reducing hydrodynamic equations to amplitude equations for vertical velocity

15 p2770 A70-32064

Maximum up- and downdrafts altitude, using two dimensional model of lee wave disturbances for post-frontal subsidence modification

16 p2945 A70-32948

Steady state nonlinear dynamics of low latitude atmospheric global boundary layer, indicating inverse relation between air flow vertical velocity and distance from equator

19 p3460 A70-37417

Atmospheric turbulence vertical component spectral density observation by aircraft in steady flight, considering transfer function computation methods

19 p3351 A70-37646

Subsonic wing theory calculation method, obtaining close solutions for integral expression constants for downward air currents

19 p3352 A70-38164

Radiosonde technique for locating atmospheric turbulence regions and estimating vertical air movement component in associated gusts

19 p3427 A70-38246

Right-moving thunderstorm characteristics from mesonetwork rawinsonde updraft observations, considering hydrostatic pressure and cyclonic rotation

19 p3462 A70-38260

Stratus cloud dissipation process in descending vertical currents, using thermohydrodynamic and kinetic equations for cloud droplet distribution function

22 p4066 A70-43377

Vertical velocity effects on ionospheric horizontal wind magnitude and direction, solving integral equations system by successive approximations

23 p4188 A70-44057

VERTICAL DISTRIBUTION

Vertical atmospheric vapor distribution from measuring microwave radiation of earth/atmosphere system at several wavelengths

01 p0135 A70-10202

Solar Lyman alpha line profile and atomic hydrogen vertical distribution measurement method for terrestrial atmosphere in 200-500 km range

01 p0078 A70-11208

Vertical wind observations during lower ionosphere wind measurements by Na release method, discussing gravity effects and standing waves

01 p0078 A70-11213

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe

01 p0192 A70-11506

High altitude balloon measurements of secondary gamma quanta intensity vertical distribution, using scintillation counter with CsI(Tl) crystal

01 p0172 A70-11544

Hourly N/h/ profiles of F region calculated from nomograms by normal integral method during magnetic disturbance, measuring region temperature

01 p0083 A70-11548

Molecular reaction rates and ion/electron vertical profile and concentrations in equatorial ionosphere, applying computer simulation to numerical solution of continuity equations

01 p0083 A70-11549

Ionospheric molecular ion concentration vertical profile analysis for verifying neutral gas temperature

maxima in connection with two ion production maxima

01 p0083 A70-11550

Atmospheric density on basis of photographic observations of meteors, comparing vertical profile with CIRA profile

01 p0084 A70-11556

Satellite measurement of mean temperature in atmospheric layers to determine vertical temperature distribution

02 p0291 A70-12279

Cape Kennedy vertical wind speed profiles measured by spectral analysis using fast Fourier transform method

02 p0325 A70-12285

Vertical ion concentration profile in troposphere and stratosphere from ozone distribution satellite measurements using aeronautical reactions

02 p0291 A70-12389

Wave structure function dependence on altitude, comparing function ratio for up/down propagation through atmosphere

02 p0258 A70-12461

Ionospheric electron density vertical distribution calculation starting from satellite measurements of total electron content

02 p0293 A70-12575

Vertical concentration and size distribution determinations for aerosols in stratosphere, suggesting volcanic origin

02 p0294 A70-12842

Mean and extreme atmospheric ozone concentration calculated as function of altitude and seasons in Northern Hemisphere

03 p0474 A70-13294

UV radiation scattering and rocking instrument error source in vertical ozone profile determination with optical ozone probes

03 p0557 A70-13296

Atmospheric absorption anomalies of UV sunlight near 50 km altitude in rocket-borne radiometer determination of ozone distribution

03 p0478 A70-14197

Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates

04 p0682 A70-15733

Sonic boom propagation in still atmosphere with vertical temperature gradient, using graphical method of determining rays for aircraft motion

05 p0791 A70-15786

Ionograms for nonmonotonic vertical distribution of electron concentration in ionosphere from rocket and ground sounding

05 p0842 A70-16757

Magnetovariational sounding procedure for determining vertical distribution of earth mean electrical conductivity using geomagnetic field spatial derivatives for spherical earth

05 p0843 A70-16767

Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres

06 p1053 A70-17207

Second vertical derivative of gravity field, using formulas based on Taylor series expansion method

06 p1055 A70-17604

Laminar natural convection boundary layer stability over vertical uniform flux surface, measuring disturbance temperature and velocity distributions

06 p1035 A70-17686

Atmospheric temperature vertical profile reconstruction from ascending radiation observations using data regularization

06 p1097 A70-17793

Vertical profile of angular mass distribution of atmospheric water vapor and ozone as gas proportion function

06 p1097 A70-17794

Wind speed and potential temperature vertical profile in day/night planetary atmospheres estimated by similarity theory of boundary layer parameters

06 p1141 A70-17827

Twilight atmospheric brightness calculation for models of vertical distribution of aerosol scattering coefficient, using numerical data

06 p1056 A70-17828

Polarization level of outgoing short wave radiation calculated along solar vertical in aerosol containing multiply scattering atmosphere

06 p1097 A70-17829

Ionospheric vertical electron concentration computer calculations compared to direct measurements data by satellite and rockets over Sofia

06 p1057 A70-17843

CO vertical distribution near tropopause from photochemical atmospheric model with CO recombination with OH for stratospheric sink

07 p1265 A70-19282

Vertical eddy diffusion effect on chemical composition of mesosphere and lower thermosphere using photochemical model containing oxygen and hydrogen

07 p1274 A70-20269

Descending and albedo electron fluxes at specific geomagnetic latitude and various atmospheric depths, obtaining electron energy spectrum vertical profiles

07 p1372 A70-20335

Simultaneous ionospheric ion and electron measurements by various radiophysical methods, relating results to period of flight of vertical space probe

07 p1237 A70-20428

F region electron and ion concentration vertical distribution, discussing various ionization reactions

07 p1276 A70-20430

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data

07 p1277 A70-20453

Meteor flare photographs statistical analysis, noting duration and weight distribution dependence on meteor velocity

08 p1574 A70-21214

Altitude profiles and absolute intensities of far UV emission features in aurora measured by filterwheel photometer in Aerobee rocket, determining molecular oxygen densities

08 p1489 A70-21384

Deviating and nondeviating absorption of radiowaves in ionosphere, deriving vertical distribution of particle collisions in E layer

08 p1490 A70-21431

Strong point explosion in atmosphere with density dependent on height, obtaining numerical solutions for exact gas dynamic equations

09 p1658 A70-22112

Heat and mass transfer in binary turbulent boundary layer during natural convection on vertical surface, allowing for diffusional heat conduction

09 p1787 A70-22267

Wind HF inclination variations in lower atmosphere, considering turbulent kinetic energy dissipation and buoyancy production

09 p1714 A70-22355

Atmospheric momentum and heat flux height variations in surface boundary layer, stressing instrument performance and measurement techniques

09 p1715 A70-22359

Potential refractive index mean vertical gradients role in turbulent mixing, noting applications to radar detection of CAT

09 p1716 A70-22365

Elevation patterns of vertically polarized elements above circular finite ground screens directly on soil, discussing steering illumination

09 p1634 A70-22700

Nighttime D region ionization irregularities deduced from vertically incident VLF radio wave

09 p1671 A70-23663

F region vertical electron drift velocity determined from Thomson scatter observations

09 p1671 A70-23665

High energy electron and gamma quanta flux measurement in atmosphere at different heights by high altitude balloons

09 p1747 A70-23728

Vertical distribution of pulmonary blood flow (DPBF) in dogs without thoracotomy prone, supine, head-up, head-down and right and left decubitus positions

10 p1810 A70-24004

Vertical gradient of total geomagnetic field using curves based on continuous records of magnetic variations

10 p1876 A70-24589

Atmospheric temperature vertical profile reconstruction from ascending radiation observations using data regularization

10 p1913 A70-25024

Vertical profile of angular mass distribution of atmospheric water vapor and ozone as gas proportion function

10 p1913 A70-25025

Geomagnetic field upward calculation in lower ionosphere, discussing accurate data acquisition difficulties in Dirichlet problem solution

11 p2043 A70-25544

Meteorological Nimbus 3 satellite and aircraft observations of thermal radiation for vertical atmospheric temperature profile measurement

11 p2075 A70-25921

Absorption at solar H Lyman alpha line by earth hydrogen atmosphere measured as function of altitude from Aerobee flight spectrometers

12 p2222 A70-27182

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate

12 p2264 A70-27519

Vertical profiles of daytime and nighttime long wave radiation fluxes in atmosphere under stratus cloud conditions

12 p2264 A70-27521

Ionospheric probing by ground based and satellite-borne vertical incidence sounders

12 p2224 A70-27729

Stratospheric clear air turbulence (CAT) vertical extent above thunderstorm graphically represented

12 p2265 A70-28095

Plane acoustic shock wave vertical propagation in gravity-stratified atmosphere with temperature gradient, using homogeneous perturbation velocity [DFVLR-SONDDR-35] 12 p2212 A70-28209

Low latitude atmospheric vertical density variations, comparing solar and geomagnetic activities effects 12 p2227 A70-28264

Satellite measurement of water vapor height profiles using outgoing thermal radiation and solar radiation at atmospheric absorption techniques 13 p2392 A70-28571

Lower atmospheric layer temperature and wind vertical distribution effect on wind velocity ratio to geostrophic wind at earth surface 13 p2444 A70-28586

Vertical and intensity distributions of wind velocity focuses in tropospheric jet streams 13 p2444 A70-28590

Millimeter-wave probing for vertical distribution of atmospheric water vapor, comparing ground, balloon and satellite observation techniques 13 p2394 A70-28785

Balloon-borne measurement of troposphere refractive index vertical distribution using spaced-cavity refractometer 13 p2394 A70-28789

Asynchronous liquid metal MHD generator parameters, assuming constant vertical distribution of working fluid velocity 13 p2349 A70-28968

Cosmic ray vertical muon flux measurements at sea level using spectrometer 13 p2477 A70-29124

Vertical tropospheric turbidity distribution determination from intensity measurements of inclined searchlight beams 13 p2445 A70-29471

Solar constant dependence on Wolf number and variations in transmission factor from balloon observations of radiation balance vertical distribution 14 p2568 A70-30126

Mesospheric daytime/nighttime ozone abundance vertical profile diurnal variations 14 p2568 A70-30130

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force 14 p2570 A70-30217

Altitude distribution of radar-signal-reflecting points and ionization in meteor trails 14 p2635 A70-30308

Vertical mesoscale contribution to vertical wind shear profiles, using radar/Jimsphere measurements 14 p2609 A70-30599

F region horizontal drift velocity height and diurnal variations, using ionograms 14 p2574 A70-30751

Vertical profiles of atomic and excited molecular oxygen concentration in upper atmosphere calculated from spectral band intensity, determining excitation reaction rates 14 p2575 A70-30817

Temperature and density extreme variations at various levels in stratosphere and mesosphere, analyzing sounding rocket data 15 p2723 A70-31661

Vertical temperature profiles and global circulation patterns in stratosphere and mesosphere, discussing Northern Hemispheric seasonal, latitudinal and longitudinal variations 15 p2724 A70-31665

Atmospheric vertical temperature sounding from geosynchronous satellite, discussing instrumentation, cloud cover and wind effects, etc 15 p2809 A70-31690

Atomic hydrogen escape effects on altitude distribution, discussing lateral flow limitations on thermospheric diurnal variation 15 p2725 A70-31796

Atmospheric temperature vertical distribution measurement using sounding balloon and Skylark rocket 15 p2725 A70-31846

Cosmic ray knee interpretation using polar orbiting ionization chambers data from OGO-2/4 15 p2793 A70-31903

Ground sounding of ionization variations and vertical distribution using model, integral and normal laminar methods 15 p2729 A70-32078

Planetary distribution of F region disturbances and related vertical electron concentration using satellite and ground data 15 p2729 A70-32079

Electron-ion gas ionization, neutralization and ambipolar diffusion effects on F region vertical profile 15 p2730 A70-32090

Vertical gravity gradient effect on calculations accuracy of earth figure, deriving corrections for anomalies 15 p2731 A70-32149

Atmospheric optical properties at various altitudes, using lunar disk photometric observations at different wavelengths during eclipse 15 p2801 A70-32476

Elevation and ground conductivity effects on horizontal dipole excitation of earth-ionosphere waveguide, considering east-west propagation 16 p2858 A70-32932

Spectrophotometric and visual observations of twilight glow from Soyuz 5, comparing vertical monochromatic brightness profiles with calculations for Elterman aerosol model 16 p2896 A70-33218

Thermal atmospheric sounding from satellites based on Fredholm integral equations, obtaining vertical temperature profiles 16 p2896 A70-33257

Ozone concentration in San Francisco Bay Area, discussing temperature inversion, air pollution, destruction rate and distribution patterns of oxidants 18 p3284 A70-35945

Type 2 irregularities in equatorial electrojet associated with plasma density vertical gradients 18 p3244 A70-36017

Nimbus 3 satellite-borne Michelson interferometer IR spectrometer for spectrum measurement, obtaining temperature, water vapor and ozone vertical distribution 18 p3257 A70-36175

Vertical drift contribution to daytime N/h electron profiles in F2 region, taking into account ionization-recombination processes and ambipolar diffusion 18 p3247 A70-36292

Upper atmospheric gas components vertical distribution by airborne photometric absorption and attenuation measurements in UV spectrum 18 p3248 A70-36633

Critical height phenomenon for vertical jet exhausting into horizontal parallel plates channel simulating aircraft surfaces 18 p3243 A70-36709

Simultaneous measurements of earth atmosphere radiation, comparing short and long wave data consistencies at various altitudes 18 p3286 A70-36963

Atmospheric water vapor distribution by intensity measurements of outgoing radiation from satellites in carbon dioxide and water vapor spectral bands 18 p3287 A70-36971

Vertical distribution of upper atmospheric 7600 A oxygen glow, discussing 8645 A band and nitric oxide data 18 p3251 A70-36977

Electrons and ions diffusion effect on vertical distribution in F region, discussing diurnal variations at various heights 18 p3254 A70-37027

Ion composition and charged particle vertical distribution in F region and protonosphere from satellite and ground based observations 18 p3254 A70-37028

Time and altitude dependences between 340-1000 km of delta parameter for height scale ratio of neutral and electron-ion gases, discussing diffusion coefficient 18 p3254 A70-37030

F region photoionization rate vs height twin peak profile in presence of temperature maximum, taking into account ionization of atmospheric gases by quasi-monochromatic radiation 18 p3254 A70-37031

Panoramic vertical sounding method of ionosphere, noting drawbacks 18 p3255 A70-37040

F1 region unsteady model, examining vertical distribution profile of electron concentration on summer day 19 p3409 A70-37323

Vertical electron density profile variations during ionospheric perturbations in years of solar activity maximum and minimum 19 p3409 A70-37328

Electron concentration vertical profile in ionosphere as function of altitude of radio wave reflection and group refraction and velocity characteristics 19 p3409 A70-37329

Vertical profile of electron collisions effective frequencies in auroral ionosphere E region 19 p3409 A70-37330

Atmospheric moisture content vertical profile from terrestrial radiation measurements, using statistical regularization procedure 19 p3460 A70-37418

Atmospheric aerosols vertical distribution from aerosol measurements, considering particle size distribution 19 p3461 A70-37636

Light polarization during twilight at zenith from photoelectric recordings, noting intensity decrease with altitude 19 p3417 A70-38770

Radar angels activity seasonal variation and height distribution statistical relationship to meteorological parameters 20 p3661 A70-39169

Lower atmosphere refractive index vertical distribution and fluctuations, using airborne refractometer 20 p3619 A70-39191

Midlatitude atmospheric neutron density height dependence during minimum solar activity 20 p3697 A70-39285

Atmospheric gamma rays vertical intensity dependence on spectrum and altitude from high altitude balloon studies 20 p3697 A70-39286

Earth atmosphere cosmic ray neutron albedo from balloon measurement of flux vertical distribution 20 p3698 A70-39298

Lyman alpha geocoronal emission rate as function of altitude at midnight during solar minimum, solving radiative transfer equations 20 p3619 A70-39329

Barometric coefficient altitude dependence of cosmic ray neutron monitor for vertical flux 20 p3699 A70-39347

Altitude spectrum of ion formation in interaction of proton flux with atmosphere, using Bragg dissipation function 21 p3878 A70-40846

Turbulent mixing effect on vertical distribution of ionosphere atomic and molecular oxygen, using equations of motion and continuity 21 p3813 A70-40907

Mars lower atmosphere vertical temperature distributions from Mariner 6 and 7 radio occultation data, using improved trajectory estimates 21 p3884 A70-40908

Lower thermosphere minor gaseous constituents vertical transport by nonlinear gravity wave process, showing density scale height decrease from diffusive equilibrium 21 p3818 A70-41098

Vertical propagation of short acoustic waves from harmonic source in inhomogeneous atmosphere, calculating shock front width and heating rate 21 p3818 A70-41167

Geomagnetic field upward calculation in lower ionosphere, discussing accurate data acquisition difficulties in Dirichlet problem solution 21 p3819 A70-41294

Vertical oscillations in solar temperature minimum suggested as acoustic-gravity waves modes dependent on height at chromosphere-corona interface 21 p3926 A70-42196

Stratospheric clear air turbulence probability based on vertical temperature gradients and rawinsonde ascensional rates 22 p4064 A70-42619

Lower atmosphere electric field vertical distribution measurement by combined balloon and rocket soundings 22 p4017 A70-42797

Diffusion effect on hydrogen and oxygen constituents height distributions in atmosphere and lower thermosphere, solving diffusion and continuity equations 22 p4020 A70-43160

Vertical atmospheric ozone distribution according to direct solar radiation received on ground, using UV and IR observations 22 p4023 A70-43296

Electron density profiles calculation from model atmosphere, deriving F2 layer ionization vertical distribution 22 p4023 A70-43303

Tropical cyclone development model for axisymmetric vortex and quasi-balanced conditions, considering vertical heat distribution, rate of intensification and energy budget 23 p4213 A70-43896

Atmospheric optical properties at various altitudes, using lunar disk photometric observation at different wavelengths during eclipse 23 p4239 A70-43901

Ozone vertical distribution from satellite IR data, discussing Fredholm equations for radiation transfer 23 p4191 A70-44269

Airglow hydroxyl emission altitude profile observations by rocket-borne photometer 23 p4191 A70-44407

Spectrophotometric and visual observations of twilight glow from Soyuz 5, comparing vertical monochromatic brightness profiles with calculations for Elterman aerosol model 24 p4328 A70-45193

Atomic oxygen height profile measurements in upper atmosphere by sensor consisting of thin silver film on small pyrex rod permitting molecular transport 24 p4329 A70-45359

Fireball end point height as indication of meteoroid existence likelihood 24 p4411 A70-45787

Ionospheric wave propagation, using medium model, perturbation theory for vertical variation and computer eigenvalues of matrix system 24 p4314 A70-46132

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force 24 p4331 A70-46292

VERTICAL FINS
U FINs

VERTICAL FLIGHT

- V/JSTOL Flight Profile Indicator display system development to present pilot situation information in vertical plane
[SAE PAPER 690694] 05 p0792 A70-15861
- Matrix method for calculating aerodynamic loads, shearing forces, bending moments, torques, etc, in hinged main rotor helicopter blades during hover and vertical flight
06 p1167 A70-17914
- Optimal control synthesis for flight vehicle in vertical plane involving digital and analog computers
08 p1479 A70-20997
- Spanwise distribution of aerodynamic torsion on sailplane wings in vertical dive, discussing wing twist and lift effects
12 p2156 A70-27721
- Hunting phenomena of hydrogen gas plastic balloon at ceiling altitude, considering exhaust duct, extra volume and shape
17 p3018 A70-35317
- Cosmic ray and radiation belt data from vertical probes, determining instantaneous cross section of atmosphere
18 p3307 A70-36169
- Thermal design of high altitude balloons and instrument packages, analyzing vertical motion dependence on heat transfer and radiation environment
21 p3755 A70-42077
- VERTICAL LANDING**
Mathematical models for describing visual perception of distance to ground during VTOL landing and takeoff
05 p0810 A70-17119
- VERTICAL MOTION**
Heat and momentum transfer efficiency of thermal convection, calculating eddy coefficients for vertical transfer
05 p0831 A70-15876
- Vertically propagating waves in viscous isothermal atmosphere taking into account reflection due to nonlinearities and time dependence
05 p0833 A70-16679
- Vertical motion of ionized formations in ionospheric F region related to sporadic E layer
05 p0842 A70-16760
- Vertical motion and temperature structure of severe thunderstorms from jet aircraft penetration
06 p1102 A70-18585
- Electron concentration profiles calculated during vertically moving perturbations to evaluate ionospheric state
07 p1267 A70-19458
- Vertically moving disturbance discovered in ionospheric soundings close to magnetic equator, noting correlation with electrodynamic lift
07 p1269 A70-19631
- Nighttime ionospheric F region velocity component and recombination coefficient computer calculation
07 p1277 A70-20449
- Taylor instability of vertically accelerated horizontal two dimensional interface between liquid and air solved by method of strained coordinates
09 p1661 A70-23071
- Pulsed radio waves interactions during vertical propagation through perturbed ionosphere using cross modulation theory concepts, considering perturbation waves effects
11 p2003 A70-25531
- Limb-SD type ascending prominences direction and velocity correlated to flares and solar radio emission
12 p2303 A70-27707
- Air masses nonadiabatic ascent under elevated temperature inversion in atmosphere, assuming three layer model with linear profiles
12 p2265 A70-28335
- Hodograph theory for family of almost vertical ballistic trajectories
14 p2617 A70-31355
- Monograph on momentum, heat and mass transfer rates to vertical continuous cylinder moving through quiet fluid in forced and free convection
15 p2825 A70-31694
- Aircraft vertical channel landing condition autopilot using state variable feedback control techniques
15 p2773 A70-32553
- Airborne vertical glide path guidance computer for aircraft landing, using barometric altitude and DME data
16 p2871 A70-34053
- Ionospheric vertical base selection for recording discontinuities motion of F region
18 p3246 A70-36085
- Electron concentration profiles calculated during vertically moving perturbations for evaluation of ionospheric state
18 p3250 A70-36932
- Vertical motion determination from satellite cloud pictures based on canonical correlation of initial fields
20 p3664 A70-39401
- Solar photosphere vertical velocities and horizontal wave propagation, discussing magnetic fields, phase coherence and behavior and oscillations
21 p3885 A70-40952

Pulsed radio waves interactions during vertical propagation through perturbed ionosphere using cross modulation theory concepts, considering perturbation waves effects
21 p3786 A70-41281

Midwinter warming period upper stratospheric vertical motion fields, obtaining 2-mb charts
21 p3847 A70-42123

Average isobaric air flow field divergence calculation of vertical motion by two dimensional Gaussian integral theorem
24 p4371 A70-45134

VERTICAL PERCEPTION

- Visual vertical related to head tilts, observing location of gravitational vertical
04 p0645 A70-15445
- Human vertical perception with body tilt in median plane tested with luminous rod in upright to supine position with backward and lateral tilt
07 p1224 A70-20045
- Psychophysical adjustment methods effect on visual vertical orientation during head tilt
15 p2683 A70-32455

VERTICAL STABILIZERS

VERTICAL TAKEOFF

- Mathematical models for describing visual perception of distance to ground during VTOL landing and takeoff
05 p0810 A70-17119
- High lift devices design and operation problems in short and vertical takeoff
07 p1189 A70-19874
- STOL takeoff trajectory optimization for heavily loaded helicopter, using optimal control theory
17 p3021 A70-35841
- Short haul intercity center facilities air transportation traffic alleviation by VTOL aircraft, emphasizing performance, ground facilities, system operation and economics
24 p4290 A70-45914
- VERTICAL TAKEOFF AIRCRAFT**
NT FLYING PLATFORMS
NT X-22 AIRCRAFT
NT X-22A AIRCRAFT
NT XV-4 AIRCRAFT
- Turboprop VTOL or STOL intercity transports noting lift engines, noise, aircraft design and interior
01 p0005 A70-10645
- Air traffic control system for intercity and metropolitan VTOL airway reducing pilot and air traffic controller workloads
02 p0335 A70-12135
- VTOL transport aircraft stability and maneuverability compared with conventional aircraft
02 p0228 A70-12759
- VTOL steep descent beacon-guided landing systems
02 p0304 A70-12765
- Scanning beam radio guidance system for VTOL approach and landing
02 p0336 A70-12766
- Ground-airborne steep descent VTOL automatic flight control and vertical path selection using hover augmentation system /HAS/ and remote area terminal system /rats/
02 p0337 A70-12769
- Man machine interface in VTOL aircraft control and stabilization systems adaptation during manually controlled hovering flight
03 p0414 A70-14094
- Flight characteristics differences between VTOL and conventional transport aircraft, recommending differences consideration in regulations
03 p0414 A70-14095
- Noise radiated from VTOL lifting fan in wing inlet under static inflow conditions, attributing discrete tones to spacing between rotor and stator blades
04 p0734 A70-14889
- German VTOL transport aircraft projects, discussing Dornier 231 /lift by turbojets/ and Bolkow 140 /swiveling wing with gas turbine propellers/
04 p0623 A70-14955
- VTOL aircraft fly by wire system eliminating errors automatically, discussing electronic and electrohydraulic control components, flight test model design, prototype, etc
04 p0623 A70-15149
- German transport VTOL projects, discussing VC-500 swiveling wings with turbine powered propellers and HFB-600 blade cascade flow deflectors for vertical takeoff
04 p0623 A70-15349
- Stress analysis split method for determining residual strength and fatigue crack life of damaged or initially cracked VTOL structures
04 p0624 A70-15395
- Flight tests with mounted and unmounted SG 1262 hovering test rig in Germany to determine optimal control and stability characteristics for VTOL VAK 191B
04 p0624 A70-15704

VTOL fixed wing aircraft design parameters evaluation by digital variable stability system
[SAE PAPER 690696] 05 p0792 A70-15859

VTOL flight investigation to develop decelerating instrument approach capability with control-command information display for three degrees of freedom
[SAE PAPER 690693] 05 p0792 A70-15862

Wing vibration problems associated with roll attitude control in hovering autostabilized VTOL transport aircraft with wing-mounted jet lift engines
05 p0794 A70-16116

Safety analysis of VTOL aircraft for passenger transport based on accidental failures caused by technical defects, human error, weather, sabotage, etc
05 p0794 A70-16348

Airborne digital letdown computer to guide VTOL aircraft flying complex trajectories to relieve airport congestion
05 p0880 A70-16416

Helicopter advantages in airlift operation over conventional fixed-wing aircraft in Vietnam war
05 p0795 A70-16718

VTOL technical problems relating to military and civil transport applications, discussing sensitivity to mission requirement variations including design costs, noise levels, etc
05 p0797 A70-17077

VTOL aircraft control and stability with emphasis on flight characteristics and man machine interaction
05 p0809 A70-17089

Harrier G.R. Mk 1 VTOL vectored thrust aircraft for attacking targets at conventional strike aircraft speed, discussing design and combat effectiveness
06 p0985 A70-17157

STOL/VTOL airports design, location and complementary ground access transport
06 p1028 A70-17324

Economic flight conditions for civil aviation VTOL aircraft selected by graph-analytical method concerning phases of ascent, cruising and descent
06 p0987 A70-17875

Decision algorithms simulating human controller adaptive behavior in controlling VTOL aircraft in hover following stability augmentation system failure
07 p1216 A70-18860

VTOL and STOL transport development concerning aircraft types, air traffic control and navigation, airports, etc
07 p1194 A70-20250

Jet lift passenger aircraft considered better suited for medium stage routes than rotor/propeller designs for VTOL transport
08 p1436 A70-21347

VTOL aircraft applications to intercity traffic compared to competing transportation methods, discussing possible transportation time reductions
[DGLR-70-005] 10 p1970 A70-24045

Aerodynamic forces and moments effect of VTOL aircraft lift fan configurations on flow past wing
10 p1798 A70-24047

Lift fan propulsion for VTOL passenger aircraft, discussing design, thrust augmentation, optimum element combination, engine-wing integrations and tests
[DGLR-70-007] 10 p1929 A70-24049

Civil jet VTOL transportation based on Do 31, discussing market, passenger requirements, noise, flight safety and economic factors
[AIAA PAPER 70-001] 10 p1805 A70-24051

Civil VTOL transport aircraft handling and performance qualities using fixed base simulator with electronically generated display
[AIAA PAPER 70-345] 10 p1859 A70-24214

VTOL aircraft metal fatigue examination by photoelasticity emphasizing stress reduction
11 p2132 A70-25622

Total community annoyance measurement (TACM) applied to urban VTOL port planning for aircraft noise
[SAE PAPER 700286] 12 p2161 A70-27442

VTOL aircraft approaches to air passenger surface travel time reduction, emphasizing Manhattan-to-airport transportation problems
[SAE PAPER 700287] 12 p2335 A70-27443

VTOL profitability in Northeast Corridor, discussing city center ports accessibility for S-65-200 short hauls and economic and ground acreage advantages
[SAE PAPER 700310] 12 p2335 A70-27452

Economic factors in developing STOL and VTOL metroflight service, proposing evolutionary process beginning with short term demonstration
[SAE PAPER 700313] 12 p2335 A70-27454

VTOL and STOL design and operation, discussing noise and vibration reduction
13 p2344 A70-28544

Minimum fuel takeoff and landing paths for VTOL aircraft with constraints on state and control, determining optimal trajectories
[AIAA PAPER 70-550] 13 p2345 A70-29015

Tilt wing-propeller VTOL model, comparing static wind tunnel with moving-track test data based on coefficient forms of freestream and slipstream dynamic pressures
[AIAA PAPER 70-574] 13 p2343 A70-29895

VTOL aircraft multiple and nonuniform jets aerodynamics, considering induced field and secondary flows 14 p2528 A70-30851

VTOL aircraft stability augmentation system design based on control theory state variable methods, using minimum power levels 14 p2531 A70-30856

Model for pilots optimal manual control of hovering VTOL aircraft longitudinal position 14 p2543 A70-31409

Parameter identification algorithm for nonlinear equations describing VTOL aircraft longitudinal response 16 p2942 A70-33327

Quasi-linearization for VTOL aircraft equations of motion, using spline functions for unknown parameters initial estimation 16 p2942 A70-33328

Optimal fixed-form pilot model computer program for VTOL longitudinal control hover task evaluation 16 p2851 A70-33341

Low pressure ratio lift fan propulsion system for intercity VTOL transports, considering thrust, safety, noise, weight, components, speed, turbine and transmission [AIAA PAPER 70-670] 16 p2971 A70-33952

VTOL aircraft power plants optimization for future helicopter missions without restrictions of limited off-shelf inventory 17 p3147 A70-34708

Tilt-fold-propotor VTOL aircraft characteristics, stability and control, emphasizing flying qualities 17 p3014 A70-34722

Parameter model of VTOL airplane in transition, considering aerodynamic forces and moments and digital simulation 17 p3015 A70-34724

VAK 191 B VTOL aircraft fitting NATO Basic Military Requirements for low level reconnaissance-fighter operations developed from Fiat G-91 17 p3017 A70-34992

Composite compression tubes for VTOL aircraft components, describing weight parameters and mechanical properties [AIAA PAPER 70-898] 17 p3193 A70-35809

Optimum approach and departure paths for VTOL aircraft simulated by hybrid computer under constraints [AIAA PAPER 69-209] 18 p3213 A70-36452

Longitudinal dynamics of VTOL aircraft during hover-forward flight transition, using multiple time scale analysis [AIAA PAPER 69-130] 18 p3213 A70-36681

Soviet book on VTOL design covering aerodynamic and weight characteristics, turboprop and turbojet engines, flight regimes, etc 19 p3354 A70-37233

Exhaust gas ingestion suppression model tests for VTOL lift engines, measuring inlet thermal environment [AIAA PAPER 70-905] 19 p3490 A70-37396

Fixed wing and VTOL aircraft all-weather landing guidance and control philosophy 19 p3466 A70-38365

Computer simulated decision hierarchical model of helicopter and VTOL pilot for multiloop closure and tracking characteristics of man-vehicle system 19 p3372 A70-38921

VTOL aircraft longitudinal motion automatic stabilization in presence of turbulence and internal disturbances, using rotors and jet engines 20 p3561 A70-39838

Thrust deflector for VTOL aircraft fuselage mounted lift engines designed as isentropic plug nozzle, considering mass flow, pressure forces and Coanda effect [SAWE PAPER 841] 20 p3563 A70-40379

Aerodynamic characteristics of elliptical airfoils with jet circulation control for VTOL rotors including dual jets and cyclic results [AIAA PAPER 69-741] 22 p3959 A70-42705

VTOL aircraft ejector thrust augmentors, discussing configurations in wing root section [ICAS PAPER 70-56] 23 p4139 A70-44152

Low disk loading rotors in high speed VTOL aircraft for economical vertical payload lift [ICAS PAPER 70-57] 23 p4139 A70-44153

VTOL aircraft instrument flight in terminal area, defining requirements and operating characteristics for vertical and low speed capabilities [AIAA PAPER 70-1333] 24 p4291 A70-45935

Airport accessibility role in planning V/STOL aircraft landing facilities [AIAA PAPER 70-1311] 24 p4323 A70-45947

Turbofan, turbojet and turboprop engine development in aircraft gas turbine evolution, discussing VTOL propulsion, centrifugal and axial compressor engines 24 p4396 A70-46251

Military helicopter test program application to commercial VTOL operations, discussing military-civil design and development relationships [AIAA PAPER 70-1242] 24 p4292 A70-46327

VERTICAL TAKEOFF AND LANDING

U VERTICAL LANDING
U VERTICAL TAKEOFF

VERTIGO

Aircraft pilots vertigo during flight using questionnaire and interviews, emphasizing bank directional disorientation 04 p0643 A70-14979

Physiological mechanism and differentiation of alt-ernobaric vertigo in flyers 08 p1449 A70-21947

VERTOL MILITARY HELICOPTERS

U BOEING AIRCRAFT
U MILITARY HELICOPTERS

VERY HIGH FREQUENCIES

Solar phenomena effect on VHF communications between synchronous satellite relay and earth ground stations 02 p0259 A70-12566

Quasi-optical propagation in frequency wave range above 100 MHz as user problem in VOR, ILS, navigation satellite and CAT detection and warning systems 03 p0523 A70-13613

VHF field effect transistors thermal noise characteristics and effects of feedback and parasitic impedance 05 p0814 A70-16420

Radioheliograph observations at 80 MHz of directive shock wave propagation in solar corona 06 p1144 A70-18007

Design features and experimental results of E-fed cavity type suppressed omnidirectional antenna for VHF operation 06 p1022 A70-18020

VHF propagation variations relationship to changes in interplanetary plasma associated with interplanetary space sectorial structure rotation 07 p1226 A70-18757

Polarization diversity reception effects on VHF telemetry signal from low altitude satellites 10 p1832 A70-23919

VHF aerosat antenna design and system interactions, analyzing impact of spacecraft dynamics, control system, power supply and propulsion [AIAA PAPER 70-486] 11 p2120 A70-25439

VHF wave interference from heavy ion layers in lower ionosphere 14 p2574 A70-30737

VHF radiation from plasma during electron beam interaction with fast magnetoacoustic wave stimulated by external spatially periodic currents 15 p2780 A70-32118

VHF radio auroral scatter signal correlation analysis, determining scale size and drift velocity of scattered field 17 p3047 A70-35548

VHF propagation variations relationship to changes in interplanetary plasma associated with interplanetary space sectorial structure rotation 18 p3229 A70-37101

Polar electrojet and VHF auroral radio wave backscattering correlation, discussing geomagnetic disturbances effect 19 p3376 A70-37498

Radio source 3C 161 scintillating component angular dimensions and flux density at 60 MHz 19 p3524 A70-38760

Radio sources right ascension and flux densities at 60 MHz 19 p3524 A70-38761

Synchronous satellites VHF signal fading attributed to high latitude scintillations, noting intensity at night and during magnetic storms 21 p3790 A70-41362

Multiple channel VHF testing on ATS 1 and 3, describing transponder intermodulation and compression corrections 21 p3791 A70-41366

VHF geostationary satellite ranging and range correction systems, calculating second-order ionospheric delay effects on position error 22 p4068 A70-43590

Transistorized power amplifiers, frequency multipliers and parametric multipliers design for VHF and UHF ranges 23 p4170 A70-43876

Miniaturized VHF transmitter with bonded circular printed circuits for withstanding high shock loads, discussing design, production, packaging and testing 23 p4164 A70-44537

Aircraft Doppler VHF omnidirectional radio range (DVOR) performance test, noting improvement over VOR system 24 p4375 A70-46240

VERY HIGH FREQUENCY RADIO EQUIPMENT

Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-IC stage, using IR radiation data 12 p2196 A70-27725

VERY LOW FREQUENCIES

Normal and anomalous Doppler shifted cyclotron power radiated by energetic electrons spiralling along geomagnetic line considered as VLF source from magnetosphere 01 p0080 A70-11227

VLF observations of auroral beams for auroral V-emissions source and characteristics, explaining spectral shape 02 p0291 A70-12204

User problems in navigation methods, discussing Omega method, Navy Navigation Satellite System and VLF methods 03 p0522 A70-13603

VLF wave propagation in earth-ionosphere waveguide, comparing ray and waveguide-mode theories 03 p0449 A70-13616

Dynamic spectra of quasi-periodic VLF emissions noting association with geomagnetic micropulsations 03 p0477 A70-13985

VLF radio monitoring of celestial X ray fluxes from ground for long periods, discussing ionospheric D region conductivity 04 p0739 A70-14521

Nonducted VLF walking trace whistlers and Doppler shifts in fixed frequency transmissions identified on OGO midlatitude spectrographic records 04 p0649 A70-15116

Magnetospheric observations of whistler mode emissions by OGO 1 satellite over VLF and LF ranges 04 p0649 A70-15117

VLF phase disturbances and HF absorption during solar proton events of 28 August and 2 September 1966 related to proton intensities, energies and cut-off latitudes 04 p0741 A70-15124

Magnetospheric VLF emissions properties at frequencies below electron gyrofrequency 06 p1117 A70-17374

Satellite observations of VLF and ELF resonances related to ionospheric plasma singularities 06 p1118 A70-17375

Nonuniform plasma analyzed for parameters inhomogeneity effect on VLF propagation mode and instability 06 p1119 A70-17381

VLF propagation between earth and moving dispersive ionosphere, considering medium motion effects in Maxwell-Minkowski equations solutions 06 p1007 A70-17462

Wave focusing along static magnetic field from radiating VLF source immersed in cold magnetoplasma 06 p1120 A70-17577

Transequatorial multisite VLF records establishing solar zenith angle for midpoint of sunrise ionospheric height discontinuity, recomputing magnetic latitude dependent parameters 06 p1054 A70-17590

Balanced ELF chemotron tetrode amplifiers with series-fed output circuits, showing characteristics calculations and use in pyrometric assembly 06 p1022 A70-17782

Satellite observations of equatorial erosion and defocusing of VLF waves propagating at low magnetic latitudes 06 p1058 A70-18532

VLF noise phenomena observed with satellite electric dipole antennas compared with lower hybrid resonance frequency of ionospheric medium in vicinity 06 p1011 A70-18534

Cerenkov generation of VLF waves in inner magnetosphere at low latitudes 07 p1265 A70-19281

Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations 07 p1367 A70-19498

Geomagnetic field orientation effects on VLF nighttime propagation, checking computer program predictions 09 p1639 A70-23664

VLF radio noise statistical parameters observed as functions of azimuth, considering atmospheric distribution and parameters correlations 10 p1884 A70-25259

Temperature and ion effect on refractive index of VLF radio waves in quiet and disturbed ionospheric conditions 11 p2004 A70-25842

VLF and ELF EM wave propagation in earth-ionosphere cavity during solar flares 12 p2183 A70-27189

Very low frequency radio noise in ionosphere, magnetosphere and solar wind, using multiple receivers to measure mathematical relations between direction magnitude and polarization characteristics 12 p2184 A70-27574

Ionospheric probing with LF/VLF/ELF radio waves, discussing measurement techniques and temporal and spatial resolutions 12 p2224 A70-27731

Mode-scattering coefficients from ionospheric perturbations for sunrise and sunset propagation paths, comparing results with VLF radio measurements 12 p2189 A70-28053

Electromagnetic fields features in VLF spectral range for propagation in earth-ionosphere waveguide, discussing effects of ionospheric irregularities 12 p2190 A70-28169

VLF auroral and low latitude emissions along N-S chain of stations, discussing daytime and nighttime observations

13 p2371 A70-29925

Double sphere dipole antenna detecting VLF electrostatic plasma waves, discussing induced and contact potentials

13 p2372 A70-29927

Whistler mode VLF emissions stimulation mechanism

13 p2401 A70-29930

Perpendicular propagation of VLF waves from wave/particle interaction in vicinity of lower hybrid resonance frequency in magnetosphere

13 p2468 A70-29934

Magnetic field measurement of VLF wave propagating in whistler mode in magnetosphere by satellite FR-1

13 p2401 A70-30054

Magnetic fluctuations observed by ground observatories, suggesting large amplitude waves as field line resonances driven by magnetopause motion

13 p2402 A70-30078

Magnetospheric discrete VLF emission magnetic field intensity calculation by extending Helliwell theory to include electron density model and variable frequency waves

13 p2483 A70-30087

Statistical variation of number of VLF atmospherics per unit time above given vertical electric field strength threshold

14 p2550 A70-30515

Reflection and conversion coefficients of model ionospheres for VLF and LF radio waves

14 p2573 A70-30735

VLF wave propagation direction observation by satellite after passage through magnetosphere at low and mid latitudes

15 p2697 A70-31659

Automatic audio frequency spectrometer for ELF and VLF amplitude spectrum of atmospherics, discussing attenuation band near 3 kHz

15 p2725 A70-31856

Lightning discharge slow tail atmospherics relation to return stroke, using VLF spectra and frequency analysis

15 p2727 A70-31871

VLF transequatorial propagation, describing equipment, periodic variations in signal characteristics, ionospheric parameters, etc

15 p2699 A70-32298

Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations

15 p2795 A70-32743

Multimode and dispersive distortion of short quasi-monochromatic pulses in earth-ionosphere VLF channel

16 p2858 A70-32930

Ion effects on VLF propagation in earth-ionosphere waveguide during polar cap absorption events

16 p2859 A70-32933

Electric and magnetic dipole VLF radiation patterns in lossy two component magnetoplasma

16 p2860 A70-32944

Tweak atmospherics occurrence frequency and directions for VLF band reflecting layer study

17 p3047 A70-35401

VLF and ELF radio wave propagation with mode coupling in inhomogeneous stratified ionosphere

17 p3047 A70-35402

Ionospheric VLF radio waves observations via wideband receiver on K-9M-26 rocket, determining electron density profiles

17 p3047 A70-35639

Signal spectral parameters for reducing VLF atmospherics data from analyzer observations

19 p3412 A70-37998

VLF radiation observation at conjugate points, discussing hisses, choruses and geomagnetic effects

19 p3416 A70-38587

Whistler VLF radio observations of sudden magnetic impulses in plasmasphere during storms, using ground based magnetometers

20 p3620 A70-39330

Lower hybrid resonance frequency propagation ducts in multilayer upper ionosphere, showing association with VLF hiss bands

20 p3584 A70-39331

ELF and VLF propagation for perturbed ionosphere models, discussing effects of ion collision frequencies and molecular weights

20 p3585 A70-39454

Ionospheric VLF diurnal transmission loss differences on two long paths, analyzing values for first and second modes

20 p3585 A70-39455

VLF wave generation due to nonlinear interaction of two microwaves with plasma slab under high DC field

22 p4077 A70-42294

ELF and VLF waves in waveguide propagation mode, calculating lower ionosphere effect on attenuation and phase velocity

22 p3989 A70-42960

VLF signal phase and amplitude changes associated with PCA events and South Atlantic Geomagnetic Anomaly

22 p4023 A70-43292

D region LF and VLF sky waves opposite phase perturbation behavior

23 p4162 A70-44006

Zi and Ze smallness effect on complex refractive index of ionosphere for VLF propagation

23 p4164 A70-44373

VLF phase disturbances, HF absorption and solar protons in 1967 PCA events, using ionization model

24 p4314 A70-46128

VESTA ASTEROID

Absorption bands in reflection spectra of various asteroids, comparing Vesta composition to meteorites and Apollo 11 samples

16 p2972 A70-32987

Vesta diameter and albedo determination by IR emission measurements, allowing for roughness and rotation

17 p3173 A70-35758

VESTIBULAR TESTS

Microelectrophysiological study of cerebellar neuron responses to stimulation of vestibular apparatus by vertical rocking performed on anesthetized adult cats

01 p0012 A70-10124

Mathematical model for vestibular nystagmus adaptation to subjective sensation of rotation, noting time constants

01 p0032 A70-10362

Vestibular sensing system role in providing information concerning vertical, linear and angular head movements to central organs

02 p0246 A70-12191

Motion sickness causes and prevention during prolonged space flights, discussing vestibular system and characteristics of visual-inertial and canal-otolith incongruities

03 p0421 A70-13542

Vestibular analyzer stimulation effects on cerebral blood circulation in humans during angular acceleration using rheoencephalography

03 p0422 A70-13692

Vestibular reactions in rats under hypothermal conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature

03 p0425 A70-13893

Astronaut vestibular fitness determined from threshold labyrinthine tests on isolated horizontal and vertical semicircular canals

03 p0437 A70-14059

Vasomotor center neuron responses to vertical rocking movement stimulus of vestibular apparatus in cats

06 p0995 A70-17805

Vestibular semicircular canal excitation thresholds of experienced and candidate pilots for imposed angular accelerations

07 p1201 A70-18795

Adaptation to Coriolis accelerations associated adaptation schedule to with 1-rpm increments developed for preventing motion sickness in slow rotating environment

07 p1223 A70-19938

Vestibulometric techniques for medical examination and pilot selection using Coriolis accelerations for instability prognosis

09 p1617 A70-22475

Microdissection morphology of vestibular apparatus sensory regions in guinea pig, rabbit, cat, squirrel, monkey and man

10 p1811 A70-24200

Vestibular analyzer and otolith apparatus disturbances and normalization under prolonged hypodynamia, noting pathological effects of repeated caloric testing

10 p1816 A70-24686

Pilots with high vestibular stability studied for spatial orientation, noting activity impairment due to alternating angular acceleration and optokinetic stimuli

10 p1828 A70-25180

Vestibular adaptation to heat and rotary stimulation in animals and men

11 p1986 A70-25822

Tilting rotating chair producing vestibular stimulus via linear rotating acceleration to study motion sickness

11 p1988 A70-26515

Alcoholic beverages effect on positional nystagmus and Coriolis acceleration

11 p1993 A70-26520

Anatomical and physiological correlations between mathematical model components for vestibular nystagmus mechanisms

13 p2351 A70-29331

Coriolis illusions amelioration during space flight, noting cross coupling effects minimization by reflex vestibular stabilization of head

13 p2358 A70-29432

Vestibular nystagmic and electrical responses facilitation, inhibition and habituation, noting modulation by subcortical and cortical systems

14 p2538 A70-30909

Vestibular nystagmus evocation by conditioned reflexes technique after pure tone stimulation

14 p2538 A70-30910

Arousal effects on vestibular nystagmus in man, discussing forced alertness in mental arithmetics form

14 p2538 A70-30911

Ocular fixation index and vestibular stimulation by caloric tests, discussing central processes for nystagmic rhythm regulation

14 p2538 A70-30912

Vestibular habituation among pilots and flying staff from training and seniority standpoint

14 p2538 A70-30914

Vestibular threshold dependence on gravity, considering linear accelerations effect on canals sensitivity

14 p2539 A70-30916

Electronystagmographical responses comparison with electroencephalographic record during prolonged torsion swing vestibular tests under cortical and subcortical factors influence

14 p2539 A70-30917

On-line reduction of nystagmic data during vestibular bithermal caloric testing by analog technique

15 p2685 A70-32570

Vestibular stimulation by square wave acceleration, evaluating Ewald laws for nystagmus behavior

17 p3037 A70-35127

Complex accelerations effects on vestibular apparatus from physical and mathematical viewpoint

17 p3037 A70-35128

Vibration effects on vestibular components, noting applications to spacecraft artificial gravity

17 p3038 A70-35322

Acrobatic pilots equilibrium behavior in vestibular training, discussing labyrinth reactions and fluid intake role

17 p3041 A70-35919

Optokinetic and vestibular effects on human operator reliability in aircraft control systems

18 p3223 A70-36184

Vestibular thermal stimulation method using distilled water injected into ear, discussing nystagmus appearance and duration

19 p3367 A70-37355

Soviet book on peripheral vestibular apparatus and higher nervous system roles in motion sickness covering Coriolis acceleration tests, pilot training and selection, drugs, etc

19 p3359 A70-37406

Multiple choice rotation chair for clinical experimental research and pilot vestibular tests

20 p3580 A70-39438

Moving stripe stimulus inducing optokinetic turning movements in goldfish, discussing efferent influence on vestibular organ

21 p3762 A70-41141

Vestibular message flow regulation by central nervous system, describing afference, inhibition and copy formation

22 p3976 A70-43705

Vestibular sinusoidal stimulation effects on compensatory tracking under various postures and display conditions

22 p3976 A70-43706

Reflex vestibular disturbances and motion sickness prevention in artificial gravity of rotating space base, by incremental adaptation tests and drugs

23 p4154 A70-44625

VESTIBULES

Relationships between frog vestibular afferents, cerebellum and efferent vestibular system, using electron microscopy and Nauta degeneration technique

01 p0014 A70-10351

Cerebello-otolith system represented by axons of Purkinje cells, studying inhibitory vestibular efferent system relation to cerebellum in frog

01 p0014 A70-10352

Termination mode of primary and secondary vestibular fibers in cerebellar cortex of frog and cat, measuring evoked field and unitary potentials

01 p0014 A70-10353

Tegmental nucleus neurons of cats cerebellum, considering responses to acceleration changes and natural stimulation of vestibular apparatus

03 p0421 A70-13510

Vestibular habituation acquisition, retention and transfer correlation with stimulation, discussing alertness and arousal effects

14 p2539 A70-30915

VFR [RULES]

U VISUAL FLIGHT RULES

VHF OMNIRANGE NAVIGATION

Minimum operational characteristics /MOC/ for vertical guidance in airborne area navigation systems, including VOR-DME accuracy criteria

01 p0138 A70-11049

Airplane navigation based on VHF ranging between aircraft and geostationary satellite, examining errors

by unknown propagation characteristics of signal in ionosphere 02 p0262 A70-12594

Solid state VHF omnirange navigation system operation, principle, equipment, applications, advantages, etc 07 p1241 A70-19622

Parasitic loop counterpoise antenna radiation patterns, considering application to VOR systems 09 p1646 A70-22693

Doppler VOR offering increased course accuracy and allowing precise area coverage in conjunction with DME ground station 09 p1723 A70-23036

VHF satellite transponders for ranging and position fixing, studying ionospheric and multipath effects [AIAA PAPER 70-489] 11 p1999 A70-25433

Short distance VHF omnirange navigation and distance measuring equipment considered for performance improvements feasibility to meet civil air traffic demands through 1980 12 p2268 A70-27643

VORTAC system providing navigation service to civil and military air traffic on worldwide basis 12 p2269 A70-27919

Short range VOR/DME area navigation techniques in U.S. National Airspace System 16 p2948 A70-33470

Eurocontrol evaluation of navigational aid systems air traffic control, examining HARCO and VORDAC systems 19 p3468 A70-38641

Onboard velocity sensors for VOR/DME navigation systems positional accuracy improvement, describing optimal and suboptimal data filtering [AIAA PAPER 70-1024] 20 p3666 A70-39511

VHF omnidirectional range (VOR) receiver, considering noise reduction problem and active filter importance to signal improvement and system accuracy 22 p3992 A70-43586

Limiting effects of topographic quasi-optical radio propagation above 100 MHz in radar aircraft navigation, clear air disturbances detection and IR warning technique 23 p4163 A70-44230

Book on vibration and propagation phenomena covering oscillations of linear and nonlinear systems with various degrees of freedom, propagation in solids and fluids, etc 07 p1335 A70-19904

Scanning technique for allowing whole vibration cycles storage on one hologram 15 p2738 A70-32052

Solar limb image vibrations, establishing quantitative comparisons between statistical characteristics of fluctuations and weather conditions on propagation path 16 p2979 A70-34179

Eigenvalues of transfer matrix and vibrations generation for passive mechanical systems with n degrees of freedom based on Laplace transformation 18 p3337 A70-36225

Asymptotic, averaging and Ritz methods for steady state periodic vibrations of nonlinear systems with many degrees of freedom 18 p3338 A70-36437

Soviet book on vibrations in flight vehicle engines covering linear and nonlinear systems, computer methods, etc 18 p3305 A70-37229

Low stiffness optical parts bulk vibration machining 22 p4045 A70-42512

Krylov-Bogoliubov virtual work principal, investigating nonlinear vibrations, extending to heterogeneous vibrations 23 p4266 A70-44028

Periodic boundary value problems with cyclic totally positive Green functions, considering applications in vibrating physical systems and spline theory 23 p4213 A70-44899

VIBRATION DAMPERS

U VIBRATION ISOLATORS

VIBRATION DAMPING

Vibrating system response to damping insert introduced between two distinct coordinates, discussing Butyl rubber and vibration amplitude reduction 01 p0199 A70-10265

Two stage axial flow compressor with variable pitch guide vanes, discussing HF vibration reduction of rotor blades 01 p0166 A70-11419

Machine element materials damping properties, determining energy dissipation during steady resonant vibrations 01 p0211 A70-11423

Acoustical resonators free oscillations and pressure effects on damping, amplification, decay decrement and relaxation time 02 p0304 A70-12772

Acoustic wave excitation and damping in cryogenic He plasma produced by HF pulse discharge, considering nonadiabatic heating and dissipation during reflection 03 p0529 A70-13056

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness 04 p0760 A70-14428

Damping factor of fiberglass-reinforced cylindrical shells, concerning dependence on wave number and energy losses due to medium resistance and acoustic radiation 04 p0712 A70-14488

Natural vibrations damping of holonomic mechanical systems with feedbacks not explicit function of time reduced to optimal stabilization problem 04 p0718 A70-14494

Complex uncoupled modes to analyze forced vibrations of three layer damped sandwich beam with arbitrary boundary conditions, discussing orthogonality 04 p0773 A70-15076

Inertial damping of soft rubber under forced torsional vibrations, discussing viscoelastic body linear model 04 p0712 A70-15100

Javelin research rocket payload suspension ensuring limited vibrational accelerations, using viscoelastic materials for damping [DGLR-69-61] 04 p0774 A70-15147

Optimal damping time required for gyrocompass oscillations, allowing for maximum initial deflections 04 p0692 A70-15280

Beam fluctuations damping in beam waveguide, determining fluctuations cause as random displacement of lenses 04 p0651 A70-15290

Dynamic vibration absorbers (DVA) efficiency in limiting excessive vibrations in mechanical systems by transferring motion to auxiliary system 04 p0699 A70-15306

Vibration decay rate measurement by pulse cycles counting 04 p0695 A70-15571

Averaging analysis of oscillations attenuation of relaxing one dimensional linear viscoelastic systems under external force at resonance applied to nonlinear multidimensional systems 05 p0933 A70-16208

Linear damping of sinusoidal oscillation in plasma, solving linearized Vlasov equation by integration along particle trajectories 05 p0888 A70-16304

Dynamic characteristics from equations of motion of gyroscope with allowance for structural damping forces between inner gimbal and rotor 05 p0852 A70-16961

Cylindrical shell walls vibrations under impact loads, calculating damping factor in differential equation of motion of wall element 05 p0947 A70-17008

Vibration damping properties of steels and Ti- and Al-based alloys at various temperatures under tensile and compression loads 05 p0868 A70-17048

Heat resistant materials damping properties at high temperatures under distributed stresses measured in thin walled tubular specimens with vibrogram 05 p0952 A70-17049

Heat resistant enamel coatings effect on vibration damping of cast steels for turbine blades 05 p0868 A70-17050

Vibration damping of oil hydraulic system using bladder type accumulator composed of rubber, measuring frequency response of shock absorber 06 p0988 A70-17140

Absolute stability ranges of forced motions and damping in nonlinear systems determined by Sturm theorem 07 p1243 A70-18688

Vibration damping by sandwich structure consisting of viscoelastic layer between two high Youngs modulus metal sheets 07 p1401 A70-18845

Aircraft engine vibrational overload reducible by elastic bearings having controllable elastic characteristics 07 p1364 A70-19113

Soviet book on unsteady attached turbulent flow in turbine lattices, studying blade aeroelastic vibrations onset and attenuation in compressible and incompressible fluids 07 p1189 A70-19602

Circular nozzle contraction and Reynolds number effects on turbulent pulsation damping, measuring longitudinal and transverse components 07 p1259 A70-19830

Optimization of control of oscillatory process with deviating argument in maximum principle form, reducing solution to boundary value problem 08 p1544 A70-20954

Martensitic stainless steels structure related to energy dissipation capability, obtaining damping mechanism as magnetomechanical hysteresis 08 p1515 A70-20979

Elastic oscillations amplitude-dependent damping during phase transformations in two phase systems 08 p1556 A70-21121

Spaced damping reducing structural response to vibration, discussing efficiency, design flexibility and weight addition 08 p1507 A70-21269

Steady state motion of sinusoidally excited primary system with impact damper solved analytically by piecewise linear technique 08 p1546 A70-21858

Vibration theory damping using mathematical model emphasizing controlling response under steady state resonance and random excitation 09 p1769 A70-22238

Panel sound absorber acoustic impedance variation with frequency predicted taking into account panel mass, stiffness and internal damping 09 p1770 A70-22390

Aircraft turbine engines strength and gas dynamic characteristics improved by vibration decrease using elastic elements 09 p1742 A70-22471

Vibration decrement of nonlinear elastic system from resonance peak width of displacement amplitude curve of perturbing force 09 p1782 A70-23295

Flutter suppression in elastic finned beams in supersonic flow controlled automatically by rudder deflection according to flexural strain 09 p1785 A70-23615

Bifilar pendulum vibration absorber for counteracting helicopter main motor vibratory forces 10 p1805 A70-24657

Hysteretic linear damping theory applied to representation of structural damping under harmonic excitation 10 p1961 A70-25060

Undamped natural modes intercoupling resulting from arbitrary linear damping addition to linear dynamic system 10 p1962 A70-25061

Temperature effect on plate damping by constrained viscoelastic layers, emphasizing transition and operating temperature compatibility 10 p1962 A70-25063

Forced vibration of rib-skin structures under random pressure and heavy damping using wave group theory 10 p1963 A70-25066

Statistical energy concepts application to Mariner Mars 1969 spacecraft, estimating coupling of damping factors to analyze structural vibration [SAE PAPER 700171] 11 p2128 A70-25374

Vibration damping theory validity, discussing response curve for frequency dependence of energy dissipation 11 p2133 A70-25733

Self excited lateral vibration of poppet valve under positive and negative damping effects 11 p1983 A70-26420

Metal plates vibration under viscoelastic damping layers using electromagnetic transducer and impact excitation 11 p2145 A70-26702

Time optimal control synthesis of fast acting gyrocompass mounted on fixed foundation and with hydraulic damper and torsional suspension of sensor 12 p2233 A70-27564

UHF frequency doubler with series-parallel array of eight punch-through diodes, preventing spurious oscillations 12 p2196 A70-27650

Dynamics of gravity stabilized satellite having maximum damping rate 13 p2499 A70-28391

Circular orbit gravitationally stabilized satellite oscillation damping by changes of moments of inertia 13 p2501 A70-28420

Spacecraft orientation control without measuring vehicle angular velocity based on transient response and oscillations damping effectiveness 13 p2503 A70-28453

Canilevered column stability under constant lower load in presence of external damping 13 p2510 A70-28733

Vibration control by alternate layers of high damping viscoelastic material, discussing damping and loss factors, beams design and attachment 13 p2513 A70-29079

Compressor cascade flutter phenomenon, investigating factors affecting aerodynamic damping force on annular cascade blades

13 p2341 A70-29447

Book on vibrations covering natural oscillations, damped and undamped oscillations, energy sources, forced vibrations, resonance and multiple degree of freedom systems

13 p2515 A70-29452

Electronic packages design for vibration resistance, discussing isolators and damped laminate structures

13 p2516 A70-29616

Electrohydraulic control system dynamics, examining executive component loading at low speeds and nonlinear resistances

13 p2349 A70-29720

Bifilar pendulum type absorber for helicopter main rotor vibration reduction

13 p2348 A70-29827

High speed dynamic systems synthesis with optimal damping of elastic vibrations, using gradient method

14 p2617 A70-31354

Energy dissipation during independent flexural-torsional vibrations of rods, noting alternating shear stress superposition effect on damping

15 p2813 A70-31530

Damped vibrations logarithmic decrement determination during automatic recording of number of cycles, emphasizing error analysis

15 p2733 A70-31531

Monograph on harmonic and random vibrations filtering, discussing objects protection from ground vibrations produced by mechanical source

15 p2774 A70-31693

Matrix analysis of discretized dynamical system with constraints, considering case of damped oscillators

15 p2774 A70-31697

Diurnal vibrations damping in inertial navigation system, demonstrating equations asymptotic stability for coordinates autonomous determination

15 p2775 A70-32156

Perturbed motion of body with partially filled cylindrical cavity with damping ribs, discussing vibrations boundary value problems of liquid filling

15 p2775 A70-32157

Annular fluids hydrodynamic mass and damping effects on long rotating cylinders vibrations, discussing theory of fluid friction and forces, vortex and turbulent flows, etc

[ASME PAPER 70-FE-30]

16 p2892 A70-33636

Annular fluids hydrodynamic mass and damping effects on long rotating cylinders vibrations, analyzing test results

[ASME PAPER 70-FE-31]

16 p2892 A70-33637

Embedded damped sandwich beams, determining equations for resonant frequency, loss factor and modal roots

16 p2992 A70-34018

Discrete mechanical models of single speed gearings in torsional vibrations without teeth deformation and damping resistance

16 p2995 A70-34288

Linear systems with two degrees of freedom modeled as rigid beam on elastic supports, considering vibration damping

16 p2996 A70-34291

Hingeless rotor helicopter airborne and ground resonance characteristics, noting feedback stability control interference with rotors aerodynamic damping

17 p3015 A70-34733

Helicopter vibration reduction techniques, considering antivibration devices design and comfort crossover speed increase

17 p3015 A70-34735

Vibrating diaphragm gas pressure measuring system based on membrane damping, applying to prototype atmospheric entry probes

17 p3095 A70-35524

Damping characteristics [absorption coefficient]/of dissipative systems, defining authentic value of energy dissipation characteristic determination from natural vibrations damping

17 p3192 A70-35711

Stellar thermal and vibrational energy losses due to URCA shells in interiors

18 p3310 A70-35935

Elastic plate vibration with damping under random load, calculating linear response by harmonic analysis

18 p3334 A70-35958

Mechanical systems spontaneous oscillation due to different critical velocities with and without arbitrarily small damping

18 p3338 A70-36430

Flutter design charts for isotropic panels stressed to verge of buckling for tropical values of structural damping

18 p3338 A70-36446

Damped vibrations of single-mass elastic systems, determining E function singularity effect on dynamic characteristics

18 p3341 A70-36587

Vibrations induced by frictional moving force in viscoelastic beam with free ends on elastic base, showing critical load dependence on damping

18 p3343 A70-36720

Slot type oscillations electrodynamic suppression in coaxial magnetrons resonator systems, calculating long wave oscillation frequencies

19 p3387 A70-37738

Linear damping theory, discussing simple harmonic motion model extension to transient motion

19 p3472 A70-38041

Satellite structural vibration damping material and methods, discussing high polymer synthetics and viscoelastic laminae and damping systems data

19 p3533 A70-38291

Perforated cantilever beams and plates vibration damping capacity improvement by stress concentration introduction

21 p3933 A70-40729

Electron-neutral collisional damping of longitudinal electron oscillations in weakly ionized plasma, solving linearized Boltzmann-Vlasov equation

21 p3860 A70-42014

Free and forced oscillations of dynamic system with linear hysteretic damping, using nonlinear model

22 p4114 A70-42700

Magnetoacoustic waves in MHD channels, investigating excitation, damping and effects on mean current density and Hall field strength

22 p4081 A70-42822

Free motion of second order nonlinear automatic control device with vibration damping

22 p4075 A70-43554

Printed circuit boards vibration control in dynamic environment, noting viscoelastic damping technique

22 p3999 A70-43675

Inverted torsion pendulum performance improvement, describing dashpot to dampen lateral vibrations

23 p4202 A70-44950

Vibration transfer coefficient of aerial camera-photographic assembly system for shock absorption during surveys

24 p4333 A70-45200

Large amplitude high phase velocity oscillations anomalous damping in electron-ion plasma resulting from MHD instability

24 p4387 A70-46091

VIBRATION EFFECTS

Hyperon and resonance particle effects on neutron star vibration, discussing vibrational energy storage and atmospheric electromagnetic generation

02 p0379 A70-12699

Vibrational energy exchange between molecules during collision behind normal shock front as function of wave velocity

03 p0468 A70-13873

Mechanical vibrations effect on man including motor vehicle dynamic vibrations

03 p0439 A70-14097

Mechanical vibration effects on natural convective heat transfer in enclosure of rectangular cross section [ASME PAPER 69-WA/HT-13]

04 p0783 A70-14820

Residential structures vibration response to aircraft flyover noise, discussing noise transmission, rattle phenomenon, spectra, etc

[ASME PAPER 69-WA/GT-8]

04 p0770 A70-14887

Horizontal transverse vibration effects on manual tracking performance, relating tracking errors to frequency rather than acceleration

04 p0643 A70-14981

Javelin research rocket payload suspension ensuring limited vibrational accelerations, using viscoelastic materials for damping

[DGLR-69-61]

04 p0774 A70-15147

Sound vibrations effect on pulsation characteristics of turbulent gas jet

04 p0618 A70-15248

Randomly oriented vibration effect on noncompensated three degree of freedom gyroscope with displaced center of gravity

04 p0692 A70-15278

Two degree of freedom gyroscope sensitivity threshold during gimbal vibration with respect to casing

04 p0692 A70-15279

Ballistic range measurements of vibrational nonequilibrium effects on leading edge shock wave shape for cone-cylinders fired through chlorine atmosphere at supersonic speeds

04 p0621 A70-15601

Vibration effects on ion-molecule collision lifetimes and multiple reflections

04 p0723 A70-15638

Packing rub effect on rotating machinery produced by unstable vibration generated by friction and heat of rubbing rotor in sliding contact

05 p0854 A70-15908

Spacecraft level vibrations and gravity effects on blue-green algae *Plectonema Boryanum* proposed as gas exchange medium

06 p0999 A70-17292

Sinusoidal vertical vibration effect on adrenocortical function in guinea pigs

06 p0992 A70-17424

Acetylcholine concentration, esterase activity and synthesis in cerebral tissue of rats under repeated mechanical vibrations combined with noise

06 p0993 A70-17425

Vibrational creep curves of Al alloy under uniaxial stress level and amplitude, noting influence of small vibrations

06 p1168 A70-17930

Vibration frequency influence on vibrational creep of Al-Mg-Si alloy, describing mechanism in terms of strain hardening, additional slip and dislocation movements

06 p1168 A70-17931

Rectilinear oblique harmonic vibration effect on gyrocompass with torsional suspension

07 p1278 A70-18737

Linear vibrations in gimbal suspension rotor and base, estimating gyroscope drift during base and rotor vibration coincidence

07 p1279 A70-18738

Differential equations of motion for sensitive element of gyrocompass with torsional suspension under small amplitude spatial vibrations, taking into account torsional and flexural rigidities

07 p1282 A70-19534

Visual analyzer physiology under effects of gravitation, atmospheric pressure, mechanical vibrations, etc

08 p1444 A70-20740

Ultrasonic vibration effect on strength and plastic properties of metals undergoing torsion tests

08 p1520 A70-21499

Non-Cerenkov radiation region produced by passage of oscillating electric dipole at uniform velocity

09 p1728 A70-22958

Air traffic vibration effects on human organs and sensations, considering blood circulation, lungs, eyes and muscles

09 p1625 A70-23007

Ultrasonic vibrations effects on microstructure and mechanical properties of polycrystalline titanium during phase recrystallization

10 p1903 A70-23863

Body vibration effects in cats on myocardial ECG recordings, discussing electrodes implantation and tracings

10 p1810 A70-24007

Small natural vibrations effect of solar sail-propelled system on heliocentric orbit motion

10 p1950 A70-24319

Continuous wave chemical laser operation at 10.6 micron in carbon dioxide pumped by vibrational energy from hydrogen atoms and bromine molecules reaction

10 p1901 A70-25149

Support vibration effect on zero shift of damped vertical pendulum, using equivalent linearization with perturbation scheme

10 p1917 A70-25205

Ultrasonic LF modulation of solid state traveling medium lasers radiation intensity attributed to elastic vibrations of rods

11 p2062 A70-25398

Coupled panel-cavity vibrations analysis, emphasizing sonic boom excitation of large window-room combinations

11 p2133 A70-25728

Physiopathologic effects on organs of longitudinal and tangential accelerations, decelerations, vibrations and weightlessness

11 p1986 A70-25821

Stability conditions of rotational motions of symmetrical solid body on vibrating base in potential force field

11 p2098 A70-25916

Plane wave disturbances introduced in turbulent channel flow by vibrating ribbons near each wall, obtaining amplitude and relative phase

11 p2039 A70-26537

Liquids relative rotary motion in vertical rotating cylinders under large amplitude axial vibrations and angular velocities

12 p2209 A70-27213

Dynamic errors of electric measurement devices during three dimensional polyharmonic vibrations of foundation

12 p2233 A70-27561

Vertical position stability of gyropendulum mounted on vibrating platform, showing foundation induced gimbal rotor parametric vibrations

12 p2233 A70-27563

Seismic measurements of sonic boom induced ground vibrations for hazard to structures

12 p2227 A70-28078

Vibration effects on receptors in frog toe muscles at various frequencies

12 p2179 A70-28344

Single component two phase pipe flow choking and shock phenomena, including flashing flow vibratory effects

13 p2386 A70-28846

Electronic packages design for vibration resistance, discussing isolators and damped laminate structures

13 p2516 A70-29616

Assumed vibration modes generation method in beams with arbitrary boundary conditions, applied to cantilevered beams, using modified Rayleigh-Ritz analysis

21 p3934 A70-40923

Avalanche diode microwave oscillators, considering Impatt and Trapatt oscillation modes

21 p3798 A70-41336

Tethered parachutes vibration modes, determining fundamental frequencies from canopy/lines mass ratio and materials elastic properties [AIAA PAPER 70-1169]

21 p3755 A70-41844

Time average holographic interferometry of circular plate vibrating simultaneously in rationally related modes

21 p3829 A70-41927

Fluid filled elastic spherical shell, calculating free vibration axisymmetric response and fundamental mode

21 p3940 A70-42053

Coupled rotational vibration system dynamic behavior near critical speed, using graphs of autonomous two degree of freedom system on reduced phase plane

22 p4112 A70-42271

Elastic plate response to boundary layer pressure fluctuations, estimating vibration modes dependence on fluctuation convection velocity and response magnification as function of flow direction

22 p4007 A70-42283

Free fluid sloshing motion in shallow convex containers, considering isoperimetric problem for planar and axisymmetric vibrations

22 p4009 A70-42534

Hologram interferometry as noncontact tool for vibration mode measurements of turbine blade groups

23 p4193 A70-43925

Data acquisition and processing in structural modal characteristics analysis during ground resonance tests [ICAS PAPER 70-36]

23 p4267 A70-44133

Single-frequency oscillations mode in nonlinear catenary systems, considering factors promoting stabilization and uniformity

23 p4218 A70-44344

Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences

23 p4270 A70-44501

Magnetically stabilized satellites passive roll control, discussing resonance solutions by variational approach

23 p4262 A70-44690

Orthogonality of eigenmodes of aircraft vibrations based on F-104G ground measurements

23 p4274 A70-44766

Turbine compressor blades vibration mode measurements by holographic interferometry

24 p4334 A70-45563

Ring-stiffened thin circular cylindrical shells, calculating free vibration natural frequencies and mode shapes by finite element method

24 p4427 A70-46067

Periodically supported beams and plates free vibration, calculating natural frequency spectrum distribution and normal modes

24 p4427 A70-46070

VIBRATION PERCEPTION

Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on limen of temporal ordering of sensory events in haptic space

13 p2354 A70-29596

Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements

13 p2354 A70-29598

Human compensatory two dimensional visual display tracking performance with superimposed apparent vertical vibration, studying frequency dependent eye pursuit movements

24 p4309 A70-46078

VIBRATION PICKUPS

U TRANSDUCERS

U VIBRATION METERS

VIBRATION PROTECTION

U VIBRATION ISOLATORS

VIBRATION SIMULATORS

Single or repetitive shock pulses produced on electrodynamic and hydraulic shakers for shock testing on vibration machines

06 p1030 A70-18438

Radio and automatic control electronic equipment reliability estimation by vibration testing, determining test stand simulation accuracy

09 p1650 A70-23632

Vibration test instrument with automatic plotting of vibration system amplitude-frequency characteristics

11 p2032 A70-26440

Vibration generators based on magnetic field electrodynamic effect, giving design, schematic diagram and exploitation properties

11 p2032 A70-26441

Electrohydraulic vibrators and shakers for testing aircraft systems, diesel engines and structural joints, describing design and operation

11 p2032 A70-26442

HF shaker for accelerometer calibration and resonance evaluation, discussing construction materials, accuracy and test results

16 p2889 A70-34021

Random vibration test for quasi-flexible specimens with each mounting point subjected to different vibration levels and spectrum shapes

16 p2889 A70-34022

Structural vibration test system, using hybrid computer for automatic control and data acquisition and reduction

17 p3061 A70-35488

Satellite vibration tests simulation installations, describing measurement and control devices for lateral motion and test object safety

19 p3401 A70-38299

Shock pulse reproduction on electrodynamic and hydraulic shakers for vibration testing, including SNAP 21 results

21 p3804 A70-40865

VIBRATION TESTING MACHINES

U VIBRATION SIMULATORS

VIBRATION TESTS

NT DAMPING TESTS

Vibration frequencies and modal shapes for square and rhombic cantilever plates with diamond cross section, including commercial resonance test system

01 p0199 A70-10122

Gas turbine engines vibration characteristics, discussing statistical analysis obtained through condensed vibration overload control program

01 p0166 A70-11420

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens

02 p0315 A70-11658

Human vibration test program for airline passenger reaction to vibration environments of large commercial aircraft

02 p0244 A70-12132

Harmonic vibration testing of aircraft structural nonlinearities caused by dry friction, describing pitch control system

02 p0387 A70-12215

Mechanical strength and breakdown metallography of plate shaped structural steel and Al alloy specimen under various HF elastic vibrations

02 p0318 A70-12398

Reciprocating force measurement at shake table and subject interface and repetitive circumferential human torso deformation under sinusoidal input at various frequencies and intensities

[ASME PAPER 69-WA/BHF-3] 04 p0631 A70-14850

Plastic deformation of refractory alloys during stress relaxation tests under vibrations, showing enhanced stability

05 p0866 A70-17033

Lift forces and pressure on vibrating cylinders in plane perpendicular to air flow measured in wind tunnel

06 p0968 A70-17545

Force-acceleration product method for controlling input vibratory motion to vibration test specimen based on specimen dynamics

06 p1069 A70-18437

Alloy specimen shortening due to aging during stress relaxation under vibration

07 p1304 A70-18820

Calibrating rods design for vibrating components stress measurement gauges

07 p1400 A70-18822

Vibrating composite beam test method for determining complex dynamic modulus of viscoelastic materials over broad frequency and temperature ranges

07 p1320 A70-19955

Saturn ULLAGE solid propellant rocket motor vibration test evaluation

07 p1365 A70-20039

Complex modulus measurement for rigid linear viscoelastic materials over audio frequency spectrum by harmonic end displacement ratio method

07 p1413 A70-20044

Rig using holographic techniques for vibration testing and aircraft engine components inspection

09 p1680 A70-23069

Three degrees of freedom astatic gyroscopes dynamic characteristics determination by vibration tests

09 p1681 A70-23300

Vibration tests on Europa 1 launch vehicle third stage, describing multipoint measuring and servocontrolled excitation systems and data connection to EDP

10 p1951 A70-24864

Aerospace vehicles structural vibration environments prediction methods emphasizing vibration sensor mounting resonances

[AIAA PAPER 70-402] 10 p1959 A70-24903

Electrohydraulic vibrators and shakers for testing aircraft systems, diesel engines and structural joints, describing design and operation

11 p2032 A70-26442

Force controlled vibration for shock tests, discussing feasibility and merits for simulation testing

12 p2205 A70-27099

Vibration stability of particle in plane restrained by two nonidentical springs with initial stress using Floquet theory and perturbations

14 p2657 A70-30843

Reliability test facilities for military shipboard electronic equipment, subjecting equipment to combined thermal shock and vibration cycles

16 p2888 A70-33125

Aircraft turbine engine components vibrational testing by holographic interferometry methods

16 p2903 A70-33134

Random vibration test for quasi-flexible specimens with each mounting point subjected to different vibration levels and spectrum shapes

16 p2889 A70-34022

Test stand based on Froude pendulum for measuring friction coefficients and oscillation parameters of porous bushings

16 p2924 A70-34298

Zero order Bessel function fringe shape measurement for holographic sinusoidal vibration fringes

17 p3087 A70-35020

Fiber optics lens for transferring specimen image to camera during vibration tests

17 p3095 A70-35633

Heat pipe performance tests under longitudinal harmonic vibration

17 p3193 A70-35751

Ground vibration testing for aircraft and missile flutter prevention

[ONERA-TP-816] 18 p3339 A70-36508

High intensity noise testing of missile and spacecraft structures, simulating acoustically induced vibrations due to aerodynamic turbulence

19 p3531 A70-37697

Digital electrodynamic vibration exciter control for sinusoidal, random and shock spectrum testing of aircraft, missiles and satellites

19 p3383 A70-37920

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens

19 p3452 A70-38431

Seismic measurements at inertial test facilities, considering vibration environment relevant to single degree of freedom gyroscope performance tests

[AIAA PAPER 70-951] 20 p3606 A70-39576

Structural vibration tests, analyzing errors due to couplings and dampers addition

20 p3734 A70-40439

Helicopter vibration measurement techniques, discussing in-service fault diagnosis

21 p3749 A70-40582

Flexible heat pipe test for heat flux and wick pumping capacity under vibration and evaporator-condenser modification

21 p3945 A70-41040

Amplitude instability in vibration testing systems, noting effects of bandpass filters in feedback loop of amplitude servo

22 p4006 A70-43250

Damage data comparison for vibratory cavitation and liquid impact on aluminum alloy, stainless steels and pure nickel

23 p4203 A70-43870

Electrodynamic and electrohydraulic vibrators for frequency sweep, wideband random and sweep random vibration test methods

23 p4195 A70-44333

Mechanical structure dynamic response to vibration environment, using mobility method analysis

23 p4269 A70-44334

Accelerated vibration equipment testing for reducing test time, discussing vibration environment simulation

23 p4269 A70-44336

VIBRATIONAL FREQUENCIES

U VIBRATIONAL SPECTRA

VIBRATIONAL RELAXATION

U MOLECULAR RELAXATION

VIBRATIONAL SPECTRA

Dispersed fluorescence spectra from vacuum UV photon impact on COS, noting absence of emission from higher vibrational levels

01 p0148 A70-11353

Vibrational relaxation times in carbon dioxide and carbon dioxide-argon mixtures at 360-3000 K, using shock tube and laser schlieren method

01 p0148 A70-11355

Atomic O, H and D and molecular oxygen, deuterium and sulfur hexafluoride effects on nitrogen vibrational population distribution in nitrogen afterglow

01 p0148 A70-11356

Rotating compressor vanes vibration frequencies and modes using shell theory, considering Coriolis forces and rotation rates effects

01 p0211 A70-11427

Rotation-vibration matrix elements of quadrupole moments and absorption coefficients of ground electronic states of hydrogen, HD and deuterium

02 p0342 A70-11823

Motion equations for vibratory two degrees of freedom spring mass system subjected to rotation, discussing use for small rates of turn measurement

01 p0199 A70-10266

Semiautomatic mass condensation transformation for reducing structural vibration calculations, including computer program and mode shape plotting

01 p0200 A70-10868

Nonlinear vibrations in mechanical systems of elastic components having equivalent circuits represented by finite number of discrete masses interconnected by weightless infinite rod

01 p0143 A70-11027

Plates and shells natural oscillations frequencies and modes, analyzing variational, asymptotic and numerical methods

01 p0210 A70-11412

Finite element method for calculating natural frequencies and mode shapes of pretwisted cantilever plates assembly of flat triangular elements

02 p0384 A70-11859

Normal and tangential displacements distribution at surface and along cross section of bar with free boundaries computed for symmetric and antisymmetric oscillations

02 p0301 A70-12484

Natural mode shapes of longitudinal oscillations and resonant frequencies of thin rods of constant curvature and rings with slit, noting use for crack determination

03 p0588 A70-13283

N degree of freedom pendulum with suspension point vibrating vertically, determining conditions for parametric resonance occurrence

03 p0524 A70-13368

Finite difference method for obtaining free vibrations natural frequencies and mode shapes for rectangular plates of varying stiffnesses

03 p0595 A70-13812

Gain interaction among oscillating modes of gas laser analyzed from rate equations viewpoint

03 p0503 A70-14208

Cyclic bending stress in disk type gyroscopic rotor under steady precession, discussing solutions for modal functions and resonant frequencies

04 p0689 A70-14873

Rotating acoustic modes generated at blade passing frequencies in inlet duct of axial flow fan or compressor measured

04 p0691 A70-15079

Orthogonality of aircraft natural vibration modes by calculating complete matrix of generalized masses

04 p0774 A70-15150

Unsteady pressure distributions on elastic swept wing upper and lower sides at high subsonic to transonic flow, investigating torsional and bending vibrations

04 p0615 A70-15151

Spectral response of cylindrical shell due to random acoustic pressure input computed using modal approach

04 p0778 A70-15528

Flow distribution inside triangular shaped cavities of variable depth resembling liquid propellant rocket motor baffle cavities, simulating radial and tangential oscillation modes

04 p0674 A70-15566

Piezoelectric sensing diaphragm for detection of micrometeorites in space, noting vibration mode and effect of small beads contact time on calibration errors

04 p0695 A70-15567

Periodic vibrations of quasi-linear autonomous systems with retardation, deriving sufficient conditions for asymptotic stability

05 p0925 A70-15822

Aircraft engine support system dynamic loads induced by fan unbalance analyzed by coupling pylon and engine vibration modes

05 p0895 A70-15850

Rotor-driven vibrational gyroscopic device dynamic characteristics, stability, transient delta function, signal response and sensitivity assessment

05 p0848 A70-16222

Laser mode interaction characteristics determination using resonator field equation taking into account competition and coupled modes

06 p1081 A70-17765

Analytical expressions for amplitude and frequency modulation characteristics of bias modulated tunnel diode oscillator on steady state mode

06 p1022 A70-17836

Unstable vibrations in rotating flat shaft with unsymmetrical flexibility carrying unsymmetrical rotor in four degrees of freedom

07 p1402 A70-18978

Vibrational overloads development in turboprop engines ascribed to natural vibrations mode shape frequency approaching rotor revolutions number

07 p1363 A70-19110

Transverse and longitudinal combustion chamber oscillations in rocket motors with distributed mass and energy sources

07 p1364 A70-19581

Group theory investigation of three photon light scattering tensor for all vibration modes of specific crystal classes

07 p1299 A70-19861

Natural vibration frequencies and mode shapes for laminated orthotropic shells of revolution using finite element method

07 p1411 A70-19951

Von Karman equations for rectilinear plate vibrations used for triangular plates, discussing amplitude/thickness effect and multimodal frequency formula

07 p1416 A70-20211

Natural frequencies and modes of tapered swept back rudder fin of aircraft using vibration analysis

07 p1417 A70-20417

Periodic and almost periodic solutions to vibrations of quasi-linear nonautonomous systems in presence of resonance, determining principal amplitudes

08 p1544 A70-20966

Vibration stability of two identical particles constrained to plane and restrained by three linear springs with initial stress

08 p1591 A70-21466

Structural vibration of ring stiffened and mass-attached hemispherical shells

08 p1593 A70-21618

Parameters defining elliptic vibration of light reflected from surface using photoelectric ellipsometer

08 p1546 A70-21673

Cylindrical shell vibration modal characteristics finite element solutions accuracy compared with exact solutions

08 p1596 A70-21979

He-Ne laser emission in transverse oscillation mode, analyzing spatial and temporal coherence characteristics

09 p1694 A70-22135

Polar gas phase dielectric under conditions of power saturation interacting with microwave radiation field in waveguide

09 p1728 A70-22908

Single mode output power at 6328 A spectral line during He-Ne laser oscillation simultaneously at 6328 A and 3.39 microns

09 p1697 A70-22957

Natural oscillation mode in symmetrically graded p-n junction using Missawa small signal equations for avalanche diode

09 p1653 A70-23804

Natural frequencies and mode shapes of vibrating shells and shell combinations determined using variational finite difference method in conjunction with Hamilton principle

10 p1961 A70-25056

Equations of motion, modal vectors and natural frequencies of n-degree of freedom structurally damped linear system determined directly from test data

10 p1961 A70-25058

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration

[AIAA PAPER 69-56]

11 p2135 A70-25962

Axisymmetric and unsymmetric free vibrational modes of right-circular conical or cylindrical sandwich shells with free edges, discussing Rayleigh-Ritz solution

11 p2145 A70-26700

Limited frequency range analytical model for predicting mass and stiffness changes effect on natural frequencies and normal modes

12 p2317 A70-27121

Complex structures vibration using component vibration modes, considering dynamic behavior from interface reactions effects

12 p2317 A70-27123

Vibrating thin beam cross sectional displacement-force equations coefficients included in coefficient matrix, considering shear deformation and rotary inertia effects on vibration modes

12 p2324 A70-27397

Coupled relaxation dependence on translational and vibrational temperature and number of modes in polyatomic gases, noting molecular dissociation

12 p2276 A70-27797

Free elastic rotating beam with tip masses and inertia, developing solutions for flexible modes and natural frequencies of H-type configuration

12 p2273 A70-27820

Clamped beams steady state free and forced response and stability for large amplitude motion, discussing multimode analytical and numerical technique

12 p2327 A70-27821

Carbon dioxide molecular vibrational energy levels above carbon monoxide-oxygen premixed flame, discussing vibration modes leading to population inversion and relaxation time variance

13 p2455 A70-29132

Fabry-Perot resonator higher modes excitation by external TEM wave, discussing optimal mismatch for maximum intensity

13 p2408 A70-29358

Microwave oscillator providing transition to stable emission at harmonics with power levels comparable to fundamental frequency, considering gallium arsenide oscillation mode

13 p2471 A70-29413

GaAs epitaxial layered wafer natural CW R band oscillations in LSA mode

14 p2550 A70-30688

Dynamic stiffness, natural frequencies and mode shapes of prismatic and thin walled open grids, including warping and shear flange deformation

14 p2659 A70-31132

GaAs Gunn devices oscillatory modes under various operating conditions

14 p2557 A70-31158

Differential equations for coupled bending and torsional vibrations of slender beam in centrifugal force field

14 p2661 A70-31226

Natural vibrations frequency of tubular cantilever pipe with fluid flow, solving differential equation of motion by Ritz method

14 p2567 A70-31426

Vibration modes real time observation of complex surfaces with matt finish using changes in laser speckle

15 p2750 A70-31762

Vibration mode response and impact time sensitivity of mechanical impedance of human skull, relating head injury factors

15 p2682 A70-31934

Complex plates free transverse oscillation modes and frequencies using Ritz method

15 p2818 A70-32183

Relaxations from anelastic and dielectric measurements of fused silica and soda-silica glasses at low temperatures ascribed to vibration modes exceeding Debye spectrum

16 p2960 A70-32996

Embedded damped sandwich beams, determining equations for resonant frequency, loss factor and modal roots

16 p2992 A70-34018

Plane strain vibrations of two layered elastic cylinders, analyzing results for lobar mode numbers 2, 3 and 4

16 p2994 A70-34096

Free oscillations of Euler-Bernoulli and Timoshenko cantilever beams of variable cross section, obtaining approximate modes and natural frequencies bounds

16 p2994 A70-34234

Statistically indeterminate Timoshenko beams oscillations natural frequencies and modes by lumping properties of linear and rotary inertia at discrete points

16 p2994 A70-34235

Mechanical models of single speed gearings for torsional vibrations, taking into account nodes of first free vibration mode

16 p2995 A70-34289

Laser Raman spectroscopy, discussing scattering from vibrational modes in solid and from phonons above optical gap

17 p3081 A70-34599

Radial vibration frequency variation with wall thickness in hollow spherical shells, tabulating and plotting results

17 p3186 A70-34978

Natural frequencies and corresponding mode shapes for free flexural vibrations of circular plates, extending to elastic support cases

17 p3186 A70-34980

Engineering components vibration mode studies by time averaged holographic interferometry

17 p3087 A70-35019

Precision components engineering inspection and sonic transducer surface vibration modes analysis by hologram interferometry

17 p3087 A70-35021

Wave-periodic acceleration feedback during vibrational flame propagation in tubes, testing carbon monoxide-air mixture

17 p3196 A70-35350

Thermal effects on aircraft elastic vibration mode shapes, recommending investigation to develop analysis and design tools

18 p3213 A70-36459

Automatic matrix method for vibration modes of large structures with multiple degrees of freedom

18 p3342 A70-36684

Large scale galactic oscillations, discussing observational evidence and theoretical modal calculations

18 p3330 A70-37191

One dimensional magnetostrictive bar electromagnetically forced vibration, using Lagrange equations and normal mode analysis

19 p3472 A70-37959

Vibration signals analysis in random and periodic modes, presenting analyzers block diagrams

19 p3430 A70-38526

Vibration of combined cylindrical shells via Lagrangian minimization regarding unknown boundary values

21 p3934 A70-40897

Assumed vibration modes generation method in beams with arbitrary boundary conditions, applied to cantilevered beams, using modified Rayleigh-Ritz analysis

21 p3934 A70-40923

Avalanche diode microwave oscillators, considering Impatt and Trapatt oscillation modes

21 p3798 A70-41336

Tethered parachutes vibration modes, determining fundamental frequencies from canopy/lines mass ratio and materials elastic properties [AIAA PAPER 70-1169]

21 p3755 A70-41844

Time average holographic interferometry of circular plate vibrating simultaneously in rationally related modes

21 p3829 A70-41927

Fluid filled elastic spherical shell, calculating free vibration axisymmetric response and fundamental mode

21 p3940 A70-42053

Coupled rotational vibration system dynamic behavior near critical speed, using graphs of autonomous two degree of freedom system on reduced phase plane

22 p4112 A70-42271

Elastic plate response to boundary layer pressure fluctuations, estimating vibration modes dependence on fluctuation convection velocity and response magnification as function of flow direction

22 p4007 A70-42283

Free fluid sloshing motion in shallow convex containers, considering isoperimetric problem for planar and axisymmetric vibrations

22 p4009 A70-42534

Hologram interferometry as noncontact tool for vibration mode measurements of turbine blade groups

23 p4193 A70-43925

Data acquisition and processing in structural modal characteristics analysis during ground resonance tests [ICAS PAPER 70-36]

23 p4267 A70-44133

Single-frequency oscillations mode in nonlinear catenary systems, considering factors promoting stabilization and uniformity

23 p4218 A70-44344

Axisymmetric vibration modal properties/frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences

23 p4270 A70-44501

Magnetically stabilized satellites passive roll control, discussing resonance solutions by variational approach

23 p4262 A70-44690

Orthogonality of eigenmodes of aircraft vibrations based on F-104G ground measurements

23 p4274 A70-44766

Turbine compressor blades vibration mode measurements by holographic interferometry

24 p4334 A70-45563

Ring-stiffened thin circular cylindrical shells, calculating free vibration natural frequencies and mode shapes by finite element method

24 p4427 A70-46067

Periodically supported beams and plates free vibration, calculating natural frequency spectrum distribution and normal modes

24 p4427 A70-46070

VIBRATION PERCEPTION

Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on lumen of temporal ordering of sensory events in haptic space

13 p2354 A70-29596

Skin and tissue mechanical characteristics response to vibratory stimulation, considering effects on physiological and psychophysical tactile sensitivity measurements

13 p2354 A70-29598

Human compensatory two dimensional visual display tracking performance with superimposed apparent vertical vibration, studying frequency dependent eye pursuit movements

24 p4309 A70-46078

VIBRATION PICKUPS

U TRANSDUCERS

U VIBRATION METERS

VIBRATION PROTECTION

U VIBRATION ISOLATORS

VIBRATION SIMULATORS

Single or repetitive shock pulses produced on electrodynamic and hydraulic shakers for shock testing on vibration machines

06 p1030 A70-18438

Radio and automatic control electronic equipment reliability estimation by vibration testing, determining test stand simulation accuracy

09 p1650 A70-23632

Vibration test instrument with automatic plotting of vibrating system amplitude-frequency characteristics

11 p2032 A70-26440

Vibration generators based on magnetic field electrodynamic effect, giving design, schematic diagram and exploitation properties

11 p2032 A70-26441

Electrohydraulic vibrators and shakers for testing aircraft systems, diesel engines and structural joints, describing design and operation

11 p2032 A70-26442

HF shaker for accelerometer calibration and resonance evaluation, discussing construction materials, accuracy and test results

16 p2889 A70-34021

Random vibration test for quasi-flexible specimens with each mounting point subjected to different vibration levels and spectrum shapes

16 p2889 A70-34022

Structural vibration test system, using hybrid computer for automatic control and data acquisition and reduction

17 p3061 A70-35488

Satellite vibration tests simulation installations, describing measurement and control devices for lateral motion and test object safety

19 p3401 A70-38299

Shock pulse reproduction on electrodynamic and hydraulic shakers for vibration testing, including SNAP 21 results

21 p3804 A70-40865

VIBRATION TESTING MACHINES

U VIBRATION SIMULATORS

VIBRATION TESTS

NT DAMPING TESTS

Vibration frequencies and modal shapes for square and rhombic cantilever plates with diamond cross section, including commercial resonance test system

01 p0199 A70-10122

Gas turbine engines vibration characteristics, discussing statistical analysis obtained through condensed vibration overload control program

01 p0166 A70-11420

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens

02 p0315 A70-11658

Human vibration test program for airline passenger reaction to vibration environments of large commercial aircraft

02 p0244 A70-12132

Harmonic vibration testing of aircraft structural nonlinearities caused by dry friction, describing pitch control system

02 p0387 A70-12215

Mechanical strength and breakdown metallography of plate shaped structural steel and Al alloy specimen under various HF elastic vibrations

02 p0318 A70-12398

Reciprocating force measurement at shake table and subject interface and repetitive circumferential human torso deformation under sinusoidal input at various frequencies and intensities

[ASME PAPER 69-WA/PHF-3] 04 p0631 A70-14850

Plastic deformation of refractory alloys during stress relaxation tests under vibrations, showing enhanced stability

05 p0866 A70-17033

Lift forces and pressure on vibrating cylinders in plane perpendicular to air flow measured in wind tunnel

06 p0968 A70-17545

Force-acceleration product method for controlling input vibratory motion to vibration test specimen based on specimen dynamics

06 p1069 A70-18437

Alloy specimen shortening due to aging during stress relaxation under vibration

07 p1304 A70-18820

Calibrating rods design for vibrating components stress measurement gauges

07 p1400 A70-18822

Vibrating composite beam test method for determining complex dynamic modulus of viscoelastic materials over broad frequency and temperature ranges

07 p1320 A70-19955

Saturn ULLAGE solid propellant rocket motor vibration test evaluation

07 p1365 A70-20039

Complex modulus measurement for rigid linear viscoelastic materials over audio frequency spectrum by harmonic end displacement ratio method

07 p1413 A70-20044

Rig using holographic techniques for vibration testing and aircraft engine components inspection

09 p1680 A70-23069

Three degrees of freedom astatic gyroscopes dynamic characteristics determination by vibration tests

09 p1681 A70-23300

Vibration tests on Europa 1 launch vehicle third stage, describing multipoint measuring and servocontrolled excitation systems and data connection to EDP

10 p1951 A70-24864

Aerospace vehicles structural vibration environments prediction methods emphasizing vibration sensor mounting resonances

[AIAA PAPER 70-402] 10 p1959 A70-24903

Electrohydraulic vibrators and shakers for testing aircraft systems, diesel engines and structural joints, describing design and operation

11 p2032 A70-26442

Force controlled vibration for shock tests, discussing feasibility and merits for simulation testing

12 p2205 A70-27099

Vibration stability of particle in plane restrained by two nonidentical springs with initial stress using Floquet theory and perturbations

14 p2657 A70-30843

Reliability test facilities for military shipboard electronic equipment, subjecting equipment to combined thermal shock and vibration cycles

16 p2888 A70-33125

Aircraft turbine engine components vibrational testing by holographic interferometry methods

16 p2903 A70-33134

Random vibration test for quasi-flexible specimens with each mounting point subjected to different vibration levels and spectrum shapes

16 p2889 A70-34022

Test stand based on Froude pendulum for measuring friction coefficients and oscillation parameters of porous bushings

16 p2924 A70-34298

Zero order Bessel function fringe shape measurement for holographic sinusoidal vibration fringes

17 p3087 A70-35020

Fiber optics lens for transferring specimen image to camera during vibration tests

17 p3095 A70-35633

Heat pipe performance tests under longitudinal harmonic vibration

17 p3193 A70-35751

Ground vibration testing for aircraft and missile flutter prevention [ONERA-TP-816]

18 p3339 A70-36508

High intensity noise testing of missile and spacecraft structures, simulating acoustically induced vibrations due to aerodynamic turbulence

19 p3531 A70-37697

Digital electrodynamic vibration exciter control for sinusoidal, random and shock spectrum testing of aircraft, missiles and satellites

19 p3383 A70-37920

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens

19 p3452 A70-38431

Seismic measurements at inertial test facilities, considering vibration environment relevant to single degree of freedom gyroscope performance tests [AIAA PAPER 70-951]

20 p3606 A70-39576

Structural vibration tests, analyzing errors due to couplings and dampers addition

20 p3734 A70-40439

Helicopter vibration measurement techniques, discussing in-service fault diagnosis

21 p3749 A70-40582

Flexible heat pipe test for heat flux and wick pumping capacity under vibration and evaporator-condenser modification

21 p3945 A70-41040

Amplitude instability in vibration testing systems, noting effects of bandpass filters in feedback loop of amplitude servo

22 p4006 A70-43250

Damage data comparison for vibratory cavitation and liquid impact on aluminum alloy, stainless steels and pure nickel

23 p4203 A70-43870

Electrodynamic and electrohydraulic vibrators for frequency sweep, wideband random and sweep random vibration test methods

23 p4195 A70-44333

Mechanical structure dynamic response to vibration environment, using mobility method analysis

23 p4269 A70-44334

Accelerated vibration equipment testing for reducing test time, discussing vibration environment simulation

23 p4269 A70-44336

VIBRATIONAL FREQUENCIES

U VIBRATIONAL SPECTRA

VIBRATIONAL RELAXATION

U MOLECULAR RELAXATION

VIBRATIONAL SPECTRA

Dispersed fluorescence spectra from vacuum UV photon impact on COS, noting absence of emission from higher vibrational levels

01 p0148 A70-11353

Vibrational relaxation times in carbon dioxide and carbon dioxide-argon mixtures at 360-3000 K, using shock tube and laser schlieren method

01 p0148 A70-11355

Atomic O, H and D and molecular oxygen, deuterium and sulfur hexafluoride effects on nitrogen vibrational population distribution in nitrogen afterglow

01 p0148 A70-11356

Rotating compressor vanes vibration frequencies and modes using shell theory, considering Coriolis forces and rotation rates effects

01 p0211 A70-11427

Rotation-vibration matrix elements of quadrupole moments and absorption coefficients of ground electronic states of hydrogen, HD and deuterium

02 p0342 A70-11823

Two degree of freedom gyroscopes stability with hydrodynamic grooved rotor bearings, describing parallel and conical whirling rotor oscillations

02 p0307 A70-12163

Flight vehicles intrinsic vibration frequency spectra for controllable flight determined by graph-analytical method

02 p0227 A70-12415

Helicopter vibrations recording on magnetic tape for subsequent frequency analysis, describing frequency spectrogram

02 p0304 A70-12761

Rotational lines in iodine B-X system vibrational bands, calculating Doppler, natural and collisional widths

03 p0527 A70-13298

Spectroscopic calibration of laser lines at simultaneous carbon dioxide and nitrous oxide transitions in gas flow, showing abnormal line intensity

03 p0501 A70-13685

Spectrum deductions from profile excited random vibration response, considering single profile imposed displacements

03 p0600 A70-14250

HF molecular vibration rotation band observed in sunspot spectra, carrying out model calculations for spots differing in temperature for fluorine abundance

04 p0751 A70-15048

Nonlinear connected oscillations of vibrator and rigid bodies, analyzing plane-parallel and spatial motions, including elastic beams self excited oscillations

04 p0720 A70-15446

Stiffness and mass matrices of free-free vibration structure reduced to eliminate zero frequencies

04 p0778 A70-15553

Diatomic oxygen-nitrogen collisions in mixtures with CO, determining vibration-vibration energy exchange probabilities

04 p0723 A70-15562

Absolute values of emission cross sections for vibrational Meinel bands of molecular nitrogen ions excited by electron impact

05 p0901 A70-16279

Self broadened semihalf widths measurement in pure rotational spectrum of carbon monoxide compared with vibration-rotation calculation

05 p0886 A70-17086

Electron energy distribution function for carbon dioxide laser plasmas in gas mixtures, discussing dissociation products role in electron energy exchange

06 p1080 A70-17447

Vibration frequency influence on vibrational creep of Al-Mg-Si alloy, describing mechanism in terms of strain hardening, additional slip and dislocation movements

06 p1168 A70-17931

Electronic-vibrational coupling in nonequilibrium MHD generator with molecular gas to suppress electrode layer shorting and recombination in supersonic nozzles

06 p0988 A70-18222

Nonsymmetric planform cantilever plate apparent mass, material properties and geometrical changes effect on vibration frequency

07 p1403 A70-19058

Anisotropically elastic rotor vibrations stability analysis allowing for damper mass and internal/external friction, determining regions of steady and unsteady motions

07 p1403 A70-19059

Hydrogen fluoride fundamental vibration rotation band spectral line shift and broadening due to carbon dioxide

07 p1337 A70-19365

Wave numbers, intensity and half width of lines of vibration-rotation relative to carbon monoxide transition, noting band center displacement dependence on pressure

07 p1338 A70-19380

Harmonic analysis of ionospheric electron density oscillation spectra, noting density fluctuations classes due to internal gravity wave propagation and N/h profiles calculation errors

07 p1266 A70-19449

Natural vibration frequencies and mode shapes for laminated orthotropic shells of revolution using finite element method

07 p1411 A70-19951

Dynamic stability of pendulum-weight system during vertical HF small amplitude vibration of suspension point by averaging method

08 p1543 A70-20494

Tunable Q switched pulsed discharge carbon dioxide laser intensity dependence on time delay investigated for various vibrational/rotational lines and gas mixtures

08 p1512 A70-20618

Boundary conditions effect on natural vibration frequencies of unloaded components and components loaded with concentrated masses, obtaining frequency equations

08 p1584 A70-20698

Ideal fluid in lightly filled spherical vessel under gravitational force investigated for surface tension effect on vibration frequencies

08 p1482 A70-20853

Amplitude-frequency characteristics of arbitrary elastic system performing flexural vibrations determined using computer

08 p1588 A70-21184

Analytic solution for computerized vibration analysis of high speed tension test

08 p1590 A70-21332

Boundary value contact problems in thermoelastic oscillations theory found to have unique solutions for any frequency

08 p1591 A70-21440

Simply supported rectangular plate investigated for effect of thermal gradient on transverse vibrational frequencies

08 p1595 A70-21976

Correlation function of oscillation modulated in amplitude, phase and frequency by random processes causing spectral density maximum shift away from carrier frequency

09 p1633 A70-22409

Molecular vibration spectra from inelastic interaction between electrons and absorbed molecules at metal-vacuum interface

09 p1732 A70-22904

Wave number, intensity and half width of vibrational-rotational lines pertaining to transition of carbon monoxide perturbed by argon

09 p1733 A70-23316

Torsional vibrations frequency calculations for multibranch system exhibiting linear rigidity and viscous damping, constructing algorithm for digital computer

09 p1783 A70-23409

Thermospheric molecular nitrogen vibrational temperature, studying various chemical reactions and collisions as energy sources

10 p1872 A70-23827

Diatomic molecules vibrational levels distribution near dissociation limit determined using WKB approximation

10 p1919 A70-24041

Vibration behavior theory for elastomechanical systems applied to aircraft and space constructions

10 p1961 A70-25054

Free vibration analysis of elastic structures using Rayleigh-Ritz method and finite element methods

10 p1961 A70-25055

Natural vibration analysis of uniform cylindrical and cantilever rectangular tubes with cutouts

10 p1961 A70-25057

Vibration test instrument with automatic plotting of vibrating system amplitude-frequency characteristics

11 p2032 A70-26440

Kane-Mindlin equations and frequency spectra determined for free extensional vibrations in isotropic elastic plate strips

11 p2146 A70-26703

Flutter instability critical velocity and frequency for thin cantilevered plate with follower jet determined by Galerkin and computer simulation

12 p2316 A70-27106

CO vibration-rotation bands, calculating high resolution and temperature steradiance and spectral absorption coefficient

12 p2275 A70-27171

Rotational, vibrational and equilibrium molecular constants for Phillips system of diatomic carbon

12 p2275 A70-27174

Vibration amplitudes and frequencies contactless measurement by sensor with photodiode for machining tool elements during metal working operations

12 p2235 A70-27683

Dissociation energy and long range interatomic potential of diatomic molecules from vibrational spacings of higher levels

13 p2454 A70-28495

Q switched CO-HE laser IR fluorescence, considering population inversion recovery by vibrational energy transfer

13 p2423 A70-28496

Vibrocreep effect on Al-Mg-Si alloy vibration frequency and mean and maximum stress at constant temperature

13 p2512 A70-28980

Rotational and vibrational temperature effects on neutral gas and electron temperature and density in high pressure discharge plasma diagnostics

13 p2462 A70-29129

IR spectroscopy, determining relative populations of carbon dioxide vibrational energy levels by comparing emission intensities

13 p2455 A70-29131

Vibration spectra, kinetic and dispersion equations of solid spherical particles moving in incompressible weakly viscous liquid

13 p2388 A70-29368

Minimum weight design for complex structures subject to frequency constraint using finite element method and computer program

13 p2517 A70-29965

Differential cross sections for electron scattering by hydrogen with and without vibrational excitation, discussing inelastic processes

14 p2618 A70-30115

HF and DF continuous chemical lasers vibrational and rotational spectra, comparing lines and relative intensities

14 p2593 A70-30274

Third body coefficients of water and heavy water reactions in KCl coated and aged boric acid coated vessels with vibrational-vibrational exchanges

14 p2546 A70-31091

Cylindrical shell nonaxisymmetric vibration frequencies and boundary values relation, using Lagrangian

14 p2661 A70-31273

Vibration-rotation band absorptance for nonisothermal gaseous radiation in terms of parameters describing isothermal gas

15 p2825 A70-31816

Vibrational energies, rotational constants and internuclear potential of ground state molecular iodine, using reanalyzed spectroscopic data

16 p2954 A70-33056

Chemical energy conversion in lasers, discussing vibrational inversions in diatomic and multitatomic molecules and chain reactions

16 p2927 A70-33233

Stress and vibration analysis of rocket engine turboprop inducer blades, using finite element method [AIAA PAPER 70-630]

16 p2964 A70-33529

Nonequilibrium vibrational energy and relaxation equation for carbon dioxide-nitrogen molecular gas mixtures in supersonic free jet exhausting into vacuum [AIAA PAPER 70-867]

16 p2895 A70-33910

Near IR electronic emission spectrum of positive column in flowing oxygen electric discharge, noting vibrational temperature

16 p2955 A70-33981

Vibrational spectra and structure of oxalyl chloride in crystalline and fluid states, discussing molecular and space group symmetry

16 p2857 A70-34006

IR Raman and vibrational spectra and structure of gaseous and liquid 1-pyrazoline

16 p2857 A70-34007

NO and oxygen ions vibrational excitation due to inelastic scattering from He, calculating scattering angle variation

16 p2955 A70-34010

Cyclopropane-argon mixtures translational and vibrational energies exchange efficiencies analysis based on intermolecular potential

16 p2956 A70-34083

Diatomic nitrogen ions branch overlapping, discussing rotational line structure in first negative system vibrational bands

16 p2956 A70-34254

Harmonic analysis of ionospheric electron density oscillation spectra, noting density fluctuations classes due to internal gravity wave propagation and N/h profiles calculation errors

18 p3249 A70-36923

Real time narrow band vibration spectrum analysis techniques, discussing application to failure prediction and flight and wind tunnel tests

19 p3430 A70-38528

Base function selection for energy calculation optimal convergence conditions of frequencies and stresses in turbomachine blades vibrations

20 p3722 A70-39784

Diatomic Cs 7667 A band vibrational spectrum analysis

20 p3676 A70-40349

Carbon dioxide and CO IR vibration-rotation spectral absorption coefficients, noting harmonic oscillator approximation

21 p3851 A70-40589

Molecular oxygen density and vibrational distribution in lower atmosphere, observing solar UV radiation absorption by satellite OSO-4

21 p3816 A70-41066

Vibrationally adiabatic model for reaction dynamics of atomic and molecular hydrogen systems, using zero point energy path

21 p3773 A70-41397

Molecular size dependent steric effects in translation-vibration energy transfer by velocity dispersions in cyclopropane-inert mixtures

21 p3780 A70-41706

Carbon monoxide vibrational population inversion in product molecule produced in free burning carbon disulfide/oxygen flame

21 p3950 A70-41708

Carbon monoxide-nitrogen laser mechanism vibrational populations, discussing operational characteristics and walls condition and nature

21 p3837 A70-41716

Carbon monoxide-nitrogen system vibrational distribution of populations and kinetics in fundamental and harmonic regions, investigating vibroluminescence

21 p3837 A70-41718

Molecular vibrational temperature dependence on electron and neutral gas temperatures and degree of ionization for plasma excitation in nitrogen
22 p4078 A70-42358

Acoustic frequency spectra of transverse vibrations in bracketed bar caused by dry friction, using Lagrange method
22 p4073 A70-42612

Hydrogen chloride self broadened fundamental vibration rotation band intensity variation with pressure investigated by absorption spectroscopy analysis
22 p3983 A70-42945

Carbon dioxide laser vibrational temperature measurement, determining ground state vibration level populations in various molecular gases
22 p4051 A70-43391

Narrow resonances in saturated absorption at molecular vibrational-rotational transitions in carbon dioxide laser
23 p4202 A70-45059

Monatomic crystal vibrational spectrum, noting quasi-local vibrations near high impurity concentrations
24 p4388 A70-45202

Electronic energy collisional transfer between atomic and molecular hydrogen, measuring excited molecule vibrational distribution
24 p4381 A70-45650

VIBRATIONAL STRESS

Mechanical vibrations effect on man including motor vehicle dynamic vibrations
03 p0439 A70-14097

Elastokinetic three dimensional boundary value vibration problem, involving rectangular area on surface of elastic half space under periodic normal stress
03 p0601 A70-14319

Displacement determination by orthogonality relationship for dynamic vibrations and stresses in composite elastic plates
05 p0937 A70-16406

Visual acuity performance during various vibration stresses found differentially degraded for near, intermediate and distant vision
07 p1223 A70-19939

Slip-ringless propeller blade mounted measurement system for steady state and vibratory stresses from multiple strain-gage locations during flight and ground tests
[SAE PAPER 700223] 11 p2051 A70-25891

Sinusoidal vibrations effects on rats at different air pressures, discussing human vibration tolerances and resonant frequencies of thoraco-abdominal system
20 p3572 A70-39434

Silicon solar cell array interconnector design based on analysis of stresses caused by thermal expansion and vibrational motion
21 p3756 A70-41009

VIBRATORS

U ELECTRIC CHOPPERS

VIBRATORY LOADS

Reciprocating force measurement at shake table and subject interface and repetitive circumferential human torso deformation under sinusoidal input at various frequencies and intensities
[ASME PAPER 69-WA/BHF-3] 04 p0631 A70-14850

E1617 alloy breakdown resistance tests under multiple alternating static tension-compression and vibrational loads at 800 C
05 p0867 A70-17044

Prismatic pendularly supported beam load-forced vertical vibrations, critical load amplitude and force pulsation in case of stability loss
06 p1165 A70-17586

Force-acceleration product method for controlling input vibratory motion to vibration test specimen based on specimen dynamics
06 p1069 A70-18437

Vibrational overloads development in turboprop engines ascribed to natural vibrations mode shape frequency approaching rotor revolutions number
07 p1363 A70-19110

Aircraft engine vibrational overload reducible by elastic bearings having controllable elastic characteristics
07 p1364 A70-19113

Parametric vibrations onset and resonance regions boundaries determined for feed line system with flexible compensator
07 p1403 A70-19114

Monograph on conditions for stabilization of oscillatory systems with random parametric excitations covering approximate calculations, stability concept definition, etc
11 p2129 A70-25496

Vibration loads in turbomachinery blading, examining blade detuning effects on resonant response levels and fatigue life
24 p4392 A70-45157

Short-term creep and erosion resistance testing of Ti alloy in high speed air flows under aerodynamic vibrations
24 p4360 A70-45826

VIBROCARDIOGRAPHY

U PHONOCARDIOGRAPHY

VIBROMETERS

U VIBRATION METERS

VIDEO COMMUNICATION

Simulation technique to evaluate TV contrast trackers standard scan performance using video tape recording
01 p0058 A70-10812

Spatial registration of digitized multispectral video imagery obtained from multilens cameras, multichannel optical-mechanical line scanners and multiple TV camera systems
03 p0453 A70-13000

Detection efficiency compared for system containing clipper circuit and quasi-optimal linear system for video pulse signal with additive noise background
03 p0446 A70-13201

Wideband transmission of photographic reconnaissance information over long distances using Initial Defense Communication Satellite Program satellites
06 p1006 A70-17346

Microwave radiometric receiver, analyzing video detector saturation effects on linearity
16 p2880 A70-34075

VIDEO DATA

Flying spot scanners evaluation as image processing devices, discussing scan patterns effect on video signal
01 p0089 A70-10817

Photometric reduction of Lunar Orbiter video magnetic tapes for generation of topographic information of proposed Apollo landing sites
03 p0490 A70-13661

Computer-generated shaded flicker-free on-line digital video display, allowing superimposed vector graphics with light-pen interaction
09 p1640 A70-22033

Earth resources program data management system, discussing mission control, processing and distribution of data from satellite vidicon cameras and multispectral line sensors
[AIAA PAPER 70-321] 09 p1792 A70-22854

Real time video data display at visual and thermal IR wavelengths, demonstrating performance improvement for target recognition
16 p2910 A70-33436

VIDEO EQUIPMENT

Real time large screen display systems operation, brightness, accuracy, resolution, contrast ratio, data rates, reliability, fail-safe and management functions
05 p0828 A70-16190

Solar flare videometer for measuring flare area and peak and integrated intensity in real time
11 p2104 A70-25744

VIDICONS

NT RETURN BEAM VIDICONS

Optimum planetary image intensity at TV camera cathodes, exemplifying with Saturn orthicon image
04 p0688 A70-14694

Vidicon electron optics, describing triode emission system, focusing section, deflection component, collimating lens, beam landing error, etc
09 p1674 A70-22216

Vidicon camera tubes applications in TV systems, noting excellence for live pickups and film reproduction
10 p1852 A70-24952

Two inch high resolution vidicon for TV line processing of printed documents
16 p2906 A70-33173

Broadband image pick-up tube with high near IR sensitivity, comparing performance with other vidicons
16 p2907 A70-33186

Combination shutter and filter-changing mechanism for spacecraft vidicon cameras
16 p2914 A70-34150

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations
[SMPTE PAPER 105-72] 17 p3095 A70-35635

Earth resources satellite missions TV systems design, using vidicon as sensing element
20 p3626 A70-39052

VIETNAM

Helicopter advantages in airlift operation over conventional fixed-wing aircraft in Vietnam war
05 p0795 A70-16718

CH-54A helicopter gas turbine engine air particle separator/EAPS/ field service in Vietnam, noting time before engine removal for erosion
[ASME PAPER 70-GT-97] 18 p3303 A70-36844

VIEW EFFECTS

Correction factors required for estimating influence of pupil area reduction on retinal illumination at oblique angles
05 p0801 A70-16449

Eckert shadow technique for radiation view factors applied to toroid inside shadow hemisphere
08 p1546 A70-21832

Eye movements direction during perceptual errors related to stimulus location
15 p2683 A70-32456

Binocular disparity detectors in human visual response to moving gratings confirmed by electrophysiological evidence
17 p3025 A70-35150

Geometrical appearances at relativistic speeds for celestial sphere with multiple constellations, spherical surface features at observer proximity and rectangular box train
19 p3520 A70-38273

Quantitative measurement of solar limb image motion and blurring, noting role of telescope aperture
20 p3634 A70-40424

VIEWING

Radiation view factor from differential area to conical surface determined using Stokes theorem and contour integration
04 p0787 A70-15598

VIKING LANDER SPACECRAFT

Trajectory, guidance and environmental parameters and uncertainties effect on design optimization of out-of-orbit Viking soft lander
[AIAA PAPER 70-99] 06 p1157 A70-18134

Mars lander atmospheric entry digital simulation for deceleration system design, discussing ballistic coefficient, aeroshell diameter, parachute size and deployment altitude, etc
08 p1582 A70-20932

Martian atmospheric models for lander and simulator design, obtaining effective sky temperatures, surface pressures and temperatures, atmospheric compositions, etc
11 p2112 A70-26141

Subsystem weight trade-offs for design optimization of out-of-orbit Mars soft lander, using atmosphere and surface environmental Monte Carlo model
11 p2124 A70-26215

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] 13 p2384 A70-28530

Martian atmosphere modeling for obtaining Viking lander spacecraft design margins by Monte Carlo method
14 p2637 A70-30564

Parachute decelerator system for 1975 Viking Mars Lander mission, discussing configuration selection, design factors, trajectory simulation, weight and mass analysis, etc
[AIAA PAPER 70-1162] 21 p3931 A70-41849

SNAP 19 radioisotope thermoelectric generator module for Viking Lander and Pioneer applications, discussing design requirements, environmental and mission constraints, life, performance and reliability characteristics, etc
22 p4071 A70-43195

VIKING MARS PROGRAM

Mission design, spacecraft characteristics, communications and experimental approaches for Viking 1973 Mars Project
03 p0576 A70-14020

Viking Mars orbiter/lander mission planning, studying sun, earth and star occultations sensitive mission characteristics
[AIAA PAPER 70-62] 06 p1146 A70-18193

Viking Mars mission meteorological instruments for measurements of water vapor content, wind speed/direction, temperature and pressure
14 p2584 A70-30553

Mars 1971 and 1975 missions, discussing Mariner 8 and 9 and Viking lander objectives
18 p3334 A70-37224

Parachute decelerator system for 1975 Viking Mars Lander mission, discussing configuration selection, design factors, trajectory simulation, weight and mass analysis, etc
[AIAA PAPER 70-1162] 21 p3931 A70-41849

VINTI THEORY

Satellite orbit prediction formulas for Vinti dynamic model with three coordinates expressed in terms of independent variable
10 p1939 A70-24188

Vinti potential with spheroidal coordinates for equations of motion in earth satellite orbit computation
13 p2486 A70-28503

General potential function in triaxially ellipsoidal coordinates for Laplace equation, examining near earth satellites and Vinti potential
18 p3334 A70-37064

VINYL ETHYLENE

U BUTADIENE

VINYL POLYMERS

Hydrogen sulfide participation in vinyl polymerization investigated for reaction mechanism
05 p0810 A70-16051

Methyl methacrylate and other vinyl monomers polymerization activation by low sulfur dioxide concentrations, noting inert solvents effect
14 p2544 A70-30246

Polyvinyl alkyl ethers multiple transitions at low temperatures, using linear variable differential transformer
21 p3844 A70-42137

VIOLENCE

NT ATTACKING [ASSAULTING]

VIRGO STAR CLUSTER

Neutral atomic hydrogen in Virgo A cluster and between Galaxy and Virgo A, using emission and absorption measurements

04 p0758 A70-15707

Virgo XR-1 rocket observations, discussing X rays due to synchrotron emission of relativistic electrons

21 p3872 A70-40658

Balloon-borne measurements of hard X radiation from direction of Virgo

21 p3872 A70-40663

VIRIAL THEOREM

Upper mass limit of quasar in galactic cluster from velocity dispersion of galaxies using generalized form of virial theorem, determining B264 mass

02 p0372 A70-12245

Reduced second virial gas coefficients calculations by modified Lennard-Jones intermolecular potential function

12 p2180 A70-26860

Nonlinear least squares method reducing Burnett data to compressibility factors and virial coefficients

17 p3136 A70-35594

Compressibility factors and virial coefficients for He-N mixture, He and nitrogen at low temperatures and high pressures

18 p3290 A70-36250

Acoustic interferometer for speed of sound measurement in pure gases, determining second virial coefficient for Ar and N

21 p3828 A70-41766

Binary Boltzmann operator for quantum statistical second virial coefficient for real gases and plasmas in two-particle scattering problem involving Jost function

22 p4081 A70-42824

Virial theorem for magnetospheric dynamics, discussing boundary and ring currents and densities and geomagnetic sudden impulses and commencements

23 p4184 A70-43830

Ion-ion potential for sodium vapor for second virial coefficient as function of temperature at 1200-1700 K

24 p4381 A70-45649

VIRTUAL PROPERTIES

Seasonal variations of sporadic E virtual height at middle latitudes attributed to homospheric expansion depending on ozone amount

03 p0476 A70-13907

N body numerical integrator using virtual mass technique for computing trajectories with speed and accuracy suitable for spacecraft onboard computer applications

[AIAA PAPER 70-1057] 19 p3528 A70-38872

VIRTUAL WORK

U EQUILIBRIUM

VIRUSES

NT BACTERIOPHAGES

Bacterial and viral detection techniques in liquids based on specific property measurement relevant to biological particle, emphasizing industrial processing applications

01 p0013 A70-10127

Hematologic changes in mice associated with meningovirus infection and hypobaric hypoxia during barometric pressure changes

15 p2681 A70-31878

Coxsackie B virus as cause of myopericarditis in adults

17 p3025 A70-34860

Hypobaric hypoxia effects on MM virus infection resistance in mice

20 p3572 A70-39428

Viruses response to environmental exposure emphasizing temperature, humidity, light and extraterrestrial conditions

23 p4146 A70-44398

Hyperbaric oxygen effects on Coxsackievirus infection in mice

24 p4296 A70-45338

Visceral blood flow during exercise in sled dogs, testing hypothetical compensatory decrease as car-

diovascular reserve for skeletal muscle by biotelemetry

20 p3571 A70-39366

Kinesophilia mechanisms of motor-visceral integration in aging organism

22 p3969 A70-42902

VISCOELASTIC CYLINDERS

Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius enclosed in shell under pressure and unsteady temperature field

02 p0384 A70-11663

Solid viscoelastic cylinder bonded to thin elastic casing, analyzing normal and tangential stresses for stress and displacement frequency responses in forced transverse vibration

[ASME PAPER 69-WA/APM-20]

04 p0771 A70-14911

Stress analysis for nonlinear viscoelastic cylinder with ablating moving inner surface used to investigate propellant grain in solid fuel rocket under firing condition

[ASME PAPER 69-WA/APM-14]

04 p0771 A70-14914

Axisymmetrical stress-strain analysis of viscoelastic cylinder enclosed in elastic shell under internal pressure using singular kernels

05 p0933 A70-16207

Uncoupled quasi-static boundary value problem for linear viscoelastic solids undergoing thermal and mechanical deformation solved by computational algorithm

06 p1168 A70-17937

Stress-strain distributions in linear viscoelastic cylinder, reducing problem of hollow cylinder with moving inner boundary to Volterra integral equation

07 p1406 A70-19303

Strain and temperature fields interrelation effect on longitudinal wave propagation in viscoelastic cylinder, determining phase velocities and attenuation coefficients

09 p1781 A70-23285

Ablation and temperature effects in hollow viscoelastic cylinder

13 p2508 A70-28487

One dimensional analysis of stress and strain concentration resulting from longitudinal impact of viscoelastic rods

17 p3185 A70-34965

Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius enclosed in shell under pressure and unsteady temperature field

19 p3547 A70-38437

Long hollow nonlinear viscoelastic cylinder in elastic shell, calculating stress and strain under internal pressure

20 p3720 A70-39731

Cyclic thermal loading in viscoelastic spherical and cylindrical pressure vessels, investigating thermal frequency effect

21 p3937 A70-41430

U ELASTIC DAMPING

U VISCOUS DAMPING

VISCOELASTIC FLOW

U VISCOELASTICITY

VISCOELASTICITY

NT PHOTOVISCOELASTICITY

NT THERMOVISCOELASTICITY

Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dashpot model

[ASME PAPER 69-LUB-23] 01 p0101 A70-10384

Elongation and combined shear stresses in incompressible creeping plane flows of viscoelastic lubrication for squeeze-film bearings

[ASME PAPER 69-LUB-22] 01 p0101 A70-10385

Incompressible elastomer viscoelastic response to exponential extension ratio history in simple tension based on constitutive equations

01 p0201 A70-10893

Dynamic stability of simply supported column of linear viscoelastic materials under sinusoidal loading

01 p0206 A70-11148

Time dependence of contact zone radius of rigid sphere pressed against viscoelastic half space by normal force

02 p0384 A70-11738

Viscoelastic boundary value problems involving time dependent boundary regions reduced to elastic problems, starting with aging viscoelastic body

02 p0388 A70-12269

Arterial model with effects of thick walls, linear viscoelasticity and wall tethering for studying arterial mechanics

02 p0247 A70-12550

Integral equation solution in viscoelasticity theory based on creep tests with polymer containing elastic inclusion, improving convergence of approximations method

02 p0390 A70-12801

Mixed boundary value problem for viscoelastic body with constant Poisson ratio solved by variables separation method, proving convergence

02 p0390 A70-12802

Quasi-linear stress-strain deviators relations in viscoelastic theory, indicating kernels and functions determinable from creep relaxation loading and deformation tests

02 p0390 A70-12804

Material functions mathematical forms for Green-Rivlin constitutive equations of nonlinear viscoelasticity

03 p0585 A70-12970

First and second boundary value problems of steady vibrations of viscoelastic bodies reduced to algebraic equations

03 p0589 A70-13345

Unsteady temperature field induced stresses and strains in hollow viscoelastic sphere calculated by solving integrodifferential equation having right hand side dependent on time function

03 p0590 A70-13398

Approximate method of boundary perturbation to solve elasticity and viscoelasticity problems for non-canonical bodies of revolution applied to stress concentration at ellipsoidal cavity

03 p0591 A70-13439

Complex Young modulus of plastics during flexural vibration, discussing deformation of viscoelastic bodies and test results of various plastics

[ONERA-TP-715] 03 p0487 A70-13645

Laminar capillary jet of viscoelastic fluid discussing breakup, non-Newtonian jet stability and elastic properties

03 p0468 A70-13782

Impulsive and transient load disturbances in thin elastic finite circular plate on Pasternak type viscoelastic foundation

03 p0595 A70-13905

Visco-elastic column analysis based on mechanical model, investigating relationships between solid viscosities, loading velocities, initial deflections and dynamic buckling loads

03 p0596 A70-14146

Transverse vibration of viscoelastic polymethyl methacrylate column with initial curvature under periodic axial load, determining amplitude-frequency curves

[ASME PAPER 69-WA/APM-13] 04 p0772 A70-14915

Propagation and growth equations governing wave propagation in micropolar viscoelastic solids couplings between discontinuities in macroscopic and microscopic fields

05 p0929 A70-16063

Viscoelastic behavior of styrene-butadiene rubber under finite uniaxial and equal biaxial deformations for nonisothermal case

05 p0929 A70-16068

Integral constitutive relation representing incompressible viscoelastic materials and plane stress and strain conditions

05 p0930 A70-16087

Linear and nonlinear inelastic spherical inclusion in elastic and viscoelastic isotropic matrix with constant strain or stress fields at infinity

05 p0932 A70-16171

Averaging analysis of oscillations attenuation of relaxing one dimensional linear viscoelastic systems under external force at resonance applied to nonlinear multidimensional systems

05 p0933 A70-16208

Linear isothermal quasi-static theory for homogeneous and isotropic viscoelastic bodies with couple stresses

05 p0938 A70-16425

Hydrodynamic theory of elastic-viscous liquid lubrication for journal bearings, assuming stress-strain relationship with unequal cross stresses

05 p0855 A70-16509

Dynamic strength calculation for linear viscoelastic body and elastic-viscous liquid with retardation and relaxation times spectra respectively

05 p0940 A70-16511

Time-varying loads effect on linear elastically hereditary media described by generalized fractional-order exponential functions and Rzhantitsyn type viscoelastic kernels

05 p0946 A70-16954

Viscoelastic fluid flow through circular tube under time dependent pressure gradient superposed on steady Poiseuille flow

06 p1032 A70-17200

Dynamic response of free-free beams on viscoelastic Winkler foundation using complex foundation modulus based on antivibration isolator

06 p1165 A70-17627

Optimal linear viscoelastic synthetic sandwich structures, investigating test/calculation agreement for simply supported beams and embedded plates

[ONERA-TP-702] 07 p1404 A70-19137

Three dimensional nonlinear viscoelastic body stability under triaxial compression, extending results obtained for elastic body

07 p1408 A70-19542

- Computer procedures for solving temperature stresses in thin infinite isotropic viscoelastic plate with heat transfer
07 p1411 A70-19817
- Vibrating composite beam test method for determining complex dynamic modulus of viscoelastic materials over broad frequency and temperature ranges
07 p1320 A70-19955
- Viscoelasticity in shearing and accelerative flows by integral theory, discussing stress distribution and pressure drop
07 p1412 A70-20000
- Complex modulus measurement for rigid linear viscoelastic materials over audio frequency spectrum by harmonic end displacement ratio method
07 p1413 A70-20044
- Quasi-steady propagation of Prandtl crack in viscoelastic body, noting stress distribution identity for viscoelastic and elastic cases
07 p1414 A70-20181
- Uniqueness theorem for coupled dynamic problem of linear thermoviscoelastic theory assuming contact-type boundary conditions
07 p1416 A70-20296
- Viscoelastic perfectly plastic ring failure under uniform external pressure characterized by infinite strain rate occurring at finite value of ring deflection
07 p1416 A70-20300
- Membrane stress in thin circular viscoelastic ring under impulsive loads and internal heat, using stress-strain relation for linear Maxwell material model
08 p1589 A70-21311
- Bearing capacity increase due to large viscoelastic or normal stress effects in lubricants, obtaining exact results for noncavitating plane slider bearings
08 p1507 A70-21476
- Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity
08 p1485 A70-21639
- Stresses and strains in multilayer systems of viscoelastic materials showing aging solved by quadratures and Volterra equations, noting dependence on time
08 p1594 A70-21672
- Polybutadiene-ammonium perchlorate solid propellant BPT-1 mechanical properties viscoelastic analysis under constant strain rate tension
09 p1742 A70-22425
- Stress and displacement distribution formulas for two and three dimensional crack extension problems in linear viscoelastic body
09 p1775 A70-22611
- Longitudinal vibration of finite viscoelastic rod with changing boundaries under time-variant force, analyzing impulse response by transform calculus
09 p1777 A70-22833
- Velocity measurements with Pitot tubes in polymer solutions /polyethylene oxide/ in water, noting viscoelastic properties effect on measured pressure value
10 p1887 A70-24093
- Equilibrium equations integration for body in isotropic linear viscoelastic medium with contact-type boundary conditions
10 p1957 A70-24267
- Viscoelastic half plane creep under discontinuous boundary conditions, obtaining exact closed-form solution based on Fourier transforms and distribution theory
10 p1965 A70-25325
- Nonlinear viscoelastic turbulence model with monotone increasing time scale to predict behavior in homogeneous shear and in pure strain
11 p2040 A70-26544
- Relaxation functions of one dimensional viscoelastic linear and nonlinear materials having monotone decreasing time properties
11 p2141 A70-26556
- Stable and unstable crack growth in viscoelastic media, solving boundary value problem and continuum mechanics prediction of crack propagation
12 p2315 A70-27092
- Viscoelastic polymeric materials tensile failure under multiaxial loading
12 p2321 A70-27205
- Relaxation function of linear viscoelastic body, defining mechanical deformation process using Stieltjes integral
12 p2327 A70-28046
- Mixed boundary value problems involving time dependent boundary regions for penny-shaped crack in viscoelastic materials with one relaxation function
13 p2508 A70-28489
- Viscoelastic plate crack growth analysis within continuum mechanics framework as analog to Griffith problem
13 p2510 A70-28671
- Complex moduli of isotropic viscoelastic composites from elastic moduli
13 p2511 A70-28735
- Saint Venant principle in linear isotropic viscoelasticity of Toupin estimates for body of arbitrary shape to allow integration by parts
13 p2513 A70-28990
- Isothermal quasi-linear theory of viscoelastic isotropic continuum, considering constitutive equations
13 p2516 A70-29534
- First and second boundary value problems of steady vibrations of viscoelastic bodies reduced to algebraic equations
14 p2657 A70-30720
- Longitudinal temperature gradients effects on stress analysis in solid propellants, using viscoelastic data
14 p2627 A70-30755
- Viscoelastic fluid in Couette flow between coaxial cylinders and flow between fixed plane and rotating cone
14 p2567 A70-31358
- Wave propagation through Newtonian fluid in compressible thick walled viscoelastic tube, considering blood flow in arteries
15 p2691 A70-31938
- Mechanical model of arterial viscoelasticity effect on input impedance and wave travel in systematic tree
15 p2691 A70-31941
- Fiber reinforced viscoelastic composites complex elastic moduli derivation
15 p2816 A70-32003
- Viscoelastic-plastic solid delayed fracture associated with wedge formation of crazed material at crack tip
15 p2816 A70-32010
- Zero birefringent blend consisting of rigid and flexible polyesters with viscoelastic mechanical and optical response
15 p2765 A70-32318
- Muscular behavior analog simulation model from generalization of laws governing viscoelastic behavior of polymeric materials
15 p2693 A70-32820
- Constitutive equation for fiber reinforced viscoelastic materials, using continuum theory of mixtures
16 p2994 A70-34231
- Thermorheologically simple model for viscoelastic materials stochastic behavior in random temperature fields, introducing reduced time scale
16 p3003 A70-34238
- Viscoelastic materials cut growth, discussing strain, fracture and modulus of elasticity dependence on temperature variations
17 p3146 A70-35220
- Viscoelastic materials fracture strength as function of cut length, defect size and temperature
17 p3146 A70-35221
- Vibrations induced by frictional moving force in viscoelastic beam with free ends on elastic base, showing critical load dependence on damping
18 p3343 A70-36720
- Viscoelastic fluids stratified flow down inclined plane, examining liquids elasticity role in stability
19 p3403 A70-37531
- Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dash model
19 p3435 A70-37607
- Stress relaxation interpretation at wave fronts in one dimensional media by nonlinear viscoelastic models, giving constitutive equations
19 p3542 A70-38057
- Boundary value problem solution in nonlinear viscoelasticity by constitutive equations
19 p3544 A70-38330
- Discrete finite element models for nonlinear viscoelastic continua
19 p3458 A70-38358
- Equilibrium equations integration for body in isotropic linear viscoelastic medium with contact-type boundary conditions
19 p3547 A70-38395
- Variational principles in linear quasi-static theory of inhomogeneous and isotropic viscoelastic solids with microstructure
20 p3718 A70-39229
- Composite material dynamic properties, discussing modulus and damping during constant strain rate, viscoelasticity, fracture strength and high loading tests
20 p3731 A70-40048
- Elastoviscous incompressible electrically conducting oscillating free stream flow along infinite porous plate with suction in transverse magnetic field
20 p3685 A70-40508
- Elastic and viscoelastic plates, calculating stress concentration and separation of embedded smooth circular inclusion under uniaxial tension
21 p3932 A70-40548
- Integral equation of viscoelastic media with unstable properties, solving boundary value problems by approximation method
21 p3933 A70-40643
- Thermomechanical disturbances propagation in viscoelastic solids, investigating effects of viscous flow, second order strains and temperature dependent material properties
21 p3937 A70-41427
- Plane Poiseuille flow in second order Rivlin-Ericksen fluids with small viscoelastic parameters, calculating three dimensional disturbance stability
21 p3810 A70-42030
- Viscoelastic liquids state equations, surveying various fluid models
22 p4009 A70-42541
- Crack growth study in viscoelastic solids by linear continuum mechanics, discussing cyclic loads, composite solids mechanical behavior and thermodynamics
22 p4115 A70-42937
- Viscoelastic continuous shaft whirling motion, discussing boundary conditions and internal linear viscous damping
22 p4012 A70-42939
- Dynamic melt properties of polymer blends, using orthogonal rheometer measurements
22 p4058 A70-43076
- Viscoelastic strip in gas flow, analyzing stability conditions
22 p4117 A70-43353
- Equations of state in quadratic viscoelasticity for orthotropic media, deriving tensors of creep and relaxation centers
22 p4119 A70-43711
- Stress concentration near holes in nonlinear viscoelastic plate, using elastic theory
23 p4266 A70-43989
- Conducting viscoelastic fluid flow near harmonically oscillating nonconducting flat plate under uniform transverse magnetic field, considering stress-strain rate relationship
23 p4226 A70-44375
- Linear viscoelastic solid quasi-static deformation, deducing associated minimum principles under assumption of unique solutions existence for boundary value problems
24 p4420 A70-45264
- Conduit arteries viscoelastic properties in normal and hypertensive dogs from recorded pressure and diameter waves
24 p4299 A70-45808
- Viscoelastic laminated composite linear anisothermal theory, presenting homogeneous continuum model to describe dynamic characteristics
24 p4368 A70-45992
- VISCOMETERS**
Viscosity of nitrogen, hydrogen, Ar and He at high pressures measured by capillary flow viscometer with range extended to minus 100 C
04 p0718 A70-14697
- Nitrogen viscosity coefficient at high pressure, describing viscosimeter operation and kinetic theory calculations
20 p3738 A70-40140
- VISCOMETRY**
Plasma viscosity and aggregation effects on whole blood viscosity investigated in observation chamber for erythrocyte aggregation
09 p1622 A70-23546
- Viscometric Poiseuille or Couette flow kinematics, considering nonuniform shear rate
14 p2567 A70-31282
- VISCOPLASTIC FLOW**
U VISCOPLASTICITY
VISCOPLASTICITY
Wave propagation in nonlinear viscoplastic medium, deriving first order system of coupled equations in stress and particle velocity components
01 p2027 A70-11154
- Variational principles in dynamic viscoplasticity theory, based on operator approach combined with time independent variations in elasticity theory
02 p391 A70-12818
- Plastic-viscoplastic bar wave propagation due to longitudinal impact, analyzing stress profiles to determine effect of strain rate
05 p0926 A70-15913
- Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution
07 p1252 A70-18670
- Rigid viscoplastic incompressible fluid flow governed by system of variational inequalities involving Navier-Stokes equations
08 p1482 A70-20590
- Flow rule for viscoplastic symmetric cylindrical shells, using constitutive equations for strain rate sensitive materials based on Huber-Mises yield condition
10 p1954 A70-24020
- Large deflections in impulsively loaded clamped circular Al alloy and steel viscoplastic plates
13 p2511 A70-28736
- Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution
15 p2718 A70-31462
- Viscoelastic-plastic solid delayed fracture associated with wedge formation of crazed material at crack tip
15 p2816 A70-32010
- Elastoviscoplastic medium filled half space motion under pressure front moving along surface with time

varying velocity, analyzing penetrating wave fronts form 16 p2990 A70-33780

One dimensional elastoplastic wave propagation in rate-sensitive viscoplastic rod with thermal gradient 17 p3185 A70-34966

Viscoplastic solids, computing plane shock wave propagation structure from nonlinear constitutive relations 18 p3338 A70-36435

Three dimensional dynamic analysis of small harmonic stress wave propagation in elastic-plastic and viscoplastic materials, using finite differences 18 p3344 A70-36724

Elastic-viscoplastic bar quasi-static torsion problem, using approximate method for time dependent torsion function 24 p4425 A70-45993

VISCOSITY

NT EDDY VISCOSITY
NT GAS VISCOSITY

Steady state spherically symmetric model for solar plasma acceleration with distance, showing essential role of viscosity 01 p0172 A70-11519

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers 01 p0069 A70-11624

Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle 01 p0069 A70-11627

Newtonian liquid lubricated spiral groove bearing load capacity and power loss dependence on viscosity variations with temperature [ASLE PREPRINT 69-LC-21] 02 p0309 A70-12533

Viscosity anisotropy in fluid matrix suspensions of parallel rigid flakes as function of flake content and width-to-thickness ratio 03 p0515 A70-13122

Niobium powder hot pressing compaction in terms of porous body volume viscous flow, determining viscosity shift time dependence 04 p0696 A70-14461

Load capacity and power loss of spiral groove bearings lubricated by incompressible liquid with temperature-dependent viscosity, using momentum and energy equations 05 p0853 A70-15778

Relation between Fourier harmonics equilibrium distribution and bulk viscosity and second thermal conductivity established in critical regions of liquid-vapor condensation and mixing 05 p0958 A70-16550

Bivalent cations effect on crystallization and viscosity of glazed glass 05 p0871 A70-16592

Time-temperature relation necessary to fine Libyan desert glass and remove gas bubbles calculated by viscosity determination at various temperatures 05 p0843 A70-16833

Rheology applied to motor oil viscosity, elastohydrodynamic (EHD) and extremely thin film lubrication, examining viscosity relationship to film thickness 07 p1293 A70-18954

Temperature gradients, viscosity and conduction measurements in air stream between parallel plates, investigating limiting value of total Prandtl number 07 p1260 A70-19999

Thermal convection determination in earth, Venus, Mars and moon interiors based on thermal stability analysis, obtaining viscosity depth profiles 07 p1272 A70-20203

Ultrasonic testing of hydraulic liquids and aircraft and engine lubricating oils resistance to viscosity decrease, analyzing large molecule compounds disintegration 09 p1693 A70-23405

Lubricating oils viscosity deterioration during sliding motion in machines determined by quantitative evaluation 09 p1693 A70-23407

Irreversible viscosity decrease and thermal stability in polymer-containing lubricating oils under shearing forces effect 09 p1693 A70-23408

Synthetic silicate liquid viscosity with lunar rock composition compared with volcanic rock on earth 10 p1938 A70-24074

Kinematic viscosity of molten steel containing corundum inclusions as function of temperature 10 p1904 A70-24271

Brownian motion for large viscosity, deriving modified Fokker-Planck equation based on quasi-Huygens relation 11 p2084 A70-26398

Heat conduction and viscosity effects on compressible fluids characteristics 11 p2037 A70-26399

Complex viscosity relationship to steady state shearing in Maxwell Orthogonal Rheometer 11 p2041 A70-26560

Magnetopause representation by mixing region of plasma streams with different velocities and magnetic fields, assuming hydromagnetic viscosity caused by wave-particle interactions 11 p2114 A70-26563

Thermally ionized cesium plasma viscosity at high temperatures in vacuum using capillary tube assembly 11 p2092 A70-26731

Viscosity variation factor at film inlet in fluid square taper pad bearing investigated by modified Reynolds equation 13 p2418 A70-28746

Aliphatic diesters as high temperature lubricants, discussing viscosity range extension, oxidation inhibition and thermal stability 13 p2438 A70-29125

Viscosity coefficient for isotropic turbulence using quasi-self-similar solution 13 p2391 A70-29777

Fluid quantum corrections to viscosity, thermal conductivity and diffusion, expanding Wigner operator in Planck constant 14 p2665 A70-30655

Laminar compressible flat plate boundary layer dependence on Prandtl number and viscosity-temperature relations 16 p2893 A70-33673

Motion perturbation equations for guided space vehicles, allowing for sloshing liquid propellant viscosity effects 18 p3332 A70-36160

Viscosity effect on turbulent supersonic underexpanded jet flow into submerged region 18 p3206 A70-36262

Energy dissipation and viscosity effects on isotropic turbulence in extreme short wave region at large Reynolds numbers 18 p3239 A70-36263

Small viscosity and heat conductivity in solutions to critical layer in stratified shear flow 20 p3608 A70-39447

Materials viscous failure at various temperatures and stresses, discussing damage accumulation 20 p3725 A70-39870

Viscosity and vessel geometry effects on fluids natural and forced oscillation, taking surface tension into account 20 p3614 A70-40438

VISCOUS DAMPING

Three-body gravity gradient satellite orbital plane motion analysis, studying transient damping of proposed tethered orbiting interferometer/TOI 02 p0383 A70-12781

Linear isothermal response of viscously damped thin homogeneous polygonal plates subjected to uniform dynamic loading, calculating forced solutions by numerical integration 03 p0601 A70-14318

Random vibrations of linear system with viscous damping excited by stochastically acting force with monotonically varying frequency, using correlation method 05 p0882 A70-16372

Initial disturbances propagation in gas mixtures by asymptotic analysis, observing diffusely and viscously damped modes 05 p0833 A70-16404

Viscous damping effect on aeroelastic stability of thin plate in inviscid compressible airstream, observing instability in subsonic and supersonic flow 05 p0941 A70-16517

Vibration damping by sandwich structure consisting of viscoelastic layer between two high Youngs modulus metal sheets 07 p1401 A70-18845

Dissipative heating effects on loss factor of viscoelastically damped beam, discussing stiffness effects [ASME PAPER 69-VIBR-37] 08 p1592 A70-21478

Torsional vibrations frequency calculations for multibranch system exhibiting linear rigidity and viscous damping, constructing algorithm for digital computer 09 p1783 A70-23409

Temperature effect on plate damping by constrained viscoelastic layers, emphasizing transition and operating temperature compatibility 10 p1962 A70-25063

Metal plates vibration under viscoelastic damping layers using electromagnetic transducer and impact excitation 11 p2145 A70-26702

Vibration control by alternate layers of high damping viscoelastic material, discussing damping and loss factors, beams design and attachment 13 p2513 A70-29079

Fluid flow damping in flexible liquid filled foams at various frequencies and temperatures 15 p2765 A70-31967

Infinite elastic plates traveling wave flutter in compressible flow, investigating viscous damping effects on critical flow velocity 18 p3343 A70-36701

Constrained viscoelastic layer optimal length for vibration damping of metallic structures 19 p3536 A70-37696

Axisymmetric dual spin spacecraft consisting of nonconcentric frictionlessly mounted cylinders equipped with viscous damping mechanisms, evaluating stability criteria by energy method [AIAA PAPER 70-973] 20 p3715 A70-39556

Supersonic nozzle damping, replacing parameters discontinuities across shocks by continuous variations 21 p3745 A70-41442

Viscoelastic continuous shaft whirling motion, discussing boundary conditions and internal linear viscous damping 22 p4012 A70-42939

Shock response of passive nonlinear elastic isolators under pulse excitation with viscous damping 22 p4117 A70-43249

Nonlinear systems subharmonic oscillations under polyharmonic disturbance and viscous damping 24 p4427 A70-46378

VISCOUS DRAG

Low Reynolds number flow of variable property gas past infinite heated circular cylinder at large temperature differences, measuring drag on cylinder 05 p0789 A70-16014

Free molecular drag for flat plate with normal protuberance, determining flowfield distribution functions and stress components 06 p0981 A70-18357

Drag coefficients of sharp and blunt cones in rarefied supersonic flow for bluntness ratios and angles of attack 06 p0981 A70-18360

Drag on infinite cylinder in hypersonic nearly free molecular flow for various angles of attack, using kinetic approach 06 p0983 A70-18380

Drag and heat transfer predicted by kinetic theory for rarefied gas flow over sphere at low Mach numbers, analyzing flow field 06 p0984 A70-18381

Hypersonic rarefied gas flow near stagnation point investigated to predict drag on sphere in high speed gas stream with densities in transition regime 06 p0984 A70-18382

Flow field around and drag on sphere rising axially through rotating viscous fluid 09 p1663 A70-23676

Viscous friction force moments effect on gyroscopic drift in gimbal suspension during base angular vibrations, obtaining drift velocity 15 p2738 A70-32153

Laminar viscous effects over blunt cones at hypersonic conditions, taking into account first and second order boundary layer theories 20 p3559 A70-40285

Hypersonic viscous effects on space shuttle entry trajectory, measuring lift and drag in free flight regime 23 p4258 A70-44526

VISCOUS FLOW

NT BOUNDARY LAYER FLOW

NT BOUNDARY LAYER SEPARATION

NT COUETTE FLOW

NT REATTACHED FLOW

NT SECONDARY FLOW

NT SEPARATED FLOW

NT STOKES FLOW

Viscous fluid flow due to long flat plate moving rectilinearly inside cylinder, assuming zero pressure gradient 01 p0062 A70-10801

Conservation laws for viscous incompressible two dimensional and axisymmetric flow written in integrodifferential form 01 p0063 A70-10935

Incompressible slow viscous nonNewtonian flow with free surface solved by finite element method, showing computerized results for squeezed fluid between two plates 01 p0066 A70-11131

Incompressible viscous fluid flow in contact with infinite plate and rotating in perpendicular magnetic field, obtaining flow characteristics by Laplace transform 01 p0067 A70-11138

Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas 01 p0068 A70-11579

Short sound waves propagation in moving inhomogeneous medium, studying viscosity and heat conductivity influence 01 p0146 A70-11581

Navier-Stokes difference equations numerically integrated by computer for viscous fluid flow along parallel flat plate at low Reynolds number 02 p0277 A70-11909

Dissipation spectrum /viscous dissipation of turbulent kinetic energy as function of wave number magnitude/ data compared and plotted 02 p0327 A70-12294

Computer application to Navier-Stokes equations numerical integration for incompressible viscous fluid deflected flow with large Reynolds number 02 p0287 A70-12376

Small parameter method for reducing self similar viscous flow problems to ordinary third order differential equation 02 p0287 A70-12376

ferential equations with boundary conditions at wall and infinity

02 p0288 A70-12821

Motion stability and time dependent deflections of thin flexible cylinder with zero bending rigidity in viscous stream

03 p0595 A70-13783

Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations

03 p0468 A70-13867

Viscous compressible heat conducting laminar perfect gas flow in slender axisymmetric channels with adiabatic walls, using equations of motion

03 p0471 A70-14383

Viscous inlet flow into straight channels, studying velocity profiles at low Reynolds numbers

[ASME PAPER 69-APM-Q] 04 p0668 A70-14863

Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection

04 p0671 A70-15013

Fluid mechanical problems with pressure distribution determined by interaction between external supersonic inviscid flow and inner laminar viscous layer

04 p0674 A70-15529

Viscous shock layer at hypersonic blunt body stagnation point, applying finite difference and nonlinear overrelaxation methods to seven species air model

04 p0620 A70-15539

Mass transfer and viscous interaction combined effects on axisymmetric hypersonic flow of perfect gas over slender bodies

[AIAA PAPER 68-717] 04 p0675 A70-15576

Model flow studied for viscous flow near trailing edge of semiinfinite flat plate in middle of moving channel, noting Couette flow tendencies

05 p0831 A70-15879

Vertically propagating waves in viscous isothermal atmosphere taking into account reflection due to nonlinearities and time dependence

05 p0833 A70-16679

Viscous frictional torque on inner cylinder of eccentrically rotating concentric cylinders measured from laminar to turbulent flow

06 p1074 A70-17134

Viscous core of incompressible swirling flow through nozzle using momentum-integral equations

[AIAA PAPER 70-51] 06 p1038 A70-18079

Viscous radiating flowfield coupled with ablation for computations on blunt body entering earth atmosphere at interplanetary return velocities

06 p0970 A70-18090

Closed form solution of modified inviscid transonic equation embodying character of viscous-transonic equation applied to shockless transonic airfoils

[AIAA PAPER 70-187] 06 p0970 A70-18096

Laminar viscous flow on rotating propeller and helicopter rotor blades, studying crossflow and unsteady boundary layer effects, separation, transition, etc

[AIAA PAPER 70-50] 06 p0974 A70-18161

Impact tube test to find empirical equation for correcting effect of shear in displacing effective pressure center in viscous flow

06 p1052 A70-18383

Model for predicting laminar-turbulent transition point in hypersonic wake of two dimensional laminar viscous flow

06 p0985 A70-18499

Peristaltic motion of viscous incompressible fluid, applying long wave approximation to two dimensional urine flow model

07 p1219 A70-19247

Book on mathematical theory of viscous incompressible flow covering stationary and nonstationary boundary value problems for linearized and nonlinear Navier-Stokes equations

07 p1258 A70-19697

Viscous hypersonic flow past sphere in presence of strong injection through front surface at large Reynolds numbers using asymptotic method

07 p1189 A70-20146

German book on fluid dynamics for nonelectrical fluids covering viscosity effects, Prandtl boundary layer, turbulence and aerodynamics

08 p1431 A70-20751

Boundary value problem solution in study of axisymmetric viscous heat conducting gas flow past body of revolution

08 p1431 A70-20854

Gas flow influence on wave characteristics of thin viscous liquid layers pulled by gravity vertical surface compared with water layer experiments

08 p1482 A70-20917

De Laval nozzle behavior in vacuo, discussing flow rate parameters, viscosity and real gas effects, thermal effects, turbulent jet separation and reattachment, etc

[AGARDGRAPH-120] 08 p1434 A70-21932

Simple molecules viscosity as function of temperature and density using empirical equation

09 p1731 A70-22292

Hypersonic laminar boundary layer in strong viscous interaction region on wedge, determining

velocity and enthalpy profiles, displacement thickness and induced pressure distributions, etc

09 p1606 A70-23294

Stress tensors in initial value problem for incompressible flow with nonlinear viscosity

09 p1663 A70-23570

Laminar viscous flow past semiinfinite flat plate parallel to uniform stream, solving Navier-Stokes equation to determine local skin friction coefficient

09 p1663 A70-23581

Steady and unsteady viscous incompressible one dimensional flows parameters in deformable cylindrical tube determined, solving continuity and motion equations by Galerkin method

09 p1664 A70-23715

One dimensional Navier-Stokes equations solution for viscous heat conducting gas flow involving spherical sink for finite pressure at infinity

10 p1865 A70-24104

Plane steady flows characteristics of incompressible viscous fluids in rigid walled rectangular channels found asymptotic to Poiseuille and Couette flows

10 p1866 A70-24112

Viscosity and heat conductivity effects in compressible fluid flow past finite body showing dependence on spatial dimensions

10 p1800 A70-24135

Viscous transonic flow past wavy wall analyzed by approximate method for inviscid transonic equation

10 p1800 A70-24137

Rigid body mode of viscous incompressible fluid flow response to small perturbations of rotating spheroidal container, applying torque interaction

10 p1868 A70-24196

Viscous incompressible flows nonlinear stability theory, considering perturbed flows tending toward stationary or flow periodic in time

[ONERA-TP-802] 10 p1869 A70-24542

Hypersonic viscous interactions on insulated slender cone with mass injection assuming perfect gas flow and negligible transverse curvature effects

10 p1803 A70-24821

Linear viscous theory of steady rotating fluid flows with nonlinear modification of boundary layers, considering inertial modifications

11 p2036 A70-26011

Stability analysis using energy method applied to Navier-Stokes equations for unsteady viscous flow

11 p2042 A70-26849

Mathematical model for describing flow in Hele-Shaw cell, predicting attached viscous shear layers in lifting body wake

13 p2338 A70-28818

Viscous and compressible fluid flow in presence of plane plate

13 p2389 A70-29489

High Mach number viscous flow past cylinder with cylindrical shock wave

13 p2391 A70-29970

DMC computer code for simulation of two dimensional viscous incompressible flow about arbitrarily shaped bodies

14 p2527 A70-30271

Velocity difference across viscous tail in MHD flow, demonstrating exponential decay

14 p2623 A70-30992

Nonstationary MHD Couette flow of viscous incompressible fluid between two parallel walls caused by instantaneous fluctuations of applied transverse magnetic field

15 p2777 A70-31479

Hydromagnetic viscous flow of incompressible conducting fluid due to electric current radial divergence from point source

15 p2780 A70-32426

Laminar boundary layer model for viscous losses during transient turbulent liquid flow in tube, assuming slug flow for core

[ASME PAPER 70-FE-8] 16 p2891 A70-33627

Boundary value problem of two dimensional Poisson equation solution procedure with Hockney formulas, applying to unsteady viscous incompressible flow past flat plate

16 p2943 A70-33737

Viscous absorbing emitting shock layer in blunt body stagnation region, calculating skin friction and radiative heat transfer

[AIAA PAPER 70-868] 16 p2999 A70-33911

Mathematical model of pulsatile viscous entrance flow in thick walled elastic tube, investigating flow development effects in large arteries

17 p3035 A70-34471

Hypersonic viscous interaction on curved surfaces, extending Cheng inclined flat plate analysis

[AIAA PAPER 70-782] 17 p3007 A70-34474

Hypersonic cruise vehicles viscous interactions areas, examining compression corners, shock interactions, laminar and turbulent flow, boundary layer separation, etc

[AIAA PAPER 70-781] 17 p3007 A70-34475

Two dimensional solidification of forced viscous flow over flat plate with constant heat removal

17 p3194 A70-34634

Shock wave and viscous layer structures ahead of blunt body in rarefied hypersonic flow, using continuum theory

17 p3009 A70-34698

Two dimensional hypersonic viscous flow, analyzing viscosity and bluntness induced pressure effects

17 p3010 A70-35034

Viscous heat-conducting one dimensional piston driven gas flow, assuming sharp shock discontinuity

17 p3075 A70-35890

Viscous hypersonic flow around nonslender bodies with mass supply at small Reynolds numbers, using thin shock layer model

18 p3206 A70-36259

Incompressible heavy fluid film stability during flow along inclined plane constituting crystallization front, analyzing linearized equations of perturbed flow

18 p3240 A70-36271

Boundary value problem for Navier-Stokes equations of viscous incompressible fluid flow, discussing convergence of iterative solution

18 p3241 A70-36290

Magnetohydrodynamic flow of electrically conducting viscous incompressible fluid past nonconducting semiinfinite flat plate under transverse magnetic field

18 p3295 A70-36431

Two dimensional time dependent solution for impulsive motion of circular cylinder involving viscous cross flow at moderate angles of attack

18 p3207 A70-36454

Viscous supersonic flow near sharp convex corner, discussing visual observation and quantitative surveys of velocity and pressure profiles

18 p3208 A70-36659

Turbulent viscoseal with gas-liquid interface, using recirculation loop for gas ingestion reduction

[ASLE PREPRINT 70AM 5C-4] 19 p3439 A70-38804

Pressure and temperature distribution in constant volume viscous Poiseuille gas flow velocity profile

20 p3608 A70-39121

Unsteady viscous flow of incompressible fluid through porous straight channel under time varying pressure gradient, determining suction and injection effects

20 p3609 A70-39670

Energy dissipation in laminar unsteady incompressible viscous fluid flows, discussing velocity fields, boundaries, tangential motion and entrainment

20 p3614 A70-40402

Viscous magnetofluidynamic one dimensional annular flow, reducing three dimensional field equation to coupled linear partial differential equations

21 p3855 A70-40889

Subcritical viscous flow around arbitrary airfoils, calculating boundary layer effect on pressure distribution from inviscid flow approximation

21 p3744 A70-40924

Thermomechanical disturbances propagation in viscoelastic solids, investigating effects of viscous flow, second order strains and temperature dependent material properties

21 p3937 A70-41427

Two dimensional unsteady viscous incompressible MHD flow past infinite flat plate with uniform suction, considering Hartmann and Reynolds numbers

21 p3858 A70-41450

Steady viscous flow past oblique flat plate at high Reynolds number, using Oseen linearized approximation

21 p3809 A70-41714

Viscous gas flow through Laval nozzle, calculating velocity coefficient and pressure recovery in contracting and expanding parts

21 p3746 A70-41774

Viscous laminar parallel flow along cylindrical surfaces, discussing boundaries described by algebraic polynomials

21 p3810 A70-41959

Navier-stokes equations solutions in two way flows of Newtonian fluids with constant kinematic viscosity

21 p3810 A70-41961

Nonparallel viscous incompressible fluid flows in channel between parallel porous plates with suction and blowing respectively, calculating stability by numerical solution

21 p3811 A70-42216

Viscous incompressible fluid flow between two rotating concentric spheres, calculating stability

21 p3811 A70-42217

Viscous transonic flow past cascades by semiempirical approach, discussing pressure distribution, boundary layer parameters and compression shock

22 p4088 A70-42343

Viscous flow field in pneumatic vortex rate sensor, discussing boundary layer parameters, velocity profiles and swirling flow theory

[ASME PAPER 70-FLCS-16] 22 p4007 A70-42411

Hypersonic viscous interaction between laminar boundary layer growing over flat plate and external flow field extended to curved surfaces

22 p3958 A70-42688

Twisted incompressible viscous fluid flow in conical diffuser described by differential equation system, considering flow velocity field and separation point 23 p4133 A70-44159

MHD incompressible viscous flow in nonconducting circular tube, determining pressure, flow rate and magnetic field level by continuum theory concepts 23 p4224 A70-44161

Navier-Stokes equations for discrete flows of viscous fluids, using grid cell representation 23 p4181 A70-44220

Optimum thickness ratio and minimum drag of slender bodies in hypersonic viscous flow as function of altitude 23 p4134 A70-44571

Heat transfer and viscous flow pedagogy, discussing classroom use of remote time sharing computer terminals 23 p4166 A70-44642

Viscous compressible gas flows in pipe initial section, calculating friction and heat transfer coefficients 23 p4135 A70-44734

Velocity profile in viscous sublayer at wall based on maximum stability principle applied to Karman constant for turbulent channel flow 24 p4325 A70-45495

Two dimensional incompressible laminar free jet, analyzing higher order viscous interactions with surrounding fluid by matched asymptotic expansions method [AIAA PAPER 70-1321] 24 p4326 A70-45944

Viscous fluid two dimensional steady natural convection between horizontal concentric cylinders for low Grashof numbers 24 p4429 A70-46007

Viscous heat conducting compressible fluid flow past slender axisymmetric body, presenting Navier-Stokes hypersonic strong interaction theory 24 p4289 A70-46020

Momentum source interaction with viscous uniform stream, constructing perturbation solutions from nonlinear equations 24 p4327 A70-46040

Viscous flow stability between two concentric rotating porous cylinders, calculating critical Taylor numbers for wave numbers and velocity ratios 24 p4328 A70-46366

Surface temperature distribution of heat generating solid body in contact with parallel viscous fluid flow 24 p4430 A70-46368

VISCOUS FLUIDS

Vortex diffusion in viscous compressible fluid, deriving nonlinear differential equations from density velocity and pressure discontinuities considerations 01 p0060 A70-10145

Transient heat transfer near two dimensional stagnation point in viscous incompressible fluid steady flow 01 p0002 A70-10457

Navier-Stokes hypersonic weak interaction theory for viscous heat conducting compressible fluid flow past slender axisymmetric body 01 p0003 A70-11097

Resonance amplification theory of standing interfacial gravity waves in viscous fluids applied to obtain wavelengths prediction of atmospheric bow waves 01 p0081 A70-11299

Body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body 01 p0068 A70-11576

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions 01 p0068 A70-11603

Turbulent viscous fluid flow characteristics obtained from integrating Navier-Stokes equation for unsteady flow with periodic momentum variation 01 p0069 A70-11626

Incompressible viscous fluid plane flow using series expansion 02 p0277 A70-11910

Incompressible viscous fluid rectilinear flow along arbitrary cross section duct under pressure gradients oscillating at large frequencies 03 p0468 A70-14147

Navier-Stokes boundary value problem describing viscous incompressible fluid flow between coaxial fixed and rotating cylinders, emphasizing stability analysis 03 p0470 A70-14242

Electrical and mechanical instability of jets, threads and sheets of viscous fluid, noting role of deceleration 03 p0471 A70-14253

Viscous ideal gas supersonic flow past spheres, using integral relations based on Navier-Stokes equations 04 p0613 A70-14606

Forced vertical oscillations in viscous stratified fluid, showing phase angle dependence on amplitude and relation to Brunt-Vaisala frequency 04 p0666 A70-14611

Lateral vibrations of rigid rotating shaft in viscous fluid using inner and outer expansions method, considering small amplitude vibration and fast rotation 04 p0769 A70-14865

Small parameter method applied to numerical solution of conformal mapping and viscous fluid motion problems 04 p0719 A70-14960

Hydromagnetic flow of viscous incompressible electrically conducting fluid near accelerated infinite porous flat plate with variable suction or injection 04 p0672 A70-15095

Viscous gas self similar channel flow with heat transfer at wall corresponding to fixed Mach number profile in all channel cross sections 04 p0673 A70-15231

Hypersonic viscous gas flow past power law bodies under viscous interaction between boundary layer and inviscid flow extended to slender bodies 04 p0618 A70-15240

Electrically driven jets of slightly conducting viscous fluids drawn from conducting tubes, discussing cylindrical soap film instability under radial electric field 05 p0831 A70-15917

Dynamic strength calculation for linear viscoelastic body and elastic-viscous liquid with retardation and relaxation times spectra respectively 05 p0940 A70-16511

Linearized MHD equations for motion of solids in viscous and electrically conducting fluids 06 p1120 A70-17532

Heat transfer from constant temperature and heat flux surfaces to viscous fluids with high Prandtl numbers, considering transient and steady state flow 06 p1176 A70-17687

Velocity, magnetic field and drag equations for steady incompressible viscous conducting fluid flow around spherical hollow shell 06 p1122 A70-17917

Axisymmetric motion of viscous heat conducting gas by constructing indirect analog of Poiseuille gas flow, applying results to slip flow regime 06 p1048 A70-18325

Container fluid viscosity effect on container-obstacle interaction solved in Fourier series form 07 p1252 A70-18676

Viscous fluid flow calculations in fine clearance eccentric annuli allowing for pressure losses in laminar or turbulent flows 07 p1293 A70-19120

Rigid rotating cylindrical shaft vibrations along diameter in viscous fluid using inner and outer expansions method [ASME PAPER 69-APM-S] 08 p1589 A70-21307

Motion of body with cavity completely filled with viscous fluid about center of mass in potential mass-force field, applying small parameter method 08 p1546 A70-21630

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method 08 p1485 A70-21632

Heat transfer in MHD channel flow of viscous incompressible rarefied gas with slip flow and temperature jump boundary conditions 08 p1554 A70-21769

Cauchy problem solution for linearized Navier-Stokes equations of incompressible rotating viscous fluid, discussing velocity and angular momentum effect on asymptotic behavior 09 p1659 A70-22326

Acoustic radiation produced in response to harmonically oscillating circular cylinder rotating in viscous fluid solved within Lighthill-Curle formalism for aerodynamically generated sound 09 p1726 A70-22391

Navier-Stokes equation for plane unsteady axisymmetric rotation of viscous fluid in steady radial flow from source or sink 09 p1660 A70-22437

Motion and continuity equations for unsteady two dimensional flow of incompressible viscous fluid along infinite flat plate with time dependent suction 10 p1862 A70-23877

Numerical methods of viscous liquid dynamics, considering unsteady flow in simply and multiply connected regions 10 p1866 A70-24110

Viscous fluids nonlinearized thermodynamical description with equilibrium state defined by two parameters, expressing angular momentum density by momentum density 10 p1967 A70-24153

Potential flow resistance theory, deriving monoparameter wake formula for circular cylinder moving through viscous fluid 10 p1870 A70-24788

Viscous compressible fluid steady laminar flow between coaxial cylinders, studying flow characteristics for uniform inner cylinder velocity 10 p1870 A70-24792

Nonlinear disturbance decay in unbounded viscous fluid calculated by iterative solution of Navier-Stokes equations 10 p1871 A70-24854

Viscous fluid dynamics for reducing hydrodynamic resistance, discussing aquatic animals speeds, vortex flows, etc 10 p1871 A70-25193

Viscous incompressible fluid secondary steady state flow due to rotating spheroid, considering acceleration terms in Stokes linear equation solution 11 p2034 A70-25390

Flow formation in Couette motion of viscous fluids containing suspended rigid spherical particles using theory of fluids with microstructure 11 p2037 A70-26169

Stability of MHD dissipative circular flow of viscous electrically conducting fluid between concentric stationary cylinders impressed with axial magnetic and radial electric fields 12 p2277 A70-27195

Transient flow of viscous incompressible fluids with free surfaces calculated using Lagrangian coordinates 12 p2210 A70-27425

Differential equations of motion of manometers in log instrument systems with allowance for viscous liquid in sensor and pulse line 12 p2234 A70-27567

Thermal boundary layer equations solved for compressible gas at rotating axisymmetric surface with viscosity as linear function of temperature 12 p2331 A70-27698

Oscillating infinite cylinder as acoustic waves source in homogeneous viscous medium, deriving scalar and vector potentials 12 p2274 A70-28240

Nonlinear effects of oscillatory disturbances produced by viscous excitations in rotating fluid inside of cylindrical tank 13 p2386 A70-28819

Viscous and inviscid incompressible fluids motion boundary value problems solutions with aid of kinetic stress functions 13 p2388 A70-29319

Incompressible, viscous and electrically conducting fluid flow due to rotating disk in uniform magnetic field, discussing hydromagnetic interaction effect on velocity and friction 13 p2465 A70-29544

Meniscus curvature correlation to viscosity contrast in capillary during fluid displacement 13 p2390 A70-29633

Container fluid viscosity effect on container-obstacle interaction solved in Fourier series form 15 p2719 A70-31468

Thermal convection formation in viscous fluid plane horizontal layer from measurements of unsteady temperature field 15 p2824 A70-31591

Incompressible viscous fluid steady flow admission into bounded space from cylindrical tube, demonstrating solvability of plane and three dimensional versions 15 p2720 A70-31642

Rheological calculation of plate resistance and heat transfer in laminar flow of structurally viscous fluids 15 p2827 A70-32126

Viscous incompressible fluid nonstationary flow boundary layer extension around porous plate at Prandtl number equal to unity 15 p2722 A70-32873

Incompressible viscous fluid divergent turbulent flow detection in conical tube of revolution based on measuring wall pressure differences along tube generatrix 16 p2894 A70-33849

Sphere slow motion in viscous fluid with solid particle suspension, considering Stokes flow pattern small relaxation time perturbation 16 p2896 A70-34272

Free convection in compressible viscous heat conducting fluid, determining parameters leading to onset 17 p3198 A70-35697

Viscous incompressible liquid two dimensional flow around flat plate, discussing visualization techniques and velocity distribution measurement 18 p3239 A70-36218

Flow stability of incompressible heavy viscous fluid along wall of vertical circular cylindrical pipes, relating flow parameters to stability 18 p3240 A70-36278

Thermodynamics of thermoviscous fluids based on Riemannian space time notions and balance laws of general theory of relativistic continuum mechanics 18 p3479 A70-37592

Boundary value problems in MHD, considering viscous and nonviscous fluids 19 p3406 A70-38445

Viscous dielectric incompressible fluid cylinder capillary stability under small axisymmetric disturbances and axial electric field, deriving perturbed fluid flow equations 19 p3406 A70-38445

Unsteady flow and heat transfer in viscous incompressible fluid due to infinite porous cylinder oscillations about axis with suction at surface 19 p3406 A70-38445

Viscous incompressible electrically conducting fluid steady flow between parallel coaxial rotating disks with transverse magnetic field 19 p3481 A70-38446

Steady compressible supersonic planar flow of viscous heat conducting fluid under linearization freestream conditions, describing slip flow past finite flat plate 20 p3557 A70-39228

Viscous fluid motion equations through anisotropic nonrigid porous solid, discussing blood flow in capillary vessels and extracellular fluid through interstitial space 21 p3768 A70-40776

Viscous fluid cylinders electromagnetodynamic stability, discussing viscous forces effects 21 p3858 A70-41699

Viscoelastic liquids state equations, surveying various fluid models 22 p4009 A70-42541

Hall effect on incompressible electroconducting viscous fluid motion past finite conducting flat plate, discussing boundary conditions 23 p4225 A70-44247

Thermal convection formation in viscous fluid plane horizontal layer from measurements of unsteady temperature field 23 p4277 A70-44278

Solid particles interactions during entrainment by viscous incompressible fluid in pipe, calculating interaction force as function of radius, distance and Reynolds number 23 p4181 A70-44310

Poisson kinematic equations solution of symmetric gyrost at in viscous medium for free rotor and constant angular speed, using perturbation technique 23 p4220 A70-44560

Partially ionized viscous plasma longitudinal wave propagation, formulating motion equations for electrons, ions and neutrals from Maxwell and Boltzmann equations 23 p4229 A70-44987

Particle motion in constant density dynamic viscosity random translational velocity field 24 p4324 A70-45139

Viscous conducting liquid forced vortex motion, considering radial velocity distribution and rotation effect on free surface shape 24 p4383 A70-45140

Oscillating viscous conducting fluid laminar flow between parallel nonconducting infinite porous flat plates under suction in transverse magnetic field 24 p4383 A70-45146

Incompressible viscous fluid two dimensional flow in absence of mass forces, considering Tollmien-Schlichting wave perturbation effect on flow stability 24 p4324 A70-45365

Sphere rotating in viscous fluid at rest, investigating surrounding flow field from creeping flow to turbulent boundary layer 24 p4326 A70-45989

Temperature profiles for viscous fluid contained between two concentric rotating porous cylinders 24 p4327 A70-46005

VISIBILITY

NT LOW VISIBILITY

K factor analysis of target visibility, considering target size contrast, background luminance, glare, atmospheric scattering and optical sight parameters 01 p0142 A70-10420

Atmospheric water vapor effect on contrast between natural target and sky via spectrophotometric method, exploring target visibility and contrast relations 02 p0325 A70-11873

Runway visibility measuring techniques, discussing RVR measurement limitations 02 p0336 A70-12226

Helicopter all-visibility operation realized by using main rotor blade as scanning radar antenna 05 p0793 A70-16040

Visibility, atmospheric light scattering coefficient and aerosol mass concentration related by integrating nephelometer measurements 07 p1328 A70-18923

Crew visibility requirements for rendezvous, docking and earth landing of reusable reentry vehicles [AIAA PAPER 70-262] 07 p1399 A70-20398

Preconditioning visibility dependence on aerosol particle swelling due to increasing humidity 08 p1539 A70-21921

Video role in air transport safety, describing runway visual range /RVR/ measurement using TV camera and spaced lights 10 p1889 A70-24507

Fog visibility improvement by optical range gating, increasing image contrast by background radiance reduction 11 p2064 A70-26719

Cloud cover statistical data applied to planning remote satellite-borne sensing missions, using Monte Carlo method 14 p2611 A70-31232

Fringe visibility and localization in double exposure holographic interferometry of diffusely reflecting flat objects 15 p2740 A70-32430

UHF radio telemetry for transmissometers measuring airport runway visibility 16 p2889 A70-34222

Runway visual range assessment using automatic transmissometer-reflector measurements 17 p3132 A70-34641

Object visibility limits when illuminated by laser beam with spatial selection method, discussing atmospheric conditions and light source radiation power 20 p3641 A70-39448

Aircraft navigation light visibility, discussing visual threshold, source intensity, atmospheric transmissivity, color, background luminance, etc 20 p3564 A70-39719

Auroral physics, discussing visibility, relations to geomagnetism and sunspots spectrum, morphology, optical emissions and particles in magnetosphere 20 p3623 A70-39929

VISUAL ACCOMMODATION

Readaptation times of eyes adapted to darkness using night vision training device in relation to helicopter flight safety conditions 03 p0436 A70-13823

Two loop control system model of human lens accommodation system derived on basis of muscle mechanics, optics and experiments 03 p0439 A70-14275

Ciliary nerve stimulation and lens motion data to identify open-loop plant dynamics of lens accommodation 07 p1216 A70-18858

Human eye accommodation system, discussing blur detection on retina 13 p2360 A70-29671

Cat lens motion in response to ciliary ganglion step and sinusoidal stimulation, indicating damped accommodative system 19 p3366 A70-38925

Hypoxia effects on aviators visual accommodation, convergence and stereoacuity, noting myopia increase with altitude 20 p3569 A70-38996

Jet pilot aging effects on physical functions based on medical examinations during six years, noting visual accommodation changes 22 p3978 A70-42878

VISUAL ACUITY

Superior recognition of right visual field of left eye with monocular viewing of letters as interaction of visual acuity and right superiority 02 p0239 A70-12623

Headache and personality traits related to visual acuity and brightness sensitivity increases from sea level to high altitude 04 p0633 A70-15444

Visually evoked cortical responses to checkerboard patterns, correlating amplitude to visual acuity 06 p0992 A70-17311

Human visual performance, discussing effects of object size and exposure time 07 p1204 A70-19050

Visual acuity performance during various vibration stresses found differentially degraded for near, intermediate and distant vision 07 p1223 A70-19939

Color vision forms, investigating sensitivity of human retinal receptors and combinations of spectral functions 08 p1443 A70-20731

Visual analyzer physiology under effects of gravitation, atmospheric pressure, mechanical vibrations, etc 08 p1444 A70-20740

Weightlessness effects on human vision, studying color perception, field of vision and light sensitivity 08 p1444 A70-20743

Visual tracking of horizontally moving object, noting acuity dependence on target angular velocity and observation time 08 p1444 A70-20745

Time requirement determined for visual acuity restoration after illumination with short duration bright light flash 08 p1450 A70-20746

Light sensitivity restoration in humans exposed to bright flashes, studying photonic afferent system braking effect on scotopic system 08 p1450 A70-20747

Critical flicker frequency dependence on viewing distance, stimulus angular size and luminance 09 p1618 A70-22671

Atmospheric limitations on remote sensors using visible sunlight, noting applications to Earth Resources Technology Satellite and human vision [AIAA PAPER 70-288] 09 p1718 A70-22893

Near visual acuity requirements in flight deck from examination of presbyopic pilots, discussing instrument panel visibility 09 p1628 A70-23469

Eye spherical, cylindrical and spherocylindrical refractive errors incidence at various visual acuity levels, tabulating standards 10 p1810 A70-24035

Color closed circuit TV visual cues in flight simulation during flare and touchdown, including ATA requirements and acuity limits [AIAA PAPER 70-347] 10 p1857 A70-24201

Reaction time in determining visual transient response at frequencies above flicker fusion 10 p1818 A70-24717

Visual acuity and light detection after preadaptation to red and orange lights, discussing photopic and scotopic vision 11 p1986 A70-25828

Real time 2000 line TV camera with 40 MHz bandwidth, 1600 line vertical resolution and 1000 line horizontal resolution [SMPT E PAPER 105-73] 12 p2235 A70-27663

Visual acuity determination by tape with staggered squares rotating behind screen with window 13 p2350 A70-29298

Low light level TV systems performance relationship to visual acuity requirements, considering interfering noise characteristics effect on target recognition 16 p2903 A70-33130

Human eye components as image forming system from model based on Gaussian optics, discussing pupil size and influences on visual acuity 23 p4144 A70-43818

Visual acuity during ocular tracking movements as function of field illumination density 23 p4147 A70-44777

VISUAL AIDS

Visual simulation limitations, discussing parallax error correction in display system, wraparound system, image generation, TV and motion picture film systems 01 p0036 A70-10813

Forward sounding sensors /weather radar/ development for aiding human eye in detecting flight hazards /storms and CAT/ 02 p0297 A70-11989

Visual spaceflight simulators for spacemen and aircraft pilot training 04 p0663 A70-14691

Visual display media requirements of future high performance vehicles, considering spacecraft and aircraft 08 p1499 A70-21691

Photometric cometary parameters from Van Biesbroeck data, using least squares method to compare naked eye, field glasses and small telescope observations 19 p3526 A70-38783

Visual simulation for controlling QF-9 drone aircraft landing, takeoff and BQM-34A target drone in-flight test operations 01 p0058 A70-10815

Radar visual indicator used with scan converter and as synthetic indicator with computer controlled flight safety system 02 p0263 A70-12700

Man-machine systems design emphasizing impedance matching exemplified by visual approach landing [ASME PAPER 69-WA/GT-15] 04 p0642 A70-14856

Aircraft visual flight control displays development, considering liquid crystals in alpha numeric data output devices and holograms for three dimensional structures reproduction 05 p0853 A70-17090

Visual simulation in Lunar Module Mission simulator provided by computer controlled infinity optics system 06 p1031 A70-18603

Visual binary state transistor tester for positive and negative logic circuits, illuminating lamp for specific logic states 21 p3801 A70-42244

Color vision mechanisms spectral sensitivities measured by increment threshold technique for normal and deutan observers

03 p0427 A70-13947

Efferent model to test inhibitory influence of inferotemporal cortex lesions on visual discrimination of monkeys, using paired flashes of light

04 p0629 A70-14449

Cats trained for visual form discrimination tested for retention and reversal performance, studying oxygen deprivation influence

04 p0633 A70-15443

Distance discrimination experiment in reduced cue setting simulating outer space, confirming Weber power function exponent

04 p0645 A70-15647

Rhesus monkeys impaired discrimination in recognizing tachistoscopically presented objects following cortical polarization

05 p0802 A70-16625

Macaque monkey stereoscopic vision demonstrated behaviorally by combining random dot patterns with standard operant conditioning

07 p1205 A70-19277

Visual backward masking facilitation dependence on target duration as opposed to interstimulus interval or target-onset/mask-onset interval durations

07 p1221 A70-19850

Inhibitive stimulus control related to behavioral contrast during discriminative training

08 p1441 A70-20476

Critical discreteness interval of visual analyzer, investigating dependence on stimulus location, flare brightness and adaptation

08 p1443 A70-20734

Automatic change discrimination applications to weather prediction, land resource management and city planning, using photographic, IR and radar sensor imagery

09 p1677 A70-22876

Visual restriction effects on critical flicker fusion threshold, loudness and pitch discrimination determined using reticular activating system

09 p1622 A70-23576

Differential luminance sensitivity of human eye using signal detection theory, correlating discrimination and detection results with electrophysiological data

10 p1812 A70-24599

Plant leaves discrimination by multispectral reflectance indicated in transmittance measurements via remote sensing from aircraft and spacecraft

12 p2218 A70-26920

Book on automatic recognition of visual patterns and mechanization of creativity, presenting computer program termed Arithmetic

13 p2373 A70-29451

Neurophysiological framework for binocular single vision and depth discrimination, concerning construction of horopter for cat

14 p2539 A70-31348

Binocular disparity detectors in human visual response to moving gratings confirmed by electrophysiological evidence

17 p3025 A70-35150

Object identification and form of multidimensional discrimination space, using locus stimulus model

19 p3361 A70-38051

Eye movements during visual search and meaningless pattern discrimination

19 p3361 A70-38054

Retinal image tracking movement effect on discrimination perceptibility of orifice orientations of Landolt ring

23 p4147 A70-44778

VISUAL DISPLAYS

U DISPLAY DEVICES

VISUAL FIELDS

Perceived size relation to retinal size under reduced observation conditions compared with size-distance invariance hypothesis for binocular and monocular observations

01 p0025 A70-11051

Visual stimuli duration effect on saccades precision and reaction time in peripheral field in normal subjects

01 p0026 A70-11055

Receptive fields in visual systems, discussing characteristics, size, geometry, adaptation effects, sensory interactions, etc

02 p0236 A70-12304

Superior recognition of right visual field of left eye with monocular viewing of letters as interaction of visual acuity and right superiority

02 p0239 A70-12623

Visual half field central integration and monocular performance in split-brain monkeys after transection of chiasm, anterior commissure and corpus callosum

03 p0421 A70-13625

Correction factors required for estimating influence of pupil area reduction on retinal illumination at oblique angles

05 p0801 A70-16449

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift

05 p0841 A70-16729

Ground terrain blurring during aircraft flight at low altitude and high speed, calculating theoretical blur zone

07 p1220 A70-19285

Temporary or permanent visual field injury in test parachutists compared to control group

07 p1223 A70-19943

Invariant recognition of visual patterns in translational conversions, describing patterns by differential method

09 p1641 A70-22824

TV camera with diffraction limited pinhole lens for visual simulation, solving depth of field and extending field of view without distortion

10 p1887 A70-24217

Functional visual field selective process, studying performance as function of display angle

10 p1827 A70-24769

Neuron processing of retinal activity in estimating distances and sizes of objects in field of vision

12 p2172 A70-28312

Statistical estimation of resolvability of incoherently radiating object sampled at aperture field of observing optical instrument, using Cramer-Rao inequality

13 p2453 A70-29823

Brightness matching and sensitivity to sinusoidal flicker for various contrasts as function of surround field luminance

15 p2683 A70-32016

Hypoxia and acetazolamide effects on color sensitivity zones in visual field

15 p2684 A70-32533

Runway visual range assessment using automatic transmissometer-reflector measurements

17 p3132 A70-34641

Brightness field spatial structure of solar radiation reflected from earth by Cosmos 149 satellite, discussing homogeneity and isotropy

18 p3247 A70-36629

Unsteady light field spatial moments in turbid medium boundary layer with intense anisotropic scattering during illumination by narrow beam

18 p3285 A70-36631

Prismatic adaptation under scotopic and photopic conditions in subjects, using transfer experiments

19 p3361 A70-38052

Diffraction effects on radiometer field of view with rectangular primary and secondary apertures and field stop

20 p3627 A70-39087

Imaginary axes effect of phenomenal space in contrast illusions of distance, discussing division of S field of vision by definite point fixation

20 p3573 A70-39764

Spatial summation of retinal neurons receptive field centers excitation from single optic tract fibers action potential in light-adapted cats

22 p3971 A70-43403

Spatial aspects of sensitization effect properties compared to background light fields, lowering rod threshold at center by light addition to surrounding annular region

23 p4147 A70-44779

VISUAL FLIGHT

USAF visual flight simulation devices from engineering and psychological standpoints, discussing human factors considerations

01 p0057 A70-10808

Flying spot scanner design and performance to generate images for visual flight simulation

01 p0089 A70-10816

Visual aspects of collision avoidance, describing prudent mid-air maneuvers

08 p1449 A70-20481

Visual aircraft-to-aircraft detection effectiveness in collision avoidance as function of pilot performance and closing speed

12 p2267 A70-27633

Ground simulations data of jet lift V/STOL compared with visual flight results, noting hover, lateral quick start and stop maneuver

18 p3236 A70-35954

Visual air-to-ground target recognition simulation, comparing predictions from Autonetics Detection Model in low altitude flight

24 p4308 A70-45507

VISUAL FLIGHT RULES

Midair collision frequency under VFR as function of aircraft density derived, noting ATC role in safe separation

12 p2267 A70-27636

VISUAL OBSERVATION

Right ascension screw error effects on observations of stellar image passage through meridian, evaluating effect

01 p0181 A70-10662

Visual observations of bright comets, deriving photometric parameters from comet head total magnitude

01 p0184 A70-10953

Voluntary control over velocity of smooth pursuits, discussing saccadic and saccade free modes and switching during tracking

01 p0026 A70-11056

Air density variations calculated by visual satellite observations processing, comparing results of IN-TEROBS and average anomalies methods

02 p0288 A70-11766

Martian dark area extending from Tritonius Sinus to Casius southern tip, comparing observations and charts

02 p0370 A70-12086

Vigilance of human monitors detecting additions and deletions of relevant and irrelevant signals presented on computer matrix display

02 p0246 A70-12377

Horizontal-vertical illusion and foreshortening of receding horizontal lines during visual observations

02 p0249 A70-12839

Human eye image accumulation effect and meteor brightness estimation dependence on angular velocity based on visual and telescopic observations

03 p0569 A70-13358

Three dimensional display of human body surface potential distributions as diagnostic tool of cardiac abnormalities

04 p0641 A70-14557

Visual interpretation of moon and Mars surface photographs taken from satellites, analyzing craters and bumps

04 p0686 A70-14626

Frequency distribution of apparent visual magnitudes of meteors observed from November 1960 to January 1967

04 p0750 A70-14707

Visual vertical related to head tilts, observing location of gravitational vertical

04 p0645 A70-15445

Helmholtz proprioceptive theory of apparent visual direction for predicting displacement of egocentric straight ahead as aftereffect of eyes deviation from normal position

05 p0801 A70-16142

Rotation, diameter, mass, atmosphere and constitution of planet Neptune, with emphasis on visual observations

05 p0913 A70-16552

Monograph on probability of aircraft detection by ground visual observation using mathematical model based on Poisson process, considering laws of ocular physiology

05 p0794 A70-16558

Meridian circle observations before and after occultation of ZC 2232 by Neptune on 7 April 1968, correcting ephemeris for star and Neptune

06 p1151 A70-18489

Physical identity and name sameness matchings efficiency noting role of interpolated activity

07 p1203 A70-18942

Meteorite fireball track projected on earth surface determined from nearly overhead observations

07 p1387 A70-19629

Space rendezvous navigation and guidance based on optical sightings with hand-held sextant entered into and processed by small digital computer

07 p1331 A70-20061

Propagation pattern of surface acoustic wave visualized in piezoelectric and nonpiezoelectric materials by dusting delay line with fine particles

07 p1336 A70-20283

Nova Delphini 1967 brightness visual evaluations by amateurs, discussing effect of personal factors and instruments on accuracy

08 p1568 A70-20634

Binocular achromatic and color thresholds of constant and flickering lights determined from background of different brightness

08 p1443 A70-20732

Sco X-1 simultaneous X ray and optical flares correlation and X ray enhancements

08 p1561 A70-20900

Meteor abundance determination by visual observation, calculating sighting probabilities for various magnitudes

08 p1573 A70-20949

Visual recordings of cardiac rhythm obtained from flashes of miniature indicator tube, describing circuit filter function

08 p1452 A70-21439

Minor meteor showers radiants determined close to ecliptic plane from systematic visual observations during November, December and January 1961-67

08 p1577 A70-21532

Saturn globe, rings and satellites observations /1968-1969/

09 p1751 A70-22198

Composite window permitting visual or photographic observation and IR irradiation of test materials in ultrahigh vacuum system

09 p1698 A70-22994

NASA operation of Convair 990 jet transport as airborne scientific research platform for optical observations

09 p1682 A70-23504

Duplex schlieren optical system with one channel for data recording and second channel for visual monitoring

09 p1687 A70-23766

Observation noise model for human controller remnant

10 p1823 A70-23893

Human operator remnant data normalization noting observation noise spectral characteristics for compensatory tracking

10 p1824 A70-23899

Granularity spectrum of diffusing screen uniformly illuminated by normally incident coherent light, basing study on long and short distance visual observations

10 p1899 A70-24031

Visual observations of Molniya satellite during low perigee, determining air density

10 p1875 A70-24443

Human eye image accumulation effect and meteor brightness estimation dependence on angular velocity based on visual and telescopic observations

11 p2118 A70-26723

Small meteor streams trajectories and radiants from epsilon-Lyrids, alpha-Coronids and phi-Draconids observations by amateur astronomers

12 p2311 A70-28307

Meteors position angles determination during telescopic observations, discussing error due to angle reversion

13 p2491 A70-29043

Universal triaxial instrument with AT-1 telescope for visual observation of satellites, discussing applications and accuracy

13 p2408 A70-29274

Twilight sky color visual estimation from Soyuz 5 spacecraft noting cloudiness effects

15 p2723 A70-31597

Microscopic data importance in recognizing IC semiconductor failure characteristic traits, revealing current direction, voltage magnitude, microsurface temperature excursion and approximate transient duration

15 p2693 A70-32664

Meteor abundance determination by visual observation, calculating sighting probabilities for various magnitudes

15 p2806 A70-32761

Mars visual observations with colored glass filters during opposition, noting southern polar cap shape irregularity and Martian atmospheric transmittance

16 p2974 A70-33658

Optical search for CP 0328 and CP 0950 by photoelectric multichannel signal averaging

17 p3160 A70-34536

Stellar UV and visual continuum observations, discussing recalibration of absolute energy distribution of alpha Lyr to improve model atmospheres

17 p3160 A70-34881

1620 Geographos observations using Ritchey-Chretien reflector and Curtis Schmidt telescope

17 p3171 A70-35446

Soviet book on declination observation of bright and faint stars in one system

18 p3314 A70-36402

Planetary surface smoothness factor by disk brightness, Mars red light and phase curves methods, indicating superiority of visual observation

18 p3315 A70-36602

Relative effectiveness of radar and visual cloud observations

18 p3287 A70-36999

Comet Bennett 1969 visual observations in Southern Hemisphere, using photometer ocular

18 p3319 A70-37049

Auroral photographic and visual observations, discussing satellite results and subsystem development

19 p3417 A70-38730

Photometric cometary parameters from Van Biesbroeck data, using least squares method to compare naked eye, field glasses and small telescope observations

19 p3526 A70-38783

Artificial satellite position visual estimates based on geometric relationship to reference stars pair accuracy

19 p3531 A70-38946

Optical pulsar search instrument in radio pulsar fields, showing performance on NP 0532

21 p3826 A70-41156

Semiconductor platelet laser stimulated emission visual observation in unwanted reflected modes

21 p3838 A70-42022

VISUAL PERCEPTION

NT CRITICAL FLICKER FUSION

NT SPACE PERCEPTION

NT VISUAL DISCRIMINATION

Human size-selective neurons indicated by aftereffect from successive viewing of striped patterns with different spatial frequencies

01 p0035 A70-10724

Visual fatigue symptoms, causes, relation to general fatigue and psychological aspects, discussing testing for sensory and visual fatigue

01 p0022 A70-10857

Background luminance effect on flash brightness in eyes, measuring increment threshold and luminances required for various brightnesses

01 p0025 A70-11052

Ultrasonic image superposition technique for visualization of impact fractures in glass reinforced plastics

01 p0059 A70-11101

Target-field luminance or duration effect on target susceptibility to masking demonstrated in visual backward masking study

01 p0039 A70-11163

Line length effects on sequential blanking in visual perception demonstrated by computer-based CRT display and interpreted with information processing model

01 p0039 A70-11164

Human and cat visual neuron properties, discussing encoding orientation and dimensions of retinal images

01 p0028 A70-11360

Mathematical model formulated in terms of feedback controller for simulation of horizontal eye movement for positioning upon objects of interest

02 p0243 A70-12098

Receptive fields in visual systems, discussing characteristics, size, geometry, adaptation effects, sensory interactions, etc

02 p0236 A70-12304

Human eye integration of short monochromatic light flashes at TV frame frequencies

02 p0238 A70-12463

Scaling and refractoriness effect in neutral-pulse train transmission on eye incremental sensitivity, discussing applicability as intraretinal mechanism concept

02 p0247 A70-12466

Long term memory effects in visual perception of apparent movement, discussing experience prior to tests

02 p0239 A70-12622

Superior recognition of right visual field of left eye with monocular viewing of letters as interaction of visual acuity and right superiority

02 p0239 A70-12623

Horizontal-vertical illusion and foreshortening of receding horizontal lines during visual observations

02 p0249 A70-12839

Motion sickness causes and prevention during prolonged space flights, discussing vestibular system and characteristics of visual-inertial and canal-otoolith incongruities

03 p0421 A70-13542

Relative slant judgments elicited by paired comparison methods from subjects viewing computer generated slides representing rotated regular dot patterns

03 p0435 A70-13769

Lines and letters identification and localization relationships to stimulus attributes in visual perception supporting hierarchical processing hypothesis

03 p0425 A70-13825

Informative filter automatic selection for describing visual object with aid of frequency spectrum, taking filter output voltage mean square value as criterion

04 p0662 A70-15438

Cortical cells fatigue and performance in subjects doing mental work, using motion picture signal perception method

04 p0639 A70-15509

Helmholtz proprioceptive theory of apparent visual direction for predicting displacement of egocentric straight ahead as aftereffect of eyes deviation from normal position

05 p0801 A70-16142

Acceleration cues removal effects on vehicular velocity perception, using movie technique to control visual cues

05 p0806 A70-16143

Head movement effect on accuracy of visual and kinesthetic localization for free and fixed head conditions

05 p0803 A70-16669

Illusions of rotation perception with oscillating trapezoid and oscillation perception with rotating trapezoid, correlating magnitudes

05 p0807 A70-16673

Subjects sensitivity to differences in statistical distributions of locally defined element density and shape, using stochastically textured visual patterns

06 p0998 A70-17223

Observed objects physical properties influence on boundary conditions of visibility perception by human eye

06 p0994 A70-17631

Neurophysiological vertical and horizontal visual coordinates localization in man

06 p0998 A70-18484

Methodologies inadequacies for studying information processing rate in visual perception

07 p1203 A70-18943

Human visual performance, discussing effects of object size and exposure time

07 p1204 A70-19050

Visual threshold elevation for test flash perception determined by retinal image displacement in saccadic fashion

07 p1205 A70-19283

Evoked potential /EP/ correlate of binocular depth perception in man, discussing responses to horizontal and vertical changes in retinal disparity

07 p1205 A70-19284

Ground terrain blurring during aircraft flight at low altitude and high speed, calculating theoretical blur zone

07 p1220 A70-19285

Spacecraft cabins illumination conditions selection based on cosmonaut visual perception of luminous objects

07 p1221 A70-19515

Visual perception of black-and-white photo in aerial photographic interpretation, examining processes in human brain

07 p1221 A70-19777

Visual acuity performance during various vibration stresses found differentially degraded for near, intermediate and distant vision

07 p1223 A70-19939

Optical suitability to pilot visual requirements in head-up displays, discussing telecentric viewed system permitting binocular disparity tests

08 p1449 A70-20675

Human color vision simulation by mathematical and electronic analogs for photoelectric color measurement and eye resolution

08 p1450 A70-20727

Psychophysiological regularities of nonlinear human color vision model, analyzing sensitivity curves, achromatic tints and hyperbolic position in perception space

08 p1443 A70-20728

Microinterval analysis of phased development of human visual color perception in presence of short stimuli

08 p1443 A70-20733

Reduced visual perception time in patients under X ray treatment of diencephalo-hypophyseal region

08 p1443 A70-20736

Human eye sensitization and dark adaptation, noting annular surrounding light addition effect on rod threshold

08 p1447 A70-21723

Moon illusion on basis of perceived size relativity, discussing dependence on objective characteristics of visual field

09 p1752 A70-22248

Critical flicker frequency dependence on viewing distance, stimulus angular size and luminance

09 p1618 A70-22671

Flashtube photostimulators for examining human physiological response, discussing design and calibration

09 p1624 A70-22673

Solar simulation /SISS/ for evaluating human visual system performance in contrasting space environment

09 p1655 A70-22680

Bragg diffraction imaging for sound fields visualization

10 p1893 A70-24170

Visual threshold effect on closed loop control of aircraft of poor resolution studied by flight simulation of approach and flare, showing degraded control accuracy

[AIAA PAPER 70-357]

Prolonged hypodysmetria effects on visual analysis, investigating functional weakening, fundus oculi appearance change and restoration after normal activity resumption

10 p1816 A70-24687

Pattern recognition model simulating human physiology based on two dimensional Fourier transform of input images

10 p1827 A70-24770

Perceptual tuning in tachistoscopic identification task with alternatives provided after or before and after stimulus

11 p1986 A70-25829

Spacecraft cabins illumination conditions selection based on cosmonaut visual perception of luminous objects

11 p1991 A70-26114

- Human detection capability for objects on electro-optical imaging displays calculated as function of SNR, viewing distances and brightness levels
12 p2236 A70-27903
- Book on visual perception space covering biological optics, eye model, monocular vision, etc
14 p2539 A70-31349
- Eye movements effects on apparent/beta/ movement perception tested by display with ambiguous illusory movement
15 p2683 A70-32454
- Psychophysical adjustment methods effect on visual vertical orientation during head tilt
15 p2683 A70-32455
- Eye movements direction during perceptual errors related to stimulus location
15 p2683 A70-32456
- Low visibility aircraft landing problem concerning pilot instrument and visual cue and federal regulations governing operational approval
[AIAA PAPER 70-936]
17 p3134 A70-35845
- Visual contrast sensitivity adaptation to temporal frequencies using high modulation sinusoidal grating
17 p3034 A70-35898
- Optokinetic and vestibular effects on human operator reliability in aircraft control systems
18 p3223 A70-36184
- Equidistance effects on human size and distance perception in visual alley
19 p3368 A70-37771
- Geometrical figure fragmentation produced by intermittent illumination, examining dependence on presentation frequency and temporal factors
20 p3580 A70-39491
- Line tilting aftereffects on central and peripheral vision following spatial coincidence of inspection and test contours
21 p3767 A70-40752
- Model for human brain visual information processing networks, considering visual search, selection, storage, correlation, recognition and recall functions
22 p3977 A70-42287
- Color attributes by subjective estimation of surface colors, discussing correlation with other methods
22 p3972 A70-43409
- Central fovea dichromacy tests, using color naming technique
22 p3972 A70-43410
- Orientation detectors in human visual cortex, suggesting mutual lateral inhibition
23 p4144 A70-43813
- Perceptual suppression of retinal emissive afterimages by rapid eye movements
23 p4147 A70-44780
- Time dependent visual perception probability under prolonged testing at eccentricities, using observer exposed to flashed stimulus with dark-adapted retina
23 p4147 A70-44782
- Light effect on cis-trans-isomerization of cinnamoyl-alpha-chymotrypsin, considering molecular modeling of visual reception
24 p4298 A70-45496
- Bilateral oligosynaptic interaction between posterior lateral thalamic nucleus and afferent systems in visual and acoustic cortical areas in cats
24 p4300 A70-45840
- VISUAL PHOTOMETRY**
- Satellite rotation periods determination accuracy from photometric observation data improved by determining initial and terminal moments of maximum brightness
02 p0255 A70-11769
- Photometric results on beta Lyrae from various observatories during 1959 international campaign with data reduced to BV system, showing reddening at primary eclipse
02 p0369 A70-12064
- Visual photometric tracking data obtained in SPIN program for satellites 1965-II-4 and 1965-53-6 at Kishinev station
03 p0444 A70-13181
- Neutral Ne emission line in visible solar spectrum during bright events in inner corona, noting 1958 outburst of RS Oph
05 p0920 A70-16944
- Visual and quantitative image definition, evaluating microdetail clarity in panchromatic, IR, color and color IR aerial photographs
07 p1281 A70-19369
- Fourth Saturn ring detection equipment and procedures, discussing negatives revealing small weak zones near globe equatorial east and west edges
08 p1567 A70-20600
- Spectral classification and continuous spectrum photometry of weak late stars in visual and near UV regions, noting anomalous C star in CH Cyg
15 p2797 A70-31615
- Photometric reduction of meteor luminosity to photovisual/international/ system
19 p3515 A70-37662
- VISUAL SIGNALS**
- Digital log-linear companding technique for nonuniform quantization of speech and image signals
01 p0044 A70-10784
- Reactions to visual emergency signals in humans after administering adrenalin, aminazin, melipramine or andaxine to change control systems functional state of cerebrum
01 p0030 A70-11467
- Subjects trained in visual monitoring task with autoinstructional device, showing higher signal detection rate than group trained by practice alone
02 p0247 A70-12380
- Signal detection theory analysis indicating within-session changes in human willingness to respond in visual monitoring task, considering optimal decision behavior
03 p0435 A70-13766
- Auditory and visual ready signal intensity effects on reaction time, considering roles of practice and individual differences
03 p0436 A70-13772
- Missile impact location visual identification by marker system using pyrotechnic aboard to produce dense white smoke detectable to unaided eye, including flight test
03 p0582 A70-14104
- Light signals amplification efficiency, considering double-pass regenerative amplifier
04 p0702 A70-15225
- Optical, digital and hybrid image processing techniques with objectives of image enhancement and replacement
05 p0847 A70-16121
- Human macrosaccadic eye movements related to four dial display conditioned by concurrent variable interval schedules of signals
05 p0800 A70-16127
- Electrocorticograms frequency spectra from different visual cortex layers of rabbits during exposure to rhythmic light pulses
07 p1198 A70-18698
- Illusory visual signals experienced by pilots ascribed to aerodynamic forces interference with normal functional relationships between sensory systems
09 p1627 A70-23131
- Human reactions to successive visual signals, studying response time in single and grouped reaction
10 p1826 A70-24720
- Reference systems for two dimensional visual indications as correction device for pilot guidance errors associated with rotation effects
12 p2177 A70-27036
- Blinking warning lights for air navigation, signaling of obstacles and glider onboard marker lights
16 p2889 A70-34302
- Lighting and background effects on human binocular color vision of signal lights in industry
19 p3366 A70-38923
- VISUAL STIMULI**
- Selective visual stimulus control by part of compound S delta in pigeons
01 p0021 A70-10796
- Visual stimuli duration effect on saccades precision and reaction time in peripheral field in normal subjects
01 p0026 A70-11055
- Visual detection discrepancies of temporal order suggested due to definition of interstimulus interval
01 p0039 A70-11165
- Rabbits and cats cortical neurons responses to light and acoustic signals, using microelectrodes inserted at different depths into cortex
01 p0030 A70-11469
- Propagation velocity relation with time delay in human visual system, using various sets of line stimuli having different spatial distance
02 p0237 A70-12457
- Critical duration for pupillary light reflexes measured with IR scanning pupillometer using various flash duration stimuli
02 p0237 A70-12458
- Long term memory effects in visual perception of apparent movement, discussing experience prior to tests
02 p0239 A70-12622
- Human perceptual and response biases in choice reaction time tasks involving visual and auditory stimuli
02 p0239 A70-12624
- Human oculogyral illusion thresholds determined on Ames Man-Carrying Rotation Device to establish stimulus duration effect on angular acceleration thresholds
03 p0424 A70-13765
- Relative slant judgments elicited by paired comparison methods from subjects viewing computer generated slides representing rotated regular dot patterns
03 p0435 A70-13769
- Lines and letters identification and localization relationships to stimulus attributes in visual perception supporting hierarchical processing hypothesis
03 p0425 A70-13825
- Controllable light source for experiments on human pupillary servomechanism
04 p0642 A70-14633
- Visual, motion and auditory stimuli role in enhancing aircraft pilot training simulators realism, considering motion perception research
[ASME PAPER 69-WA/BHF-9]
04 p0642 A70-14853
- Image memory in Papio hamadryas monkeys reacting to visual and flavor food stimuli
04 p0632 A70-15219
- Pigeon response to concurrent variable interval reinforcement schedules, investigating relative and changeover rates regarding key color
05 p0800 A70-16126
- Amphetamine effects on observing and monitoring performance in squirrel monkeys, investigating lever and key responses using food reinforcements
05 p0806 A70-16128
- Visually evoked cortical responses to checkerboard patterns, correlating amplitude to visual acuity
06 p0992 A70-17311
- Rabbits sensorimotor and visual cortical responses during defensive conditioning to rhythmic light
07 p1197 A70-18695
- Electrocorticograms frequency spectra from different visual cortex layers of rabbits during exposure to rhythmic light pulses
07 p1198 A70-18698
- Cats visual analyzer functional rearrangement mechanisms under prolonged light stimulation, considering evoked potential dependence on pulse duration and intensity
07 p1198 A70-18699
- Rabbits visual cortex evoked potential changes due to light flashes under different conditions
07 p1198 A70-18716
- Electrical recording of retinal and occipital potentials in response to stimulation of human visual system used at levels from receptor to striate cortex
07 p1220 A70-19364
- Guinea pigs visual analyzer during stimulations by diffuse light, nonspecific thalamic nuclei and microelectrodes polarization, determining A- neuron activity
07 p1213 A70-19788
- Binocular fusion and rivalry effects on cortically evoked human potential, obtaining pattern characteristic responses to monocular stimulation
07 p1215 A70-20214
- Inhibitive stimulus control related to behavioral contrast during discriminative training
08 p1441 A70-20476
- Operator analysis of electroretinograms, investigating eye reaction dependence on stimulation using amplitude-phase-frequency characteristics
08 p1450 A70-20730
- Microinterval analysis of phased development of human visual color perception in presence of short stimuli
08 p1443 A70-20733
- Critical discreteness interval of visual analyzer, investigating dependence on stimulus location, flare brightness and adaptation
08 p1443 A70-20734
- Direct anatomical couplings between retina and hypothalamus via centripetal and centrifugal fibers by investigating light evoked potentials in rabbits brains
08 p1444 A70-20737
- Photoconductivity detected in pigmented epithelium of eye during illumination by visible light
08 p1444 A70-20738
- Time requirement determined for visual acuity restoration after illumination with short duration bright light flash
08 p1450 A70-20746
- Light sensitivity restoration in humans exposed to bright flashes, studying photonic afferent system braking effect on scotopic system
08 p1450 A70-20747
- Constant periods method to eliminate human responses during threshold measurements by holding first threshold perception flash fixed
08 p1445 A70-20750
- Modal excitation and scattering in retinal receptors of human and insect visual systems investigated with dielectric rod uniform wave and irregularities
08 p1452 A70-21289
- Bioelectrical activity of brain during conditioned motor reflex system operation modes in response to stimulating light pulses
08 p1447 A70-21450
- Horizontal disparity and ratio of perceived egocentric distance related in stereoscopic vision during investigation of three point light sources problem
08 p1447 A70-21725
- Monocular and interocular threshold luminance changes during flicker stimulation, noting interflash duration effects
08 p1453 A70-21792
- Ego strength relationship to respiration in response to sound and light stimulation tested in subjects balanced for alertness-drowsiness by EEG criteria
09 p1616 A70-22331
- Critical flicker frequency dependence on viewing distance, stimulus angular size and luminance
09 p1618 A70-22671

Movement information from spatio-temporal integration in binocular-kinetic space perception of time varying optical inputs

09 p1618 A70-22672

Visually evoked cortical potentials /VECP/ to different probe stimuli to suppressed human eye in binocular rivalry experiments, discussing eye dominance problems

09 p1618 A70-22674

Different retinal regions simultaneous stimulation, describing evoked potentials measurement method

10 p1811 A70-24227

Information hypothesis and repetition hypothesis concerning human reaction time to visual stimulus information

10 p1826 A70-24714

Numerical payoff influence on reaction time to second stimulus in subjects receiving successive signals at short intervals

10 p1818 A70-24715

Auditory and visual warning signals effects as reaction stimulus in time-uncertainty situation

10 p1826 A70-24719

Visual stimuli intensity influence on delay in reaction to second of pair of visual stimuli

10 p1818 A70-24721

Response times in deciding same or different between successive visual stimuli

10 p1826 A70-24722

Psychophysical metric for space perception visual cues measurement, describing applications to distance discrimination

10 p1827 A70-24768

Pilots with high vestibular stability studied for spatial orientation, noting activity impairment due to alternating angular acceleration and optokinetic stimuli

10 p1828 A70-25180

Perceptual tuning in tachistoscopic identification task with alternatives provided after or before and after stimulus

11 p1986 A70-25829

Choice reaction time task involving right or left hand button pressing in monocular and binocular visual response to directional commands by colored lights

11 p1990 A70-25830

Size effects on velocity threshold for real movement during narrow stimulus object length increase

11 p1989 A70-26662

Stimuli eliciting vergence eye movements and stereopsis, discussing retinal disparity locations and limits due to form, spatial position, luminance, contrast and onset

12 p2171 A70-28034

Psychophysical and evoked potential correlates of changes in stimulus color and intensity compared with minimum subjective flicker conditions

12 p2171 A70-28035

Electrical activity of visual cortex, subcortical structures and reticular formations in cats during conditioned reflex stimulation by light

12 p2173 A70-28351

Dynamic interaction between stored and active memory images in apes and monkeys with conditioned alimentary motor reflexes stimulated by visual signals

12 p2173 A70-28352

Sensory afterdischarge of human brain under light stimuli during sleep and wakefulness

12 p2173 A70-28354

Neuron activity of cortical motor and visual regions and corpus geniculatum laterale in cats during diffuse thalamic electrostimulation combined with light signals

12 p2173 A70-28355

Human operator ocular tracking and decay time stimulation response measurements using information, statistical, point process and random analysis

14 p2537 A70-30388

Sensory function in multimodal signal detection forced choice experiment involving auditory, visual and auditory-visual stimuli

14 p2539 A70-31167

Disadapting photostimulation effect on light sensitivity restoration of human visual analyzer, obtaining dark adaptation curves

15 p2679 A70-31603

Eye movements direction during perceptual errors related to stimulus location

15 p2683 A70-32456

Binocular disparity detectors in human visual response to moving gratings confirmed by electrophysiological evidence

17 p3025 A70-35150

Psychophysiological tests involving programmed memory device evaluating human memorization process and sensorimotor reactions to light signals

17 p3040 A70-35676

Scotopic responses conditions, using stimulus alternation method to elicit electroretinogram

17 p3034 A70-35897

Visual cortical anomalous response to paired photic stimulus in rabbits with ablations in rostral part of brain stem

18 p3221 A70-37214

Visual attention and temporal cortex stimulation effects on evoked electrical activity in monkey brain

19 p3360 A70-37812

Human spatio-temporal visual evoked response characteristics, showing potential gradient rotation in same period as input stimulus

19 p3360 A70-37845

Human brain LF activity in visual evoked response, determining relationship to stimulation

19 p3360 A70-37846

Object identification and form of multidimensional discrimination space, using locus stimulus model

19 p3361 A70-38051

Human response time to visual stimulus preceding or following auditory stimulus as function of interstimulus interval

19 p3362 A70-38311

Visual sensory storage item selection efficiency

19 p3363 A70-38321

Cat lens motion in response to ciliary ganglion step and sinusoidal stimulation, indicating damped accommodative system

19 p3366 A70-38925

Retinal images smearing during voluntary saccadic eye movements, obtaining thresholds for horizontal and vertical stimuli bands

19 p3366 A70-38927

Visual suppression linear dependence on angular size of voluntary saccadic eye movements, observing percentage of trials for stimulus perception

19 p3367 A70-38928

Temporal and spatial distribution of visual suppression during voluntary saccadic eye movement on different places of retina

19 p3367 A70-38929

Unitary and compound stimuli and role of response categories in decision time

21 p3767 A70-40751

Step and ramp input functions and pursuit and compensatory display modes effects on tracking performance

21 p3767 A70-40753

Moving stripe stimulus inducing optokinetic turning movements in goldfish, discussing efferent influence on vestibular organ

21 p3762 A70-41141

Spatial summation of retinal neurons receptive field centers excitation from single optic tract fibers action potential in light-adapted cats

22 p3971 A70-43403

Visually evoked responses in man to different light stimuli intensities, noting marked increase in binocular over monocular visual response

22 p3972 A70-43408

Foveal threshold measurements, using small flash of light at center of bright white disk on black background

22 p3972 A70-43411

Spectral sensitivity of freely moving human eye by determining threshold energy for correct choice between two monochromatically illuminated stimulus patches

22 p3972 A70-43412

Light flashes observed by Apollo astronauts, proposing Cerenkov radiation or direct excitation of eye retina by cosmic rays

24 p4307 A70-45403

Nervous inhibition effect on electroretinogram b wave during flash sequences

24 p4301 A70-45986

Hypoxia effects on voluntary response time to peripherally located visual stimuli

24 p4302 A70-46107

VISUAL TASKS

K factor analysis of target visibility, considering target size contrast, background luminance, glare, atmospheric scattering and optical sight parameters

01 p0142 A70-10420

Visual attention testing, considering perception focusing on stimulus object and eyelid blinking recording, measuring eye distance to work plane

01 p0023 A70-10861

Visual faculties testing to improve performances in visual inspection tasks, considering threshold line concept and visual performance relation to age

01 p0023 A70-10862

Intermittent vs continuous noise effects on signal detection measures during audio visual checking task performance

01 p0039 A70-11167

Subjects trained in visual monitoring task with autoinstructional device, showing higher signal detection rate than group trained by practice alone

02 p0247 A70-12380

Signal detection theory analysis indicating within-session changes in human willingness to respond in visual monitoring task, considering optimal decision behavior

03 p0435 A70-13766

Monitoring behavior in three source visual task, studying selective attention by response observation method

03 p0435 A70-13770

Eye movements during two dimensional tracking tasks, showing oculomotor system transfer characteristics function of target motion spectral content

03 p0427 A70-13948

Visual prediction accuracy in estimating point coincidence of two moving targets as function of viewing opportunity and length of period

03 p0428 A70-14084

Vigilance time degradation, studying effects of breathing gas mixtures with varying oxygen and carbon dioxide content

06 p1000 A70-17293

Astronauts visual performance during space flight, studying reduction of visual disturbances from various physiological flight factors

08 p1444 A70-20741

Nonlinearity of human eye movement control system in two dimensional tracking tasks, explaining visual axis lags as time delays dependent on target motion

08 p1447 A70-21724

Visual search activity decrease observed as function of time-on-task for skilled and unskilled helicopter pilots, recording eye movements and blinks

09 p1628 A70-23463

Target velocity and approach angle effects on accuracy of moving targets intersection estimation tested on human subjects

09 p1628 A70-23578

Human reactions to successive visual signals, studying response time in single and grouped reaction

10 p1826 A70-24720

Two dimensional eye position control in dark over prolonged periods, noting role of conjunctiva cues, drifts and saccades

12 p2171 A70-28037

Man machine eye-integration coupling in tracking task applied to helicopters, ocean-going craft and propeller aircraft

13 p2357 A70-28386

Military pilots visual estimation of point location coordinates within rectangular area

13 p2357 A70-29121

Perceptual displacement of hashmark between unequal squares, discussing contour repulsion and perspective interpretation

14 p2537 A70-30899

Sequential event tracking dependence on stimulus rate and simultaneously displayed information categories

14 p2538 A70-30900

Visual and auditory reactions in dogs to alimentary stimuli before and after partial removal of cerebellum, noting complete recovery within month

15 p2687 A70-32892

Human and machine pattern discrimination correlated by statistical correlation method from pattern recognition task involving computer simulation and humans

16 p2852 A70-33461

Feedback analysis of learning and performance in hand-yoked, steering and stimulus tracking control of breath-produced visual target

16 p2852 A70-33660

Heat stress effects on serial reaction time in subjects performing visual tasks

19 p3361 A70-38053

Component decision logical and temporal arrangement in visual search, defining target by several attribute value combination

19 p3362 A70-38314

Brightness contrast by human observer binocular matching, discussing neural networks models

19 p3366 A70-38924

Visual vigilance task with standard, binary or rating procedures as response indicators based on signal detection theory, noting relationship to psychophysical procedures

21 p3761 A70-40743

Visual target tracking with active head rotation, indicating independent eye response due to vestibulo-ocular reflex

22 p3979 A70-43492

Readability of segmented numerals under critical accuracy and limited exposure time, comparing with conventional displays

24 p4308 A70-45514

VITREOUS MATERIALS

- NT CYANOCOBALAMIN
NT FOLIC ACID
NT NICOTINAMIDE
NT PYRIDOXINE
NT RETINENE
NT TOCOPHEROL
Adenosine triphosphate and vitamins /amitnavit/
as prophylactics against radiation injuries in dogs dur-
ing simulated space flight 17 p3038 A70-35351

VITREOUS MATERIALS

- Soviet collection of papers on inorganic glassy
coatings and materials 05 p0870 A70-16591
Metal oxides additions effect on Ti glass crystalliza-
tion, studying small and large ion radii 05 p0871 A70-16593
Density, refractivity, thermal expansion coefficient,
softening point and soaking stability for glass contain-
ing barium, lead, boron, bismuth and titanium oxides
05 p0871 A70-16594
Crystallization and dielectric properties of glass
containing barium, lead, titanium and boron oxides,
noting frequency and temperature dependence 05 p0871 A70-16595
Aluminosilicate glass physical properties and chemi-
cal stability in water, alkaline and acidic agents, study-
ing titanium oxides additions effect 05 p0871 A70-16596
Sodium-titanium-boron-silicate glass opacity and
fusibility increase during partial substitution of K for
Na, noting phase composition changes 05 p0871 A70-16598
Vitreous transparent solids emission after irradiation
by Q switched laser, ascribing luminescence to
multiphonon and excitonic phenomenon 09 p1710 A70-22836

VLASOV EQUATIONS

- Inhomogeneous plasma containing weak electron
beam using Vlasov equation, noting wave-wave
coupling effect 02 p0345 A70-11882
Unstable electron plasma initial value problem
solved by numerically integrating Vlasov equation in
one dimension 02 p0347 A70-12235
Inhomogeneous plasma oscillations in counter-
streaming plasmas analyzed for electric fields and
resonant frequencies from Vlasov equation 04 p0726 A70-14671
Linear damping of sinusoidal oscillation in plasma,
solving linearized Vlasov equation by integration
along particle trajectories 05 p0888 A70-16304
Plasma waves and instabilities, detailing linearized
Vlasov-Maxwell equations solution appropriate to
Landau problem 06 p1118 A70-17378
Numerical solution of nonlinear Vlasov equation for
collisionless plasma problems, discussing initial value
problems, external electric fields, magnetic fields, etc.
06 p1108 A70-17419
Finite amplitude disturbance propagating across
magnetic field within infinite plasma, solving Vlasov
equation and ordering moment equations hierarchy 07 p1352 A70-19989
Temperature renormalization for improving velocity
distribution function representation in solving non-
linear Vlasov equation, transforming Hermite
polynomials 07 p1328 A70-20201
Selective harmonic excitation in one dimensional
collisionless plasma conforming to Vlasov equation by
counterstreaming electron beams, noting velocity dis-
tribution conditions 07 p1353 A70-20202
Asymptotic method for Vlasov equation formulated
for weakly Landau damped monochromatic plasma
wave in collisionless electron plasma 07 p1353 A70-20231
Asymptotic method for Vlasov equation of plasma
wave reformulated in Eulerian representation 07 p1354 A70-20232
Vlasov equations and irreversibility in plasma
physics and stellar dynamics, calculating statistical en-
tropy and relaxation time 08 p1550 A70-20556
Variable coefficient equations for free oscillations
of shallow shells of variable thickness in Vlasov mo-
ment theory 08 p1586 A70-21011
Semi-Lagrangian formulation of Vlasov equation in
two and three dimensional electrostatic problems,
investigating tensor determinants and perturbation
08 p1553 A70-21614
Mathematical model for finite-density non-
homogeneous Newtonian cosmologies, approximating
solutions using coupled Vlasov-Poisson equations
08 p1581 A70-21740
Pulse propagating in unstable plasma, determining
characteristics by asymptotic expansion applied to
Vlasov-Maxwell equations 09 p1734 A70-22684

Vlasov equation approximate solution by minimum
energy principle, deriving equilibrium equation for
stellar gas 13 p2457 A70-28552

Nonlinear Vlasov equation treatment by Fourier-
Hermite expansion techniques for plasma problems
13 p2457 A70-28556

Vlasov interaction of magnetically coupled E layer
with dissipative structures including injection,
trapping and drag effects 14 p2623 A70-30698

Vlasov equations and irreversibility in plasma
physics and stellar dynamics, calculating statistical en-
tropy and relaxation time 15 p2781 A70-32711

Anisotropic temperature plasma susceptibility cal-
culation based on velocity moment equations and cir-
cular polarized coordinates, compared to Vlasov equa-
tion solution 17 p3140 A70-34929

Fourier and Hermite transform methods for Vlasov
equation solutions in plasma physics 18 p3296 A70-36789

Finite difference methods for collisionless plasma
models, taking into account Eulerian form of Vlasov
equation in phase space 18 p3296 A70-36792

Vlasov high temperature plasmas numerical analy-
sis, using Hamilton variational principle 18 p3296 A70-36793

Antennas impedances in warm isotropic plasma,
using hydrodynamic and kinetic /Vlasov/ equations
19 p3380 A70-38406

Donnell-Vlasov shallow shell equations error analy-
sis 20 p3734 A70-40441

Lagrange formulation for deriving energy- conserv-
ing numerical approximations for Vlasov plasmas
22 p4080 A70-42750

Plasma macroscopic and microscopic instabilities
derivation from MHD and Vlasov equations
23 p4224 A70-44180

Collisionless plasma weak turbulence theory deriva-
tion from Vlasov equations, considering interactions
between oscillation modes 23 p4225 A70-44182

One dimensional collisionless electron-proton
plasma, obtaining exact electrostatic shock solution to
Vlasov and Poisson equations 24 p4382 A70-45107

VLF EMISSION RECORDERS

- Slow tail atmospherics and VLF pulse measure-
ments at close-to-thunderstorm fields, indicating
return stroke origin 17 p3046 A70-35395
Sounding rocket instrumentation for ionospheric
VLF radio noise measurement and recording 17 p3090 A70-35398
Ionospheric radio noise measurements with VLF
wideband receivers onboard rocket 17 p3046 A70-35399

VOICE COMMUNICATION

- NT TELEPHONY
NT VOICE DATA PROCESSING
Speech intelligibility tested using Modified Rhyne
Test and air traffic control and civil disaster vocabula-
ries, noting Articulation Index for signal-noise condi-
tions 02 p0246 A70-12150
Bandwidth reduction for interlacing two voice and
three additional teletype subchannels in standard
phone frequency range for use in VHF/UHF satellite
link 03 p0450 A70-13623
Linear phase detection using FM demodulation for
Apollo S band communication system eliminating
baseband voice interference with telemetry [AAS PAPER 69-610] 04 p0648 A70-14659
Phase feedback demodulation technique to analyze
telemetry performance degradation caused by voice
interference in modes of Apollo communication
system, providing linear detection scheme [AAS PAPER 69-609] 04 p0648 A70-14660
Pilot emotional state during stressful situations from
tape recorded vocal utterances of air to ground radio
communications using spectrographic analysis 06 p1000 A70-17297
AN/PRC-87 Pararescue radio for hands free opera-
tion, using bone conduction microphone, voice
operated transmitter, etc 06 p0986 A70-17723
Spot III satellite-supported system for transoceanic
aircraft navigation, traffic control, voice and data
communication, etc 07 p1331 A70-19291
Intersite trunk elements design and usage in in-
tegrated mission control center /IMCC/ as interface
equipment between internal voice communication and
worldwide network 08 p1460 A70-20814
Aircraft and ship position surveillance by satellites
system with independent capability and undelayed
voice and digital communication 09 p1723 A70-23043

Demand assignment signaling and switching
subsystems /DASSS/ design for communication satel-
lite, examining voice channels modulation 10 p1837 A70-24348

DASSS operational parameters and performance in
SPADE satellite voice communication system 10 p1837 A70-24350

TDMA demand-assigned satellite communication
system developed for INTELSAT, discussing PCM,
voice signals and channels, etc 10 p1839 A70-24362

Portable optical communcator for voice transmis-
sion combining pulse position modulation and low
power gallium arsenide diode 10 p1840 A70-24530

Satellite capacity utilization for mixed earth stations
network using SPADE concept/digital satellite com-
munication system employing demand- assignment
and voice-activated carrier techniques [AIAA PAPER 70-420] 11 p1996 A70-25404

Direct broadcast voice satellite for educational
system improvement, discussing lesson formatting,
ground receiver/programmer, multichannel capacity,
etc [AIAA PAPER 70-449] 11 p1998 A70-25423

Multiple access communication satellite systems
providing reliable speech communication for low den-
sity use in remote areas [JPL-TR-32-1501] 21 p3791 A70-41368

VOICE DATA PROCESSING

- Digital log-linear companding technique for nonu-
niform quantization of speech and image signals
01 p0044 A70-10784
Automatic formant-frequency extraction using
vowel-type spectrum, inverse filtering, moment calcu-
lation and evaluation by synthesized speech 06 p1009 A70-17909

VOID RATIO

- Two phase density and void fraction measurement
using beta, gamma and X ray radiation, considering
optimal accuracy and beam collimation 02 p0305 A70-12835
Nonequilibrium two phase forced convection flow,
describing pressure, temperature and void fraction
measurement techniques 02 p0305 A70-12838

VOIDS

- Radio Influence Voltage /RIV/ nondestructive test
method for detecting voids in neoprene-steel struc-
tures or other elastomers bonded to metal 13 p2420 A70-29245
Low energy fracture of high strength Al alloys with
void nucleating particles, using microprobe fractog-
raphy 23 p4206 A70-44194

VOIGT EFFECT

- Magneto-optics of semiconductors, taking into ac-
count intraband and interband effects with Faraday
and Voigt field configurations 18 p3297 A70-35951

VOLATILITY

- Volatile contaminants emitted from space cabin
construction materials tested under simulated space
conditions 01 p0031 A70-10237
Gas chromatography based on sampling gas-vapor
phase at liquid surface for determining volatile oxygen
containing compounds in biological media 04 p0646 A70-14580
Differential thermal analyzer coupled to mass spec-
trometer for kinetics of reactions giving volatile
products at high temperature, considering ablative
materials 14 p2664 A70-30292
Volatilizable C compounds in lunar fines from Mare
Tranquillitatis, investigating pyrolysis and acid hydroly-
sis products by mass spectroscopy and gas chro-
matography 21 p3779 A70-41628
Temperature and long term effects on volatility of
perfluoroalkyl ether and polysiloxane greases [ASME PAPER 70-HT-31] 22 p4058 A70-42435

VOLATILIZATION

- U VAPORIZING
VOLCANICS
U VOLCANOLOGY
VOLCANOLOGY
Pb isotope data from young mantle derived vol-
canics suggesting mantle evolution and lunar capture
04 p0743 A70-14396
Solar IR light brightness distribution reflected by
volcanic covers compared with lunar observation data
04 p0744 A70-14439
Neutron star vulcanism and seismicity, discussing
neutron star volcano size and shape possibilities
04 p0753 A70-15070
Volcanic and meteoritic processes compared as
lunar cratering agency, tabulating terrestrial lopolith
and cryptoepllosion structures 05 p0913 A70-16553
Lunar mascons formation by isostatic and volcanic
processes, using normal density lunar crust and mantle
model 06 p1150 A70-18476

Bottom rock structure and composition of young lunar craters compared with Kamchatka volcanic morphological analogs

07 p1385 A70-19424
Lunar sinuous rilles as volcano-tectonic fracture traces of sites of gas emission

09 p1758 A70-22743
Orbiting satellite-borne instruments for scientific observation of earthquakes, volcanic eruptions, atmospheric phenomenon, cyclones, floods and soil erosion

09 p1763 A70-23377
Oceanic ridge volcanic rocks alkali metal, alkaline earth, rare earth, nickel and major element content, observing partial melting

10 p1877 A70-24648
Ranger lunar photographic evidence for volcanic hypothesis, considering fracture systems, Caldera analogy, common walls, crater size, etc

12 p2297 A70-26985
Solar light brightness distribution reflected by volcanic covers compared with lunar observation data

13 p2485 A70-28464
Middle Miocene hiatus in volcanic activity of Western U.S., discussing K-Ar dates for Tertiary rock of Great Basin area

13 p2393 A70-28718
Oceanic volcanic rocks, discussing dispersed element characteristics to describe origin of magma types

15 p2731 A70-32100
Volcanic blankets aerological investigation by polarization and spectral techniques, determining brightness distribution of reflected solar light

15 p2803 A70-32495
Fe ion, Mg order-disorder in natural orthopyroxenes as function of temperature

16 p2896 A70-33087
Lunar craters, walled plains and maria compared with volcanic formations on earth

19 p3517 A70-37991
Lunar volcanic ridges features from interpretation of photographs by telescopes and satellites

19 p3518 A70-37992
Thermoelastic seismic-energy release as source mechanism for volcanic earthquakes, describing thermal microfracture tests

20 p3619 A70-39217
Fugacities of HCl and HF compared with abundance in volcanic fumarolic emanations, indicating magma undersaturation

20 p3619 A70-39321
Trace constituent changes effects on stratospheric properties after volcanic eruption, showing prolonged atmospheric temperature increase

20 p3622 A70-39490
Lunar luminescence phenomena, examining gas eruptions from volcanic activity, solar radiation and color

21 p3886 A70-41070
Apollo 11 lunar soil volcanic rock samples, mineralogical and petrological description and surface features

21 p3896 A70-41514
Multiphase volcanic eruptions associated with lunar craters Tycho and Aristarchus

23 p4253 A70-44882
New Mexico Bandera lava tube systems, noting similarities with lunar surface sinuous rilles

23 p4254 A70-44884

VOLT-AMPERE CHARACTERISTICS

Semiconductor laser active element radiation absorbing inhomogeneities effect on I-V characteristics, considering oscillation modes excitation

01 p0106 A70-10095
Electric characteristics and impurity distribution in GaAs-Ge heterojunctions obtained by deposition on p-type Ge

01 p0155 A70-10143
Negative resistance I-V characteristics of low voltage arc discharge in Cs plasma

01 p0150 A70-10172
Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization

01 p0150 A70-10173
GaAs and Si photocell batteries powered by solar radiation, investigating temperature dependence of efficiency I-V characteristics and optimal power

01 p0007 A70-10177
Current-voltage characteristics of cascaded solar thermoelectric generator, determining optimum hot junction temperature as function of radiation concentration

01 p0000 A70-10752
Mo-Si epitaxial planar Schottky barrier diodes, describing reverse I-V characteristics improvement by edge leakage effects elimination

01 p0052 A70-11174
Current-voltage characteristics of p-n junctions in cadmium telluride, discussing spectral sensitivity bands

01 p0160 A70-11596

Current-voltage and current-temperature characteristics of alloyed p Ge-n Si heterojunctions, discussing current flow process complexity

02 p0350 A70-11667
Silicon solar cells I-V characteristics, spectral response and diffusion length measured after neutron irradiation

03 p0537 A70-13025
Autoelectron and autophotoelectron emission from Fe-doped p-type GaAs cathodes in vacuum, noting I-V and emission characteristics dependence on light flux

03 p0538 A70-13067
Voltage-power sensitivity, response time, frequency limit and minimum registered power of hot carrier thermoelectric detectors calculated from characteristic semiconductor parameters

03 p0540 A70-13436
GaAs nonlinear I-V characteristics and negative differential conductivity associated with electron heating by electric field

03 p0540 A70-13720
Exploding bridgewire detonator electrical input requirements, discussing waveform, peak current and time to peak

03 p0550 A70-14143
MHD generator cathode current-sheath voltage characteristics for thermionic arc spot emission mode, noting role of cathode temperature

04 p0625 A70-14797
Performance degradation in cadmium sulfide solar cells, discussing cause identification technique, I-V curve parameter changes, etc

04 p0628 A70-15329
Dynamic I-V characteristics of hot cathode megawatt level nitrogen propellant pulsed MPD arc plasma source for various axial magnetic fields

04 p0729 A70-15642
Barium titanate ceramics with nonlinear electrical conduction, noting I-V relationship dependence on temperature, impurities and electrodes

05 p0891 A70-15990
P-n-n structure dynamic I-V characteristics at high injection levels mathematically determined, showing rectifying capability decrease with increasing harmonic signal frequency

05 p0892 A70-16196
Ge IMPATT diodes under pulsed operation to produce LF high efficiency oscillations, recording current and voltage waveforms

05 p0821 A70-16417
Chalcogenide glass based film face threshold switches I-V characteristics, presenting oscillogram and diagrams

05 p0892 A70-16542
Cathode emission from hollow cathode controlled by variable magnetic field to ensure proper I-V characteristics for efficient ion generation in thrusters

06 p1131 A70-18032
Dynamic I-V characteristics of megawatt pulsed MPD-ARC plasma thruster under various axial magnetic fields given for Ar and hydrogen propellants

06 p1131 A70-18092
Instability of semiconductor circuit with nonlinear current-voltage characteristics, showing potential negative differential conductivity effect

07 p1240 A70-19274
Solid electrolyte cells discharge characteristics and open-circuit voltage, evaluating diffusion coefficient of Ag from time dependent behavior of I-V relationship

07 p1196 A70-19386
Photoelectric composite multicell solar generator, deriving empirical equation for external I-V characteristic

07 p1196 A70-19623
Ohmic contacts to n- and p-type semiconductors obtained by ruby laser, noting linear current-voltage characteristics

07 p1299 A70-19797
Semiinsulating GaAs doped with Cr, discussing negative resistance segment in current-voltage curves of S diodes

07 p1242 A70-19798
Volt-watt sensitivity of dilatocapacitor types of thermal radiation receivers, noting low natural noise levels

07 p1284 A70-19815
Electrochemical generators based on thermodynamic equilibrium processes, deriving expressions for EMF, efficiency, and I-V characteristics

07 p1196 A70-20462
Zener diode used as hydrostatic pressure gauge, describing pressure effects on diode current/voltage characteristics

08 p1477 A70-21644
Plasma beam welding of light metal and heat resistant alloys, discussing weld characteristics, beam I-V characteristics, etc

09 p1690 A70-22077
Current-voltage characteristics and lifetime of thin film diodes on chalcogenide glass substrate with symmetrical and asymmetrical electrodes

09 p1647 A70-22751

Volt-ampere characteristics of metal-semiconductor contacts for Schottky barrier diodes, investigating suppression of minority carriers and frequency response

09 p1741 A70-23352
HF electromagnetic wave detector based on study of volt-ampere characteristics of luminescent plasma discharge

10 p1922 A70-24030
Intensity vs voltage curves for LEED beams from clean Ni surface, calculating Bragg spectrum with energy diagram method

10 p1927 A70-24077
Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization

10 p1925 A70-25018
Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics

11 p2015 A70-25350
Connecting wires length effect on sensitivity and current-voltage characteristics of sensors for dynamic values measurement, deriving integral electrical parameters

11 p2055 A70-26445
Electric arc stability with descending static I-V characteristics in plasmatrons using direct Liapunov method

11 p2093 A70-26734
Plasmatron geometrical parameters effect on electric arc I-V characteristics, using various gas vortex flows for arc stabilization

11 p2093 A70-26735
DC air flow plasmatron arc chamber operation with metal surfaces used for charge stabilization, obtaining I-V characteristics and gas flow parameters in quasi-limiting region

11 p1984 A70-26738
Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes

11 p2020 A70-26813
Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators

11 p2020 A70-26819
Tensodiode effect in long plate-shaped semiconductors, noting bend direction effects on I-V characteristics

12 p2195 A70-27312
MIS varactors applications as nonlinear reactances, discussing charge-voltage characteristics and minority carriers effect

12 p2196 A70-27685
Sinusoidal signal harmonics measurement to determine nonlinear resistance junction I-V equation, discussing applications to circuit analysis

12 p2204 A70-28132
HF quenched-domain mode /Q mode/ Gunn effect oscillator in single frequency operation using signal analysis, obtaining instantaneous I-V transfer characteristics

12 p2202 A70-28162
Output signal spectrum analysis for nonlinear active element in presence of distorted modulating voltage

12 p2191 A70-28342
SERT 2 mercury vapor fed hollow cathode operated in bell jar, determining volt-ampere characteristics and flow rates for plasma diagnostics

13 p2473 A70-28515
Electrostatic probes response due to thermionic electron emission, considering I-V characteristics and space-charge-limited current

13 p2459 A70-28635
Electrostatic probe behavior in RF excited plasma, illustrating perturbation effect of potential drop on I-V characteristics

13 p2406 A70-28935
Gunn diodes I-V characteristics width as function of carrier concentration/mobility and diode length, noting role of impact ionization in strong electric field

13 p2378 A70-29408
He-Ne laser focused beam effect on negative Si diodes base I-V characteristics

13 p2378 A70-29517
Recombination radiation intensity current dependence and I-V characteristics p-n-n diode operating in double injection mode and electrons trapping

14 p2625 A70-30163
Amorphous boron arsenide films deposited on Si substrates, measuring current voltage characteristics

15 p2785 A70-32584
Current-voltage relation for ion collection spherical DC probe at high ambient gas pressure

16 p2899 A70-32929
Spherical electrostatic probe in uniform quiescent continuum slightly ionized gas for range of bias potential and radius-Debye length ratio

16 p2912 A70-33863
Switching circuit with Se diode, comparing I-V characteristics with Se rectifiers

17 p3054 A70-35411

Electron bombardment effect on volt-ampere, voltage-capacitance and pulse characteristics of GaAs point contact pulse diodes

17 p3055 A70-35675

IV characteristics of high resistivity Ti-doped GaAs single crystals and S-diodes, using Hall constant and conductivity measurements

17 p3144 A70-35709

Negative resistance and conductivity segments in I-V curves of diode structures, taking into account injection junction imperfections

18 p3231 A70-36413

Sample dimensions effect on shape of I-V curve caused by overheating in media with ambiguous dependence of electron temperature on field

18 p3298 A70-36621

MOS structures deep depletion capacitance/voltage characteristics by ramp response method

19 p3389 A70-37972

Photovoltaic effects in semiconductors, considering excess load carrier transport and I-V characteristics

19 p3488 A70-38477

Nonlinear resistance element with square law I-V characteristics for electrical analogs of hydraulic systems

19 p3359 A70-38707

Plasma inhomogeneities effects on MHD generators I-V characteristics, energy conversion efficiency and optimum duct geometry

20 p3564 A70-39636

Diode mixer analysis for arbitrary I-V characteristics and commensurate levels of converted signals, using modulation characteristics method

20 p3588 A70-40147

Electrostatic plasma probe inverse process I-V properties from current voltage characteristics, improving accuracy and reliability by theory in terms of new variables

20 p3683 A70-40162

Small-orifice hollow cathode discharge properties in electron bombardment ion thrusters, using vaporized mercury propellant

[AIAA PAPER 70-1087] 20 p3693 A70-40248

Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics

20 p3600 A70-40462

Heat treatment and photovoltaic properties of copper disulfide-cadmium sulfide heterojunctions, measuring I-V characteristics, capacitance and spectral response

21 p3862 A70-41911

Hollow cathode shape effect on glow discharge parameters and potential jump in cathode region, investigating I-V curves

22 p4078 A70-42357

Gunn diode oscillators in domain suppression mode, showing dynamic I-V curve shape relationship to donor concentration and crystal thickness

22 p3997 A70-43128

Thermal emission cathodes made from lanthanum, yttrium and gadolinium hexaborides, measuring I-V characteristics

22 p3998 A70-43442

Gunn microwave oscillators I-V characteristics in quenched and retarded modes, using piecewise linear approximation

23 p4168 A70-43778

Miniature avalanche MOS diode, investigating capacitance voltage characteristics of deep depletion regime

23 p4172 A70-44007

Corona discharges from fine W points in liquid He initiated by field ionization or emission, noting anomalous characteristics

23 p4221 A70-44889

Current twisting in double injection ohmic contact long p-n diodes with S-shaped current-voltage curve, showing unstable density at negative resistance segment

23 p4176 A70-45061

High cutoff negative resistance silicon carbide diodes, noting temperature independent current-voltage curve

23 p4176 A70-45067

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes

24 p4317 A70-45185

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators

24 p4318 A70-45191

Volt-ampere characteristics of exploding Cu, Nichrome, Al and Ni wires during explosions induced by pulsed current in air

24 p4378 A70-45466

Semiconductors with bipolar conductivity under electron-hole scattering, calculating plasma pinch effect on I-V characteristics

24 p4390 A70-45659

Thin film BiSb-oxide-BiSb tunneling junction I-V characteristics anomalies as function of temperature, magnetic field and bias voltage

24 p4390 A70-45662

Si-carbide composites electrical conductivity from temperature and thickness dependence, obtaining volt-ampere characteristics via computer method

24 p4391 A70-46154

VOLTAGE

U ELECTRIC POTENTIAL

VOLTAGE AMPLIFIERS

Computer modeling of operational amplifier integrated circuit in ionizing radiation environment, using RLC network and voltage transfer curve

04 p0658 A70-14740

Two-cascade amplifying circuits with current and voltage feedback for semiconductor precision devices

24 p4321 A70-46394

VOLTAGE BREAKDOWN

U ELECTRICAL FAULTS

VOLTAGE GENERATORS

NT PHOTOVOLTAIC CELLS

Modulated high voltage pulse generator, using rectification of voltage obtained from HF oscillator

06 p1022 A70-17776

Controllable generator of linearly stepped voltage pulse using avalanche transistors, controlling avalanche-transistor relaxation oscillator by gating storage condenser

09 p1643 A70-22130

High sawtooth voltage generator with semiconductor triodes, giving circuit parameters and diagrams

16 p2873 A70-33212

Long period duration digital sinusoidal voltage generator, presenting schematic diagram and theoretical and operational characteristics

19 p3385 A70-37376

VOLTAGE MEASUREMENT

U ELECTRICAL MEASUREMENT

VOLTAGE REGULATORS

Output voltage stabilizers for thermal compensation in semiconductor power generating circuits, using stabilatron reference source

01 p0049 A70-10139

Integrated analog voltage regulator sensitivity to small signal transient radiation, discussing circuit hardening by diode compensation

04 p0658 A70-14742

Generator regulator for Ni-Cd batteries capable of sensing temperature, reducing charge rate and limiting output to increase batteries life

11 p1983 A70-25884

Regulated spacecraft solar array mathematical model for high voltage power supply regulator analysis

21 p3757 A70-41208

Buck-boost main bus voltage regulator for solar array battery space power system

21 p3758 A70-41219

Solar cell array maximum power point in scientific satellites via closed loop conductance matching regulator

21 p3758 A70-41220

Hydrazine-fuelled battery low power consumption auxiliary system with voltage regulator and gas pumps

22 p3966 A70-43539

VOLTAGE VARIATION INDICATORS

U VOLTMETERS

VOLTERRA EQUATIONS

Differential and integral inequalities theory and applications, Volume 1, Ordinary differential and Volterra integral equations

01 p0133 A70-11324

Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius encased in shell under pressure and unsteady temperature field

02 p0384 A70-11663

Potential axisymmetric vortex flow interaction with stationary flat surface, using existing numerical analysis by transforming boundary value problem to Volterra integral equations

04 p0668 A70-14864

Stress-strain distributions in linear viscoelastic cylinder, reducing problem of hollow cylinder with moving inner boundary to Volterra integral equation

07 p1406 A70-19303

Volterra operators extension, considering structure of complete operators and invariant subspaces

09 p1711 A70-22146

Volterra method applied to solution of mixed boundary value problems for wave equation

12 p2159 A70-28243

Solutions behavior of nonlinear system of linear Volterra integral equations, discussing applicability of standard fixed point theorems

16 p2943 A70-34000

Volterra equations for stresses, strains and displacements of viscoelastic tube with variable radius encased in shell under pressure and unsteady temperature field

19 p3547 A70-38437

VOLTMETERS

Supply phase voltage loss detection failure by voltage sensors in industry

13 p2378 A70-29349

High resolution successive approximation voltmeters using digital carry to improve speed and accuracy

19 p3427 A70-38049

VOLUME

Heart stroke volume estimation at submaximal exercise using blood hemoglobin content and heart rate

20 p3576 A70-40328

VOLUMETRIC ANALYSIS

Modified apparatus for volumetric determination of alveolar carbon dioxide as indicator of pilot hypernea

10 p1825 A70-24503

Maximum isovolumic hemodilution by volume substitution determined by plasma expanders infusion in dogs

10 p1821 A70-25083

Vapor volume entrained in liquid bulk from boundary layer boiling on vertical plate in low gravity field

21 p3947 A70-41055

Elastic wave front control volume analysis in laminated and fiber reinforced composite materials

22 p4119 A70-43677

Macroscopically homogeneous composites control volume approach, examining Hugoniot equation of state

22 p4060 A70-43683

Oxygen and nitrogen adsorption on thin tantalum films, measuring pressure, electrical resistivity and temperature

24 p4363 A70-46219

VON KARMAN EQUATION

Von Karman transonic similarity law applied to flow through plane turbine blade cascades

04 p0616 A70-15183

Karman formula generalization for turbulent motion in atmospheric boundary layer, including improved variant for thermally stable and unstable conditions

05 p0878 A70-16205

Stressed state of shallow spherical shells of revolution undergoing large displacements reduced to Karman equation, solved by small parameter method

05 p0935 A70-16235

Von Karman theory of vortex trails and vorticity diffusion applied to atmospheric mesoscale eddy patterns to calculate viscosities, ages, radii, tangential velocities, etc

06 p1098 A70-18242

Von Karman equations for rectilinear plate vibrations used for triangular plates, discussing amplitude/thickness effect and multimodal frequency formula

07 p1416 A70-20211

Nonuniqueness theorems for von Karman equations governing thin flat elastic plate deflections clamped at edges and subjected to normal and edge loading

09 p1768 A70-22063

Compressible turbulent plane Couette flow solution with variable heat transfer based on von Karman model extended to arbitrary wall temperature

12 p2211 A70-27839

Two dimensional transonic cascade flow, using Von Karman similarity law

22 p4089 A70-42347

VON MISES THEORY

U STRESS FUNCTIONS

VON ZEIPPEL METHOD

Von Zeipel method applied to stellar three body problem, eliminating short period terms and establishing two integrals of motion

05 p0909 A70-16337

Satellite motion in lunar orbit by von Zeipel method, considering perturbations due to nonspherical lunar gravity field and earth and solar attraction

10 p1939 A70-24186

Von Zeipel mappings equivalence to Lie transforms shown by order independent method

14 p2639 A70-30706

Satellite orbit theory error bounds and initialization, investigating first order von Zeipel method in axisymmetric force field

18 p3320 A70-37067

Perturbation theories based on canonical transformations, examining von Zeipel theory and Hamiltonian functions

22 p4109 A70-43749

VOR SYSTEMS

U VHF OMNIRANGE NAVIGATION

VORTEX BREAKDOWN

Vortex separation effects on elliptic bodies lift distribution, analyzing separated flow pattern

04 p0619 A70-15385

Turbulent trailing vortex decay calculated from circumferential velocity and eddy viscosity dependent on Reynolds number

10 p1802 A70-24561

Low speed buffet intensity under pressure fluctuations on slender wing aircraft at vortex breakdown, using wind tunnel model

10 p1963 A70-25067

VORTEX COLUMNS

U VORTICES

VORTEX DISTURBANCES

U VORTICES

VORTEX FLOW

U VORTICES

VORTEX GENERATION

U VORTEX GENERATORS

VORTEX GENERATORS

Axisymmetric incompressible fluid flow aerodynamic properties in flat vortex chamber, studying core and boundary layer interactions and velocity fields

03 p0551 A70-13731

Cold flow-porous plate simulation of swirling flow-field in spinning end-burning rocket chamber, noting vortex generation and flow characteristics

04 p0764 A70-15541

Ball lightning mechanism proposal based on mathematical model for electric discharge current in parabolic plasma shell forming vortex-type storm front

05 p0879 A70-17021

Secondary vortex generation in near wake of circular cylinders under forced oscillation, analyzing motion dependent transition regimes using hydrogen bubbles flow visualization

[AIAA PAPER 69-755]

06 p1032 A70-17212

Wind tunnel investigated flow stabilization at horizontal control surfaces by vortex BCL technique, considering angles of attack, elevator deflection and shape

06 p0968 A70-17853

Vortex refrigerators characteristics, examining configurations with cylindrical and conical hot ends with and without diffuser

06 p0988 A70-17855

Flow turbulence in wind tunnel model tests, observing generation methods effect on aerodynamic flow characteristics distribution

08 p1483 A70-21074

Propulsive and lifting motions of pointed profile in ideal incompressible fluid related to alternate vortices emission

08 p1433 A70-21234

Counterrotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions

08 p1599 A70-21828

Vortex and potential motions interactions in relativistic hydrodynamics, studying mutual generation

09 p1754 A70-22460

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces

[ASME PAPER 69-HT-37]

09 p1790 A70-23555

Taylor-Goertler vortex formation effect on heat transfer through boundary layer on concave wall

[ASME PAPER 69-HT-3]

09 p1790 A70-23556

Pressure fluctuations in acoustic field of boundary layer under slot suction, considering vortex formation and separation on edges

12 p2209 A70-27298

Delta wing low aspect ratio aircraft vorticity generating effects, discussing wind tunnel tests for hazardous effects

12 p2156 A70-27692

Plane flow problem for two hinged plates in motion toward each other with fluid displacement, discussing single vortex application to biomechanics

13 p2338 A70-28481

Two dimensional circular cylinder vortex excitation in uniform flow using linear binary system for flutter analysis

13 p2341 A70-29057

Helical vortex generation in rotating flow in straight tube having angular momentum flux sufficiently large relative to linear momentum flux

14 p2565 A70-30277

Vortex generation in water tank, discussing vorticity distribution on free surface and critical depth of air entrainment for various Reynolds numbers

14 p2567 A70-31275

Surface pressure and lift measurement on model lifting rotor blade as function of vortex interaction, using flush mounted pressure transducers

17 p3009 A70-34737

Centrifugal impellers primary and secondary flows velocity distributions, determining vorticity generation

18 p3243 A70-36871

High temperature convective heat transfer in vortex chamber as function of Reynolds number and geometry, measuring pressure variations

19 p3552 A70-38186

Plasma vortices during electrodynamic distortion of curved copper wire exploding in atmospheric air, using shadowgraphs

22 p4081 A70-42807

Vane type vortex generators to prevent turbulent compressible boundary layer separation, measuring drag in supersonic flow

23 p4133 A70-44527

VORTEX RINGS

Stationary ring vortices in unbounded conducting fluid, investigating self excitation of magnetic field by vortices

13 p2461 A70-28965

Solar atmosphere vortex ring observation in H alpha light [2 December 1969]

20 p3703 A70-39022

Flow velocity and pressure profiles due to vortex ring confined in cylindrical channel, using electromagnetic analogy

20 p3609 A70-39651

VORTEX STREETS

NT KARMAN VORTEX STREET

Vortex street parameters in free wake behind body in plane fluid flow, deriving equations for vortex frequency, circulation and interspacing

01 p0060 A70-10146

Flapping wing unsteady periodic motion relationship to forces effect on wing profile and vortex street in wake, determining propeller thrust by potential theory

13 p2337 A70-28479

Heaving airfoil wakes visualization with jet flap augmented lift, measuring vortex street parameters

13 p2338 A70-28821

Vortex streets characteristics determination for plane jet having uniform initial velocity profile

16 p2890 A70-33108

Electrostatic probe measurements of vortex streets growth in plasmas bounded shear flow

[AIAA PAPER 70-758]

17 p3139 A70-34493

Unsteady incompressible planar gas jets with stable vortex street, investigating near flow field region to establish oscillatory component

19 p3404 A70-37799

VORTEX TUBES

U HILSCH TUBES

U VORTICES

VORTICES

Vortex diffusion in viscous compressible fluid, deriving nonlinear differential equations from density velocity and pressure discontinuities considerations

01 p0060 A70-10145

Goertler vortices effect on boundary layer transition on concave surface, discussing instability oscillations breakdown leading to turbulent motion

01 p0061 A70-10539

Vorticity number derivation for rotational flows, discussing reciprocal of kinematic Rossby number and vorticity measures

01 p0061 A70-10541

Flow visualization of boundary layer transition downstream of Gortler vortices, distinguishing successive instability modes by Te method

01 p0065 A70-11094

Water tunnel experiments with slender cones to investigate frequency of vortex shedding at low Reynolds number controlled by local diameter

01 p0003 A70-11098

Waves vs eddies in dynamics of turbulent boundary layer fluctuating motions with scale of mean flow

02 p0287 A70-12361

Optical density measurements in high speed confined air vortex, discussing light deflection mapping of vortex density field at off axis positions

[AIAA PAPER 68-694]

03 p0480 A70-12906

Swirling flow equations in converging nozzles, comparing analytical and experimental data

03 p0405 A70-12929

Axial flow reversal in swirling incompressible tube flow, discussing static pressure, velocity profiles and turbulent Navier-Stokes equation

03 p0465 A70-13017

Aerohydrodynamic model of relief waves in baroclinic atmosphere based on convection theory, analyzing strong turbulent vortex regime responsible for CAT

[ONERA-TP-727]

03 p0408 A70-13638

Adiabatic disturbances propagating as transverse waves in inviscid fluid rotating as Rankine vortex about cylindrical container axis, discussing harmonics

03 p0467 A70-13779

Swirling flow through axisymmetrically deformed tube without consideration of viscosity and compressibility, noting wall flow for critical Rossby number values

03 p0468 A70-13788

Transverse magnetic fields effects on velocity perturbations and vortices behind circular cylinder in electrolyte flow at various Reynolds and Stewart numbers

04 p0726 A70-14543

Potential axisymmetric vortex flow interaction with stationary flat surface, using existing numerical analysis by transforming boundary value problem to Volterra integral equations

[ASME PAPER 69-APM-R]

04 p0668 A70-14864

Stationary and vibrating circular cylinders for boundary layer separation point, determining vortex excited oscillation range

04 p0670 A70-14988

Plane and axisymmetric transonic flow approximate equations of inviscid nonheat conducting gas for point on sonic line with entropy having extremal value

04 p0617 A70-15234

State and velocity distribution measurements for air in counterflow vortex tube to determine axial variation of flow quantities

05 p0831 A70-15884

Hydrodynamic fields of revolution around sphere in unbounded fluid governed by Oseen equation, emphasizing streamlines and attached vortex

05 p0832 A70-16157

Vortex sheets pitch along constant aerodynamic pitched propeller blade at zero traction, discussing calculation, construction and wind tunnel testing

05 p0790 A70-16159

Spiral cloud vortex model in occluded extratropical cyclone constructed using atmospheric dynamics equations and satellite photographs

05 p0879 A70-16642

Vortices orientation due to unstable Ekman boundary layer, discussing analogy to Taylor-Goertler and thermoconvective vortices

06 p1096 A70-17465

Stability theory for pair of trailing vortices, investigating induced field convection, modes, amplification, cut-off distance, etc

[AIAA PAPER 70-53]

06 p0969 A70-18055

Flow model for steady asymmetric vortex system shed from slender body of revolution in coning motion

[AIAA PAPER 70-52]

06 p0971 A70-18118

Electric and magnetic fields of waterspouts measured by instrumented U.S. Navy aircraft

06 p1101 A70-18582

Streamwise directed vortices and crosshatched surface roles in heat transfer and ablation processes of reentry vehicles

07 p1394 A70-19729

Turbulent shear flow kinematic characteristics determined by photographic method and flow visualization using vortex model

07 p1259 A70-19827

Unsteady flow behind circular cylinder by flow visualization, determining vortices length variations with time at various Reynolds numbers and dimensionless accelerations

07 p1261 A70-20236

Potential vortex flow interaction with stationary surface calculation extended to Volterra equations by transforming boundary value problem, improving critical Reynolds number bounds

08 p1484 A70-21472

Vortex and potential motions interactions in relativistic hydrodynamics, noting effects of gravitation equations nonlinearity

09 p1754 A70-22461

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

[AIAA PAPER 69-11]

09 p1662 A70-23223

Fluidic vortex valve to modulate solid propellant generated hot gas flow

[AIAA PAPER 69-424]

09 p1743 A70-23249

Circle theorem for potential flows extended to two dimensional steady incompressible ideal fluid flows of constant vorticity

09 p1664 A70-23714

Turbulent boundary layer vortex structures using hydrogen bubble technique

11 p2035 A70-25864

Off-centerline heating on lee surface of supersonic delta wing with separation and vortex initiation at leading edge

11 p1976 A70-25996

Aerodynamic sound emission from compact eddy region by singular perturbation approach, discussing Lighthill and Ribner theories

11 p1977 A70-26687

Nonfree vortex flow in contrarotating axial flow fans under radial equilibrium assumption, discussing pressure rise coefficient and static efficiency

12 p2156 A70-27600

Carbon dioxide CW laser-Doppler velocimeter for detecting aircraft wing tip trailing vortices by measuring atmospheric aerosols backscatter

12 p2249 A70-27630

Wing tip trailing vortices hazard reduction on closely spaced parallel runways by suction application, discussing power requirements

12 p2207 A70-27631

Delta wing low aspect ratio aircraft vorticity generating effects, discussing wind tunnel tests for hazardous effects

12 p2156 A70-27692

Vortex layer and entropy of supersonic gas flow past circular cones at incidence using surface velocity corrections

12 p2159 A70-28230

Suspended Stokes particle-single wave interaction effect on energy dissipation and vorticity of random turbulent incompressible fluid approximated by Fourier-Stieltjes integral

12 p2213 A70-28236

Cyclone cloud vortex evolution from satellite photographs, examining reasons for onset and disintegration

13 p2444 A70-28588

Slender wings leading edge vortex flow effect on roll damping at subsonic speeds

[AIAA PAPER 70-540]

13 p2339 A70-29007

Gravity effect on conical vortex separator, predicting body force effect on heavy fluid boundary layer flow for limiting condition determination

13 p2391 A70-29978

Unstable Ekman boundary layer vortex structure analysis by generating similar flow in liquid filled rotating cylinder

14 p2604 A70-30545

Velocity and pressure distributions of tornado-like two cell vortices within boundary layer, using different assumptions for eddy diffusion coefficient

14 p2604 A70-30547

Nonlinear bearing surface of symmetrical rectangular edge wings without slipping in incompressible flow, using oblique horseshoe vortex model

15 p2673 A70-32128

Linearized two dimensional double vortex sheet model of inviscid compressible jet instabilities over all Mach numbers

15 p2722 A70-32375

Maximum thrust nozzles design for rotational or nonequilibrium simple dissociating gas flows, including boundary layer effects

[AIAA PAPER 70-707] 16 p2891 A70-33567

Vortices in axisymmetrically separated flows, comparing results of various experiments

16 p2894 A70-33895

High Reynolds number flow in moving corner, observing vortex motion at piston and cylinder wall interface by flow visualization techniques

16 p2895 A70-34240

Boundary layer formation on walls of conical pressure nozzle during vortex flow

16 p2896 A70-34299

Low Reynolds number flow inside Delaval nozzle, examining gas density and rotational temperatures by electron beam techniques

[AIAA PAPER 70-810] 17 p3065 A70-34454

Vortex visualization applications in helicopter noise research, using smoke generator in rotor blade tip

17 p3057 A70-34712

Vortex sheet instability leaving semiinfinite flat plate, considering boundary effects

17 p3073 A70-35601

Vortex core diameters calculation methods for axisymmetric angular momentum flows

17 p3074 A70-35750

Incompressible laminar boundary layer, vortex and axisymmetric wake/jet flow parabolic equations solution by weighted residuals method, describing use of exponentials

17 p3074 A70-35883

Pulling force during motion of sinusoidally deformable flat profile, taking into account trailing edge vortices

18 p3241 A70-36280

Forced vortex impeller in axial flow fan without inlet vanes, presenting lift and drag coefficients of blade sections, loss of head, etc

19 p3352 A70-38222

Three dimensional flow through rotor of axial vortex flow fan, using airfoil method for design

19 p3352 A70-38248

Laminar vortex flow interaction with stationary surface, considering flow field, velocity, Reynolds number, etc

19 p3405 A70-38348

Critique of Ruderman theory of Crab pulsar LF wobble as long wavelength oscillation of superfluid vortex lattice

19 p3522 A70-38604

Sound wave radiation and excitation in plane infinite plate by vortices

19 p3354 A70-38722

Meridional mean eddy transport of enthalpy in Southern Hemisphere during IGY, comparing results with Northern Hemisphere

20 p3661 A70-39143

Three dimensional boundary layer on lee- and wind-side of prolate spheroid, emphasizing separation and embedded streamwise vortices

20 p3608 A70-39359

Vortex signature recognition from radial velocity field by Doppler radar

20 p3664 A70-40067

Poiseuille pipe flow instability, considering asymptotic analysis for small wave number disturbances

21 p3807 A70-41241

Acoustic pulse transmission through plane vortex sheet, examining zone of silence, geometrical acoustics and sound radiation

21 p3849 A70-41243

Viscous flow field in pneumatic vortex rate sensor, discussing boundary layer parameters, velocity profiles and swirling flow theory

[ASME PAPER 70-FLCS-16] 22 p4007 A70-42411

Hybrid fluidic heading reference system with negative feedback servo loop around vortex rate sensor

[ASME PAPER 70-FLCS-10] 22 p3963 A70-42417

Vortex pressure regulator with adjustable settings, discussing design, operation and test results

[ASME PAPER 70-FLCS-9] 22 p3964 A70-42418

Optimum low temperature two circuit vortex refrigerator using compressed air precooled in heat exchanger

22 p3965 A70-42808

Arctic and antarctic atmospheric circulation differences, discussing circumpolar vortices and isobaric surfaces altitude changes

22 p4065 A70-43168

Large scale axisymmetric atmospheric vortex wind velocity determination, using statistical cloud data from meteorological satellites

22 p4065 A70-43376

Vortex induced vibration problems, deriving mathematical model for periodic lift on circular cylinder

22 p3960 A70-43546

Continuous trailing vortex sheet rolling up into two discrete vortices, discussing wing lift limitations

23 p4131 A70-43890

Wing lift increase by spanwise blowing along upper surface, causing flow reattachment on wing and vortex induced effective aerodynamic camber increase

[ICAS PAPER 70-09] 23 p4132 A70-44120

Mass transfer and velocity gradient fluctuations at wall in two dimensional or rotational flow for large Schmidt numbers

23 p4181 A70-44210

Tornadic vortex motion equation derivation based on kinematical modification of Kelvin theorem

23 p4215 A70-44547

Inviscid rotational supersonic flow near three dimensional stagnation point, examining solutions for compatibility with vortical shock layer boundary conditions

23 p4183 A70-44692

Vortices growth in vortex sheets bounding jets flowing from two dimensional slit and circular orifice observed by computer experiments

24 p4327 A70-46244

VORTICITY

Coupled diffusion of heat and vorticity in gaseous vortex caused by radial mass convection and temperature dependence of gas properties

02 p0400 A70-12858

Spatial resolution analyses of vorticity meter and hot wire arrays for measuring velocity derivatives in isotropic turbulence

03 p0492 A70-13760

Vorticity entrainment effects in zonal jet flows, considering Long asymptotic series, shear enhancement, etc

04 p0715 A70-15519

Vorticity effects on drag friction and heat transfer near stagnation point of supersonic jet impinging on obstacle

05 p0833 A70-16290

Higher order boundary layer effects on zero-lift drag of sphere-cones, investigating transverse curvature, shock vorticity, displacement, slip and temperature jump

[AIAA PAPER 70-185] 06 p1041 A70-18173

Von Karman theory of vortex trails and vorticity diffusion applied to atmospheric mesoscale eddy patterns to calculate viscosities, ages, radii, tangential velocities, etc

06 p1098 A70-18242

Nonlinear stability of plane Couette flow, computing stream function, vorticity distribution and Reynolds stresses

07 p1255 A70-19211

Sporadic E layer formation by vortical winds, discussing effect on ionospheric electron concentration distribution

07 p1267 A70-19454

Jupiter geostrophy indicated by circulation, vorticity and Rossby number determined from Great Red Spot observations

08 p1580 A70-21573

Shear flow of inviscid incompressible fluid past sphere, calculating secondary vorticity and upstream velocity distribution

09 p1664 A70-23680

Asymmetry and vorticity effects on linear instability of channel flow with one parameter velocities and inflection points, proving wave speed theorem

10 p1862 A70-23951

Vorticity distribution influence on inviscid laminar jet boundary layer instability investigated for large Reynolds numbers, using shear flow and linearized theory

[DFVLR-SONDDR-14] 10 p1868 A70-24163

Geostrophic wind vector rotation correlated with precipitation and circulation in vertical solenoid field

11 p2076 A70-26074

Sporadic E layer formation by vortical winds, discussing effect on ionospheric electron concentration distribution

18 p3249 A70-36928

High Reynolds number isotropic homogeneous turbulence fine scale structure heuristic model, relating spatial intermittency to vorticity generation

20 p3609 A70-39665

Monochromatic acoustic wave interaction with turbulent jet fluctuating vorticity field, using Fourier analysis to extend spectral relations

[ASME PAPER 70-FLCS-6] 22 p4008 A70-42426

Aircraft condensation trails formation by interactions of exhaust emission, vorticity of wing induced downwash and ambient atmosphere

22 p3958 A70-42684

Atmospheric vorticity and dust devil rotation direction relationship, suggesting shear in horizontal flows associated with convective activity in unstable atmosphere

22 p4065 A70-42912

Relaxation gas dynamics, discussing vorticity and drag generation by relaxation, linearized theory and shock waves structure

23 p4178 A70-43889

Extremely high temperature deuterium examination, using coaxial plasma accelerators to determine neutron production and vorticity

23 p4227 A70-44452

Laminar boundary layer on uniformly rotating sphere studied by momentum integral method, imposing zero vorticity condition

23 p4184 A70-44981

Diabatic steady gas flow vorticity, examining various kinematic and kinetic properties

24 p4328 A70-46365

VORTICITY EQUATIONS

Vortex diffusion in viscous compressible fluid, deriving nonlinear differential equations from density velocity and pressure discontinuities considerations

01 p0060 A70-10145

Vortex street parameters in free wake behind body in plane fluid flow, deriving equations for vortex frequency, circulation and interspacing

01 p0060 A70-10146

Vorticity number derivation for rotational flows, discussing reciprocal of kinematic Rossby number and vorticity measures

01 p0061 A70-10541

Karman theory extension to interference between parallel vortex streets, examining geometry of vortex configurations

03 p0406 A70-13274

Atmospheric zonal circulation index annual variations calculation in latitude and time terms, using vertical vorticity component equation

07 p1328 A70-18650

Karman trail vortices tangential velocity decay measurement by hot film anemometer experiments

09 p1661 A70-22961

VORTICITY TRANSPORT HYPOTHESIS

Integral theorems on vorticity transport derived by Carstou method, suggesting need for redefining Truesdell concepts of convection and diffusion

11 p2037 A70-26175

Turbulent boundary layer characteristics on simple shapes in hypersonic flow, using mixing length theory and eddy exchange coefficient

14 p2564 A70-30262

Astrophysical hypothesis of vorticity expulsion from strong turbulence regions, indicating mechanism of thermally driven circulation currents

22 p4010 A70-42690

VOWELS

Automatic formant-frequency extraction using vowel-type spectrum, inverse filtering, moment calculation and evaluation by synthesized speech

06 p1009 A70-17909

VOYAGER PROJECT

Ablation, transmission transparency and embrittlement of heat shield materials for Voyager tested under simulated Mars entry conditions

07 p1395 A70-19885

VOYAGEUR HELICOPTER

U CH-46 HELICOPTER

VTO FIGHTER AIRCRAFT

U FIGHTER AIRCRAFT

U VERTICAL TAKEOFF AIRCRAFT

VTOL

U VERTICAL LANDING

U VERTICAL TAKEOFF

VTOL AIRCRAFT

U VERTICAL TAKEOFF AIRCRAFT

VULCAN AIRCRAFT

Tailless delta Avro Vulcan aircraft design, hardware and flight results

14 p2532 A70-31391

VZ-10 AIRCRAFT

U XV-4 AIRCRAFT

VZ-11 AIRCRAFT

U XV-5 AIRCRAFT

W

W WINGS

U VARIABLE SWEEP WINGS

WAFERS

Electronic wafer packages heat transfer coefficients determined analytically, considering roles of geometrical and physical parameters

01 p0051 A70-10991

WAKEFULNESS

Synchronizing and desynchronizing systems for cerebral electrical activity, noting roles in sleep and wakefulness mechanisms

03 p0417 A70-13073

- Sleep-wakefulness cycle electroencephalogram of auditory and visual portions of neocortex and hippocampus activity in cats, using spectral analysis and integration 14 p2536 A70-30185
- Human sleep pattern changes due to acute sleep-waking cycle reversal 20 p3569 A70-38990
- Click-evoked potentials in rat auditory cortex, medial geniculate body, reticulate formation and hippocampus during natural sleep and waking 21 p3761 A70-40917
- EEG dynamics during normal and altered human sleep-wakefulness regimens 22 p3971 A70-43137
- Human cortisol intermittent secretion during early morning sleep and sleep-wake cycle, examining adrenal activity 24 p4305 A70-46410
- WAKES**
- NT AIRCRAFT WAKES
- NT HELICOPTER WAKES
- NT HYPERSONIC WAKES
- NT LAMINAR WAKES
- NT SLIPSTREAMS
- NT SUPERSONIC WAKES
- NT TURBULENT WAKES
- Aerodynamic velocity field induced by plate in motion correlated with ideal gas flow at specific Reynolds number, discussing wake formation 03 p0410 A70-14270
- Mean flow velocity distribution calculated from momentum deficit superposed behind single cylinders in finite array of arbitrarily spaced parallel cylinders [ASME PAPER 69-WA/FE-11] 04 p0614 A70-14781
- Radio wave scattering increase in moving body wake near caustic in vertically inhomogeneous ionosphere 14 p2550 A70-30809
- Subsonic and transonic gas flow in wake behind finite thickness plate based on Navier-Stokes equations 15 p2719 A70-31484
- Natural convection wake from heated horizontal line source in liquids and in air, determining temperature field in plume above wires 15 p2825 A70-31817
- Far wake properties of reentry body in hypersonic air flow calculated with or without chemical kinetics, using finite difference method 16 p2836 A70-33753
- Electrostatic near wake model for ionospheric satellites, using low speed fluid dynamic blunt body similarities [AIAA PAPER 69-674] 16 p2837 A70-33867
- Dihedra placed at angle of attack in hypersonic rarefied gas flow, investigating base flow and near wakes 17 p3010 A70-35047
- Wake behind trailing edge of flat plate in constant velocity impulsively started stream, using boundary layer theory 18 p3206 A70-36196
- Velocity pulsation spectra in subsonic wakes behind circular disks and sphere, using thermoanemometer with constant filament temperature 18 p3207 A70-36279
- Rotor wakes intrastator transport effects on high Mach number axial flow compressors performance, considering stagnation temperature profile and rotor blade loss factor [ASME PAPER 70-GT-39] 18 p3209 A70-36869
- Spoiler theory based on mathematical model, using two dimensional potential theory in conjunction with experimental data on wake phenomena 22 p3957 A70-42273
- High speed cinematographic recording of wake behind hypervelocity projectiles [SMPT PREPRINT 102] 22 p4032 A70-43033
- Wave-riders aerodynamics and heat transfer, investigating lift to drag ratios for supersonic and hypersonic vehicles [ICAS PAPER 70-18] 23 p4276 A70-44129
- WALKING**
- Heart rate-body temperature relationship during walking in hot environment 06 p0993 A70-17431
- Knee joint walking mechanics, calculating forces transmitted by joint tissue 07 p1205 A70-19246
- Human locomotor performance before and after prolonged hypodynamia, discussing biochemical features and changes in step length, torso and extremity kinematics, etc 10 p1816 A70-24683
- Human femur junctions load actions and stresses during walking calculated from measurements 15 p2692 A70-32327
- Muscle function mechanics across knee joint in walking, relating tension to length, velocity and energy absorption 19 p3368 A70-37810
- Partial gravity simulators at Manned Spacecraft Center for astronaut acquaintance with dynamics of moon walking 21 p3804 A70-41192
- WALKING MACHINES**
- Dynamical motion of Lunar Hopping Laboratory in plane change maneuver between ballistic and foot-in-contact phases 13 p2384 A70-28523
- WALL FLOW**
- Diffusion flame structure in boundary layer with fuel injection from wall, analyzing expansions with single step reversible chemical kinetics, including nonequilibrium case 01 p0214 A70-10334
- Polarographic probe for wall studies of turbulent flow velocity and direction by measuring maximum reduction current on redox compound microelectrode 01 p0602 A70-10664
- Three dimensional instability of perturbed conducting fluid laminar boundary layer flow on concave walls in transverse magnetic field, analyzing various Hartmann numbers 01 p0152 A70-10934
- Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics or fluid jet amplifiers 01 p0011 A70-11569
- Turbulence constant for flows near walls, analyzing viscosity dependence on wall distance by utilizing maximum stability principle 01 p0069 A70-11627
- Fuel injections into supersonic air stream through isolated normal ports and porous wall, using interferometry, schlieren and high speed photography 02 p0354 A70-12044
- Hydrodynamic turbulent boundary layer on smooth wall, using finite difference theory 02 p0285 A70-12351
- Boundary layer calculation for semiinfinite plane turbulent jet on porous wall 02 p0287 A70-12691
- Transient heat transfer in forced convection flow over curved wall with zero Prandtl number, applying to laminar boundary layer with variable free stream velocity 02 p0400 A70-12857
- Temperature sensor location for accurate averaging in fluid flowing through heated or cooled circular duct 03 p0486 A70-13557
- Swirling flow through axisymmetrically deformed tube without consideration of viscosity and compressibility, noting wall flow for critical Rossby number values 03 p0468 A70-13788
- Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations 03 p0468 A70-13867
- Reflected shock wave velocity, boundary layer disturbance and wall ionization measurements using thin film resistance thermometers 04 p0666 A70-14537
- Incompressible electrically conducting fluid flow along rectangular duct under transverse magnetic field, noting equivalency of Hunt solutions and thin wall restriction 04 p0726 A70-14614
- Heat transfer to insulator wall of linear MGD accelerator attached to shock tube, comparing measurements with Hartmann boundary layer analysis [ASME PAPER 69-WA/HT-53] 04 p0781 A70-14796
- Similarity of velocity profiles and pressure distribution of turbulent jet over inclined wall, indicating limitations of Glauert analysis [ASME PAPER 69-WA/FLCS-1] 04 p0668 A70-14849
- Actively participating bounding surfaces effect on free molecule flow through slit or annular orifice situated in wall separating different pressure regions [ASME PAPER 69-WA/APM-26] 04 p0668 A70-14906
- Linear stress distribution insertion into equations of motion for turbulent boundary layer, considering velocity profile in wall region 04 p0670 A70-14987
- Viscous gas self similar channel flow with heat transfer at wall corresponding to fixed Mach number profile in all channel cross sections 04 p0673 A70-15231
- Suction influence on skin friction fluctuations of MHD flow along infinite flat wall using Navier-Stokes equations 05 p0886 A70-15787
- Heat transfer in MHD Couette flow influenced by wall electrical conductances with suction 05 p0886 A70-15823
- Inert, oxidizing or reducing fluids wall injection into combustion gas boundary layer of variable composition noting effects on wall temperature 05 p0956 A70-15919
- Fluid boundary at curved wall under pressure 05 p0834 A70-16680
- Rarefied gas shear flow over infinite plane wall, using Boltzmann-Krook-Welander equation to determine compressibility effect on Knudsen layer 06 p1048 A70-18327
- Kinetic theory treatment of linearized Rayleigh problem using wall boundary condition models 06 p1049 A70-18329
- Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution 07 p1252 A70-18670
- Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall 07 p1420 A70-19066
- Wall proximity and velocity gradient effects on thermoanemometer readings in turbulent boundary layer 07 p1285 A70-19834
- Functions describing spatial-temporal temperature distribution in hyperbolic partial differential equations for nonstationary heat exchange between fluid flow and boundary wall 07 p1423 A70-19839
- Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions 07 p1342 A70-20118
- Incompressible conducting fluid MHD flow at infinite plane wall forward stagnation point, considering suction or injection effects 07 p1354 A70-20237
- Heat exchange at stagnation point of subsonic and supersonic axisymmetric jets interacting with perpendicular plane partition, allowing for turbulence 08 p1482 A70-20919
- Suction effect on thin film laminar flow past vertical wall, obtaining approximate solution for small porosity in accelerated region 08 p1484 A70-21309

Flow structure in rectangular cavity in lower wall of two dimensional channel for various aspect ratios and Reynolds numbers

08 p1484 A70-21313

Straight-walled two dimensional diffusers with incompressible steady flow, noting effects of inlet blockage and aspect ratio on performance

08 p1433 A70-21322

Magnetic field and conducting walls effect on laminar steady MHD Couette flow of electrically conducting incompressible viscous rarefied gas in slip regime

08 p1553 A70-21764

Instantaneous velocities measured for wall region of smooth duct during turbulent fluid flow by chronophotography of particles

09 p1658 A70-22046

Two dimensional Poiseuille flow stability at deformable walls, assuming pressure proportionality to displacement and rate

09 p1660 A70-22533

Average velocities profile measurement in wall region of turbulent fluid flow in smooth duct

09 p1661 A70-22838

Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law

09 p1789 A70-23169

Magnetic field effect on free convection in laminar boundary layer formed by laminar flow of viscous conducting fluid along vertical wall

09 p1737 A70-23308

Taylor-Goertler vortex formation effect on heat transfer through boundary layer on concave wall [ASME PAPER 69-HT-3]

09 p1790 A70-23556

Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters

09 p1614 A70-23691

Flat plate laminar boundary layer blowoff due to wall injection analyzed by parameter matched asymptotic expansion

10 p1862 A70-23844

Plane steady flows characteristics of incompressible viscous fluids in rigid walled rectangular channels found asymptotic to Poiseuille and Couette flows

10 p1866 A70-24112

Viscous transonic flow past wavy wall analyzed by approximate method for inviscid transonic equation

10 p1800 A70-24137

Strong shock wave reflection from rigid wall at high shock velocities, studying effect on flow structure

10 p1922 A70-24152

Statistical chance characteristics of velocity profiles and friction for flow along infinite plane wall with constant suction

10 p1869 A70-24519

Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall

10 p1970 A70-25217

Annulus wall boundary layer effect on spatial flow in subsonic axial compressors by shearing stresses concept between stream surfaces

11 p1974 A70-25777

Wall shear stress distribution in rectangular ducts, discussing secondary currents and main flow prediction

11 p2035 A70-25779

Shear flow near walls through cascade of untwisted blades, observing variation in lift coefficient across span

11 p1975 A70-25788

Laminar boundary layer flow with exponential velocity distribution in outer flow described by differential equations, studying slip velocity at wall

11 p2037 A70-26350

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation

12 p2210 A70-27321

Heat transfer and flow stabilization dependence on initial shock wave reflection from conducting wall

12 p2213 A70-28228

Preston tube errors in pipe flow wall shear stress determination due to velocity distribution deviations

13 p2387 A70-28848

Plane, steady, irrotational flow of gaseous subsonic stream bounded by two infinite parallel walls, discussing application to incompressible fluids

13 p2389 A70-29631

Boundary layer transition at high Mach numbers on adiabatic wall, showing effects of wind tunnel size, surface roughness and freestream disturbances [AIAA PAPER 70-586]

13 p2342 A70-29884

Steady viscoplastic boundary layer near hard wall with power law velocity distribution along outer boundary, deriving self similar solution

15 p2718 A70-31462

Three dimensional boundary layer separation, noting necessity of streamlines perpendicular to pressure gradients near wall

15 p2719 A70-31488

German monograph on transonic plane flow past wavy wall in blocked wind tunnel covering flow theory, interferometric density measurements, etc

17 p3070 A70-35375

Flow stability of incompressible heavy viscous fluid along wall of vertical circular cylindrical pipes, relating flow parameters to stability

18 p3240 A70-36278

Annulus wall boundary layers in axial flow turbomachines, taking into account boundary layer growth and associated secondary flows

[ASME PAPER 70-GT-92]

18 p3209 A70-36877

End wall boundary layers effect included in performance prediction method for multistage axial compressors

[ASME PAPER 70-GT-80]

18 p3210 A70-36884

Boundary layer equations for two dimensional flow of incompressible constant density micropolar fluid past plane wall, noting skin friction

19 p3404 A70-37962

Velocity profiles of laminar flow through rectangular duct with moving wall and arbitrary cross section under nonslip boundary condition

19 p3405 A70-38043

Magnetic field effect on hydromagnetic Goertler instability in boundary layer flow of conducting fluid over concave wall

19 p3481 A70-38352

Turbulent heat and mass transfer from wall to plane-parallel fluid flow at large Reynolds and Peclet numbers, developing universal law

19 p3552 A70-38392

Power law fluid flow past suddenly accelerated wall, applying group theory to similarity solutions

19 p3406 A70-38444

Sound propagation in cylindrical waveguide with impedance walls in presence of flow

19 p3472 A70-38655

Steady turbulent flow heat exchange in near wall region at large Prandtl numbers, plotting temperature distribution curves

20 p3612 A70-39811

Boundary layer separation in MHD generators, discussing differences between insulating and electrode wall boundary layers

20 p3680 A70-39985

Conducting wall MHD generator channel current distribution, examining computer program for anode and cathode currents

20 p3566 A70-40013

Wall proximity and velocity gradient effects on thermoanemometer readings in turbulent boundary layer

20 p3634 A70-40341

Heat transfer between wall and liquid and vapor films in internal regenerative cooling of thrust chambers

21 p3867 A70-41027

Wall heat transfer for partially ionized argon laminar flow within square channel conducting walls with and without transverse magnetic field

21 p3856 A70-41032

Two dimensional body slow motion through stratified fluid bounded by parallel vertical walls, examining flow at different Peclet numbers

21 p3744 A70-41246

Unsteady flow in rectangular cavity with moving wall, using iterative solution of Navier-Stokes equations

21 p3807 A70-41317

Natural convection boundary layer stability on isothermal flat vertical wall or subjected to linear temperature distribution

21 p3950 A70-41443

Rarefied gas flow over plane wall, considering boundary layer thickness of order of mean free path

21 p3809 A70-41715

Nonequilibrium flow adjacent to cooling tube wall confining cascade arc plasma electrical discharge

21 p3805 A70-41763

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation

21 p3810 A70-42062

Wall recombination heat transfer in rarefied flow with velocity slip near leading edge

21 p3952 A70-42083

Turbulent heat/mass transfer from solid boundary with shear stress dependent on wall distance for various Schmidt or Prandtl numbers

21 p3953 A70-42088

Plane stationary shock wave reflection from rigid concave wall at low Mach numbers

21 p3811 A70-42204

Downstream heat transfer and wall friction predictions for quasi-developed strongly heated turbulent pipe flow, using mixing length model

[ASME PAPER 70-HT-8]

22 p4008 A70-42439

Displacement effect of hot-wire anemometric probes near wall as function of support orientation

22 p4038 A70-43241

Curved shock waves regular and Mach reflection in steady supersonic flow at plane wall

[ICAS PAPER 70-11]

23 p4180 A70-44122

Mass transfer and velocity gradient fluctuations at wall in two dimensional or rotational flow for large Schmidt numbers

23 p4181 A70-44210

Laminar boundary layer wall shear and velocity profiles by N parameter integral method, using exponentials

23 p4182 A70-44567

German monograph on three dimensional flow and blade pressure measurements at axial flow compressor casing wall, discussing test control and digital data processing

24 p4332 A70-45093

German monograph on casing and hub wall friction effects on three dimensional flow in turbocompressors in subsonic compressible working fluids

24 p4287 A70-45096

Velocity profile in viscous sublayer at wall based on maximum stability principle applied to Karman constant for turbulent channel flow

24 p4325 A70-45495

Boundary layer transition under small tridimensional perturbations interacting with excitations from wall

24 p4327 A70-46206

WALL JETS

Laminar and turbulent boundary layer equations with or without wall injection over two dimensional or axisymmetric bodies solved by finite difference techniques

02 p0287 A70-12370

Turbulent and wall jets with wide varieties of geometries and boundary conditions, predicting jet inflow effects on entrainment rate, lift, drag, etc

02 p0288 A70-12840

Walljet in crossflow, discussing characteristics and pressure field on plate, using flow visualization methods

03 p0465 A70-13004

Curvature effects on two dimensional turbulent wall jet flow over plane surface and circular convex and concave surfaces in still air

05 p0832 A70-16118

Razor blade calibration and measurement of wall jet flow shear stress in turbulent boundary layer with secondary injection

05 p0833 A70-16504

Hot wire turbulence measurements of cylindrical wall jet compared to results from free circular and plane wall jets

06 p1034 A70-17526

Turbulent boundary layers and wall jets development investigated for effect of mass injection through porous smooth and rough surfaces

06 p1034 A70-17679

Prandtl mixing length and effective Schmidt number distributions from wall jet and wake data to predict film cooling

06 p1035 A70-17688

Turbulent boundary layer control by wall jet, analyzing wall jets in adverse pressure gradients for two limiting cases

[AIAA PAPER 70-107]

06 p1041 A70-18160

Second order correction to Glauert wall jet flow around arbitrarily curved surface, discussing initial profiles

07 p1257 A70-19344

Flow properties and heat transfer of wall jet spreading over permeable surface with suction and blowing

07 p1258 A70-19720

Static pressure gradient influence on turbulent shear stresses and energy production in asymmetric wall jet flow

08 p1484 A70-21314

Turbulent three dimensional incompressible wall jets issuing into quiescent air ambient, tangent to and at surface of flat plate, investigating shear stress and flow field

09 p1661 A70-23215

Laminar flow into channel with symmetrical jets along walls, considering velocity profiles and flow establishment lengths

10 p1870 A70-24790

Plane turbulent wall jet from small slot, investigating velocity distribution dependence on slot inclination

13 p2388 A70-29448

Maximum velocity decay in wall jets calculated for comparison with experimental velocity profile

14 p2566 A70-30777

Jet flow through rectangular orifices in cylindrical wall using conformal mapping for potential, velocity, volume flow rate, viscosity, etc

14 p2567 A70-31359

High lift airfoils boundary layer separation suppression by blowing, describing wall jets streamwise development prediction methods

[AIAA PAPER 70-872]

17 p3010 A70-34818

Critical height phenomenon for vertical jet exhausting into horizontal parallel plates channel simulating aircraft surfaces

18 p3243 A70-36709

Laminar two dimensional wall jet with small natural disturbances, examining flow stability at various Reynolds numbers

19 p3402 A70-37526

Laminar convective flow from linear heat source along vertical plate, solving numerically for incompressible fluid by boundary layer approximation 20 p3614 A70-40403

Wall jet turbulent flow regions with shear stress and mean velocity gradient of opposite sign, considering theoretical explanation 20 p3615 A70-40501

Impact configuration fluidic amplifier, investigating modulation of power jet formed by impacting plane wall jets in bounded region [ASME PAPER 70-FLCS-14] 22 p3963 A70-42413

WALL PRESSURE

Left ventricle wall forces and dimensional measurements during cardiac cycle based on stress-strain terms, including results for mitral, aortic and myocardial disease 02 p0238 A70-12512

Values measured on sharp flat plate in 10.4 Mach boundary layer induced pressure gradient, discussing effects of wall pressure and temperature gradients 04 p0621 A70-15609

Pseudosound field wall pressure correlation obtained to predict response characteristics of aircraft panel mounted along jet wake 05 p0835 A70-16785

Wall pressure distribution, drag and lift measured on flat plates and wedges at Mach 8 rarefied gas flow for various leading edges 06 p0980 A70-18350

Pressure history at end wall of electromagnetic shock tube measured during shock wave reflection by piezoceramic gage 06 p1031 A70-18505

Laminar radial flow between parallel disks, estimating static wall pressure distribution perturbation caused by characteristic time 08 p1484 A70-21237

Surface roughness effects on measured cross spectral density of wall pressure fluctuations beneath turbulent boundary layer 08 p1486 A70-21859

Flow noise measurement for boundary layer pressure fluctuations at rigid wall, analyzing effect of transducer size, shape and orientation on resolution 09 p1675 A70-22387

Wall pressure fluctuations beneath turbulent boundary layers on flat plate and cylinder 11 p2038 A70-26529

Turbulent boundary layer interaction with wavy wall in wind tunnel, discussing wall pressure drag and surface waves interaction 11 p2039 A70-26538

Wall shear stress distribution in noncircular ducts with steady incompressible fluid flow 12 p2209 A70-27217

Nozzle wall hypersonic turbulent boundary layers at free stream Mach number using pitot, hot wire, and wall fluctuation and static pressure measurements [AIAA PAPER 70-746] 17 p3065 A70-34497

Sound field produced in uniform moving ideal fluid stream by nonuniform oscillating elastic wall 19 p3353 A70-38657

Multiple tube manometer with selector switch for measuring flow channel wall pressures 23 p4194 A70-44000

WALL TEMPERATURE

Heat transfer in tube flow with forced convection, internal radiation exchange, axial wall heat conduction and arbitrary wall heat generation 01 p0214 A70-10294

Heat transfer in turbulent boundary layer of airflow injected on smooth plate from nozzle in subsonic stepwise heated wind tunnel 01 p0216 A70-11001

Microlayers evaporation contribution to vapor bubbles growth rate from heated wall in liquid near saturation temperature during nucleate pool boiling 01 p0218 A70-11181

High pressure tests of primary zone flame radiation, flame and tube metal temperatures in aircraft combustion chambers, including oxygen and vitiated inlet air effects 02 p0355 A70-12051

Wall temperatures and heat transfer coefficients for solid-vapor mixtures of para hydrogen and nitrogen flowing in heated tube 03 p0604 A70-13018

Unsteady heat transfer equations for laminar fluid flow in pipe with varying wall temperature 03 p0604 A70-13207

Turbulent reattachment of supersonic axisymmetric jet on cylindrical wall in air, investigating wall temperature effect on cavity pressure and heat flux [ONERA-TP-758] 03 p0467 A70-13643

Integral method for studying wall heat transfer influence on compressible boundary layer on cone at angle of attack in supersonic flow 03 p0409 A70-13953

Steady convective motions in horizontal fluid layer bounded by porous walls of various temperatures at supercritical Rayleigh numbers, noting nonlinear convection equations 04 p0673 A70-15237

Wall and total temperature variations effects on transition Reynolds number in hypersonic He tunnel, noting sound mode dominance 04 p0620 A70-15560

Values measured on sharp flat plate in 10.4 Mach boundary layer induced pressure gradient, discussing effects of wall pressure and temperature gradients 04 p0621 A70-15609

Inert, oxidizing or reducing fluids wall injection into combustion gas boundary layer of variable composition noting effects on wall temperature 05 p0956 A70-15919

Laminar flow in circular pipe with arbitrary axial variation of wall temperature or heat flux, using integral type approximation 05 p0957 A70-16519

Negative pressure gradients effects on wall heat flow and characteristic patterns for turbulent boundary layer profiles 06 p1033 A70-17231

Skin friction law for compressible boundary layer allowing calculation of coefficient of friction for isothermal walls with heat transfer 06 p1033 A70-17232

Reflected waves development during shock waves collision and during shock collision with constant temperature wall, using Monte Carlo method 06 p1109 A70-17520

Bulk and wall temperature measurements for natural fluid convection in container with and without baffles for various heat flux and aspect ratios 06 p1175 A70-17684

Thermal slip velocity of gas in infinite temperature gradient tangential to solid wall, basing calculation on linearized Boltzmann kinetic equation 06 p1049 A70-18332

Local heat transfer coefficients determined from temperature distribution on porous walls, deriving mathematical expressions for various surface geometries and transfer modes 06 p1184 A70-18555

Wall temperature variation of transpiration cooled tube surrounding plasma arc calculated from gas mass flow and wall properties 07 p1420 A70-19214

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution allowing for initial unheated plate segment 07 p1423 A70-19657

Electrical conductivity variations effects in subsonic Hartmann plasma flow under transverse magnetic field in channel with cooled walls 07 p1352 A70-19986

Heat transfer from inner wall of annular ducted cylindrical body cooled by liquid nitrogen, discussing effects of Teflon, asbestos and vaseline coating and thickness effects 08 p1596 A70-20577

Wall material diathermy effects on critical thermal load under radiant transfer, comparing results for quartz glass and stainless steel tubes 08 p1597 A70-21186

Initial vapor bubble growth on horizontal heated wall during saturated nucleate boiling using combined streak and high speed frame photography 08 p1542 A70-21584

Solid layer effect on laminar heat transfer and pressure drop in medium surrounding pipe with liquid flows below freezing point, discussing wall temperature effects 08 p1485 A70-21589

Unsteady free convection laminar power-law fluid flow past porous vertical wall, studying similarity solution dependence on wall temperature and suction 08 p1486 A70-21765

Steady flame propagation attainment for chemical reaction initiation in gaseous fuel by heated surface with various wall temperatures 09 p1787 A70-22115

Local heat transfer to gas mixed with graphite particles described for variable temperature differences and wall temperatures 09 p1787 A70-22174

Steady laminar gas flow on duct wall boundary layer considering external swirling flow and wall heat transfer 09 p1659 A70-22428

Navier-Stokes equations for laminar near wake of blunt based body, obtaining numerical solutions for adiabatic and constant wall temperatures 09 p1605 A70-23176

Rarefied gas flow past arbitrary three dimensional body using variational principles based on linearized BGK equation, considering constant and adiabatic wall temperature 09 p1605 A70-23178

Circumferential wall temperature gradients in spacecraft radiator tubes as function of tube wall fins 09 p1789 A70-23261

Energy equations solved for step change of wall temperature and heat flux, determining turbulent heat transfer in tube, discussing asymptotic solutions validity 11 p2146 A70-25334

Insulator wall temperature effect on supersonic two temperature MHD generator channel flow at open and short circuit conditions 12 p2163 A70-27067

Heat conduction for thermally insulated bilayer metal wall for time-variable heat transfer and ambient temperature, using Green function 12 p2330 A70-27292

Compressible turbulent plane Couette flow solution with variable heat transfer based on von Karman model extended to arbitrary wall temperature 12 p2211 A70-27839

Turbulent heat transfer in concentric annuli entrance region with uniform wall heat flux 12 p3370 A70-28117

Prandtl number effects on adiabatic wall temperature and pressure gradient at separation point for hypersonic compressible laminar boundary layer 14 p2566 A70-31027

Free convection and heat transfer in square region bounded by solid impermeable walls heated from above, using two dimensional model 15 p2824 A70-31492

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution taking into account initial unheated plate segment 15 p2828 A70-32694

Temperature distributions and heat flux for gray gas in radiative equilibrium bounded by walls with different temperatures, using differential approximation [AIAA PAPER 70-834] 16 p3001 A70-33929

Extinction model of composite solid propellant combustion including wall and flame heat release zones 17 p3147 A70-34511

Conical shock wave-turbulent boundary layer interaction data obtained for adiabatic wall conditions at supersonic free stream Mach numbers, including suction effects 18 p3241 A70-36448

Wall cooling effects on turbulent boundary layer in low speed air flow, using smooth tube and thermocouple measurements 18 p3347 A70-36505

Heat exchange and temperature distribution between two liquids divided by plate, discussing possible errors 20 p3737 A70-39634

Laminar thermal boundary layer at atmospheric pressure adjacent to cooled wall, measuring electron temperature and number density 20 p3737 A70-39990

Insulator wall temperature effect on supersonic nonequilibrium MHD generator channel under open and short circuit conditions 20 p3681 A70-39994

Performance comparison of diagonal conducting wall MHD generator and Hall generator of equal dimensions, investigating wall temperature effect 20 p3566 A70-40004

Gaseous film cooling effect on adiabatic wall temperature distribution in rocket nozzle with gas injection 21 p3867 A70-41028

Flow field, heat transfer rates and reattachment surface wall temperature of planar supersonic turbulent flow 21 p3744 A70-41036

Heat transfer in cooled turbulent tube flow downstream region at high bulk-to-wall temperature ratios 21 p3945 A70-41037

MHD channel flow of suspension for prescribed wall heat flux and temperature, determining flow and heat transfer characteristics 22 p4080 A70-42670

Thermal relaxation effect on thermal contact of two semiinfinite walls, showing existence of dynamic contact resistance 22 p4125 A70-43243

Cylindrical wall nonstationary heat conductivity for time variable heat transfer coefficient 22 p4125 A70-43358

Tube heat exchangers operation at low transfer coefficient, calculating unsteady temperature field in wall and heat transfer agent 22 p4125 A70-43364

Heat transfer by laminar forced convection of viscous fluid in noncircular cylindrical channel with internal heat source and varying wall temperature 23 p4276 A70-44236

Heat transfer from turbulent axisymmetric jet to normal flat wall at critical point with small Reynolds numbers 23 p4181 A70-44321

Contact region structure with viscosity, conduction and radiative transfer effects applied to plane shock wave reflection from heat conducting wall 24 p4326 A70-46001

WALL TEMPERATURE DISTRIBUTION

WALLS

NT BULKHEADS

NT NOZZLE WALLS

- NT POROUS WALLS
NT THIN WALLS
NT THIN WALLS
NT WIND TUNNEL WALLS
Wall effect on differential spectra distortions in cylindrical ionization chamber and proportional counter type detectors
05 p0900 A70-15971
Container wall-collision plasma sheath model for charge carrier investigation using velocity distribution [DFVLR-SONDDR-51]
14 p2622 A70-30662
Sonic boom incident and ground reflected waves action on exterior wall, calculating arrival time as functions of aircraft speed and altitude and wall slope
14 p2566 A70-30861
Axial wall conduction effects on steady state laminar flow heat transfer
15 p2825 A70-31815
Comparative arterial pressure pulse transmission velocity in dogs, relating wall elasticity with vascular disease
15 p2682 A70-31939
Carbon monoxide-nitrogen laser mechanism vibrational populations, discussing operational characteristics and walls condition and nature
21 p3837 A70-41716
- WANKEL ENGINES**
Heat transfer data for rotary piston and conventional piston engines, studying compression energy losses due to working fluid leakage
05 p0897 A70-17002
Rotating combustion engine design offering low life cycle costs for military applications [SAE PAPER 700273]
12 p2290 A70-27438
Rotary piston engine for powered gliders and light aircraft power source by modifying industrial Wankel engine
17 p3147 A70-34690
- WARFARE**
NT ANTISUBMARINE WARFARE
NT COMBAT
NT NUCLEAR WARFARE
Outer space exploration and utilization, analyzing 1967 UN treaty provisions from standpoint of war potential inherent in space stations existence
16 p3003 A70-33100
Army aviation requirements in high intensity conflicts, discussing transportation, communications, intelligence acquisition, organization and suitable aircraft types
23 p4142 A70-44855
- WARMING**
U HEATING
- WARNING DEVICES**
U WARNING SYSTEMS
- WARNING SIGNALS**
U WARNING SYSTEMS
- WARNING SYSTEMS**
NT EARLY WARNING SYSTEMS
Proximity Warning System /Pilot Warning Indicator for helicopters, discussing applications to fixed wing aircraft
06 p0985 A70-17710
Encounter statistics and operational environment of aircraft collision-hazard warning systems in terminal area
07 p1331 A70-20060
Auditory and visual warning signals effects as reaction stimulus in time-uncertainty situation
10 p1826 A70-24719
Short range aircraft collision pilot warning indicator for low altitude and closure speeds
11 p2078 A70-25706
Light aircraft-airliner collision avoidance, discussing Time-Frequency Collision Avoidance System cost restriction, Pilot Warning Instruments, etc
11 p2079 A70-25872
Pilot midair collision warning instrument based on optical radar MTI, discussing target cross section enhancement by passive retroreflector
12 p2234 A70-27646
Optical IR system as low cost pilot warning indicator providing audible and visual collision warnings to general aviation aircraft
12 p2234 A70-27647
Stacked, vertically polarized collinear arrays of independently fed omnidirectional antennas for flight testing Doppler radar aircraft warning system
12 p2199 A70-27968
Thunderstorm detection and warning system, measuring vertical potential gradient and changes caused by lightning discharges
14 p2607 A70-30574
General aviation demands on Pilot Warning Indicator systems for collision avoidance
14 p2615 A70-31176
Blinking warning lights for air navigation, signaling of obstacles and glider onboard marker lights
16 p2889 A70-34302
Gallium arsenide laser ranging system for helicopters obstacle warning
17 p3103 A70-34720
Personnel danger zones demarcation around radar antennas, using beacons
17 p3040 A70-35913

- Netherlands Air Force bird strike problem and warning system
18 p3211 A70-35977
Fire and overheat detection system design for turbine powered vehicles
18 p3826 A70-36891
[ASME PAPER 70-GT-125]
ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft
19 p3466 A70-38239
Hypoxia warning systems using polarographic sensor and miniaturized electronics for face-mask and cabin installation for aircraft and spacecraft
20 p3579 A70-39429
Constant false alarm rate bias technique to control avalanche photodiode laser receiver over varying operating conditions of temperature, ambient illumination, etc
20 p3641 A70-39483
Collision Avoidance System /CAS/ and Proximity Warning Indicator /PWI/ for preventing midair aircraft collisions
23 p4194 A70-44175
Limiting effects of topographic quasi-optical radio propagation above 100 MHz in radar aircraft navigation, clear air disturbances detection and IR warning technique
23 p4163 A70-44230
Global rescue alarm net /GRAN/ using satellites for relaying distress signals, eliminating current line of sight restrictions
23 p4143 A70-44455
Optimal color hierarchy for pyrotechnic markers and signals indicating red, violet and amber hues on top
23 p4146 A70-44459
- WARPAGE**
Plates and rods tendency to warp and form nonsymmetrical stress systems during heat treatment
19 p3433 A70-37272
- WASHOUT [RADIOACTIVITY]**
U FALLOUT
- WASPALLOY**
Inertia bonded and electron beam welded joints of Waspaloy compared for suitability in aircraft gas turbine engines
04 p0700 A70-15655
Waspaloy gamma prime solvus temperature relationships as function of solution treatment and precipitation strengthening additives, discussing microstructure and tensile properties
08 p1520 A70-21555
Hot work effect on properties and microstructure of wrought Waspaloy, observing temperature decrease effect on fracture ductility
22 p4054 A70-42739
- WASTE DISPOSAL**
Manned space flight requirements connected with cabin atmosphere, food/water supplies and waste disposal and environmental conditioning
05 p0807 A70-16632
Sludge removal from electrolyte in electrochemical machining by settling system, discussing temperature control, flow requirements, concentration control and balance system
10 p1893 A70-23859
Wastes dispersion discharged into sea analyzed by aerial photography, measuring diffusion
10 p1879 A70-24749
Ben Franklin submarine life support systems tested during Gulf Stream Drift Mission, discussing atmosphere control, water, waste and food management [ASME PAPER 70-DE-60]
16 p2852 A70-33515
Spacecraft waste management system zero-gravity flight tests, describing components and functions
17 p3036 A70-34751
Waste management for large space stations, discussing removal, venting, utilization, processing techniques, etc
21 p3769 A70-40996
- WASTE UTILIZATION**
Mathematical planning of experiments applied to biological mineralization of human wastes, using continuous microorganism cultivation
03 p0435 A70-13715
Titanium alloy wastes electrorefining by electrolytic cell with solid bipolar electrodes to eliminate non-metallic inclusions
05 p0863 A70-16544
Waste hydrogen utilization in microthrusters for spacecraft attitude control involving mass expulsion of cold gas
16 p2969 A70-33609
[AIAA PAPER 70-613]
Turbofan engine aerodynamic interactions, cryogenic space storable propellants, space station attitude control biowaste resistojel and long burning time solid propellants
20 p3688 A70-39667
Electrothermal thruster with biowaste propellants, discussing design and performance with various propellant compositions
20 p3567 A70-40201
[AIAA PAPER 70-1161]
Parameterized design data and selection criteria of biowaste resistojel system for orbit keeping and con-

- trol moment gyro desaturation of manned space station
20 p3567 A70-40213
[AIAA PAPER 70-1132]
Environmental control-life support systems /ECLSS/ waste methane gas utilization in low thrust resistojel for manned space applications
20 p3568 A70-40214
[AIAA PAPER 70-1131]
Concentric tube resistojel life tested on hydrogen and ammonia propellants for use with biowaste propellants
20 p3568 A70-40521
[AIAA PAPER 70-1133]
Vapor biowaste electric spacecraft propulsion system, discussing recovery cycles and subsystem tradeoffs, specific impulse, chamber heating, power input and reaction products
21 p3866 A70-40869
Vacuum distillation vapor filtered catalytic oxidation water recovery system, using radioisotopes for thermal energy supply
21 p3769 A70-40994
Potable water recovery from urine by vacuum distillation and vapor pyrolyzation
21 p3769 A70-40995
Waste management for large space stations, discussing removal, venting, utilization, processing techniques, etc
21 p3769 A70-40996
Spacecraft wet oxidation for human waste processing, discussing temperature and gas pressure effects, catalyst types, pump requirements, etc
21 p3769 A70-40997
Thermal efficiency of ceramic and metal heat exchangers for biowaste resistojel thrusters
21 p3868 A70-41779
[AIAA PAPER 70-1135]
- WASTES**
NT FECES
NT HUMAN WASTES
NT METABOLIC WASTES
NT SEWAGE
NT URINE
Automatic recording respirometer for industrial wastes, discussing design and advantages
14 p2543 A70-31164
- WATCHES**
U CLOCKS
- WATER**
NT COLD WATER
NT POLYMER
NT POTABLE WATER
NT SEA WATER
Water effect on glass fiber-resin bonds in interphase region, discussing initial stiffening and long term effects
01 p0127 A70-10484
Holograms of light scattered by clouds of water droplets to determine drop size, noting agreement with Mie theory
02 p0296 A70-11890
Banana self focusing in water of laser beams with nonmonotonic intensity distribution, noting ruby laser experiment
02 p0312 A70-12260
Water or bromotrifluoromethane content required in propellant Aerozine-50 /A-50/ spill to inert against ignition in air, considering fire extinguishment
04 p0732 A70-15408
Radiative-convective equilibrium model to investigate photodissociation of water in Venus atmosphere, considering greenhouse effect
04 p0757 A70-15516
Cloud chamber investigation of artificial cloud of water droplets in electrostatic field, discussing cloud precipitation, collection efficiency and fog dissipation
05 p0879 A70-16689
Electrically heated wire diameter and orientation on heat flux in saturated pool and surface boilings of water and aqueous binary mixtures
07 p1417 A70-18643
Distilled water and mineral oils heated to 50-80 C studied for effect on residual stresses in fiberglass reinforced plastics
08 p1526 A70-20925
Tape-generated swirl flow of single phase water investigated for heat transfer and pressure drop characteristics
08 p1600 A70-21829
[ASME PAPER 68-WA/HT-3]
Hydrodynamic processes during focusing of monopulse ruby laser emission into water, determining photohydrodynamic coefficient
09 p1694 A70-22111
Photographic emulsions design for increased water depth penetration during aerial multispectral recording of light absorption and scattering in water masses
09 p1674 A70-22261
Saturn ring IR spectrum, discussing resemblance and discrepancies of ammonia and water frost spectra
10 p1935 A70-23813
Remote sensing techniques for water resources evaluation and hydrobiological features mapping with multiband scanner imagery
10 p1879 A70-24742
Warm clouds electrification calculated for electromagnetic field growth by inductive mechanism, noting role of water drop pair interaction
10 p1913 A70-24807

Slush and water hazards on runways, discussing investigation and amelioration methods
11 p2030 A70-25356

Raman and IR spectrum analysis of polywater indicating impurities role in anomalous properties
11 p1994 A70-25655

Polywater electronic structure model, proposing hydrogen bonds resembling short strong bonds in FHF⁻/ions
11 p1994 A70-25656

Anomalous water /polywater/ dielectric constant and effective parallel conductance, suggesting hydrosol classification
11 p1994 A70-25657

Interaction between turbulent air flow and water surface based on Fourier analysis of finite intervals of field
11 p2042 A70-26775

Water contaminating effects on thin thermal oxide passivated silicon planar devices
13 p2361 A70-28930

Methane and ethane hydrate number measurement, alleviating liquid water occlusion and evaluating pressure effect
13 p2362 A70-29212

Molecular orbital wave functions for water molecule, using minimum set of Slater orbitals
14 p2544 A70-30119

Venus water presence from Venera 4 and Mariner 5 data suggesting polar seas and oceans saturated with hydrochloride and carbon dioxide as plant life source
14 p2637 A70-30365

Water sources associated with W3, Orion Nebula, W49 and VY Canis Majoris observed with coherent interferometers having long baseline
14 p2642 A70-30892

Liquid water occurrence on Mars surface, considering ice melting, evaporative cooling, atmospheric moisture content, etc
14 p2651 A70-31298

MHD experiments showing effects of local water supply electrical conductivity from measurements of voltage distribution, pressure gradients and extracted power
16 p2957 A70-32998

Water structure role in membrane systems, considering phase transitions and thermal anomalies in surface properties
16 p2847 A70-33027

Film boiling heat transfer from horizontal wires to water, using Nusselt condensation model
16 p3003 A70-34198

Atmospheric ions interaction with rocket exhaust gas water molecules, using sounding rocket mass spectrometric data
18 p3293 A70-36982

Water droplet size measurement by forward light scatter holography, evaluating reconstructed wave front by Fresnel transform
20 p3628 A70-39132

Glass reinforced plastics /GRP/ mechanical properties degradation by water, discussing effects of temperature, pressure, environment, etc
20 p3656 A70-40056

Preliminary physical training for human water immersion resistance improvement
20 p3576 A70-40196

Macaca nemestrina total body water measurement by dilution technique
20 p3577 A70-40333

Life support water electrolysis system design, discussing alkaline or acid electrolyte selection
21 p3768 A70-40993

Heat pipe performance map with ammonia as working fluid, comparing thermal transport efficiency with water pipe
21 p3947 A70-41050

Carbon dioxide and water cryodeposits refractive indices and densities, using thin film interference technique
22 p4122 A70-42434

[ASME PAPER 70-HT-33]

Atmospheric positive ion composition measurements in D region by rocket-borne mass spectrometers, considering water cluster ions formation
22 p4017 A70-42796

Water ballast loadings on sailplane Cobra 17, considering wing, aileron, tailplane, fuselage and landing gear
22 p3962 A70-42962

Thermal conductivity of water, toluene and benzene in coaxial cylinders, taking into account edge heat losses
23 p4276 A70-44216

Polarized maser emission from interstellar hydroxyl and water related to nonlinear weak magnetoplasma
24 p4381 A70-45258

WATER BALANCE

Human renal function, electrolyte and water metabolism during bed rest with daily leg exercise
07 p1223 A70-19937

Hydrogen-oxygen fuel cell reaction water removal and heat loss using reconcentration device
12 p2163 A70-27066

WATER CONSUMPTION

Rat water intake and urine output during chronic centrifugation at resultant inertial fields of 1.7 and 3.0 g
02 p0231 A70-11705

Human water-salt metabolism following exposure to transverse accelerations, discussing diuresis and Cl-K excretion
17 p3038 A70-35364

WATER CONTENT

U MOISTURE CONTENT

WATER COOLED REACTORS

NT HEAVY WATER REACTORS

NT NRX REACTORS

NT PLUM BROOK REACTOR

WATER DEPRIVATION

Food ingestion initiation, investigating role of hypoosmotic solutions from observation of rats under water deprivation
13 p2353 A70-29495

Food-water deprivation influence on alveolar surface activity of rat lungs
24 p4303 A70-46115

WATER EROSION

Liquid oxygen and water cavitation effects on lead, copper, nickel, iron and zinc
01 p0115 A70-10071

Coastal erosion survey by aerial photography, measuring change in beach locations over period of time lapse by corresponding reference points on photograph
10 p1879 A70-24748

Lunar sinuous rilles morphological and distributional observations and implications on theories of origin concerning surface water erosion
19 p3521 A70-38442

Graphites erosion by water and carbon dioxide at high temperatures, using liquid rocket simulator for kinetics study
20 p3736 A70-39587

[AIAA PAPER 70-638]

Artificial rain erosion effects on missile and spacecraft recorded via high speed photography
20 p3635 A70-40531

WATER FLOW

Forced cooling water flow temporary loss accident at Plum Brook Reactor, discussing inspection and corrective action
01 p0140 A70-10323

Hot-wire and hot-film anemometry in two phase air-water and steam-water flow, discussing bubble passage, signal processing and measurements
02 p0305 A70-12836

Boundary layer separation in divergent portion of conical ducts in overrelaxed supersonic regime in air and water, showing influence of medium, pressure and thrust
03 p0467 A70-13682

Water flow with solid particles, obtaining predictions for two component two phase gas flow
06 p1037 A70-17899

Interference between body and porous walls of water tunnels by one dimensional solution for usable length of tunnel
07 p1248 A70-19078

Laminar to turbulent boundary layer transition and separation on circular cylinder measured by heated end-window film sensor applicable to water flow
07 p1259 A70-19831

Transverse curvature effects on turbulent boundary layer thickness and velocity profiles on circular cylinders in water and air
07 p1261 A70-20301

Sewage water flowmeter calibration, analyzing error propagation and tolerance
09 p1672 A70-22027

Velocity measurements with Pitot tubes in polymer solutions /polyethylene oxide/ in water, noting viscoelastic properties effect on measured pressure value
10 p1887 A70-24093

Turbulent water flow velocity distribution measurement using laser light intensity fluctuation spectroscopy
10 p1869 A70-24600

Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers
12 p2210 A70-27322

Vortex generation in water tank, discussing velocity distribution on free surface and critical depth of air entrainment for various Reynolds numbers
14 p2567 A70-31275

Water and blood flow characteristics in converging-diverging plastic tube, considering implications in occlusive vascular disease
15 p2691 A70-31937

Air bubble breaking in blood and water flow passage of simulated cardiopulmonary bypass system with flow constriction
15 p2692 A70-32312

Steady and unsteady gas dynamics analogies with two dimensional water flow, taking into account energy and continuity equations
17 p3069 A70-35032

Free convection in air and water above horizontal wire heated by DC current, measuring flame temperature distribution by diffraction interferometer
17 p3198 A70-35743

Steam-water jet discharge heat transfer features, examining critical region parameters from nozzle into submerged space with large counterpressure
18 p3345 A70-36117

Turtle bladder walls osmotic properties, discussing transmembrane water flow transient acceleration by sodium transport inhibition
21 p3762 A70-41223

Freezing and melting of warm water flow at stagnation point over cooled plate for convective condition at solid-liquid interface
21 p3949 A70-41311

Vibrational response of thin walled pipes to internal turbulent water flow as function of Strouhal number
21 p3940 A70-42052

Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers
21 p3811 A70-42063

WATER HAMMER

Excess pressure in pulsed fluid jet with different emergent velocities from water hammer, discussing interaction between discrete sections
13 p2388 A70-29425

WATER INJECTION

Electron density reduction in plasma surrounding reentry vehicle due to N atom removal by water droplets injection
09 p1737 A70-23237

Optimal water quench of solid rockets using injection normal to propellant surface
16 p2968 A70-33598

[AIAA PAPER 70-640]

WATER JETS

U HYDRAULIC JETS

WATER LANDING

NT DITCHING [LANDING]

Space rescue techniques and equipment in NASA recovery programs, considering low earth orbit and water landing
01 p0035 A70-10717

Marine safety aspects of helicopters with flotation equipment, considering effects of severe winds and waves, aircraft abandonment procedure, etc
01 p0007 A70-11316

Missile impact and trajectory for water entry with zero angle of attack, including deceleration measuring instrumentation
13 p2387 A70-29039

[AIAA PAPER 70-531]

Maximum impact accelerations of spherical and conical bodies landing on water, using momentum theorem
15 p2722 A70-32524

WATER LOSS

Curve characteristics of differential thermogram of high alumina allophane, observing endothermal peak for water loss
06 p1004 A70-17225

Monograph on measurement and regeneration of water vapor loss of human skin, studying protective qualities of horny layer
10 p1812 A70-24598

Melatonin or water deprivation effects on pituitary serotonin content in rats
17 p3034 A70-35625

Intracellular shifts in body fluids and dehydration tolerance in burro, comparing water content of desert animals
21 p3766 A70-42157

WATER MANAGEMENT

Water depth determination by remote measurement of near IR reflectance of underwater plants, discussing effects of water path length changes
10 p1878 A70-24741

Swedish real time IR imaging system, discussing airborne applications in locating fresh water springs and defining irrigation patterns
10 p1879 A70-24743

Aerial photography analysis of drainage basin discharge properties, discussing surface runoff, subsurface flow and underground water movement
10 p1879 A70-24750

Ben Franklin submarine life support systems tested during Gulf Stream Drift Mission, discussing atmosphere control, water, waste and food management [ASME PAPER 70-DE-60]
16 p2852 A70-33515

Water management decision model using earth resources information system with satellite-based remote sensors, evaluating costs and benefits by systems analysis
20 p3616 A70-39066

Integrated Life Support System hardware tests, discussing oxygen and water recovery, contaminant control, personal accommodations and failure detection
21 p3833 A70-40989

WATER POLLUTION

Oil pollution remote sensing by aircraft, utilizing 9-14 micron IR mapper, 19.35 GHz microwave radiometer, aerial cameras and multiband video system
10 p1878 A70-24740

U.S. Coast Guard air delivered antipollution transfer system for oil, discussing deployment method, trajectory analysis, rigging techniques and full scale testing
[AIAA PAPER 70-1205] 21 p3752 A70-41813

WATER PRESSURE

Excess pressure in pulsed fluid jet with different emergent velocities from water hammer, discussing interaction between discrete sections 13 p2388 A70-29425

Vapor bubble response to sinusoidal pressure pulsation in water bulk and on metal wall 21 p3949 A70-41309

WATER RECLAMATION

Space stations life support systems for air purification, water reclamation and oxygen recovery 08 p1449 A70-20630

Vacuum distillation vapor filtered catalytic oxidation for water reclamation from human waste, using radioisotopes for thermal energy 20 p3579 A70-39437

Life support systems based on *Chlorella*-bacterial culture, investigating water exchange and reclamation 20 p3574 A70-40184

Vacuum distillation vapor filtered catalytic oxidation water recovery system, using radioisotopes for thermal energy supply 21 p3769 A70-40994

Potable water recovery from urine by vacuum distillation and vapor pyrolyzation 21 p3769 A70-40995

Integrated temperature and humidity control and water recovery subsystem for manned test in space station simulator 21 p3769 A70-40998

Closed loop life support system employing algae and bacteria cultures to recycle water in addition to atmospheric regeneration 23 p4156 A70-45024

WATER RECOVERY

U WATER RECLAMATION

WATER TAKEOFF AND LANDING AIRCRAFT

NT SEAPLANES

WATER TEMPERATURE

Human peripheral blood circulation during prolonged underwater activity, showing compensation for high humidity, noise levels, low water temperatures, isolation and confinement 10 p1822 A70-25178

WATER TUNNELS

U HYDRAULIC TEST TUNNELS

WATER VAPOR

Galactic water vapor line emission observations indicating short term variability in spectra of several sources 01 p0182 A70-10722

Nonequilibrium effect of expanding water vapor condensation on supersonic nozzle flows with or without inert carrier gas 01 p0063 A70-10806

Atmospheric water vapor photodissociation and resulting O evolution recalculated for determining O abundance in absence of biological activity 01 p0081 A70-11294

Stratospheric water vapor distribution from analyzing IR solar spectrum during sunset observed by balloon-borne spectrometer 01 p0081 A70-11295

Satellite and rocket probe measurements of water vapor in mesosphere 01 p0082 A70-11510

Atmospheric water vapor effect on contrast between natural target and sky via spectrophotometric method, exploring target visibility and contrast relations 02 p0325 A70-11873

Water vapor condensation by homogeneous nucleation measured for cluster number using laser light scattering compared with theory in condensing supersonic flow 02 p0279 A70-12048

Microwave dispersion caused by atmospheric gases at water vapor line, using microwave spectrometer based on dispersion detection in refraction spectrum 02 p0260 A70-12571

Troposphere microwave transmission factor determined from dispersion and attenuation caused by water vapor isolated molecular resonance 02 p0261 A70-12593

Water vapor ion cluster concentrations in d region, noting discrepancies above mesopause for model atmospheres predictions 03 p0478 A70-13992

Galactic water vapor radio sources spectral observation suggesting correlation between time variation and polarization 04 p0747 A70-14547

Depth and shape of 0.94 micron water vapor absorption band for clear and cloudy skies, noting radiation distortion for dark dense clouds 04 p0690 A70-15024

Spectral absorption and transparency of water vapor, carbon dioxide, carbon monoxide, methane and nitrous oxide bands in IR region 04 p0715 A70-15255

Dispersion and correlation function for atmospheric transparency due to water vapor, from statistical model of absorption bands and effective mass 06 p1053 A70-17204

Water droplets and air supersonic mixing, determining droplets size and optical properties 06 p0975 A70-18199

Cloud particles growth and interactions, discussing water vapor condensation, ice phase nucleation, rain droplet growth rate, etc 07 p1262 A70-18897

Production rate constants for hydrated positive ions in photoionized nitric oxide-water afterglows 07 p1346 A70-20245

Water vapor dissociation in dilute mixtures with Ar behind shock waves, studying OH concentrations using flash-absorption technique 08 p1548 A70-21355

IR spectral absorption coefficients determined for water vapor at high temperatures, describing experimental details including data acquisition and reduction 09 p1725 A70-22069

Temperature effects on IR absorption by water and carbon dioxide vapors measured in narrow spectral intervals 09 p1666 A70-22180

Vertical water vapor profile in strato-, meso- and thermospheres measured in rocket and satellite experiments by mass spectroscopy, spectral analysis and thermal sensometry 09 p1666 A70-22187

Water vapor high temperature dissociation kinetics in dilute mixtures with argon in shock waves 09 p1629 A70-22319

Water vapor emission detection from IR stars, discussing radial velocities of microwave lines 09 p1756 A70-22523

CW water vapor laser line frequency measurements by beating with radiations from HCN laser in metal-on-metal point contact diode 09 p1697 A70-22925

Grate spectrometer with high resolution for 20-45 micron range, describing water vapor transmission spectrum [ONERA-TP-782] 10 p1886 A70-23912

Atmospheric water vapor profiles remote measurements using Raman component of high powered Q switched laser backscatter 10 p1886 A70-23938

Oxide transport and water vapor effects on flash-heated beryllium droplet combustion 10 p1969 A70-25042

Quartz and alkaline glasses fracture stability in water vapor and aqueous solutions with enhanced surface activity as function of time 11 p2068 A70-25379

Fatigue life of Ni vibrated in reversed bending at 300 C in oxygen and in water vapor at various pressures 11 p2067 A70-26098

Recombination in hydrogen-oxygen reaction studied by monitoring IR emission from water vapor formed by shock initiated combustion 11 p1995 A70-26377

Water vapor pollution of stratosphere by supersonic transports, considering effects on temperature, cloudiness, albedo, etc 11 p2077 A70-26618

Stratospheric water vapor measurement by submillimeter wave sounding, considering signal fluctuations due to scattering by high cirrus clouds 11 p2077 A70-26619

Ultrasonic wave absorption and dispersion in mixtures of air and water vapor with water droplets, investigating equilibrium distribution and hydrodynamic equations [ASTME PAPER MR-69-733] 11 p2085 A70-26691

Satellite measurement of water vapor height profiles using outgoing thermal radiation and solar radiation atmospheric absorption techniques 13 p2392 A70-28571

Spectroscopic parameters for attenuation and dispersion caused by 22 GHz water vapor line, using differential microwave refractometer 13 p2393 A70-28784

Millimeter-wave probing for vertical distribution of atmospheric water vapor, comparing ground, balloon and satellite observation techniques 13 p2394 A70-28785

HOH lines existence in sunspot umbral spectrum 13 p2496 A70-29847

Fog droplet size growth time dependence and spectral variations during simulated cloud formation by water vapor condensation in chamber 14 p2601 A70-30128

Water vapor absorption bands in solar IR spectrum, considering earth curvature and atmospheric inhomogeneity and refraction 14 p2572 A70-30404

Water vapor in sunspots, taking into account red shift between telluric and intrinsic sunspot HOH lines 14 p2641 A70-30790

Humidity calibration utilizing precision wide range optically controlled thermoelectrically cooled dew point hygrometer 14 p2587 A70-31165

Water vapor abundance in Mars atmosphere from high resolution spectroscopy 14 p2649 A70-31211

Gases adsorption on water snows in cometary nucleus, noting sublimation rate role as regulating mechanism in gas production 14 p2650 A70-31244

Atomic emission in water vapor afterglow, revealing presence of Balmer series of H atom with sodium D line 14 p2579 A70-31255

Growing ice crystals surface electric potentials during various stages of water vapor condensation 15 p2769 A70-31444

Far IR second harmonic generation and frequency mixing in CdTe using pulsed water vapor laser 15 p2751 A70-31983

Molecular hydrogen, methane, water vapor and tritium concentrations near stratopause from air samples collected on Aerobee flight with liquid hydrogen cooled cryocondenser 15 p2728 A70-31995

Thermal energy negative ion-molecule reactions in photoionized NO-water vapor mixtures, determining rate constants by stationary afterglow system 16 p2954 A70-33280

Ionic collision processes in water vapor by high pressure single source mass spectrometry, examining reaction rates as function of primary ion translational energy 16 p2857 A70-34004

Telluric lines seasonal variations, discussing oxygen and water vapor photoelectric recordings in solar spectrum 16 p0000 A70-34185

Nongray radiant heat transfer corrections to thermal conductivity measurements for water vapor at atmospheric pressure 16 p3003 A70-34200

Venus deep mantle water degassing rate from atmospheric hydrogen escape data 17 p3154 A70-34610

Flux emissivity tables for water vapor, carbon dioxide and ozone based on wavelength dependent absorption coefficients and flux transmissivities 17 p3081 A70-35927

Water vapor pure rotational absorption spectrum compared with calculated far and near IR spectra 18 p3244 A70-35949

Venus atmosphere water content, discussing chemical reactions, temperature, dehydrogenation, etc 18 p3320 A70-37075

IR absorption by water vapor in transmittance windows, considering continuous absorption coefficient dependence on window width 19 p3461 A70-37425

Water vapor and OH spectra overlap, investigating association of galactic OH masers and water emission sources with IR stars 19 p3444 A70-37571

High altitude humidity from millimeter-band water vapor lines, using EHF atmospheric spectral transparency calculation 19 p3461 A70-37633

Breakdown electric field strength in S band microwave cavity for dry air, water vapor and mixture 19 p3423 A70-37757

Water vapor effect on carbon dioxide reaction with lithium hydroxide in dynamic isothermal system 20 p3582 A70-39227

Prototype electrolyzer for generating oxygen from water vapor under various atmospheric conditions, noting spacecraft cabin application 20 p3564 A70-39696

Cetyl alcohol and water vapor growth by absorption and condensation on hygroscopic nuclei population in atmosphere under cooling 20 p3664 A70-40066

Cloud structure, atmospheric water vapor and liquid water contents from passive ground based microwave spectrum measurements 21 p3846 A70-40906

D region water vapor chemistry effects on measurements of radio propagation, ionospheric temperature and seasonal changes 21 p3814 A70-40936

Moist air expansion through supersonic nozzle, investigating small ions role in water condensation 22 p4011 A70-42774

Water vapor homogeneous nucleation in simulated spacecraft debris clouds 22 p4110 A70-43115

Water vapor emission computation from statistical band model, investigating accuracy limitations 22 p4065 A70-43169

Transmission calculations for homogeneous and nonhomogeneous water vapor atmospheres, evaluating various methods 22 p4065 A70-43170

Aerosol impact traps for ground and airborne water vapor condensation studies 23 p4195 A70-44272

Spectral absorption of 2.7 micron water vapor band under various high temperature and pressure conditions, using black body radiation 23 p4220 A70-4444

Laser light scattering by moist air flows with condensed droplets of water vapor 24 p4353 A70-45565

Rate equation study of multiwavelength far IR laser oscillations in water vapor, taking into account molecular rotation-vibration interaction 24 p4354 A70-45812

WATER VEHICLES

NT AIRCRAFT CARRIERS

NT CAPTURED AIR BUBBLE VEHICLES

NT SHIPS

NT SUBMARINES

NT UNDERWATER VEHICLES

Portable telescope for river and ocean vessels, discussing design and operation thermal stability and hermetization 20 p3629 A70-39311

WATER WAVES

UHF radio telemetry system using pulse signal to measure and transmit sea waves amplitude and frequencies data to shore-based recorder 03 p0453 A70-14352

Heaving and pitching motion analysis of wave action-induced pressure gradients in captured air bubble /CAB/ ship bubble chamber, discussing fan system design [ASME PAPER 69-WA/AV-6] 04 p0622 A70-14902

Wave surface elevation and velocity fluctuations in ocean upper layer under wind waves, discussing correlation coefficients between vertical and horizontal velocity components 06 p1097 A70-17792

Turbulent energy and velocity spectra of air flow at atmospheric boundary layer over water analyzed statistically, assuming rippling surface activity 07 p1259 A70-19838

Shallow water waves simulation method for studying aerodynamic noise of free jet emitted from nozzle with variable wall roughness 08 p1485 A70-21608

Wave resistance of pressure field of hovercraft drifting over water surface determined as definite integral based on Wehausen expression 09 p1609 A70-22219

Internal waves breaking on sloping surface in two fluid system, studying interfacial shear instability by capacitance probe on-line computer system 09 p1717 A70-22371

Oceanic wind and wave predictions by satellite radar radiometer using single receiver to determine wind velocity [AIAA PAPER 70-310] 09 p1668 A70-22877

Wave physics using ocean waves as example, considering period, frequency, length, speed and similarity of various types 11 p2084 A70-26037

Laser profilometer for airborne ocean wave profile measurement 12 p2249 A70-28003

Mixed boundary value problems with radiation-type boundary conditions solved by complex Green function, discussing water waves in irrotational motion 13 p2452 A70-29536

Sonic boom penetration into water, discussing N wave reflection and refraction, sound fields, etc 16 p2952 A70-34095

Ocean swell wavelength and propagation direction measurements, using Fourier optical analysis of Apollo 7 space photography 22 p4029 A70-42766

Ocean roughness determination from satellite photographs sunglint patterns, indicating surface wind speeds 22 p4014 A70-42770

Ocean wave spectra from bistatic radar scatter data, using time delay Doppler-frequency map 23 p4184 A70-43802

Wind generated water waves spectral characteristics at low momentum levels 23 p4215 A70-44273

WATERPROOFING

Strain gages moisture protection, deriving formula for calculating acceptable protection time of insulator 11 p2049 A70-25586

WATTMETERS

Errors arising in torsion-type ponderomotive wattmeter connected in homogeneous microwave transmission line with mismatched oscillator at input and mismatched load at output 06 p1024 A70-17861

Wideband wattmeter for measurement and analysis of power dissipation in semiconductor switching devices, considering occurrence of peaks, frequency dependency of average dissipation, etc 23 p4174 A70-44597

WAVE ATTENUATION

NT ACOUSTIC ATTENUATION

NT RADAR ATTENUATION

NT RADIO ATTENUATION

NT SHOCK WAVE ATTENUATION

Absorbed RF plasma wave noise spectrum in region of anomalous dispersion, noting peak in far IR region 01 p0150 A70-10286

Resonance amplification theory of standing interfacial gravity waves in viscous fluids applied to obtain wavelengths prediction of atmospheric bow waves 01 p0081 A70-11299

Surface wave attenuation in homogeneous plasma cylinder caused by resonance in transition layer between plasma and vacuum 03 p0447 A70-13286

Sound waves dispersion and attenuation produced in gas flow by relaxation effects of solid particles presence 07 p1258 A70-19567

Ionospheric absorption of hydromagnetic waves propagated normal to magnetic field, comparing daytime to nighttime absorption [AFCRL-70-0133] 07 p1270 A70-20031

Ferrite Y-circulator, studying effects of attenuation in ferrite on mean frequency, admittance, forward and reverse losses, etc 09 p1648 A70-23157

Alfven shear waves collisionless damping from finite Larmor radius coupling to ion acoustic mode, observing longitudinal electric field existence 10 p1921 A70-23966

Laser light propagation along strongly inhomogeneous turbulent path, measuring intensity fluctuations dispersion and light amplitude 10 p1844 A70-25161

Gravity wave attenuation in F region investigated for role of ohmic losses 10 p1885 A70-25264

Ultrasonic wave absorption and dispersion in mixtures of air and water vapor with water droplets, investigating equilibrium distribution and hydrodynamic equations [ASTME PAPER MR-69-733] 11 p2085 A70-26691

Grains impurities effect on interstellar extinction curve from graphite grain model, discussing dirty ice coatings 13 p2489 A70-28915

Attenuation, resistivity and surface roughness measurements in rectangular waveguides 14 p2555 A70-30440

Trapped mode resonances, attenuation and launching tapers in overmoded rectangular waveguides 14 p2556 A70-30441

Periodically strip loaded dielectric slab guided electromagnetic waves, discussing attenuation and space harmonics amplitudes relationship 16 p2861 A70-32960

Collisionless damping of electromagnetic waves in regions with strong homogeneity of cold plasma 16 p2957 A70-33199

Ultrasonic pulses velocity and attenuation in fluids by coherent detection technique, measuring delay and decrease in amplitude due to transmission path length increase 16 p2913 A70-34084

Rocket exhaust micro and mm waves attenuation attributed to low ionization potential metal particles in propellants 17 p3196 A70-35215

Longitudinal wave absorbers attenuating resonance vibrations in rods and plates 18 p3337 A70-36304

Seismic wave attenuation mechanisms emphasizing partial melting, grain boundary relaxation and high temperature internal friction background 19 p3416 A70-38440

Helicon electromagnetic wave attenuation control by steady current of uniform density in propagation direction, considering Hall effect role 20 p3585 A70-39396

Phase velocity and attenuation of shear waves in gases from sampled-CW ultrasonic crystal resonator reflection measurement 21 p3827 A70-41457

Radial flow microturbines deflection and wave losses in circular nozzle ring oblique exit section 22 p3965 A70-43359

Ultrasonic absorption in SbSI semiconductors as function of temperature, illumination and constant electric field strength, noting absorption coefficient rise near Curie point 24 p4389 A70-45207

WAVE DIFFRACTION

Diffraction loss measurement in solid state laser to determine laser material contribution to total cavity loss 01 p0113 A70-10919

Incomplete Airy functions application to wave diffraction problems as canonical functions 01 p0144 A70-11090

Electromagnetic plane wave diffraction by slit and circular apertures in nonplanar conducting screens, presenting equiradiance contour maps 02 p0340 A70-12455

Gaussian laser beams diffraction by straight edge bounding opaque plane on basis of Kirchhoff scalar wave theory in Fresnel limit 02 p0313 A70-12456

Diffraction correction of terrestrial, atmospheric and cosmic background radiation at aperture and disk determined by artificial moon method 03 p0442 A70-13084

Interference wave formula for multiple reflections from smooth inhomogeneous region with arbitrary boundary 03 p0442 A70-13093

Plane electromagnetic wave diffraction at periodic arrays obtained by direct summation of multiple reflection between arrays 03 p0442 A70-13095

Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow 03 p0406 A70-13333

Electromagnetic wave diffraction effects on matching plasma waveguide to coaxial power extraction line 03 p0531 A70-13334

Plane longitudinal elastic monochromatic wave diffraction on stress free circular holes in infinite plate, calculating stresses between holes 03 p0589 A70-13375

Troposphere effects on low incident Explorer 22 satellite signal amplitude, noting role of diffraction 03 p0449 A70-13611

Plane electromagnetic wave diffraction at conducting stripline, calculating surface current density and far field scattering using edge wave and factorization methods 03 p0451 A70-13755

Two dimensional wave diffraction problems involving discontinuity line, analyzing instability behavior of geometrically induced singularities by applying integral transform on Helmholtz equations 03 p0525 A70-14199

Electromagnetic field sources in two dimensional problem of diffraction by slit 03 p0526 A70-14355

Plane shock wave diffraction and reflection at slender wedge in linear approximation, proposing pressure distribution calculation formulas behind shock 04 p0665 A70-14493

Electromagnetic inverse diffraction solved by Bojarski identity determining target geometry 04 p0720 A70-15703

Electromagnetic wave diffraction on absorbing black metallic and magnetic cylinders and strip, plotting radar scattering cross sections 05 p0813 A70-16262

Dynamical models of relative motions during earthquakes, solving numerically integral equations with nonintegral kernels in crack propagation and elastic wave diffraction 05 p0941 A70-16527

Correctness of Meixner assumption of scattered light field singularity near grating edge due to diffraction 05 p0816 A70-16879

Cylindrical confocal laser resonator with circular coupling aperture in center of mirror calculated for diffraction losses by numerical iteration 06 p1079 A70-17187

Plane light wave diffraction incident upon isotropic dielectric layer traversed by acoustic microwave using guided microwave theory 06 p1105 A70-17484

Mathematical models for progressing waves diffracted by smooth surfaces 06 p1105 A70-17533

Parallel plate TEM waveguides radiation pattern slope diffraction analysis 06 p1021 A70-17570

Polarization- and space-diversity reception techniques for radio links based on diffraction from ionized meteor trails 07 p1378 A70-18990

HF cylindrical waves propagation by line source in stratified medium, investigating refraction and diffraction at plane boundary using mathematical and ray methods 07 p1335 A70-19683

Focusing and saturation effects in radio star and satellite signal scintillations based on diffraction and refraction theories 07 p1271 A70-20157

Plate electromagnetic wave diffraction on conducting plate with circular hole 08 p1456 A70-20503

Kirchhoff theory of elastic wave diffraction in cylindrical case derived on modified Huygens principle, showing edge contribution 08 p1543 A70-20582

Plane E-polarized wave diffraction by slit in conducting screen using Fredholm integral equations of second kind 08 p1461 A70-21004

Diffraction by single wire waveguide with obstacle, considering propagation phenomena of symmetrical modes 08 p1472 A70-21042

Quasi-optical beam splitter, using grid diffraction of plane wave at dielectric cylinder, suitable for millimeter

ter and submillimeter wavelengths and thread measuring 08 p1496 A70-21219

Electrical and magnetic polarizability coefficients in theory of diffraction at small apertures by formulating bilateral variational principles 09 p1631 A70-22150

Electromagnetic waves diffraction on ideally conducting bodies of revolution, deriving design formulas for electric dipole 09 p1632 A70-22401

Electromagnetic wave diffraction by sphere and spheroid at resonance frequencies with incident wavelength comparable to bodies dimensions 09 p1632 A70-22402

Electromagnetic wave diffraction on array of plane waveguides, determining scattered field by solving infinite system of algebraic equations 09 p1632 A70-22407

Quasi-optical waveguide component /attenuator/ in S-band measured for performance noting diffraction as limiting factor 09 p1647 A70-22711

Plane electromagnetic wave diffraction on circular cylinder 09 p1638 A70-23339

Diffraction filters characteristics used in XUV spectroscopy involving solar, stellar and laboratory experiments 09 p1729 A70-23526

Oblique blast wave interaction with small bend along plane wall analyzed for diffraction using conformal transformation and complex variable techniques 10 p1869 A70-24524

Circular confocal laser with coupling aperture in mirror for maximum power output in specified mode, calculating field distributions and diffraction losses at reflectors 10 p1900 A70-24941

Plane electromagnetic wave diffraction at conducting stripline, calculating surface current density and far field scattering using edge wave and factorization methods 10 p1842 A70-25002

Two dimensional electromagnetic wave diffraction on arbitrary shaped homogeneous dielectric cylinder, solving integral equations on digital computer 10 p1842 A70-25105

Diffraction of plane cylindrical and spherical waves in wedge-shaped regions with reflecting edge, using asymptotic expansions 10 p1911 A70-25186

Uniform asymptotic theory of diffraction by edge of three dimensional body, obtained boundary layer solution applied to scattering by circular cylinder 11 p2084 A70-26422

Moire theory applied to direct strain measurement methods based on light diffraction 11 p2058 A70-26835

Plane electromagnetic wave diffraction by perfectly reflecting half plane calculated by elementary method 12 p2184 A70-27234

Plane periodic diffraction of elastic waves propagating in medium with infinite sequence of circular holes 12 p2325 A70-27557

Plane wave three dimensional diffraction through circular aperture in infinite screen computed for normal incidence, using Babinet principle 12 p2197 A70-27951

Diffraction and scattering of electromagnetic waves emitted by electric dipole arbitrarily oriented in space on inhomogeneous sphere 12 p2190 A70-28172

Textbook reissue on diffraction of electromagnetic and acoustic waves at open end of waveguide, using Wiener-Hopf-Fock factorization method 13 p2363 A70-28724

Correction to Smyrl results for perturbation pressure in interaction field behind plane shock diffracted by supersonically moving thin yawed wedge 13 p2338 A70-28822

Elastic plane wave diffraction and scattering at convex obstacle in semibounded regions, using method of images 13 p2452 A70-29289

Plane harmonic wave steady state diffraction at cylinder in elastic half space, applying method of images 13 p2366 A70-29320

Focusing lens edge diffraction effect on angular distribution of laser radiation, considering zero mode field distribution 13 p2428 A70-29367

Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow 14 p2528 A70-30712

Electromagnetic wave diffraction effects on matching plasma waveguide to coaxial power extraction line 14 p2623 A70-30713

Speckle patterns Fourier transform analysis for diffraction limited resolution attainment in large telescopes 14 p2589 A70-31382

Electromagnetic wave diffraction by heterogeneous planar dielectric structures, showing field distributions by single variable Fredholm equations 15 p2695 A70-31436

Diffraction on strip, investigating for Dirichlet boundary conditions, deriving excited current density and scattered pattern 15 p2696 A70-31515

Field correlation theorem for deducing Cassegrain antennas performance from internal field distributions, considering two reflector diffraction problems 15 p2698 A70-31953

Plane wave scattering by strip of elliptical cylinder, considering geometrical diffraction theory 15 p2700 A70-32405

Wave diffraction by wedge, using Heaviside step function and Sommerfeld contours 15 p2700 A70-32407

Wave diffraction by parabolic cylinder, solving boundary value problems for two dimensional wave equations via separation of variables 15 p2700 A70-32408

Wave diffraction by half plane limit of parabolic cylinder and wedge, using Fresnel integral and Heaviside step function 15 p2700 A70-32409

EM wave scattering and diffraction by acoustically soft and hard oblate spheroids 15 p2701 A70-32413

Electromagnetic waves diffraction and scattering from acoustically soft and hard and perfectly conducting disks in plane or arbitrary incidence directions 15 p2701 A70-32414

Radiation pattern of radial infinitesimal current elements near or on finite length conducting cylinders, using image and geometrical theory of diffraction techniques 16 p2860 A70-32956

Plane wave diffraction by cylinder tipped half plane, demonstrating localized behavior by geometrical theory 16 p2872 A70-32975

Monochromatic electromagnetic wave diffraction on moving ideally conducting half plane, deriving parameters and spectral composition after diffraction 16 p2863 A70-33216

Microwave antenna with aperture in infinite conducting plane, analyzing radiation patterns, scattering and diffraction 17 p3043 A70-35053

German monograph on shock wave diffraction at spheres and cylinders 17 p3071 A70-35377

Long range tropospheric radio wave propagation, calculating signal impulse function and time lag between diffraction and reflection 17 p3048 A70-35678

Plane normal shock front diffraction along free interface between half planes of homogeneous fluids at rest, using method of characteristics and Whitham technique 17 p3074 A70-35886

Shock wave diffraction by moving thin wing over flat terrains, discussing aircraft blast encounter 18 p3205 A70-36195

Plane wave diffraction by periodic grating reduced to waveguide problem, determining asymptotic behavior of integral solution 18 p3291 A70-36286

Plane electromagnetic waves diffraction by periodic structure of infinite system of parallel strips, reducing problem to solution of linear algebraic equations 18 p3227 A70-36287

Plane electromagnetic wave diffraction by infinite grid above finite dielectric layer, calculating field distribution 19 p3375 A70-37281

Electric field equations of plane EM wave diffraction at lattice of conducting cylinders, using Hankel function 19 p3375 A70-37289

Diffraction by star bounded by closed contour scalar field created by surrounding medium, reducing solution to boundary value problem via algorithm 19 p3470 A70-37431

Diffraction of EM waves emitted by vertical electric dipole on conducting thin circular disk, using algorithm for integral equation 19 p3375 A70-37432

Plane EM wave diffraction by conducting strip, using algorithm for reducing integral to linear algebraic equations 19 p3376 A70-37433

Regularizing algorithm for Fredholm integral equation used in diffraction by ideally conducting strip 19 p3376 A70-37434

One dimensional integral equations for two dimensional problems of EM wave diffraction by cylindrical bodies 19 p3376 A70-37435

Electromagnetic wave diffraction by inhomogeneous anisotropic body, applying Fredholm integral equations 19 p3376 A70-37436

Plane electromagnetic wave diffraction by thin metal gratings, using mathematical method of elasticity theory 19 p3376 A70-37712

Plane polarized electromagnetic wave diffraction by dielectric grating, obtaining linear algebraic equations for field coefficients 19 p3376 A70-37713

Polarized plane EM wave diffraction by inclined half plane grating, obtaining transformation matrices coefficients 19 p3376 A70-37714

Plane wave diffraction by serrated surface, examining wave transformation matrix coefficients 19 p3377 A70-37715

Wave diffraction by finite dimension grating, determining EM field strength distribution by approximate method 19 p3377 A70-37716

Plane EM wave diffraction by ribbon periodic grating, determining diffraction spectrum wave amplitudes 19 p3377 A70-37718

Plane EM wave diffraction by bounded and unbounded periodic gratings 19 p3377 A70-37719

Diffracted-field structure on two-element gratings in near zone, calculating amplitude, phase and energy flux for normal and slant incidence of EM fields 19 p3377 A70-37720

Plane monochromatic EM wave diffraction by rectangular metal bar tapered grating, examining amplitude and polarization parameters 19 p3377 A70-37721

Diffraction radiation excitation by electron beam moving within resonant system formed by ribbon grating and metal plane, taking into account screen conduction losses 19 p3377 A70-37724

Polarized electromagnetic wave diffraction by semiminfinite symmetrical obstacles in rectangular waveguide, calculating transformation coefficients for wide frequency range 19 p3378 A70-37729

Linear equations for wave diffraction in rectangular waveguides with step-shaped inhomogeneities 19 p3378 A70-37730

H and E waves diffraction in circular waveguide by diaphragm thickness, using linear equations and Fourier-Bessel series for representation 19 p3378 A70-37731

Cylindrical EM waves diffraction by two parallel ideally conducting elliptical cylinders, discussing field and surface current distributions 19 p3378 A70-37734

Plane EM wave diffraction in cylindrical plasma-electron beam system 19 p3378 A70-37740

Double asymmetric grating with thin ideally conducting strips, describing incident E-polarized electromagnetic wave diffraction 19 p3378 A70-37744

Diffraction amplitudes in plane H-polarized electromagnetic wave incident obliquely on grating with closely spaced conducting rectangular bars, obtaining transmission coefficient 19 p3378 A70-37745

Strain transducer /optical diffraction grating/ for plastic wave propagation measurement along specimens subjected to impact 19 p3425 A70-37884

Geomagnetic pulsations propagation through horizontally inhomogeneous ionosphere, solving EM wave diffraction problem 19 p3416 A70-38589

Diffraction effects on radiometer field of view with rectangular primary and secondary apertures and field stop 20 p3627 A70-39087

Power diffraction losses at mirrors of asymmetric confocal laser interferometers with output coupling apertures 20 p3628 A70-39130

Diffraction-limited scalar image formation with large angle point reference hologram arrangement of arbitrary surface shape, point reference source and object 20 p3628 A70-39131

Asymptotic expansion methods for solving wave propagation and diffraction problems via localization principle 20 p3657 A70-39219

Space-time rays relation to plane wave dispersion surfaces in radiation and diffraction problems, using ray tracing diagrams 20 p3671 A70-39220

Plane electromagnetic waves diffraction on thin filaments cloud /passive dipoles/, discussing field fluctuations and mean power 20 p3588 A70-40298

Microwave aperture antenna in finite size ground plane, calculating radiation pattern distortion by superposition of boundary value and wedge diffraction solutions 20 p3599 A70-40314

Plane wave diffraction by periodic array at boundary between two media, discussing asymptotic behavior of reflection and transmission coefficients 21 p3806 A70-40614

Electromagnetic wave diffraction by ideally conducting wedge of finite radius, deriving asymptotic formula for plane wave scattering 21 p3784 A70-40626

Frequency shifted diffraction of monochromatic Gaussian light beam by reflection off ultrasonic surface wave 21 p3850 A70-41907

Diffraction theory relationship to ray optics for coherent light propagation through lens systems 21 p3829 A70-41929

Diffraction theory of sideband holography with transmission objects, discussing geometrical construction of image location and disappearance conditions 21 p3830 A70-41998

Plane electromagnetic waves diffraction by moving periodic metal strip grating, writing E polarized wave of unit amplitude by Lorentz transforms 22 p3984 A70-42388

Stationary saddle points phase method for wave diffraction problems in inhomogeneous medium, deriving asymptotic expansion for surface integrals 22 p3984 A70-42390

Electromagnetic wave diffraction at multilayer wire grating, discussing computer program for diffraction field calculation 22 p3985 A70-42399

Elastic wave diffraction by rigid inclusion, calculating far field displacement and cross section by integral equation method 22 p4073 A70-42636

Remote sensing of returning reflected and diffracted seismic waves illuminating layered rocks subsurface, discussing data visual display 22 p4018 A70-43085

Far field diffraction spreading of surface acoustic waves on cut Li-niobate in two directions 23 p4230 A70-44199

Spectral filtration methods in diffraction instruments at vacuum UV region, discussing ambient storage conditions and fabrication effects 23 p4219 A70-44412

EM wave backscattering from lossless dielectric sphere, examining diffracted field surface waves role 23 p4165 A70-44960

Sonic boom waves diffraction and reflection, developing analytical method for pressure-time history in vicinity of walls and corners 24 p4289 A70-45266

Plane wave diffraction by infinite strips and slitted planes, obtaining asymptotic expansions valid for HF 24 p4426 A70-46019

Confocal microwave Fabry-Perot interferometer resonator diffraction loss and field configuration measurements, noting agreement with theory 24 p4381 A70-46242

WAVE DISPERSION

He-Ne laser heterodyne system evaluating dispersive effect in He-Ne laser, measuring dispersion as function of cavity loss, excitation level, etc 01 p0107 A70-10102

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting gases 01 p0149 A70-10162

Absorbed RF plasma wave noise spectrum in region of anomalous dispersion, noting peak in far IR region 01 p0150 A70-10286

Electromagnetic propagation in linear dispersive media, discussing energy transport velocities of total stored energy density and electromagnetic energy 01 p0043 A70-10779

Flexural wave propagation in infinitely long circular bimaterial cylinders based on equations of linear elasticity, noting dispersion characteristics different from homogeneous cylinders 01 p0208 A70-11188

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/dispersion 01 p0084 A70-11554

Book on communication and information theories application to fading dispersive communication channels, discussing tropospheric scatter, HF ionospheric links, moon bounds, etc 02 p0253 A70-11700

Microwave dispersion caused by atmospheric gases at water vapor line, using microwave spectrometer based on dispersion detection in refraction spectrum 02 p0260 A70-12571

Free oscillations and surface wave dispersions from lunar models based on Orbiter data and corresponding pressure region of earth crust 02 p0379 A70-12777

Dispersive compression of plane frequency modulated waves in inhomogeneous plasma based on generalizing geometric optics approximation to unsteady quasi-harmonic processes 03 p0447 A70-13287

Dispersion equation and coupling impedance of two dimensionally periodic slow wave structure of cellular cylinder type with parallel perpendicular diaphragms 03 p0456 A70-13438

Atmospheric distortion effect on short laser pulses attributed to aerosols, using real time pulse comparison methods 04 p0701 A70-15020

Dispersion curves for wave propagation in infinite elastic bars of elliptic cross section obtained by method of collocation 04 p0773 A70-15080

Numerical solution for differential equations describing nonlinear beam-plasma interactions based on dispersion relation analysis 05 p0886 A70-15799

Pulsars dispersions, setting upper limit to emission measure of dense plasma 05 p0921 A70-16984

Propagation, reflection and dispersion equation for electromagnetic waves in longitudinally magnetized plasma filled coaxial waveguide using rotating coordinates 06 p1016 A70-17124

Wave dispersion across magnetic field in cold and warm collisionless Maxwellian plasmas, discussing electromagnetic and electrostatic Bernstein modes 06 p1116 A70-17364

Anomalous dispersion measurements in IR range with multibeam sequential Fabry-Perot interferometers using photoelectric method 06 p1064 A70-17811

Pipe bounding walls effect on sound waves dispersion in rarefied gas, deriving integral equations showing frequency range decrease with container size 06 p1107 A70-18315

Sound waves dispersion and attenuation produced in gas flow by relaxation effects of solid particles presence 07 p1258 A70-19567

Dispersion of ion-acoustic waves in quiescent rare gas discharge plasmas, discussing model simulating ion waves generated by finite sine wave bursts 07 p1352 A70-19990

Diffraction pattern drift velocity increase with temporal frequency of Fourier components by dispersion analysis of interplanetary scintillation, noting solar wind structure 07 p1388 A70-20076

Plasma-electron beam system LF dispersion characteristics noting ion instability 08 p1549 A70-20505

Spectrum of waves emitted from waveguide of two plane dielectric or isotropic plasma layers, solving dispersion equations numerically by computer 08 p1472 A70-20973

Weakly nonlinear dispersive cold plasma waves propagation by two time scale expansion, taking into account amplitude dispersion and coupling 08 p1553 A70-21613

Stellar scintillation saturation at large zenith angles interpreted in terms of combined dispersion and aperture filtering 09 p1726 A70-22073

Single-pulse laser radiation losses dependence on operation time length due to angular dispersion 09 p1694 A70-22140

Wave dispersion relations in uniform magnetized plasma represented in single integral form, discussing model loss-cone and temperature anisotropy distributions 09 p1736 A70-23188

Polydisperse dielectric system distribution parameters determined from hard monochromatic polarized radiation scatter by artificial aerosols 10 p1916 A70-24500

Ionospheric irregularities showing dispersive motions from systematic skewness in cross correlation functions for satellite scintillations at space receivers 10 p1881 A70-24810

Helicon wave dispersion in cold multicomponent plasma of n-type Si and Ge semiconductors in linear hydrodynamic approximation 10 p1928 A70-24832

Waveguides consisting of three concentric regions suitable for plasma experiments, showing dispersion characteristics and cut-off frequencies 10 p1850 A70-24835

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting gases 10 p1925 A70-25010

Stationary and nonstationary nonlinear waves propagation in multicomponent collisionless plasma, considering dispersion relations for acoustic oscillations 10 p1844 A70-25166

Ultrasonic wave absorption and dispersion in mixtures of air and water vapor with water droplets, investigating equilibrium distribution and hydrodynamic equations [ASTME PAPER MR-69-733] 11 p2085 A70-26691

Microwave lines dispersion equations for ferrite cylinder and spiral and circular waveguides 11 p2012 A70-26803

Dispersion relations between wave frequency and vector obtained from matrix equation for wave propagation in solid state plasma with ferroelectric and ferromagnetic properties 12 p2283 A70-26971

Dispersion relation derived for space-charge waves propagating in thick Gunn diode, showing validity limit of one dimensional approach 12 p2194 A70-27164

Linearized dispersion relation for plane wave propagation in uniform unbounded cold plasma permeated by DC magnetic field, considering two stream instability 12 p2281 A70-27881

Wave propagation in spatially homogeneous time varying dispersive media, emphasizing excitation and source dependent phenomenon 12 p2188 A70-27961

Monochromators dispersion and resolution increased by multiple passage of light through singly dispersive element, comparing optical schemes 12 p2237 A70-28160

Light pulse propagation in dispersive nonlinear dielectric analyzed on nonlinear Lorentz model 12 p2274 A70-28216

LF electrostatic waves oblique to magnetic field in plasma, evaluating dispersion relation near ion cyclotron frequency 13 p2363 A70-28641

Spectroscopic parameters for attenuation and dispersion caused by 22 GHz water vapor line, using differential microwave refractometer 13 p2393 A70-28784

Wave dispersion in lower exospheric multicomponent plasma, investigating mode group velocity frequency dependence at various altitudes 13 p2395 A70-28940

Electrostatic waves for upper ionospheric plasma model, obtaining solutions to dispersion relation at multiples of electron cyclotron frequency 13 p2400 A70-29914

Hydromagnetic wave velocity and space anisotropy instabilities in magnetosphere, using dispersion relation 13 p2483 A70-30086

Laser beams intensity fluctuations dispersions and correlation functions at various distances 14 p2593 A70-30172

Atmospheric turbulence effects on acoustic-gravity waves propagation, deriving dispersion relation for phase velocity and propagation constants 14 p2579 A70-31252

Space charge waves in electron beams with velocity distribution, considering dispersion equation and Landau damping 15 p2708 A70-31831

Plasma beam systems dispersion equation with allowance for electron collisions with heavy particles 15 p2779 A70-32117

Large amplitude electromagnetic waves propagation along plane parallel nonlinear dielectric layer, considering dispersion and permittivity 15 p2699 A70-32190

Single mode gas laser with large saturation and dispersion effects, discussing resonator alignment to spectral line frequency 15 p2752 A70-32196

Approximate dispersion relation for MHD waves from macroscopic plasma equations including particles collision terms 16 p2859 A70-32941

Angular scattering of interstellar medium resulting in multipath dispersion of pulsar pulses, discussing NP0532 in Crab Nebula 16 p2972 A70-32988

Troposphere effects on microwave and optical signals, correlating refractive index and dispersion variabilities 16 p2862 A70-33020

Methods and equipments for light dispersion measurements for determining atmospheric refraction in terrestrial angle and electrooptical distance measurements 16 p2911 A70-33523

Wave propagation in infinite elastic plate in contact with inviscid incompressible liquid layer, deriving dispersion relation 16 p2993 A70-34094

Heteroepitaxial ZnO film on anisotropic sapphire substrate, calculating dispersion for fundamental Rayleigh wave mode 17 p3144 A70-35908

Radiation condition for unbounded anisotropic dispersive magnetoplasma 18 p3295 A70-36492

Elastic particulate composite solid with microinclusions, deriving dispersion relations governing plane longitudinal wave propagation modes by analogy with continuum theory 19 p3540 A70-37942

Synchrotron radiation emissivity function containment in dispersion equation for plane wave propagation in magnetoactive plasma 19 p3480 A70-38017

Multilayered and multiple supersonic jets, deriving dispersion equations for boundaries stability 19 p3354 A70-38663

Holographic bandwidth reduction by periodic dispersion structures, noting large viewfield and compact data recording 20 p3627 A70-39096

Space-time rays relation to plane wave dispersion surfaces in radiation and diffraction problems, using ray tracing diagrams

20 p3671 A70-39220

Electrostatic ion waves in uniform magnetic field, calculating phase and group velocities as function of propagation angle for comparison with dispersion measurements

20 p3678 A70-39659

Electromagnetic wave propagation in one dimensional periodic waveguide slow wave systems, deriving dispersion curves by perturbation theory

21 p3784 A70-40628

Collisionless shock wave geometry, determining dispersion relation for ion acoustic waves propagating in plasma

21 p3856 A70-41082

Mach-Zehnder interferometer for plasma diagnostics measurements, discussing optical interference method, fringe shift determination and dispersion equations

21 p3856 A70-41150

Plasma turbulence statistical theory in magnetic field based on averaging operators, deriving nonlinear dispersion relation

21 p3857 A70-41386

Pulse velocity and mode pulling in inhomogeneously broadened laser with equally spaced modes, noting pulse shape time stability in presence of dispersion

21 p3838 A70-42008

Gas discharge positive column finite length effect on wave dispersion and instability, indicating critical magnetic field

22 p4079 A70-42374

Dispersion equation for impedance elements periodic structures phase velocity calculation, discussing approximate solution methods

22 p3984 A70-42392

Isotropic homogeneous elastic cylindrical rods, investigating nonlinear longitudinal dispersive waves corresponding to water wave theory analogs

22 p4115 A70-42952

Striations due to mechanical oscillations in fast wire explosions, using dispersion for elastic waves in solid cylinders

22 p4074 A70-43002

Dispersion characteristics of electronically tunable periodic rectangular waveguides, using external DC magnetic field

23 p4168 A70-43781

Multiphase modes for nonlinear dispersive waves under large scale interaction, extending Whitham theory

23 p4217 A70-43943

Microwave lines dispersion equations for ferrite cylinder and spiral and circular waveguides

24 p4317 A70-45178

WAVE DRAG

NT INTERFERENCE DRAG

Wave drag dependence of delta wings on thickness distribution [DVL-888]

03 p0406 A70-13273

Wave drag in stratified flow lee waves without upstream influence calculated for cylindrical and three dimensional obstacles

03 p0479 A70-14229

Slender wings and fuselages resistance at zero lift in supersonic flow, using Karman and Moore linear theory [DGLR-69-28]

04 p0616 A70-15154

Generatrix shape determined for body of revolution moving at supersonic speed with minimum wave drag

09 p1603 A70-22434

Slender body transonic wave drag double integral, describing computer program for numerical evaluation

11 p1977 A70-26644

Minimum-drag boattail configurations optimization for supersonic flow, determining wave drag coefficients

22 p3961 A70-42714

Wave drag due to swirling flow through convergent-divergent nozzle, deriving approximate solution for specified nozzle shape at various swirl ratios

23 p4179 A70-43971

WAVE EQUATIONS

NT LAME WAVE EQUATIONS

NT SCHROEDINGER EQUATION

Potential representation of vector fields effecting decoupling of vector wave equation of elasticity for radially heterogeneous isotropic media

01 p0208 A70-11189

Longitudinal wave motion in rods, plates and shells based on three dimensional equations and asymptotic expansion

01 p0209 A70-11365

Integral theorems for wave-type heat conductivity equation

01 p0219 A70-11398

Self similar wave solutions of continuity and momentum equations for two dimensional unsteady isentropic motion of polytropic gas

02 p0278 A70-11998

Propagation equations for spherical waves in elastoplastic work hardening materials

03 p0585 A70-12972

Van der Pol equation for finite amplitude ion-acoustic waves in unstable plasma propagating across weak magnetic field

03 p0531 A70-13404

Spatial amplification criteria for hyperbolic wave equations extended to include parabolic equations, discussing convective and absolute instabilities

03 p0519 A70-13522

Solutions properties of initial and mixed initial-boundary value problems of wave equations

03 p0537 A70-14384

Surface waves excited by horn above dielectric disk backed by metallic disk, formulating characteristic wave equations and solving for attenuation and propagation constants

04 p0659 A70-15305

Nonlinear wave propagation in relaxing gas with internal energy characterized by translational and internal temperature, using model equation for piston induced motion

04 p0786 A70-15324

Free vibrations of layer of micropolar continuum, analyzing displacements, microrotations and frequencies as wave number power series

04 p0777 A70-15498

Propagation and growth equations governing wave propagation in micropolar viscoelastic solids couplings between discontinuities in macroscopic and microscopic fields

05 p0929 A70-16063

Finite difference wave equation to obtain asymptotic estimate for magnitude of precursor effects

05 p0875 A70-16310

Second order wave structure theory for shock wave system from body in supersonic flight analyzed for planar flows

05 p0790 A70-16797

Small amplitude spherical elastic-plastic waves initial behavior studied for critical and supercritical loading

05 p0945 A70-16819

Wave equation for elastic waves in isotropic solid solved in Cartesian and circular cylindrical coordinates for studying microsonic wave guiding structures

06 p1105 A70-17479

Linear transformation of waves in nonuniform magnetoactive plasma by solving wave equation with/without allowance for spatial dispersion

06 p1119 A70-17498

Eigenvalue corresponding to decaying modes for wave equation in exterior of obstacle investigated for dependence on obstacle geometry

06 p1095 A70-18474

Time dependent relaxation model for heat flux in metals from quantum mechanical form of Boltzmann transport equation, yielding damped wave equation for temperature

06 p1090 A70-18612

Infinite-dimensional relativistic wave equations for mass spin dependence

07 p1333 A70-18959

Surface inhomogeneities effect on sound radiated by nearby turbulence near flexible boundary, using converted Lighthill wave equation to obtain far field radiation

07 p1256 A70-19262

Laser resonator with concave mirrors and ring aperture as radiation outlet, calculating natural oscillations by wave equation

08 p1510 A70-20508

Book on mathematical theory of electromagnetic waves covering vector analysis, reduced wave equation, linear transformations, boundary value problems and radiation patterns

08 p1533 A70-20759

Curved thin rods torsional and flexural waves propagation equations, considering geometry and shear and Young moduli

08 p1588 A70-21201

Heavy particle collisions impact parameter and wave equations for direct excitation and electron capture processes

08 p1548 A70-21502

Two dimensionally periodic slow wave structure, verifying Shein formulas

09 p1637 A70-23143

Radio wave propagation equations, applying stationary phase method for finite limits of dimensionless line integral

09 p1638 A70-23662

Sound energy transmission and radiation into room by flexible structural panels subjected to acoustic excitation using wave equations

10 p1964 A70-25224

Volterra method applied to solution of mixed boundary value problems for wave equation

12 p2159 A70-28243

Shock and simple wave interactions, using quasi-linear equations for forward facing wave overtaking forward facing shock

14 p2567 A70-31283

Hadron energy levels description by Lorentz invariant wave equation in form of supermultiples

15 p2776 A70-31736

WKB method applied to ionospheric equations with strong wave coupling

15 p2725 A70-31857

Micropolar Cosserat medium of thermoelasticity wave equations for Hooke medium, deriving elastic potentials and stress functions

15 p2822 A70-32354

Wave scattering from elliptic cylinder, solving boundary value problem for two dimensional wave equation

15 p2700 A70-32404

Oscillatory and wave processes in nonlinear distributed systems by asymptotic method analogous to Bogoliubov concentrated systems

16 p2951 A70-33252

Nonlinear wave equations model for human torso under impulsive stress, obtaining asymptotic solution

16 p2854 A70-34247

Thermomagnetoelasticity wave equations of heat conduction for thermal and coupled perturbations propagating in isotropic medium at finite velocities

16 p2953 A70-34326

Phase plane method for Hill equation in problems involving EM wave expansion in elliptical waveguides or single circuit parametric systems analysis

18 p3227 A70-36424

Adiabatic invariant of nonlinear periodic wave described by partial differential equations in weakly inhomogeneous medium

18 p3291 A70-36642

Existence theorem for piecewise-continuous solutions of waves and shocks in relativistic MHD, using Riemann manifold

19 p3477 A70-37579

Electric field component equations of electromagnetic wave traveling through stratified plasma, considering incident and reflected ordinary and extraordinary waves

19 p3379 A70-37863

Electron-ion wave interaction due to scattering by electrons, using kinetic wave equation to describe wave-particle interaction

21 p3858 A70-41712

Liquid propellant rocket engine combustion instabilities, describing unsteady combustor flow by single nonlinear wave equation with stable and unstable finite amplitude limit cycles

23 p4233 A70-44425

Perturbation effects on nonlinear first order wave equations discontinuous solutions decay, discussing boundary value problem for stress wave propagation in rod with viscous damping

24 p4426 A70-46026

Variational principle and reciprocity theorem for initial value problems associated with wave equations, discussing solution uniqueness conditions

24 p4380 A70-46037

Optical wave propagation through random atmospheric turbulence, deriving wave equation power series solution for homogeneous random refractive index field

24 p4314 A70-46126

WAVE EXCITATION

NT ACOUSTIC EXCITATION

NT HARMONIC EXCITATION

Multimode excitation of large aperture horn antennas to produce electronic deflections of directional pattern

01 p0046 A70-11454

Surface function and impedance distribution for unilateral surface wave antenna excitation by slot emitter above surface impedance segment

04 p0655 A70-14403

Equatorial jet stream excitation of longitudinal waves, analyzing plasma beam instability and spectrum of short wave inhomogeneities by quasi-hydrodynamic equations

05 p0842 A70-16759

Nonlinear effects in spiral galaxies with emphasis on solar neighborhood region, discussing radial motion, stationary state with excited waves and vertex deviation

05 p0917 A70-16905

Radiation patterns from finite conducting cone excited by quarter wave monopole protruding from center of base computed on digital computer

06 p1020 A70-17559

Reflection coefficients, radiation patterns and surface wave excitation calculated from aperture electric field obtained for waveguide radiating through dielectric slab

06 p1020 A70-17561

Collisional skewing of electron distribution function associated with heat conduction in solar wind, exciting collisionless ion-acoustic, electrostatic ion cyclotron and magnetoacoustic waves

06 p1136 A70-18527

Spontaneous echoes amplitude resulting from damped electronic plasma plane wave excitation in collisionless plasma

09 p1735 A70-22843

Ion-burst excited by pulsed mesh grid in plasma in connection with sheath structure

10 p1922 A70-23989

Nonlinear parametric excitation of stable resonant drift waves by mode-mode coupling in potassium plasma of Q device

11 p2090 A70-26020

Waves and mean currents excitation in stratified fluid due to moving heat source, studying effect on mean motion

11 p2036 A70-26167

Wave propagation in spatially homogeneous time varying dispersive media, emphasizing excitation and source dependent phenomenon

12 p2188 A70-27961

Fabry-Perot resonator higher modes excitation by external TEM wave, discussing optimal mismatch for maximum intensity

13 p2408 A70-29358

Surface wave excitation including PM and dipole modes and Sommerfeld waves

14 p2549 A70-30444

Periodic shock waves amplitudes and profiles, investigating longitudinal nonlinear oscillations of gas excited in closed tube

15 p2719 A70-31482

Transient excitation of Schumann earth-ionosphere cavity resonances by large ELF atmospherics, using propagation model

15 p2726 A70-31865

Resonance excitation of high amplitude waves in plasma cylinder by HF azimuthal axially periodic current flowing through coil encircling plasma

16 p2957 A70-33194

Longitudinal and transverse hypersonic mm waves excitation in quartz single crystal at liquid helium temperature

16 p2952 A70-33258

HE sub 11 mode launching in optical communication system, considering fiber tapering effect on excitation efficiency

16 p2875 A70-33400

Plasma waves parametric excitation by external electric field, using perturbation method of multitime scales

17 p3140 A70-34933

Surface wave antennas, operated on guided wave mode parallel to interface and with radiation at discontinuities, calculating excitation and radiation characteristics

17 p3052 A70-35072

Type I burst effects on type III and V bursts occurrence, suggesting Langmuir waves excited by suprathermal electrons

17 p3173 A70-35746

Scattering structures of two parallel elliptical cylinders, tapes or combinations, deriving surface current density distribution under plane TM wave excitation

19 p3375 A70-37279

Homogeneous plasma electrostatic oscillations excitation by electromagnetic waves nonlinear interaction in magnetic field, deriving expression for density perturbation

19 p3475 A70-37536

Diffraction radiation excitation by electron beam moving within resonant system formed by ribbon grating and metal plane, taking into account screen conduction losses

19 p3377 A70-37724

Open plane slotted waveguide excitation by current carrying filament, using long wave approximation

19 p3377 A70-37726

Two axially positioned cylindrical waveguides with slots cut periodically along generatrices/double squirrel cage/, analyzing behavior under excitation by rotating charged filament

19 p3386 A70-37733

Electromagnetic waves and oscillations excited by magnetic current ring source around infinitely long compressible plasma column, deriving radiation field distribution

20 p3685 A70-40506

Alfven waves amplification propagating along sinusoidally perturbed magnetic field in argon plasma, noting parametric excitation

21 p3855 A70-40947

Spread electron beam excitation of magnetoactive plasma waves in quasi-linear relaxation

21 p3855 A70-40948

Continuous pseudoacoustic and ion waves excitation and damping in plasma sheath around grid, taking into account transit time effect on ion acceleration

21 p3858 A70-41710

Ionization waves excitation and damping in MHD channels, investigating effects on electric conductivity, Hall parameter and electron temperature

22 p4081 A70-42823

Longitudinal and transverse hypersonic mm waves excitation in quartz single crystal at liquid helium temperature

23 p4218 A70-44281

Acoustic plasma wave excitation by transverse electromagnetic wave beam, calculating LF instabilities and energy losses

24 p4384 A70-45149

Microwave waveguide rotary joint using symmetrical excitation for mode conversion to obviate filters

24 p4318 A70-45221

Nonspherical wave excitation in solar atmosphere in presence of toroidal magnetic field

24 p4400 A70-45312

Type 2 solar radio burst shock wave exciter velocity from dynamic spectrograms, relating correction to shock strength gradient

24 p4401 A70-45322

Cs ion beam space charge and current neutralization by electron capture for partially ionized plasma formation, investigating longitudinal electrostatic wave excitation

24 p4385 A70-45465

WAVE FRONT DEFORMATION

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform

03 p0589 A70-13331

Saturation induced wave front distortions effect on beam divergence and frequency modulation in laser amplifiers, discussing refractive index changes

04 p0703 A70-15620

Warped wave front viewpoint in analyzing object plane resolution, contrast and location in polariscopes

07 p1280 A70-19236

Gasdynamic flows strong and weak density discontinuity surfaces determination, using shadowgraphs and interference patterns

12 p2238 A70-28248

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform

14 p2657 A70-30710

Wave front reconstruction from blazed holograms, noting wave front distortion for nonconstant amplitude case

15 p2736 A70-32011

Interferograms of window wave front deformations to measure angular deviations to line of sight

15 p2737 A70-32038

Manganin in wire and thin foil geometries, measuring shock piezoresistance coefficient as function of deformation

20 p3687 A70-40166

Microwave transmission over elevated line-of-sight path, measuring phase front distortion between pairs of paths

22 p3991 A70-43580

WAVE FRONT RECONSTRUCTION

Optical reconstruction of microwave holograms recorded by liquid crystal detectors, emphasizing dependence on IR heat bias provided by incandescent bulb

01 p0086 A70-10421

Holographic two beam real-time Fizeau interferometer for recording and reconstructing reflected light waves in silvered flat surfaces measurement

01 p0090 A70-10905

Interference fringe in Fraunhofer hologram reconstruction of tapered glass fibers related to fiber profiles

01 p0090 A70-10906

IR holography using thermochromic material and cuprous mercuric iodide to record on-axis interference pattern, reconstructing in visible range with He-Ne laser

01 p0092 A70-11170

Hologram image resolution, finding angular alignment of reconstruction wavefront as limiting factor

02 p0297 A70-11923

Anamorphic holograms in optical and radar holography and reconstruction, discussing formation and fundamentals

02 p0298 A70-12182

Microwave holography using probe scanning, analyzing causes of distortion and effects on image reconstruction

02 p0302 A70-12618

Holographic wavefront reconstruction variants and applications to instrumentation, process engineering and information techniques

04 p0688 A70-14717

Wave front reconstruction for perfectly bleached holograms not achievable by simple coherent illumination due to remaining amplitude variation

04 p0691 A70-15033

Image formation from wave front sampling in holography by spatial filtering, comparing Monte Carlo sampling to spaced sampling

04 p0692 A70-15365

Information transmission capability of hologram without distortion, considering confocal resonator reconstructible transparencies for bounded hologram

05 p0848 A70-16265

Hologram constructed with microwaves with image reconstruction at optical wavelengths using laser

05 p0849 A70-16659

Optical wave front reconstruction principles applied to sonic and seismic wave holography for mapping earth subsurface structure

05 p0850 A70-16685

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns

06 p1063 A70-17643

WAVE FRONT RECONSTRUCTION

Image contrast in holographic reconstructions, discussing influence of given surface intensity recording and oblique reference wave on hemigram

06 p1067 A70-18398

Hologram interference fringes formation and location using grating model of diffusely reflecting surface

07 p1280 A70-19144

Holographic recording of information contained in evanescent wave fields in high resolution photographic emulsions

07 p1281 A70-19367

Holography without reference beam for two and three dimensional interferential wave front recording and reconstruction

07 p1285 A70-19858

Holographic recording and reconstruction for wide angle three dimensional displays noting limitations

07 p1287 A70-20085

Photographic film imagery, degraded by long term artificial atmospheric turbulence, restored by spatial filters placed in Fourier transform plane

07 p1336 A70-20090

Zoom effect in magnification of reconstructed image in incoherent holography achieved by varying fringe scale via rotation of interferometer components

07 p1288 A70-20099

Laser focused hologram reconstruction in passing white light

07 p1289 A70-20320

Hologram data efficiency improvement by spatial offset removal, analyzing plane and spherical reference waves and plane and solid objects

08 p1500 A70-21787

Reconstructed holographic image complex amplitude expression derived, showing effects of film optical transfer function, size and shape

08 p1500 A70-21789

Holographic image reconstruction analysis based on two beam interferometry by spatially incoherent light source, obtaining optical transfer function

08 p1514 A70-21790

Holography in terms of photogrammetry, reviewing interferometry role, wave construction and reconstruction, etc

09 p1674 A70-22260

Photographic image reconstruction of spatially incoherent illuminated object using twofold holography

09 p1675 A70-22486

IR holograms real time visual reconstruction by frequency stabilized carbon dioxide lasers

09 p1684 A70-23534

Holographic flow visualization system retaining all information in light wave passing through flow field, noting reconstruction as shadowgram, schlierens or interferograms

09 p1689 A70-23781

Structural detail in transparent object through holographic measurement of scattered monochromatic light, noting similarity to crystal structure reconstruction in X ray diffraction experiments

11 p2048 A70-25360

Recording nonlinearities effect on image reconstruction from hologram of diffuse object

11 p2050 A70-25641

Holographic achromatic reconstruction of laser holograms in transmitted white light using zonal plate

12 p2238 A70-28297

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns

13 p2405 A70-28726

Wavefront reconstruction by holograms of focused images illuminated by white light, analyzing spatial coherence

13 p2408 A70-29364

Three dimensional images reconstruction with coherent light, facilitating transmission by holographic information volume reduction

14 p2581 A70-30146

Planar sandwich hologram recording 4 pi steradians with preservations of object spatial perspective by representing entire wave front

14 p2588 A70-31209

Wave front reconstruction from blazed holograms, noting wave front distortion for nonconstant amplitude case

15 p2736 A70-32011

Holographic technique to record hypervelocity projectile with front light resolution, discussing image blurring

15 p2736 A70-32031

Plotter induced reconstruction errors minimization in computer generated binary Fourier transform holograms

15 p2737 A70-32044

Holography technique for dual real images reconstruction of transparent objects with all planes in focus

15 p2738 A70-32053

Wave front multiplexing on spatially distinct area of single piece hologram

15 p2738 A70-32054

Holography without reference waves, describing image characteristics of spherical waves from point source 15 p2743 A70-32893

Hologram image construction by graphical method 16 p2915 A70-34216

Image distortion in reconstructions from phase only holograms, noting savings in collection and processing of acoustic holographic data 16 p2915 A70-34324

Computer generated holograms, using binary transmittance for wave fronts and three dimensional images construction 17 p3085 A70-35006

Vibration measurement by hologram interferometry, discussing wave front reconstruction and fringe theory based on Rayleigh integral formulation of light propagation 17 p3086 A70-35017

Vibration amplitude measurement by holographic wave front reconstruction 17 p3087 A70-35018

Microwave hologram recording for surface displacement, with laser beam illumination for optical reconstruction of image 20 p3628 A70-39152

Acoustic/microwave/ holography for large masses by crossed linear array of microphones, discussing computer simulation of virtual holograms and image reconstruction 21 p3822 A70-40715

Holographic measurement of general forms of motion based on reconstructed images dependence on coherence 21 p3822 A70-40810

Magnetic holography, considering Faraday and polar Kerr effect reconstructions and potential as computer storage 22 p3994 A70-43608

Integrated ferroelectric photoconductor device for hologram storage, discussing improved phase readout technique for reconstruction 22 p3994 A70-43609

Holographic exposure and reconstruction processes, considering illumination beam polarization effects on image brightness 22 p4040 A70-43616

Soviet book on holography covering laser characteristics, scatterers for image enhancement, photoemulsion requirements, etc 23 p4194 A70-44100

Focused image holographic interferometry by double exposure with reconstruction in white light applied to flat rotating subject 23 p4199 A70-45058

Optical image reconstruction from holograms, discussing photographic materials resolution, response linearity, spatial noise, etc 24 p4335 A70-45654

Fourier hologram synthesis using laser point source and Wollaston birefringent prism 24 p4336 A70-45667

Sideband Fresnel and lensless Fourier transform holographic images elongation and contraction 24 p4339 A70-45817

WAVE FRONTS

NT SHOCK FRONTS

Hydrodynamic structure of multifront detonation waves produced in gases by primary shock interaction with transverse disturbances 02 p0278 A70-12027

Axial emission impedance antenna converting strongly delayed surface wave into weakly delayed wave forming cophased front at antenna end 03 p0456 A70-13199

Two dimensional wave front shapes induced in finitely strained elastic body by impulsive point body force, discussing normal and double inflection points 08 p1584 A70-20581

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics 08 p1497 A70-21410

Wave front velocity determination by analytical continuation of wave function Fourier transform into complex plane, discussing constraints imposed by finiteness requirement 09 p1726 A70-22327

Compact unequal-path radial shearing laser interferometer designed for small angular aperture wave front testing 09 p1696 A70-22719

Conducting gas unsteady efflux from plane tube into vacuum, determining time dependent position of expanding rarefaction wave fronts 10 p1924 A70-24569

Small parameter structure and propagation velocity of ionization front in gas, applying nonequilibrium plasma model and electron equation 10 p1926 A70-25191

Wave fronts averaging by holographic technique to eliminate distortions arising in inhomogeneous media 12 p2233 A70-27504

Time dependent characteristics of dense argon plasma formed by pulsed lasers, measuring shock wave front velocity with streak camera 17 p3104 A70-35083

Elastic wave with discontinuities propagation, calculating decay velocities and stresses at leading wave front by theory of characteristics 17 p3189 A70-35436

Nonequilibrium gas states evolution in detached wave front of hypersonic blunt body, comparing vibrational relaxation in free flight and wind tunnel flow 18 p3335 A70-35962

Stress relaxation interpretation at wave fronts in one dimensional media by nonlinear viscoelastic models, giving constitutive equations 19 p3542 A70-38057

Wave front arbitrary curvature, examining integration of weak discontinuities growth equation in quasi-linear hyperbolic system 22 p4062 A70-42953

Elastic wave front control volume analysis in laminated and fiber reinforced composite materials 22 p4119 A70-43677

WAVE FUNCTIONS

NT MOLECULAR ORBITALS

Nonlinear electrodynamic equations solutions for electromagnetic media with one dimensional unsteady electromagnetic field based on wave functions determined from boundary conditions 01 p0149 A70-10165

Particle trajectory and associated wave determined for nonclassical trajectory problem from nonprobabilistic point of view, discussing discontinuity arising from unbounded velocities 01 p0142 A70-10657

Isotropic incompressible three dimensional turbulence representation by wave vector scalar functions, discussing maximum functions number determination 02 p0277 A70-11878

Wave structure function dependence on altitude, comparing function ratio for up/down propagation through atmosphere 02 p0258 A70-12461

Error correction for previous derivation of radio propagation of wave-hop series for anisotropic ionosphere resulting in improved nighttime field strength accuracy 04 p0649 A70-14967

Basis functions with harmonic oscillator radial dependence in Hartree-Fock calculations for light deformed nuclei 04 p0723 A70-15635

Fields and power transfer for electromagnetic waves in hot plasma calculated using Fourier integral and Fourier series methods 05 p0888 A70-16165

First order wave functions orbital correlation energies and electron affinities of first row atoms for low lying electronic states of B, C, N, O, F and Ne 06 p1108 A70-17333

Wave functions of asymmetric gyroscope in rotating coordinate system, presenting quantum equation of motion solution 06 p1105 A70-17500

Degenerate and nondegenerate energy states and wave functions formulated by Rayleigh-Schroedinger perturbation theory 06 p1110 A70-17764

Eigenvalues of spheroidal wave functions calculations dependent on complex propagation constants, discussing branch point values in tabular form 06 p1009 A70-17907

Stationary phase for beam of radio waves propagating in absorbent ionosphere as function of mean directions of real and imaginary parts of wave vector 09 p1665 A70-22049

Prolate spheroidal wave functions applied to detection Fredholm equation for band-limited noise and signals 09 p1640 A70-23803

Born approximation used in calculating wave functions of helium atom for determining generalized oscillator strengths in first ionized continuum of helium 10 p1919 A70-24072

Nonlinear electrodynamic equations solutions for electromagnetic media with one dimensional unsteady electromagnetic field based on wave functions determined from boundary conditions 10 p1925 A70-25013

Integral Hellman-Feynman formula applied to binding energy of molecular H and LiH, using SCF wavefunctions for atomic states 12 p2276 A70-27570

Radial wave functions and photoionization cross sections for neutral atoms from central potential model based on Slater and Klein-Brueckner approximations 13 p2455 A70-29133

Effective moment of inertia in quantum mechanical three body problem, applying specific decoupling to wave functions 13 p2452 A70-29478

Molecular orbital wave functions for water molecule, using minimum set of Slater orbitals 14 p2544 A70-30119

Wave properties of nuclear optical model for barrier penetration by charged particles, considering square well reflection, absorption and resonance 14 p2619 A70-30491

Multistate impact parameter treatment of heavy particle collisions modified to include higher state couplings for electronic wave functions 16 p2956 A70-34309

Coupled channel calculation of inelastic proton scattering from Ne 20 using Hartree-Fock wave functions 17 p3137 A70-34517

Prolate and oblate wave functions for EM radiation from spheroidal antenna in surrounding inhomogeneous medium 17 p3044 A70-35063

Electronic wave functions for atoms from atomic configuration-interaction/CI/ expansion for open shell states 18 p3292 A70-36185

Numerical computation of wave functions and energies in complex band structures for two-band case, using k-p method 19 p3483 A70-37547

Interference wave functions for diffraction on cylinder and sphere, including noninterfering waves of geometric optics 19 p3380 A70-38398

Method of moments for determining wave functions used in calculating molecular properties 20 p3675 A70-39997

Steepest descent method for determining lowest ground state eigenvectors for molecular wave configurations 22 p4062 A70-42747

Simple wave functions solutions in multidimensional nonviscous polytropic gas unsteady and steady flow 24 p4327 A70-46030

Spheroidal wave function theory, calculating eigenvalues with branch points for propagation constants complex values 24 p4315 A70-46134

WAVE GENERATION

Asymptotic and approximate wave construction for system of first order quasi-linear partial differential equations 01 p0131 A70-10800

Microwave generation and amplification using Gunn effect semiconductor devices 01 p0160 A70-11289

Nonlinear drift wave buildup in inhomogeneous plasma faster than in linear approximation 03 p0531 A70-13509

Fixed mass fixed volume sinusoidal pressure generators for evaluation of transducers used in high pressure measurements 03 p0494 A70-14049

Collapse of homogeneous fluid mass in stratified fluid with initially slender interface and ineffective internal wave motion, discussing internal wave generation 03 p0470 A70-14247

Transient stress waves generated by spatially uniform distribution of transverse forces in laminated medium, using modal analysis 05 p0938 A70-16409

Electrical impedance, conversion loss and bandwidth for piezoelectric film or plate transducers used for generating planar volume-acoustic waves at microwave frequencies 06 p1062 A70-17480

Frequency calculation and measurement for acoustic waves produced by carbon dioxide Q switched lasers 06 p1084 A70-18620

Cerenkov generation of VLF waves in inner magnetosphere at low latitudes 07 p1265 A70-19281

Respiratory waves formation of intracranial pressure in anesthetized cats and dogs, studying various contributing factors 07 p1213 A70-19792

Atmospheric gravity wave generation, propagation and dissipation, considering stratospheric tides 07 p1275 A70-20276

Atmospheric pressure waves generated by high energy disturbance in South Pacific, using ionospheric Doppler signals correlated with ground-level pressure signals 08 p1490 A70-21646

Acoustic wave amplification and generation in piezoelectric semiconductors and semimetals by supersonic carrier drift currents 10 p1925 A70-25030

Local losses distribution effect on intensity and opposing waves generation in ring gas laser analyzed in approximation of noninteracting modes 12 p2248 A70-27510

Transverse laser modes interaction in traveling and standing wave generators allowing for spatial distribution 13 p2424 A70-28597

- Nonlinear drift wave buildup in inhomogeneous plasma faster than in linear approximation 13 p2460 A70-28652
- Infrasonic waves generation by supersonic translation of auroral electrojet currents 13 p2399 A70-29237
- Intracranial pressure pulse waves formation mechanism mathematical model, estimating role of biomechanical factors 13 p2353 A70-29520
- Bow shock associated hydromagnetic waves generation in upstream interplanetary medium, constructing model in terms of ion cyclotron resonance 14 p2631 A70-30359
- Book on millimeter and submillimeter waves covering generation, transmission, components and detection 14 p2548 A70-30426
- Coaxial, inside-out and rising-sun magnetrons for millimeter waves generation under pulsed conditions, discussing tunability, frequency stability and weight 14 p2555 A70-30429
- HF backward wave oscillators with emphasis on limiting factors in millimeter waves generation, discussing ohmic and circuit imperfection losses 14 p2555 A70-30430
- Millimeter and submillimeter waves generation as difference frequencies of mixed laser beams 14 p2593 A70-30434
- Millimeter waves generation by tunnel, Gunn and avalanche diodes, tabulating frequency, efficiency and power data 14 p2548 A70-30435
- Wideband varactor multipliers with flat output as microwave sources in radar systems 16 p2877 A70-33412
- Long and short period internal gravity waves in atmosphere observed by high resolution radar, investigating generation mechanisms 17 p3075 A70-34609
- Stress wave generation in elastic temperature-dependent absorbing solids by impulsive EM radiation 17 p3185 A70-34967
- Wave-periodic acceleration feedback during vibrational flame propagation in tubes, testing carbon monoxide-air mixture 17 p3196 A70-35350
- Cerenkov plasma waves generation by fast electron streams in solar corona and conversion into EM waves 17 p3173 A70-35768
- Discrete signals synthesis optimal with respect to given criterion, determining ambiguity function extremum 19 p3374 A70-37270
- Weak steady shock waves formation in relaxing binary gas mixture, discussing vibrational specific heat temperature dependence 20 p3614 A70-40350
- Shock waves formation in rarefied plasma investigated by Thomson scattering of ruby laser light 20 p3643 A70-40388
- Shock and expansion waves formation by moving piston based on kinetic theory of gases, solving Bhatnagar-Gross-Krook equation by numerical method 21 p3808 A70-41377
- Acoustic waves generation from decay region of pulsating supersonic jet expelled from nozzle 21 p3748 A70-42211
- Alfven waves synchrotron emission in incompressible medium, investigating generation by rotating DC current carrying circuit 21 p3861 A70-42227
- VLF wave generation due to nonlinear interaction of two microwaves with plasma slab under high DC field 22 p4077 A70-42294
- Triangle and sine waveforms generation, discussing reduced peak and crossover distortion and extended frequency operation 22 p3989 A70-42923
- Compressional sound waves electromagnetic generation in metals in static magnetic fields, examining acoustic amplitude variations 22 p4074 A70-42968
- Cylindrical converging shock waves generation, propagation and structure at high pressures 22 p4012 A70-43431
- Magnetosphere Alfven velocity profile relation to ELF chorus and hiss, indicating unstable wave generation by cyclotron resonance 23 p4186 A70-43851
- Wind generated water waves spectral characteristics at low momentum levels 23 p4215 A70-44273
- GaAs injection lasers, calculating effect of active region displacement from p-n junction waveguide on wave generation 23 p4203 A70-45074
- HF sinusoidal fluid pressure generators driven by electromagnetic vibrators for arterial applications 24 p4309 A70-46118
- Taylor model of elastoplastic wave interaction during cylindrical projectile impact 01 p2006 A70-11150
- Arc phenomena for producing interaction effects, discussing reflected shocks rarefaction waves and gas dynamics 02 p0345 A70-11863
- Inhomogeneous plasma containing weak electron beam using Vlasov equation, noting wave-wave coupling effect 02 p0345 A70-11882
- Wave-wave coupling of two HF electromagnetic waves launched into warm plasma across constant confining magnetic field, using Maxwell-Vlasov equations for electrons 02 p0349 A70-12757
- Electromagnetic field structure and interaction inside and outside of spherical shell of arbitrary linear media excited by monochromatic plane wave 03 p0443 A70-13151
- Energy modes nonlinear interactions in rarefied plasmas, presenting wave energy and momentum definitions and kinetic equations for mode density in wave number space 04 p0726 A70-14701
- Interaction of infinite shallow draft cylinder oscillating at free surface with train of oblique waves 04 p0618 A70-15321
- Output characteristics of cyclotron maser with resonator field due to plane waves interference along static magnetic field, deriving tensor equations 05 p0858 A70-16260
- Parametric coupling between space-time harmonics of electromagnetic wave propagating in dielectrics modulated by pump wave 05 p0815 A70-16660
- Phase velocities of intrinsic normal waves of electron beam in three frequency parametric amplifier of space charge waves, determining optimal wave interaction conditions 05 p0823 A70-16890
- Parametric interactions in three frequency TWT parametric amplifier, using power series 05 p0824 A70-16895
- NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity 05 p0917 A70-16906
- Electron transmission diffraction patterns of thin monocrystal films using Ar laser 06 p1080 A70-17444
- Microwave variable delay devices, discussing solid state microwave acoustic interactions 06 p1019 A70-17483
- Shear wave interaction in infinite homogeneous reacting fluid, using Fourier and Taylor series for velocity, temperature, density, pressure and composition [AIAA PAPER 70-146] 06 p1040 A70-18154
- Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses 07 p1227 A70-18763
- Kinetic equation for nonlinear interaction of waves, including unstable or damped, using Bogoliubov method 09 p1659 A70-22214
- Internal waves breaking on sloping surface in two fluid system, studying interfacial shear instability by capacitance probe on-line computer system 09 p1717 A70-22371
- Relaxational oscillations produced by interaction between rarefaction wave in external two dimensional supersonic flow and turbulent near wake 09 p1603 A70-22426
- Strain gage for measuring strain waves amplitude on surface of fused quartz to study electromagnetic waves interaction in Permalloy films 09 p1681 A70-23349
- Space charge parameters influence on electron wave and traveling wave interactions in TWT 09 p1652 A70-23654
- Nonlinear oscillations averaging method applied to resonant interactions of acoustic gravity waves 09 p1729 A70-23666
- Upper atmospheric waves nonlinear interactions based on tides and gravity waves propagation, taking into account terrestrial rotation 10 p1872 A70-23820
- Nonlinear wave interactions in quiescent plasma column with external disturbance creating broadened frequency spectrum and weakly turbulent plasma 10 p1922 A70-24146
- Wave amplification in semiconductors relationship to coupling between space charge wave and circuit wave based on coupled-mode theory 10 p1927 A70-24619
- LF ion-acoustic wave nonlinear interaction with HF Langmuir waves in nonisothermal plasma, establishing criteria for ion plasma turbulence 10 p1925 A70-25103
- Amplitude and phase constants of interacting waves in three frequency nondegenerate parametric amplifier of fast space charges using coupled wave technique 10 p1853 A70-25133
- One dimensional wave processes in distributed nonlinear systems, surveying mathematical methods 10 p1843 A70-25151
- Fields in wave interaction region during spatial trapping of parametrically amplified waves by radiation of pumping, using Laplace transformation 10 p1844 A70-25157
- Narrow band radiation from longitudinal plasma waves nonlinear interactions during solar bursts, comparing flux intensities for Corona single or double shock wave frequencies 10 p1934 A70-25272
- Cascade mechanism of closure associated with nonlinear wave interactions between modes in turbulent plasmas, using hydrodynamical model 11 p2087 A70-25358
- Pulsed radio waves interactions during vertical propagation through perturbed ionosphere using cross modulation theory concepts, considering perturbation waves effects 11 p2003 A70-25531
- Long-time cross modulation field resulting from triggering electrostatic waves in one dimensional plasma, discussing supraluminous waves interactions 11 p2088 A70-25704
- Dynamic equations for amplitudes of interacting MHD waves bounded plasma, discussing three-plasmon interactions 11 p2088 A70-25708
- HF and LF plasma waves interaction in three wave approximation taking into account linear damping 11 p2089 A70-25714
- Polarization effects during HF EM wave interaction in plasma, discussing plasma scattering effects in polarization transport equations 11 p2004 A70-25937
- Evolutionary hydromagnetic shock perturbation by incident small amplitude hydromagnetic wave calculated for diverging wave amplitudes and directions 11 p2036 A70-26017
- Microwave amplifiers based on interaction between piezoelectric acoustic waves and collinearly drifting carriers, analyzing gain, frequency response, etc 11 p2018 A70-26164
- Plane wave disturbances introduced in turbulent channel flow by vibrating ribbons near each wall, obtaining amplitude and relative phase 11 p2039 A70-26537
- Turbulent boundary layer interaction with wavy wall in wind tunnel, discussing wall pressure drag and surface waves interaction 11 p2039 A70-26538
- Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions 12 p2278 A70-27358
- Resonant and nonresonant coupling between two coherent electron plasma waves propagating in opposite directions, considering parametric decay 12 p2279 A70-27780
- Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow [AIAA PAPER 69-137] 12 p2211 A70-27826
- Suspended Stokes particle-single wave interaction effect on energy dissipation and vorticity of random turbulent incompressible fluid approximated by Fourier-Stieltjes integral 12 p2213 A70-28236
- Homogeneous and stationary turbulence in incompressible fluid, proposing dynamic model for strong wave interactions during cascade process 13 p2457 A70-28557
- Inhomogeneous one dimensional plasma in electrostatic normal modes, considering interactions of waves and particles 13 p2460 A70-28638
- Electrical conductivity without particle-particle or wave-particle collisional noise or radiation 13 p2463 A70-29238
- Radial displacements in cylindrical circular shell by impinging spherical waves propagating in acoustic medium, deriving equations by Fourier and Laplace transforms 13 p2515 A70-29318
- Transport equations for interaction between radiation and matter under arbitrarily large nonequilibrium in comoving system 13 p2521 A70-29414
- Landau damping in plasma cyclotron wave interaction by symmetrical counterstreaming double electron beam with uniform magnetic field 13 p2468 A70-29917
- Frequency dependence of gravitational-electromagnetic fields interaction assumption inconsistent with general relativity and consistent with data on deflection of radiation by massive bodies 14 p2573 A70-30616
- Nonlinear diurnal tide and gravity wave interactions at meteor heights below mesopause 14 p2579 A70-31251
- Shock and simple wave interactions, using quasilinear equations for forward facing wave overtaking forward facing shock 14 p2567 A70-31283

WAVE INTERACTION

NT SHOCK WAVE INTERACTION

- Optical paths inequality of nonuniform power opposing waves in ring lasers 01 p0107 A70-10209

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization 15 p2749 A70-31451

Third harmonic generation using hot electron nonlinearity characteristics of semiconductors, considering plane-polarized electromagnetic wave nonlinear interaction with sample 15 p2783 A70-31970

CDs high field domain modes generation for C parallel to E ascribed to interaction between drift carriers and off-axis shear wave 15 p2784 A70-31984

Low amplitude waves and substantial frequencies interaction by averaging method for hydrodynamics of waves in collisionless plasmas 15 p2720 A70-32114

VHF radiation from plasma during electron beam interaction with fast magnetoacoustic wave stimulated by external spatially periodic currents 15 p2780 A70-32118

Polarization characteristics of solar radio waves reflected from coronal waves in meter wavelength range 15 p2802 A70-32485

Resonant interaction and instability produced by nonlinear coupling of modulated wave and LF mode, stimulating self focusing of plasma waves 16 p2958 A70-33285

Quasi-linear hyperbolic systems interactions for rarefaction waves, applying Glimm difference method 16 p2943 A70-33782

D region electron density variations during solar eclipse of 7 March 1970, using wave interaction technique 16 p2898 A70-33832

D region electron energy loss factor during solar eclipse of 7 March 1970, using wave interaction technique 16 p2898 A70-33834

Plane acoustic wave interaction with elastic spherical shell, discussing effects of membrane, bending, rotatory inertia and shear deformation 16 p2993 A70-34087

Laminar hypersonic boundary layer interaction with corner expansion wave, presenting numerical solutions to viscous-inviscid equations for small turning angles [AIAA PAPER 70-807] 17 p3065 A70-34457

Nonlinear interactions of plasma waves with positive and negative energies producing explosive instability 18 p3295 A70-36420

Numerical scheme for weather forecasting, considering interaction mechanism between cyclonic and ultralong waves and climate 18 p3285 A70-36646

Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses 18 p3229 A70-37107

Electro-optical SHF modulator characteristics calculation from light wave interaction with traveling wave 19 p3443 A70-37291

Intersecting shock waves propagation, deriving equations for aircraft sonic boom intensity 19 p3355 A70-38484

Magnetron type backward wave tube with negatively charged slow wave structure, analyzing electron beam wave interaction for starting conditions 20 p3596 A70-39251

Alfven magnetoacoustic waves interaction, deriving kinetic equation for distribution function and relaxation time 20 p3678 A70-39597

Wave particle resonances broadening by particles random motion in turbulent electric field, determining cyclotron instabilities saturation level from vanishing nonlinear growth rate 20 p3679 A70-39661

D region electron density profiles from high power wave interaction measurements during solar flare, indicating non-X-ray production rate 21 p3879 A70-40942

Pulsed radio waves interactions during vertical propagation through perturbed ionosphere using cross modulation theory concepts, considering perturbation waves effects 21 p3786 A70-41281

Ion sound system one dimensional hydrodynamic equations, examining formation and interaction of nonlinear ion acoustic shock waves 21 p3857 A70-41384

Electron-ion wave interaction due to scattering by electrons, using kinetic wave equation to describe wave-particle interaction 21 p3858 A70-41712

Earth magnetosphere LF wave annular trap, examining high energy particle interaction with magnetosonic waves 22 p4013 A70-42300

Monochromatic acoustic wave interaction with turbulent jet fluctuating vorticity field, using Fourier analysis to extend spectral relations [ASME PAPER 70-FLCS-6] 22 p4008 A70-42426

Micropulsation Pc-1 phase and polarization comparisons concerning L to R wave coupling in ionosphere 22 p4024 A70-43313

Weak EM transmission through resonant medium of two-level atoms in presence of intense monochromatic wave, obtaining absorption coefficient and refractive index 22 p4075 A70-43473

Plasma turbulence due to nonlinear wave interaction, considering second sound LF oscillations propagation and plasmons scattering at ions 22 p4084 A70-43599

Polarization characteristics of solar radio waves reflected from coronal waves in meter wave length range 23 p4240 A70-43909

Plane shock wave decay by interaction with simple wave, solving nonisentropic equations of gas dynamics 23 p4179 A70-43969

Thin liquid film /melt layer/ on body in supersonic flow, examining crosshatched wave patterns stability 23 p4183 A70-44979

Electromagnetic waves nonlinear interaction at various threshold powers, inducing propagation in solid body plasma 24 p4388 A70-45201

Time dependent telegrapher equation solution for studying transient neutron waves propagation 01 p0130 A70-10086

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure 01 p0154 A70-10131

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting gases 01 p0149 A70-10162

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency 01 p0149 A70-10163

MHD wave propagation through plasma in magnetic field of current filament, developing Hamilton-Jacobi equation by geometrical optics 01 p0151 A70-10466

MHD wave propagation in electrically conducting fluid contained in finite length circular cylinder subject to axial magnetic field and nonelectromagnetic forces 01 p0152 A70-10944

Book on nonlinear stress waves propagation in elastic solids covering adiabatic shocks, isentropic plane waves, Lagrange equation, spherical waves, heat conduction effect, etc 01 p0202 A70-10966

Two variable expansion method applied to ordinary differential equation and two wave propagation problems, comparing results with matched asymptotic expansions and coordinate stretching methods 01 p0132 A70-11072

Wave propagation in nonlinear viscoplastic medium, deriving first order system of coupled equations in stress and particle velocity components 01 p0207 A70-11154

Characteristic equations developed for two-spatial dimensional elastic wave propagating in linear elastic, isotropic and homogeneous medium 01 p0208 A70-11185

Plane sinusoidal wave propagation through material reinforced with parallel fibers, using integral formula for multiple scattering in infinite slab 01 p0130 A70-11187

Flexural wave propagation in infinitely long circular bimaterial cylinders based on equations of linear elasticity, noting dispersion characteristics different from homogeneous cylinders 01 p0208 A70-11188

Microwave propagation in materials and measurement methods for inspection based on reflecting surface movement and scattering method for porosity detection 01 p0094 A70-11395

Short sound waves propagation in moving inhomogeneous medium, studying viscosity and heat conductivity influence 01 p0146 A70-11581

Flexural and longitudinal waves propagation in infinite elastic plate, using solutions to approximate nonlinear equations of plate motion 01 p0213 A70-11634

Nonlinear waves in parallel shear flows, discussing laminar flow breakdown due to free stream disturbances 02 p0277 A70-11876

Optical scintillation measurements applied to turbulence diagnostics, inferring spatial spectrum of turbulent scatterers, using Monte Carlo numerical procedure 02 p0296 A70-11892

Quadruple microwave probe applied to phase and attenuation variations measurements of HF wave propagating through dielectric media 02 p0345 A70-11898

Spherical detonation waves propagation initiated by laser-induced spark in gaseous explosives, discussing propagation regime regimes 02 p0278 A70-12029

Circumferential wave propagation around cylinder, demonstrating dependence on incident frequency and surface roughness, noting target surface microscale roughness measurement technique 02 p0339 A70-12184

Traveling wave velocity in human cochlea determined by equally low tonal pairs, comparing results to psychophysical and electrophysiological findings 02 p0237 A70-12323

Waves vs eddies in dynamics of turbulent boundary layer fluctuating motions with scale of mean flow 02 p0287 A70-12361

Wave packet dynamics recapitulation and tentative application to turbulent shear flow 02 p0287 A70-12362

Wave structure function dependence on altitude, comparing function ratio for up/down propagation through atmosphere 02 p0258 A70-12461

Self consistent field method to calculate effective dynamic characteristics of elastic media with filler for plane longitudinal wave propagation 02 p0388 A70-12485

Whistlers paradoxical behavior in bounded magnetoplasmas, discussing double reflection and wave propagation 02 p0263 A70-12733

Propagation equations for spherical waves in elastoplastic work hardening materials 03 p0585 A70-12972

Axial stress pulse induced elastic waves propagation in thin anisotropic circular cylindrical shell of helical wrap construction allowing for shear coupling 03 p0587 A70-13118

Wave numbers determined in waveguide formed by laminar inhomogeneous medium enclosed between homogeneous dielectric media, taking into account radiation losses through wall 03 p0447 A70-13290

Wave propagation problem, considering traffic control, surveying, tracking, navigation, etc 03 p0449 A70-13607

Quasi-optical propagation in frequency wave range above 100 MHz as user problem in VOR, ILS, navigation satellite and CAT detection and warning systems 03 p0523 A70-13613

LF wave propagation using loran C radio navigation system flight performance tests 03 p0523 A70-13615

VLF wave propagation in earth-ionosphere waveguide, comparing ray and waveguide-mode theories 03 p0449 A70-13616

Magnetoelastic surface wave propagation properties in ferrites at UHF wavelengths, using numerical calculations for gallium-YIG 03 p0540 A70-13700

Adiabatic disturbances propagating as transverse waves in inviscid fluid rotating as Rankine vortex about cylindrical container axis, discussing harmonics 03 p0467 A70-13779

Induction distances, transient pressures and wave propagation rates for detonation waves in cylindrical tube low temperature hydrogen-oxygen mixtures 03 p0607 A70-13919

Cs plasma research, discussing Q-machines, plasma confinement, magnetic field experiments, LF and HF wave propagation, etc 03 p0533 A70-14015

Small amplitude perturbations in interstellar medium, discussing order of magnitude estimates of properties of cosmic rays, thermal gas, dust and magnetic field

03 p0575 A70-14016

Book on rational thermodynamics covering homogeneous processes, internal dissipation, Coleman theorem, wave propagation in dissipative materials, diffusion, chemical reactions, Onsager relationship, etc

03 p0525 A70-14042

Wave propagation in inhomogeneous media, reducing quasi-linear hyperbolic partial differential equations to single nonlinear equation integrable by method of characteristics

03 p0525 A70-14184

Stress wave propagation tests in thin walled tubes under combined tension and torsion, discussing predicted and observed strain-time profiles discrepancies

03 p0599 A70-14245

Gravitational wave propagation velocity determined by laboratory measurement of spin-spin coupling of two rotating masses

04 p0718 A70-14397

Dispersion relation governing hydromagnetic gravity waves propagation in rotating nonisotropic medium, discussing effects of constant entropy gradient

04 p0745 A70-14473

HF expansions of harmonic solutions concentrated at waves propagating in inhomogeneous medium to dynamic equations in elasticity theory

04 p0767 A70-14499

Mechanical behavior of anesthetized dog abdominal vena cava from pressure wave transmission characteristics, discussing chemical and electrical stimuli

04 p0630 A70-14630

Laplace transform of axial stress resultant in impacting semiinfinite elastic cylindrical membrane as exponential function involving wave propagation speed, applying continued fractions

[ASME PAPER 69-APM-K] 04 p0769 A70-14859

Radio wave propagation in linear, isotropic homogeneous medium with irregular boundaries solved by expanding Helmholtz integral

04 p0648 A70-14965

Sound wave propagation in liquid containing gas bubbles allowing for relative motion of bubbles and liquid, deriving steady shock wave structure

04 p0671 A70-14991

Nonlinear propagation of electron plasma wave in cylindrical waveguide, discussing linear theory of electrostatic waves in cold plasma

04 p0728 A70-15000

Transient processes of strain wave propagation in elastic shells and plates under time varying loads

04 p0773 A70-15010

Dispersion curves for wave propagation in infinite elastic bars of elliptic cross section obtained by method of collocation

04 p0773 A70-15080

Eigenvalue and eigenfunction of H01 wave in bend of cross shaped waveguide, determining field components and propagation constant change

04 p0651 A70-15291

Surface waves excited by horn above dielectric disk backed by metallic disk, formulating characteristic wave equations and solving for attenuation and propagation constants

04 p0659 A70-15305

Nonlinear wave propagation in relaxing gas with internal energy characterized by translational and internal temperature, using model equation for piston induced motion

04 p0786 A70-15324

Optical waves in round metallic and dielectric waveguides calculated using geometrical optics and model analysis for anisotropic wall impedance model

04 p0652 A70-15396

One dimensional stress waves propagation in elastoplastic medium, determining stress and velocity fields due to heat sources motion by characteristics method

04 p0776 A70-15447

Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain-time histories and residual strain

04 p0779 A70-15599

Geomagnetic field lines inclination effect on hydromagnetic waves propagation in lower ionosphere, using atmospheric model in plane form with integral conductivity tensor

04 p0683 A70-15737

Plane Lamb problem in semiinfinite micropolar elastic body solved by transformation to one dimensional wave propagation problem in elastic half space

05 p0925 A70-15785

Surface wave spectrum and propagation in nonhomogeneous bounded elastic solid, considering existence and eigenvalues approximation

05 p0925 A70-15789

Plastic-viscoplastic bar wave propagation due to longitudinal impact, analyzing stress profiles to determine effect of strain rate

05 p0926 A70-15913

Propagation and growth equations governing wave propagation in micropolar viscoelastic solids couplings between discontinuities in macroscopic and microscopic fields

05 p0929 A70-16063

Backward and complex waves propagation in circular waveguide with coaxial dielectric rod, discussing arbitrary angular dependences

05 p0812 A70-16145

Inhomogeneity and water vapor absorption influence on frequency spectrum of amplitude fluctuations of plane wave propagating in turbulent atmosphere

05 p0813 A70-16252

Rayleigh and Lamb waves propagating on solid and hollow elastic cylinders immersed in water, noting correspondence to symmetric and antisymmetric vibrations in shell

05 p0938 A70-16410

Two dimensional propagation of transverse waves in plasma with embedded curl-free magnetic field, discussing cosmic ray acceleration and magnetic neutral sheet formation

05 p0888 A70-16437

Radially nonsymmetric stress wave propagation from tip of moving crack in infinite plates, deriving minimal group velocity

05 p0941 A70-16516

Vertically propagating waves in viscous isothermal atmosphere taking into account reflection due to nonlinearities and time dependence

05 p0833 A70-16679

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions

05 p0841 A70-16737

Characteristic equation for phase velocity of surface wave propagating on helix for forbidden zone, suggesting current distribution function

05 p0815 A70-16775

Double giant pulse ruby laser with 1.5 m coherence length for producing double exposure holograms of stress wave propagation in solids

05 p0861 A70-16850

Plane and cylindrical elastic waves dynamic characteristics propagating in half space with holes, reducing boundary value problem and deriving formulas for interacting waves

05 p0946 A70-16858

Group velocity of spiral density waves propagating in disk galaxies implying self destruction, discussing possible replenishment sources

05 p0919 A70-16929

Monograph on MHD waves covering theories for weak discontinuities, wave propagation in inhomogeneous media and behavior in magnetic fields

06 p1114 A70-17275

Plasma oscillations, resonances and wave propagation characteristics analyzed by radio pulse sounders for application to space measurements

06 p1115 A70-17360

Guided elastic waves propagation on layered media, considering elastic wave circuitry design for true microminiaturization

06 p1018 A70-17476

Sound wave velocity and damping in liquid N measured along saturated vapor line using thermal Brillouin scattering techniques

06 p1105 A70-17491

Witham radiative acoustics, analyzing nonequilibrium waves propagating in nongray radiating and absorbing gas

06 p1173 A70-17514

Radiatively driven plane acoustic wave in nongray radiating and absorbing gas assuming local molecular equilibrium

06 p1173 A70-17515

Symmetrical H mode wave propagation in inhomogeneous plasma filled circular waveguide solved by hypergeometric functions, noting use for microwave diagnostics and computer programs verification

06 p1009 A70-17825

Space-sampled feedback control of amplifying wave on infinite continuum, discussing system stability

06 p1025 A70-17963

Surface wave propagation and amplification by electron beam-plasma interaction, inapplicability of coupled mode theory and use for microwave amplifier

06 p1125 A70-18616

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations

07 p1347 A70-18678

Frequency equation for harmonic waves propagating in fluid filled circular cylindrical cavity in infinite isotropic solid medium

07 p1253 A70-18846

Propagation in perturbed magnetically focused electron beams, noting influence of spatially varying drift velocity and damping effect

07 p1239 A70-18867

Hydrogen concentration effect on self sustained detonation wave propagation in hydrogen-carbon

monoxide-oxygen mixtures, using Q switched pulsed laser schlieren photography

07 p1420 A70-18918

Sonic boom focalization, considering linear propagation for real atmosphere with wind and Jericho experiments

07 p1193 A70-19130

Ray theory for determining short term and averaged characteristics of nonreciprocal HF ionospheric propagation paths for single magnetoionic waves transmitted between antennas

07 p1231 A70-19171

Prestrain effect on waves propagation along slender low density unoriented polyethylene rod, indicating uniform phase velocity change over audio frequency range

07 p1248 A70-19237

Shear wave and plate velocity expressions derived for orthotropic elastic plate with shear coupling, considering propagation direction

07 p1412 A70-19961

Atmospheric gravity wave generation, propagation and dissipation, considering stratospheric tides

07 p1275 A70-20276

Propagation pattern of surface acoustic wave visualized in piezoelectric and nonpiezoelectric materials by dusting delay line with fine particles

07 p1336 A70-20283

Curved thin rods torsional and flexural waves propagation equations, considering geometry and shear and Young moduli

08 p1588 A70-21201

Magnetic equator ELF noise examined with OGO 3 magnetometer, indicating unique signals in plasmasphere

08 p1488 A70-21380

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem

08 p1484 A70-21403

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure

08 p1556 A70-21407

Transient waves propagation in homogeneous isotropic linearly elastic half space excited by traveling normal point load on surface, deriving displacements

[ASME PAPER 69-APMW-12] 08 p1592 A70-21468

Weakly nonlinear dispersive cold plasma waves propagation by two time scale expansion, taking into account amplitude dispersion and coupling

08 p1553 A70-21613

Gravity waves generated by heating in auroral regions and propagating toward lower latitudes possibly causing thermospheric heating

08 p1491 A70-21675

Small dispersion whistlers characteristics and propagation at midlatitudes based on observation at Tohokata, Japan

08 p1491 A70-21713

Total optical field in inhomogeneous medium, questioning uniqueness of division into direct and reversed wave propagation

08 p1546 A70-21785

Linear nonstationary quasi-geostrophic model with external and internal heating and forcing for dynamics of ultralong waves in troposphere and lower stratosphere

09 p1713 A70-22304

Turbulence and internal waves in stably stratified atmosphere and ocean, proposing velocity and temperature spectral behavior model

09 p1716 A70-22370

Plane and cylindrical stress wave propagation in elastoplastic medium, studying stress interrelations

09 p1775 A70-22610

Pulse propagating in unstable plasma, determining characteristics by asymptotic expansion applied to Vlasov-Maxwell equations

09 p1734 A70-22684

Refractive index variation regions and mapping along propagation path in random medium, noting application to solar wind electron density structures measurements

09 p1634 A70-22699

Nonlinear stellar density waves in galaxy using gas dynamic equations, assuming one dimensional and steady waves

09 p1762 A70-23073

Thermoacoustic waves formation and propagation in metallic rods by light pulses, studying pulse rise time influence on waves shape and amplitude

09 p1778 A70-23090

Point source intensity fluctuations dependence on penetration depth of wave propagating in statistically homogeneous and isotropic media

09 p1636 A70-23133

Amplitude and phase correlations of spherical waves propagating in turbulent atmosphere using smooth perturbation method

09 p1636 A70-23139

Strain and temperature fields interrelation effect on longitudinal wave propagation in viscoelastic cylinder,

determining phase velocities and attenuation coefficients

09 p1781 A70-23285

Friction and orography influence on wave motions in real atmosphere, discussing planetary boundary layer and propagation in free atmosphere

09 p1718 A70-23331

Elastic harmonic waves propagation in cylinder with longitudinal cavities and in space with cylindrical cavities solved using series method

09 p1783 A70-23387

Acoustic gravity waves horizontal ducting in atmosphere with spatially periodic wind shears

09 p1671 A70-23498

Sectorial and circular strip resonators natural oscillation modes and freely propagating waves of uniformly bent stripline

09 p1651 A70-23644

Wave propagation constants in electron wave TWT, studying nonuniformity parameter influence to determine relationships between beam and system parameters

09 p1652 A70-23655

Amplitude modulation of microwave signals propagated through periodically varying plasma

09 p1639 A70-23673

Oblique E-mode electromagnetic wave in plane stratified collisionless plasma taking into account plasma temperature

09 p1639 A70-23674

Upper atmospheric waves nonlinear interactions based on tides and gravity waves propagation, taking into account terrestrial rotation

10 p1872 A70-23820

Ion acoustic wave propagation near sheath at plasma-wall boundary in low pressure argon plasma measured by electron beam probe

10 p1921 A70-23965

Wave propagation in bounded homogeneous elastic anisotropic media solved as sum of eigenvalue and static problems without transform calculus

10 p1915 A70-24058

Wave propagation in homogeneous cone region of broadband radiator, calculating field distribution by retarded potentials method

10 p1848 A70-24222

Fast magnetoacoustic wave propagation in cylindrical plasma column with constant current density, using geometric optics

10 p1923 A70-24229

Coulomb collisions effect on electrostatic lower hybrid resonance waves propagation in ionosphere, noting noise bands cut-off shift

10 p1874 A70-24429

Helical propagation in multivalley semiconductors of n-Ge type, obtaining polarization anisotropy

10 p1928 A70-24842

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting cases

10 p1925 A70-25010

Nonpotential waves propagating at slow phase velocity in inhomogeneous plasma, determining flute instability oscillation frequency

10 p1925 A70-25011

Slow HF waves propagation under magnetic field effect in plasma waveguide surrounded by dielectrics or metal

10 p1843 A70-25106

One dimensional wave processes in distributed nonlinear systems, surveying mathematical methods

10 p1843 A70-25151

Stationary and nonstationary nonlinear waves propagation in multicomponent collisionless plasma, considering dispersion relations for acoustic oscillations

10 p1844 A70-25166

Type 3 burst sources velocity calculated by frequency drift and Newkirk model of electron density, discussing frequency range extension of Weissenau radiospectrography

10 p1934 A70-25274

Unsteady problems of finite amplitude plane and cylindrical wave propagation in dissipative spatially symmetrical media

11 p2034 A70-25399

Elastic wave propagation, deriving characteristic equations in generalized curvilinear coordinates using linear elastic, isotropic and homogeneous constitutive equations

11 p2132 A70-25680

Free wave propagation constants in periodically supported infinite beams determined for rigid and flexible supports

11 p2132 A70-25727

Alfvén and cylindrical magnetoacoustic waves in homogeneous unbounded conducting plasma in non-homogeneous magnetic field, applying Weinberg method to propagation analysis

11 p2089 A70-25850

Waves and mean currents excitation in stratified fluid due to moving heat source, studying effect on mean motion

11 p2036 A70-26167

Electrostatic wave propagation and growth rate in electron beam-inhomogeneous plasma confined by magnetic field

11 p2091 A70-26460

Elastic wedge under spatially uniform but time dependent shear tractions, studying shear stress and transient wave propagation

11 p2142 A70-26629

Frequency equation for harmonic waves propagating in composite circular-cylindrical rods consisting of circular core and circular casing of different material

11 p2145 A70-26693

Extensional waves asymptotic nature and stress distributions in infinite elastic plate of finite thickness under axisymmetric and in-plate disturbances using perturbation

11 p2145 A70-26696

Wave propagation in continuous random media solved by partial differential equations with random coefficients, describing perturbation methods for obtaining solutions statistical properties

11 p2085 A70-26761

Wave propagation in solid state plasma with ferroelectric and ferromagnetic properties, deriving matrix equation allowing for nonlinearity of dielectric constant and magnetic permeability

12 p2283 A70-26970

Dispersion relations between wave frequency and vector obtained from matrix equation for wave propagation in solid state plasma with ferroelectric and ferromagnetic properties

12 p2283 A70-26971

Diluted plasma microinstabilities allowing for Langmuir waves propagation without magnetic field and Landau effects

12 p2277 A70-27057

Wave propagation in finite length revolving shells, describing advantages of modal superposition method generated by finite element computer program

12 p2317 A70-27124

Weak plane waves propagation in binary mixtures of diatomic gases subject to vibrational relaxation, solving piston problem in acoustic approximation

12 p2209 A70-27151

Dispersion relation derived for space-charge waves propagating in thick Gunn diode, showing validity limit of one dimensional approach

12 p2194 A70-27164

Three dimensional variational dynamic and static large deformation equations solutions for stability and natural frequencies and wave propagation in bodies under initial strains

12 p2322 A70-27331

Resonant and nonresonant coupling between two coherent electron plasma waves propagating in opposite directions, considering parametric decay

12 p2279 A70-27780

Linearized dispersion relation for plane wave propagation in uniform unbounded cold plasma permeated by DC magnetic field, considering two stream instability

12 p2281 A70-27881

Wave propagation in spatially homogeneous time varying dispersive media, emphasizing excitation and source dependent phenomenon

12 p2188 A70-27961

Ultrasonic wave propagation guided by fluid layer between two elastic solids, plotting normalized velocities and layer thicknesses

12 p2273 A70-28097

Light pulse propagation in dispersive nonlinear dielectric analyzed on nonlinear Lorentz model

12 p2274 A70-28216

Magnetic field effect on frequency spectrum of vertically propagating magnetoacoustic waves and reflection conditions in inhomogeneous isothermal atmosphere

12 p2227 A70-28226

Longitudinal waves propagation in polyethylene bar using Boltzmann-Volterra equation, constructing dynamical stress-strain diagrams by viscous-elastic standard body model

12 p2328 A70-28276

Monge equation in small perturbation method of characteristics applied to propagation phenomena in three dimensional supersonic gas flow

13 p2386 A70-28490

Lunar elastic waves anomalous propagation, considering Apollo seismographic records and earth rocks specific dissipation function measurements

13 p2486 A70-28617

Collisional theory of longitudinal wave propagation in partly ionized multitemperature gases

13 p2460 A70-28637

Propagation characteristics of instabilities represented by multidimensional Fourier integrals

13 p2454 A70-28640

Love wave propagation in layers with irregular boundaries, investigating scattered field to determine reflection from triangular notch

13 p2394 A70-28831

LF MHD waves propagation model through earth magnetic tail, considering analogy with hydromagnetic plasma wave duct

13 p2398 A70-29210

Hydrodynamic equations to obtain transformation coefficient for HF weakly damped waves in magnetoactive plasma, applying to solar corona

13 p2463 A70-29227

Infrasonic waves generated by pulsating aurora, using Joule heating and Lorentz force coupling

13 p2399 A70-29236

Gas parameters determination near singular point of slow magnetosonic wave propagating in conducting medium in uniform magnetic field

13 p2464 A70-29507

Nonlinear wave propagation in continuous media involving stress-strain state of half space under pressure or load expanding over boundary

13 p2517 A70-29770

Plasma waves in space and laboratory - NATO Conference, Roros, Norway, April 1968

13 p2466 A70-29901

Electron temperature and concentration determined from longitudinal electron cyclotron harmonic waves in finite plasma column

13 p2467 A70-29916

Perpendicular propagation of VLF waves from wave/particle interaction in vicinity of lower hybrid resonance frequency in magnetosphere

13 p2468 A70-29934

Time harmonic waves propagation in elastic half-space with submerged cylindrical cavity, assuming linear plane strain conditions

13 p2518 A70-30010

Propagation in corrugated waveguides with surface permitting H-wall boundary condition for choice gap and fin dimensions

14 p2550 A70-30519

Overpressure, rise time and wave period of sonic boom signatures at ground level from unaccelerated supersonic overflights

14 p2530 A70-30608

Plasma refractive index determination by propagation method allowing simultaneous electron concentration and density measurements by reflected damped wave

14 p2622 A70-30658

Geomagnetic field lines inclination effect on hydrodynamic waves propagation in lower ionosphere, using atmospheric model in plane form with integral conductivity tensor

14 p2575 A70-30821

Plane waves propagation in elastic layer using Cauchy theory of initial stress

14 p2658 A70-30998

Normal wave propagation modes existence in magnetized plasma, deriving criteria for electrostatic approximation validity

14 p2624 A70-31045

Atmospheric turbulence effects on acoustic-gravity waves propagation, deriving dispersion relation for phase velocity and propagation constants

14 p2579 A70-31252

Nonhomogeneous atmosphere with absorbing gas of constant mixing ratio, deriving transmission along isothermal and nonisothermal paths

14 p2617 A70-31304

Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation

15 p2722 A70-31452

Weak discontinuities propagation in quasi-linear systems for MGD, obtaining transport equations

15 p2777 A70-31470

Elastic waves propagation in finite thickness elastic plate under transient load, assuming material behavior in conformity with nonlinear Hooke's law

15 p2814 A70-31544

Iron sample shape determination for studying relationship between tensile strength and rate from stress wave propagation during high speed tensile tests

15 p2814 A70-31547

VLF wave propagation direction observation by satellite after passage through magnetosphere at low and mid latitudes

15 p2697 A70-31659

Phase shift ultrasonic flowmeter measuring transit time between oppositely propagating waves in blood vessels

15 p2691 A70-31921

Wave propagation through Newtonian fluid in compressible thick walled viscoelastic tube, considering blood flow in arteries

15 p2691 A70-31938

Dynamic asymmetric elasticity problems, considering longitudinal and torsional wave propagation in bounded and unbounded micropolar media

15 p2818 A70-32178

Kelvin wave propagation numerical model, showing influence of mean zonal wind vertical and horizontal shear in lower stratosphere

15 p2771 A70-32370

Stress wave propagation in solid infinite elastic medium and laminated materials

15 p2823 A70-32784

Wave propagation and group velocity in warm magnetoplasma, using adiabatic theory for ionosphere and far magnetosphere models

16 p2859 A70-32937

Coherent wave propagation in warm turbulent plasma, using perturbation method for wave dispersion

16 p2860 A70-32945

Scattered fields evaluation due to creeping waves for smooth convex radar targets, using algebraic expressions

16 p2956 A70-32978

Thermodynamically perfect fluids in general relativity, considering heat transmission paradox and wave propagation velocities

16 p2997 A70-33103

Ultrasonic pulses velocity and attenuation in fluids by coherent detection technique, measuring delay and decrease in amplitude due to transmission path length increase

16 p2913 A70-34084

Asymptotic analysis of wave propagation modes in circular solid elastic cylinder, obtaining displacement components and frequencies as dimensionless wave number power series

16 p2993 A70-34085

Longitudinal wave propagation in variable section bars, solving hyperbolic equation of motion by perturbation method

16 p2993 A70-34088

Wave propagation in infinite elastic plate in contact with inviscid incompressible liquid layer, deriving dispersion relation

16 p2993 A70-34094

Waves nonlinear propagation in fluids due to convection, reviewing various solution methods

17 p3068 A70-34666

Warm homogeneous magnetoplasma longitudinal cyclotron harmonic wave propagation perpendicular to static magnetic field, noting instabilities

17 p3140 A70-34927

Analog simulation of elastic wave propagation in thick walled hollow circular cylinders to determine safe impact speed

17 p3185 A70-34964

One dimensional elastoplastic wave propagation in rate-sensitive viscoplastic rod with thermal gradient

17 p3185 A70-34966

Wave propagation from two dimensional expanding load on liquid half space with load fronts decelerating monotonically from initial supersonic speed

17 p3069 A70-34976

Wave propagation measurement by correlation techniques, discussing travelling wave representation, delay times, amplitude coefficients, etc

17 p3091 A70-35449

Weak nonlinear one dimensional wave propagation in nonequilibrium flow, using governing system characteristics for reference coordinates

17 p3071 A70-35468

Martensitic phase change effects in TiNi on ultrasound waves propagation in transition region, using pulse echo measurements

17 p3126 A70-35603

Transient wave propagation in homogeneous anisotropic media, using hyperbolic equations and unitary operator

17 p3137 A70-35607

Hydromagnetic wave propagation compared in magnetospheres of plane and cylindrical geometries

18 p3311 A70-36011

Cracks and tensile failure of interface bonds in elastic composite hollow cylinder, deriving wave front propagation equations

18 p3283 A70-36388

Two component warm plasma wave propagation along magnetic field, considering full pressure tensor equation with momentum and pressure relaxation mechanisms

18 p3294 A70-36405

Nonlinear theory for surface waves propagating in bounded magnetoactive plasma

18 p3295 A70-36412

Phase plane method for Hill equation in problems involving EM wave expansion in elliptical waveguides or single circuit parametric systems analysis

18 p3227 A70-36424

Three dimensional dynamic analysis of small harmonic stress wave propagation in elastic-plastic and viscoplastic materials, using finite differences

18 p3344 A70-36724

Propagation constants in laminar plasma circular waveguides filled with anisotropic linear medium, using Galerkin-Ritz method

19 p3474 A70-37428

Electromagnetic propagation in flat waveguide with local gyrotropic filling and transverse magnetization, using Galerkin method

19 p3470 A70-37430

Acceleration wave propagation in materially uniform inhomogeneous isotropic elastic bodies, using tensor analysis

19 p3536 A70-37563

WKB or eikonal approximation for waves and vibrations in inhomogeneous Euler-Bernoulli beams and plates and Timoshenko beams

19 p3536 A70-37700

Numerical model of piezoelectric surface wave propagation on free and metallized cubic and hexagonal crystals

19 p3486 A70-37754

Magnetoelastic ferromagnet linear theory, considering spin-elastic microwaves propagation in ferrimagnetic crystal subjected to pulsed magnetic fields

19 p3487 A70-37947

VLF wave propagation in earth atmosphere waveguide, calculating various atmospheric types from waveguide field dependence on frequencies

19 p3416 A70-38566

Plane VLF wave propagation in waveguide formed by earth and inhomogeneous anisotropic ionosphere, determining excitation coefficients and attenuation functions

19 p3381 A70-38568

Radio wave propagation over inhomogeneous terrains, determining perturbing effects of details on wave characteristics

19 p3381 A70-38573

Terrestrial atmospheric structure, determining zero and extremum point positions and amplitudes to obtain information of VLF wave propagation path

19 p3416 A70-38574

Slow wave propagation in plasma moving along external magnetic field, generalizing refractive index formula

19 p3417 A70-38592

Wave propagation in linear elastic surfaces, calculating wave speeds, shapes and strength decay

19 p3473 A70-38943

Asymptotic expansion methods for solving wave propagation and diffraction problems via localization principle

20 p3657 A70-39219

Square cross section waveguide with cutoff frequency, calculating density wave propagation in helical electron beam trajectories directed by magnetic field

20 p3584 A70-39256

Perturbation method for nonlinear wave propagation in inhomogeneous media, considering sound propagation in ducts and hydromagnetic waves across nonuniform magnetic field

20 p3672 A70-39611

Electrothermal mode wave propagation in nonequilibrium partially ionized gas, using model with finite ionization

20 p3680 A70-39984

Dynamic theories for wave propagation in laminated and fiber reinforced composites, using dispersion curves for transverse and longitudinal motions

20 p3730 A70-40036

Unsteady problems of finite amplitude plane and cylindrical wave propagation in dissipative spatially symmetrical media

20 p3673 A70-40093

Nonlinear resonance conditions for plasma three-wave interactions, considering wave propagation modes and constant magnetic field

20 p3682 A70-40137

Mechanical analogies of magnetodynamic oscillations in homogeneous density column subject to material body impact, relating to earth magnetic field

21 p3854 A70-40593

Elastic wave propagation mathematics in visual form for ultrasonic testing

21 p3831 A70-40746

Solar photosphere vertical velocities and horizontal wave propagation, discussing magnetic fields, phase coherence and behavior and oscillations

21 p3885 A70-40952

Collisionless shock wave geometry, determining dispersion relation for ion acoustic waves propagating in plasma

21 p3856 A70-41082

Radioheliograph observations of solar outbursts involving MHD waves propagation along curved paths in corona at 80 MHz

21 p3891 A70-41178

Longitudinal tension impact tests on nylon tape and Apollo pilot parachute riser construction, determining wave propagation effects

21 p3843 A70-41831

Wave instabilities in avalanche diode bulk semiconductors with negative field dependent drift velocity and carrier temperature, noting validity for gas plasma

21 p3863 A70-41915

Rotating cold plasma wave propagation modes including Coriolis effect in absence and presence of external magnetic field

21 p3860 A70-41924

Elastic wave propagation in isotropic homogeneous bodies, considering free vibrations and propagation velocity

21 p3940 A70-42099

Surface elastic waves, considering propagation, electromagnetic transduction, amplification, guiding, focusing, reflection and applications

21 p3830 A70-42115

Internal gravity waves mathematical model for atmosphere with arbitrary distributions of temperature,

molecular weight, viscosity and conductivity, deriving wave propagation into thermosphere

21 p3821 A70-42257

Finite difference method for stress wave propagation and multiple reflection in elastic bar with discontinuities

22 p4115 A70-42744

Arbitrary form acceleration waves growth equation in deformed hyperelastic material, discussing solution and decay criteria

22 p4115 A70-42940

Self focusing in nonlinear optics, discussing physical processes of wave propagation in dielectric

22 p4074 A70-43207

Homogeneous helium plasma column LF wave propagation in uniform magnetic field

22 p4082 A70-43216

Slow wave propagation on conducting surface separated from plasma by ion sheath, observing resonances on cylindrical antenna

22 p4082 A70-43238

Pc-1 and IPDP pulsations propagation characteristics from ground based measurements, discussing spectral structure, waveforms, polarization, time delay between different observation stations, etc

22 p4021 A70-43277

Exponential compression wave propagation in conical rod with smooth tapering cross section

22 p4121 A70-43726

Italian Sirio satellite with local and foreign ground stations network measuring SHF wave propagation variables

23 p4158 A70-43753

Nonlinear frequency shift for electronic and ionic cyclotron modes in magnetospheric whistler and hydrodynamic propagation, using Vlasov equation

23 p4187 A70-43880

Short radio wave propagation over single jump lines in F sub zero F 2 gradient presence, examining maximum usable frequency increase

23 p4162 A70-44076

Partially ionized viscous plasma longitudinal wave propagation, formulating motion equations for electrons, ions and neutrals from Maxwell and Boltzmann equations

23 p4229 A70-44987

Single crystal piezoelectric materials growth characteristics and wave propagation properties for surface acoustic wave applications

24 p4367 A70-45399

One-dimensional propagation of elastic spherical waves in inhomogeneous unbounded medium under normal stress on cavity surface

24 p4424 A70-45631

X ray and neutron propagation in multilayer film composite, discussing boundary conditions in interfacial systems

24 p4380 A70-46095

Spheroidal wave function theory, calculating eigenvalues with branch points for propagation constants complex values

24 p4315 A70-46134

Radiative transfer and magnetic dispersion for three dimensional wave propagation in radiation magnetogasdynamics

24 p4387 A70-46148

WAVE RADIATION

U ELECTROMAGNETIC RADIATION

WAVE REFLECTION

Natural oscillation modes two dimensional resonator determined in form of superimposed uniform plane waves with arbitrary coefficients of wave reflection

01 p0140 A70-10057

Transmission and reflection of electromagnetic waves by bounded moving plasma layer in slow wave space

01 p0042 A70-10167

Reflection coefficient of electromagnetic wave reflected from thin ionization layer, using frequency dependence of amplitude to estimate ionospheric layer thickness

01 p0083 A70-11532

Electromagnetic pulse duration formed by spectral content in HF bandwidth received after ionospheric reflection

02 p0258 A70-12419

Electromagnetic wave reflection on thin plasma layer with Epstein electron density profile, noting use in microwave diagnostics

03 p0529 A70-13016

Third harmonic generation detection for strongly absorbing media in reflection with neodymium-glass mode-locked laser, measuring nonlinear susceptibilities of semiconductors and metals

03 p0501 A70-13649

Ray-optical analysis of electromagnetic scattering in plane and circular waveguides, giving formulas for modal reflection and coupling coefficients

03 p0452 A70-14034

Stellar X ray effect on nighttime lower ionosphere wave reflection suggested from VLF propagation data

03 p0562 A70-14224

Plane shock wave diffraction and reflection at slender wedge in linear approximation, proposing

- pressure distribution calculation formulas behind shock 04 p0665 A70-14493
- Helmholtz integral for radio waves scattering from surfaces expanded for reflection from terrain or atmospheric layers 04 p0648 A70-14964
- Integrodifferential equation solved for plane wave reflection and transmission by random medium assuming homogeneous background refractive index 04 p0649 A70-14970
- Flow viscosity and heat conduction effects on shock wave propagation in bent channel with weak Mach reflection 04 p0671 A70-15013
- Precursor electron densities measured in nitrogen and air ahead of shock waves, noting shock tube wall reflectivity 04 p0694 A70-15565
- Strong radiating shock wave structure and reflection at rigid wall, investigating flow velocity, density and temperature changes 05 p0956 A70-15788
- Sea surface sunglint pattern irregularities in earth orbiting satellite photographs, observing dark patches 05 p0838 A70-16152
- TEM wave reflection incident on conducting thin strips semiinfinite array in free space not accompanied by emission 05 p0812 A70-16243
- Propagation, reflection and dispersion equation for electromagnetic waves in longitudinally magnetized plasma filled coaxial waveguide using rotating coordinates 06 p1016 A70-17124
- Power reflection and transmission coefficients for polarized electromagnetic waves incident on plasma slab moving along magnetostatic field 06 p1008 A70-17566
- D region electron density distribution during night and presunrise period, using full wave integration method for propagation parameters for waves reflected from electron density model 06 p1054 A70-17587
- Phase path variation of stable continuous wave transmission reflected from E region during daytime, discussing night time results 06 p1055 A70-17593
- Transmission and reflection coefficients calculated for electromagnetic waves incident on inhomogeneous absorbing layer applicable to ionosphere, plasma and p-n junction 06 p1009 A70-17834
- Monte Carlo simulation for shock wave formation by specularly reflecting piston, discussing reflection from specularly reflecting wall 06 p1049 A70-18334
- Pressure history at end wall of electromagnetic shock tube measured during shock wave reflection by piezoceramic gage 06 p1031 A70-18505
- Supersonic oblique shock wave reflection on turbulent boundary layer, considering layer separation and pressure effects 07 p1255 A70-19210
- Radio signal reception beyond normal horizon by partial reflection from elevated layer in troposphere calculated by computer 07 p1234 A70-19218
- Plane electromagnetic wave reflection from laminar anisotropic medium, analyzing piecewise-constant permittivity tensor as boundary value problem 07 p1235 A70-19448
- Back reflection of zero-mass scalar or vector waves in gravitational fields produced by non-Lorentz part of spatial metric components 07 p1387 A70-19923
- Front lit holograms of transient events and live subjects obtained with reflected light pulsed laser system 07 p1287 A70-20087
- Lower ionosphere geomagnetic field local gradients determination by partial reflection method 07 p1277 A70-20455
- S- and p-polarized electromagnetic wave incident on semiinfinite laminar plasma layers, analyzing reflection and absorption characteristics 08 p1456 A70-20504
- Parameters defining elliptic vibration of light reflected from surface using photoelectric ellipsometer 08 p1546 A70-21673
- Ground reflection effect on plane uniform sound source distribution applicable to compressor and fan noise under far field conditions 09 p1726 A70-22240
- Doppler-effect-like phenomena of waves or pulses reflected and refracted at moving boundary layers 09 p1728 A70-23072
- Distortion of electromagnetic pulse undergoing total internal reflection in inhomogeneous isotropic plasmas in lower ionosphere 09 p1639 A70-23672
- Progressive shock waves propagation, reflection and transmission through sudden changes in pipe cross sectional area, obtaining boundary conditions for quasi-steady junction flow 09 p1664 A70-23738
- Longitudinal shock wave oblique reflection in nonlinear harmonic elastic material in terms of wave propagation 10 p1956 A70-24097
- Radiating shock wave reflection from rigid wall studied for velocity and structural changes, assuming unsteady and one dimensional flow 10 p1867 A70-24140
- Strong shock wave reflection from rigid wall at high shock velocities, studying effect on flow structure 10 p1922 A70-24152
- Transmission and reflection of electromagnetic waves by bounded moving plasma layer in slow wave space 10 p1842 A70-25015
- Radio wave reflection spectra from plane surfaces, determining physical properties and composition 10 p1843 A70-25154
- Surface wave reflection during propagation along transversely magnetized ferrite plate on metal backing, using perturbation theory to find cylindrical wave field 10 p1844 A70-25163
- Time dependence of shock wave attenuation at multiple reflection in shock tube after diaphragm burst, using damped vibration solution 11 p2034 A70-25495
- Microwaves reflection, absorption and thermal emission at smooth air-water interface, tabulating calculated coefficients 12 p2183 A70-27169
- Shock wave reflection into ideal gas flow with linear density variation analyzed for flow field 12 p2211 A70-27832
- Radiation transfer models for diffuse reflection of quanta from turbulent medium applied to electromagnetic wave propagation in turbulent atmosphere 12 p2306 A70-27855
- Coherent wave reflection from random half space, solving scalar Dyson equation in bilocal approximation for oblique incidence 12 p2189 A70-27972
- Plane electromagnetic waves anomalous reflections from diffraction grating with periodic array of rectangular holes in dielectric layer, observing resonant character 12 p2191 A70-28175
- Magnetic field effect on frequency spectrum of vertically propagating magnetoacoustic waves and reflection conditions in inhomogeneous isothermal atmosphere 12 p2227 A70-28226
- Heat transfer and flow stabilization dependence on initial shock wave reflection from conducting wall 12 p2213 A70-28228
- Plane electromagnetic wave reflection at interface of two semiinfinite dielectric media in relative motion perpendicular to incidence plane, noting polarization change 13 p2365 A70-29102
- Adiabatic index effect on shock waves reflection, emphasizing critical angle dependence on incident wave intensity 13 p2388 A70-29416
- Electromagnetic plane wave oblique reflection from flat surface with spatially modulated surface impedance, computing wave spectrum 13 p2367 A70-29527
- Reflection and conversion coefficients of model ionospheres for VLF and LF radio waves 14 p2573 A70-30735
- Normally incident plane monochromatic electromagnetic wave reflection and scattering from expanding dielectric slab, using invariant imbedding concept 15 p2695 A70-31438
- Em wave reflection and transmission at boundary between free space and semiinfinite anisotropic plasma 15 p2778 A70-31830
- Plane EM wave reflection and transmission at moving boundary, discussing frequency disparity with incident wave 15 p2697 A70-31834
- Light scattering in one dimensional semiinfinite medium with moving boundary, deriving escape and reflection probability expressions 15 p2808 A70-32880
- Reflection coefficient formula for principal radio wave reflected from thin long rod in middle of rectangular waveguide 16 p2878 A70-33800
- Plane harmonic sound wave reflection and transmission in flowing medium by infinite set of arbitrary spaced and staggered flat plates 16 p2971 A70-34016
- Plane wave reflection decay rate representation by slowness diagrams 16 p2952 A70-34089
- Flowfields behind reflected shock waves, predicting end-wall radiative heat transfer and radiative gas dynamic coupling effects 17 p3065 A70-34480 [AIAA PAPER 70-774]
- Boundary conditions for electrodynamics of wave reflection from conducting bodies, using perturbation technique 17 p3128 A70-34633
- Zonal wind component in lower ionosphere observed for gravity waves partial reflections by temperature discontinuities, using least mean square method for reflection coefficient 17 p3077 A70-34946
- Effective reflection height measurement accuracy for pulsed vertical ionospheric sounding, using interference method 18 p3227 A70-36106
- Shadow photography applied to Mach reflections in argon, carbon dioxide and Freon 12 in shock tube, using Huygens principle for transfer mechanism 18 p3205 A70-36148
- Plane electromagnetic wave reflection from laminar anisotropic medium, piecewise-constant permittivity tensor as boundary value problem 18 p3229 A70-36922
- Internal gravity waves reflection, inspecting differential equations for behavior of two wave parameters 19 p3471 A70-37779
- Plane wave reflection from stratified isotropic medium using ray tracing in complex space, noting agreement with phase integral method 19 p3380 A70-38404
- D region electron densities during 20 May 1966 solar eclipse, using partial reflection and rockets 19 p3419 A70-38914
- Book on electromagnetic waves in stratified media covering reflection, propagation, waveguide mode theory, superrefraction and tropospheric ducting 20 p3586 A70-39604
- Inclined electromagnetic wave incidence on randomly inhomogeneous medium with changing mean dielectric permittivity, calculating reflected and scattered fields 20 p3587 A70-39726
- Laser interferometer system unwanted reflections elimination and intensities control in each arm by linear polarization method 21 p3823 A70-40820
- Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection 21 p3950 A70-41728 [AIAA PAPER 69-559]
- Plane stationary shock wave reflection from rigid concave wall at low Mach numbers 21 p3811 A70-42204
- Doppler frequency shift of reflected radio waves for ionospheric disturbances, discussing solar flares, geomagnetic variations, etc 21 p3820 A70-42256
- Finite difference method for stress wave propagation and multiple reflection in elastic bar with discontinuities 22 p4115 A70-42744
- Radio wave reflection properties in 16-3000 kHz range calculated from D and E region models for comparison with measurement 22 p3989 A70-43164
- Reflection echelon and Fabry-Perot interferometer with surface imperfections, comparing spectral resolution limit with Rayleigh limit 22 p4040 A70-43612
- Millimeter band electromagnetic scattering from weakly doped GaAs, calculating reflection coefficient and phase angle 23 p4229 A70-43926
- Curved shock waves regular and Mach reflection in steady supersonic flow at plane wall 23 p4180 A70-44122 [ICAS PAPER 70-11]
- Sound radiation from unflanged circular waveguide duct with flow, calculating reflection coefficients, directivity pattern and power for comparison with approximate methods 23 p4219 A70-44392
- Sonic boom waves diffraction and reflection, developing analytical method for pressure-time history in vicinity of walls and corners 24 p4289 A70-45266
- Angle beam ultrasonic testing of metals, considering beam and depth scanning characteristics and wave reflectability of various flaws 24 p4343 A70-45687
- Echoes with ion sonar waves in ionized gases, considering ion density disturbances under local excitation 24 p4387 A70-45795
- Contact region structure with viscosity, conduction and radiative transfer effects applied to plane shock wave reflection from heat conducting wall 24 p4326 A70-46001

WAVE RESISTANCE

Structural strength under impact loading with allowance for shock waves, comparing various strength calculation methods 04 p0774 A70-15098

Wave resistance of pressure field of hovercraft drifting over water surface determined as definite integral based on Wehausen expression 09 p1609 A70-22219

Absorption band observation near 0.43 μ in solar spectra and scattered radiation of sky, determining nontelluric origin 01 p0084 A70-11613

Energy transfer formula and scattering of electromagnetic waves at ideally reflecting bodies in inhomogeneous medium using geometrical optics approximation 03 p0442 A70-13094

Quasi-optic electromagnetic beams slow spreading in anisotropic media due to propagation in unusual directions 03 p0447 A70-13288

Helmholtz integral for radio waves scattering from surfaces expanded for reflection from terrain or atmospheric layers 04 p0648 A70-14964

Scattering cone of hydromagnetic waves propagating along magnetic lines in magnetized plasma with oscillating electric dipole 04 p0683 A70-15738

Kirchhoff wave scattering geometric optics theory accuracy, using multifrequency acoustic wave backscatter data obtained from rough surfaces 05 p0814 A70-16401

Correlation function of auroral reflection radio signals with allowance for polar ionospheric scattering and pulse signal transmission and reception 05 p0841 A70-16741

Induced Compton scattering of plasma and electromagnetic waves under astrophysical conditions, discussing HF radio emission spectra from cosmic objects and quasar 05 p0917 A70-16904

Electron plasma wave damping by ion sound wave scattering using Vlasov equation 06 p1125 A70-18638

Scattering cross sections of radio waves at wake of vertically moving body near reflecting ionospheric layer, noting wave sphericity influence 07 p1237 A70-20423

Radio wave sphericity influence on scattering at moving body wake in ionosphere, determining scattering cross section principal maximum 07 p1237 A70-20424

Plasma monochromatic wave propagation equilibrium state instability mechanisms, discussing stimulated scattering by thermal plasma particles and particle capture in wave potential well 08 p1551 A70-21422

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability 08 p1554 A70-21819

Bistatic radar cross section measurements by pendulum method using modulated wave formed by target swing motion 09 p1634 A70-22698

Point electric dipole EM radiation in presence of moving dispersive dielectric half space 09 p1639 A70-23669

Uniform asymptotic theory of diffraction by edge of three dimensional body, obtained boundary layer solution applied to scattering by circular cylinder 11 p2084 A70-26422

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Dirichlet problem 11 p2085 A70-26621

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Neumann problem 11 p2085 A70-26622

Wave scattering by statistical distributions of discrete obstacles, deriving various functions for diagnostic applications 11 p2086 A70-26762

Incoherent scattering of radiation from collisionless plasma in quasi-stationary state, analyzing wave energy from spectral decomposition for given background distribution function 13 p2457 A70-28558

Love wave propagation in layers with irregular boundaries, investigating scattered field to determine reflection from triangular notch 13 p2394 A70-28831

Elastic plane wave diffraction and scattering at convex obstacle in semibounded regions, using method of images 13 p2452 A70-29289

Upper critical field dependence on s- and p-wave scattering of Frenkel effects in electron irradiated niobium 13 p2471 A70-29535

LF plane wave scattering from semielliptic groove in conducting ground plane noting validity for arbitrary polarization, incidence, directions and eccentricity 13 p2453 A70-29822

Multichannel scattering variational bounds reformulation without using projection operators, calculating resonance-energy relations 14 p2619 A70-30490

Scattering cone of hydromagnetic waves propagating along magnetic lines in magnetized plasma with oscillating electric dipole 14 p2575 A70-30822

Planar sandwich hologram recording 4 π steradians with preservations of object spatial perspective by representing entire wave front 14 p2588 A70-31209

Radio observations of dense briefly visible Leonid meteor shower with fixed pencil beam antenna in coping with wave scattering in trails 15 p2796 A70-31511

Electromagnetic waves scattering at circular cylinders in semibounded region, showing boundary influence on radiation pattern 15 p2698 A70-32174

Wave scattering from circular cylindrical body, considering plane wave primary source, line source, point and dipole source 15 p2700 A70-32403

Wave scattering from elliptic cylinder, solving boundary value problem for two dimensional wave equation 15 p2700 A70-32404

Plane wave scattering by strip of elliptical cylinder, considering geometrical diffraction theory 15 p2700 A70-32405

Wave scattering by acoustically soft, hard and perfectly conducting spheres 15 p2700 A70-32410

Wave scattering by acoustically soft and hard prolate spheroids 15 p2700 A70-32411

Born approximation limit for plane wave multiple scattering by inhomogeneous electron density distribution in plasma 16 p2957 A70-32981

Refractive index gradients effect on scattering of radio waves perturbing ionosphere or passing through perturbed region 16 p2863 A70-33259

Electromagnetic wave scattering on resonant dielectric sphere in rectangular waveguide, using reflection coefficient 18 p3227 A70-36419

Plane TM wave scattering by systems of two parallel conducting elliptical cylinders, metal tapes and combinations 19 p3374 A70-37278

Gravitational radiation scattering by Schwarzschild horizon, discussing odd parity waves of angular momentum 21 p3878 A70-40731

Convergent numerical method for principal value integrals in dispersion relations of coupled channel scattering problem involving wave phase shifts 22 p4062 A70-42748

Scattering and radiation from circumferential gap in circular dielectric-loaded waveguide, using integral equations 23 p4167 A70-43765

Oral potassium chloride usefulness and toxicity in EKG nonspecific T wave abnormality evaluation 01 p0014 A70-10274

Pulse width and spectrum generated by ring laser mode locked by synchronously modulated absorber as function of modulator waveform curvature and active medium 01 p0109 A70-10430

FM/FM telemetry systems waveform distortion measurement technique based on minimum rms error between input and output signals 01 p0044 A70-10941

Emission from broadband impulsive point source refracted by spherical interface between fluids with different acoustic velocities, showing emitted and inverse waveform disturbances 01 p0046 A70-11190

Signal waveform algorithmic construction with optimal autocovariance properties, using isosum integer

partitions, applied to clustered multipath distribution measurement 02 p0263 A70-12773

Sonic boom wave shapes and amplitudes determination in still stratified atmosphere, comparing U.S. standard atmosphere results to various atmospheric models 03 p0411 A70-12927

Rotating prism method for obtaining time correlation between streak photographs and characteristic waveforms of flash X ray discharges 03 p0492 A70-13762

Dielectric loaded waveguide with symmetric microstrip line, evaluating transverse wave number by finite difference method 03 p0458 A70-14035

Ge IMPATT diodes under pulsed operation to produce LF high efficiency oscillations, recording current and voltage waveforms 05 p0821 A70-16417

Waveform-shaping transfer function rational polynomial approximation method with application to network problem in PCM communications 06 p1007 A70-17459

Linear circuit output waveform calculation without first resolving transfer functions on complex frequency plane, applied to current switching circuit analysis 06 p1018 A70-17460

Matched filter rectangular pulse compression nonlinear FM waveform design with low time sidelobe and zero mismatch loss due to spectral weighting 07 p1242 A70-20065

Operation mode for full-bridge programmed waveform static inverter permitting saturation of power transistors in DC power conversion 08 p1439 A70-20707

Two dimensionally periodic slow wave structure, verifying Shein formulas 09 p1637 A70-23143

Si avalanche diodes oscillations external current waveform measurement using coaxial current monitoring assembly with negligible phase error 10 p1849 A70-24234

Linear superposition (LSP) of isolated pulses in tape recording, discussing validity for multibit waveform synthesis 11 p2057 A70-26627

Engine firing rate measurement from acoustic waveform autocorrelation analysis 12 p2290 A70-27161

Waveform estimation by adaptive combination of analog and hardlimited sensor signals 12 p2187 A70-27906

Radar transmitter waveforms for multifunction operation, emphasizing phase and frequency modulation for CW radars 12 p2188 A70-27939

Radar spectrum control based on two pulse shaping techniques using klystron transmitter 12 p2188 A70-27941

Continuity equation plasma oscillation, discussing ion current waveform flowing from discharge and implications for periodic astrophysical phenomena 14 p2638 A70-30618

Analog data transmission over PCM telemetry link, comparing noncoherent FSK vs PSK reception performance for waveform error 14 p2552 A70-31187

Sampled analog waveforms transmission, deriving optimum pre- and postfilters 15 p2703 A70-32557

Optimal perturbation signal waveform linearizing nonlinear transfer characteristic of image sensing receptor array 15 p2705 A70-32725

Long term geomagnetic pulsations (PC5) with sinusoidal waveforms, using IGY data 17 p3080 A70-35642

Laser pulse shaping using inducible absorption with Q switched time behavior controlled by nonlinearities within optical resonator 18 p3270 A70-36745

Tightly wound spiral nonlinear density waves in pressureless self gravitating disk with external gravitational field, examining solid body and differential rotation 18 p3331 A70-37192

Waveform changes in postbuckling behavior of thin rectangular plates under axial compression 19 p3535 A70-37380

Tonks-Dattner resonances in warm inhomogeneous plasma column, examining kinetic theory for waveform shapes and resonance location 19 p3475 A70-37534

Aircraft streamer /spark/ discharges formation, waveforms and RF noise levels, using mathematical model for electric field strength 19 p3380 A70-38179

Close range atmospheric shape classification, using image recognition theory concepts 19 p3416 A70-38572

Radio wave propagation over inhomogeneous terrains, determining perturbing effects of details on wave characteristics 19 p3381 A70-38573

WAVEGUIDE ANTENNAS

- Noctilucent cloud kinematics, examining wave structure and lengths, velocities and general motion 20 p3622 A70-39403
- Elastic quasi-stationary waves, discussing waveforms and resonance phenomena 20 p3727 A70-39890
- Electromagnetic test equipment transient waveform control using on-line digital computer in near real time configuration 21 p3805 A70-41270
- Triangle and sine waveforms generation, discussing reduced peak and crossover distortion and extended frequency operation 22 p3989 A70-42923
- Arbitrary form acceleration waves growth equation in deformed hyperelastic material, discussing growth and decay criteria 22 p4115 A70-42940
- Internal gravity wave shape at temperature inversion in lower atmosphere from high resolution vertically pointing FM/CW radar sounding 23 p4162 A70-44038
- Automatic detection of K-complex waveforms in sleep electroencephalograms, using pattern recognition 23 p4151 A70-44379
- Mammalian eardrum failure due to blast induced pressure variations, examining wave shape, character, magnitude and duration effects 23 p4148 A70-44839
- Nervous inhibition effect on electroretinogram b wave during flash sequences 24 p4301 A70-45986
- ## WAVEGUIDE ANTENNAS
- Numerical solutions to determinantal equation for predicting properties of periodically modulated dielectrically filled frequency scanning waveguide as microwave antenna 03 p0457 A70-13696
- Reflection coefficients, radiation patterns and surface wave excitation calculated from aperture electric field obtained for waveguide radiating through dielectric slab 06 p1020 A70-17561
- Parallel plate TEM waveguides radiation pattern slope diffraction analysis 06 p1021 A70-17570
- Far field synthesis for calculating excitation pattern of waveguide-excited aperture antenna arrays 07 p1243 A70-20325
- Waveguide slot antenna with electrical control of field polarization from linear to circular and beam scanning over wide sector 09 p1652 A70-23652
- Solid dielectrics permittivity measurement using beam deflection phenomenon in multislot waveguide antenna 09 p1652 A70-23656
- Radiation patterns widened from plane and circular waveguide ends closed by planoconcave homogeneous dielectric lens 10 p1843 A70-25135
- Impedance in coaxial line generated by tee-fed waveguide slot antenna, using equivalent circuit 12 p2198 A70-27966
- Waveguide slot array operation in different frequency bands generating independent radiation patterns, utilizing orthogonal dominant modes propagation 12 p2199 A70-27967
- Leaky waveguide radiation patterns with periodic loading slots along axis 13 p2377 A70-29105
- Microwave field component distribution in plasma waveguide covered by metallic sheath in magnetic field, using counterbalanced antenna probes for field measurements 13 p2463 A70-29378
- Concorde aircraft radar signal transmission, describing modified Flexwell waveguide 13 p2379 A70-29561
- Admittance measurements of rectangular or circular waveguide fed aperture antennas illuminating displaced metal plate 16 p2872 A70-32963
- Steerable C band waveguide arrays design for forming monopulse cluster of sum and difference beams 16 p2875 A70-33395
- Compact integrated microwave antenna of composite structure involving slotted waveguide planar array capable of operating in three frequency bands 16 p2876 A70-33406
- Radiation patterns and impedance properties of slot antenna in ground plane, slot on cylinder and sphere and waveguide slot arrays 17 p3051 A70-35064
- Open waveguides and small horns theory, using Wiener Hopf method for radiation calculation 17 p3051 A70-35065
- Rectangular waveguide EM radiation into plane parallel region through asymmetrical longitudinal slot 19 p3386 A70-37727
- Electromagnetic wave propagation perpendicular to slots of plane dielectric filled waveguide used as slow wave system and antenna 19 p3386 A70-37728

- Dielectric covered narrow radiating slots in rectangular waveguide broad face, calculating impedance from equivalent circuits 23 p4175 A70-44952
- Optimum performance of corrugated waveguide feed horns for paraboloidal reflector antennas via radiation pattern shaping with digital computer 24 p4320 A70-46222
- ## WAVEGUIDE FILTERS
- Mode transducer and mode filter formed by rectangular and circular waveguide elements investigated by field expansion, calculating transmission coefficient and propagation constant 10 p1848 A70-24219
- Spurious output from C band radar magnetrons, discussing measurement procedures and noise reduction by waffle-iron waveguide filters 12 p2201 A70-28141
- ## WAVEGUIDE TUNERS
- Microwave phase shifter with rectangular ferrimagnetic toroid in waveguide longitudinal center, discussing impedance matching, phased array applications, etc 10 p1852 A70-24891
- Dispersion characteristics of electronically tunable periodic rectangular waveguides, using external DC magnetic field 23 p4168 A70-43781
- ## WAVEGUIDE WINDOWS
- Reduced multipoint equivalent scattering parameters derivation by matrix method, determining load reflection coefficients effect on signal attenuation and phase shift 03 p0458 A70-14038
- Intrinsic noise of passive waveguide multipoint with losses, obtaining mean values and wave correlation functions using scattering matrix 04 p0655 A70-14402
- Directional pattern of waveguide radiators using Kirchhoff boundary values of electric, magnetic or electric and magnetic fields, discussing aperture reflection coefficient 04 p0653 A70-15397
- Symmetrical and asymmetrical electromagnetic wave modes in conical waveguide calculated, relating critical cross section plane position to aperture angle 05 p0816 A70-16892
- Rectangular waveguides broad wall longitudinal slot equivalent networks, noting series/parallel function dependence on slot length 07 p1240 A70-19221
- Multimode rectangular waveguide lateral surface opening, determining scattering matrix coefficients governing mode conversion characteristics 08 p1462 A70-21224
- Waveguide windows for energy outlet in microwave devices analyzed by plane /Brillouin/ modes, discussing dielectric element reflection coefficient 09 p1651 A70-23646
- Coaxial energy outlets satisfying vacuum maintenance requirements of dielectric waveguide windows in dismountable prototype microwave devices 09 p1652 A70-23647
- ## WAVEGUIDES
- ### NT BEAM WAVEGUIDES
- ### NT PLASMA GUIDES
- VLF wave propagation across sunrise line analysis based on idealized model for earth-ionosphere waveguide 01 p0042 A70-10048
- Radiation transfer problem in waveguide with statistically uneven walls reduced to Dyson and Bethe-Salpeter equations in quantum field theory 03 p0524 A70-13066
- Wave numbers determined in waveguide formed by laminar inhomogeneous medium enclosed between homogeneous dielectric media, taking into account radiation losses through wall 03 p0447 A70-13290
- Optimal synthesis and design of distributed parameter system for waveguides using gradient technique with devised algorithm to overcome convergence problem 03 p0449 A70-13563
- VLF radio wave propagation variations occurring in earth-ionosphere waveguide contributing to errors in OMEGA position lines used to obtain worldwide navigational fixes 03 p0523 A70-13614
- VLF wave propagation in earth-ionosphere waveguide, comparing ray and waveguide-mode theories 03 p0449 A70-13616
- Homogeneous waveguide solutions by finite element method using matrix operator and function minimization to assure rapid convergence to eigenvalue 03 p0457 A70-13936
- Ray-optical analysis of electromagnetic scattering in plane and circular waveguides, giving formulas for modal reflection and coupling coefficients 03 p0452 A70-14034

- Dielectric loaded waveguide with symmetric microstrip line, evaluating transverse wave number by finite difference method 03 p0458 A70-14035
- Nonlinear propagation of electron plasma wave in cylindrical waveguide, discussing linear theory of electrostatic waves in cold plasma 04 p0728 A70-15000
- Eigenvalue and eigenfunction of H01 wave in bend of cross shaped waveguide, determining field components and propagation constant change 04 p0651 A70-15291
- Optical waves in round metallic and dielectric waveguides calculated using geometrical optics and model analysis for anisotropic wall impedance model 04 p0652 A70-15396
- Backward and complex waves propagation in circular waveguide with coaxial dielectric rod, discussing arbitrary angular dependences 05 p0812 A70-16145
- Graphic method for classifying EM waves directed by open waveguides, obtaining wave numbers from dispersion equation 05 p0812 A70-16245
- Impedance and field distribution of bifurcated and stepped waveguide junctions with inserted diaphragm calculated by transformed singular integral equation 05 p0820 A70-16385
- Symmetrical and asymmetrical electromagnetic wave modes in conical waveguide calculated, relating critical cross section plane position to aperture angle 05 p0816 A70-16892
- Wave equation for elastic waves in isotropic solid solved in Cartesian and circular cylindrical coordinates for studying microsonic wave guiding structures 06 p1105 A70-17479
- Mutual coupling between waveguides radiating through conducting ground planes with orthogonally polarized propagating modes described by first order analysis 06 p1020 A70-17562
- Symmetrical H mode wave propagation in inhomogeneous plasma filled circular waveguide solved by hypergeometric functions, noting use for microwave diagnostics and computer programs verification 06 p1009 A70-17825
- OMEGA frequencies propagation characteristics measured to estimate navigation errors from multiple waveguide propagation modes close to transmitter, comparing day and night errors 07 p1330 A70-19222
- Semiconductor laser signals coupling into thin optical platelet waveguides 07 p1301 A70-20019
- Plastic symmetrical trough waveguides with metalized surfaces for hybrid millimeter-wave integrated circuit systems, discussing ferrite resonant isolator 07 p1243 A70-20151
- Impedance behavior of inductive posts with small capacitive gap in waveguide 08 p1468 A70-20644
- Radio waveguides with random inhomogeneities, studying mathematical models by orthogonalization method 08 p1457 A70-20723
- Microwave propagation along earth-air path, studying tropospheric layer role 08 p1461 A70-20968
- Spectrum of waves emitted from waveguide of two plane dielectric or isotropic plasma layers, solving dispersion equations numerically by computer 08 p1472 A70-20973
- Diffraction by single wire waveguide with obstacle, considering propagation phenomena of symmetrical modes 08 p1472 A70-21042
- Coplanar waveguide consisting of thin metallic film strip on dielectric slab with ground electrodes adjacent and parallel to strip for nonreciprocal gyromagnetic device applications 08 p1475 A70-21281
- Circular dielectric waveguide modes self consistent description by asymptotic method, obtaining eigenvalues and eigenfunctions 08 p1476 A70-21288
- Millimeter guided wave communication systems information transmission capacity increase, using quaternary and higher order modulation techniques 08 p1462 A70-21506
- Slotted-line admittance measurement of thin obstacles in below cut-off waveguides 08 p1477 A70-21640
- Electrical parameters approximate calculations for waveguides with complex cross sections by Schwarz alternating method, determining critical frequencies of fundamental modes 09 p1632 A70-22406
- Electromagnetic wave diffraction on array of plane waveguides, determining scattered field by solving infinite system of algebraic equations 09 p1632 A70-22407

Electromagnetic wave deceleration in open cylindrical waveguide, noting guide action as bandpass filter
09 p1633 A70-22415

Aberration-correcting line source feed for spherical reflector using linearly polarized flat waveguide array
09 p1646 A70-22694

H guide with laminated dielectric strips separated by air layers, analyzing field distribution and characteristics
09 p1634 A70-22709

Lossless three-port H-plane waveguide junction circulator performance evaluation using computerized design
09 p1646 A70-22710

Quasi-optical waveguide component/attenuator/ in S-band measured for performance noting diffraction as limiting factor
09 p1647 A70-22711

Open-sided shielded stripline and other parallel plate waveguide structures propagation modes
09 p1634 A70-22712

Waveguide master short circuit devices reflection coefficient measurements by microcalorimeter
09 p1638 A70-23322

Radiation losses of tapered single mode dielectric slab waveguide for TE and TM modes
09 p1650 A70-23369

Rectangular coaxial waveguide with internal conductor contained between inhomogeneous magneto-dielectric bars, deriving computer algorithm for natural mode fields
09 p1638 A70-23645

Antenna with 3-db slotted waveguide bridge to produce near circular polarization emission field
09 p1652 A70-23651

Reliability testing of waveguide ferrite devices based on quantitative technique using circular charts with filled in endurance test results
09 p1652 A70-23661

Open region waveguide radiation and scattering solved using impedance surfaces of related closed region convergence
09 p1640 A70-23807

Mode transducer and mode filter formed by rectangular and circular waveguide elements investigated by field expansion, calculating transmission coefficient and propagation constant
10 p1848 A70-24219

Waveguides consisting of three concentric regions suitable for plasma experiments, showing dispersion characteristics and cut-off frequencies
10 p1850 A70-24835

Microwave waveguide insertion-loss calibrations, comparing cavity Q and direct measurement methods
10 p1854 A70-25315

Corrugated waveguide structures for aperture type feeds for spherical and paraboloidal reflector antennas, discussing experiments on 2-hybrid mode horn
11 p2018 A70-26024

Line source antenna arrays containing random dissimilarities in waveguide cross section analyzed for phase errors to determine sidelobe deterioration
11 p2018 A70-26177

Phase velocity and direction estimation of unknown signal propagating across two dimensional array in dispersive waveguide, showing dependence on SNR
11 p2018 A70-26274

Electromagnetic wave propagation problem in periodic slow wave structures reduced to Hamiltonian using parametric resonance theory
11 p2012 A70-26802

Microwave lines dispersion equations for ferrite cylinder and spiral and circular waveguides
11 p2012 A70-26803

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects
11 p2020 A70-26807

Large capacity long distance transmission by circular waveguides, describing artery frequency modulation and equipment for multiplexed telephone messages transmission
12 p2194 A70-27233

Modified method of cross sections applied to solution of scalar Helmholtz equation in infinite symmetrical waveguides
12 p2272 A70-27296

Waveguide optical properties effect on injection GaAs laser threshold lasing and field distribution in near/far zones for various parameters of active region
12 p2246 A70-27365

Coupling between parallel plate waveguides excited in TE modes using integral and differential equations, noting dielectric plug loading effect
12 p2198 A70-27954

Semiinfinite parallel plate waveguide modes reflection coefficients with propagation constants near cut-off and excited at open end for microwave-optical frequency range
12 p2198 A70-27959

C band latching ring-and-post ferrite waveguide circulator for radar transmitting-receiving functions, presenting performance and design parameters
12 p2202 A70-28166

Quasi-TEM analysis justification for limit cases of guided waves on microstrip transmission lines with dielectric constant approaching free space
12 p2190 A70-28168

Electromagnetic fields features in VLF spectral range for propagation in earth-ionosphere waveguide, discussing effects of ionospheric irregularities
12 p2190 A70-28169

Textbook reissue on diffraction of electromagnetic and acoustic waves at open end of waveguide, using Wiener-Hopf-Fock factorization method
13 p2363 A70-28724

Circular shielded three layer dielectric waveguide critical parameters, estimating passbands for phase circulators with ferrite inserts
13 p2364 A70-28873

Quasi-pyramidal horn waveguide TE and TM modes eigenvalues computed by asymptotic formula
13 p2377 A70-29147

Radiation patterns of slots in flat and curved screens using open waveguide emission theory
13 p2378 A70-29305

Trapped mode resonances, attenuation and launching tapers in overmoded rectangular waveguides
14 p2556 A70-30441

Circular low loss waveguides for millimeter waves, discussing construction, geometry, surface texture, etc
14 p2556 A70-30442

Millimeter waveguide components, discussing impedance measuring equipment, matched loads, variable short circuits and attenuators, power measurement equipment, etc
14 p2556 A70-30446

Quasi-optical power transmission in overmoded waveguides in interferometers, millimeter wave spectrometers, polarizers, etc
14 p2556 A70-30447

Propagation in corrugated waveguides with surface permitting H-wall boundary condition for choice gap and fin dimensions
14 p2550 A70-30519

Earth-ionosphere waveguide electric field strength calculation based on nighttime ionospheric models, comparing results to measurements
14 p2574 A70-30748

Lossless waveguide propagation analysis as transient problem by means of Laplace transform
14 p2556 A70-30923

Surface wave radiation from plane dielectric waveguide, considering phase constants, directional properties and optimal distance location
15 p2696 A70-31503

Fourth order aberration in gas lens used as focusing element in light beam waveguide systems
15 p2697 A70-31829

Electromagnetic wave propagation in cylindrical guide containing anisotropic sheets, observing TE and TM modes existence
15 p2774 A70-31946

Equivalent circuits and general formulas for small hole coupling of resonant cavities and waveguides
15 p2714 A70-32817

Finite parallel plate waveguide arrays edge effects, comparing element radiation patterns and reflection coefficients vs scan
16 p2860 A70-32953

Periodically strip loaded dielectric slab guided electromagnetic waves, discussing attenuation and space harmonics amplitudes relationship
16 p2861 A70-32960

Paraboloidal and spherical reflectors focal region fields matching over corrugated waveguide open end propagating hybrid modes
16 p2861 A70-32966

H-guide dielectric losses reduction by use of artificial and laminated dielectric slabs
16 p2875 A70-33401

High Q reactance network realization for integrated microwave systems employing evanescent mode waveguide components
16 p2875 A70-33402

Attenuation characteristics for dominant hybrid mode in corrugated circular waveguide for antenna feed
16 p2879 A70-34041

Traveling wave antennas, analyzing modal characteristics of various waveguiding structures
17 p3052 A70-35070

Surface wave antennas, operated on guided wave mode parallel to interface and with radiation at discontinuities, calculating excitation and radiation characteristics
17 p3052 A70-35072

Electromagnetic wave scattering at ellipsoidal bodies in microwave rectangular and circular waveguides
17 p3046 A70-35346

External SHF signal effects on multifrequency spectrum of reflex klystron coupled with long waveguide
17 p3055 A70-35682

Plane wave diffraction by periodic grating reduced to waveguide problem, determining asymptotic behavior of integral solution
18 p3291 A70-36286

Algorithm for steady state oscillations in irregular waveguide structures with conducting walls
19 p3470 A70-37427

Propagation constants in laminar plasma circular waveguides filled with anisotropic linear medium, using Galerkin-Ritz method
19 p3474 A70-37428

Waveguide transformer using rectangular waveguide permitting Galerkin method, determining scattering matrix
19 p3385 A70-37429

Electromagnetic propagation in flat waveguide with local gyrotropic filling and transverse magnetization, using Galerkin method
19 p3470 A70-37430

Single crystal yttrium ferrite garnet intrinsic electromagnetic radiation as function of coupling coefficient between specimen and waveguide
19 p3485 A70-37630

Dielectric layer and screen heat loss effects on diffraction radiation in resonant waveguide
19 p3377 A70-37725

Open plane slotted waveguide excitation by current carrying filament, using long wave approximation
19 p3377 A70-37726

Linear equations for wave diffraction in rectangular waveguides with step-shaped inhomogeneities
19 p3378 A70-37730

H and E waves diffraction in circular waveguide by diaphragm thickness, using linear equations and Fourier-Bessel series for representation
19 p3378 A70-37731

Metallic core shielded squirrel cage waveguide excitation by charged filament, giving equations for Fourier coefficients of electromagnetic fields
19 p3386 A70-37732

Two axially positioned cylindrical waveguides with slots cut periodically along generatrices /double squirrel cage/, analyzing behavior under excitation by rotating charged filament
19 p3386 A70-37733

Transversely magnetic and electric wave critical frequency spectra in Pi and H section waveguides, using summary representation method
19 p3378 A70-37735

Gyrotropic waveguides parameters computer calculation based on inhomogeneous isotropic region, taking into account discontinuities
19 p3378 A70-37736

Prime focus feeds performance for radiotelescopes, using one- or two-hybrid modes in circumferentially corrugated waveguides
19 p3388 A70-37967

Electromagnetic wave propagation in spherical impedance waveguide, determining eigenvalues with negligible refraction
19 p3381 A70-38565

Plane waveguide field with complex geometric inhomogeneity, describing perturbed section by integral equations
19 p3381 A70-38567

Plane VLF wave propagation in waveguide formed by earth and inhomogeneous anisotropic ionosphere, determining excitation coefficients and attenuation functions
19 p3381 A70-38568

Sound propagation in cylindrical waveguide with impedance walls in presence of flow
19 p3472 A70-38655

Cylindrical radiator radiation resistance and mass in waveguide with reflecting boundaries, calculating sound field for effect of medium reaction
19 p3472 A70-38656

Square cross section waveguide with cutoff frequency, calculating density wave propagation in helical electron beam trajectories directed by magnetic field
20 p3584 A70-39256

Radio waves propagation two dimensional model in earth-ionosphere waveguide across land/sea boundary, solving dual integral equations by Wiener Hopf procedure
20 p3585 A70-39457

Time harmonic waveguide scattering involving metallic obstacles, obtaining numerical solution by finite difference Green function method
20 p3586 A70-39469

Radiation theory circular waveguide in dominant TE mode and flush mounted to infinite conducting flat ground plane covered by plasma or dielectric sheath
20 p3586 A70-39500

Book on electromagnetic waves in stratified media covering reflection, propagation, waveguide mode theory, superrefraction and tropospheric ducting
20 p3586 A70-39604

Complex waveguides with diverging body of revolution shaped horn, solving equation by Frobenius-Latysheva method
20 p3587 A70-39765

Planar thin film optical waveguides for integrated circuits, utilizing information carrying potential of laser light in optical communication

20 p3598 A70-40129

Multifrequency oscillator system with reflex klystron loaded by waveguide line, confirming spectrum conversion under action of SHF signal

20 p3598 A70-40299

Transmission line modal analysis for nonlinear polarizability in optical and quasi-optical waveguides

21 p3784 A70-40564

Electromagnetic wave propagation in one dimensional periodic waveguide slow wave systems, deriving dispersion curves by perturbation theory

21 p3784 A70-40628

Microwave propagation in circular waveguide containing inhomogeneous gas discharge plasma

21 p3785 A70-40630

Microwave waveguide mount characterization of varactor diodes, using transmission resonance and Dolph-Chebyshev taper

21 p3797 A70-40759

Arbitrary mode launching on fiber-optical dielectric waveguides by spatial filtering technique

21 p3829 A70-41930

Optical communication waveguides with diffused boundaries, calculating modal propagation fields by perturbation theory

21 p3792 A70-42045

Admittance matrix of microwave networks, referring to coaxial line-waveguide coupling through 3 kMc adapter

21 p3802 A70-42250

Plasma-air junction problem in parallel plate waveguide, obtaining discontinuity admittance expression

22 p3994 A70-42350

Russian monograph on propagation of LF electromagnetic waves in waveguide formed between earth and ionosphere

22 p3989 A70-42674

GaAs stripline domains and guided EM waves, discussing velocity, conductivity, drift and transmission amplification gain

22 p3996 A70-42917

High level parametric upconverter for radio link using evanescent mode waveguide

22 p3997 A70-42925

Prism film device coupling laser beam into thin film dielectric light guides, discussing operational theory

22 p4030 A70-42947

Subsonic jet engine intake duct radar cross section calculation using waveguide model

22 p3992 A70-43584

Scattering and radiation from circumferential gap in circular dielectric-loaded waveguide, using integral equations

23 p4167 A70-43765

Resonant frequencies of microwave dielectric resonator in magnetic wall waveguide

23 p4169 A70-43784

Book on guided EM wave theory covering mathematical methods transmission lines cavity resonators, perturbation theory, electrostatics, electric and magnetic fields, propagation, etc

23 p4172 A70-44242

Ray theory of diffraction from open-ended parallel plate waveguides, using Wiener-Hopf technique

23 p4219 A70-44404

Microwave frequency light modulators waveguides, examining optimal cross sections to increase modulator efficiency

23 p4196 A70-44409

Radiation and phase-scanning properties of planar array of parallel plate waveguides, using wedge diffraction theory

23 p4166 A70-44973

GaAs injection lasers, calculating effect of active region displacement from p-n junction waveguide on wave generation

23 p4203 A70-45074

Electromagnetic wave propagation problem periodic slow wave structures reduced to Hamiltonian, using parametric resonance theory

24 p4311 A70-45177

Microwave lines dispersion equations for ferrite cylinder and spiral and circular waveguides

24 p4317 A70-45178

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects

24 p4317 A70-45179

Ferrite junction microwave circulator bibliography /1956-1969/ covering stripline and waveguide versions theory, designs, constructions and applications

24 p4318 A70-45210

Microwave propagation in hollow conducting elliptical pipe waveguide, calculating successive modes cutoff wavelengths by numerical analysis

24 p4318 A70-45212

Microwave propagation in waveguides, investigating trapped and slightly leaky modes in multilayered or multiwave regions by ray-optical techniques

24 p4311 A70-45216

Packaged microwave junction diodes in reduced-height waveguide, discussing parasitics and equivalent circuit parameters measurement technique

24 p4318 A70-45220

Microwave waveguide rotatory joint using symmetrical excitation for mode conversion to obviate filters

24 p4318 A70-45221

Modified time-domain reflectometer method for waveguide system evaluation, detecting and displaying radar echoes as function of time

24 p4315 A70-46234

Microwave transmission in partially dielectric filled circular waveguide, deriving cutoff wavelength and phase velocity vs frequency

24 p4315 A70-46260

WAVELENGTHS

Turbulence and temperature fluctuations spectral characteristics in thermally stratified atmosphere determined for various wave numbers, using energy and mass transfer functions

01 p0136 A70-11610

Jovian surface elements spectral and color contrasts from spectrograms obtained between 3200- 4900 A wavelengths

02 p0375 A70-12429

Sky brightness distribution data to determine shape of aerosols scattering as function of wavelength

02 p0292 A70-12435

Helium-neon laser wavelength calculations from spectral observations by Fabry-Perot etalon, proposing formulas to enhance accuracy

02 p0299 A70-12439

Ruby laser light wavelength temperature dependence measurement using Fabry-Perot etalon

02 p0313 A70-12440

Ruby laser emission wavelength temperature dependence measured spectrographically

02 p0313 A70-12441

Photoelectric polarimetry of samples of lunar maria, terra, lavas and chemicals for wavelength dependence of polarization, comparing to Mercury, Mars and asteroids

03 p0576 A70-14082

Heat transport conduction mode and earth as heat sink in solar atmosphere, discussing mesopause coldest region, turbulence and solar plasma-earth electromagnetic interactions

04 p0677 A70-14644

Wavelength selection in Q switched carbon dioxide laser by intracavity gas cell providing selective absorption

04 p0702 A70-15362

Identification of lines in Mohler photometric atlas of IR solar spectrum wavelengths

05 p0910 A70-16427

Yttrium-iron garnet optical properties at various wavelengths and temperatures, noting absorptivity decrease in IR region

06 p1126 A70-17767

Slot line wavelength, impedance, transitions and tolerances measured at S band using different dielectric constant materials

08 p1475 A70-21282

Absorption spectra of n-type GaAs before and after proton irradiation, discussing dependence on wavelength

09 p1739 A70-22753

Transient partially ionized plasmas observation by two wavelength holographic interferometry, describing electron density measurements

09 p1736 A70-23186

Q switched laser pulses lengthened using internal second harmonic generator

10 p1898 A70-23981

Alfven waves wavelengths dependence on inhomogeneous magnetic field geometry in stationary plasma, using conformal transformations

13 p2462 A70-28984

Pulsar short period pulsations and emission patterns in meter wavelength range on crossed radio telescope

14 p2633 A70-30151

Surface wave transmission lines used at millimeter wavelengths

14 p2549 A70-30443

Thermal radio emission from major planets at mm and cm wavelengths and at decimeter wavelengths for Jupiter and Saturn

14 p2648 A70-31084

Primary wavelength standard established via line produced with wavelength-stabilized laser

17 p3104 A70-35086

He-Ne laser emission wavelength long and short term stability for metrological applications

17 p3104 A70-35087

He-Ne laser emission wavelength, using laser interferometry based on feedback between moving mirror and resonator

17 p3104 A70-35088

Energy dissipation and viscosity effects on isotropic turbulence in extreme short wave region at large Reynolds numbers

18 p3239 A70-36263

Holographic interferometry of rapid phase objects by two wavelengths from ruby laser and KDP crystal filter, noting application to dense plasmas

19 p3422 A70-37650

Solar radio emission flux as activity index, analyzing permissible deviations from recommended wavelength

19 p3522 A70-38559

Gratings as laser wavelength-selective end reflectors, noting application to carbon dioxide and dye lasers

20 p3639 A70-39083

Q switching of nitrous oxide laser with Freon 12 and sulfurhexafluoride absorbers, comparing wavelengths with carbon dioxide laser outputs

21 p3834 A70-40567

Multiple wavelength desensitized hologram interferometry to extend displacement measurement range

21 p3822 A70-40814

Pulsar short period pulsations and emission patterns in meter wavelength range on crossed radio telescope

21 p3923 A70-42073

Wave number spectral correlation of temperature and longitudinal velocity fluctuations in fully developed pipe flow

21 p3811 A70-42090

Antennas with controlled current distribution in medium wavelength range for optimal radiation pattern over desired area, discussing maximum gain tuning for daytime and nighttime operation

22 p3995 A70-42521

D region ionization budget, evaluating short wavelength X rays role

23 p4236 A70-43860

Microwave propagation in hollow conducting elliptical pipe waveguide, calculating successive modes cutoff wavelengths by numerical analysis

24 p4318 A70-45212

Solar limb emission spectrum between 300-2803 A, using Skylark rocket instrumentation

24 p4399 A70-45301

WAVES

Repetitive scanner for wave velocity measurements in annular two phase gas or liquid flow using pivoted mirror

06 p1062 A70-17618

Wave physics using ocean waves as example, considering period, frequency, length, speed and similarity of various types

11 p2084 A70-26037

Stratospheric CAT-internal wave relationship, using aircraft and radiosonde HICAT measurements

14 p2609 A70-30603

WEAPON SYSTEM MANAGEMENT

Guided weapons management techniques applied to Rapier light weight anti-aircraft weapon system

08 p1601 A70-21037

Weapon systems combat effectiveness measurements, stressing need for proper data acquisition from early R and D through obsolescence

09 p1794 A70-23414

Integrated Test Program for S-3A Weapon System, detailing test sequence flow and interfaces to assure vehicle and avionics systems reliability and maintainability

10 p1959 A70-24931

Project cost estimate growth pressures on decision making by U.S. Air Force System Program Office director

14 p2667 A70-30521

Project management in aircraft manufacturing related to weapon system

17 p3200 A70-34918

WEAPON SYSTEMS

NT GROUND OPERATIONAL SUPPORT SYSTEM

NT MISSILE SYSTEMS

NT SENTINEL SYSTEM

Weapon systems acquisition projects, studying procurement decisions interactions

04 p0788 A70-14833

British military and civilian aircraft and flying between World War I and II, discussing weapons systems and accidents

05 p0794 A70-16113

Swedish VIGGEN program for aircraft weapons system development emphasizing management methods

05 p0960 A70-16717

Material Acquisition Division of Naval Air Systems Command, discussing engineering and testing functions in providing air weapons systems to operating forces

06 p1185 A70-17973

Control system design for maximum weapon delivery missions effectiveness, discussing analysis and simulation methods

09 p1611 A70-23022

Large scale project grading into stepwise decision stages exemplified by aircraft weapon system development program

10 p1971 A70-24596

Harrier armament system design for ordnance carriage to full combat load factors, describing Weapon Control Panel 10 p1807 A70-24848

Weapon Systems Level testing methods and machines application to missiles, manned space flight vehicles and Safeguard System [AIAA PAPER 70-380] 10 p1862 A70-24923

Human engineering in weapon systems development, considering flying and ground personnel training plans 12 p2177 A70-27038

Exothermic bimetallic ignition systems /EBIS/ design for solid propellant rocket motors of tactical missiles to reduce shock loadings 12 p2289 A70-27694

European Panavia 100/200 two engine variable wing military aircraft, noting prototype design, use and production sharing 13 p2347 A70-29051

Rocket and supersonic aircraft weapon systems, discussing missile delivery and interception 13 p2507 A70-30000

Safeguard defense system against strategic ballistic missiles, discussing Nike X program, PAR and MSR radars and Spartan and Sprint system 15 p2810 A70-32247

Tactical aircraft performance, discussing electro-optical devices, weaponry, communication and navigational networks, information displays and real time remotely manned control systems 17 p3013 A70-34672

S-3A carrier based ASW weapons system, discussing onboard equipment, navigation, avionics integration, etc [AIAA PAPER 70-882] 17 p3018 A70-35802

Air superiority fighter design philosophy, including tradeoffs between armament, detection capability, thrust, speed and load factor [AIAA PAPER 70-930] 17 p3021 A70-35840

Weapon systems effective reliability analysis, using degraded mode evaluation and deterministic computer program 19 p3442 A70-38833

Avionics system for fighter aircraft, discussing weapons design, navigation-attack systems integration, etc 23 p4173 A70-44413

Nonlinear equations of motion approximate solution, determining ordnance weapons aerodynamic stability coefficients from angle of attack [AIAA PAPER 69-135] 23 p4133 A70-44515

WEAPONS

NT ARTILLERY
NT NUCLEAR WEAPONS
NT SPACE WEAPONS

Flight tests to investigate external munitions carriage effect on aircraft stability and control 08 p1437 A70-21733

Laser beam for military weapons applications, investigating energy levels and beam guidance 20 p3641 A70-39421

WEAPONS DEVELOPMENT

Swedish VIGGEN program for aircraft weapons system development emphasizing management methods 05 p0960 A70-16717

DOD procurement practices for advanced weapon systems, discussing government errors in contracting policies 07 p1428 A70-19678

Guided weapons management techniques applied to Rapier light weight anti-aircraft weapon system 08 p1601 A70-21037

WEAPONS INDUSTRY

Management planning for French-British Martel /Missile Antiradar et Television/ project, emphasizing tasks of government agencies and contractors 08 p1601 A70-21038

WEAR

Bonded solid lubricant films wear life equation for low contact stress conditions, determining optimal film thickness [ASME PAPER 69-LUB-5] 01 p0102 A70-10397

Co-base hardfacing alloys mechanical properties and applications, discussing mechanical and chemical wear processes in cast and wrought types 02 p0319 A70-12712

Molybdenum disulfide solid film lubricant with increased wear life developed from in situ conversion of electrodeposited molybdenum trioxide 06 p1091 A70-17339

Abrasive wear of polymers subject to plastic and elastic deformation, considering papers, metal gauze and rough metal surfaces 07 p1296 A70-20003

Corrosive wear due to oxygen and/or moisture in air indicated as major failure mode in lubricated gears 10 p1895 A70-24852

Friction theory, discussing surface mechanics, wear and erosion control 15 p2743 A70-31699

Friction and wear effects on leakage path in sliding seal interface 16 p2916 A70-33078

Upstream wear of small metal orifices under large pressure drops in phosphate ester hydraulic fluids due to current driven electrochemical corrosion [ASME PAPER 70-FE-15] 16 p2919 A70-33629

WEAR INHIBITORS

Phosphorus compounds inhibition effect on oxidation and wear of graphite lubricants 13 p2437 A70-28854

Thermochemical method for directional crystallization of wear-resistant alloy coatings on machine parts 23 p4205 A70-44043

WEAR TESTS

Wear resistance of Ti alloys chromosilicified by thermal diffusion in vacuum 01 p0115 A70-10072

Load, speed and coating thickness effect on near life of resin bonded solid lubricant, using oscillating motion and low pressure blocks [ASLE PREPRINT 69-AM-5C-3] 01 p0103 A70-10447

Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity 01 p0103 A70-10448

Friction and wear tests on solid lubricant graphite fluoride compared with molybdenum disulfide at specific temperatures, considering friction coefficient [ASLE PREPRINT 69-LC-9] 02 p0321 A70-12536

Porous wall material entrainment in turbulent boundary layer during supplementary inert gas injection, including nonisothermicity effects in heat and mass transfer equations 03 p0440 A70-13385

Titanium alloys case hardened by diffusion of various metals at high temperatures, measuring increase in wear resistance 03 p0513 A70-13858

Carbide rupture energy in wear resistant alloys during abrasion, considering metallographic data and energy parameters 04 p0707 A70-15212

Creep and wear due to microslip under dry rolling contact conditions 05 p0854 A70-15890

Sliding wear of bearing Al lubricated with polyphenyl ethers in boundary region tested by pin and cylinder wear machine producing continuous record 05 p0854 A70-15910

Solid lubricants friction and wear bench testing under simulated space environment 06 p1075 A70-17340

Polytetrafluoroethylene wear tested by rubbing cylindrical rod flat ends against glass plates, determining sliding contact pressure effects 06 p1077 A70-18403

Sliding friction and wear of polytetrafluoroethylene ball bearing filled with graphite investigated for irradiation effects 06 p1077 A70-18404

Odessa observatory meridian circle pivots wear determined during observations of eclipsing variables 08 p1574 A70-21160

Burnishing load and time effect on deposition, endurance limit of lubrication and wear-in characteristics of molybdenum disulfide powder films 08 p1508 A70-21516

Friction, wear and surface evaluation of alloys as bearing materials in prosthetic devices 09 p1690 A70-22044

Wear resistance of turbine rotor blade stabilizing elements in form of bolts connecting overlapping leading and trailing edges of adjacent tips 09 p1768 A70-22095

Microconstituents effect on wear behavior of high hardness steels on basis of crossed-cylinder testing, discussing intermetallic compounds influence 10 p1895 A70-24853

Molybdenum disulfide dry film lubricant wear life as film sintering process dependent on binder, additive or atmosphere chemical effects 11 p2058 A70-25571

Friction and wear of Ni sliding on Ni, Cu on Cu and Au on Au tested in vacuum at room temperature with constant load 12 p2242 A70-27229

Diamond burnishing effects on wear and contact endurance of chromium coatings, investigating surface hardening and residual stresses 13 p2419 A70-28868

Lubricating fluids effects on three-body abrasion wear rates, considering roles of viscosity and abrasive type 13 p2419 A70-28896

Nonaggressive liquid media effect on residual strains and phase transformations initiation and development in polyurethane parts operating in lubricants, discussing wear resistance 13 p2439 A70-29431

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects 13 p2423 A70-29766

Oxygen interlayer diffusion effects on wear change during gliding friction of normalized steel samples 15 p2743 A70-31636

Antifriction and wear properties of iron fluoride materials and white cast iron under sliding friction in air and vacuum 15 p2743 A70-31637

Wear intensity of abrasives during fine grinding of Armco Fe, Ti and Ti alloys, comparing friction and chemical composition effects 15 p2743 A70-31640

Space suit thermal insulation properties, wear durability and nonflammability improvements, reflecting techniques in fabricating cryogenic multilayer insulation systems [AIAA PAPER 70-851] 16 p2939 A70-33918

Wear and fatigue of Ti-Mo-Al-Sn-Si /Hylite 50/ alloy with resistant Mo or Cr coatings 17 p3099 A70-34447

Ball bearing materials for ultrahigh vacuum space environments, determining frictional and wear behavior 17 p3099 A70-34573

Metals and hard materials sliding wear due to granular abrasives in heated vacuum chamber 17 p3100 A70-34646

Dry friction and wear tests of various materials in vacuum at low temperatures 18 p3263 A70-36471

Binder wetting relation to solid film lubricant wear life [ASLE PREPRINT 70AM 5A-3] 19 p3439 A70-38810

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects 20 p3638 A70-40099

Helicopter parts and assemblies fatigue life estimation and testing, discussing loading spectra, service conditions, etc 22 p4046 A70-43119

Temperature effect on friction coefficient of boron and silicon carbides, using similar wear pairs in vacuum 23 p4205 A70-44044

Refractory materials surface behavior under friction, discussing microscopic nature of wear and surface deterioration due to thermal fatigue, fusion and material transfer, etc 24 p4342 A70-45595

WEATHER

NT COLD WEATHER
NT HOT WEATHER
Linear regression equations to relate atmospheric precipitable water to surface dew point, sky cover and weather 03 p0520 A70-13163

Lower atmosphere VLF heat turbulence as function of precipitation, indicating atmospheric layers existence for different weather situations 05 p0879 A70-16315

High and medium whistler activity in Italy correlated with weather situation in South Africa 05 p0839 A70-16317

Recording apparatus design and operation for characteristics of electromagnetic waves generated by weather discharges, discussing electromagnetic perturbations propagation 08 p1468 A70-20467

Weather situation persistency, using 500 mb contour chart catalog 16 p2945 A70-32950

Solar limb image vibrations, establishing quantitative comparisons between statistical characteristics of fluctuations and weather conditions on propagation path 16 p2979 A70-34179

WEATHER CHARTS

U METEOROLOGICAL CHARTS
WEATHER CONDITIONS
U WEATHER
WEATHER CONTROL
U WEATHER MODIFICATION
WEATHER DATA RECORDERS

Numeric keyboard CRT display for weather data acquisition from ships at sea, utilizing ATS-3 satellite as transmission medium 01 p0048 A70-11279

Remote recording wind vane using continuous and step rotary switch potentiometers suitable for automatic weather stations 06 p1062 A70-17619

Recording apparatus design and operation for characteristics of electromagnetic waves generated by weather discharges, discussing electromagnetic perturbations propagation 08 p1468 A70-20467

Weather radar signal processing and data recording at National Severe Storms Laboratory /NSSL/, providing reduction in echo variations due to relative motion of precipitation elements 13 p2363 A70-28774

WEATHER FORECASTING

NT LONG RANGE WEATHER FORECASTING
NT NUMERICAL WEATHER FORECASTING
NT STATISTICAL WEATHER FORECASTING

Atmospheric environment features bearing on supersonic transport aircraft operations and forecasting, discussing wind and temperature effects

02 p0325 A70-12220

Soviet monograph on weather forecasting covering hydrodynamic principles, atmospheric physics, short and long range forecasting, temperature, pressure fields, etc

03 p0520 A70-12873

Meteorological data processing computer center of German Weather Service, discussing equipment, data system, forecasting techniques and prediction control

03 p0454 A70-13171

Seasonal and monthly mean charts forecasting method based on variation of annual difference in atmospheric circulation

04 p0715 A70-15294

Numerical integration of linearized two level forecast model to analyze behavior of accumulated error

05 p0878 A70-16153

Hydrothermodynamic equations used in forecasting meteorological components solved by assuming equations of motion quasi-linear and reducing to ordinary differential equations

05 p0878 A70-16195

Weather data communication, discussing transmission of radar, polar satellite and ATS satellite data to processing center and forecasts dissemination to public media

05 p0814 A70-16327

Meteorological conditions effects on SST aircraft flight safety and economics, emphasizing stratospheric information for forecasting

06 p1095 A70-17193

Objective quasi-Lagrangian index for forecasting convective weather outbreaks based on outbreak occurrence likelihood in convective instability areas

06 p1101 A70-18579

Satellite observed characteristics of severe local storms in central and eastern U.S., noting potential use for storm forecasting

06 p1102 A70-18584

Incipient tropical storm location and synoptic weather pattern analysis from environmental satellite data utilization

07 p1329 A70-19196

Short term weather forecast hydrodynamic equations reduced to solving nonlinear differential equations by introducing dependent variables

07 p1329 A70-19647

Soviet book on meteorological conditions analysis and prediction for aviation covering fog, storms, showers, stratospheric turbulence studies, etc

08 p1535 A70-20772

Economic and social benefits from weather forecasting developments, noting expenditures on satellites and high speed computers

08 p1539 A70-21826

Telemetry data processing of Eole scientific weather forecasting program, discussing mathematical model simulating atmospheric circulation in Southern Hemisphere

09 p1674 A70-22200

Automatic change discrimination applications to weather prediction, land resource management and city planning, using photographic, IR and radar sensor imagery

09 p1677 A70-22876

Management planning for global atmospheric research program /GARP/ applied to climatology and weather forecasting

09 p1795 A70-23545

Nonlinear utility functions effects on assessor probability forecasts, discussing psychological factors

10 p1912 A70-23934

Flight test programs site selection method using computer program analysis of magnetic tape weather records

10 p1806 A70-24908

Stochastic dynamic prediction assuming deterministic laws for atmospheric behavior while seeking solutions corresponding to probabilistic statements of initial conditions

11 p2076 A70-26497

Climatic phenomena cyclic behavior from forecasting viewpoint, considering geomagnetic, upper atmospheric and solar activity effects

12 p2265 A70-28268

Meteorological satellites role in weather forecasting, discussing cloud photography and solar radiation and earth albedo measurements

12 p2265 A70-28269

Synoptic processes and meteorological fields computerized automatic classification for weather forecasting applications

12 p2265 A70-28332

Temperature prediction accuracy over 24-hr period for supersonic transport flight operations

13 p2443 A70-28549

Soviet collection of articles on analysis and prediction of dangerous weather phenomena

13 p2443 A70-28584

Weather forecasting accuracy taking into account basic equations and initial conditions

13 p2444 A70-28749

Meteorological data acquisition by navigational aids, satellites and surface based indirect sensors for computer forecasting

13 p2405 A70-28773

Weather forecasting for SST operations, discussing wind, temperature, turbulence, clouds, etc

13 p2445 A70-29494

Meteorological problems associated with accurate weather prediction affecting launch, trajectory and recovery of ballooning systems

14 p2606 A70-30555

Weather forecasting for manned space flights, emphasizing Apollo flights and operational decisions due to forecasts

14 p2606 A70-30557

Tropical storms and hurricanes critical winds forecasting accuracy by NASA Manned Spacecraft Center

14 p2606 A70-30558

CAT relationship to cyclogenesis and anticyclogenesis, considering synoptic situation and Jacobian values for forecasts

14 p2609 A70-30604

Earth atmosphere model for weather forecasting using space technology, noting Global Atmospheric Research Project /GARP/

14 p2576 A70-30973

Papers on global weather prediction covering goals, benefits, satellite components and systems, atmospheric models and second stream

14 p2610 A70-31138

International cooperation in global meteorological network, outlining World Weather Watch

14 p2670 A70-31140

Analog methods of weather forecasting involving map matching, discussing weather modification

14 p2610 A70-31141

Global weather forecasting network costs and benefits evaluated using mathematical criteria

14 p2670 A70-31142

Global weather prediction network economic benefits to key industries, discussing adverse weather effects on production schedules, fuel supplies, construction, harvesting, etc

14 p2610 A70-31143

Space research cost effectiveness in weather forecasting, TV broadcasting, space biology and medicine, geodesy, aerial and maritime navigation, earth resources, etc

15 p2811 A70-32283

Redundant variable errors in weather prediction, specifying initial conditions for time integration of hydrothermodynamic equations for atmospheric motion

15 p2771 A70-32368

Weather prediction models, describing equation systems, roles of friction and heating, meteorological data analysis, fronts, convection, etc

17 p3132 A70-34668

Meteorological prediction methods based on dynamic or thermodynamic considerations

18 p3285 A70-36949

Radar data characteristics for extensive natural cumuli cloud evolution, noting use for precipitation forecasting

18 p3287 A70-37000

Soviet papers on planetary atmosphere dynamics and hydrodynamic long range weather forecasting covering atmospheric motions, wind field, model, etc

20 p3661 A70-39176

Geopotential fields forecasting on isobaric surfaces over Northern Hemisphere by linear four level nonadiabatic model, discussing eddy transport and heat flux equations

20 p3662 A70-39179

Soviet papers on macroprocesses in seasonal weather forecasts, discussing tropospheric and stratospheric temperature and circulation, geomagnetic field, etc

20 p3663 A70-39270

Forecasting air temperature over North Atlantic, analyzing atmospheric parameters informativeness

20 p3663 A70-39274

Optimal flight route selection with respect to meteorological prediction errors, using decision under risk and Monte Carlo method

22 p4067 A70-42656

WEATHER FRONTS

U FRONTS [METEOROLOGY]

WEATHER MAPS

U METEOROLOGICAL CHARTS

WEATHER MODIFICATION

NT CLOUD SEEDING

Earth climatic control by reflecting satellites producing artificial solar irradiation

03 p0581 A70-13835

Satellite surveillance in cloud and weather modification, considering area selection for cloud seeding, atmospheric energy redistribution, etc

04 p0677 A70-14645

Soviet collection of papers on physics of clouds and cloud modifications, covering droplet fusion, radar precipitate measurements, cellular meteorology, ice forming aerosols, stochastic condensation

08 p1535 A70-20770

Spacecraft design requirements for scientific zero G cloud physics experiments concerning colloidal modification processes

14 p2584 A70-30552

Analog methods of weather forecasting involving map matching, discussing weather modification

14 p2610 A70-31141

Space legal problems involving earth resource survey /ERS/ satellites and weather modification

17 p3203 A70-35799

Warm fog clearing effectiveness by seeding with hygroscopic nuclei as function of fog droplet and seeding nuclei distribution

17 p3132 A70-35928

Weather modification by jet aircraft contrails, discussing cloud seeding observations in Alaska

24 p4371 A70-45421

WEATHER RADAR

U METEOROLOGICAL RADAR

WEATHER STATIONS

Digital river and rainfall data automatic transmission from remote hydrologic platforms via ATS-1, studying system economic and technological feasibility

12 p2205 A70-26939

Automatic weather station cost effectiveness criteria based on concepts of loss and error functions

24 p4323 A70-46405

Technological and economical characteristics of serviced and unserved automatic hydrometeorological stations and second class nonautomatic station

24 p4340 A70-46406

WEATHERING

Weather effects on plastic properties, discussing weathering interactions with plastics and polymer degradation

12 p2259 A70-27206

Holbrook chondrite specimen, discussing effects of weathering, leaching and trace elements enrichment over period of time before recovery

13 p2487 A70-28698

Sources of variability in laboratory carbon arc weathering of light stabilized polyester resin

22 p4059 A70-43080

WEBBING

Aerial retrieval webbing performance characteristics, discussing structure, type of material, finishing and strength levels

21 p3843 A70-41832

[AIAA PAPER 70-1181]

WEBS [MEMBRANES]

U MEMBRANES

WEBS [SHEETS]

Unsteady temperatures determination of integral plate consisting of skin with uniformly positioned longitudinal webs

13 p2518 A70-28478

WEBS [SUPPORTS]

Cyclic bending stresses in web of precessing disk-type gyroscope rotor, considering fatigue failure and forced vibration response

09 p1770 A70-22270

WEBS /SUPPORTS/ NT GIRDER WEBS

WEDGE FLOW

Flow and pressure distribution for large normal injection along surface in supersonic stream solved numerically for two dimensional or axisymmetric body and wedge

01 p0001 A70-10336

Flow about blunted wedge with laminar boundary layer at stagnation point and approaching Falkner-Skan flow at infinity, discussing asymptotic behavior

01 p0061 A70-10540

Plane supercavitating flow past symmetric wedge via open cavity model and application of conformal mapping theory and Riemann-Hilbert techniques

01 p0002 A70-10544

Inviscid surface pressures calculated on slender wedges and cones at low frequencies and large oscillation amplitudes in hypersonic flow

01 p0003 A70-10854

Characteristics method for calculating steady supersonic flow of burning gas mixture past wedge and rotating cones

01 p0218 A70-11018

Two dimensional plane and axisymmetric free streamline flow problems solved by finite difference methods for supercavitating wedge in potential flows

01 p0065 A70-11127

Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow

03 p0406 A70-13333

Trailing edge flow of slender aerodynamic shapes terminating in cusp or wedge, analyzing boundary layer reactions

04 p0613 A70-14457

Plane shock wave diffraction and reflection at slender wedge in linear approximation, proposing

pressure distribution calculation formulas behind shock

Compressible flows with circular sector hodographs, discussing Chaplygin equation for simple wedge flow and theorem on sonic jets

Chaplygin equation solution for wedge flows applied to Rethy flows, evaluating drag coefficient and approximate hodograph equations for subsonic and transonic regimes

Inviscid hypersonic flow analysis for chemically relaxing air about wedges and pointed circular cones using Dorodnitsyn integral method

Frozen flow effect in hypersonic wind tunnel nozzle on parameters of nonequilibrium incident flow past wedge

Hypersonic laminar boundary layer in strong viscous interaction region on wedge, determining velocity and enthalpy profiles, displacement thickness and induced pressure distributions, etc

Laminar boundary layer with blowing through wedge surface, solving linearized motion equation analytically

Cavitational symmetric flow around wedge taking into account gravity and surface tension

Longitudinal gravitational field effect on cavitation wedge flow, investigating characteristics by Zhukovskii-Koshko method

Jet flow past arc curve approximation using successive conformal mapping on circle and wedge

Shock wave diffraction at wedge moving at supersonic velocity, solving Hilbert space formulated for constant parameter flow

Laminar heat transfer to blunted wedge with constant wall temperature, describing energy field in boundary layer by analytic solution

Wedge and cylinder high supersonic wakes stability and transition at various Reynolds numbers

Yawed two dimensional wedges in hypersonic stream, including leading edge bluntness, viscous interaction and angle of attack effects

Low speed rarefied slip flow over wedge by asymptotic method of boundary layer equations integration, obtaining velocity profiles for various angles

Plane turbulent jet expansion from linear wedge apex, allowing for ejected axial velocity attenuation and static pressure variation

Pressure distribution measurements on wedges in compressible flow at Mach 0.5-2.2, discussing wedge angle, Mach number and boundary layer thickness effects

Heat transfer behind shock wave in air, oxygen or carbon dioxide flow past wedge, determining thermal fluxes vs wave velocity

Supersonic boundary layer interaction with shock wave produced by wedge slope

Laminar heating in hypersonic vehicles interior corners, analyzing helium tunnel heat transfer data for various intersecting wedge corners

Incompressible laminar boundary layers thermal response behavior in wedge flow, obtaining surface response, temperature fields, heat flux and steady state data

Thick wedge large amplitude harmonic oscillations in hypersonic flow

Shock curvature at wedge or cone tip in radiating gas flow, noting differences between radiative and chemically coupled gas dynamics

WEDGES

Textolites and ferromagnetodielectric wedges mechanical strengths compared for use in open grooves of compound winding

Heat transfer from two dimensional hypersonic low density stream to wedges and sharp flat plates at expansion angles of attack

Mixed boundary value problems of plane elasticity, solving stress field of central Griffith crack in wedge using singular integral equations

Wedge with symmetric crack at vertex in plane elastostatics, solving biharmonic equation by Wiener-Hopf technique

Wedges calculated for lift-drag ratios at hypersonic speeds to find optimum surface geometry

Crack widening in infinite plane field with wedge in absence of slip, based on elasticity theory, plotting contact forces and stresses on crack boundary

Stress distribution in anisotropic disk shaped into wedge loaded at vertex by concentrated moment determined by complex potentials method

Profile plane state of stress in wedge with and without external notch using combined photoelastic analysis and moire method

Elastic wedge under spatially uniform but time dependent shear tractions, studying shear stress and transient wave propagation

Correction to Smyrl results for perturbation pressure in interaction field behind plane shock diffracted by supersonically moving thin yawed wedge

Steady state heat conduction in wedge shaped bodies with boundary conditions of third kind

Viscoelastic-plastic solid delayed fracture associated with wedge formation of crazed material at crack tip

Wave diffraction by wedge, using Heaviside step function and Sommerfeld contours

Wedge angle large amplitude slow oscillations in hypersonic and supersonic flows, examining attached bow shock

Electromagnetic wave diffraction by ideally conducting wedge of finite radius, deriving asymptotic formula for plane wave scattering

Mutual impedance of interacting dipoles at wedge tip, determining errors for short spacing distances

Transient stresses and strains in plane wedge under dynamic load, using photoelastic, high speed photographic and strain gage studies

WEIBULL DENSITY FUNCTIONS

Cramer-Rao efficiencies of best linear invariant estimators, using Weibull distribution in model for survival populations connected with life testing

Weibull process with unknown scale and shape parameters analyzed by Bayesian decision making model, with application to component reliability problem

Complete sample estimation techniques for reparameterizations of Weibull density function to assign probabilities to components and systems lifetimes

Weibull distribution as statistical method for interpreting fatigue test data

Maximum likelihood estimates for setting confidence limits of Weibull percentiles and shape parameters

Brittle fracture stress statistics for Weibull distribution function parameter determination, comparing linearizing, least squares curve fitting and maximum likelihood techniques

WEIGHT [MASS]

Methane fuel systems for high Mach number supersonic transport aircraft on basis of minimum weight

Weights, sizes and costs of nuclear and nonnuclear spacecraft power systems with reference to mission duration

Bobweights effects on pilot induced oscillations, noting role in flying qualities and control system design

Vertical force exertion on mass at ends of elongated rotating nonspherical asteroids calculated for man safety and mobility

WEIGHT [MASS]/

NT BODY WEIGHT

NT STRUCTURAL WEIGHT

WEIGHT ANALYSIS

Space station flexibility design based on INT-21 payload capability emphasizing volume and weight factors

Pulsed plasma transfer systems weight analysis, studying propellant density gradients effects on coaxial plasma gun performance

Subsystem weight trade-offs for design optimization of out-of-orbit Mars soft lander, using atmosphere and surface environmental Monte Carlo model

Minimum weight structural member size and configuration simultaneous optimization using computer program

Engine weight estimation for showing effect on thrust, specific impulse and uranium loss rate for open cycle gas fueled nuclear rocket engine

Normalization of mechanical properties of aircraft engine components, increasing weight efficiency and reliability

Automatic weight analysis by calculation and orientation of mass properties /COMP/ program, using remote terminal time sharing computer system

Multiplane balancing method for minimizing weight required for spacecraft stability

Weight growth factor in aircraft design, discussing fixed and variable weight, payload, performance, flight quality, structural criteria and life expectancy

Landing gear weight analytical estimation, discussing ground loads, member cross sectional area, parametric variations, etc

Weight/cost systems engineering, discussing techniques for using historical data banks and standardized reporting procedures

Fuselage frames minimum weight analysis by automatic iterative method

Structural mass properties solution using programmable printing desk computer for fast data point plotting

Weight, moments and mass centers computer calculation by surface integral method, using FORTRAN language

Fighter aircraft configuration design balancing, comparing weight penalties

Disposable load drop effect on aircraft range, using Breguet equations for graphic determination of bombing range

Aircraft-borne and descent systems performance and weight optimized for midair retrieval

Ni-Cd cell plates screening and selection by weight for reliability and uniformity improvement

Optimum light construction design of glider wings, considering spar weight, aluminum honeycomb structure and repair

Skylab experiments, spacecraft facilities and project status, discussing operations, crew functions and weight of structure, systems, consumables and related storage

WEIGHT FACTORS

U WEIGHT [MASS]

WEIGHT INDICATORS

NT MICROBALANCES

Impact problems of slip clutch and beam scales dynamic characteristics simulation by 1130 CSMP /Continuous System Modeling Program/

Mass measuring device used on biological specimens in zero gravity environment, determining normal and disturbed physiological mechanisms

Weighing systems electronic load cells calibration for tension and compression loading, attributing non-repeatability to bending moments

WEIGHT MEASUREMENT

Cosmic dust particle direction, velocity and mass from ionization and momentum measurements by dust sensor during impact on Pioneer 8 satellite

Astronomical, geometrical and physical selectivity factors of forward scattering radar observation concerning meteor weight

Mass measuring device used on biological specimens in zero gravity environment, determining normal and disturbed physiological mechanisms

Asymmetric rotating bodies mass properties measurement on Dynamic Balancing Machine, taking into account aerodynamic forces

[SAWE PAPER 818]

WEIGHTING FUNCTIONS

L-1011 onboard system for gross weight and center of gravity determination, describing transducers placement, computer design and display panel [SAWE PAPER 837] 20 p3562 A70-40359
Computer time sharing system for real time mass properties measurements [SAWE PAPER 853] 20 p3595 A70-40374
Electron mass evaluation, using fluid dynamic flow process 22 p4076 A70-43672
Ox, calf, pig, rabbit, guinea pig and human eye measurements, determining wet and dry weight of iris, ciliary body and choroid 24 p4305 A70-46346

WEIGHTING FUNCTIONS

Upper atmospheric contribution to Faraday rotation angle above 5000 km determined from beacon frequencies of geostationary satellite, noting geomagnetism weighting and electron content decrement role 01 p0076 A70-10874
Pritchard photometer analyzed for in-focus and out-of-focus operation using radial weighting function 01 p0091 A70-10918
Method of weighted residuals /MWR/ for nonlinear partial differential equations applied to incompressible two dimensional turbulent boundary layer momentum and continuity equations 02 p0281 A70-12328
Method of weighted residuals /MWR/ applied to turbulent boundary layer equations, describing two parameter prediction technique 02 p0282 A70-12330
Momentum integral method for turbulent boundary layers based on equilibrium profiles family, considering weighting function specification techniques 02 p0284 A70-12345
Optimal linear controller synthesis with allowance for continuous perturbations effect, describing weighting factors selection 02 p0272 A70-12413
Radar signals optimal synthesis characterized by ambiguity surfaces minimized over predetermined regions of ambiguity plane, noting weighted error criterion role 04 p0651 A70-15328
Weighting function of optimal correctable gyroscope servosystem in random narrow band noise 05 p0880 A70-16225
Weighting coefficient matrix parameters for European satellite triangulation determined, considering sequence of separate points shown by photographs instead of single point 05 p0839 A70-16345
Chebyshev quadrature formula weighting functions, presenting accuracy estimation method 07 p1321 A70-18659
Nonstationary correlation function for cross correlation of sample records from random processes, discussing minimum mean square error and weighting method 07 p1238 A70-19250
Conditionally optimal control coefficients for nonlinear plant obtained from weighting functions derivatives of conjugate linear model for plant 08 p1479 A70-20995
Electronic equipment optimal design variant selection method, based on relative characteristics of feasible versions, widening weighting coefficients determination basis 09 p1643 A70-22129
Weight function minimization of multiweb box beam in pure bending 09 p1777 A70-22769
Weighted residual and Biot variational methods for solving one dimensional heat conduction problems 09 p1789 A70-23260
Diffraction effects for bilinear screen with irregular apertures determined using correction weighting function for solution 09 p1639 A70-23668
Optimal trajectory measurement program for orbit parameter determination, assuming random errors and nondegenerate weighting matrix of normal equations 10 p1940 A70-24302
Analytic function integration optimal rate, discussing weighting function 10 p1909 A70-24509
Theorem formulation and proof for maximal length cycle classification by weight 11 p2073 A70-26309
Wide range wind compensated launcher settings for unguided rockets using wind-weighting model and iterative procedure requiring real time computation 13 p2503 A70-28528
Orthogonal expansion of multivalued functions for weights in threshold function realization 15 p2767 A70-31838
Cardiovascular blood circulation system dynamic characteristics analysis by linear statistical correlation methods, describing test for determining weighting function 20 p3581 A70-39905
Extremal dynamic controlled plant with random input signals, identifying components weighting functions by statistical approximation 20 p3604 A70-39908

Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation 20 p3732 A70-40264
Laminar incompressible free shear layers by method of weighted residuals for turbulent jets, obtaining velocity profiles for similarity and physical planes 20 p3613 A70-40286
Notch stress intensity factor representation as boundary traction weighted average, deriving weight functions from stress field boundary displacements 23 p4266 A70-44021
Codeword weight enumerator for second order Reed-Muller codes, using matrix approach 24 p4313 A70-46060
Weight structure enumerators for codewords of Reed-Muller codes 24 p4313 A70-46061

WEIGHTLESS FLUIDS

Equilibrium shapes of rotating weightless fluid with surface tension in absence of external force field obtained by boundary layer theory 04 p0673 A70-15241
Ideal weightless fluid jet flow past supercavitating plate at incidence using Tulin scheme 12 p2214 A70-28241
Plane plate motion in weightless fluid flow with free upper boundary, showing lifting capacity increment by underlying solid surface 13 p2390 A70-29644
Ideal weightless fluid plane potential flow in channel with permeable wall, deriving expressions for dynamic characteristics 13 p2390 A70-29648

WEIGHTLESSNESS

Male macaque monkey physiological deterioration in Biosatellite 3, noting falling brain temperature, lowered central venous pressure, fluid loss, blood redistribution into visceral pools, etc 01 p0022 A70-10822
Weightlessness effects on butyl alcohol diffusion flames, studying flame damping mechanism 01 p0217 A70-11012
Interview with Yegorov, discussing ECG, EEG, muscular effort, eyeball movement, blood pressure changes and vision changes during space flight 02 p0230 A70-11675
Fuel droplets burning at pressures sufficient to reach critical temperature under zero gravity conditions in free fall apparatus 02 p0351 A70-12002
Sensor, vegetative, motor and vestibulosomatic reactions to brief weightlessness in fighter pilots and laymen, ascribing disorders absence to statokinetic stability of organism 02 p0241 A70-12799
Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination 03 p0423 A70-13712
Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding 03 p0425 A70-13897
Acceleration and weightlessness effects on efficiency, reliability and capacity in pilots and astronauts muscular system 07 p1202 A70-18797
Weightless astronaut self rotation by limb maneuvers producing pitch and yaw motion 07 p1219 A70-19245
Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes 07 p1207 A70-19495
Weightlessness effects on human vision, studying color perception, field of vision and light sensitivity 08 p1444 A70-20743
Physiopathological effects of weightlessness, showing desirability of partial gravity for long voyages via spacecraft rotation 09 p1621 A70-23439
Rehydratable food consumption in zero-gravity environments with spoons and forks, observing interfacial tensions between water and food, containers and utensils 09 p1628 A70-23464
Relative value of prolonged bed confinement and hypodynamia in estimating biological effects of weightlessness 10 p1813 A70-24666
Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination 11 p1985 A70-25512
Physiopathologic effects on organs of longitudinal and tangential accelerations, decelerations, vibrations and weightlessness 11 p1986 A70-25821
Spacecraft design requirements for scientific zero G cloud physics experiments concerning colloidal modification processes 14 p2584 A70-30552

Optimum overlap design of thin walled tubular extendible spacecraft structures under solar heating in zero-g environment 14 p2657 A70-30762

Mass measuring device used on biological specimens in zero gravity environment, determining normal and disturbed physiological mechanisms 14 p2542 A70-30795
Wheat seedlings cellular response to weightlessness during NASA Biosatellite II flight compared with simulated weightlessness effects 15 p2688 A70-31662
Film condensation in tubes, considering liquid-vapor interface, zero gravity and electrostatic field conditions 15 p2828 A70-32541
Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes 15 p2685 A70-32740
Space manufacturing in weightless environment, discussing unique processes, potential materials, product groups, planned experiments for Skylab Orbital Workshop mission, etc 16 p2888 A70-33716
Materials preparation processes and improvements in space weightless environment, considering metals and ceramics melting, solidification, electromagnetic process control, etc 16 p2919 A70-33717
Orbital zero and low g environment utilization for space manufacturing processes and related operational and tooling requirements 16 p2919 A70-33718
Systems design and instrumentation for chemical/biochemical space manufacturing at zero g, developing scaling laws for transition to larger production units 16 p2919 A70-33719
Electromechanical servomotor for positioning and handling of objects in weightless environment, discussing design and operations 16 p2919 A70-33720
Human circadian coronary circulatory rhythms during space flight weightlessness or bedrest with and without exercise 16 p2854 A70-33991
Biological satellite experiment, considering long term weightlessness effects on metabolism and biological rhythms of medical leech 16 p2854 A70-33993
Long term weightlessness effects on cardiovascular system of rats using miniaturized pump oxygenator 16 p2854 A70-33999
Weightlessness and gravitational effects on human pulmonary blood flow distribution, considering optimal gas exchange efficiency [AIAA PAPER 70-785] 17 p3035 A70-34472
Spacecraft waste management system zero-gravity flight tests, describing components and functions 17 p3036 A70-34751
Automated orbiting biosatellite program with reentry system, studying long term weightlessness and radiation effects 17 p3178 A70-35258
Capillary ball game phenomenon under weightlessness, showing photographs of mercury droplet reflection from fluid boundary 18 p3242 A70-36638
Arc welding in space under high vacuum weightless conditions, describing equipment design and Soyuz 6 experiments 19 p3436 A70-37803
Space processing under zero gravity conditions, discussing crystal growth, metal glass and ceramic melting and casting and biological product centrifugation and electrophoresis 19 p3436 A70-37926
Magnetomotive tools and power systems for maintenance, repair and assembly in space weightless environment 19 p3436 A70-37949
Zero gravity liquid ammonia propellant feed system, describing regulator/capillary tube assembly for propellant delivery pressure control [AIAA PAPER 70-1151] 20 p3690 A70-40204
Space travel genetic effects, discussing radiation, weightlessness, vibration and acceleration 21 p3761 A70-40842
Gravitational effects on laminar gas jet diffusion flame stability, including zero gravity environment 21 p3949 A70-41316
Chicken lymphopenia and body mass loss resulting in death from chronic restraint, developing physiologically unstressful restraint for space environmental testing 21 p3765 A70-41488
Gas lubricated three-foil bearing for high speed rotor support, considering dynamic and static behavior in zero gravity environment [ASME PAPER 70-LUBS-18] 22 p4044 A70-42443
Skylab Orbital Workshop fabrication experiments under space environment conditions, discussing

weightlessness and vacuum effects on various manufacturing techniques

22 p4046 A70-43075

Dynamic spacecraft cabin atmospheres for extended operation, discussing gas composition, weightlessness and various stress factors

22 p3980 A70-43643

Weightlessness and immobilization effects on mechanical tolerance of bone compressive and breaking strength in monkeys

22 p3973 A70-43648

Mammalian tissues metabolic and genetic alteration during weightlessness, relating rats liver regeneration delay to centrifuging intensity following hepatectomy

23 p4146 A70-44617

Hypogravic skeletal atrophy model, considering bone maintenance as feedback control system

24 p4296 A70-45328

WEIGHTLESSNESS SIMULATION

Water immersion technique to simulate zero and partial gravity conditions for investigation of astronaut capability to execute extravehicular work procedures

01 p0038 A70-10963

Simulated zero gravity tests of force application by subjects in Apollo suits, varying worksite geometry, personnel restraints and force type and direction

01 p0038 A70-10964

Water immersion for weightlessness simulation, presenting annotated bibliography covering physiological responses, human performance and simulation techniques and facilities

01 p0038 A70-10965

Ground-based biological experiments on insects and frog eggs to investigate effects of space flight weightlessness and radiation on mitosis and meiosis

04 p0631 A70-14942

Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers

12 p2331 A70-27325

Wheat seedlings cellular response to weightlessness during NASA Biosatellite II flight compared with simulated weightlessness effects

15 p2688 A70-31662

ONERA accelerometer flight test of performance in zero gravity environment, using Vesta sounding rocket for simulation

19 p3431 A70-38541

Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers

21 p3952 A70-42066

Organism reactions to gravity forces, discussing experimental zero and hyper g simulation studies with frog and nematode eggs

23 p4146 A70-44630

Orthostatic stability reduction in experiments with simulated weightlessness, investigating functional compensation mechanisms

23 p4149 A70-45025

WEIGHTS [COEFFICIENTS]

U COEFFICIENTS

WELD STRENGTH

Microstructure and impact strength of welds of Cr-Mn steel containing nitrogen, observing grain growth dependence on nitrogen content

03 p0509 A70-13277

Diffusion welding of dissimilar metals with or without intermediate layers, assessing joint strength factors

03 p0498 A70-14071

Weld quality monitor for production testing of welding strength in electronic circuitry

05 p0856 A70-16722

Thermal fatigue resistance of steel to copper weldments under thermal cycling, noting intergranular crack growth accompanied by oxidation along crack boundaries

06 p1078 A70-18515

Ti alloy welded sheets bending fatigue test facility, discussing test stand calibration and optimal welding

07 p1291 A70-18824

Cr-Mo steel strength and structural stability during tubular stress-rupture testing with high pressure hydrogen, discussing welding effect on strengths

08 p1519 A70-21455

Structural stability of friction welded joint between high temperature low alloy weld metal from CrMoV electrode and high temperature Cr steel

12 p2244 A70-28349

Al-Mg, Al-Zn-Mg, Al-Cu and Al-Cu-Mg welded alloys corrosion cracking resistance as function of composition and fabrication techniques

14 p2597 A70-30972

Weld brittleness during laser beam welding of Ni-Cu, Ni-Ti and Cu-Ti due to diffusion processes

16 p2916 A70-33052

Al pressure-welded joints strength, investigating surface treatment role

16 p2924 A70-34340

Single phase alpha Ti alloy welds breaking strength, discussing delayed failure and cold cracking with various oxygen and hydrogen contents

17 p3117 A70-34399

Porosity effects on mechanical properties of high strength Al alloy weldments

18 p3265 A70-37204

Ti and Al alloy weldments plane strain fracture toughness and mechanical properties for cryogenic applications, using gas metal arc and gas tungsten arc welding

[ASME PAPER 70-MET-4] 22 p4043 A70-42423

WELD TESTS

Gamma ray beam inspection of opposed arc weld with nugget penetration in Al-Cu alloy, including averaging circuit reducing counting statistics variation

01 p0054 A70-10020

Programming device for positioning samples under X ray beam in testing welded seams and parts

02 p0301 A70-12488

Hydrogen, oxygen and nitrogen effects on gas shielded arc weld porosity of Ni, comparing MIG and TIG processes

02 p0310 A70-12543

Weld quality monitor for production testing of welding strength in electronic circuitry

05 p0856 A70-16722

Al weld metal compositions and hydrogen content effects on weld porosity, locating hydrogen in weld by radioactive tracers

08 p1507 A70-21485

Nondestructive process control analyzer for spot welds in aircraft structural components, monitoring expansion, current and spotweld properties

08 p1507 A70-21486

Electronic stress wave analysis technique /SWAT/ for delayed weld cracking data acquisition

10 p1897 A70-25312

Al alloy welded joints delayed rupture tendency, describing constant load test method

14 p2591 A70-30969

Al-Zn-Mg alloy welds delayed rupture under constant uniaxial load in distilled water or aqueous salt solution

14 p2591 A70-30970

Electron beam welding of Ti alloys in partial vacuum, describing mechanical tests and metallographic examinations

17 p3098 A70-34442

Magnesium pulse arc welding, describing procedure, techniques testing and advantages

17 p3100 A70-34635

Al-Si welding rods tests with various surface finishes, considering oxide coatings effect on gas tungsten arc weld quality

18 p3264 A70-37113

Welded Al plates high temperature bend tests, describing materials and procedures

18 p3278 A70-37115

Porosity effects on mechanical properties of Al alloy gas tungsten arc welds, noting strength loss proportional to cross sectional area loss

18 p3265 A70-37205

Fatigue strength in pulsed tension of butt-welded tubular joints, evaluating test results statistically

19 p3433 A70-37357

Sintered boron-alloyed Mo electron beam welding behavior examined by texture-revealing color etching method

21 p3833 A70-41411

Nondestructive ultrasonic measurements of crack depth in high strength steel plate weldments, studying low cycle fatigue

21 p3834 A70-41943

Fracture mechanics application to fusion weld [ASME PAPER 70-MET-2]

22 p4043 A70-42424

Repair weld procedures effects on annealed Ti-Al-V weldments mechanical properties, examining defects in inert gas shielded arc welded joints

[ASME PAPER 70-MET-1] 22 p4043 A70-42425

Ultrasonic delta technique inspection method for flaw detection in weldments or wrought materials

24 p4335 A70-45572

Gamma ray inspection of opposed-arc weld-nugget penetration in Al-Cu alloy

24 p4350 A70-46384

WELDABILITY

Electrical resistivity, contact resistance and weldability of cast Cu and Ag contact materials reinforced unidirectionally by W wire compared to powder composition

04 p0711 A70-14465

Weldability of super alpha high creep strength Ti alloy investigated by synthetic heat affected zone method using thermal cycling tests

06 p1090 A70-18501

Tungsten and tungsten base alloy weldability, discussing powder metallurgy, postweld annealing, high temperature tensile strength, etc

06 p1078 A70-18514

Alloying elements preventing hot cracking in weld metal by converting iron sulfides into higher melting point sulfides

07 p1293 A70-18979

Spacecraft propellant tank development from Al alloy providing excellent weldability, propellant compatibility and strength to weight ratio

12 p2242 A70-27108

Soviet collection of papers on Al weldable alloy including sheets, heat treatment, aging, mechanical properties, etc

14 p2596 A70-30960

Al-Zn-Mg weldable alloy composition, mechanical properties, heat treatment, aging effects, etc

14 p2597 A70-30964

Al weldable alloys for cryogenic applications, considering plasticity, brittleness and tensile and yield strengths at low temperatures

14 p2597 A70-30968

Al-Zn-Mg high strength weldable alloys rupture characteristics, analyzing crack distribution, stress raisers and weld defects

14 p2591 A70-30971

Superalloys commercial development, investigating strength, heat resistance and weldability of Fe- and Ni-based alloys [ASME PAPER W70-9.4]

15 p2760 A70-32335

Weldability, tensile and fatigue properties of Ti sheet alloys, discussing TIG welds

17 p3121 A70-34431

Nonweldable internal flaws detection containing oxides in steel slabs by neutron activation analysis

24 p4376 A70-45750

WELDED JOINTS

NT SPOT WELDS

Ultrasonic imaging system for flaw detection, analyzing welds

01 p0104 A70-10881

Piezoprobe parameters calculation for controlling angular welded connections of boiler assembly elements

02 p0300 A70-12481

Structure and segregation effects in Type 304L stainless steel weldments using transmission electron microscopy, optical microscopy and electron microprobe, comparing weld types

02 p0319 A70-12754

Residual stress distribution in butt joints during welding of sheet Nb measured by extensometer, noting annealing temperature effect on stress relieving

03 p0513 A70-14072

Postweld heating cycle for circular patch test to predict strain age cracking susceptibility in welded Rene 41

04 p0700 A70-15654

Inertia bonded and electron beam welded joints of Waspaloy compared for suitability in aircraft gas turbine engines

04 p0700 A70-15655

Thermophysical characteristics of annealed Ta and Mo alloy welded joints under electron beam and ray heating, noting use for short term tests

05 p0865 A70-17028

Microfissuring of Ni base alloy weldments as function of grain size produced by solution temperature

07 p1306 A70-18996

Welding techniques for Nb-stainless steel bimetal tubing for liquid metal containment, determining structural integrity and bond interface condition after thermal cycling

10 p1897 A70-25309

Nonuniform stress distribution along side fillet welds and in welded plates of lap joint, discussing tangential stresses and plate width

11 p2058 A70-25598

Numerically controlled gas tungsten arc welding, discussing tape programming, fixture design and fabrication for various welded metal joint configurations

11 p2058 A70-25661

Brittle fracture strength of welded joints in high strength steels

11 p2059 A70-25663

Porosity and intergranular crack formation in tungsten fusion welds using electron fractography

11 p2059 A70-25666

Mechanism and kinetics of intermetallic layers formation and growth in welded joints of unlike metals

11 p2067 A70-26594

Strain measurement over large steel plate surface ground to reasonable flatness and in welded joints by applying moire method

11 p2061 A70-26836

Computer analysis of degree of constraint against butt joint transverse shrinkage, using finite element method for stress analysis

12 p2239 A70-26854

Structural stability of friction welded joint between high temperature low alloy weld metal from CrMoV electrode and high temperature Cr steel

12 p2244 A70-28349

Hydride segregation in Ti alloy weldments made with unalloyed Ti filler metal, determining effect on mechanical properties

14 p2591 A70-30932

Al alloy welded joints delayed rupture tendency, describing constant load test method

14 p2591 A70-30969

Weld cracks in welded joints of Ni-Cr base alloys due to residual stresses during aging, recommending annealing for prevention

16 p2930 A70-33051

Weld brittleness during laser beam welding of Ni-Cu, Ni-Ti and Cu-Ti due to diffusion processes 16 p2916 A70-33052

Transverse contraction during butt welding of plates of steel and Ti and Al alloys, showing dependence on joint thickness 16 p2916 A70-33053

Al pressure-welded joints strength, investigating surface treatment role 16 p2924 A70-34340

High temperature heating and cooling effects on mechanical properties and structure of Ti welds, using notched bar impact specimens 17 p3098 A70-34423

Weld transition joints from explosive bonded Al-steel and Al-Cu composite plates, discussing mechanical and electrical properties 17 p3102 A70-35551

Low temperature effects on Ti alloys welded joints elasticity 17 p3126 A70-35637

Fatigue resistance of high yield strength steel weldments under uniaxial loading, describing cyclic behavior by S-N curve 18 p3278 A70-37114

Fatigue strength in pulsed tension of butt-welded tubular joints, evaluating test results statistically 19 p3433 A70-37357

Electron beam welding for thin steel, nonferrous metals and reactive metals sheets 19 p3436 A70-38073

Electron beam welding for instrument components including torsion shafts, heat sensing membranes, etc 19 p3436 A70-38074

Electron beam welding for thin copper, carbon and Cr-Ni steel sheets in precision mechanical and optical devices 19 p3436 A70-38075

Welded joint strain measurement by grating etching and moire fringe technique 19 p3428 A70-38513

Repair weld procedures effects on annealed Ti-Al-V weldments mechanical properties, examining defects in inert gas shielded arc welded joints [ASME PAPER 70-MET-1] 22 p4043 A70-42425

Bar butt current penetration welding, using HF continuous current seam welding process for joining finite length pieces 22 p4046 A70-43148

High strength Al alloys plate and welds, comparing tear notch tests at cryogenic and room temperatures 23 p4206 A70-44352

Brittle fracture of welded notched steels with different stress concentrations, using subzero tensile tests 24 p4347 A70-45732

Defect effects on welds fatigue properties in low carbon steel plates estimated, using radiograms 24 p4347 A70-45733

Elastoplastic properties of welded joints containing slag inclusions defects, determining sizes radiographically 24 p4347 A70-45734

WELDED STRUCTURES

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens 02 p0315 A70-11658

Overstress cycles sensitivity for welded specimens on basis of French fatigue damage line and Wohler S-N line 05 p0941 A70-16520

Optimal localized heat treatment of welded products, analyzing temperature fields and stresses during heating and cooling of ferromagnetic materials 07 p1294 A70-19477

Matrix stiffened nickel-chromium welding products featuring high tensile strength at room and elevated temperatures and high impact strength at cryogenic temperatures 08 p1508 A70-21488

Tensile and compressive strain measurements close to weld deposits, using moire fringe technique and mismatch grating 10 p1890 A70-24591

Diffusion bonding processes for Ti aerospace structural elements, describing electric blanket, roll and press bondings [SME PAPER AD-70-736] 12 p2242 A70-27089

Al heat treatable alloys for welded structures, considering stress corrosion resistance, aging effects, brittle and delayed rupture resistance, etc 14 p2596 A70-30961

Al-Mg-Zn alloy composition, mechanical properties and structure for various heat treatments, discussing welded structures stability, stress relief, corrosion resistance and tensile strength 14 p2597 A70-30966

Al alloy welded sheets strength and plasticity under biaxial tension, examining excess elastic energy effects on strain kinetics and rupture 14 p2597 A70-30967

Residual stresses near weld in spherical rocket motor casing constructed from maraging steel sheet,

discussing moire measurement and reduction treatments 15 p2744 A70-31926

Charpy impact test evaluation on hot rolled metal plates for low temperature welded structures 15 p2819 A70-32235

Ti sheet welded construction for transport aircraft fuselages, assuming use of electron beam and plasma arc equipment 17 p3198 A70-34452

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens 19 p3452 A70-38431

Concorde downstream thrust reversal nozzle, noting weight saving by use of welded stainless steel honeycomb construction 22 p4092 A70-43213

Nondestructive inspection methods for welded structures affected by stress corrosion 24 p4347 A70-45730

Carbon dioxide laser welding equipment and procedures, describing mechanical-electronic control system, target material-laser beam interactions, etc 02 p0310 A70-12752

Welding atmosphere purity effects on Li corrosion resistance of refractory metals in space power systems 04 p0709 A70-15627

Steel welding processes in thicknesses useful to future booster production 04 p0700 A70-15652

Laser characteristics relevant to microwelding and micromachining, discussing heat conduction based models limitations 05 p0857 A70-15999

Welding of satellite and spacecraft segments in space, discussing arc, electron beam, resistance, vacuum diffusion, cold pressure and brazing techniques 05 p0855 A70-16375

Polyamides chemical welding using HF heating to obtain optimum temperature distribution and to activate polymer reaction with crosslinking agents 06 p1091 A70-17316

Lasers industrial application to distance and flow rate measurement, automated machining and tunneling, inspection, die hole punching, welding, etc 06 p1078 A70-18431

Thermocouple vacuum gauge joined to Apollo lunar sample return containers (ALSR), describing two step welding procedure with transition cylinder 08 p1507 A70-21483

Al weld metal compositions and hydrogen content effects on weld porosity, locating hydrogen in weld by radioactive tracers 08 p1507 A70-21485

Automatic cladding method for submerged arc stainless steel welding, discussing delta ferrite to sigma phase transformation for surfacing with low ferrite stainless steel 08 p1508 A70-21489

Aluminum alloys hot cracking during welding, ascribing failure to combination of strain and susceptible microstructure 10 p1897 A70-25313

Book on metal joining techniques covering various welding and brazing processes 11 p2061 A70-26599

Surface sliding friction interactions in aluminum alloys friction welding 12 p2239 A70-26855

Aerojet engine minimum weight design, suggesting use of welding and brazing instead of nut-and-bolt joints in component fabrication [SAE PAPER 700319] 12 p2243 A70-27457

Weld quality relationship to aluminum surface contamination by hydrogen-containing compounds 13 p2407 A70-29108

Thick plate titanium alloy welds using filler wire to regulate chemical composition and plate phase constitution 13 p2435 A70-29456

Welding failure case histories, discussing design, materials and processes, fabrication and quality control integration 21 p3832 A70-40787

Solid state butt and lap joint welding of TD-nickel bar, evaluating performance by stress rupture and shear tests 21 p3832 A70-40790

Metallurgical interaction phenomena in welding zone of heat treated Inconel 600, using hot ductility testing and metallographic methods 22 p4046 A70-43150

Metal matrix composite structures tooling and fabrication processes, considering forming, joining, welding, machining joining, etc [SAE PAPER 700752] 24 p4348 A70-45873

WELDING MACHINES

Electron beam welding of AH-56A helicopter rotor hubs outside of vacuum chamber, discussing modifications of machine 04 p0699 A70-15651

Miniaturized program oriented automatic pipe/tube welding system for in-place joining of fluid systems, controlling timing functions and weld current sequence 09 p1692 A70-22795

Joining small components made of difficult to weld materials by percussive welding consisting of stationary and moving electrode actuated by pretensioned spring 10 p1894 A70-24298

Gas tungsten arc welding application broadened by introducing controlled droplet transfer process 10 p1896 A70-25308

Metal contact welding principles, materials, geometries and machines 10 p1897 A70-25310

DC arc facing welding device using vacuum to minimize pores, slag inclusions, cracks and defects 13 p3284 A70-28867

In-place gas tungsten arc fusion welding for joining small diameter precipitation hardenable aluminum tubing 14 p2590 A70-30930

Precision electron beam welding for metal joints, discussing equipment and quality control factors 19 p3436 A70-38072

Microwelding by pulsed ruby laser radiation, discussing characteristics and advantages 20 p3638 A70-40149

Tooling concepts providing gas shielding in mechanized open air arc welding of Ti, evaluating effectiveness by various mechanical tests 21 p3832 A70-40788

WENTZEL-KRAMER-BRILLOUIN METHOD

Plasma resonance excitation by small pulsed dipole in weakly inhomogeneous plasma determined using WKB solutions and stationary phase approximations 12 p2277 A70-27188

WKB method applied to ionospheric equations with strong wave coupling 15 p2725 A70-31857

Radial energy eigenvalue problem conversion into one dimensional by infinite set of transformations, considering WKB quantization condition 16 p2942 A70-33691

WKB method for asymptotic oscillatory solutions of nonlinear equations of relativistic fluid mechanics 19 p3403 A70-37587

WKB or eikonal approximation for waves and vibrations in inhomogeneous Euler-Bernoulli beams and plates and Timoshenko beams 19 p3536 A70-37700

Boundary layer problems with resonance solved by matched asymptotic expansions and WKB method 23 p4179 A70-43945

Quantum mechanics classical equations for complex velocity variable, obtaining asymptotic series solution by applying modified WKB method 24 p4378 A70-45274

U SPIN TESTS

WHISKER COMPOSITES

Mechanical properties of Al composites reinforced with alpha-silicon carbide sintered whiskers, discussing voids, fiber breakage and orientation effects 03 p0506 A70-13113

Al-Ni intermetallic whisker-reinforced Al microstructure and mechanical properties, studying effects of cold rolling 03 p0508 A70-13142

Whiskers and whisker products physical characteristics, available forms and types and compositing methodology, discussing utilization in plastics 05 p0873 A70-16611

Al alloy matrix composites with beta-SiC whiskers reinforcement, evaluating tensile and fatigue properties 08 p1523 A70-21856

Ceramic whisker and continuous filaments reinforced metals, discussing processing, properties, matrices selection of reinforced composites, etc 20 p3650 A70-39948

WHISKERS (SINGLE CRYSTALS)

Aluminum oxide whiskers/metal matrix composites, discussing metallic coatings effects on filament wetting, bonding and surface protection 01 p0117 A70-10480

Reinforcement of thermoplastic resins, considering single crystal whisker and carbon fibers and microspheres 01 p0129 A70-10774

BeO whiskers formation on burning Be droplets surface using scanning electron microscopy, noting temperature effects 02 p0318 A70-12641

Mechanized glycerine process for fibers and whiskers alignment on large scale at low cost 05 p0855 A70-16580

Rotary machine for classifying reinforcing fibers and whiskers with respect to length 05 p0855 A70-16583

Whiskers and whisker products physical characteristics, available forms and types and compositing methodology, discussing utilization in plastics 05 p0873 A70-16611

Tensile properties variations of Co whiskers grown by reducing cobaltous bromide in hydrogen-argon mixture 07 p1306 A70-19071

Heat resistant fibers fabrication and properties for composite materials, noting metal whiskers, C, B, Be and alumina 07 p1318 A70-19802

Vapor-liquid-solid nucleation mechanism of alpha-aluminum oxide filamentary single crystal growth, suggesting combination with suboxide condensation and disproportionation mechanism 07 p1313 A70-19890

Sapphire whisker-Al composites fabrication methods using air extrusion techniques and semiautomatic methods for fiber alignment, discussing elastic modulus, tensile strength, etc 07 p1314 A70-19956

Silicon carbide whiskers end structure using field emission patterns 08 p1528 A70-21551

Silicon carbide whiskers properties and applications compared with other reinforcing fibers 11 p2070 A70-26340

Statistical theory of material strength applied to composite materials reinforced with whiskers and noncontinuous fibers 15 p2763 A70-32833

Dislocation diffusion effects on strength of whiskers and fine grained polycrystals 16 p2934 A70-34327

Whisker diode coupling to polarized IR laser beam by orientation based on antenna theory 17 p3048 A70-35902

SiC whiskers X ray diffraction studies of crystal structure, suggesting single crystal permanent deformation at ambient temperatures 19 p3455 A70-37941

Whiskers and filaments properties compared for fiber reinforcement applications in composite materials production 24 p4356 A70-45167

WHISTLER RECORDERS

VLF recordings and X ray flux measurements simultaneous analysis indicating evidence of relation between dawn chorus and electron precipitation, noting ELF whistler development 02 p0293 A70-12689

Whistler activity continuous recording by autocorrelation method using electronic analog computation with fixed delay time 10 p1886 A70-25281

Ionic temperature difference from Arecibo data indicated in Injun 3 and Alouette 1 sonograms of proton whistlers propagation time, noting Doppler shift role 13 p2372 A70-29928

Magnetospheric thermal plasma studies via ground based whistler method, identifying radial and longitudinal irregularities in electron density, bulk motion and plasmopause position and displacements 22 p4021 A70-43281

WHISTLERS

Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection 01 p0082 A70-11486

Plasma concentration diagnostics in magnetosphere based on hydromagnetic whistlers/pearls/dispersion 01 p0084 A70-11554

Charged particle self resonant motion in field of plane electromagnetic wave, showing trapped particles existence in whistlers 02 p0256 A70-12116

Whistlers paradoxical behavior in bounded magnetoplasmas, discussing double reflection and wave propagation 02 p0263 A70-12733

Poynting flux direction for proton whistlers determined from Injun 5 observations, obtaining data on source region and propagation in ionosphere 03 p0477 A70-13987

Whistler mode instability due to anisotropic charged particle velocity distribution, establishing general onset conditions for variable density cold plasma containing hot electrons 03 p0537 A70-14378

Nonducted VLF walking trace whistlers and Doppler shifts in fixed frequency transmissions identified on OGO midlatitude spectrographic records 04 p0649 A70-15116

Magnetospheric observations of whistler mode emissions by OGO 1 satellite over VLF and LF ranges 04 p0649 A70-15117

Transmission and reflection coefficients of propagating whistler modes for model ionosphere 05 p0837 A70-15880

High and medium whistler activity in Italy correlated with weather situation in South Africa 05 p0839 A70-16317

Whistler mode wave propagation in collisionless Vlasov plasma along nonuniform magnetic field 05 p0889 A70-16533

Charged particles motion in field of whistler mode wave packet, discussing trajectories 06 p1118 A70-17377

VLF and ULF whistler modes propagating along geomagnetic field-line paths in magnetosphere, studying cyclotron resonance amplification 06 p1118 A70-17379

Whistler amplification in magnetosphere for electron interaction with background plasma to produce wave growth, discussing stability of various anisotropic velocity distributions 06 p1059 A70-18533

Whistlers role in ionospheric temperature, magnetospheric electron density and ionospheric composition determination 07 p1347 A70-19189

HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe 07 p1348 A70-19551

Harmonic ion cyclotron resonances associated with proton whistlers observed from OGO-4 satellite VLF recordings 07 p1268 A70-19630

Cold plasma approximation of whistler excitation of lower hybrid resonance at wake of body moving through ionosphere, comparing results with Alouette satellite observations 07 p1276 A70-20425

Small dispersion whistlers characteristics and propagation at midlatitudes based on observation at Tohokata, Japan 08 p1491 A70-21713

Whistler type electromagnetic waves excitation by electron beam in plasma, noting intensity dependence on electron frequency 08 p1554 A70-21804

Ion cyclotron whistler in Injun 5 satellite VHF radio noise data 09 p1638 A70-23499

Whistler mode VLF emissions stimulation mechanism 13 p2401 A70-29930

Whistler mode wave packets propagation in hot inhomogeneous collisionless plasma immersed in nonuniform ambient magnetic field 13 p2468 A70-29931

Whistler instability examined on gyrating electron beam interaction with cold background plasma propagating parallel to magnetic field 13 p2468 A70-29932

Collision effect on phenomena associated with ion cyclotron whistler formation, considering ionospheric day time model 13 p2468 A70-29933

Magnetic field measurement of VLF wave propagating in whistler mode in magnetosphere by satellite FR-1 13 p2401 A70-30054

HF ion-acoustic noise /whistlers/ during turbulent heating of plasma, using matched magnetic probe 15 p2777 A70-31458

Dynamic spectral characteristics of LF whistler signals for outer ionosphere electron profile determination, using satellite observation 15 p2729 A70-32081

Refractive index equation for Whistler propagation in weakly drifting magnetoplasma 16 p2959 A70-34224

Electron density large scale structure in magnetosphere identified from whistlers recorded at Antarctica near sunspot minimum 18 p3311 A70-36012

Magnetospheric plasmopause duskside bulge dynamic behavior during substorms, using whistler data 18 p3312 A70-36013

Whistler density variability correlated with solar activity during IQSY 19 p3462 A70-37924

Whistler VLF radio observations of sudden magnetic impulses in plasmasphere during storms, using ground based magnetometers 20 p3620 A70-39330

Whistler mode wave propagation amplitude, polarization and dispersion in lower ionosphere, discussing electric field experiment with Nike-Tomahawk sounding rocket 20 p3622 A70-39456

Electron loss by resonant interaction with whistlers in nonuniform magnetic field, taking Fokker-Planck equation as distribution function 23 p4237 A70-44052

WHITE BLOOD CELLS

Hyperoxia effects on rats in vivo white blood cell counts 24 p4297 A70-45340

WHITE DWARF STARS

White dwarf mass changes during cooling, describing white dwarf collapse-type I supernova outbursts relationship 01 p0174 A70-10197

Pulsating very dense white dwarfs models noting general relativity 01 p0176 A70-10320

Photometric data for white dwarf low luminosity stars listed in color classes and proper motion fields 01 p0187 A70-11331

Intermediate band four color photometry of white dwarfs, considering hydrogen line blocking and H delta line 01 p0188 A70-11335

White dwarf luminosity functions based on birth rate, white dwarf space density in solar neighborhood and possible red degenerate stars deficiency 01 p0189 A70-11339

White dwarf spectra interpretation based on model atmosphere method, discussing chemical composition, low luminosity high pressure atmospheres, electron density, etc 01 p0189 A70-11340

Cooling time estimation for white dwarf stars with ion component undergoing condensation, based on plasma thermodynamic properties 01 p0189 A70-11341

High luminosity white dwarfs possible evolution from planetary nebulae, discussing plasma neutrino processes 01 p0189 A70-11342

White dwarfs formation in close binary systems ascribed to mass exchange between components, describing evolutionary followup of primary from main sequence by model 01 p0189 A70-11343

Final state of matter resulting from star contraction, white dwarfs development and neutron stars problem, explaining hydrostatic equilibrium 02 p0370 A70-12085

Light variation curves for distorted white dwarf hypothetical secondaries in close binary systems calculated by integrating monochromatic fluxes 03 p0567 A70-13323

- Eddington equation for white dwarf pulsation solved by treating eigenfunctions as differential moment of inertia functions 04 p0751 A70-15050
- Angular velocities and equilibrium of rotating neutron stars compared with white dwarfs 07 p1376 A70-18911
- Magnetic moment associated with Landau levels in magnetic induction in electron gas and magnetic fields of white dwarfs and neutron stars 09 p1752 A70-22306
- Low mass star evolution from helium burning to white dwarf, describing red giant and mass loss stages in model 10 p1946 A70-24982
- Faint violet stars in southern galactic latitudes found during scanning of two color plates including halo stars, subdwarfs, white dwarfs and quasi-stellar galaxies 10 p1949 A70-25248
- Thermal explosion in degenerate nucleus of white dwarf due to formation of laminar energy source in presence of hydrogen 11 p2115 A70-26577
- Stellar plasma neutrino pair emission, comparing photon neutrino coupling with current current coupling theory and white dwarf evolution 12 p2297 A70-26976
- Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, neutron stars, white dwarfs, etc 15 p2795 A70-31454
- Magnetic fields of DA dwarfs observed with photoelectric polarimeter, noting no fields observable 17 p3154 A70-34537
- Hydrogen abundance in white dwarfs, discussing inconsistencies in mass and bolometric magnitude models for Sirius and Eri B 17 p3170 A70-35389
- White dwarf star circular polarized light, indicating strong magnetic field 20 p3701 A70-39001
- Electrical and thermal conductivities in white dwarf stars cores and neutron stars outer layers, calculating electron-photon collisions transition probability 20 p3702 A70-39016
- Equilibrium theory of white dwarfs, neutron and hyperon stars, deriving equations for nonrotating objects composed of degenerate cold electron or neutron gas 20 p3704 A70-39472
- Eclipsing binary with very hot white dwarf, discussing effective temperature and photometric observations 21 p3889 A70-41158
- White dwarf stars continuum circular polarization as function of time and wavelength, emphasizing magnetic star search 24 p4410 A70-45776
- WHITE NOISE**
- NT THERMAL NOISE**
- Optimal nonlinear filtering for nonlinear dynamic system subjected to additive white Gaussian noise with corrupted observations, using successive linearization scheme 03 p0461 A70-14340
- Frequency monitor design, analyzing relationships between time constants, gain, etc, emphasizing white noise filtration 07 p1227 A70-18991
- Improper integrals appearing in cross correlation of responses of two single degree of freedom systems to bandwidth limited white noise, deriving Laplace inversion formulas 07 p1236 A70-20067
- White noise and nonlinear effects in telemetry RF links, analyzing received process to phase coherent receiver 08 p1460 A70-20823
- Optimal amplitude modulated radio signal reception on white and narrow band background noise, using nonlinear filtration and phase locked control 09 p1633 A70-22416
- Nonlinear system with piecewise linear spring characteristic response to stochastic excitation of white noise type process, discussing technical stability 10 p1918 A70-25323
- Sequential filter equations for nonlinear system dynamics and observational model with linear estimator, comparing difference between white and colored noise filter results 11 p2024 A70-26126
- [AIAA PAPER 69-840] Rayleigh and m fading signals spectral location in additive white Gaussian noise, allowing predetermined or variable channel observation time 11 p2010 A70-26268
- Memoryless input discrete noisy channels essential equivalence to white Gaussian channel for rates above capacity using extreme value theory 11 p2010 A70-26326
- Random vibration isolation for two degrees of freedom model system investigated statistically, assuming wide band white noise 11 p2139 A70-26416
- Noise level influence on optimal recognition of non-stationary random processes in white noise 13 p2369 A70-29729
- Nonlinear optimal filtration and adaptive quasi-coherent reception of Markov signals on white noise background 13 p2369 A70-29731
- Quasi-optimal sequential detection of phase modulated signal of varying frequency on white noise background, using Markov theory 13 p2369 A70-29732
- Nonsingular detection and likelihood ratio for random signals in white Gaussian noise 14 p2551 A70-31118
- Optimal linear filter analysis from singular optimal control viewpoint, considering white and correlated measurement noise 16 p2885 A70-33320
- Linear sequential Kalman filter for time correlated noise without state augmenting and measurement differencing demanding less computer sizing 16 p2887 A70-33350
- Prediction of polynomial signals in white Gaussian noise, using discrete data 16 p2866 A70-34065
- Optimal temporal and spatial-temporal resolution for unknown parameter of interfering signal on white noise background 17 p3048 A70-35680
- Digital bit synchronization phase locked loop steady state and transient performance in white Gaussian noise 21 p3802 A70-41352
- General linear /Kalman/ sequential filter to account for finite correlated white noise without state vector augmentation or measurement differentiation 21 p3828 A70-41735
- Digital filtering of sampled narrowband sinusoidal signal embedded in wideband white noise, assessing hard clipping effect on performance by simulation on digital computer 21 p3791 A70-41948
- Unipolar pulse frequency modulation system with white noise input, deriving output power spectral densities 21 p3793 A70-42225
- Signal shape optimization by minimizing dispersion in temporal position estimates for radio pulse in presence of additive white noise 23 p4161 A70-43961
- Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals 23 p4197 A70-44557
- [AIAA PAPER 69-838] Nonlinear filtering for linear parabolic distributed parameter systems with white noise, considering stochastic boundary value problem 23 p4177 A70-44905
- Intense white pulsed jet engine noise effects on cochlea bio currents in cats 23 p4157 A70-45076
- Quantum detector with impinging EM field, discussing photoelectron counting distribution and signal with white noise 24 p4312 A70-46051
- Optimal noiseless linear information feedback estimation for additive white Gaussian noise channels, applicable to digital transmission 24 p4313 A70-46064
- WHITHAM RULE**
- Quasi-transverse constant profile wave in finite elasticity with isothermal shock at discontinuity compared to Whitham breakdown 10 p1956 A70-24191
- Supersonic transport sonic boom theory and effect reduction, discussing Whitham rule, bow shock, overpressure, engine and aircraft design and shock wave control 16 p2843 A70-34263
- Multiphase modes for nonlinear dispersive waves under large scale interaction, extending Whitham theory 23 p4217 A70-43943
- WHITTAKER FUNCTIONS**
- Wolf numbers Zurich time series monthly values, evaluating mathematical expectation with probability smoothing by Whittaker operator 15 p2802 A70-32489
- WICKS**
- Na heat pipe with wick structure consisting of wire rods observed for ease of wick rewetting, dryout limit reproducibility, etc 01 p0216 A70-10967
- [AICHE PREPRINT 7] Dry and water-saturated sintered fiber metal wick thermal conductivity, obtaining semiempirical correlations for solid and fluid phases and void fraction 21 p3945 A70-41041
- WIDE ANGLE LENSES**
- Wide angle electronic camera for astronomical photometry designed to seek photometric standard stars remote from nebular regions 09 p1681 A70-23313
- Aerial super wide angle photography for mapping, discussing cost reduction, accuracy requirements and photographic techniques 10 p1891 A70-24756
- Fisheye projection of undistorted images obtained by fisheye lenses onto spherical screen from spherical center for hemispheric display, minimal overhead occlusion, etc 10 p1892 A70-24951
- Lens systems configuration and aberration, determining suitability for wide angle oculars of Galilean telescopes 19 p3420 A70-37262
- WIDEBAND**
- U BROADBAND**
- WIDEBAND COMMUNICATION**
- Man machine system consisting of manned station controlling distant spacecraft via wideband radio link 02 p0229 A70-12145
- Wideband satellites bandwidth and aperture limits direct measurement based on ground monitoring of CW signals, taking into account ionospheric dispersion 02 p0261 A70-12577
- Transversal equalizer for wideband radar systems distortion reduction 02 p0261 A70-12578
- Remote data processing and wideband data transmission between France and U.S. via telecommunication satellites, discussing error detection and correction 02 p0263 A70-12612
- Phase distortion and Faraday rotation of wideband radio waves propagating through ionosphere 03 p0449 A70-13584
- Incoherent reception of wideband signals transmitted through multibeam channel with changing random parameters 05 p0812 A70-16248
- Wideband transmission of photographic reconnaissance information over long distances using Initial Defense Communication Satellite Program satellites 06 p1006 A70-17346
- AM baseband telemetry system for wideband signal transmission emphasizing SSB, DSB and quadrature multiplexed DSB modulation techniques 06 p1007 A70-17435
- Wideband cophased horizontal antennas with active dipole reflector arrays, describing feeder arrangements involving use of resistors 06 p1021 A70-17673
- Optical transmission technology for aerospace launch operations investigated on wideband communication systems projects involving use of gallium arsenide lasers and diodes 09 p1640 A70-23776
- Wideband transmission media for global communication networks, comparing submarine cables and satellites based on economic tradeoff in terms of circuit density and distance 11 p2001 A70-25475
- Low noise wideband uncooled preamplifier for small unattended satellite communication terminals, discussing theory, design and performance 11 p2016 A70-25485
- [AIAA PAPER 70-419] Superwideband dipole antenna array reproducing radiation patterns in horizontal plane for signal polarization 12 p2196 A70-27539
- Single and multistage parametric amplifiers for broadband communications, noting nonideal circulator characteristics by scattering parameter and signal flow graph 12 p2197 A70-27933
- Wideband FM signals transionospheric propagation, calculating output spectrum, signal to distortion ratios and signal to noise ratios 13 p2367 A70-29588
- Earth resources satellite real time wideband relay communication link to ground station 13 p2368 A70-29614
- [AIAA PAPER 70-326] Wideband PCM/FM discriminator detection, predicting effects of predetection and postdetection filtering on system performance 14 p2558 A70-31192
- Traveling wave light modulator with 15 GHz bandwidth using cubic ZnS crystal with anomalous response 16 p2876 A70-33403
- Wideband analog signal data transmission, evaluating messages accuracy in terms of error probability 18 p3228 A70-36623
- Satellite wideband transmission of ionosphere data, monitoring amplitude and phase of phase-coherent CW signals from geostationary satellite 20 p3590 A70-40483
- Space-to-ground link wideband digital laser communications system design and performance tests 21 p3787 A70-41331
- Wideband millimeter wave communications experiments for satellite applications, considering ATS-5, radiometry and future lunar base 21 p3787 A70-41337

Wideband detection of FSK transmissions in three component two path channel, obtaining channel bit error probability 21 p3792 A70-42176

WIDMANSTATTEN STRUCTURE
Widmanstatten structure in iron meteorites relationship to cooling rate and meteoritic origin 04 p0751 A70-15039
Fe-Ni-P phase diagrams for high temperatures, providing phase equilibria data for Widmanstatten pattern in iron meteorites 15 p2762 A70-32391

WIDTH
Width corrections in calculation of stress intensity factor for sheet with central crack in uniform uniaxial tension 13 p2510 A70-28608

WIENER HOPF EQUATIONS
Wiener-Hopf equation development and Kalman filter derivation using Leibnitz equation for differentiating integral 04 p0660 A70-15338
Stick-slip problem for motion of free jet at low Reynolds numbers by Wiener-Hopf technique, considering two dimensional Newtonian jet without gravity 11 p2041 A70-26554
Open waveguides and small horns theory, using Wiener Hopf method for radiation calculation 17 p3051 A70-35065
Axisymmetric potential problem of plane circular electrified disk in coplanar gap formulated in triple integral equation, obtaining Wiener-Hopf solution 22 p4080 A70-42632

WIGHTMAN THEORY
U FIELD THEORY (PHYSICS)
U QUANTUM THEORY
U RELATIVISTIC THEORY

WINCHES
Helicopter hoist rescue system, considering helicopter power, cable length, pilot visibility, etc 09 p1610 A70-22341

WIND (METEOROLOGY)
NT GEOSTROPHIC WIND
NT GUSTS
NT JET STREAMS (METEOROLOGY)
NT SQUALLS
NT WINDS ALOFT
Derived winds, wind shears and densities accuracies obtained by radar meteor trail technique 07 p1237 A70-20281
Wind and atmospheric temperature variations on Mars, Venus and Mercury interpreted from observational data in terms of earth atmospheric processes 09 p1762 A70-23127
Statistical analysis of atmospheric wind and temperature variables relationships to high altitude clear air turbulence observed by U-2 flights 12 p2264 A70-28092
Tidal forces effect on wind system in lower ionosphere, using Navier-Stokes equation for lower layer and Euler equations for upper layer 14 p2571 A70-30232
Ionospheric investigation techniques, considering ionization balance, winds and turbulence 14 p2580 A70-31259
Atmospheric temperature and wind data before, during and after solar eclipse of 7 March 1970, using ARCAS meteorological rockets 16 p2977 A70-33828
Tidal forces effect on wind system in lower ionosphere, using Navier-Stokes equation for lower layer and Euler equations for upper layer 24 p4331 A70-46307

WIND CIRCULATION
U ATMOSPHERIC CIRCULATION

WIND DIRECTION
Zonal circulation model of atmosphere below altitude of 200 km using rocket, meteor and ionospheric drift observations 02 p0328 A70-12388
Momentum considerations in thunderstorm dissipation by disrupting organized cloud base updraft structure 06 p1100 A70-18570
Vertical wind distribution associated with thunderstorm outflow, measuring wind direction oscillations at Kennedy Space Center 06 p1101 A70-18576
WINDAV anemometer used as low power wind direction and velocity transducer for tethered balloon 08 p1494 A70-20822
Numerical procedure for determining horizontal wind from geopotential height in barotropic model, discussing solutions for resultant simultaneous equations 08 p1540 A70-21968
Wind HF inclination variations in lower atmosphere, considering turbulent kinetic energy dissipation and buoyancy production 09 p1714 A70-22355
Stratospheric equatorial wind period phases correlation with central European westerlies frequency, intensity and persistency, noting seasonal differences 10 p1913 A70-24950

Pulsed Doppler radar technique for monitoring and diagnosing severe storms, obtaining wind velocity and direction within cloud 10 p1844 A70-25242
Wind velocity and direction and diffusion coefficients measurements by artificial luminous clouds, injecting appropriate reagents from rockets 11 p2075 A70-25918
Wind distribution by wind frequency counter controlled by electrical direction indicator, discussing design, operation and accuracy 13 p2445 A70-29469
Wind velocity and direction determination from artificial luminous clouds photographs, calculating topocentric coordinates 18 p3252 A70-36991
Hovercraft wind directional stability and control by cam operated fin-tab assembly 19 p3357 A70-38942
Cloud motions from IR measurements within overlap region of adjacent Nimbus II orbits compared with wind vectors from constant pressure charts 20 p3665 A70-40068
Wind directions in free atmosphere and on ground, discussing deflections by orographical factors in Upper Rhine plain 22 p4065 A70-43245
Vertical velocity effects on ionospheric horizontal wind magnitude and direction, solving integral equations system by successive approximations 23 p4188 A70-44057

WIND EFFECTS
Diurnal variation for structure and energy balance of thermosphere, noting effect of global wind pattern 01 p0074 A70-10592
Aerodynamic load distribution due to wind action on elastic structures, calculating various ratios between wind and critical divergence velocity 02 p0385 A70-11913
Atmospheric effects on SST, discussing turbulence, temperature, wind, cloud cover, hail, toxic gases, etc 02 p0325 A70-12218
Atmospheric environment features bearing on supersonic transport aircraft operations and forecasting, discussing wind and temperature effects 02 p0325 A70-12220
Electromagnetic drifts and neutral air winds effects on F 2 region derived from electron continuity equation, using Jacchia model atmosphere 04 p0677 A70-14966
Slender delta wing aircraft dynamic behavior under vertical and lateral gusts, particularly during landing approach [DGLR-69-52] 04 p0623 A70-15145
Unsteady flows effects on aircraft longitudinal motion, flight stability and control, discussing horizontal and vertical effects of rough air 04 p0623 A70-15172
Numerical method for calculating gust effect on wing of complex planform at subsonic speeds by converting continuous to discrete processes 04 p0618 A70-15242
Radar signal amplitude fluctuations reflected from disturbed sea water surface, noting wind induced waving stochastic nature influence 05 p0812 A70-16246
Atmospheric turbulence characteristics related to drag loads of tall spacecraft structures by boundary layer wind model 06 p1160 A70-17165
Wave surface elevation and velocity fluctuations in ocean upper layer under wind waves, discussing correlation coefficients between vertical and horizontal velocity components 06 p1097 A70-17792
Slender body theory for steady state aerodynamic characteristics of high speed ground vehicles with arbitrary cross sections, discussing side wind [AIAA PAPER 70-139] 06 p0973 A70-18155
Sporadic E layer formation by vortical winds, discussing effect on ionospheric electron concentration distribution 07 p1267 A70-19454
Wind compensation for wind effects with elevation angle in ballistic rocket launching problems 07 p1394 A70-19718
Cosmic rays effect on atmospheric temperature and wind, discussing planetary distribution of neutron component of radiation intensity 07 p1373 A70-20346
Statistical characteristics of random wind effects on radio telescopes tracking cosmic object 08 p1586 A70-21062
Glider pilots flight above cloudstreets in clear sky, discussing situation for wave soaring over flat ground 10 p1805 A70-24583
Ionospheric plasma drift vertical and meridional velocity components latitudinal distributions in F 2 region, considering wind effects in upper atmosphere 11 p2045 A70-25931
Saturation of self induced thermal lens resulting from thermal distortion of carbon dioxide laser radiation in wind 11 p2063 A70-26401

Correction factor for finite span effect on unsteady wing lift or moment during sinusoidal gusts or vertical oscillations 12 p2155 A70-27200
Booster control system reducing maximal wind-induced bending torques, examining booster response to aerodynamic forces 13 p2500 A70-28413
Stochastic processes optimal control theory application to launcher attitude control under wind disturbance 13 p2501 A70-28428
Wide range wind compensated launcher settings for unguided rockets using wind-weighting model and iterative procedure requiring real time computation 13 p2503 A70-28528
Thrust vector control application to Skylark vehicle to eliminate wind and thrust misalignments effects 13 p2503 A70-28676
Aeronautical navigation under various wind velocity conditions, studying flight times for closed flight paths 13 p2448 A70-28750
Collection of papers on wind effects on launch vehicles covering aerodynamics, airframes, guidance and control, wind-vehicle interactions, atmospheric turbulence, etc [AGARDOGRAPH-115] 13 p2504 A70-28751
Wind load aerodynamics effects on launch vehicle flight control systems design [AGARDOGRAPH-115] 13 p2504 A70-28753
Stability and wind response determining spacecraft structure forces and bending moments [AGARDOGRAPH-115] 13 p2504 A70-28754
Wind effects on rigid launch vehicle guidance and control system design, using model incorporating structural bending and fuel sloshing [AGARDOGRAPH-115] 13 p2448 A70-28755
Wind-launch vehicle interaction in flight, using equations of motion for aerodynamic loads [AGARDOGRAPH-115] 13 p2504 A70-28756
Spacecraft parameters role in response to atmospheric disturbances, considering model design and control systems effects [AGARDOGRAPH-115] 13 p2504 A70-28757
Horizontal geomagnetic force variations, considering ionospheric wind effects on ions in transition layer 13 p2402 A70-30057
Sun glitter on sea surface from space photographs, considering wind and sea conditions effect on shape and brightness of patterns 14 p2572 A70-30345
Aerodynamic and structural configuration effects on spacecraft inflight wind load calculations, showing Apollo interface lateral bending 14 p2653 A70-30585
Space vehicle response to in-flight wind turbulence, describing operational procedure for launch advisability determination 14 p2653 A70-30587
Launch vehicle design, considering tradeoffs between wind effects and analysis time 14 p2653 A70-30589
Neutral winds effect on F region vertical ion drifts derived from continuity equation, noting diurnal and seasonal variations 14 p2574 A70-30738
Lower ionosphere electron densities seasonal variations relationship to atmospheric circulation 14 p2574 A70-30742
Kelvin wave propagation numerical model, showing influence of mean zonal wind vertical and horizontal shear in lower stratosphere 15 p2771 A70-32370
Solstitial solar quiet currents along magnetic lines of force in magnetosphere, discussing ionospheric wind asymmetry effects 17 p3077 A70-34949
Ionospheric E region winds correlations to lower atmosphere meteorological phenomena 17 p3077 A70-34950
Nighttime E region molecular ion production rate estimation, taking into account windshear effect 18 p3245 A70-36022
Sporadic E layer formation by vortical winds, discussing effect on ionospheric electron concentration distribution 18 p3249 A70-36928
Ionospheric electric current distribution response to horizontal wind induced emf, using lunar tidal wind models 19 p3415 A70-38386
Isolated cumulus clouds formation numerical simulation, determining movement rates relationship to external wind speed 19 p3463 A70-38756
Automatic control systems for aircraft approach to landing path and subsequent stabilization on trajectory, compensating for cross wind action and radio noise disturbances 20 p3561 A70-39842
Gust field in lowest atmospheric layer over homogeneous terrain, deriving statistical models and simulating effects on XV-5 V/STOL aircraft 21 p3750 A70-40784

WIND MEASUREMENT

Aircraft flying at constant speed in circular orbits, calculating flight path under effect of uniform velocity wind 21 p3750 A70-40920

Aeolian regime of Venus surface resulting from high surface temperature and pressure, discussing spurious radar echoes, dust and sand transport and deposition 21 p3885 A70-40929

Gliding parachute air cargo systems using nonproportional and proportional automatic manual control, estimating wind effects on ground track and impact computer simulation [AIAA PAPER 70-1193] 21 p3753 A70-41823

Ionospheric electric field origin theory in terms of charge separation due to neutral wind drag 22 p4016 A70-42785

Aircraft control, considering wind gradient effects on takeoff, ascent and overflight conditions 22 p3962 A70-43082

Thermal defocusing and deflection of light beam by lateral wind effect in absorbing media 23 p4200 A70-43950

Wind induced modification of E region ionization density profiles, using coupled continuity equations for ion species 23 p4214 A70-44040

Wind generated water waves spectral characteristics at low momentum levels 23 p4215 A70-44273

Mathematical modeling of atmospheric gusts in stratosphere, mountain wave and thunderstorm conditions relevant to aircraft design 24 p4371 A70-45420

WIND MEASUREMENT

NT WIND VELOCITY MEASUREMENT

Vertical wind observations during lower ionosphere wind measurements by Na release method, discussing gravity effects and standing waves 01 p0078 A70-11213

Crosspath wind motion measurement by dual arm noncoherent bistatic radio troposcatter link 02 p0326 A70-12290

Incomplete historical data to infer state of atmosphere based on global circulation model, noting tradeoff of temperature for wind and time for space 02 p0291 A70-12296

Response characteristics of height-based and time-based wind reduction techniques for meteorological rocketsondes 05 p0879 A70-17101

Remote sensing of winds and atmospheric turbulence by cross correlation of passive optical signals, discussing results for power spectrum of fluctuations and winds 06 p1072 A70-18553

Meteorological data from radiosonde and radar wind observations during Indian Ocean expedition of research vessel Meteor 07 p1329 A70-19350

Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower 07 p1285 A70-19835

Winds above 200 km measured from vapor trail observations compared to winds deduced from satellite orbital changes and theoretical models 07 p1269 A70-19950

PWN-8B meteorological rocket system for synoptic investigation of stratospheric circulation, describing sensor system deployment for descent measurements of wind and temperature 07 p1395 A70-20255

Kookaburra meteorological rocket system for sounding stratospheric circulation, describing instrument payload deployment for descending wind and temperature measurements 07 p1395 A70-20257

Rocket-borne radar chaff wind sensor synoptic application above 65 km, describing low fall velocity 07 p1237 A70-20258

Parachute wind sensors used in Arcas and Loki sounding rocket systems for stratospheric sounding, describing position data acquisition via radar tracking 07 p1395 A70-20259

ROBIN superpressure mylar spherical falling balloon deployed from sounding rocket apogee for density and wind measurements via radar tracking 07 p1194 A70-20260

Meteorological rockets fired in Spain, obtaining stratospheric wind and circulation data 07 p1396 A70-20278

Numerical procedure for determining horizontal wind from geopotential height in barotropic model, discussing solutions for resultant simultaneous equations 08 p1540 A70-21968

Atmospheric boundary layer wind and temperature analysis according to similarity scheme for mathematical modeling of atmosphere 08 p1540 A70-21974

Aerodynamic subsonic and supersonic wind tunnels parameter measurement methods including static and total pressure, current direction, velocity, density, etc 09 p1674 A70-22314

Wind HF inclination variations in lower atmosphere, considering turbulent kinetic energy dissipation and buoyancy production 09 p1714 A70-22355

Tower influence of wind speed and direction measurements, comparing 150 meter meteorological tower and scale wind tunnel model 09 p1661 A70-22964

Boundary layer atmospheric turbulence at Kennedy Space Center obtained for engineering spectral model, discussing energy balance 10 p1911 A70-23926

Kalman filtering applied to moving balloon position and velocity estimates related to upper atmosphere wind measurements by balloon-satellite experiment 11 p2025 A70-26206

Remote monitoring of atmospheric wind and turbulence by cross correlation passive techniques, measuring heat and humidity fluxes 12 p2230 A70-26948

Spatial-temporal distribution of wind swell HF components measured by two dimensional antenna array fed by DC signals 12 p2263 A70-27516

Velocity distribution and structure of irregular winds near 100 km measured by differencing chemical release wind profiles 12 p2264 A70-28002

Sounding rockets impact dispersion associated with wind measurement errors and thrust misalignments, discussing correction via reduced aerodynamic stability and initial rocket spin 13 p2503 A70-28677

Upper atmospheric wind evaluation in radar measurements by radio sounding technique, discussing equipment design 13 p2445 A70-29468

Wind distribution by wind frequency counter controlled by electrical direction indicator, discussing design, operation and accuracy 13 p2445 A70-29469

Wind measurement with two spaced coherent-pulse radar stations for probing same region of meteor zone 14 p2582 A70-30317

FPS-16/Jimsphere wind profiles measurement, discussing effect of data smoothing on accuracy and resolution 14 p2607 A70-30569

Three camera method for studying upper atmosphere winds via smoke trails providing wind velocity, earth coordinate data and error indication 14 p2607 A70-30572

Parachute altitude wind sensor /PAWS/ project for real time wind profile determination, using modified HASP I sounding rocket 14 p2585 A70-30577

Mesospheric levels wind oscillations in Spanish range of Arenosillo measured by meteorological rockets during February 1970 15 p2723 A70-31653

Continuous variation measurements of wind tunnel parameters minimizing testing time, discussing flow characteristics measurements during angle of attack variation 17 p3057 A70-34775

High altitude clear air turbulence structure and evolution examined by high power radar and wind and temperature vertical soundings 18 p3228 A70-36483

Upper atmosphere wind, density, temperature and pressure from Soviet meteor data 19 p3412 A70-37651

Radiosonde technique for locating atmospheric turbulence regions and estimating vertical air movement component in associated gusts 19 p3427 A70-38246

Wind speed pulsations measurement at atmospheric boundary layer and different heights, analyzing turbulent energy intensity 19 p3463 A70-38757

Wind motions from meteor trails observation during IQSY, tabulating amplitudes and phases of constant, diurnal, semidiurnal and 8-hr components 19 p3526 A70-38788

Highly localized clear air turbulence at aircraft flight level over Mediterranean, noting simultaneous temperature rise 19 p3463 A70-38948

High altitude wind measurement during daytime using photometer for detection of Li trail 20 p3630 A70-39486

Acoustic piezoceramic anemometer for steady state measurements of wind turbulence on meteorological tower 20 p3634 A70-40342

Wind temperature measurement, taking Bernoulli effect and kinetic theory into account 22 p4009 A70-42525

Ocean roughness determination from satellite photographs sunglint patterns, indicating surface wind speeds 22 p4014 A70-42770

Wind tunnel response tests of cup, vane and propeller wind sensors, determining wind direction

and speed parameters, damped and natural frequencies, etc 22 p4030 A70-42914

Gyro system determining aerodynamic moment integral vector in wind measurements 24 p4340 A70-46402

WIND PRESSURE

Coriolis parameter effects on stream and pressure functions in geostrophic wind equation 22 p4065 A70-43167

WIND PROFILES

Spherical earth wind field correlation matrix, relating scalar fields to isotropic vector field 01 p0135 A70-10204

Cape Kennedy vertical wind speed profiles measured by spectral analysis using fast Fourier transform method 02 p0325 A70-12285

Solar daily atmospheric oscillations from pressure, wind and temperature recordings at ground level, discussing seasonal and worldwide variations of daily component 06 p1053 A70-17307

Turbulence characteristic scale for atmospheric boundary layer, using wind profile data 06 p1096 A70-17466

Vertical wind distribution associated with thunderstorm outflow, measuring wind direction oscillations at Kennedy Space Center 06 p1101 A70-18576

Level flight optimization in horizontal wind varying with altitude, using glider concept and induced drag correction [ONERA-TP-700] 07 p1193 A70-19131

Quasi-biennial, annual and semiannual zonal wind and temperature harmonic amplitudes and phases in tropical and extratropical latitudes in stratosphere and low mesosphere 07 p1269 A70-19949

Prognostic maps of geopotential and wind in middle troposphere derived from hydrodynamic equations 07 p1330 A70-20307

Turbulence coefficient and profile in atmospheric boundary layer from wind and temperature distribution, obtaining formulas from model approximating coefficient by altitude function 08 p1538 A70-21112

Vertical wind profiles, deriving wind shear-layer thickness exponential relationship 09 p1715 A70-22356

Ionospheric wind velocity fields calculated from atmospheric dynamo effects taking into account electric field, current density and conductivity tensor 10 p1881 A70-24819

Pressure gradient, wind structure and shearing stress in atmospheric boundary layer related by formulation based on quasi-parallelism and boundary condition at Ekman layer top 11 p2076 A70-26071

Lower atmospheric layer temperature and wind vertical distribution effect on wind velocity ratio to geostrophic wind at earth surface 13 p2444 A70-28586

CAT parameters sensitivity to horizontal wind and temperature distribution 13 p2444 A70-28587

Wind field statistical properties using model incorporating quasi-steady state speed, shear, gusts and small scale motions [AGARDOGRAPH-115] 13 p2444 A70-28752

Variangular wind spirals for vertical wind and shear profile estimation in atmospheric boundary layer 14 p2602 A70-30370

FPS-16/Jimsphere wind profiles measurement, discussing effect of data smoothing on accuracy and resolution 14 p2607 A70-30569

Parachute altitude wind sensor /PAWS/ project for real time wind profile determination, using modified HASP I sounding rocket 14 p2585 A70-30577

Cape Kennedy peak wind profile probabilities at 10-150 meters for various exposure times 14 p2607 A70-30581

Thunderstorm bottom wind profile model, analyzing flow distribution, isotach, isogon and isotherm characteristics 14 p2607 A70-30584

Wind profiles derivation for environmental influence upon missile systems design, limiting bulky input into computer programs 14 p2608 A70-30586

Balloon-radar soundings of horizontal wind profiles for booster vehicle design 14 p2653 A70-30588

Vertical mesoscale contribution to vertical wind shear profiles, using radar/Jimsphere measurements 14 p2609 A70-30599

Atmospheric wind profiles and boundary layer turbulence power spectra for calculation of wind loads on space vehicles during prelaunch and launch 14 p2653 A70-30600

Wind field reduction from satellite cloud structure data 15 p2770 A70-32066

Planetary wind field from observed pressure field by linearized balance equation, assuming solenoidal air motion

20 p3662 A70-39178

CAT as mechanism relieving wind and temperature discontinuities, maintaining Richardson number at limiting value by turbulent energy dissipation

20 p3663 A70-39373

Longitudinal and vertical wind components turbulent fluctuations distribution skewness relationship to atmospheric stability and height, noting effect on diffusion

20 p3664 A70-40064

Jimsphere wind profiles gust variance and spectrum densities for horizontal wind speeds viewed by Saturn vehicle

21 p3847 A70-41878

Aircraft control, considering wind gradient effects on takeoff, ascent and overflight conditions

22 p3962 A70-43082

Statistical interpolation for numerical analysis of middle troposphere AT potential based on geopotential and wind observations

24 p4371 A70-45135

Neutral air winds in ionospheric F region for asymmetric global pressure system, including ion velocity correction

24 p4329 A70-45356

Meteorological wind and temperature distributions on selected routes at Concorde cruising level, noting computer use for flight planning

24 p4374 A70-46204

WIND SHEAR

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanisms and ambient electron density

01 p0084 A70-11552

E layer kinetic energy viscous dissipation and transfer to potential energy by turbulence and irregular winds shear

02 p0327 A70-12292

Doppler radar spectrum mean and variance derived for reflectivity gradients combined with linear wind shear velocity gradient

02 p0328 A70-12508

Deflecting forces on nonrotating convecting systems due to environmental shear, comparing magnitude to rotation forces

06 p1100 A70-18571

Derived winds, wind shears and densities accuracies obtained by radar meteor trail technique

07 p1237 A70-20281

Sheared frontal zones structure and stability, studying Richardson number limiting role in free atmosphere

08 p1492 A70-21971

Vertical wind profiles, deriving wind shear-layer thickness exponential relationship

09 p1715 A70-22356

Acoustic gravity waves horizontal ducting in atmosphere with spatially periodic wind shears

09 p1671 A70-23498

Wind shear caused ionospheric E region irregularities investigated by horizontal plasma density gradients determination

11 p2045 A70-25652

High altitude meteor winds, investigating atmospheric tides and short term wind oscillations, wind shears and drift nature

14 p2601 A70-30122

Variangular wind spirals for vertical wind and shear profile estimation in atmospheric boundary layer

14 p2602 A70-30370

Strong wind and vertical wind shear in upper stratosphere and mesosphere

14 p2608 A70-30594

Vertical mesoscale contribution to vertical wind shear profiles, using radar/Jimsphere measurements

14 p2609 A70-30599

Wind shear production rate by dynamical processes and relationship to clear air turbulence occurrence

14 p2609 A70-30601

Kelvin wave propagation numerical model, showing influence of mean zonal wind vertical and horizontal shear in lower stratosphere

15 p2771 A70-32370

Aerodynamic admittance of paraboloid dish aerial in scaled atmospheric turbulent boundary shear layer simulated in wind tunnel by vortex generators

16 p2878 A70-33766

CAT shear spectra above ground frictional layer in jet stream flight conditions, using aircraft measurements

16 p2946 A70-33825

CAT at subsidence inversion in presence of strong wind shear, noting radar echo pattern as Kelvin-Helmholtz instability indicator

17 p3133 A70-35933

Nighttime E region molecular ion production rate estimation, taking into account windshear effect

18 p3245 A70-36022

Two dimensional stratified flow over extended obstacles with source disturbances, indicating topographical effect on vertical wind shear in troposphere

23 p4214 A70-44031

WIND TUNNEL APPARATUS

NT WIND TUNNEL DRIVES

NT WIND TUNNEL NOZZLES

Pre-set Mach number control in supersonic wind tunnel, evaluating effects of nozzle installation, stagnation temperature drop and pressure errors

06 p1028 A70-17912

French H630 hypersonic wind tunnel operating at Mach 8, discussing test results and potential

15 p2718 A70-32839

Electrodeless traveling wave accelerator for wind tunnel use, determining gas stream density for subsonic and supersonic operation

16 p2889 A70-33868

Hypersonic velocity and turbulence measurements in wind tunnels, using spectral analysis of Doppler shifted laser light

17 p3103 A70-34849

Wind tunnel balance for measuring small aerodynamic loads on scale models, describing three component construction

17 p3062 A70-35490

On-line final V/STOL Wind Tunnel Data Encoding and Evaluation System /WINDEE/ for complex powered models, using computer monitoring

17 p3049 A70-35494

Digital computer six degree of freedom wind tunnel separation simulator for air launched missile trajectory analysis

17 p3063 A70-35509

Digital computer for high speed wind tunnel data acquisition, processing and operations control

19 p3397 A70-37923

High speed holographic recording of transient events by single shot ruby and Nd-doped pulsed lasers, applying to shock tubes and wind tunnels [SMPT PREPRINT 3]

22 p4035 A70-43056

WIND TUNNEL BALANCES

U WEIGHT INDICATORS

U WIND TUNNEL APPARATUS

WIND TUNNEL CALIBRATION

Characteristics and calibration of flow in gas induction driven close return transonic wind tunnel

11 p2030 A70-25687

Calibration tests in transonic wind tunnel with two and four sided perforation section

19 p3353 A70-38475

WIND TUNNEL DRIVES

German aeroballistic hypersonic test facility with moving model and rest atmosphere, describing acceleration mechanism and several tests

06 p0965 A70-17246

Crossed field plasma accelerator designed as element of hypersonic wind tunnel driver

06 p1119 A70-17471

Wind tunnel experiments for apparent reverse transition during expansion fan and turbulent boundary layer interaction, discussing Reynolds stresses

07 p1257 A70-19345

Characteristics and calibration of flow in gas induction driven close return transonic wind tunnel

11 p2030 A70-25687

Real hydrogen driver performance, analyzing intermolecular forces effects under high compression and heat

16 p2998 A70-33889

Shock tube facility with high explosive driver for reentry flow conditions simulation of manned planetary flights

21 p3804 A70-40849

WIND TUNNEL MODELS

Thermal protective device for models exposed to flow buildup in intermittent wind tunnel, offering straightforward design, easy applicability, low cost and favorable experimental conditions

03 p0463 A70-13627

Pitot boundary layer probes with position indicators using extensometric gages for boundary layers on wind tunnel test models

03 p0487 A70-13628

Flutter investigation on model designed and constructed for tail unit of HFB 320 Hansa jet aircraft, discussing classical and statistical methods

04 p0775 A70-15180

Rocket exhaust plume size determined from schlieren photographs during wind tunnel tests, noting agreement with Hill-Habert theory

04 p0736 A70-15417

Hypersonic slender wake mean flow properties behind two dimensional slender body wind tunnel models at zero angle of attack

04 p0621 A70-15578

Blockage and wall corrections proposed for obtaining uniform results from low speed wind tunnel models

05 p0789 A70-15812

Wind tunnel testing technique innovations, reducing time and cost for low drag aircraft configurations by simultaneous force and pressure model transonic testing

05 p0825 A70-15868

Wind tunnel tests of isentropic inlet diffusers, describing two dimensional model, test apparatus and modification and results

06 p0963 A70-17235

Holography for visualization and analysis of aerodynamic flow fields in wind tunnel experiments, recreating events in space and time

08 p1493 A70-20650

Flow turbulence in wind tunnel model tests, observing generation methods effect on aerodynamic flow characteristics distribution

08 p1483 A70-21074

Tower influence of wind speed and direction measurements, comparing 150 meter meteorological tower and scale wind tunnel model

09 p1661 A70-22964

Optical tools in aeronautical and space research at Langley Research Center, discussing schlieren photography of aeronautical and space models in wind tunnels

09 p1657 A70-23510

Consumable protective coat /silastene/ application to reentry models to eliminate metallic pollution in hotshot wind tunnels for spectroscopic analysis

10 p1825 A70-24548

Low speed buffet intensity under pressure fluctuations on slender wing aircraft at vortex breakdown, using wind tunnel model

10 p1963 A70-25067

Small scale and full scale wind tunnel and flight test data correlated for Lear jet aircraft [SAE PAPER 700237]

11 p1981 A70-25906

Free fall vehicle dynamics for wind tunnel measurements of research shapes used in computer simulation of vehicle trajectories

12 p2157 A70-28081

Freely spinning finned stabilizer static wind tunnel tests on free fall research store, determining Magnus effect, body flow interference and static stability

13 p2340 A70-29024

Wind tunnel boundary interference on V/STOL model calculated in test section with solid vertical and slotted horizontal walls, using image method and Fourier transforms

13 p2343 A70-29894

Tilt wing-propeller VTOL model, comparing static wind tunnel with moving-track test data based on coefficient forms of freestream and slipstream dynamic pressures

13 p2343 A70-29895

Unsteady aerodynamic forces on oscillating circular cylinder, using wind tunnel two dimensional dynamic model

14 p2529 A70-31050

Static and dynamic stability of wind tunnel models with flexible support, considering binary rigid body freedoms

14 p2564 A70-31398

Wind tunnel tests of flow past oblate ellipsoid of revolution incident on major axis, measuring pressure distribution

15 p2671 A70-31494

Hypersonic flow field around yawed half angle cone from wind tunnel measurements including surface pressure distributions and flow visualization photographs

17 p3007 A70-34485

Free flight wind tunnel test for feasibility of hypersonic drogue deployment into reentry vehicle wake

17 p3060 A70-35195

Ultraminiature piezoelectric semiconductor pressure transducers for wind tunnel models

17 p3093 A70-35491

Ultraminiature pressure transducers for use in wind tunnel models

17 p3093 A70-35492

Low pressure measuring system for aerodynamic models tested in Mach 12-14 wind tunnel, discussing transducers and high speed digital recording and data processing system

17 p3062 A70-35493

Telemetry instrumentation for free flight wind tunnel models, discussing system component characteristics

17 p3047 A70-35495

Static weight tare compensation for V/STOL wind tunnel models, using accelerometer outputs

17 p3062 A70-35500

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models

17 p3063 A70-35657

Flow field on suction side of slender body of revolution with/without wings, investigating by directional probe in wind tunnel

17 p3013 A70-35924

Significant terms in equations of motion for parachutes inflating in free air and in wind tunnel experiments

18 p3213 A70-36449

Dynamic airfoil stall simulation in wind tunnels, considering pitch rate, Reynolds number, oscillation and test equipment effects

20 p3558 A70-39582

Hypersonic aerodynamic deceleration devices for axisymmetrical bodies with cylindrical main sections and various front sections, using gun tunnel techniques

21 p3746 A70-41839

- Attached Inflatable Decelerator for planetary atmospheric entry, discussing mission applications and wind tunnel models performance
[AIAA PAPER 70-1163] 21 p3931 A70-41848
- Dust content effect on hypersonic wind tunnel flow test results, noting drag force on slender and blunt nosed models
21 p3749 A70-42224
- Spark photography of models in free flight in hypersonic shock tunnel
[SMPT PREPRINT 99] 22 p4032 A70-43035
- WIND TUNNEL NOZZLES**
- Incompressible gas turbulent jet flow characteristics in subsonic wind tunnel, stressing pressure distribution in recirculation region for interpreting heat transfer in separated flows
03 p0593 A70-13495
- Transonic wind tunnel of aerodynamic research station in Goettingen, Germany, taking into account fixed nozzle replacement by flexible nozzle
03 p0463 A70-13799
- Undried atmospheric air humidity effect on pressure and water vapor supercooling in supersonic wind tunnel nozzles
09 p1606 A70-23613
- Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump
[AIAA PAPER 69-653] 13 p2386 A70-28513
- WIND TUNNEL STABILITY TESTS**
- Wind tunnel investigated flow stabilization at horizontal control surfaces by vortex BCL technique, considering angles of attack, elevator deflection and shape
06 p0968 A70-17853
- Retrorocket effects on aerodynamic stability and drag of conical aeroshell planetary entry vehicles, discussing supersonic wind tunnel tests and jet shock interaction
[AIAA PAPER 70-219] 06 p0974 A70-18166
- Boeing 747 pretesting work including wind tunnel, components, engines and static structural tests, flight simulation, etc
08 p1437 A70-21730
- F-8D aircraft transonic flight and wind tunnel tests for buffet onset prediction, considering effects of g level and fluctuation amplitude and frequency
[AIAA PAPER 70-341] 09 p1611 A70-23020
- Wind tunnel study of entropy extremum upon critical streamline in supersonic three dimensional flow past blunt bodies at zero angle of attack
10 p1800 A70-24131
- Free fall vehicle dynamics for wind tunnel measurements of research shapes used in computer simulation of vehicle trajectory
[AIAA PAPER 69-229] 12 p2157 A70-28081
- Wind tunnel tests, analytical methods and fixed base simulation for predicting fighter aircraft spin characteristics
[AIAA PAPER 70-565] 13 p2346 A70-29030
- Transonic aircraft testing capabilities and limitations, considering tunnel wall interference and Reynolds number effects
[AIAA PAPER 70-580] 13 p2348 A70-29876
- Wind tunnel and flight test methods for determining transonic buffet characteristics on model F-4 aircraft
[AIAA PAPER 70-584] 13 p2348 A70-29886
- Three dimensional turbulent boundary layer development on rear of swept wing, comparing measurements with calculations
13 p2344 A70-30021
- Two-point suspension system with longitudinally displaced cargo hooks for handling helicopter loads, discussing wind tunnel and flight tests
17 p3014 A70-34714
- Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models
[AIAA PAPER 69-350] 17 p3063 A70-35657
- Buoyant Venus station balloon for deployment and inflation during parachute descent into Venus atmosphere tested with scale model balloons in wind tunnels
17 p3063 A70-35658
- Nonequilibrium gas states evolution in detached wave front of hypersonic blunt body, comparing vibrational relaxation in free flight and wind tunnel flow
18 p3335 A70-35962
- Continuous surface of revolution parachute for supersonic/hypersonic speeds, performing wind tunnel tests
[AIAA PAPER 70-1173] 21 p3754 A70-41840
- Reefed and unreefed disk gap band parachutes tested in supersonic and subsonic wind tunnels to determine stability and performance
[AIAA PAPER 70-1172] 21 p3754 A70-41841
- Short wing lift investigated via lateral fluid jets fired in wind tunnel for various lengths
22 p3958 A70-42614
- Helicopter rotor tests in large wind tunnel for increased flight speed, noting pressure and noise measurements
[ICAS PAPER 70-44] 23 p4132 A70-44142

WIND TUNNEL WALLS

- Low speed wind tunnel test results correction program, considering solid, wake blockage, lift, static pressure gradient and wall interference effects
06 p0968 A70-17934
- Optimal V/STOL wind tunnel interference study of slotted tunnel walls, including porosity and height to width ratio effects
07 p1251 A70-20407
- Wind tunnel boundary interference on V/STOL model calculated in test section with solid vertical and slotted horizontal walls, using image method and Fourier transforms
13 p2343 A70-29894
- Subsonic boundary lift interference in wind tunnels with perforated walls, using point matching method
14 p2563 A70-30869
- V/STOL testing wind tunnel section with solid vertical and slotted horizontal zero interference walls
18 p3237 A70-36461
- Wind tunnel wall interference effects for V/STOL aircraft with lift jets, using modified theoretical model for complex jet arrangements
[ICAS PAPER 70-54] 23 p4139 A70-44150
- WIND TUNNELS**
- NT BLOWDOWN WIND TUNNELS
- NT CASCADE WIND TUNNELS
- NT COMBUSTION WIND TUNNELS
- NT HOTSHOT WIND TUNNELS
- NT HYPERVELOCITY WIND TUNNELS
- NT LOW DENSITY WIND TUNNELS
- NT LOW SPEED WIND TUNNELS
- NT PLASMA JET WIND TUNNELS
- NT SHOCK TUNNELS
- NT SLOTTED WIND TUNNELS
- NT SUBSONIC WIND TUNNELS
- NT SUPERSONIC WIND TUNNELS
- NT TRANSONIC WIND TUNNELS
- Ice tunnel testing facility at Naval Air Propulsion Test Center (NAPTC), describing methods, systems, instrumentation and various turbofan and turbojet engine tests
01 p0056 A70-10691
- Pulsed MHD accelerator for MHD wind tunnel application, discussing accelerator gas source, magnetic field and operation
[AIAA PAPER 68-370] 03 p0462 A70-12907
- Low turbulence wind tunnel axisymmetric contraction designed from reformulated Thwaites solution
03 p0462 A70-12935
- Sound propagation along cylindrical duct of wind tunnel, discussing fluid flow effect on modal cut-off frequencies
04 p0719 A70-15078
- Circulation controlled lifting rotor wind tunnel test results concerning factors affecting lift and drag
08 p1432 A70-21039
- Trisonic high pressure wind tunnel simulating flow conditions on large transonic aircraft, noting high Reynolds number capability
09 p1655 A70-22023
- Wake-boundary layer interaction in wind tunnel tandem cascades, discussing end wall suction
09 p1609 A70-23750
- Turbulent flow generation by interacting principal stream with transverse jets, obtaining flow domains in test chamber of two dimensional wind tunnel
10 p1870 A70-24785
- Air breathing engine testing at propulsion Wind Tunnel Facility at Arnold Engineering Development Center
11 p2031 A70-25852
- Self opening em-operated secondary and tertiary mylar diaphragms for expansion tubes and tunnels
11 p2031 A70-25982
- Turbulent boundary layer interaction with wavy wall in wind tunnel, discussing wall pressure drag and surface waves interaction
11 p2039 A70-26538
- Airfoil sections in transonic flow, discussing wind tunnel tests on mixed flows and shock waves
[ONERA-TP-815] 13 p2341 A70-29139
- Integrated computerized data acquisition and reduction system for aircraft flight and wind tunnel tests
13 p2373 A70-29156
- Wind tunnel interference for inviscid compressible conducting fluid on slender body of revolution, discussing disturbance potential
13 p2464 A70-29449
- Unsteady nonlinear aerodynamic loads measurements in wind tunnel, using linearized mathematical analog
[AIAA PAPER 70-573] 13 p2343 A70-29896
- Similarity and scaling between atmospheric and wind tunnel simulated shear flows near earth surface
14 p2602 A70-30369
- Atmospheric contaminants dispersion simulation in meteorological wind tunnel with capability to simulate thermally stratified boundary layers
17 p3065 A70-34496
- Continuous variation measurements of wind tunnel parameters minimizing testing time, discussing flow characteristics measurements during angle of attack variation
17 p3057 A70-34775

- German monograph on transonic plane flow past wavy wall in blocked wind tunnel covering flow theory, interferometric density measurements, etc
17 p3070 A70-35375
- ONERA low pressure wind tunnel equipped with electron beam probing device to visualize flows too rarefied for optical methods
18 p3210 A70-37208
- Ultraminiature pressure transducer for airplane model and inlet/engine subsystem in wind tunnel tests, considering design, calibration, environments, etc
19 p3430 A70-38523
- Runway test vehicle for lifting rotor performance in simulated forward flight, comparing with wind tunnel tests
19 p3402 A70-38611
- Laminar heating in hypersonic vehicles interior corners, analyzing helium tunnel heat transfer data for various intersecting wedge corners
20 p3737 A70-39700
- Simulated neutral atmospheric boundary layer measurements in wind tunnel, extending power spectral and correlation determinations
20 p3613 A70-40139
- Conducting fluid supersonic flow past slender body of revolution in circular wind tunnel under inclined magnetic field, investigating MHD interference problem
22 p3958 A70-42669
- European wind tunnels suitable for Post Apollo Program aerodynamic testing, presenting detailed tabulated information on available facilities
22 p4007 A70-43503
- NACA/NASA rotary wing aircraft research history 1915-1970, Part 3, covering rotor and helicopter theory, related flight and wind tunnel testing, etc
23 p4142 A70-44853
- WIND VANES**
- Remote recording wind vane using continuous and step rotary switch potentiometers suitable for automatic weather stations
06 p1062 A70-17619
- WIND VARIATIONS**
- Harmonic analysis of upper atmospheric wind periodic data from radar sounding of meteor trails, defining principal diurnal wind variations
01 p0134 A70-10201
- Wind oscillations in stratosphere, lower mesosphere and meteor heights noting periodicities
01 p0074 A70-10591
- Multifan cross wind jet engine test facility to produce variable wind velocity in various directions
01 p0056 A70-10698
- Thermospheric horizontal winds diurnal bulge, discussing maximum density-maximum temperature phase relationship
01 p0078 A70-11210
- Seasonal phase changes of semidiurnal tidal wind components in lower ionosphere demonstrated from ionospheric drift measurements
01 p0078 A70-11212
- F region ion velocity measurements by Thompson scatter probe, deducing neutral winds diurnal and seasonal variations in thermosphere
01 p0078 A70-11214
- Lunar atmospheric tidal wind semidiurnal variations from Hong Kong and Uppsala data, discussing agreement with theory
02 p0325 A70-12217
- Upper atmosphere wind and semidiurnal and diurnal tide interactions observed by meteor radar, noting relation to gravity waves
05 p0878 A70-15818
- Spatial variations in zonal and meridional components of stratospheric and mesospheric winds traced over horizontal distances by Arcas ROBIN rockets
07 p1274 A70-20275
- Wave disturbances in tropical lower troposphere, discussing cross spectrum analysis of wind, temperature, relative humidity and surface pressure
07 p1275 A70-20304
- Cup and vane anemometers theory, determining overestimation errors of differential equation for mean values in sinusoidally fluctuating winds
08 p1501 A70-21975
- Velocity distribution and structure of irregular winds near 100 km measured by differencing chemical release wind profiles
12 p2264 A70-28002
- Lower stratosphere temperature and wind periodic variations associated with shear flow gravity waves
14 p2601 A70-30124
- Mesospheric levels wind oscillations in Spanish range of Arenosillo measured by meteorological rockets during February 1970
15 p2723 A70-31653
- Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph
16 p2945 A70-33219

Solar wind velocity variations showing relationship with electron density excess and localized region temperature of corona

19 p3512 A70-38693

Wind speed pulsations measurement at atmospheric boundary layer and different heights, analyzing turbulent energy intensity

19 p3463 A70-38757

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph

24 p4371 A70-45194

WIND VELOCITY

Four dimensional optimal interpolation for maximum wind velocity components, calculating spatiotemporal correlation functions

01 p0135 A70-10205

Multifan cross wind jet engine test facility to produce variable wind velocity in various directions

01 p0056 A70-10698

Doppler spectrum and radio troposcatter beam swinging in thin homogeneous turbulent scatter layer as function of height, crosswind speed and refractivity

02 p0326 A70-12288

Doppler radar spectrum mean and variance derived for reflectivity gradients combined with linear wind shear velocity gradient

02 p0328 A70-12508

Pulsation velocities distribution wind in meteor region of atmosphere during hourly intervals over eleven month period, noting normal distribution

06 p1095 A70-17206

Wind velocity measurements by coherent radar pulse method of meteor trail observations

06 p1141 A70-17739

Wind speed and potential temperature vertical profile in day/night planetary atmospheres estimated by similarity theory of boundary layer parameters

06 p1141 A70-17827

Electromagnetic-acoustic probe for remote wind velocity sensing and radar range performance

06 p1071 A70-18509

Aircraft design formulas for equivalent gust velocity compared with vertical acceleration form, discussing design problems for large jets and T-tailed configurations

06 p0988 A70-18589

Dust devil wind velocity relationship to environmental parameters including atmospheric temperature, wind direction and vorticity, etc

07 p1269 A70-19948

Solar wind velocity radioastronomical measurements, discussing radio wave fluctuations, telescope antenna designs, radiometers and observations

08 p1474 A70-21070

Vertical air motions rate from aerodynamic loads on aircraft and pitch angle and center of mass vertical velocity fluctuations

08 p1538 A70-21113

Atmospheric variables /velocity, temperature, energy, etc/ spectra in lowest few hundred meters

09 p1714 A70-22352

Time averaging and length of record effects on horizontal wind speed variance, determining maximum wind gusts as function of height and averaging time

10 p1909 A70-23928

Field-aligned plasma velocity dependence on plasma diffusion and wind velocity illustrated with model of night F 2 layer

10 p1881 A70-24814

Polar ionospheric current and interplanetary magnetic field directions related from mean diurnal values of solar wind velocity

11 p2044 A70-25551

Sound speed and horizontal wind velocity components determined in upper atmosphere from measured data of Rocket Grenade Experiment

11 p2121 A70-25678

Maximum wind velocity regions in tropospheric jet streams under synoptic conditions concerning troughs, ridge sections and cyclonic-anticyclonic curvatures

11 p2075 A70-25919

Solar wind magnetic field power spectra and plasma velocity, discussing turbulence, viscosity and dissipation

11 p2106 A70-26770

Corona point discharge current magnitude in transonic wind tunnel, giving current characteristics at different wind speeds

12 p2264 A70-28001

Lower atmospheric layer temperature and wind vertical distribution effect on wind velocity ratio to geostrophic wind at earth surface

13 p2444 A70-28586

Vertical and intensity distributions of wind velocity focuses in tropospheric jet streams

13 p2444 A70-28590

Aeronautical navigation under various wind velocity conditions, studying flight times for closed flight paths

13 p2448 A70-28750

Wind field statistical properties using model incorporating quasi-steady state speed, shear, gusts and small scale motions

[AGARDOGRAPH-115] 13 p2444 A70-28752

Wind velocity components on nonuniformly heated plane slope with linear periodic temperature function

14 p2602 A70-30165

Tropical storms and hurricanes critical winds forecasting accuracy by NASA Manned Spacecraft Center

14 p2606 A70-30558

Strong wind and vertical wind shear in upper stratosphere and mesosphere

14 p2608 A70-30594

Stabilized balloon flights during weak winds in stratosphere, discussing pressure vs time curves

14 p2531 A70-31311

Temperature profiles and wind velocities during convective cloud banks formation from meteorological satellite data

15 p2770 A70-32065

Atmospheric density from radar observations of meteor trails drift, using wind velocity semidiurnal components amplitudes

18 p3253 A70-36994

Isolated cumulus clouds formation numerical simulation, determining movement rates relationship to external wind speed

19 p3463 A70-38756

Wind speed pulsations measurement at atmospheric boundary layer and different heights, analyzing turbulent energy intensity

19 p3463 A70-38757

Cloud motions from IR measurements within overlap region of adjacent Nimbus II orbits compared with wind vectors from constant pressure charts

20 p3665 A70-40068

Atmospheric turbulence and wind velocity remote probing by millimeter waves, comparing results with conventional anemometer measurement

20 p3665 A70-40306

Polar ionospheric current and interplanetary magnetic field directions related from mean diurnal values of solar wind velocity

21 p3819 A70-41301

Jimsphere wind profiles gust variance and spectrum densities for horizontal wind speeds viewed by Saturn vehicle

21 p3847 A70-41878

Scintillation index correlation with mean wind velocity of jet streams

22 p4020 A70-43262

Large scale axisymmetric atmospheric vortex wind velocity determination, using statistical cloud data from meteorological satellites

22 p4065 A70-43376

E region winds response to solar radiation variations, including geomagnetism role

23 p4186 A70-43848

Air current in upper atmosphere meteor zone above equator, noting diurnal and semidiurnal harmonics in wind velocity components

23 p4188 A70-44049

Universal constant measurement methods in Kolmogoroff third hypothesis for high Reynolds number turbulence in wind over open ocean

23 p4184 A70-44980

WIND VELOCITY MEASUREMENT

Rotation periods of Jovian atmospheric currents showing zonal wind velocity variations with latitude

02 p0369 A70-11829

Wind field-Doppler velocity field generalized correlation, describing horizontal velocity component measurement by single pulse Doppler radar technique

02 p0326 A70-12287

Wind velocity longitudinal profile measurements in atmospheric boundary layer over rough sea surface using floating beacon and statistical analysis of airflow perturbations

04 p0715 A70-15253

Optical crossbeam technique for remote sensing of wind speeds, relating light fluctuations to convective wind velocity by space-time correlation methods

05 p0850 A70-16688

Remote recording wind vane using continuous and step rotary switch potentiometers suitable for automatic weather stations

06 p1062 A70-17619

Turbulent air flow velocities determined in meteor zone of atmosphere

07 p1386 A70-19461

Atmospheric wind velocity and temperature oscillations measurement using acoustic anemometer, resistance thermometer and multichannel signal spectrum analyzer

07 p1284 A70-19833

WINDAV anemometer used as low power wind direction and velocity transducer for tethered balloon

08 p1494 A70-20822

Lower atmosphere turbulence under convective conditions, comparing Doppler radar and instrumented aircraft wind speed fluctuation measurements

09 p1716 A70-22367

Oceanic wind and wave predictions by satellite radar radiometer using single receiver to determine wind velocity

[AIAA PAPER 70-310] 09 p1668 A70-22877

Nose cone modifications for Meteor-1 meteorological sounding rocket used for wind velocity measurements

09 p1767 A70-23406

Pulsed Doppler radar technique for monitoring and diagnosing severe storms, obtaining wind velocity and direction within cloud

10 p1844 A70-25242

Vertical air velocity in convective clouds by pulsed Doppler radar observations of thunderstorm

11 p2004 A70-25650

Wind velocity and direction and diffusion coefficients measurements by artificial luminous clouds, injecting appropriate reagents from rockets

11 p2075 A70-25918

Horizontal wind velocity spectra at 80-100 km from radar meteor soundings

12 p2263 A70-27518

Upper atmosphere superrotation velocity based on satellite polar orbit calculation of 1968-59A, correcting for lunisolar perturbations

13 p2394 A70-28895

Wind velocity determination by radar tracking of meteor trails, investigating errors

14 p2572 A70-30328

Errors estimation in wind velocity values by radio echo observations in meteor trails of different densities

14 p2572 A70-30330

Surface wind speed durations statistical analysis, discussing meteorological, orographic and physiographic features

14 p2607 A70-30582

High winds simultaneous occurrence and duration to 150 meter height, showing coherence tendencies

14 p2607 A70-30583

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph

16 p2945 A70-33219

Solar wind velocity profile in rapid acceleration of coronal plasma from type I, III and V bursts

17 p3152 A70-35745

Wind velocity fluctuation randomization signal probability density measurement, using statistical sampler

18 p3238 A70-36067

Turbulent air flow velocities determined in meteor zone of atmosphere

18 p3316 A70-36935

Wind velocity and direction determination from artificial luminescent clouds photographs, calculating topocentric coordinates

18 p3252 A70-36991

Upper atmospheric wind velocity and diffusion coefficient measurement by radar observation of artificial electron cloud from atomic K ejection

18 p3253 A70-36993

Horizontal wind velocity spectra at 80-100 km from radar meteor soundings

21 p3846 A70-41166

Remote digital mean wind speed indication with numerical display, using photoanemometer for airport application

21 p3831 A70-42247

Wind velocity derivative statistical characteristics in atmospheric surface layer, using thermoanemometer, functional converter, differentiating circuit and loop oscillograph

24 p4371 A70-45194

WINDING

NT FILAMENT WINDING

NT HELICAL WINDINGS

NT WIRE WINDING

Textolites and ferromagnetodielectric wedges mechanical strengths compared for use in open grooves of compound winding

01 p0008 A70-10195

Shadow method for temperature field in potentiometer winding

19 p3420 A70-37264

WINDMILLING

U AUTOROTATION

WINDOWS

NT WAVEGUIDE WINDOWS

Spacecraft window cleaning with methyl alcohol and low pressure nitrogen providing filming control for Apollo optical experiments

11 p2051 A70-26143

Interferograms of window wave front deformations to measure angular deviations to line of sight

15 p2737 A70-32038

WINDOWS [APERTURES]

Display systems used in space capsule window simulation for flight training, discussing erecting eyepieces, field of view and exit pupils

01 p0058 A70-10814

- Composite window permitting visual or photographic observation and IR irradiation of test materials in ultrahigh vacuum system 09 p1698 A70-22994
- Airborne camera resolution degradations /window losses/ introduced by multilayering wedge, irregularity and structural deformation 09 p1687 A70-23767
- VFW 614 nose-contoured cockpit panes, discussing structural weight and strength, vision and window frame fabrication 10 p1806 A70-24866
- Two dimensional impedance horn antennas synthesized by aperture field distribution and radiation pattern configuration relationship, deriving energy balance equation 11 p2015 A70-25348
- Coupled panel-cavity vibrations analysis, emphasizing sonic boom excitation of large window-room combinations 11 p2133 A70-25728
- Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions [AIAA PAPER 69-1023] 13 p2384 A70-28530
- Thin window for circularly polarizing antennas, measuring circularity and VSWR performance on S and X band test sections 16 p2877 A70-33410
- Tiros satellites window radiation applied to day and night surface temperature measurements on land and sea 17 p3081 A70-35932
- Meteoroid impacts on Gemini spacecraft windows, calculating flux-mass relation 19 p3520 A70-38376
- Two dimensional impedance horn antennas synthesized by aperture field distribution and radiation pattern configuration relationship, deriving energy balance equation 20 p3600 A70-40460
- High transmission Mylar window He cryostat for Mossbauer measurements 21 p3828 A70-41470

WINDOWS [INTERVALS]

- NT LAUNCH WINDOWS
- Optimal atmospheric transmittance windows for underlying surface and cloud temperature determination from satellites 08 p1538 A70-21426
- Silicon window with double carrier injection to achieve high power broadband microwave switching, obtaining power increase over p-i-n diodes 10 p1847 A70-23892
- Analog integrating moving window detector performance analysis for use with scanning pulse radar allowing for antenna radiation pattern and detection process dynamic characteristics 11 p2009 A70-26262

WINDS ALOFT

- NT GEOSTROPHIC WIND
- NT JET STREAMS [METEOROLOGY]
- High altitude meteor winds, investigating atmospheric tides and short term wind oscillations, wind shears and drift nature 14 p2601 A70-30122

WINDSCREENS

- U WINDSHIELDS
- WINDSHIELDS
- F-104 jet windshield components research concerning plate glass optical deviation problems to meet quality standards 09 p1691 A70-22571
- Glass plastic composite electrically heated windshields for aircraft, discussing design, fabrication, qualification testing and service experience 21 p3750 A70-41137

WINDWARD

- U UPSTREAM
- U WIND [METEOROLOGY]

WING CAMBER

- Contour, pressure distribution and aerodynamic parameters calculations of slender highly cambered parawings in symmetric and asymmetric inviscid flow 03 p0408 A70-13800
- Wing camber and twist effects on transonic drag, using wind tunnel measurements 16 p2840 A70-34321
- Wing lift increase by spanwise blowing along upper surface, causing flow reattachment on wing and vortex induced effective aerodynamic camber increase [ICAS PAPER 70-09] 23 p4132 A70-44120

WING FLAPS

- NT TRAILING-EDGE FLAPS
- Fokker F-28 wing flap, lift dumpers and aileron development, including wind tunnel and flight tests 08 p1438 A70-21864
- Extensible wing flap system for cargo aircraft, discussing structural design details and advantages [AIAA PAPER 70-911] 17 p3020 A70-35823
- Propulsion system impact on military/commercial STOL transport aircraft commonality, taking into account augmented jet flap and externally blown flap powered lift wing concepts [SAE PAPER 700269] 18 p3214 A70-36819

- Increased lift via hinge suction jet flaps on augmentor wings, using thin airfoil model and small disturbance theory 22 p3960 A70-43432

WING FLOW METHOD TESTS

- Two dimensional wing model with harmonically oscillating control surface in transonic range, comparing theoretical with experimental results on unsteady pressure distribution 06 p0966 A70-17252
- Aerodynamic forces and moments effect of VTOL aircraft lift fan configurations on flow past wing 10 p1798 A70-24047
- Short wing lift investigated via lateral fluid jets fired in wind tunnel for various lengths 22 p3958 A70-42614

WING LOADING

- Mounted-above-wing jet engine effect on wing pressure distribution and elevator unit, using fluid mechanical model [DGLR-69-34] 04 p0735 A70-15146
- Liapunov second method extension to dynamical systems stability, illustrating wing torsional divergence and panel supersonic flutter 05 p0941 A70-16564
- Aircraft wing load calculations using aerodynamic influence coefficients based on linear subsonic or supersonic flow theory 06 p0967 A70-17255
- Singular element technique effect on hydrodynamic and aerodynamic problems solutions, presenting potential flow problems and application to wings and propellers 07 p1188 A70-19133
- Wing lifting surface theory for V/STOL aircraft based on inclined actuator disk theory to predict span loading and downwash angle 07 p1190 A70-20408
- Numerical solutions of variational problems concerning symmetrical wings with minimum drag and optimal aerodynamic efficiency in hypersonic flow 09 p1603 A70-22433
- Spanwise distribution of aerodynamic torsion on sailplane wings in vertical dive, discussing wing twist and lift effects 12 p2156 A70-27721
- Preliminary aircraft wing design for gusts or landing impacts inducing vibrations, inertia effects and dynamic overloads 14 p2655 A70-30177
- Wing section pressure distributions, lift and drag in transonic mixed flow, considering prediction methods 14 p2529 A70-30866
- Linear model of edge effect in supersonic gas flow past dihedral angle of intersecting wings, using Abel equations 15 p2672 A70-32127
- Nonlinear bearing surface of symmetrical rectangular edge wings without slipping in incompressible flow, using oblique horseshoe vortex model 15 p2673 A70-32128
- Maneuver load alleviation /MLA/ configurations for wing bending load relief on transport aircraft, showing improved payload and span performance [AIAA PAPER 70-877] 17 p3016 A70-34813
- Water ballast loadings on sailplane Cobra 17, considering wing, aileron, tailplane, fuselage and landing gear 22 p3962 A70-42962
- Similarity rules for sinusoidal gust loads on thin two dimensional wing in nonstationary subsonic flows 23 p4131 A70-43970
- Aircraft wing box beams bending tests to failure loads, considering crushing pressure, bulkhead flexural deformations, structure initial imperfections and instability phenomena 23 p4267 A70-44103
- Unsteady aerodynamic loading of wings with control surfaces, discussing Kuessner integral equation of subsonic lifting theory 23 p4274 A70-44761

- Wing section pressure distributions, lift and drag in transonic mixed flow, considering prediction methods 14 p2529 A70-30866
- Linear model of edge effect in supersonic gas flow past dihedral angle of intersecting wings, using Abel equations 15 p2672 A70-32127
- Nonlinear bearing surface of symmetrical rectangular edge wings without slipping in incompressible flow, using oblique horseshoe vortex model 15 p2673 A70-32128
- Maneuver load alleviation /MLA/ configurations for wing bending load relief on transport aircraft, showing improved payload and span performance [AIAA PAPER 70-877] 17 p3016 A70-34813
- Water ballast loadings on sailplane Cobra 17, considering wing, aileron, tailplane, fuselage and landing gear 22 p3962 A70-42962
- Similarity rules for sinusoidal gust loads on thin two dimensional wing in nonstationary subsonic flows 23 p4131 A70-43970
- Aircraft wing box beams bending tests to failure loads, considering crushing pressure, bulkhead flexural deformations, structure initial imperfections and instability phenomena 23 p4267 A70-44103
- Unsteady aerodynamic loading of wings with control surfaces, discussing Kuessner integral equation of subsonic lifting theory 23 p4274 A70-44761

- Wing section pressure distributions, lift and drag in transonic mixed flow, considering prediction methods 14 p2529 A70-30866
- Linear model of edge effect in supersonic gas flow past dihedral angle of intersecting wings, using Abel equations 15 p2672 A70-32127
- Nonlinear bearing surface of symmetrical rectangular edge wings without slipping in incompressible flow, using oblique horseshoe vortex model 15 p2673 A70-32128
- Maneuver load alleviation /MLA/ configurations for wing bending load relief on transport aircraft, showing improved payload and span performance [AIAA PAPER 70-877] 17 p3016 A70-34813

- Unsteady aerodynamic loading of wings with control surfaces, discussing Kuessner integral equation of subsonic lifting theory 23 p4274 A70-44761

- ing theoretical with experimental results on unsteady pressure distribution 06 p0966 A70-17252

- Plane rigid airfoil frequency response in incompressible potential flow using simple equivalent oscillator based on Theodorsen function 07 p1404 A70-19232

- Mathematical model with straight wake airfoil to determine aerodynamic forces on oscillating rotor blades in hovering flight 09 p1605 A70-23222

- Equivalent oscillatory model defined from asymptotes of frequency response amplitude and cut-off frequency amplitude value of plane rigid airfoil in incompressible potential flow 10 p1953 A70-23841

- Wing in supersonic flow analyzed for surface pressure taking into account nonlinear effects of vibrations 10 p1798 A70-24119

- Polygonal wings oscillatory motions in unsteady supersonic flow 10 p1803 A70-24778

- Gas dynamics regarding velocity field excited by vibrations propagating over elastic wing surface at finite velocity 10 p1803 A70-24779

- Flutter characteristics of uniform cantilever wing with concentrated inertias using Direct Matrix method 10 p1963 A70-25071

- Monograph on numerical treatment method for harmonically oscillating wings covering pressure distributions, logarithmic singularity, etc 11 p2129 A70-25497

- Wind tunnel interference effect on fluttering airfoils and panels supersonic speeds, studying pressure distributions for various tunnel aspect ratios and roof conditions 12 p2155 A70-27103

- F-111 aircraft wings unstable fore and aft oscillations in swept forward position ascribed to actuator motor drive rate variations 12 p2160 A70-27112

- Correction factor for finite span effect on unsteady wing lift or moment during sinusoidal gusts or vertical oscillations 12 p2155 A70-27200

- Pressure field due to control surface oscillation in subsonic flow, presenting numerical results for rectangular wing 14 p2528 A70-30295

- Dynamic stability derivatives calculation using steady and oscillatory lifting surface theory with allowance for Bryan limitations 14 p2529 A70-30864

- Flutter analysis, criteria and experiments emphasizing aircraft applications 15 p2815 A70-31798

- Forces on two dimensional oscillating airfoil in subsonic compressible wind tunnel flow, solving partial differential equation for pressure potential by integral transform technique 16 p2839 A70-34248

- German monograph on oscillations of tandem wing without outgoing wake in plane incompressible flow, using numerical computations 17 p3011 A70-35372

- Rectangular wing with oscillating control surface, measuring induced unsteady pressure field for comparison with computations based on lifting surface theory 21 p3935 A70-41407

- Oscillating wing aerodynamic load boundary value problem reduction to sequence of steady lifting-surface problems 22 p3959 A70-42715

- Harmonically oscillating wing linearized motion in subsonic flow, calculating generalized aerodynamic forces 22 p4105 A70-43118

- High subsonic and transonic effects on pressure distributions for swept wing with oscillating control surface 23 p4274 A70-44763

- Pressure measurements on harmonically vibrating sweptback wing with two control surfaces in incompressible flow 23 p4274 A70-44768

- Oscillatory motion of triangular wing with conical body of arbitrary cross section in supersonic flow, considering wing-body interference effects 24 p4288 A70-45592

- WING PANELS
- Beaded-doubler reinforced skin design concept for Improved HAWK Missile wing, considering compression stress, weight, cost and field service characteristics 02 p0380 A70-11946

- Boeing 747 wing panels shot peening process, discussing machine, control technique and operational requirements 19 p3437 A70-38498

- WING PLANNFORMS
- NT DELTA WINGS
- NT SWEPTBACK WINGS
- NT TRAPEZOIDAL WINGS

NT VARIABLE SWEEP WINGS

Minimum drag hypersonic delta wing, analyzing shape for given planform, lift, pitching moment and volume using correction for pressure coefficient
01 p0002 A70-10557

Blended wing-body design concept for F-15 air superiority fighter, providing fixed wing planform for maneuverability at transonic speed
04 p0622 A70-14395

Sigma glider design for high cruising speed, using extensible wing to double area in flight
04 p0622 A70-14625

Numerical method for calculating gust effect on wing of complex planform at subsonic speeds by converting continuous to discrete processes
04 p0618 A70-15242

Delta wing of given volume and planform with maximum lift-drag ratio in hypersonic flow
04 p0618 A70-15243

Lift effectiveness of slender wings with streamwise root gaps and fences, obtaining lift curve slope variation with fence height
04 p0621 A70-15611

Tangent plane method and polar coordinates for lifting surfaces, calculating normal velocity at field point on surface carrying doublet distribution for incompressible flow
[AIAA PAPER 70-78] 06 p0975 A70-18195

Minimum drag thin symmetrical cruciform wing fitted with central ridge, reducing problem to linear algebraic finite system of equations
10 p1803 A70-24784

Aerodynamic loadings on planar wings in oscillatory subsonic flow determined by collocation for performing Gaussian quadrature integration of pressure and kernel functions
12 p2155 A70-27102

Low aspect ratio wing aerodynamic characteristics in shear flow, noting forces dependence on flow velocity gradients
14 p2529 A70-31274

Packable near weightless nylon cloth wings without rigid members for improved aeronautical efficiency in cargo delivery, powered flight and rocket and spacecraft recovery
[AIAA PAPER 70-880] 17 p3017 A70-34815

Composite wing section design and fabrication utilizing unidirectional glass reinforcement
[AIAA PAPER 70-919] 17 p3193 A70-35813

Subsonic high lift cruise wing optimal design using kernel function method of planar lifting surface theory
22 p3959 A70-42709

Downwash angle behind straight wing for unsteady aperiodic flight at subsonic speeds, using vorticity model
22 p3959 A70-42802

WING PROFILES
NT WING SPAN
Wing design optimization for steady and unsteady supersonic flow through computerized simulation and study of leading and trailing edge shape
02 p0223 A70-12208

Wind tunnel comparative performance tests of glider laminar wing profile with fixed and flexible trailing-edge flap
02 p0304 A70-12800

Wave drag dependence of delta wings on thickness distribution
[DVL-888] 03 p0406 A70-13273

Aircraft aerodynamics, Volume II, covering profile and wing theory at subsonic and supersonic speeds, fuselage, wing-fuselage and tail assembly, etc
03 p0407 A70-13350

Wing and body design for upgrading transonic aircraft performance, discussing blending, spanwise sweep variation, curved leading edge and aspect ratio
04 p0613 A70-14504

Separated incompressible flow around wing profile, considering calculation of separated potential flow generation with given separation point
06 p0966 A70-17253

Nonlinear theory extended to slender triangular and rectangular wings with symmetric profile, taking into account finite wing thickness
06 p0966 A70-17254

Lifting surface theory for calculation of steady subsonic and supersonic flow over various wing and air-plane configurations, emphasizing finite element load prediction method
[AIAA PAPER 70-192] 06 p0971 A70-18114

Aerodynamic forces for boundary layer profiles of flexible plate under transient motion in shear flow using computer programs
[AIAA PAPER 70-76] 06 p0972 A70-18122

Ram wing vehicles aerodynamics application to high speed ground transportation, studying effect on passenger ride quality
[AIAA PAPER 70-142] 06 p0973 A70-18145

Prandtl problem solution by reducing integrodifferential equation to linear differential equation in disk of complex variable, noting application to elliptical or rectangular wings
07 p1258 A70-19783

Aerodynamics role in large commercial aircraft design, noting mathematics models problem in high speed wing design
09 p1609 A70-22024

Analytical algorithm for tan-chord angle tangent determination, assuming undevelopable ruled wing surface defined by three cross sections
10 p1802 A70-24292

Supersonic flow around slender polygonal wings with nonsymmetrically distributed incidence using method for conical flow around angular wings
10 p1803 A70-24797

Subsonic kernel function applicability limited to surfaces with small inclinations to freestream, considering wing with deflected control surface
12 p2212 A70-28089

Supersonic flow in inner and outer regions of annular wings by method of singularities, obtaining Abel type integral equations for every step
[DFVLR-SONDDR-37] 12 p2158 A70-28207

Flapping wing unsteady periodic motion relationship to forces effect on wing profile and vortex street in wake, determining propeller thrust by potential theory
13 p2337 A70-28479

Ackeret theory for infinite aspect ratio, rectangular and trapezoidal constant cord wings with arbitrary spanwise variation of profile in supersonic flow
16 p2836 A70-33748

Stress concentration on axisymmetric annular wings calculated using method of singularities
18 p3207 A70-36377

Hypersonic flat and biconvex conical wings, calculating yaw effects on shock shape and pressure distribution
21 p3761 A70-40918

Planar wing with end plates in ground effect, calculating minimum induced drag by approximation theory
21 p3743 A70-40919

Near field flow effects on sonic boom for incident triangular wing with constant lift distribution
[ICAS PAPER 70-20] 23 p4138 A70-44113

WING ROOTS
Static stability requirements relaxation and wing control devices additions for alleviating wing root bending moments in controls configured vehicle /CCV design concepts
19 p3355 A70-37395

VTOL aircraft ejector thrust augmentors, discussing configurations in wing root section
[ICAS PAPER 70-56] 23 p4139 A70-44152

WING SLOTS
V/STOL aircraft propellers featuring thrust augmenting air jet slits for increased lift
[DGLR-69-36] 04 p0616 A70-15175

WING SPAN
Wing-fuselage interference influence in aircraft dihedral effect, discussing role of velocity direction on wing
03 p0406 A70-13020

Swept wings aerodynamic center and span load distributions with respect to quarter-chord line
04 p0619 A70-15393

Correction factor for finite span effect on unsteady wing lift or moment during sinusoidal gusts or vertical oscillations
12 p2155 A70-27200

Spanwise distribution of aerodynamic torsion on sailplane wings in vertical dive, discussing wing twist and lift effects
12 p2156 A70-27721

Lifting surface problem for finite span wing in ground effect using matched asymptotic expansions method
14 p2527 A70-30280

Maneuver load alleviation /MLA/ configurations for wing bending load relief on transport aircraft, showing improved payload and span performance
[AIAA PAPER 70-877] 17 p3016 A70-34813

Flow velocity and pressure on thin wing of small span width near sonic speed, using parabolic type linear equation
18 p3207 A70-36374

Soviet book on passenger aircraft aerodynamics covering motions of gases and immersed bodies, similarity laws, boundary layer theory, finite span wing, etc
18 p3208 A70-36507

Aerodynamic lift, drag and momentum coefficients in supersonic regime for rectangular and trapezoidal wings with spanwise variable profile
22 p3958 A70-42615

WING STALL
U BOUNDARY LAYER SEPARATION
WING TANKS
Nonlinear balance mass solutions for tab-aileron flutter free operation of jet trainer for arbitrary store configuration
17 p3185 A70-34923

Elastic coupling and dynamic equations for flight elastomechanical vibration systems, including tiptanks on aircraft wings
23 p4274 A70-44767

WING TIPS

Turbine blade tip clearance effect on aerodynamic characteristics in nonuniform flow
07 p1187 A70-18980

Carbon dioxide CW laser-Doppler velocimeter for detecting aircraft wing tip trailing vortices by measuring atmospheric aerosols backscatter
12 p2249 A70-27630

Wing tip trailing vortices hazard reduction on closely spaced parallel runways by suction application, discussing power requirements
12 p2207 A70-27631

Aerodynamic characteristics of wing with tip clearance within uniform flow, investigating main stream flow pattern effect
14 p2529 A70-31331

WINGED ROCKET BOOSTERS
U LAUNCH VEHICLES
U WINGED VEHICLES
WINGED VEHICLES
Low operating cost space shuttle system for cargo and personnel transportation to earth orbiting stations involving reusable winged vehicles
[AIAA PAPER 70-242] 07 p1396 A70-20376

Analog computation in supersonic steady flow and digital technique for wing-fuselage and wing-tail interactions
[ONERA-TP-804] 10 p1802 A70-24544

Ram wing tube ground transportation vehicle, analyzing optimum lift-drag ratio and induced power requirements
11 p1975 A70-25966

Cost reduction in designing space shuttle system using reusable winged vehicles, suggesting airlines operations method
[AAS PAPER 70-043] 17 p3175 A70-34785

F-8 wing service life extension design techniques, emphasizing fatigue design curves and procedures
02 p0386 A70-11939

Supersonic flow in dihedral angle between intersecting wings and in space between parallel wings, using integrating wave equation by Volterra method
03 p0407 A70-13492

Boeing 707 aircraft operational efficiency optimization by modification program to extend wing life
03 p0497 A70-14052

Flow phenomena about beating plates, fins and wings, discussing biological and engineering applications
05 p0790 A70-16155

Induced drag dependence on Reynolds number for wings without camber and warping
06 p0967 A70-17257

Aerodynamic characteristics of cylinder with wings in free molecular hypersonic flow of nonequilibrium gas at various angles of attack and slip
08 p1432 A70-21083

Aircraft wing ribs tangents plotting procedure using Monge diagram
08 p1507 A70-21197

Optimal deformation and minimum wave drag for wings with supersonic leading and straight trailing edge, solving variational problem by Ritz method
09 p1604 A70-22444

Gas stream velocity field produced by shock wave impinging against wing moving at supersonic speed
10 p1799 A70-24124

Supersonic aerial target wing synthesis using sandwich construction with graphite-epoxy laminate skins bonded to Al honeycomb, achieving significant weight reduction
12 p2160 A70-27118

Wing and empennage structures automated fully stressed design procedures, discussing application to supersonic aircraft stabilizer
12 p2319 A70-27136

Wing rib structure transient thermal stresses analysis using photothermoelastic method
12 p2327 A70-27982

Air deflection and modulation /ADAM/ turbofan propulsive wing V/STOL design
[AIAA PAPER 69-201] 12 p2162 A70-28087

WINTER

Boron epoxy composite wing structures design, fabrication and testing 16 p2990 A70-33703

Boron-epoxy stiffener reinforced metal wings, examining structural efficiency of multiweb beam aluminum cover skins and Z stiffened panels 16 p2994 A70-34230

Subsonic wing theory calculation method, obtaining close solutions for integral expression constants for downward air currents 19 p3352 A70-38164

One dimensional channel flow theory for ram wings, deriving lift and drag laws for comparison with wind tunnel and free flight tests results [AIAA PAPER 70-971] 20 p3558 A70-39558

Free wing aircraft dynamic characteristics, discussing gust alleviation and handling qualities [AIAA PAPER 70-947] 20 p3561 A70-39580

Optimum light construction design of glider wings, considering spar weight, aluminum honeycomb structure and repair 22 p3962 A70-42961

Continuous trailing vortex sheet rolling up into two discrete vortices, discussing wing lift limitations 23 p4131 A70-43890

Ultrasonic crack detection in fastener holes in C-5A wings 24 p4341 A70-45571

STOL aircraft augmentor wing concept, examining noise suppression, flight research vehicle program and application to turbofan production aircraft [SAE PAPER 700812] 24 p4290 A70-45903

WINTER

Cosmic ray latitude survey in Canada using airport sites, noting ground snow effect on neutron monitor counting rate 01 p0167 A70-10227

Winter diurnal behavior of northern high latitude ionospheric electron density using temperature data from Langmuir probes 03 p0478 A70-13993

Anomalous ionization variations of F 2 layer at northern geomagnetic pole during winter coincident with decrease in solar plasma density 04 p0682 A70-15726

Daily variations of winter stratospheric zonal wind and planetary waves based on synoptic charts from balloon observation 05 p0878 A70-16148

Seasonal variation in ionospheric radiation absorption related to time variation between sunrise and constant angle attainment of sun 05 p0842 A70-16758

Localized numerical weather forecasts via interpolation from primitive equation model outputs, analyzing winter season results in terms of snow prediction 06 p1098 A70-18241

Winter midlatitude electron density trough from length fluctuation of Faraday signal fading period of satellite Explorer 22, noting characteristic seasonal variation 07 p1270 A70-20034

Planetary scale disturbances in winter stratospheric circulation during sudden warming using rocket observations 07 p1274 A70-20272

Winter anomaly ionization in lower ionosphere at medium latitudes from radio propagation observations, comparing wave absorption and phase height measurements 07 p1274 A70-20273

Stratospheric and mesospheric circulation during winter, investigating wind fluctuations using meteorological rocket observations 07 p1274 A70-20274

Synoptic changes associated with midwinter 1967-1968 major stratospheric warming, including pressure and wind distributions and temperature maps 07 p1275 A70-20277

Minor meteor showers radiants determined close to ecliptic plane from systematic visual observations during November, December and January 1961-67 08 p1577 A70-21532

Troposphere-stratosphere kinetic energy transfer during 1967-1968 midwinter warming, comparing calculation by pressure interaction term with direct calculation of vertical velocity fields 08 p1540 A70-21969

Anomalous ionization variations of F 2 layer at northern geomagnetic pole during winter coincident with decrease in solar plasma density 14 p2575 A70-30810

Winter anomaly of radio wave absorption in midlatitude lower ionosphere in terms of meteorological influences and particle influx enhancements 17 p3076 A70-34936

Richardson turbulence criterion computation from measurements during and after winter anomaly 17 p3077 A70-34945

Lower ionosphere electron density and winter anomaly in HF absorption 17 p3077 A70-34948

Winter ionosphere electron density profile from rocket-borne gyro-plasma probe observations 17 p3078 A70-35308

Meteorological observation on atmospheric boundary layer during winter, determining width and inclination of frontal zones 19 p3463 A70-38758

Polar stratospheric winter explosive warmings correlated with solar high energy charged particles injections 20 p3618 A70-39185

Total ionospheric electron content nocturnal and latitudinal variations in winter at midlatitudes 20 p3624 A70-40480

Low latitude boundary of ionospheric absorption during winter anomaly showing enhancement dependence on solar zenith angle 21 p3815 A70-40944

Auroral proton precipitation oval in antarctic winter based on H Balmer line radiation 21 p3882 A70-41091

Midwinter warming period upper stratospheric vertical motion fields, obtaining 2-mb charts 21 p3847 A70-42123

Stationary disturbances in winter Northern Hemisphere stratosphere considered as upward propagating Rossby waves, assuming zonal winds profile 23 p4213 A70-44030

WIRE

ELECTRIC WIRE

EXPLODING WIRES

Stress-strain state of-epoxy resin plates with single or paired wire reinforcement, using polarization-optical method 02 p0384 A70-11664

Heat transfer in Ni wires in laminar air flow from wind tunnel investigation 07 p1420 A70-19064

Size effect on structure and mechanical properties of thin wire made of Mo single crystals deformed in recrystallized state 07 p1308 A70-19611

Compression strength of polyester resin reinforced with hard drawn and softened steel wires, discussing variations from predicted performance 07 p1320 A70-19954

Heat transfer in Ni wires in laminar air flow from wind tunnel investigation 10 p1970 A70-25215

Thin wire glow during corona discharge in metal cylinders analyzed by photomultiplier 11 p2083 A70-25924

Wire sheet reinforcement for resin matrices, discussing mechanical properties, fabrication, bonding, wetting, etc 11 p2071 A70-26346

C-5 aircraft electrointerference coupling minimization, applying classification plan for wire categorization and routing 12 p2201 A70-28131

Twisted bipolar electrode in needle with controlled separation between bare areas for electromyography 12 p2542 A70-30798

Gas tungsten arc hot wire welding operational characteristics and applications 14 p2590 A70-30929

Alumina particles marker transport in Ag wires during early sintering as function of plastic deformation by slip 15 p2745 A70-32392

Backscattering, bistatic scattering and current distribution on thin wires during electromagnetic wave incidence 15 p2700 A70-32412

Ultrasonic Al wire bonding for microelectronic applications, discussing tensile strength dependence on machine parameters and aging 15 p2747 A70-32647

Sandwich wire planar antenna array design, noting electrical performance, ruggedness, volume and weight 16 p2877 A70-33416

Hard wire hermetically sealed two degrees of freedom rotating coupling design for continuous soldered wire connections between spacecraft and oriented solar array 16 p2924 A70-34172

Film boiling heat transfer from horizontal wires to water, using Nusselt condensation model 16 p3003 A70-34198

Pressure, subcooling and diameter effects on liquid nitrogen film boiling on thin horizontal wires, using high speed movies 17 p3194 A70-34742

Stress-strain state of epoxy resin plates with single or paired wire reinforcement, using polarization-optical method 19 p3547 A70-38438

Heat transfer measurement from Pt wire to carbon dioxide near critical pressure, discussing film boiling and free convection flows 21 p3953 A70-42167

Glauert equations applied to trailing wire shape for steady state aerodynamic forces on aircraft and trailing antennas, discussing computer solutions 23 p4131 A70-43893

Liquid nitrogen saturated film boiling from wire at pressures up to critical, discussing liquid-vapor interface configuration 23 p4279 A70-44362

Miniwire method of packaging high density electronic equipment shown in photographs, including OAO applications 24 p4320 A70-46247

WIRE BRIDGE CIRCUITS

NT WHEATSTONE BRIDGES

WIRE CLOTH

Tensile strength of flat specimens of Ni reinforced by W wire gauze 02 p0315 A70-11661

Tensile strength of flat specimens of Ni reinforced by W wire gauze 19 p3452 A70-38435

WIRE GRID LENSES

E plane radiation patterns of E plane sectoral horns enhanced by metallic grills arranged in optimum positions 02 p0270 A70-12734

WIRE MESH

U WIRE CLOTH

WIRE WINDING

Cylindrical coil springs cold winding loading processes, considering initial tension or compression of wire and combined stresses 10 p1894 A70-24297

Force-reduced superconducting toroidal magnet coils built with Cu plated Nb-Zr wire, investigating current enhancement characteristics 23 p4230 A70-44356

WIRELESS COMMUNICATIONS

Miniature temperature and strain telemetry transmitters developed for measurements in areas inaccessible to direct wire connections 06 p1069 A70-18433

Demand assigned domestic satellite communications system with capability of single hierarchy switching and serving terrestrial common carriers and direct users 14 p2552 A70-31351

WIRING

Thermal anchoring of wire or rod components to heat sinks in cryogenic equipment in vacuum 14 p2584 A70-30501

Multiple wiring algorithm for automatic pattern design for Al interconnections and printed wiring in integrated circuits 15 p2715 A70-31842

Aircraft electrical system multiplexing, discussing design features and advantages over conventional hard wired systems [SAE PAPER 700303] 18 p3216 A70-36811

Boeing 747 aircraft passenger entertainment and service system controls electronics design and wire installation improvement by multiplexing techniques 23 p4174 A70-44543

Boeing 747 airliner passenger entertainment and service electronics multiplexing system, discussing cable and connectors selection and design 23 p4174 A70-44544

Superjet airliners wiring connectors for power distribution, signal circuitry and self ejecting push buttons for passenger seats 23 p4174 A70-44545

WIRING SYSTEMS

WOOL

Wool felt based carbon and graphite composite materials for orthogonally isotropic high shear strength compared with rayon felt based composites 13 p2437 A70-28776

WORDS [LANGUAGE]

Analysis method permitting English speech sound recognition by computer for different speakers 08 p1460 A70-20815

Low temperature terminology at December 1969 Paris conference, discussing temperature scale, superconductivity, liquid He, supercooling, subcooling, cryo and cryogenic 14 p2616 A70-31013

Fire and fire test scope and meaning limitations for consumer awareness 23 p4208 A70-43871

Automated Readability Index for technical materials weighting word and sentence length in multiple regression equation 24 p4308 A70-45510

WORK

NT PHYSICAL WORK

Work of plastic deformation in two dimensional rolling determined by energy dissipation function 05 p0857 A70-17017

Systematization of thermodynamic cycles from elementary reversible evolutions concerning exchange of work, heat and combined relations 06 p1173 A70-17470

WORK CAPACITY

- Reduced traction effects on human work performance in weightless and lunar gravity environment
 - 01 p0037 A70-10959
- Frog sartorius muscle heat production and work effect measured under isotonic and isometric conditions, using gradient layer calorimetry
 - 02 p0232 A70-11715
- Mathematical models construction for predicting and measuring air traffic controller workload, using synthetic and analytic methods
 - 02 p0332 A70-11972
- Air traffic control system for intercity and metropolitan VTOL airway reducing pilot and air traffic controller workloads
 - 02 p0335 A70-12135
- Helicopter avionic systems man machine capability estimation based on pilot workload, applying results to design evolution
 - 02 p0244 A70-12136
- Task loading of human operator in terms of central capacity sharing model, discussing model implications for mental workload measurements
 - 02 p0245 A70-12142
- Effect of immersion in thermoindifferent water on circulatory control and work capacity in trained and untrained subjects
 - 02 p0241 A70-12770
- Analog computer model of human cardiovascular control system to reproduce subject response to sub-maximal workload
 - 03 p0438 A70-14081
- Lactate accumulation and anaerobic work threshold in subjects exercised on bicycle ergometer, considering muscle contraction effect on oxygen supply
 - 03 p0431 A70-14293
- Physiological limitations of air traffic controllers, considering stress factors connected with workload
 - 04 p0716 A70-15314
- Catechozamine excretion, cardiovascular functions and subjective effort in healthy male subjects under various physical work loads
 - 05 p0801 A70-16141
- Prolonged wakefulness effect on human work capacity in isolated chamber, determining physical, intellectual and sensory capacities
 - 05 p0809 A70-17117
- Cardiac work limiting factors during exercise under hypoxia, studying cardiac output and coronary blood flow capacities
 - 06 p0991 A70-17282
- Environmental thermal stress effect on human performance under high mental and low physical workload
 - 10 p1812 A70-24505
- Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number
 - 11 p1995 A70-25345
- Hypokinesia effects on working capacity of subjects performing manual aircraft control assignments during bed rest
 - 13 p2352 A70-29340
- Myocardium potential working capacity in relation to diastola duration of ventricles
 - 13 p2355 A70-29767
- Human muscular strength capacity relationship to maximal or submaximal dynamic work performance
 - 16 p2853 A70-33668
- Performance in monotonous work situations, discussing various factors affecting efficiency
 - 18 p3224 A70-36317
- Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number
 - 20 p3589 A70-40457
- Work load effect on ballistocardiogram by minute cardiac force /MF/ measurement, using bicycle ergometer
 - 21 p3763 A70-41233
- Aged conditioned changes in muscular working capacity, relating developments in functionally labile nerve centers
 - 22 p3969 A70-42898
- Epidemiological investigations of coronary disease in Finland, relating customary loads and working capacity
 - 22 p3969 A70-42903
- Low carbon dioxide concentration breathing effects on exercise tolerance, discussing aerobic capacity decrement and hypercapnia occurrence
 - 22 p3973 A70-43637
- Aircraft crew and pilot in-flight work load measurement and simulator
 - [ICAS PAPER 70-43]
 - 23 p4138 A70-44141
- Astronaut work capacity and adaptation during long term flight of space vehicle Soyuz-9
 - 23 p4154 A70-44651

WORK DECREMENT

U WORK CAPACITY

WORK FUNCTIONS

- Oleic acid concentration effects on electron work function during surface-active agent deposition on Fe, Ni, Cu, Al and steel surfaces
 - 01 p0099 A70-10074
- Temperature effect on work function minimum of cesiated W surfaces
 - 01 p0154 A70-10108
- Metal/ferroelectric work functions in c-domain barium titanate crystals in short circuited capacitor, noting effect of electrodes presence
 - 01 p0156 A70-10186
- Mo-Si epitaxial planar Schottky barrier diodes, describing reverse I-V characteristics improvement by edge leakage effects elimination
 - 01 p0052 A70-11174
- Schottky barrier diodes design for wideband radiometer mixers to obtain optimum noise performance and broadband operation by DC bias application
 - 03 p0457 A70-13968
- Anode work functions from cesiated metal surfaces as parameters for thermionic converter systems analysis
 - 04 p0627 A70-14946
- Schottky barrier FET fabrication using epitaxial growth of single crystal GaAs on insulating sapphire substrate
 - 04 p0660 A70-15364
- Work function measurement for adsorption of diatomic I, Br and Cl on W crystal using electron beam retarding potential method
 - 05 p0891 A70-15973
- Electron work function variation of W in Ba-Cs-Sr vapor combinations determined using thermionic diode
 - 05 p0891 A70-15974
- Chromium films obtained on tungsten by sputtering, studying structure and work function at various temperatures
 - 08 p1516 A70-21123
- Schottky barrier diodes microwave power rectification efficiency, developing diode losses theory based on back capacitance, series and front resistance and knee voltage
 - 08 p1474 A70-21274
- Al n-type Si Schottky barrier diode characteristics, discussing I-V, barrier height, temperature dependence, photoemission, LF noise, etc
 - 09 p1644 A70-22210
- Volt-ampere characteristics of metal-semiconductor contacts for Schottky barrier diodes, investigating suppression of minority carriers and frequency response
 - 09 p1741 A70-23352
- Germanium, silicon and gallium arsenide point contact and Schottky barrier diodes as submillimetric wavelength detectors and mixers
 - 11 p2017 A70-25736
- Work and energy theorems in linear elasticity, discussing potential energy, real work, complementary energy and energy coefficients
 - 11 p2142 A70-26625
- Nomographic Richardson-Dushman equation solutions for thermionic electron emission devices, giving current density for various work functions and electrode temperatures
 - 12 p2271 A70-26894
- Surface parameters influence on energy transfer to arc jet anode, discussing work function, accommodation coefficient and diffuse reflection coefficient of electrons
 - [AIAA PAPER 69-107]
 - 12 p2281 A70-27809
- Surface oxidation effects on thermionic work functions of Be determined by visual observation and X ray diffraction patterns analysis
 - 12 p2288 A70-28004
- Nb single crystal faces electron work functions and comparison of thermionic emission patterns with Ba-Nb system
 - 14 p2625 A70-30162
- Electronegative adsorbate effect on work function of Ba-W system
 - 18 p3298 A70-37111
- Critique of paper on electron diffraction study of Ce adsorption on W surface, discussing electron work function changes and data discrepancies
 - 19 p3473 A70-37548
- Cesium films structure and work function on W /011/ face, discussing order-disorder transition
 - 19 p3487 A70-37817
- Gadolinium surface work function from contact potential difference against platinum
 - 20 p3687 A70-39996
- Temperature and bias voltage dependence of zero bias tunneling structure in p-type GaAs-Au Schottky junctions
 - 21 p3863 A70-41917
- Low noise GaAs Schottky barrier beam lead mixer and chip style diodes, discussing fabrication and performance
 - 22 p3998 A70-43333

WORK-REST CYCLE

- Precious metals, measuring tension, grinding and polishing induced surface plastic deformation effects on electron work function and exoemission
 - 23 p4204 A70-43927
 - Krylov-Bogoliubov virtual work principal, investigating nonlinear vibrations, extending to heteronomous vibrations
 - 23 p4266 A70-44028
 - Surface potential and electron work function of single crystal plane W/110 under zero-field and strong-field conditions
 - 23 p4230 A70-44797
- ## WORK HARDENING
- ### NT STRAIN HARDENING
- Propagation equations for spherical waves in elastoplastic work hardening materials
 - 03 p0585 A70-12972
 - Surface work hardening and stress concentrations effects on fatigue strength of alloy under asymmetric tension and compression load cycles at high temperatures
 - 04 p0707 A70-15270
 - Surface work hardening effects on steels resistance to low cycle fatigue with stress concentration, applying results to aircraft parts
 - 06 p1085 A70-17403
 - Shot delivery per second per unit area from ejector nozzle during shot peening, determining ideal delivery rates for shot of various sizes
 - 07 p1291 A70-18830
 - Ti additions influence on steel work hardening, specific weight, magnetic properties and structure
 - 08 p1515 A70-20924
 - Elastic-plastic work hardening sandwich arch under given loading rate analyzed for stress rates using integral equation
 - [ASME PAPER 69-APM-21]
 - 08 p1593 A70-21616
 - Yield stress and work hardening properties of tension-deformed vanadium single crystals as function of purity
 - 08 p1522 A70-21750
 - Work strengthening and microstructure of Co-Ni base alloys containing Cr and Mo, discussing deformation induced martensitic transformation
 - 09 p1705 A70-22806
 - Elastoplastic compressible sheet metals reinforced by isotropic work hardening under action of bending moments, analyzing stresses and strains
 - 10 p1955 A70-24056
 - Nitrogen content effect on proportional limit and work hardening rate of austenitic stainless steel at 302 F
 - 10 p1905 A70-25169
 - Phenomenological theory of crack propagation during fatigue experiments, noting role of work hardening
 - 13 p2510 A70-28672
 - Minimum principles for rate solution in elastoplastic work hardening materials with regular yield surface
 - 13 p2513 A70-29152
 - Piecewise linear elastoplastic matrix structural theory with interacting yield planes, discussing kinematic and isotropic hardening
 - 14 p2656 A70-30475
 - Al-Mg alloy sheets work hardened plastic properties, tensile strength and elongation
 - 14 p2597 A70-30962
 - Work hardening and tempering effects on Al-Mg alloy stress corrosion and mechanical properties
 - 14 p2597 A70-30963
 - Work hardening properties of Ni single crystals of various orientations during intermittent and continuous plastic deformation
 - 15 p2762 A70-32394
 - Work hardening maxima of alpha-Ti as function of strain rate and temperature
 - 19 p3451 A70-37568
 - Steady state ultraharmonic oscillations of first and third order in yielding systems with linear work hardening law
 - 19 p3542 A70-38059
 - Notched sheet failure prediction based on Dugdale crack model, including work hardening and finite width effects, strain fracture criterion and yield failure mechanism
 - 19 p3548 A70-38624
 - Elastoplastic work hardening continua incremental boundary value problem with allowance for distributed dislocations, using quadratic programming concepts
 - 19 p3549 A70-38667
 - Bcc metals and alloys stress relaxation, internal stress and work hardening, discussing temperature dependence and dislocation motion
 - 20 p3647 A70-39108
- ## WORK-REST CYCLE
- Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement
 - 03 p0423 A70-13711
 - Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement
 - 03 p0425 A70-13895

Human alveolar-arterial oxygen differences during rest, sleep and exercise in initial hypoxia induced by simulated high altitude exposure

03 p0429 A70-14161

Biological rhythm perturbations effect on astronauts, emphasizing waking-sleeping rhythm during space flights

04 p0630 A70-14610

Human skin temperature variations in supramuscular areas under physical activity and rest

04 p0638 A70-15505

Synchronous variations in skin and muscle temperatures of musculus gastrocnemius and flexor carpi in human subjects performing intermittent physical exercises

04 p0639 A70-15506

Skin-muscle temperatures ratio variations in dogs during periods of activity and rest

04 p0639 A70-15508

Activity and rest alternation effect on fatigue and rehabilitation behavior of trained athletes, discussing muscle performance characteristics

04 p0639 A70-15510

Physical exercise and rest regime evaluation by thermoelectric method recording skin temperature above gastrocnemius muscle

04 p0640 A70-15513

Wake-sleep rhythm of spacecrews for operational capacity to maintain constant watch of spacecraft, suggesting recreation of terrestrial time cycle in space

05 p0799 A70-15766

Postrest upswing or muscles warm-up in motor skill learning

05 p0803 A70-16671

Hypoxia effect on self paced work behavior of humans

05 p0803 A70-16672

Physical training effects on sedentary men with stable activity pattern, recording heart rates and oxygen uptake

07 p1215 A70-20171

Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement

11 p1985 A70-25511

Continuous active work effects on human sensorimotor performance, comparing latency distributions in mass and spaced practice groups

12 p1278 A70-27046

Daily electrolyte excretion dynamics of subjects with shifted work-rest schedule, noting disagreement with Scharp results

13 p2358 A70-29343

Closed circuit respiration studies on subjects at rest and work, demonstrating potassium superoxide as oxygen source in breathing apparatus

15 p2688 A70-31500

Circadian rhythmical changes in biological organisms by earth rotation, emphasizing diurnal variations role in sleep-wakefulness rhythm

15 p2680 A70-31742

Mechanisms responsible for sleep-wakefulness rhythm, investigating effect of lesions in CNS, electrical excitation of brain, neurons activity, etc

15 p2680 A70-31744

Airline pilots sleep patterns during worldwide east-west routes, considering modification by irregular duty periods and time zone adaptation

15 p2689 A70-31882

Aircraft crew oral temperature related to work-rest schedules, discussing hypothermia, flight stress and in-flight depression

17 p3032 A70-35563

Thermoregulation of hedgehogs during muscular activity in cold environment, recording electrical activity, oxygen consumption and body temperature during work-rest cycles

18 p3219 A70-36542

Athletes ventilation and heart rate dynamic responses to supine leg exercise with sinusoidal work load

20 p3576 A70-40329

Human leg blood flow distribution between deep and superficial veins during alternate treadmill work-rest periods

21 p3767 A70-42160

WORKING FLUIDS

Heat transfer data for rotary piston and conventional piston engines, studying compression energy losses due to working fluid leakage

05 p0897 A70-17002

Heat pipe structural alloys compatibility with different working fluids using capsule tests at high temperatures, noting corrosion behavior

07 p1304 A70-18812

Electrodynamic compressor with direct conversion of electric energy into mechanical energy, improving conversion efficiency by using plasma as working medium

07 p1196 A70-19658

Multiple pass tube heat exchangers efficiency, solving energy and heat transfer equations from fluids homogeneity and constant thermal capacity considerations

08 p1596 A70-20613

Electrodynamic generator channel electric field model, evaluating electric body forces on ionized working fluid flow

10 p1807 A70-24571

Molecular densities and population inversion pulse shape in working gas in mixture with thermally excited auxiliary gas

10 p1920 A70-25112

Reciprocating Rankine-cycle engine with organic working fluids, noting piston speed and efficiency

[SAE PAPER 700162] 11 p1982 A70-25372

Book on engineering aspects of MHD power generation, discussing working gas ionization and electrical conductivity, incompressible conducting fluid motion in magnetic field, etc

11 p1982 A70-25525

Working body properties effects on one component liquid-metal MHD system efficiency with vapor condensation cycle

12 p2164 A70-27329

Asynchronous liquid metal MHD generator parameters, assuming constant vertical distribution of working fluid velocity

13 p2349 A70-28968

Axial-flow compressors stall characteristics measurement using water as working fluid

13 p2341 A70-29446

Liquid metal level indicators and resistance type level meters for turbines using alkali metal as working media

14 p2587 A70-31010

Radiative properties of construction properties and working media, noting importance to radiative heat transfer calculation

15 p2827 A70-32143

Power plant using carbon dioxide planetary atmosphere as working fluid, noting weight reduction

15 p2828 A70-32262

Electrodynamic compressor with direct conversion of electric energy into mechanical energy, improving conversion efficiency with plasma as working medium

15 p2678 A70-32695

Al radiator with thin stainless steel tube liner using liquid metal coolant tested for heat rejection system of SNAP-8 Rankine cycle power system

[AIAA PAPER 70-855] 16 p3000 A70-33922

Metal corrosion effects in Rankine cycle lithium-boiling potassium test loop simulating working fluids of spacecraft nuclear turbopropulsion system

16 p2933 A70-34204

Working fluid /Ar/ purity and stability effects on fatigue life and creep of Nb and Mo alloys using gas analysis, microstructure and microhardness data

17 p3126 A70-35715

Liquid metal MHD power conversion system with Cs and Li as working fluids, describing hydraulic, electrical and high temperature tests results

20 p3680 A70-39986

Effective dissociation potential measurement for alkali compound seed in MHD generator working fluid

20 p3682 A70-40159

MHD generators nonequilibrium ionization improvement by blowing low work function particles into cold working gas to obtain required conductivity

21 p3855 A70-40794

Space vehicles dimensions effects on working fluid mass and power required for orientation

21 p3927 A70-40826

Working fluids liquid property variations effects on cryogenic heat pipe performance

21 p3946 A70-41043

Liquid or vapor phase working fluids penetration effects on steady state and transient performance of hot reservoir gas controlled heat pipes

21 p3946 A70-41047

Heat pipe performance map with ammonia as working fluid, comparing thermal transport efficiency with water pipe

21 p3947 A70-41050

Mercury as stainless steel heat pipe working fluid, determining wetting characteristics and heat transfer capability

21 p3947 A70-41051

Working body properties effects on one component liquid-metal MHD system efficiency with vapor condensation cycle

21 p3760 A70-42070

Equilibrium performance of closed Stirling cycle with chemically reactive gas as working fluid, discussing power density and thermal efficiency

22 p3982 A70-42756

Plunger pump for aircraft hydraulic systems, measuring working fluid temperature effect on cavitation

22 p3965 A70-42817

Working medium excess and absolute pressure effects on pneumatic elements characteristics

22 p3967 A70-43566

German monograph on casing and hub wall friction effects on three dimensional flow in turbocompressors in subsonic compressible working fluids

24 p4287 A70-45096

WORLD U EARTH [PLANET]

WORLD DATA CENTERS

Worldwide Apollo data transmission network emphasizing computer operations for message collection and distribution, command and telemetry processing, etc

06 p1005 A70-17310

Earth Resources Data Processing Center magnitude and facility planning compared with NASA centers

[AIAA PAPER 70-324] 09 p1793 A70-22863

WRINKLING

NT FLANGE WRINKLING

Tension rays and load transfer from compact member via wrinkled membrane determined by variational technique using maximum strain energy

12 p2322 A70-27225

Postwrinkling nonlinear behavior of conical shell of revolution subjected to bending loads

[AIAA PAPER 69-90] 12 p2326 A70-27816

WROUGHT ALLOYS

Monograph on elevated temperature strength data for wrought austenitic stainless steels, considering yield, tensile, creep and rupture strengths for allowable stresses

03 p0510 A70-13300

Grain size, forging parameter and microstructure effect on stress-rupture properties of wrought Ni-base alloy

03 p0511 A70-13567

Ni-Nb intermetallic compound precipitation effect on various phase formations in strained samples of Alloy 718 /wrought Ni base alloy/

03 p0511 A70-13568

Interrelation of precipitation state, mechanical properties and electrical conductivity of wrought aluminum age hardened alloy under varied heat treatment conditions

07 p1294 A70-19389

Wrought aluminum based high strength alloys structure and mechanical properties

08 p1522 A70-21708

Electroslag melted titanium wrought shapes mechanical properties, comparing with double vacuum arc melted material properties

17 p3112 A70-34356

Ultrasonic delta technique inspection method for flaw detection in weldments or wrought materials

24 p4335 A70-45572

Drilling machinability of wrought Al alloys, relating tool force to hardness, feeding and cutting speed

24 p4349 A70-46195

X

X BAND

U SUPERHIGH FREQUENCIES

X RAY ABSORPTION

Spectral distribution of X ray atmospheric absorption used to determine high energy photoelectrons spectrum

01 p0172 A70-11494

Laser produced plasma temperature measurements using method of X rays selective transmissions through different absorbing films

06 p1081 A70-17596

Cosmic X rays interstellar absorption, giving atomic He total photoionization cross section

18 p3308 A70-36899

High temperature gas boundary layer flows with or without magnetic fields, discussing measurement by X ray absorption technique

19 p3405 A70-38192

D region ionization budget, evaluating short wavelength X rays role

23 p4236 A70-43860

X RAY ANALYSIS

NT LAUE METHOD

Abnormal burning surface regression in rocket motor solid propellant detected with flash X ray exposures

01 p0085 A70-10021

X ray topography of postannealing substructure of neutron irradiated W and Mo single crystals, indicating increase in disorientation

01 p0115 A70-10065

Petrological, X ray and chemical analyses of Muzaffarpur Ni-rich axinite, showing kamacite, taenite and minor schreibersite composition

01 p0177 A70-10328

Microprobe analyzer for light elements using electronic optics probe, sample visualization devices and equipment for X photon detection and measurement

[ONERA-TP-774] 02 p0275 A70-12210

X ray metallography methods applied to high temperature protective coating development, refractory alloys strengthening and metal fatigue studies

04 p0711 A70-15706

X-ray line broadening analysis for lattice damage in kamacite phase of Fe meteorites, evaluating particle size and elastic strain

05 p0915 A70-16828

Isothermal sections in Ti-Ni-B, Mo-Ni-B and W-Ni-B at 800 C determined by X ray analysis

06 p1090 A70-17846

Isothermal section determination in Mo-Cr-B at 1000 C using X ray, metallographic analyses and microhardness measurements

06 p1090 A70-17847

Percentage changes in X ray calibration wedge mass equivalency to actual changes in bone Ca content

06 p0997 A70-18015

Binary CdSb-CdTe systems investigated by X ray and microstructural analyses; showing mechanical mixture constitution and p-type conductivity

07 p1355 A70-18701

X ray structural and electrophoretic investigation of donor and fibrinolytic blood protein components, observing crystalline to amorphous transition in blood serum and plasma lyophilization

09 p1621 A70-23149

Stacking faults developed in double hexagonal closed-packed phase of Ni-Ti alloy in cold worked and annealed conditions, using X ray line broadening

10 p1906 A70-25228

Cinedensigraphic analysis of diaphragmatic ventilatory movements, obtaining correlation between lung volume and diaphragm and rib cage movement

14 p2537 A70-30383

Thermoluminescence, X ray and stored energy measurements of Apollo 11 samples, comparing surface outputs to interior

21 p3916 A70-41665

Short pulse length X ray flash electro-optical recording equipment for explosive processes, describing technique, experimental setup, optical characteristics and information retrieval [SMPT PREPRINT 69]

22 p4037 A70-43071

X ray analysis - Conference, University of Denver, August 1969

23 p4243 A70-44414

Potassium acid phthalate crystal X ray spectrometric properties measurements, discussing parallel position rocking curves and reflection coefficients

23 p4230 A70-44420

X RAY APPARATUS

He camera with reduced linear absorption coefficient for contact microradiography, relating exposure, X ray wavelength and atmosphere

01 p0084 A70-10013

Backreflection X ray microbeam camera with arrangement for positioning preselected area to study grain boundary during creep by Laue method

03 p0492 A70-13759

Thermoluminescent glass X ray dosimeter sensitivity tested as function of rigidity of gamma and X radiation, noting compensating filters for incident radiation

08 p1496 A70-21217

High speed X ray flash motion picture installation for ballistic photography [SMPT PREPRINT 76]

22 p4037 A70-43068

Time resolving X ray grating polychromator, discussing photoelectric attachment with surface barrier semiconductor detectors

22 p4037 A70-43069

Radiography using projective magnification from X ray tube with small focal spot, describing equipment and applications

24 p4337 A70-45707

Thermonuclear spacecraft propulsion, comparing X ray pumped gas laser and ion drive systems

24 p4377 A70-46211

X RAY ASTRONOMY

X ray line emission from Sco X-1 using Monte Carlo estimates of spectral distribution of scattered photons in terms of Fe line and cosmic abundance

01 p0169 A70-10338

Pulsed high energy X rays from Crab Nebula pulsar NP 0532 measured by balloon-borne X ray telescope

01 p0169 A70-10345

Sco X-1 high energy X ray emission intensity changes observed by balloon-borne telescope

01 p0169 A70-10346

Gamma ray astronomy using balloon-borne telescope with digitized spark chamber

02 p0364 A70-11785

Celestial X rays from Cygnus XR-1 detected during high altitude balloon flight, noting compatibility with black body radiation or hot thin plasma

02 p0356 A70-11786

Polarization of nonspherical plasma emission region in thermal X ray stars

02 p0357 A70-11787

X ray source Sco XR-1 proper motion using photometry, suggesting association with Scorpius-Centaurus complex of young disk stars

02 p0372 A70-12248

X ray source GX341-6 with soft spectrum detected in Aras constellation by Aerobee rocket, including neighboring X ray sources in determining galactic coordinates, positions and fluxes

02 p0372 A70-12249

Cosmic X ray background interpreted as Compton collisions between cosmic black body photons and relativistic electrons in radio sources

02 p0360 A70-12792

Cosmic x ray astronomy in near future for source detection concerning spectral bands, polarization, position, instrumentation, etc

02 p0304 A70-12794

Cosmic X ray astronomy, discussing existing techniques, limitations, use of onboard computers and future requirements

02 p0304 A70-12795

Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature

03 p0557 A70-13220

Gamma ray astronomy experiments, discussing likelihood method for analyzing and reporting results

03 p0559 A70-13810

Spectral index for diffuse X ray sky background within specific band determined from rocket observations with wide angle telescope

03 p0479 A70-14223

VLF radio monitoring of celestial X ray fluxes from ground for long periods, discussing ionospheric D region conductivity

04 p0739 A70-14521

Intensity and spectral distribution measurement techniques for nonvisible extraterrestrial radiation, discussing rocket spectroscopy results

04 p0757 A70-15648

Energy spectra of cosmic diffuse X ray component and distribution over northern sky, determining Crab Nebula and Cygnus spectral characteristics

05 p0901 A70-16305

Solar activity study based on solar X ray spectra observation, considering flare mechanism

05 p0903 A70-16719

X ray source position determination by balloon observations, estimating intensity in different energy ranges

05 p0904 A70-16978

Sco X-1 line spectra search in X ray spectrum by rocket-borne proportional counters, noting iron line emission

05 p0904 A70-16979

Rapid fine structure in hard solar X ray bursts observed by OSO-5, explaining time structure by mechanism based on repetitive production of monoenergetic electrons

05 p0904 A70-16980

Sco X-1 simultaneous X ray and optical flares correlation and X ray enhancements

08 p1561 A70-20900

Shear and rotation limits on universe from X ray background, using Euclidean shear and vorticity models with open and closed geometries

08 p1561 A70-20901

Neutron star X synchrotron radiation from gas accretion producing strong magnetic field with high electron temperature

08 p1563 A70-21653

Angular size measurement for galactic X ray sources in Sagittarius region using modulation collimator aboard sounding rocket

09 p1744 A70-22521

X ray fluxes upper limits from quasars 3C 196, 3C 186 and 3C 380 measured by balloon flight experiments

09 p1745 A70-23271

Universal X ray background as superposition of nascent pulsars in various galaxies, using Crab Nebula pulsar as guide

09 p1748 A70-23792

Gamma ray astronomy above 10 Mev, investigating intensity dependence on galactic latitude and radiation detection technology

10 p1931 A70-24067

Cosmic rays, particles and fields physics in relation to radio and X ray astronomy

10 p1931 A70-24410

Pulsars in supernova remnants emitting X rays

10 p1933 A70-24627

X ray astronomy, discussing emission processes, radiation classification for intensity plot against energy, cosmic sources distribution, etc

11 p2111 A70-26035

Cosmic X ray sources, considering locations, fluxes and angular sizes from Aerobee rocket observations

12 p2292 A70-27384

Cosmic X ray sources searched for by Aerobee rockets, noting locations and distribution correlation with galactic novae

12 p2292 A70-27385

Night sky X ray sources at low galactic latitudes, describing rocket survey experiment

12 p2292 A70-27386

Cosmic gamma rays observation by balloon flight and satellite with scintillation detector, tabulating counting rates in pulse height channels relative to Crab Nebula

12 p2292 A70-27387

X ray source from Coma cluster of galaxies, interpreting observed flux on basis of missing mass suggested by Virial theorem

12 p2293 A70-27388

Beryllium proportional counters for satellite X ray astronomy, noting long term stability and environmental resistance

12 p2232 A70-27403

Diffuse cosmic X and gamma ray background radiation isotropic component

12 p2295 A70-27887

Bragg reflecting crystals for spectroscopy and polarimetry in X ray astronomy

13 p2489 A70-28904

Cosmic rays and cosmic X rays, considering galactic and extragalactic sources, diffuse background, detection devices, etc

13 p2477 A70-29160

Galactic X ray stars and X ray sources positions, appearance frequency and intensities

13 p2495 A70-29818

Light elements detection in interstellar grains by observing halo around X ray source arising from small angle scattering

14 p2631 A70-30539

Angular size of high energy X ray source in Crab Nebula from balloon-borne X ray modulation collimator

14 p2631 A70-30789

Total Absorption Shower Cascade (TASC) detector for gamma ray astronomy space, discussing energy and angular resolution

14 p2587 A70-31004

X rays and primary cosmic radiation intensity measurements near top of atmosphere, describing rocket payload and launch

14 p2632 A70-31307

Planetary gamma and X radiation by remote sensing and passive observation for gross chemical composition

15 p2793 A70-31749

X ray differential drift scans of moon, measuring cold limb brightness temperature and temperature distribution

16 p2974 A70-33646

X and gamma ray astronomy instrumentation, point sources, continuum emission, line spectra, etc

16 p2976 A70-33721

Sounding rocket X ray survey of Cassiopeia region for supernova remnants and galactic source distribution

17 p3153 A70-34528

Luminous nebulae near Sco X-1 indicating H beta emission

17 p3156 A70-34829

X ray spectrum analysis for Crab, Cas A and SN 1572 supernova remnants

17 p3156 A70-34830

Simultaneous measurement of optical and X ray emission from Scorpius X-1 and X ray diffuse background, using rocket-borne scintillation counter

17 p3157 A70-34831

X ray observations of Crab Nebula

17 p3164 A70-35115

Centaurus A radio galaxy X ray survey, implying upper limit of background radiation temperature

18 p3308 A70-36516

Extragalactic objects 3C 273 NGC 5128 and M87 X ray emission detection, using proportional counters on Aerobee 150 rocket

18 p3310 A70-37016

Soft X ray extended source in Cygnus Loop, indicating supernova remnant

18 p3310 A70-37022

Sco X-1 X ray source properties in 16-111 keV energy interval, using balloon-borne detectors

19 p3505 A70-38116

Cosmic X ray background measurements, describing ESRO R/73 experiment

19 p3512 A70-38491

Nonsolar X and gamma ray astronomy - Conference, Rome, May 1969

21 p3870 A70-40651

X ray astronomy instruments on sounding rockets, balloons and satellites, investigating sources distribution on celestial sphere

21 p3821 A70-40652

X ray astronomy proportional counters sensitivity, reducing higher energy radiation background contribution

21 p3821 A70-40653

Pulsar NP 0535 X rays detection by ground based observations of upper air fluorescence

21 p3871 A70-40654

COS-B satellite cosmic X ray experiment with high sensitivity and long pointing time for extragalactic sources discovery

21 p3871 A70-40655

Galactic and extragalactic discrete cosmic X ray sources by rocket observation with narrow slit collimators

21 p3871 A70-40656

Cosmic hard X ray sources spectra and time variations by balloons and OSO-3 satellite observations of Crab Nebula

21 p3872 A70-40657

Virgo XR-1 rocket observations, discussing X rays due to synchrotron emission of relativistic electrons

21 p3872 A70-40658

Hard X ray sources energy spectra in 20-120 keV range by balloon flights, presenting Sco X-1 intensities

21 p3872 A70-40660

X ray intensity sudden changes in 29.9-52.3 keV range from Sco X-1, correcting for atmospheric attenuation

21 p3872 A70-40661

X RAY DENSITY MEASUREMENT

X ray sources location, distribution and spectral characteristics, investigating emission from supernova remnants

21 p3872 A70-40662

Balloon-borne measurements of hard X radiation from direction of Virgo

21 p3872 A70-40663

Cyg-X-1 X ray source angular size and position measurements by balloon-borne collimator

21 p3873 A70-40665

Sco X-1 X ray emission data from rocket-borne measurement, indicating Fe K-emission from high ionization states

21 p3873 A70-40667

Optical photometric observations of nonsolar gamma and X ray sources WX Cen, NGC 5189 and GX3 plus 1

21 p3873 A70-40669

X ray sources spectra, discussing distribution, supernova remnants, pulsars nebulae, optical spectra and general characteristics

21 p3873 A70-40670

X ray source optical identification, discussing reflector optics, photometry and spectrography

21 p3873 A70-40671

Magnitude-color relation for Cygnus X-2 and WX Centauri, indicating opposite correlation to Sco X-1 fluctuations

21 p3873 A70-40672

Proper motion evidence for existence of X ray stars associated with Sco X-1 and Cen X-2, indicating formation by neutron stars

21 p3873 A70-40673

X ray emission from Crab Nebula pulsar by rocket-borne proportional counters, comparing with optical observations

21 p3874 A70-40674

Pulsed hard X and gamma rays from NP0532 pulsar in Crab Nebula, comparing with extrapolated optical data

21 p3874 A70-40675

X ray emission mechanisms in galactic sources, considering black body, supernova remnants, synchrotron radiation, etc

21 p3874 A70-40679

Discrete X ray and gamma ray sources theories, considering binary and gas stream models

21 p3874 A70-40680

Stellar coronas X ray fluxes from models of convection zones and corresponding mechanical energy fluxes

21 p3875 A70-40681

Cygnus X-2 point X ray source, establishing as spectroscopic binary with peculiarities

21 p3875 A70-40682

Extragalactic gamma ray and X ray intensity with power law spectrum, comparing galactic plane and high latitude spectra

21 p3875 A70-40687

Galactic or extragalactic origin of diffuse X ray background, reporting sky survey results

21 p3875 A70-40688

Diffuse background cosmic X rays in energy range 20-120 keV from balloon observations

21 p3876 A70-40689

Diffuse background of 2-20 keV X rays over Scorpius to North Galactic Pole sky band by rocket measurements

21 p3876 A70-40693

Soft X ray flux emanation from galactic disk, discussing latitude dependence, interstellar H, maps and discrete sources nature and properties

21 p3878 A70-40707

Gamma ray background anisotropy effects of Sgr A flux arising from Compton scattering and neutral pion decay, discussing complex radio and IR structure

21 p3878 A70-40926

M1 X ray emission, examining energy interval and power law spectral distribution

21 p3882 A70-41155

Galactic distribution of supernova remnants and association with pulsars and X ray sources

21 p3892 A70-41188

Strong newborn X ray source detection during balloon flight, showing softened low energy spectrum

21 p3892 A70-41190

M87 radio observations at 5 GHz, examining central region components, optical nucleus and jet and X ray emission

21 p3923 A70-42103

Orientation system for pointing balloon-borne X ray detector using flux gate magnetometer, DC amplifier and motor control relay circuit

21 p3831 A70-42249

X ray sources celestial positions in Sagittarius region, using rocket-borne rotating modulation collimator

22 p4094 A70-42928

Radio emission searched for X ray sources near Sagittarius

22 p4094 A70-42930

Scorpius X-1 X ray line emission, discussing continuum and background counts and cosmic abundance of iron

22 p4094 A70-42931

Galactic plane scanned observation of X ray sources, using large area proportional counter rocket sounding

22 p4094 A70-42986

Simultaneous X ray and optical observations of Scorpius XR-1, comparing rocket data from various flights

22 p4094 A70-42987

Cosmic X ray sources astronomic observations and implications, considering Crab Nebula, galaxies, constellations, diffuse background radiation, etc

23 p4243 A70-44415

Soft X ray astronomical instrumentation for space experiments, discussing Geiger tubes, gas counters, modulation collimators, telescopes, etc

23 p4196 A70-44416

Soft X ray slitless spectrometer with gold-shadowed transmission gratings for rapid astronomical spectral surveys

23 p4196 A70-44418

High Energy Astronomy Observatory for space X rays, gamma and cosmic rays research via unmanned spacecraft

23 p4261 A70-44680

Crab Nebula X ray pulsation identified with pulsar NP 0532 by rocket measurements, noting implications for interstellar dust density

24 p4401 A70-45371

UV Ceti type variable flare stars, observing radio and optical spectral regions for X ray production

24 p4397 A70-45763

Class 1b solar flare X ray examination, using rocket-borne liquid N cooled solid state detector

24 p4397 A70-45767

Excess galactic X rays, discussing synchrotron emission of high energy cosmic ray electrons

24 p4398 A70-46161

X RAY DENSITY MEASUREMENT

Sco X-1 high energy X ray emission intensity changes observed by balloon-borne telescope

01 p0169 A70-10346

Amplitude modulated pearl type geomagnetic micropulsations connected with auroral X ray emission variations

01 p0171 A70-11228

VLF recordings and X ray flux measurements simultaneous analysis indicating evidence of relation between dawn chorus and electron precipitation, noting ELF whistler development

02 p0293 A70-12689

Two phase density and void fraction measurement using beta, gamma and X ray radiation, considering optimal accuracy and beam collimation

02 p0305 A70-12835

Flare rising from behind solar limb deconvoluted by simultaneous recording by OSO III X ray detector and photoheliograph

03 p0558 A70-13589

X ray flux pulsations for pulsars near Crab Nebula observed in 2.5-30.0 keV range, determining pulsation profile

03 p0578 A70-14358

Balloon observations of Cen XR-2 X ray emission decrease

10 p1948 A70-24999

Sgr gamma-1 source, determining upper limit on soft X rays intensity

13 p2475 A70-28615

Plasma temperatures of X ray flux from laser induced breakdown plasmas in air, using absorption spectrometer

15 p2750 A70-31753

Crab Nebula X ray flux pulsations, analyzing spectra

17 p3152 A70-35756

Soft X ray flux emanation from galactic disk, discussing latitude dependence, interstellar H, maps and discrete sources nature and properties

21 p3878 A70-40707

X RAY DIFFRACTION

Precipitation in Ni-base superalloy analysis with dark field electron microscopy and electron and X ray diffraction

01 p0119 A70-10730

Martensite structure, discussing intensity anomalies in X ray diffraction pattern of intermetallic Ni-Nb

01 p0121 A70-10900

X ray diffraction method to determine degree of orientation of crystallites in extruded graphites

03 p0517 A70-13964

Orthorhombic form of crystalline formylmethionine transfer RNA, obtaining Patterson function from three dimensional X ray diffraction data

05 p0803 A70-16947

Neutron irradiation and annealing effects on lattice constants of titanium and chromium carbides analyzed for X ray diffractions

07 p1303 A70-18702

Apollo 11 lunar material X ray diffraction and microscope studies, noting chemical composition agreement with Surveyor 7 data

09 p1752 A70-22245

Residual macrostress measurement by X ray diffractometer methods

11 p2058 A70-26839

High modulus carbon fibers low angle X ray diffraction correlation to physical properties

12 p2259 A70-28050

Phase equilibrium of Fe-rich Fe-Al alloys using single crystal X ray diffraction

19 p3452 A70-37838

SiC whiskers X ray diffraction studies of crystal structure, suggesting single crystal permanent deformation at ambient temperatures

19 p3455 A70-37941

Bcc metals, measuring correlation between residual stress level and fatigue damage by X ray diffraction analysis

23 p4207 A70-44422

Ni base superalloys gamma prime phase long range order parameter measured by X ray diffraction

23 p4207 A70-44423

Residual stress measurement using programmed horizontal X ray diffractometer

24 p4425 A70-45729

X RAY FLUORESCENCE

K shell X ray production by proton impact compared with binary encounter impulse approximation

14 p2620 A70-31362

X ray fluorescence determination of thickness and composition of Permalloy films deposited on wire surface

18 p3258 A70-36466

Planetary atmospheres X ray fluorescence, calculating Mercury, Venus, earth, Mars and Jupiter emissions

22 p4105 A70-43230

X RAY FLUORESCENCE ANALYSIS

U X RAY ANALYSIS

U X RAY FLUORESCENCE

X RAY INSPECTION

Programming device for positioning samples under X ray beam in testing welded seams and parts

02 p0301 A70-12488

High energy neutron accelerator as fast neutron radiography source, comparing contrasts with gamma and X radiography

05 p0844 A70-15779

Ni-Cr content and variability in Ivory Coast tektites using atomic absorption and X ray emission techniques

05 p0916 A70-16837

X ray laminography for nondestructive testing based on synchronous rotation of source, sample and image forming planes

10 p1895 A70-24577

X ray inspection with direct TV viewing, discussing specimen geometry effects, equipment, applications, etc

15 p2742 A70-32778

Coating thickness measurement and analysis by radioisotope techniques including beta-particle, X or gamma ray backscatter and X ray fluorescence and absorption

15 p2742 A70-32780

X ray attenuation factor calculation as function of radiation energy and test material nature and thickness for nondestructive defectoscopy

24 p4341 A70-45581

Radiography using projective magnification from X ray tube with small focal spot, describing equipment and applications

24 p4337 A70-45707

X ray films sensitometric investigation in medical and industrial radiography, evaluating HVL and ISO methods for X ray quality

24 p4337 A70-45710

Wire and hole type penetrometers minimum perceptible image contrast level on radiograph, considering X ray quality and films effects

24 p4337 A70-45713

Automatic TV radioscopic X ray control for mass NDT of refractories and grinding wheels

24 p4368 A70-45723

Fluoroscopes for radiographic examination of materials and products with X ray and hard bremsstrahlung radiation

24 p4348 A70-45847

X RAY IRRADIATION

Characteristic X radiation intensity in atmosphere calculated using irradiating electrons spatial and energy distribution data

02 p0358 A70-12156

Radiation protective action of aminoalkylthiols, aminoalkyl disulfides, isothioureas, thiazolidine etc, in mouse tissues, erythrocytes and yeast cells exposed to X ray doses

03 p0419 A70-13307

Four layer semiconductor device triggering by X or gamma radiation calculated by transport equations for electron and hole distribution motion and electric field distribution

04 p0657 A70-14731

Experimental procedure for investigating radioprotective effectiveness of chemical compounds against X ray irradiation, discussing Cysteamine protection for golden hamsters and fetuses

06 p0993 A70-17429

- Nervous system influence on erythema radiation reactions from soft X ray irradiation, discussing blood supply effect
06 p0993 A70-17430
- X and UV radiation effects on *Escherichia coli* B/r in vacuum, noting irradiated cell inactivation and radiation sensitivity increases
06 p0995 A70-17750
- Sialic acids metabolic behavior in cerebrum, liver, myocardium and blood plasma of rats after X ray irradiation
07 p1205 A70-19289
- Reduced visual perception time in patients under X ray treatment of diencephalo-hypophyseal region
08 p1443 A70-20736
- Free radical formation in irradiated pyrimidines from ESR spectrum analysis of gamma irradiated single crystals of alloxantin, confirming radical stability
08 p1455 A70-20774
- Total body X irradiation effect on tyrosine hydroxylase and catecholamine levels in rats
09 p1616 A70-22318
- X ray effects on central nervous system noting mutations in rats, guinea pigs, chickens, dogs and rabbits
09 p1620 A70-22821
- Adrenaline effects on rats peripheral blood leukocyte content used for X-irradiation sensitivity estimation
10 p1822 A70-25177
- Gamma irradiation effects on thermal stability and decomposition of ammonium perchlorate
12 p2289 A70-26870
- X ray irradiation effects on phonocardiograms, EKGs, cardiac activity phases and Kunos-Garan mechanoelectrical coefficient in dogs
13 p2350 A70-28890
- Mammalian cells after X ray irradiation, showing two forms of DNA repair process
21 p3765 A70-42024
- X RAY PHOTOGRAPHY**
U PHOTOGRAPHY
U RADIOGRAPHY
X RAY SCATTERING
- Emission spectrum characteristic distortion in scattering of background X rays at large red shifts by melagalactic electrons, considering photon scattering effect
02 p0358 A70-12491
- Small angle X ray scattering pattern of polypropylene drawn at various temperatures in closely spaced draw ratio values through neck region
03 p0517 A70-14202
- X ray scattering from pulsar NP 0532 by interstellar grains
09 p1748 A70-23791
- X ray scattering by interstellar grains in direction of Crab pulsar and Sco XR-1
10 p1933 A70-25044
- Light elements detection in interstellar grains by observing halo around X ray source arising from small angle scattering
14 p2631 A70-30539
- Fe rich Fe-Al alloys single crystals, determining three dimensional order and atomic displacements coefficients by X ray diffuse scattering
19 p3452 A70-37839
- Integrated Bragg X ray scattering intensities for monatomic crystalline lattices, considering thermal diffuse component contribution
20 p3686 A70-39193
- Cosmic soft X rays scattering by interstellar dust grains, observing source angular size dependence on distance, wavelength and grain properties
20 p3695 A70-39233
- Low alloy Mo sheet recovery and aging characteristics studied by X ray scattering
22 p4055 A70-43124
- Scattered photon effects on cosmic diffuse X ray spectrum at balloon altitude, noting overcorrection for absorption of primary X rays
23 p4237 A70-44794
- X RAY SPECTROGRAPHY**
U X RAY SPECTROSCOPY
X RAY SPECTROMETRY
U X RAY SPECTROSCOPY
X RAY SPECTROSCOPY
- X ray spectrometer for space science and laboratory research, presenting CrK spectrum and fine structure
01 p0092 A70-11172
- Directional and spectral characteristics of bremsstrahlung X rays from auroral arc in low energy range during cosmic rays sounding rocket measurements
02 p0357 A70-12069
- Rocket-borne spectroheliograph for taking X ray and monochromatic pictures of sun in Mg II line
03 p0570 A70-13594
- Pionic transition in Ni isotopes to measure nuclear interaction effects, observing level shift and broadening
05 p0885 A70-16682
- Sco X-1 line spectra search in X ray spectrum by rocket-borne proportional counters, noting iron line emission
05 p0904 A70-16979
- Ni L alpha X ray emission line shape and position as function of bombarding electron energy, observing differential self absorption in anode
09 p1731 A70-22777
- Celestial X ray sources resolved against diffuse nearly isotropic background radiation by rocket and balloon experiments, noting brightness
09 p1745 A70-22895
- X ray astronomy, discussing emission processes, radiation classification for intensity plot against energy, cosmic sources distribution, etc
11 p2111 A70-26035
- Bragg reflecting crystals for spectroscopy and polarimetry in X ray astronomy
13 p2489 A70-28904
- X ray K spectra of Ti-Cr alloy for electron structure in titanium chromide phase region, discussing spectral intensities
13 p2435 A70-29375
- X ray bursts rise and fall observed by spectrometer onboard OSO-4
15 p2792 A70-31670
- Cyg XR-1 X ray spectrum variability by balloon-borne detectors as eclipsing properties of binary system
15 p2799 A70-31750
- Gamma ray pulse height spectra during active and quiet solar periods from midlatitude balloon flights
17 p3152 A70-35774
- Vertical secondary cosmic gamma spectra from primary nucleon and electron spectra, discussing effects of solar cycle and geomagnetic cut-off
18 p3308 A70-36500
- X rays measurement by spectrometer on satellite Cosmos 207
19 p3506 A70-38122
- X ray flux and energy spectrum of Cen-X2, Sco-X1 and Tau-X1 sources by rocket flight observation
21 p3872 A70-40659
- X ray source optical identification, discussing reflector optics, photometry and spectroscopy
21 p3873 A70-40671
- Innerbremsstrahlung of intergalactic protons colliding with electrons as source of cosmic background X rays, interpreting intensity and energy spectrum
21 p3877 A70-40700
- Galactic K series emission at 1-10 kev by low energy cosmic rays and diffuse X rays interaction with H I region heavy ions
21 p3877 A70-40704
- Solar X-ray spectra of active regions, examining emission lines, fluxes electron temperature and density and transitions
21 p3879 A70-40963
- Molecular orbital energy level diagram for metal ion X ray emission and absorption spectra interpretation from titanium and vanadium compounds
21 p3853 A70-41901
- X ray K and L emission bands and absorption spectra from TiO, TiN and TiC compared with density of states histograms, considering electronic band structure
22 p4086 A70-43003
- Soft X ray slitless spectrometer with gold-shadowed transmission gratings for rapid astronomical spectral surveys
23 p4196 A70-44418
- Solar X ray spectra interpretation by laboratory measurements, using plasma X ray source and potassium acid phthalate spectrometer
23 p4237 A70-44419
- Potassium acid phthalate crystal X ray spectrometric properties measurements, discussing parallel position rocking curves and reflection coefficients
23 p4230 A70-44420
- Auger spectra characteristics obtained with X rays and electrons from radioactive alpha sources
23 p4222 A70-44421
- X ray spectra from paraboloidal plasma focus devices, measuring electron energy produced by photoelectric effect and by Compton scattering
23 p4229 A70-44990
- X RAY STRESS ANALYSIS**
- Mo single crystals creep behavior temperature and stress dependences using X ray analysis
09 p1708 A70-23543
- X RAY STRESS MEASUREMENT**
- Nondestructive X ray stress measurement equipment for large specimen, using diffractometer focusing
01 p0085 A70-10022
- X ray elastic constants measured in cementite phase in high carbon tool steel following plastic deformation at tension, noting residual stresses increase and balance
06 p1084 A70-17126
- X rays of surface residual stresses produced during fatigue process of annealed low carbon steel and copper
06 p1084 A70-17128
- Al and Ti alloys residual stress determination by X ray diffraction
09 p1704 A70-22796
- X RAY TELESCOPES**
- Solar X rays observation from manned orbiting workshop of Apollo Applications Program, describing telescope/camera assembly and X ray event analyzer
11 p2057 A70-26506
- Twin crystal X ray telescope principle, design and application, discussing radiation sources nature and measurement methods
11 p2057 A70-26824
- Reflecting X ray telescopes with glancing incidence mirror, discussing design, manufacture and testing
16 p2904 A70-33150
- Balloon-borne X ray telescope star sensor with one arc minute accuracy, discussing design and Cyg X-1 location measurement
17 p3090 A70-35312
- Soft X ray astronomical instrumentation for space experiments, discussing Geiger tubes, gas counters, modulation collimators, telescopes, etc
23 p4196 A70-44416
- X RAY TESTING**
U X RAY INSPECTION
X RAYS
NT SOLAR X-RAYS
- Model explaining background X radiation spectral properties, assuming production by Compton scattering of radio, IR and optical quanta by relativistic electrons
01 p0171 A70-11124
- Diffused X ray background in isotropic world models in terms of Compton radiation from cosmic ray electrons in intergalactic space
02 p0356 A70-11743
- Diffuse soft X ray photoionization and heating of H I regions compared to cosmic ray heating
02 p0364 A70-11784
- Focused deuterium plasma discharge neutrons and X rays energy spectra, flux and time resolved collimation measurement with nuclear emulsions and scintillation detectors
02 p0348 A70-12241
- Cold cathode soft X ray source with discharge controlled by automatic pressure controller /APC/ or metering valve, noting applicability to radiography, luminescence, etc
02 p0271 A70-12743
- Cosmic X ray sources optically observed from ground, discussing identification, distribution, etc
02 p0359 A70-12790
- Discrete galactic and extragalactic X ray and gamma ray sources observation, discussing energy spectra, emission mechanisms, properties and suggested models
02 p0360 A70-12791
- Electron and hard photon /X and gamma ray/ production and propagation in expanding metagalaxy, deducing universe matter density, cosmic ray sources, etc
03 p0557 A70-13225
- Rotating prism method for obtaining time correlation between streak photographs and characteristic waveforms of flash X ray discharges
03 p0492 A70-13762
- Stellar X ray effect on nighttime lower ionosphere wave reflection suggested from VLF propagation data
03 p0562 A70-14224
- Three dimensional X ray imaging technique from conventional radiograph set photoreduced and projected by special purpose imaging system
04 p0686 A70-14561
- Gamma rays due to cosmic ray electrons bremsstrahlung in interstellar medium, predicting diffuse galactic X ray flux
04 p0742 A70-15713
- Ionization gage with screened collector, showing limit current in high vacuum equal to X ray radiation component
05 p0847 A70-15997
- Galactic X rays and high energy gamma rays in terms of cosmic ray electrons Compton scattering by submillimeter radiation
05 p0900 A70-16100
- Galactic synchrotron emission and diffuse X ray background, noting correspondence between spectral indices of radio and X ray emissions in polar directions
05 p0913 A70-16472
- X rays from Sco XR-1 compared with galactic cosmic rays and solar Lyman alpha radiation to determine ionospheric ionization causing radio wave attenuation
06 p1134 A70-17443
- Interstellar gas ionization and heating by background X radiation, studying neutral hydrogen density distribution between spiral arms and at galactic peripheries
07 p1383 A70-19401
- Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes
07 p1367 A70-19445
- Cosmic X ray source spectra possibly due to plasma bremsstrahlung
07 p1368 A70-19700

Nonthermal mechanism for high energy radiation and particle emission from X-stars and pulsars
08 p1575 A70-21364

Electron and hard photon /X and gamma ray/ production and propagation in expanding metagalaxy, deducing universe matter density, cosmic ray sources, etc
08 p1563 A70-21658

Supernovae remnants X ray emission associated with explosion process generating relativistic particles, indicating Crab Nebula as X ray object
09 p1749 A70-21998

Compact nonthermal radio sources in M87 giving rise to X ray source through Compton effect
09 p1744 A70-22520

Celestial positions and intensities of X ray sources in Sagittarius region obtained from rocket experiment
09 p1744 A70-22522

Magnetic funneling model proposed for accretion of matter onto neutron star to study X ray production during motion through interstellar cloud
10 p1931 A70-23902

Radiation transport calculations based on approximate method restricted to X ray and low energy gamma ray region of electromagnetic spectrum
10 p1915 A70-23977

Laser radiation conversion into kilovolt X rays using planar heated plasma, discussing electron temperature role
10 p1921 A70-23987

Two phase process for electron precipitation during polar substorm observed from balloon measurements of X rays produced by precipitated electrons in atmosphere
10 p1932 A70-24490

Motion of incidence regions of X ray radiation in auroral zone using simultaneous balloon measurements
10 p1935 A70-25283

Modified holographic technique for three dimensional display of X ray pictures
11 p2050 A70-25644

Celestial sources energy spectrum and absolute flux by rocket flights, attributing short lived outbursts to shock wave from nova expanding into circumstellar medium
11 p2113 A70-26297

Hazardous X ray bremsstrahlung from military radio electronic equipment, discussing radiation protection and operating safety standards
12 p2180 A70-28360

X- and gamma-ray detectors design based on combination of solar batteries with scintillators, noting stability requirements
13 p2404 A70-28657

Catalog in tabular form of discrete celestial X ray sources in energy region above 2 keV
13 p2489 A70-28903

Pulsating auroras X ray association with luminosity via balloon-borne X ray detector and ground based image intensifier TV system
13 p2478 A70-29228

Pulsar CP 1919 X ray emission upper limits from balloon flight data, comparing to NP 0532 over entire electromagnetic spectrum
13 p2478 A70-29270

Ionizing X radiation influence in lethal and sublethal doses on cerebral hyaluronic acid in mice and guinea pigs
14 p2536 A70-30186

Scorpio X-1 and Taurus X-1 /Crab/ X ray flux effects on nighttime ionospheric radio transmission, discussing ion production and resulting electron density
14 p2631 A70-30541

Auroral zone X rays balloon-borne conjugate recordings from Iceland and Antarctica
14 p2632 A70-31306

Cosmic X ray and gamma ray spectral energy distribution slope change explained by measurement process involving photon spectrum
15 p2792 A70-31431

Th 232 and U 238 pionic X ray energies and widths, suggesting anomalous effect for interaction between high-Z nuclei and pion
15 p2776 A70-31738

Polypropylene window proportional counter on board sounding rocket for cosmic soft X ray measurement
15 p2741 A70-32530

Hard X rays from Sco X-1, discussing high energy excess with large temporal variations
15 p2795 A70-32772

Taurus X-1 X ray emission polarization, using rocket-borne polarimeter
17 p3150 A70-34845

Crab Nebula pulsar NP 0532 optical and X ray synchrotron radiation, explaining ratio of pulsar energy flux to nebula
17 p3152 A70-35747

Diffuse cosmic X ray background galactic component, using model to predict angular spread
18 p3308 A70-36484

Atmospheric X ray photons measured regularly by sounding balloons in U.S.S.R., discussing X ray photon flux relation to charged particle fluxes
18 p3309 A70-36919

Galactic plane hard X ray emission measurements, considering gamma and X ray origin from Compton scattering of photons by galactic electrons
19 p3497 A70-38023

High energy galactic gamma ray and X ray flux explained by cosmic ray electron scattering
19 p3504 A70-38112

Diffuse cosmic X rays produced by Compton scattering of far IR radiation on cosmic ray electrons
19 p3505 A70-38113

Diffuse cosmic X and gamma ray spectrum analysis, considering implications for Compton scattering models in intergalactic space
20 p3695 A70-39049

Cosmic electron spectrum formation by acceleration, considering metagalactic background X radiation
20 p3695 A70-39174

Extrasolar X ray source optical observations, discussing identification method and individual characteristics
20 p3700 A70-39930

Cosmic X ray spectra of Cyg XR-2 in 0.15-20 keV range by spinning rocket-borne detector, noting interstellar absorption
21 p3872 A70-40664

Cas A and SN 1572 supernova remnant radio sources X ray spectra, investigating absorption by interstellar medium
21 p3873 A70-40666

X ray star effects on ionospheric LF radio wave field strength, examining absorption and ionization in D region
21 p3873 A70-40668

Diffuse cosmic X rays, discussing energy spectrum and contribution of galactic integration
21 p3875 A70-40686

Low energy diffuse cosmic X radiation flux comparison with power law spectrum, observing asymmetry with respect to galactic latitude
21 p3876 A70-40692

Cosmic X ray background measurements at 25-200 keV onboard ESRO Skylark rocket, plotting results against galactic latitude
21 p3876 A70-40695

Soft X ray background galactic absorption and intensity measurements indicating inverse relation to columnar atomic hydrogen density
21 p3877 A70-40698

Extragalactic cosmic X ray background source models for intensity and energy spectrum, noting Compton scattering of black body photons by relativistic electrons
21 p3877 A70-40699

X ray emission of hot dense intergalactic plasma, discussing evolution equation for temperature and degree of gas ionization vs red shift
21 p3877 A70-40702

Diffuse X rays from nonthermal intergalactic bremsstrahlung, discussing cosmic ray injection models
21 p3878 A70-40705

UV and nonthermal X ray interaction with intergalactic gas, considering photoionization and recoil associated with Compton X ray scattering
21 p3878 A70-40706

Solar wind X ray emission, investigating diffused cosmic ray origin and flow pattern models
21 p3878 A70-40708

Sco X-1 extar high energy radiation production, discussing relativistic electron synchrotron emission and magnetic fluctuations spectrum
21 p3878 A70-40709

Auroral X-ray radiation at magnetoconjugate points Kerguelen/archangel region, using balloon-borne spectrometers
21 p3813 A70-40839

Electron precipitation at geomagnetic storm sudden commencement in auroral zone from X ray balloon observations
21 p3814 A70-40937

Ionospheric D region electron production by cosmic X rays, noting Lyman radiation effects
21 p3882 A70-41099

X ray source population type optical observations, discussing interstellar matter and H II regions
21 p3882 A70-41117

Cosmic X ray extinction and halo by interstellar grains, applying to light elements identification
21 p3883 A70-42200

Galactic X ray background due to inner bremsstrahlung associated with suprathermal particles, taking into account interstellar gas self absorption and ionization rate
22 p4093 A70-42465

X ray sources identification with optical counterparts, noting lack of radio and pulsar type emissions
22 p4094 A70-42929

Galactic soft X ray and subcosmic ray heating and ionizing of interstellar H I regions
22 p4094 A70-42985

Diffuse X ray background attributed to X ray emission during supernova early phases
22 p4095 A70-42998

Laser and flash X ray shadowgraph techniques in hypervelocity ablation/erosion investigations in hyperballistics range
22 p4034 A70-43047
[SMPTÉ PREPRINT 28]

Daytime ionospheric effect of X ray flare from SCO XR-1, discussing LF radio wave intensity decrease
22 p4095 A70-43165

Ionospheric bremsstrahlung X ray flux and ionization rate, considering electron-atom and electron-ion collisions as function of altitude
22 p4095 A70-43293

Bremsstrahlung X rays caused by energetic electrons precipitating into upper atmosphere, calculating photoionization rate as function of altitude
22 p4096 A70-43310

Apollo command service module nondispersive X ray detection system for lunar composition map compilation, discussing design and performance
23 p4196 A70-44417

Current sheet motion and pulsar radio, optical and X ray emission, investigating finite thickness oscillating interface radiation with independent particle
24 p4397 A70-45760

X ray and neutron propagation in multilayer film composite, discussing boundary conditions in interferential systems
24 p4380 A70-46095

X-Y PLOTTERS

Digital plotters operational characteristics, capabilities and applications
10 p1845 A70-24581

Mass spectrometer modified for use with X-Y recorder for accurate and reproducible ionization efficiency curves
18 p3262 A70-37099

Mathematically defined curve incremental generation by computer, discussing parametric and non-parametric representations and digital differential analyzer technique
22 p3993 A70-43072

X-15 AIRCRAFT

X-15 aircraft project experiments utilized in space research including IR and UV spectrometer, horizontal scanning, stellar photography, micrometeorite and solar energy studies, etc
04 p0622 A70-14673

X-22 AIRCRAFT

X-22 VTOL aircraft initial parameter, state and covariance matrix estimates by Kalman filter and smoothing algorithms
16 p2885 A70-33329

X-22A AIRCRAFT

Test techniques for X-22A VTOL research aircraft during ground simulator work and actual flight test, describing stability and control characteristics
12 p2162 A70-28086
[AIAA PAPER 69-319]
X-22A ducted propeller V/STOL research aircraft handling characteristics and design
13 p2345 A70-28972

XANTHINES

NT CAFFEINE
NT URIC ACID
Xanthine dehydrogenase activity in Drosophila and Habrobracon under hypogravity conditions onboard Biosatellite
23 p4144 A70-43863

XB-70 AIRCRAFT

U B-70 AIRCRAFT

XENON

NT XENON ISOTOPES
NT XENON 129
NT XENON 133

Xenon sensitized photolysis of carbon dioxide compared with direct photolysis at 1470 A resonance line
03 p0441 A70-14005

Laser radiation absorption in xenon plasma, noting dependence on intensity due to atoms ionization
08 p1554 A70-21803

Angra dos Reis stone meteorite containing cosmogenic and fissionogenic xenon
10 p1935 A70-23850

Shock ionized xenon electrical conductivity measurement at high temperatures as function of Mach number, noting equilibrium effects
12 p2281 A70-27807

Carbon monoxide laser efficiency increase through addition of Xe, noting change in laser output spectral intensity distribution
21 p3835 A70-40572

Two probe electron energy distribution measurements in gaseous discharges with random and coherent oscillations, giving xenon results at low pressures
21 p3828 A70-41471

High gain Xe laser effects on longitudinal mode splitting, noting increased frequency of radiation propagation through highly dispersive medium
23 p4201 A70-44918

High pressure pulsed Xe laser obtained with transversely excited He-Xe discharge
24 p4355 A70-46087

XENON COMPOUNDS

Xenon absorption by myoglobin at various temperatures and pressures, presenting evidence for HpXe formation 14 p2545 A70-30927

XENON ISOTOPES

NT XENON 129
NT XENON 133

Isotopic composition and contents of xenon and krypton in Pesanyone meteorite suggesting presence of solar type gas component 04 p0754 A70-15274

I-Xe dating of Abee enstatite chondrite by combined neutron activation and mass spectrometric analysis 05 p0915 A70-16829

Radioactive dating of meteorites based on high temperature release of iodine-correlated Xe129 and Xe128 10 p1949 A70-25328

Kapoeta howardite Xe abundance and isotopic composition for indications of extinct Pu 244 and I 129 decay 24 p4402 A70-45380

XENON LAMPS

Ballistic compressor performance as high intensity pulsed light source, discussing Xe gas heating and laser pumping 02 p0311 A70-11921

Flash lamp-pumped organic dye scintillator lasers using coaxial Xe-filled lamp, tabulating blue-violet organic liquid lasers characteristics 03 p0499 A70-13161

Xenon arc lamp searchlight performance and application during Apollo 8 launch 12 p2207 A70-27662

Xenon high wattage short arc lamps for space/solar simulators, describing seals, electrodes shapes and cooling, operating characteristics, etc [AIAA PAPER 69-998] 13 p2384 A70-28520

Anodes heat transfer in xenon short arc lamps 17 p3023 A70-35154

Solar simulators using water cooled 30 kw Xe arc lamps 17 p3060 A70-35248

Two-bulb switchable pulsed spectral lamp with Cs and Xe for optical pumping studies 23 p4197 A70-44478

XENON 129

Meteorite I-Xe 129, demonstrating cold assembly of unequilibrated chondrite 19 p3519 A70-38036

XENON 133

Dogs left ventricle areas supplied by coronary arterial branches visualized utilizing scintillation photography and radioactive Xe 03 p0432 A70-12892

XEROGRAPHY

PKR portable xeroradiographic defectoscope for nondestructive testing of steel and Al alloys 02 p0301 A70-12486

XV-4 AIRCRAFT

Dimensional stability derivatives from XV-4B aircraft simulator varied in computer program for extracting roots of lateral-directional characteristic equation [AIAA PAPER 70-551] 13 p2346 A70-29016

XV-5 AIRCRAFT

Gust field in lowest atmospheric layer over homogeneous terrain, deriving statistical models and simulating effects on XV-5 V/STOL aircraft 21 p3750 A70-40784

XV-5A AIRCRAFT

U XV-5 AIRCRAFT

Y

Y AXIS

U COORDINATES

YAG (GARNET)

U YTTRIUM-ALUMINUM GARNET

YAGI ANTENNAS

Yagi antenna field theory derived from Maxwell equations by solving in cylindrical coordinates and satisfying boundary conditions 13 p2364 A70-28898

Auroral echoes polarization with horizontal and vertical Yagis, discussing aerial patterns 14 p2578 A70-31240

Dielectric rod and Yagi antennas radiation mechanism, determining pattern, gain and effective aperture 20 p3585 A70-39398

Directional periodic linear Yagi-Uda arrays application for open low pass or bandpass filters and open resonators 23 p4166 A70-44971

YARNS

Tensile properties of yarns at high strain rates and subambient temperatures determined for nylon, Dacron, Nomex, Beta Fibreglas and Karma metal 08 p1527 A70-21330

Microphotometric spectral reflectivity correlation to static Young moduli of carbon and graphite yarn filaments as optical testing method 08 p1497 A70-21350

YAW

Fail-operational fail-safe redundant yaw damper system, comparing reliability requirements with reliability prediction, development and production testing and field usage data [AIAA PAPER 70-392] 10 p1896 A70-24913

Spin requirement to limit projectile yawing oscillations in hyperballistic range 12 p2157 A70-27835

Turbulent boundary layer growth and thickness on yawed cones, discussing angle of attack effect along windward and leeward rays 16 p2838 A70-33875

Hypersonic flow field around yawed half angle cone from wind tunnel measurements including surface pressure distributions and flow visualization photographs 17 p3007 A70-34485

Yawed two dimensional wedges in hypersonic stream, including leading edge bluntness, viscous interaction and angle of attack effects [AIAA PAPER 70-783] 17 p3009 A70-34503

Steady supersonic flow past conical bodies at yaw, adapting Telenin numerical method 17 p3012 A70-35889

Compression and expansion characteristics of steady supersonic flow passing along yawing slender body of rotation, linearizing differential equations 18 p3207 A70-36382

Cruciform-finned missiles dynamic stability investigation by nonlinear differential equations of motion, considering roll lock-in, resonance instability and catastrophic yaw [AIAA PAPER 70-969] 20 p3715 A70-39560

Hypersonic flat and biconvex conical wings, calculating yaw effects on shock shape and pressure distribution 21 p3761 A70-40918

Hybrid fluidic damper control for yaw axis stability augmentation of commercial jet aircraft [SAE PAPER 700794] 24 p4294 A70-45853

YAWING MOMENTS

Projectiles yawing and rolling over long flight paths, describing onboard solar aspect sensor and telemetry link to ground stations [AIAA PAPER 70-538] 13 p2406 A70-29005

Missile roll rate from yawing motion frequencies determined by epicyclic theory [AIAA PAPER 70-536] 13 p2506 A70-29075

Load generation on two dimensional thin airfoil by yawed sinusoidal gust in incompressible flow, using lifting surface theory 13 p2344 A70-30025

YEAST

DNA penetration into normal and fast neutron irradiated yeast cells, using immunofluorescent microscopy 03 p0417 A70-13072

Radiation protective action of aminoalkylthiols, aminoalkyl disulfides, isothioureas, thiazolidine etc, in mouse tissues, erythrocytes and yeast cells exposed to X ray doses 03 p0419 A70-13307

Joint Chlorella-yeast cultivation on metabolites, investigating biomass accumulation and pigment synthesis 07 p1197 A70-18655

YHU-1 HELICOPTER

U UH-1 HELICOPTER

YIELD POINT

Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages 01 p0212 A70-11607

Polymers yield criterion determination using Hill method exemplified by polyvinyl chloride, discussing effects of transversal anisotropy and rheological properties 02 p0320 A70-11740

Prolonged temperature exposures with applied tensile stress found to increase tensile strength and yield point of aluminum alloy subjected to artificial agings 03 p0511 A70-13354

Disk stress concentrations calculation beyond elastic limits taking into account effect on bearing capacity 04 p0775 A70-15261

Test stand for endurance and creep testing of plastics, glazed ceramics and other brittle materials 06 p1028 A70-17665

Plane elastic-relaxing plastic shock wave yielding of Fe numerically integrated by two step stable difference scheme without pseudoviscosity 06 p1172 A70-18618

Fiberglass plastics structure safety design using time dependent limiting states with wear allowance 07 p1410 A70-19761

Limiting equilibrium of shells of revolution with different yield points under tension and compression 08 p1583 A70-20527

Yield criterion for plastic bending of transversely anisotropic circular plates under plane stress 08 p1589 A70-21250

Metastable austenitic steel mechanical properties after thermomechanical treatment with deformation, discussing stress-strain curves to exhibit yield point 08 p1525 A70-21963

Annealing effect on stress-strain curves of overaged and cold-rolled Al-Li alloy, observing yield drop 09 p1708 A70-23727

Yield point temperature dependence in heat resistant austenitic alloys, showing tendency to brittle failure under short term overloads 10 p1906 A70-25291

Limiting load for annular plates made of material having different yield points in tension and compression 11 p2129 A70-25560

Load carrying capacity of isotropic rigid-plastic shells of revolution with different yield points under tension and compression applied to spherically coupled cylinders 11 p2134 A70-25932

Elastic-plastic plane stress analysis of two dimensional structures based on Tresca yield criterion, using finite element technique 12 p2326 A70-27795

Tensile prestrain effect on yield locus of thin walled Al tubes from stress tests in torsion-tension space 13 p2431 A70-28536

Piecewise linear elastoplastic matrix structural theory with interacting yield planes, discussing kinematic and isotropic hardening 14 p2656 A70-30475

Uniaxial yielding correlation with substructure in Al-stainless steel metal matrix composites, using compressive loading test 15 p2756 A70-31565

Yield criteria for plastic deformation on glassy high polymers induced by stress field, noting crazing and shear yielding dependence on first stress invariant 15 p2764 A70-31787

Cylindrical shells with longitudinal rib reinforcements, deriving yield surface from strain mapping and collapse under pressure 15 p2816 A70-32006

Photoplastic material thickness change from mechanical and holographic measurements, showing correlation with isochromatics during plastic yielding 15 p2821 A70-32314

Computer program for limit analysis of rotationally symmetric shells, generating yield point load upper and lower bounds and velocity profile 15 p2822 A70-32351

Inelastic analysis of unidirectional composite subjected to transverse normal loading, discussing linear response up to elastic limit and subsequent crack propagation and failure 17 p3182 A70-34557

Steady state ultraharmonic oscillations of first and third order in yielding systems with linear work hardening law 19 p3542 A70-38059

Yield condition and Bauschinger effect in transition conditions for isotropic and orthotropic bodies 19 p3542 A70-38061

Anisotropic plasticity yield conditions, analyzing elastic to plastic deformation transition geometry 20 p3727 A70-39889

Elastic-plastic axisymmetric shells of revolution, analyzing large deflection and yielding for internal and external pressures by finite element method 21 p3937 A70-41738

YIELD STRENGTH

Offset yield strengths of TD-Ni and Al-aluminum oxide SAP type two phase alloys in tension and compression 01 p0119 A70-10736

Nonlinear stress-strain laws and yield conditions derived for anisotropic materials on basis of one, two and three invariants 05 p0926 A70-15914

Dynamic strength calculation for linear viscoelastic body and elastic-viscous liquid with retardation and relaxation times spectra respectively 05 p0940 A70-16511

Turbine blades root joints endurance limit concerning tensile stress determination at stress raiser contour for elastoplastic deformation and creep 05 p0954 A70-17062

Elastoplastic bending of inhomogeneous rectangular plates with modulus of elasticity and yield stress varying over plate thickness 08 p1583 A70-20530

Serrated yielding in hydrogenated nickel alloys, noting hydride stability role in Portevin-Le Chatelier effect 08 p1522 A70-21706

Yield stress and work hardening properties of tension-deformed vanadium single crystals as function of purity 08 p1522 A70-21750

Yield strength of cold worked MP Co-Ni alloys during aging at elevated temperatures, noting behavior in overaged condition 08 p1525 A70-21960

Energy dissipation-fatigue strength relationships during vibrations for prestrained metals and alloys 10 p1956 A70-24244

Microstructure and ductility of air- and vacuum-melted heats of corrosion resistant steels, investigating tensile and yield strengths for all grain directions 10 p1905 A70-25170

Mechanical notches and saltwater corrosion effects on flexural fatigue behavior of high strength structural alloys, investigating yield strength to density ratio 11 p2066 A70-26097

Indentation pressures in rigid perfectly plastic solids correlated with ratio between indenter strain and material yield strain for various indenter geometries 12 p2322 A70-27232

Ta solid solution hardening by nitrogen and oxygen, noting yield stress variation with interstitial gas concentration 13 p2434 A70-29084

Minimum principles for rate solution in elastoplastic work hardening materials with regular yield surface 13 p2513 A70-29152

Irreversible yield stress component of aluminum, Armo iron and tantalum with fcc lattice, showing temperature dependence 13 p2436 A70-29500

Yield strength of Nb-O single crystal solid solutions as function of temperature 15 p2763 A70-32808

Monograph on optimal angles and section partition for buckling strength of twisted and displaced bent bars 16 p2988 A70-33300

Ti alloy forgings for aircraft industry, utilizing high strength/weight ratio 17 p3097 A70-34357

High yield strength alpha-beta Ti alloys ductility control, observing fracture strength dependence on morphology, grain location and size for constant heat treatment 17 p3119 A70-34417

High strength Ti alloy for cryogenic applications, comparing plane strain fracture toughness 17 p3122 A70-34438

Cr-Ni stainless steels room temperature yield and tensile strengths improvement by nitrogen addition 17 p3122 A70-34553

Orowan stress calculation, discussing line tension, screw or edge character, spatial distribution and yield strength 17 p3191 A70-35457

Soft metal and dilute alloy dynamic yielding, describing high dislocation mobility effects on mechanical properties 17 p3191 A70-35459

Cobalt addition to Ti-Al-V alloys, examining yield strength, heat treatment, ductility and microstructure 18 p3271 A70-35964

Compressive yield strength of iron meteorites, discussing flow stress, microstructure, grain size, plastic deformation, slip lines, etc 18 p3314 A70-36498

Fatigue resistance of high yield strength steel weldments under uniaxial loading, describing cyclic behavior by S-N curve 18 p3278 A70-37114

Notched sheet failure prediction based on Dugdale crack model, including work hardening and finite width effects, strain fracture criterion and yield failure mechanism 19 p3548 A70-38624

Ti-Nb-Zr alloys strength and plasticity at various temperatures, noting compositional effects on tensile and yield strength 19 p3453 A70-38712

Yield stress in electron beam-refined Nb-N solid solution at room temperature and specific strain rate range 19 p3454 A70-38813

Niobium yield stress at room temperature for various nitrogen and oxygen concentrations 19 p3454 A70-38814

Polymeric materials yielding and fracture behavior under uniaxial and multiaxial fields, plotting octahedral shear stress 20 p3656 A70-39949

Al yield surfaces in stress space at elevated temperatures for virgin and prestressed material in torsion 21 p3840 A70-41436

Orientation and applied stress effects on pure Nb-6W bcc single crystals yield stress, discussing thermal activation strengthening and crystal dislocations 22 p4052 A70-42318

Glass-epoxy composites, measuring embedding filaments effect on time-temperature relationship under ultimate stress conditions 22 p4118 A70-43549

YIG [GARNET]
U YTTRIUM-IRON GARNET

YO-YO DEVICES

Yo-Yo system for satellite Azur to reduce payload angular velocity after separation from booster, analyzing final spin error [DGLR-69-43] 04 p0762 A70-15152

Yo-Yo system for satellite Azur to reduce payload angular velocity after separation from booster, analyzing final spin error 09 p1767 A70-23430

Rigid and stretch yo-yo device equations of motion for despinning rotating rigid body derived for two and three dimensional model 12 p2271 A70-27228

Azur satellite flight results, noting trajectory accuracy telemetry reception, yo-yo triggering and attitude control 13 p2505 A70-28766

Single stage /rigid/, two stage and stretch yo-yo despin mechanisms, discussing advantages, disadvantages and flight tests 16 p2985 A70-34114

Two stage yo-yo with nutation damper for despinning ATS synchronous satellites, describing mechanical and thermal design, lubrication, assembly, testing, etc 16 p2985 A70-34115

YOUNG MODULUS
U MODULUS OF ELASTICITY

YTTERBIUM
Magnetoelastic spin Hamiltonians applied to magnetostriction of Yb in YIG 06 p1128 A70-18642

Spectral emission in trivalent Ho doped Yb-Al garnet single crystals grown by optical zone melting 15 p2784 A70-32198

YTTRIUM
HF energy nonresonance dissipation in polycrystalline yttrium-garnet ferrites subjected to constant magnetizing field 11 p2097 A70-25384

Ferrite reactive modulation amplifier design, using yttrium garnet for noise reduction 19 p3386 A70-37629

Temperature dependent anomalous optical absorption of thin yttrium films under static ultrahigh vacuum 21 p3862 A70-40816

Radiochemical neutron activation analysis of In, Cd, Y and rare earth elements in rocks 24 p4310 A70-46375

YTTRIUM ALLOYS
Electron exchange coupling of Gd and Gd-Y alloy dihydrides from ESR indicating negative hydrogen ion entry 21 p3862 A70-41703

YTTRIUM COMPOUNDS
NT YTTRIUM OXIDES
NT YTTRIUM-ALUMINUM GARNET
NT YTTRIUM-IRON GARNET

Neodymium-yttriofluorite crystal laser free and Q switched operating characteristics 08 p1511 A70-20523

Vapor pressures and dissociation energy of yttrium dicarbide and tetracarbide over extended temperature, measured by Knudsen double focusing spectrometer 16 p2858 A70-34015

YTTRIUM OXIDES
Solid thorium yttria electrolyte applications in EMF measurements for Cr thermodynamic properties in Fe-Cr and Ni-Cr alloys 03 p0483 A70-13140

Partition functions and equilibrium constants for ScO, YO and LaO computed for 1000-8000 K, assuming doublet ground electronic state 10 p1946 A70-24970

Solid phase stabilization of zirconium dioxide by combined addition of yttrium and magnesium oxides 19 p3455 A70-38732

Nb-Zr alloy and yttria corrosion by high velocity Li flow, discussing material removal depth 22 p4055 A70-43100

YTTRIUM-ALUMINUM GARNET
Q switching of continuously pumped Nd/YAG using double Fabry-Perot etalons to replace laser resonator output mirror 01 p0112 A70-10903

Oscillation and doubling of 0.946 micron line in Nd ion doped YAG, calculating optimum nonlinear coupling to internal Q switched laser 01 p0113 A70-11169

Thermal resonator effects on YAG-Nd laser rods with dielectric covered ends, using resonant model to study continuous or half wave operation 02 p0311 A70-11850

Kr, Xe and W-iodine lamps efficiencies for pumping Nd-doped YAG compared for use in high continuous power lasers 02 p0311 A70-11922

High power giant pulse YAG laser using nonlinear material to achieve complete second harmonic conversion in intracavity experiment 05 p0859 A70-16470

Neodymium/YAG laser emission characteristics, studying spectral selection at various excitation energy levels and output-pumping power relationship 10 p1899 A70-24261

CW Nd-doped YAG laser rods, measuring thermal and optical properties before and during pumping with W lamps 10 p1900 A70-24942

Repetitively Q switched Nd-YAG laser operated with intercavity second harmonic generator to produce one watt average power 13 p2430 A70-29831

Nd-YAG Q switched laser using feedback loss control to increase switching speed for digital scanning 18 p3270 A70-36744

Neel temperature of thermally stable garnet orthoferrites of YFeAlMn composition 19 p3484 A70-37623

Periodic resonant reflector with thin air intervals for YAG-Nd pulsed laser for retinal safety 19 p3445 A70-37673

Thermally induced stress birefringence effect on linearly polarized CW YAG-Nd laser 21 p3834 A70-40566

YAG-ND laser volume limits condition for high power fundamental mode operation 21 p3836 A70-40808

Al substituted YIG crystal chemistry by cation distribution determination as function of Al concentration using Mossbauer spectroscopy 24 p4392 A70-46364

YTTRIUM-IRON GARNET
Yttrium-iron garnet optical properties at various wavelengths and temperatures, noting absorptivity decrease in IR region 06 p1126 A70-17767

Magnetoelastic spin Hamiltonians applied to magnetostriction of Yb in YIG 06 p1128 A70-18642

Noncontact thermometer designed around YIG modulator to demonstrate usefulness of optical component in near IR systems 09 p1676 A70-22788

Yttrium iron garnet sintering and grain growth rates dependence on yttrium/iron ratio [ACS PAPER 16-BE-68F] 09 p1740 A70-22982

Iris coupled YIG tuned filters for 12-4 GHz region, including high field magnets from vanadium permendur 12 p2202 A70-28165

Neel temperature of thermally stable garnet orthoferrites of YFeAlMn composition 19 p3484 A70-37623

Magnetization oscillation in single crystal yttrium-iron garnet under fluctuating SHF magnetic field 19 p3484 A70-37625

Single crystal yttrium ferrite garnet intrinsic electromagnetic radiation as function of coupling coefficient between specimen and waveguide 19 p3485 A70-37630

Microwave L-band correlator using YIG delay lines varied by electronically changing magnetic bias 20 p3597 A70-39468

Current-controlled negative resistance and conductive memory state in Si-doped single crystal YIG wafers 22 p4085 A70-42331

Ferromagnetic microwave amplifiers operation, describing longitudinal pumping amplifier using YIG 23 p4170 A70-43825

YIG single crystals piezo-optical effect and magnetic double refraction, describing stress measurement technique 23 p4230 A70-43931

Al substituted YIG crystal chemistry by cation distribution determination as function of Al concentration using Mossbauer spectroscopy 24 p4392 A70-46364

Zr and stainless steel pitting in acidic and near neutral chloride media, comparing controlled potential and conventional chemical corrosion tests results 09 p1706 A70-22939

Protective coatings with Si-Zr alloys for graphite, discussing wettability, spreading kinetics and impregnation 13 p2439 A70-29503

Hydrogen separation from supersaturated solid solution in Zn-Zr alloy, measuring at room temperature with eudiometer 15 p2784 A70-31982

Omega phase stability in Ti and Zr alloys, interpreting upper temperature limit from critical temperature associated with peritectoid reaction 17 p3119 A70-34411

Isothermal section at 1150 C of V-Zr-Cr cast and annealed alloys investigated by X ray and metallographic analyses, establishing various phase regions 19 p3453 A70-38711

Zr-Nb alloys mechanical strength increase due to beta phase martensitic decomposition 21 p3840 A70-41897

Ti and Zr based superconducting alloys with Nb content, measuring longitudinal critical currents in wire and ribbon samples 22 p4087 A70-43462

- Zr-Cu alloys corrosion resistance in carbon dioxide at high temperatures, noting composition effect on behavior 23 p4208 A70-44875
- Moire technique application to fracture toughness tests on Zr alloys, measuring crack opening displacements and plastic flow beneath notch 23 p4208 A70-44914
- Zr-Nb alloys athermal omega transformation studied by transmission electron microscopy 24 p4358 A70-45234
- Phase regions and lattice parameters of isothermal section of Mo-Zr-Cr system at 1100 C from microstructural and X ray analyses 24 p4361 A70-45832
- ZIRCONIUM CARBIDES**
- Parameters effect on radius of dispersion during plasma and detonation spray coating process of niobium and zirconium carbides 06 p1076 A70-17849
- Temperature dependence of Vickers pyramid hardness for Ti, Zr and Hf carbides at wide temperature range in vacuum 08 p1516 A70-20986
- CaO reaction rate with ZrC in effusion cells as function of reactant ion diffusion through product layer 13 p2362 A70-29496
- ZIRCONIUM COMPOUNDS**
- NT STRONTIUM ZIRCONATES
- NT ZIRCONATES
- NT ZIRCONIUM CARBIDES
- NT ZIRCONIUM HYDRIDES
- NT ZIRCONIUM OXIDES
- Chromite, zircon and quartz crystals in Muong Nong type tektites by X ray diffraction, discussing possible impact origin 20 p3709 A70-40088
- Ti, Zr and Hf diborides electrophysical properties, discussing temperature effects and electronic structures 23 p4205 A70-43991
- Thermal and electrical conductivities of zirconium and hafnium diborides polycrystalline powders at 300-1300 K 23 p4209 A70-44443
- Chemical diffusion kinetics of zirconium silicates formation during sintering under pressure, noting activation energy estimation 24 p4367 A70-45479
- ZIRCONIUM HYDRIDES**
- Titanium and zirconium dihydrides room and higher temperature electrical resistivity, Hall effect and thermal expansion coefficients 08 p1517 A70-21149
- Cold working effects on Zircaloy tubes mechanical properties and hydride orientation, discussing tubes use in nuclear power stations 17 p3123 A70-34645
- ZIRCONIUM OXIDES**
- Silver cathodes and plasma-sprayed anodes for cost effective hydrogen/oxygen fuel cells with solid zirconium dioxide electrolyte, considering carbon precipitation avoidance

- MHD power generation, investigating replenishment of zirconia electrodes from plasma in open flame and duct configurations 10 p1830 A70-24459
- Thermal conductivity and shock resistance of flame and plasma sprayed zirconia coatings on Ni-Mo-C metal [ACS PAPER 22-C-68F] 15 p2762 A70-32527
- Solid phase stabilization of zirconium dioxide by combined addition of yttrium and magnesium oxides 19 p3455 A70-38732
- Temperature dependence of titanium-zirconium oxide semiconductor compounds growth, using samples arc melted in purified He 20 p3687 A70-39631
- Hot pressed zirconia-zirconia ceramic fiber reinforced ceramic matrix composites, discussing mechanical properties and failure modes 22 p4057 A70-42285
- ZODIACAL DUST**
- Solar radiation pressure effects on zodiacal dust particle orbital velocity, computing Doppler shift of H-beta absorption line as function of elongation 01 p0070 A70-10348
- Solar radiation effects on evaporation of dust with high latent heat of vaporization, considering particles in comets and zodiacal cloud 11 p2117 A70-26648
- ZODIACAL LIGHT**
- Astronomic observation balloon Thisbe, discussing telescope, stabilization, basket control, data processing and objectives including zodiacal light and night sky brightness measurements 10 p1804 A70-23915
- Circumterrestrial dust component in Doppler shifted zodiacal light, considering Mie theory 11 p2045 A70-25698
- Night sky atmospheric continuum, zodiacal light and OI line observations with photoelectric color telescope 14 p2581 A70-31268
- Zodiacal light observations at elongation angles from sun, examining surface brightness, color index and polarization degree by balloon-borne instruments 18 p3318 A70-37012
- ZONAL HARMONICS**
- Satellite observations for determining earth shape and gravitational field zonal harmonics, using dynamic methods 03 p0473 A70-13188
- Earth potential errors from gravity and satellite motion measurements, discussing sectoral, tesseral and zonal harmonics with large and small second indices 03 p0473 A70-13190
- Geopotential zonal harmonic coefficients determined from satellite orbit perturbations, using spherical harmonics orthogonality 05 p0840 A70-16639
- Meteorological satellites motion parameters long term prediction, using final analytic relationships with allowance for zonal harmonics of gravitational field 07 p1329 A70-19650

- Quasi-biennial, annual and semiannual zonal wind and temperature harmonic amplitudes and phases in tropical and extratropical latitudes in stratosphere and low mesosphere 07 p1269 A70-19949
- Orbital perturbations earth satellite due to zonal and tesseral earth gravitational harmonics and external body fields 12 p2302 A70-27671
- First order node to node satellite orbital elements perturbations due to arbitrary zonal geopotential harmonic, determining computation methods and time 14 p2638 A70-30703
- Geopotential zonal spherical harmonics coefficients revised values determined from reduced Baker-Nunn observations for satellites 24 p4407 A70-45537
- Geophysical parameters from artificial earth satellite orbital elements evolution data, discussing atmospheric density and zonal harmonics 24 p4330 A70-45551
- ZOND SPACE PROBES**
- NT ZOND 3 SPACE PROBE
- NT ZOND 5 SPACE PROBE
- ZOND 3 SPACE PROBE**
- Global exploration of lunar surface by Luna 3 and Zond 3 automatic stations, confirming asymmetric distribution of sea areas on visible and remote hemispheres 01 p0177 A70-10335
- Three dimensional characteristic of light scattered by lunar surface determined for various incidence angles and azimuths from Zond 3 photometric measurements 04 p0744 A70-14441
- Three dimensional characteristic of light scattered by lunar surface determined for various incidence angles and azimuths from Zond 3 photometric measurements 13 p2485 A70-28466
- Photometric maps of reverse side lunar surface from AIM Zond-3 material 18 p3323 A70-37142
- ZOND 5 SPACE PROBE**
- Biological experiment on Zond 5 automatic station in earth-moon-earth trajectory determining cosmic radiation absorption and effects on plant seeds, turtles, larvae, etc 03 p0428 A70-14066
- ZOND 7 SPACE PROBE**
- Cloud distribution and optimal satellite picture foreshortening for global meteorological analysis of atmosphere, using Zond 7 photograph 15 p2771 A70-32110
- ZONE MELTING**
- Spectral emission in trivalent Ho doped Yb-Al garnet single crystals grown by optical zone melting 15 p2784 A70-32198
- Ti-Si eutectic alloys unidirectional solidification by zone melting 19 p3450 A70-37375
- ZONES**
- U REGIONS
